Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

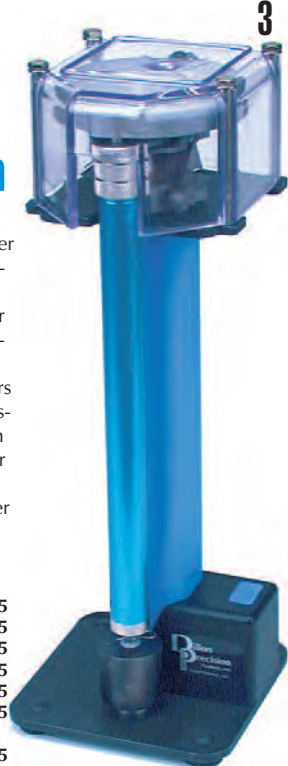

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

Lg. Primer Filler	K25-97077	\$314.95
Sm. Primer Filler	K25-97111	314.95
Lg. (Euro. 220v)	K25-97112	324.95
Sm. (Euro. 220v)	K25-97113	324.95
Sm. Conversion	K25-17903	47.95
Lg. Conversion	K25-17902	47.95
Nylon Packcloth Dust Cover	K25-11143	14.95

THE SMALLEST, MOST POWERFUL PERSONAL PROTECTION YOU CAN CARRY!

MADE IN TEXAS BY TEXANS!

CALL FOR FREE BROCHURE!

With just a quick turn of an allen wrench, you can change it to one of 16 barrels & 22 different caliber combinations!

Not available in California or Massachusetts.

We READ Our Mail!

I just wanted to write to say THANK YOU! I called your customer service department to inquire about getting some replacement parts for my RL 550B. The gentleman I spoke with was courteous, intelligent, and very knowledgeable. Even with my explanations of what I needed being like, "You know that doohickey that goes on the thingamabob...", he easily understood just what I needed.

I was also quite pleasantly surprised when I didn't have to pay shipping costs, let alone for the parts. I was greatly impressed to get that kind of support from a company these days. Most of the time it seems like they put people with I.Q.s equivalent to buffalo chips on the phone in the hope that you will get so frustrated that you hang up and don't call again.

I would also like to say, I LOVE MY RL 550B! I load 9mm Luger, .38 Special, .357 Magnum, .45 ACP, .223 Remington, .243 Winchester, 7.62 x 39 and .308 Winchester. Every one of them rolls through the press without the slightest hitch. It is, flat out, an amazing machine. I've had the opportunity to work on both Lee and Hornady progressives and they don't even come within a parsec.

Again, my thanks, and please keep "doin' it the way you do it!"

Sincerely,

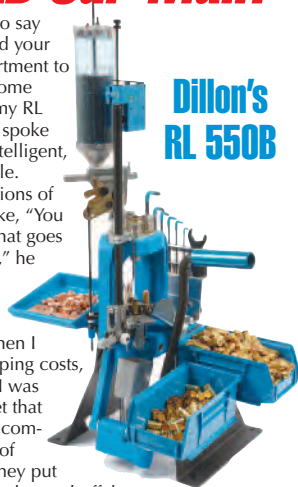

Steven Alexander – Raton, New Mexico
Thanks for your kind words, Steven! I have to agree with you about the RL 550B – it's my favorite machine, also. When you load several calibers like we do, it's the quickest machine to convert from one caliber to the next.

Thank you so much for the wonderful customer service you provide. You recently rebuilt my Square Deal "B" machine under warranty. The machine is 21 years old and has served me well. I look forward to another 21 years of service out of it.

Again, thank you for being a company that stands behind its products fully, and without hesitation.

Sincerely,

R. Wilson – Scottsdale, Arizona

All the electrical and/or electronic components of Dillon equipment and all Dillon textiles are covered by a one-year warranty from date of purchase. Any modifications performed to Dillon machines, or the addition of any unapproved equipment, including automated or mechanical add-ons from other manufacturers, is expressly not recommended and will void the Dillon warranty.

THE RUGER® SR45™

Like the popular Ruger® SR9® and SR40® pistols, the **SR45™** is perfectly sized to be comfortable and controllable with a slim, ergonomic grip and narrow slide. A short reach from the backstrap to the trigger creates a comfort level that will challenge any standard-sized, striker-fired pistol available today. Its structurally rigid, recoil-reducing, glass-filled nylon frame and alloy or stainless steel slide combine to create a low-maintenance, rugged and reliable handgun.

Large Caliber Pistol with a Trim, Ergonomic Profile

High Visibility 3-Dot Sight System

Unique Reversible Backstrap is Adjustable for a Flat or Arched Fit

Ambidextrous Thumb Safety and D-Shaped Ambidextrous Magazine Release

Ships with Two Flush-Fit, 10-Round Magazines

Brushed Stainless or Black Nitride Finishes

SHOT Show 2013: Where Have A

By Peter Caroline

If you were wondering, earlier this year, where all the ARs, MSRs and EBRs had gone, I'll tell you...they were all in Las Vegas, at the SHOT Show...Armalite, Bushmaster, Colt, DPMS, *et al*, *ad infinitum*. And from what the folks at the booths were saying, they're working three shifts per day, 24/7, just to fill current orders.

What's new? North American Arms has a neat little mini-revolver, entitled the Sidewinder **[Photo #1]**. The cylinder, with star extractor, swings out to the side like most modern full-size revolvers. Only difference is, it swings out to the right. It's available in .22 Magnum Rimfire, but can be ordered with an optional .22 LR cylinder and crane. ([www.North AmericanArms.com](http://www.NorthAmericanArms.com))

Arsenal Firearms (www.arsenalfirearms.com) was displaying something totally different...a double barrel 1911A1! You might well ask why. Well, because nobody ever made one before. It is, admittedly, a handful. But it is a beautifully crafted handful, and you'll probably be the only one at the range who has one. Arsenal was also showing its more conventional Strike One 9mm pistol **[#2]**, with perhaps the lowest barrel center line over handgrip that I've seen since the old H&K P7.

Some years ago, I bought a Kahr P380 (www.kahr.com). It was a pricey little .380, retailing at about \$650, but super-accurate. Now, Kahr has come out with their new CW380 **[#3]**, at \$419 MSRP. Same size, same caliber, and a hell of a deal!

Just to add yet another option to your choice of .380s, Kimber (www.kimberamerica.com) has introduced their Micro CDP, a mini 1911 design that weighs only 14 oz., has an ambidextrous safety and a 2.75" barrel. It's a superbly built little gun, and it should be, at an MSRP of \$1,139.99.

On the larger and noisier side, Uberti (www.uberti.com) was displaying a bright nickel-plated replica of the classic S&W Russian Model **[#4]**, with spurred trigger guard and hump-backed gripstrap. Caliber was .45 Colt, which is not authentic, but still fun.

At the Ohio Ordnance Works booth, I ran into one of my old loves. They are currently making an authentic Browning Automatic Rifle (BAR), .30-06, complete with bipod **[#5]**, but semiauto only, so you can own one without all the paperwork (so far). MSRP \$4,300. I'm seriously tempted. (www.ohioordnanceworks.com)

Everyone knows that the last thing we need is a whole new cartridge, right? Wrong! Armscor's Rock Island Armory was showing off their new TCM Series 9mm/22 1911-style pistols. The cartridge looks like a slightly longer 9mm Parabellum necked down to .22 caliber. Bullet speed is a phenomenal 2,000 fps, with light recoil and an impressive muzzle flash. It comes with a standard 9mm barrel for practice. Must have! (www.RockIslandArmory.com)

All The ARs, MSRs and EBRs Gone? ¹¹

Lipseys's (www.lipseys.com) seems to have cornered the market on interesting Ruger variations. I got to play with their new Ruger Bearcat Shopkeeper [#6], a 3" barreled .22LR stainless single-action, with a birdshead grip. They made me give it back. Damn! They were also showing an exclusive and very lovely Ruger 77/22 bolt action rifle with a full-length Mannlicher-style stock. Here's a thought: what if they made a Ruger 10/22 takedown model with a fancy wood Mannlicher stock, in a custom canvas-and-leather carrying case? Could be a winner, albeit pricey.

I'd heard that Chiappa (www.MKSChiappa.com) was coming out with a .40 S&W version [#7] of their innovative Rhino .357 revolver. I really liked the .357, so I stopped by the booth to check out the new model. Unfortunately, it wasn't yet available, but I got to handle a limited edition 6" Rhino .357 with a flashy gold finish. Outrageous, but oddly appealing! Chiappa was also showing some interesting Winchester-style lever-action shotguns and rifles, at very reasonable prices.

Several years ago, Armalite (www.armalite.com) was making noises about producing a .45 ACP semiautomatic pistol in the same style as their AR-24 9mm. As I recall, it was at the same time as an earlier "assault rifle" ban scare, and they had all they could do to keep up with long-gun demand, so they shelved the project. Well, the .45 may be back. I saw a prototype [#8], and it looked good. They also were showing a couple of d.a. revolver prototypes [#9], made in Turkey, that looked interesting. Stay tuned.

Colt (www.coltmfg.com) was showing off their USMC 1911A1. It's good to see that the old warhorse, in new camo garb, is back in the hands of our military. They also were displaying a limited edition brass Gatling Gun, in .45-70, of course. Pony up \$50K, and you, too, can mow down the invading hordes of whomever.

One of the less-delightful aspects of the firearms experience is, you have to clean the damn things. Unless you have unusually compliant children, this can be a chore. Well, no more. Lyman (www.lymanproducts.com) was showing their Turbo@Sonic™ 6000 ultrasonic cleaner [#10]. Just dump your hogleg (sans grips) in this 6.2-quart tank with some Lyman cleaning solution, and in just a few minutes it emerges, absolutely immaculate. This boon to mankind retails at only \$349.95, and also cleans up to 1,300 9mm cases at once.

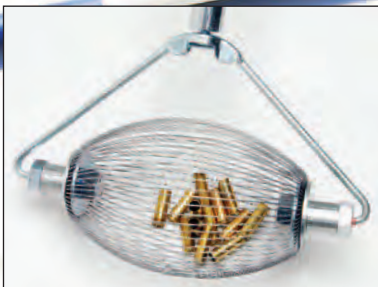

By the time this article is printed, I suppose we will know if we still maintain our Second Amendment rights, or if the foes of firearms freedom will have gained some (hopefully short-term) ground. The people I met at the SHOT Show embody all that is good about this country. Let's keep it that way!

12 WANT TO RELOAD? SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K25-21894 \$44.95

THE SHELLSORTER

...is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting.

The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time.

The **SHELLSORTER** is made of ABS, a strong plastic which will give a lifetime of service.

K25-19972 \$39.95

FROGLUBE CLP

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products. Frequent use will keep firearms running at optimal performance and not harm the FrogLube coating.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K25-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K25-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

AUTO PRIME SYSTEM

Includes:

Primer Housing / Shield
Primer Slides, Large/Small

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty

All for ONLY...
\$439⁹⁵*

K25-14261

Reloading dies sold separately.

*Prices vary on exotic-caliber machines.

Total Price as pictured here with optional accessories: **\$736.60**

.45 ACP Die Set	K25-14404	\$63.95
Strong Mount	K25-22051	\$48.95
Alum. Roller Handle	K25-17950	\$45.95
Low Powder Sensor	K25-16306	\$41.95
Aluminum Bullet Tray	K25-22214	\$41.95
RL 550 Toolholder with Wrench Set	K25-11541	\$28.95
Cartridge Case Bin/Bracket	K25-11185	\$24.95

RL 550B ACCESSORIES

A. RL 550B CALIBER CONVERSION KITS
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K25-20782, \$76.95 ea.**
 Magnum Rifle Powder Bar **K25-21353, \$29.95 each**
 X-Small Powder Bar **K25-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K25-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

K25-20064, \$11.35 each
Three or more, \$10.25 ea.

X-Large Powder Die, **K25-21253, \$19.95 each**

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

K25-13909, \$22.95 each
Three or more, \$20.95 ea.

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

K25-22055, \$20.95 each
Three or more, \$18.95 ea.

G. 1" BENCH WRENCH

K25-10842, \$7.95 each
Two or more, \$7.10 ea.

H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol **K25-14450**
 Small Pistol **K25-14451**

\$254.95 (110v US Model)

Large Pistol **K25-14453**
 Small Pistol **K25-14454**

\$264.95 (220v Euro Model)

CASEFEEDER CALIBER CONVERSIONS (Page 16)

\$23.95 each

K. 550 SPARE PARTS KIT

- 1 Seating Punch, Small
- 1 #10 Tinnerman Insert
- 1 Primer Cup, Large
- 1 Primer Cup, Small
- 1 Bellcrank Cube
- 1 3/8" Index Ball
- 1 550 Brass Tip Set Screw
- 1 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 1 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K25-22080** is **\$254.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below). Replacement carbide cutting blades, **K25-13141**, are **\$19.95** each. Upper lock rings, **K25-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

K25-20095
\$100.95

Dillon's Case Preparation Equipment

CV-2001
K25-20493
\$187.95

CV-750 K25-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K25-20675 \$72.95

CM-500 Case/Media Separator K25-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K25-22047 \$212.95

Euro CV-750 K25-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K25-13804** **\$8.95**
Case (20 pc.) **K25-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **K25-13733** **\$8.95**
Case (20 pc.) **K25-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **K25-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **K25-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **K25-13496** **\$15.95**

Why the NRA is Rig

By Selwyn Duke

Upstate New York's Catskill Mountain Range is a bucolic place near and dear to my heart. It's where storybook character Rip Van Winkle enjoyed his legendary slumber, and its scenery hasn't changed much since he was born of Washington Irving's fertile imagination. Yet, like Van Winkle, if I'd fallen asleep for 20 years when first arriving in that verdant heaven, I, too, would have noticed some profound changes upon awakening.

About two decades ago, many rural Catskill teens – sons of farmers and hunters and fishermen – suddenly started donning baggy pants and reflecting “gangsta” counter-culture despite living nowhere near any large urban center. The following generation of teens experienced today's recent cultural evolution and often sport multiple tattoos and body piercings despite living nowhere near NYC's grungy East Village. Yet I'm wrong in a sense: those places were actually very close – a television set away.

My old hinterland haunt was once a place where, if you wiggled the rabbit-ear antenna just right, you could pull in one or two TV stations. And what could you see? Perhaps reruns of “The Brady Bunch,” perhaps the news. But about a quarter century ago came VCRs and video stores; then cable and satellite TV; and, finally, the Internet. The serpent had entered Eden.

In the wake of the Sandy Hook tragedy, much fire has been directed at gun advocates in general and the National Rifle Association in particular. In response, the organization has implicated Hollywood and popular culture in general for mainstreaming mindless violence. Yet even many Second Amendment advocates part company with the NRA on this point. After all, blaming entertainment for crime smacks of blaming guns. Yet there's quite a profound difference: guns don't transmit values. But how we use guns – and knives, fists and words – on screen certainly does.

This message is often a tough sell, however, as it's very natural to defend one's entertainment. We grow up with certain shows, movies, characters and music and often become emotionally attached to them; in fact, we may identify with them so closely that an attack upon them can be taken personally. It's the same phenomenon that causes an avid sports fan to defend his favorite team as if it's his favored son. And it is then we may hear that old refrain, “It isn't the entertainment; it's the values learned at home.” (They're actually one and the same since entertainment enters the home with, in the least, the parents' tacit approval.)

Yet it appears few really believe that refrain. Sure, depending on our ideology, we may disagree on what entertainment is destructive, but that it can be destructive is something on which consensus exists. Just consider, for instance, that when James Cameron's film “Avatar” was released, there was much talk in the conservative blogosphere about its containing environmentalist, anti-corporate and anti-American propaganda. At the other end of the spectrum, liberals wanted the old show “Amos 'n Andy” taken off the air because it contained what they considered harmful

stereotypes. Or think of how critics worried that Mel Gibson's “Passion of the Christ” would stoke anti-Jewish sentiment or that Martin Scorsese's “The Last Temptation of Christ” would inspire anti-Christian feelings, and how the Catholic League complained that “The Da Vinci Code” was anti-Catholic. Now, I'm not commenting on these claims' validity. My only point is that when our own sacred cows are being slaughtered, few of us will say, “Well, yeah, the work attacks my cause, but I don't care because it's the values taught at home that really matter.”

The truth? Entertainment is powerful. This is why Adolf Hitler had his propaganda filmmaker, Leni Riefenstahl, and why all modern regimes have at times created their own propaganda films. It's why the ancient Greeks saw fit to censor the arts and American localities traditionally had obscenity laws. And it is why, while “The pen is mightier than the sword” and a picture mightier still, being worth a “thousand words,” we have to wonder how many words moving footage coupled with sound would be. How mighty art thou, Tinseltown? Well, we worry that a child witnessing one parent continually abuse the other will learn to be violent, as children learn by example. Yet often forgotten is that while a person can model behavior seven feet away from the television, he can also model it seven feet away through the television.

And what effect do our entertainment role models have? Much relevant research exists, and the picture it paints isn't pretty. For instance, a definitive 1990s study published by *The Journal of the American Medical Association* found that in every society in which TV was introduced, there was an explosion in violent crime and murder within 15 years. As an example, TV had been banned in South Africa for internal security reasons until 1975, at which point the nation had a lower murder rate than other lands with similar demographics. The country's legalization of TV prompted psychiatrist Dr. Brandon Centerwall to predict “that white South African homicide rates would double within 10 to 15 years after the introduction of television...” But he was wrong.

By 1987 they had more than doubled.

Then the *Guardian* told us in 2003 that, “... Bhutan, the fabled Himalayan Shangri-la, became the last nation on earth to introduce television. Suddenly a culture, barely changed in centuries, was bombarded by 46 cable channels. And all too soon came Bhutan's first crime wave – murder, fraud, drug offences.” The serpent had struck again.

And exactly how it strikes is interesting...and scary. Lt. Col. David Grossman, a former West Point military psychologist and one of the world's foremost experts on what he calls “killology,” explains the process well. In his essay “Trained to Kill,” he speaks of how the military learned that during WWII only 15 to 20 percent of riflemen would actually shoot at an exposed enemy soldier. Yet this rate was increased to 55 percent during the Korean War and then 90 percent in Vietnam. How? By applying psychological principles, says Grossman, identical to the forces our children are exposed to through entertainment. They are (all quotations are Grossman's):

- **Brutalization and desensitization:** this occurs in boot camp where the training is designed "to break down your existing mores and norms and to accept a new set of values that embrace destruction, violence, and death as a way of life." Entertainment can perhaps be even more effective when doing this to children because the process often starts when they're too young to distinguish between fantasy and reality. Grossman explains:

To have a child of three, four, or five watch a "splatter" movie, learning to relate to a character for the first 90 minutes and then in the last 30 minutes watch helplessly as that new friend is hunted and brutally murdered is the moral and psychological equivalent of introducing your child to a friend, letting [him] play with that friend, and then butchering that friend in front of your child's eyes.

- **Classical conditioning:** the Japanese employed this during WWII. Soldiers would have to watch and cheer as a few of their comrades bayoneted prisoners to death. All the servicemen were then "treated to sake, the best meal they had had in months, and to so-called comfort girls. The result? They learned to associate committing violent acts with pleasure." Likewise, today "[o]ur children watch vivid pictures of human suffering and death, learning to associate it with their favorite soft drink and candy bar, or their girlfriend's perfume."

- **Operant conditioning:** "When people are frightened or angry, they will do what they have been conditioned to do.... [It's] stimulus-response, stimulus-response." Thus, one of the ways the military increased riflemen's willingness to shoot exposed enemies was to switch from the bull's-eye targets of WWII training to "realistic, man-shaped silhouettes that pop into their field of view." The soldiers have only a split-second to engage this new "stimulus" with the response of firing reflexively. As for kids, "every time a child plays an interactive point-and-shoot video game, he is learning the exact same conditioned reflex and motor skills." This can help explain, says Grossman, why robbers under stress will sometimes reflexively shoot victims even when it wasn't "part of the plan."

If the above seems at all simplistic, note that it's a life's work boiled-down to 500 words. Suffice it to say, however, that entertainment has an effect. And do we really consider today's entertainment benign? We've transitioned from a pre-TV America where boys sometimes brought real guns to school for target shooting to a TV-addicted America where boys bring toy guns to school and get suspended. And while some blame this societal sea change on the AR-15, I think it's better explained by PG-13.

New from North American Arms, Inc. The NAA Sidewinder!

LR conversion cylinder assembly shown with star extractor

North American Arms is pleased to announce the **Sidewinder** mini-revolver. This important new product features a "swing-out" style cylinder assembly similar to most other modern revolvers. This allows easier loading and unloading. This revolver is offered in standard .22 Magnum with an optional .22LR conversion cylinder assembly.

Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

Stylemaster-DL \$150

A superior shoulder rig made of best-quality leather with solid brass fittings — no cheap plastic, no soft suede or other low-quality leather.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K25-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K25-11702 89.95**
"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.
- "Officers" Model" Safepacker, RH **K25-11701 89.95**

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

Uncle Mike's Kydex Holsters

Michaels of Oregon's injection-molded Kydex holsters have a level of detailing, quality and affordability unmatched by other manufacturing methods. The almost-vertical rake allows for behind-the-hip carry, and for some applications, the holster can function as a crossdraw. Smaller-size holsters can also be used for "appendix" carry. To aid concealment and to assist in the draw, the holster rides close to the body at a mid-level height. The injection-molded belt loop is designed to accept and support a variety of belts from 1" to 1.75" wide.

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

XL 650 (Electronic Scale)	K25-22118	266.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

SDB Mount	K25-22223	\$64.95
RL550/XL650	K25-22051	48.95
XL650-only	K25-22052	45.95

Bullet Tray Kits

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the "feel" of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550B/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

Bullet Tray Kit	K25-22214	\$41.95
RL 1050 Tray Kit	K25-22215	41.95

RL 550B/XL 650 Toolhead Stands

This all-metal stand provides a place to store your complete caliber conversions: toolhead, reloading dies, powder measure, shellplate and locator buttons. The mounting system makes it possible to secure the toolhead stands to your bench, keeping them from getting knocked over by your well-meaning-but-clumsy shooting buddies.

Dillon's new toolhead stands are finished with a high-quality, durable powder coating designed to meet the needs of even the highest volume, commercial reloading operation. They are available individually or in packages of three, and are packaged with reloading data labels to help you record your favorite loads.

550/650 Stand **K25-22055 \$20.95 ea.**
Three or more, **\$18.95 ea.**

Low Powder Sensor

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light.

This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Sensor **K25-16306 \$41.95**

Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel."

A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

Dillon's Pistol Die Sets

Size Die

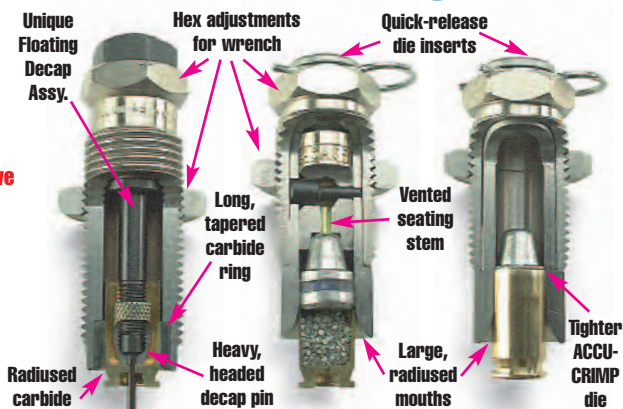

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mouser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag., .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, K25-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

'Belted Magnum' Powder System

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder.

Like all of Dillon's powder measures, the Belted Magnum Powder System is case-activated and can be used with your RL 550B, XL 650 or AT 500 reloader. It's ideal for loading large-caliber magnum rifle cartridges. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

The "Belted Magnum" Powder System is based on our SL 900 Shot Dispenser, so the Maximum Charge Bar won't work in our standard powder measures – you'll need to buy the entire system. The good news is that the "Belted Magnum" Powder System has an integral drain, so it's easy to empty the hopper in order to change powder types; so, if you load several big calibers with various powders, it's easy to switch from one to another.

Keep plenty of extra powder on hand, because when you're dispensing 100-plus grains into every cartridge, you're gonna need it! Magnum Powder System **K25-97126 \$137.95**

PROTEKTOR MODEL

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

Bullet Comparator

Correct bullet seating depth is critical to accuracy. In addition, minor variations in bullet seating depth will have an effect on both pressure and velocity. The L-N-L Bullet Comparator provides precision handloading dimensions.

CLASSIC HANDGUNS: T

By John Marshall

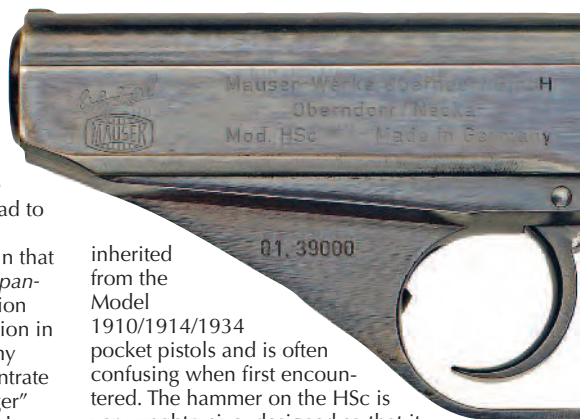

The Mauser HSc pistol had its beginnings in the 1930s. At that time, *Mauser-Werke*, in the town of *Oberndorf am Neckar*, Germany had been producing a fairly popular line of single-action pocket semiauto pistols in calibers .25, .32, and .380, the models 1910, 1914 and 1934. However, the Carl Walther company of Zella-Mehlis in Germany had introduced its advanced double-action Model PP in 1929 and the similar but more compact PPK pocket pistol in 1931. When Mauser sales dropped and the public began to show a preference for the more modern Walther pistols, Mauser management decided to develop a competitive double-action pistol of their own.

The design of the new pistol was assigned in 1933 to Alexius Wilhelm Seidel (1909 – 1989) in the Mauser Development Section. Seidel was a talented engineer who later went on to become a co-founder and the chief engineer of Heckler and Koch in the postwar years. His work was difficult, as he had to maneuver around the existing and iron-clad Walther patents. Nonetheless, he succeeded in that task. His brainchild became the *Hahn Selbstspanner Pistole* (Self-Cocking Hammer Pistol) version “c” in 1934. Mauser was set to begin production in 1938, but the German *Heereswaffenamt* (Army Weapons Bureau) insisted that Mauser concentrate on production of the K98k rifle, the P.08 “Luger” and M1934 pocket pistol. With the eventual blessing of the German arms authorities, production of the HSc began in December, 1940. The first serial number was 700001, which was stamped on the lower front grip strap. The last three digits were also marked on the barrel and slide. The introduction of the HSc ended production of the single-action Model 1934.

The first 1,345 of the pistols are now known as the “low grip screw” pistols because the grip retention screws were close to the bottom of the grips. Most of this production run went to the *Kriegsmarine* (German Navy). The grip screws were then moved up about 3/4”. At serial number 701348, the *Heer* (Army) began purchasing the pistol. Subsequently, guns were bought by various *Polizei* (Police) departments, including the infamous *Schutzstaffel* or SS. The *Luftwaffe* (Air Force) purchased their pistols through the *Heereswaffenamt* instead of directly. The HSc also found popularity with military troops who were not issued pistols; they often bought them on the commercial market. These pistols were produced in 7.65mm (32 ACP). A few experimental models were subsequently made in .22 LR caliber.

The HSc was a blowback pistol, and was designed to fire double action on the first shot and single action on subsequent shots. Unlike the Walther PP series, the rotating safety lever on the

slide does not interpose a block in front of the hammer. It swings the firing pin out of the impact area of the hammer. The safety does not lower the hammer; this has to be done by pressing the trigger. Once the hammer is down and the safety engaged, the pistol cannot be brought to full cock except by retracting the slide, as the safety also blocks the sear. There is no external slide stop. The slide will lock back if the pistol is empty regardless of whether or not there is a magazine present. The insertion of a loaded or empty magazine will cause the slide to snap forward. This is a strange feature

inherited from the Model 1910/1914/1934 pocket pistols and is often confusing when first encountered. The hammer on the HSc is very unobtrusive, designed so that it

“It pointed naturally and valued for its ergonomic sleek lines and quality. day it lived in very compact co-existence with the Walther PP series of pocket pis

would not easily catch on clothing. It can be manually cocked for a single-action first shot if desired. Because of its rounded form and close fitting, the hammer seals the internal mechanism against dust. The gun cannot be fired when the eight-round magazine is removed. The extractor doubles as a loaded chamber indicator, and can be felt when it protrudes about 1 mm over a loaded round. The magazine release is at the heel of the butt, in

The Mauser HSc Pistol

accordance with European custom. Field stripping the unloaded pistol is accomplished by cocking the hammer, engaging the safety, depressing the take-down catch inside the trigger guard and moving the slide with the barrel and recoil spring forward very slightly to remove. The barrel and recoil spring are then easily taken out of the slide. Further disassembly is not recommended. The HSc utilizes a significant number of stamped internal parts.

All Mauser HSc pistols made during WWII will bear the *Beschusstempel* (factory firing proof) of an eagle over "N" stamped on the

slide. Very late examples had a phosphate finish quite similar to U.S. Parkerizing, bore an Eagle over WaA135 acceptance marks, and had Eagle over N proofs. These are considered rare and very desirable for collectors today. From 1943 on, brown or black *Kunststoff* (plastic) grips substituted for the original wood. Pistols intended for the police and military were generally issued with two matching magazines and a flap holster, and these are also desirable to find.

The Oberndorf area was captured by American troops in April, 1945, and production of the HSc was terminated by the occupiers. The Mauser facility fell into the French sector of divided Germany following the war, and was occupied by the French from May 1945 to June 1946. The French continued to produce about 15,000 additional HSc pistols in Oberndorf, most of which went to their troops in Indochina. These had serial numbers in continuation of the wartime system, up to about number 971239. There were no proof marks on these guns, but an interlaced "WR" factory inspection mark was stamped on most pistols at the right rear of the trigger guard. Most of the factory was subsequently destroyed and the manufacturing equipment distributed to other Allied nations.

In 1967, a reconstituted Mauser-Werke returned to Oberndorf, and from October 1968 to December 1977, a total of 63,118 new HSc pistols were manufactured. 18,868 were made in 7.65mm with a serial number range of 00.1001 to 00.19868, and 39,250 in 9mm Kurz (.380 ACP) with a serial range of 01.1001 to 01.40250. A special group of 5,000 in those two calibers, the "American Eagle Edition," brought this series to a close. The pistol illustrated was made in 1975. It's chambered in 9mm Kurz, and is so marked on the chamber of the barrel, over ".38". It came with both a finger-extension magazine and one with a flat baseplate. An HSc "Super" model was made for a while under Mauser license by the Renato Gamba company in Gardone, Italy. It featured a 13-round two-column magazine, a recurved trigger guard, and a magazine release located at the bottom rear of the trigger guard. It unfortunately never approached the quality of the original German HSc.

Today, the Mauser HSc is no more, but the pistols, particularly those of wartime manufacture, are rapidly becoming valued collector's items. This classic pistol had a number of innovative features. It pointed naturally and was valued for its ergonomics, sleek lines and quality. In its day it lived in very competitive co-existence with the Walther PP series of pocket pistols. Surviving examples still make very effective personal defense weapons.

right trigger guard web, the front of the right slide and on the

barrel breech. In addition, military and police pistols will have a specific *waffenamt* (acceptance stamp) on the left trigger guard web. The wartime HSc was produced from December 1940 to April 1945, with a grand total of 259,923 being made. The Army got 135,000, the Navy 27,100, and the Police organizations 29,300. The rest of production went to the commercial market. Most pistols had a polished blue finish, while later wartime produc-

Replacement Skyscreens	K25-18124	21.95
Replacement M2 Sensor	K25-18877	36.95

The M2 Chronograph comes with sensors, screens and one two-foot mounting bracket. A nylon carrying case and tripod are available options. The CED7000 Shot Timer is a breakthrough in technology. No other timer to date offers this combination of advanced features, compact size and light weight. This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

Take out your frustrations, and build your grip strength at the same time! Just think about...oh, the new Supreme Court, socialized medicine, tax increases, high-capacity magazine bans, etc., and use the one-pound ball. Or, think about the "bailout" legislation and the luxury resort vacation the execs at AIG enjoyed on YOUR DIME. You'll need the two-pound ball for THAT one!

Concealed Carry Permits

Permit training in less than 90 minutes. Online, fast and easy. Taught by a former CIA Officer and author of *The Covert Guide to Concealed Carry*. The first 25 people to use coupon code Guns90 will get HALF-OFF. Take a look at what others are saying:

"I truly wanted to thank you for your time and efforts in putting together this amazing class." ~ Billi Aston, Fairfax, VA

"I thought it was spectacular..." ~ George Teagle, St. George, UT

"Jason's concealed carry course is a no brainer. I recommend it to anyone concerned about crime and defending their family in an increasingly unpredictable world." ~ James Dunner, Las Vegas, NV

"There is no doubt in my mind that if (God forbid) I'm ever in a life-threatening situation, I will be able to protect myself and my loved ones using the skills and knowledge I gained from you." ~ Curtis Phelps, Alexandria, VA

*FAQ About Berry's Preferred Plated Bullets

1. What is "DS?"

"Double Struck." Double-Struck bullets go through an extra sizing process after being plated. This makes the bullet 100 percent symmetrical. This can give you an edge in competition, but most shooters won't notice the difference.

2. What is the difference between Plated/Jacketed/Cast bullets?

Berry's Preferred Plated bullets begin as a swaged lead core. The plating process works through electrolysis. The swaged lead cores are tumbled in an electrically charged cyanide bath containing high-grade copper ingots. The copper clings to the lead and the longer the bullets remain in the bath, the thicker the plating.

3. How do I load Berry's Preferred Plated Bullets?

Plated bullets occupy a position between cast bullets and jacketed bullets. They are soft lead, but have a hard outer shell on them. When loading plated bullets we have found best results using low- to mid-range jacketed data in the load manual. You must use data for a bullet that has the same weight and profile as the one you are loading. Do not exceed mid-range loads.

4. How fast can I shoot these bullets?

Velocities depend on the caliber, but as a rule of thumb, we recommend you don't shoot our plated bullets over 1200 fps (feet-per-second). Our 44s actually shoot best around 1150 fps. 45s are generally good at 850-900 fps. Our bullets are NOT recommended for magnum velocities.

5. Can I shoot your plated bullets in my GLOCK?

Yes. We have a large contingent of loyal GLOCK shooters using our bullets. The plating is thick enough that you will not get lead fouling in your bore, which is the nemesis of polygonal barrels.

*DS = Double Struck, TP = Thick Plate, HB = Hollow Base, RN = Round Nose, FP = Flat Point, SWC = Semi Wadcutter, WC = Wadcutter

About SNS Casting: SNS Casting, Inc. is a family owned and operated business located in rural Flanagan, Illinois and was officially founded by Jim Stinar in the winter of 2008. Jim's casting history actually began in the mid 1980s as a hobby. This supplied not only himself but a group of friends and fellow avid shooters who were tired of paying too much for inferior products. Eventually, word was spreading throughout the surrounding states of his bullets, which were priced right for the quality.

Today, SNS Casting features four of Magma Engineering's Mark VIII casters and two Lube Master luber/sizers fitted with M-A Systems Collators. **Our lead is a certified factory alloy of 92 percent lead, 6 percent antimony and 2 percent tin, which is purchased in 44,000-pound lots to ensure consistent quality. The lube we use is Magma blue lube.**

We have two full-time employees at SNS Casting. Jim Stinar and son Ryan are avid USPSA (A30909, A63666) shooters, SASS members and NRA members.

NOTICE: There is a \$20.00 minimum 'Hazardous Material' (HazMat) handling fee for shipping PRIMERS. This fee is assessed in increments of 10,000 primers. Primer orders MUST be shipped separate from other items, and require a separate shipping and handling charge. Shipping and HazMat fees are not included in prices.

Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jig sized for a tight bore fit

which provides for the uniform application of solvents and oils. They work with all standard 8-32 cleaning rods, and are tough and reuseable.

Concealed Carry Tote⁴⁷

\$45⁰⁰
K25-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged nylon fabric, with heavy-duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5"x11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner **K25-10252** **\$24.95**

TUFF PRODUCTS MAG POUCHES

Front view with flap.

Front view without flap.

Rear shows loops and Molle fasteners.

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system; for instance, the Dillon Range Bag, a tactical vest or body armor carrier. Available in black or coyote brown.

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. Plus, it passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You'll love your Stinger and undoubtedly draw a great deal of security and peace of mind from its mere presence. You deserve a Stinger today!

Comtech STINGER Keychain **K25-19495** **\$9.95**

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?!). No excuse, Sir!

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	K25-19220	\$29.95
Advanced Trauma Kit (A.T.K.)	K25-19322	69.95

Streamlight's Nano Light® LED flashlight is super bright (10 lumens), can be seen a mile away, is made of virtually indestructible machined aluminum with an anodized finish, is weatherproof, nearly weightless and fits on your keychain or zipper pull tab!

K25-19942 \$11.95

INSIGHT TECHNOLOGY'S HX150 Programmable LED Flashlight comes with a limited lifetime warranty and is equipped with Smart-Power Technology™ that allows the operator to pre-program the desired "On" mode. A programmed mode can then be easily turned off and reprogrammed to adapt to any newly desired "On" mode. Modes of operation include: Constant On Mode, Momentary On Mode, Strobe Mode From On, Strobe Mode From Off, Strobe Mode to Constant Mode, Strobe Mode OFF, Dimming Mode, Dim to Bright Mode, Dim Mode OFF, Auto On/Off, and S.O.S. Mode.

RCBS EQUIPMENT

Dillon's New Bench Wrench Fits new 1" die lock rings

Trim Pro™ Case Trimmer Kit K25-15021 \$119.95

Includes: RCBS Trim Pro manual case trimmer, plus an assortment of shell holders and pilots for most popular calibers. Shell holders 2, 3, 4 and 10. Pilot calibers: 22, 24, 25, 27, 28, 30, 35, 44 and 45.

RCBS Scale Check Weights

Standard Set: 60.5 grains for powder charges.	K25-12297	\$34.95
Deluxe Set: 510.5 grains for bullets, cases and powder.	K25-12458	\$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

58 Performance Parts for Your GLOCK® Firearm

Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K25-14760 \$24.95**

Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K25-18630 \$14.95**

C. Bullet Forward Slide Release **K25-18629 19.95**

60 Stephen Hunter and *The Third Bullet*

By Barrett Tillman

Stephen Hunter is a gun guy. While most people would expect that of the writer who invented Bob Lee Swagger, hero of the enormously popular sniper novels, few realize how dead-earnest serious Hunter is about the art, craft, science, and culture of marksmanship.

Steve was in Phoenix in January to promote his latest novel, *The Third Bullet*, in which Bob Lee solves the John F. Kennedy murder mystery. Steve's goal was to conceive "a legitimate alternate narrative," and without giving away too much of the story, we'll say that Swagger is drawn into a review of the 1963 assassination – the only presidential murder with a rifle. It's a compelling story told in patented Hunter style with a mixture of shooting, science, speculation, and first-rate writing.

Like everyone of Boomer vintage, Steve remembers exactly where, when, and how he learned of the event. He was a suburban Chicago high school junior that Friday, and the shock remains palpable. "I've believed every major theory about the assassination at one time or another," Steve confides. "I started out believing the Warren Commission, and then I believed Jim Garrison and then I believed Vincent Bugliosi and others. The one I never believed was that a Secret Service agent shot the president with an AR-15 – either intentionally or accidentally!"

As a certified member of The Gun Culture, Steve recognized that nearly all the post-mortems focused on the technical aspects of Lee Harvey Oswald's M91/38 Mannlicher-Carcano rifle rather than what was practically possible with the weapon. He went back to the beginning, noting that in 1891 the Italian Army designed the 6.5mm cartridge to penetrate the winter clothing and blood-bearing organs of Austrian soldiers. The "magic bullet" recovered in Dallas – barely deformed – was viewed skeptically, reportedly having struck the president and Texas Governor John Connolly in the front seat. But Steve says, "That bullet did what it was designed to do – it stayed intact after maximum penetration."

The JFK mystery and the Hunter novel both turn upon the fatal third round so vividly seen in the famous Zapruder film. Given the known per-

formance of the 6.5mm bullet, why would the last one disintegrate on impact? Steve began wondering if it was something other than "Italian GI issue," which led to his drafting the story while conducting his own research. "I bought four Mannlichers before I got one that would group," Steve explains. "I had a hard time explaining all those purchases to my wife, but she was used to me accumulating weird stuff, especially after my sword collection for *The 47th Samurai!*"

The cheap four-power scope with wobbly mount on Oswald's rifle did not lend themselves to precision shooting, especially on a target moving slightly right to left. However, the iron sights were regulated for 300 meters, whereas Oswald's first shot was made at about 60 yards.

Hunter describes LHO as "unbelievably stupid, narcissist white trash" who was unemployable outside the Marine Corps where, despite training as a radar operator, he was put on sentry duty and managed to shoot himself. Steve does not believe that Oswald, "who only shot well once in the Marine Corps," had the knowledge or ability to hold under a precise amount with the iron sights. So how did he do it?

Or, as Bob Lee Swagger asks, *who else* did it?

Adopting his BLS persona, Steve fetched himself to Dealey Plaza in Dallas and examined the mystery from all the angles – literally and figuratively. In the novel he places the "actual" marksman in an office building adjacent to the Texas

School Book Depository where Oswald lurked.

Almost lost in the JFK drama is the character Steve identifies with the most: J.D. Tippit, the 39-year-old Dallas policeman whom Oswald murdered after the Kennedy hit. Tippit left a widow and three children, similar to Bob Lee Swagger's fictional father Earl who was killed in the line of duty.

Steve has friends in law enforcement but observes that the FBI asked the wrong people to evaluate Oswald's rifle. "They got some high-power, non-scope guys together with a few technicians who weren't really riflemen," he explains. "They were competition shooters who delved into the nuts and bolts of the Mannlicher-Carcano without much thought as to how it would have been used in the real world. How

Continued on Page 71

The IDPA Classifier; Stage 3, String 14: Low Cover

By Duane Thomas

An IDPA Master Tells You How to Do It, Too!

This is the final entry in a series of articles on shooting tips to improve performance on the IDPA classifier. We now move to the last string on the classifier, which takes place from around low cover at 15 yards.

STRING 14: Draw, kneel, fire two shots T1-T3 from around side of low cover.

(My time: 5.73 seconds.)

Tip #1: As you wait for the timer, already have your feet in the position they'll need to assume when you kneel. At the end of String 13 you were already down in a crouch shooting around the barrel, with your feet exactly where they needed to be. As you ready yourself for String 14, simply stand up, but leave your feet in the same position. At the buzzer, just lower yourself down again *voilà!* you're right back in the same low cover shooting position you just were.

Tip #2: Get down FAST. Don't try to synchronize gun movement with your downward movement. By the time you get the gun up and out, you should already have been down behind cover for a considerable amount of time.

STAGE 3 RAW SCORE: 35.27

DROPPED POINTS: $15 \times 0.5 = 7.50$

OVERALL SCORE: 42.77

We have now finished shooting the IDPA classifier. As I mentioned in the first article, I have been giving you my times for every string on the classifier, and points dropped per stage, from the run where I actually earned my IDPA Stock Service Pistol Master rank, in order to make the point that shooting a Master score on the IDPA classifier does not require blazing speed, only decent speed and decent accuracy. Now let's add it all up. A Master score in SSP is 98.82 seconds or faster. Though I have since shot the classifier much faster and better, this is what it took for me to earn my Master rank:

THE BOTTOM LINE

STAGE 1 TOTAL SCORE: 30.49

STAGE 2 TOTAL SCORE: 24.41

STAGE 3 TOTAL SCORE: 42.77

CLASSIFIER TOTAL SCORE: 97.76

RANK: Master

PHOTO CAPTIONS:

1. For the last string of the classifier, begin with your feet already in the position they'll need to be when crouching.
2. through 5. Get down behind low cover FAST. By the time the gun begins its extension you should have been down behind cover for – relatively – a long time.

HOW TO TALK TO LIBERALS ABOUT

By Marko Kloos

Debating “assault weapons” bans with Progressives and Liberals is usually a frustrating exercise in flinging reason, statistics, and historical evidence against a high-impenetrable wall of uninformed righteousness.

Gun ban proponents aren’t often swayed by talks of “inalienable, God-given rights,” the demonstrated counterproductive effect of gun bans on crime statistics, or any of the usual arguments gun owners employ when defending their right to keep and bear arms. Worse, our side often turns off the other side from the start with defiant confrontational statements that get you lots of applause when preaching to the pro-gun choir, but which aren’t likely to sway the anti-gun-leaning fence sitter toward the pro-rights position. You start talking about the 300 Spartans or your *cold, dead hands* with the average gun-hostile Liberal, you will mentally get filed as a nutcase whose opinion can be safely discarded as that of a confrontational, unstable crackpot who shouldn’t be allowed anywhere near a firearm. (If anything, you will have hardened that person’s resolve to support an “assault weapons” ban.)

Try to debate the same gun-hostile Liberal with the common arguments employed by our side, and you will most likely also fail to sway them. If three 10-rounders are as good as a 30-round magazine, *why not* ban the 30-rounder? If the banned features are just cosmetic, *why not* ban them? If registration may prevent crime and help the police solve murders, *why not* make it mandatory? If it only saves one life in the future, *why not* do it? And even if an “assault weapons” ban has no effect on the crime rate, isn’t it better than doing *nothing*?

In order to sway your opponent to even begin to consider opposition to an “assault weapons” ban, you have to do one thing: show them that they are wrong in their perception that since they do not own so-called “assault weapons,” a ban will have no effect on them, and will therefore not cost them anything personally. To do that, you have to move away from ***Molon Labe*** (Ancient Greek for “come and take” [them], purportedly the response of the Spartan King Leonidas at the Battle of Thermopylae to the Persian army’s demand that the Spartans surrender their weapons) and lay out the likely effects of a proposed ban in areas that should concern the average Liberal even if he or she doesn’t own any guns at all. You have to show them the law they propose is not just useless, but that it’s actually harmful to them. You have to appeal to their *self-interest*.

Here’s why Progressives should oppose an “assault weapons” ban:

1. IT WILL HARM THE ECONOMY AND THE POCKETBOOKS OF OTHERS, AND WASTE VALUABLE AND LIMITED PUBLIC RESOURCES.

The proposal to put existing “assault weapons” onto the National Firearms Act registry along with machine guns is an awful idea. There are millions of such rifles in private hands that would have to be added to the registry. The BATFE can’t even handle the registration and administration of the few (10,000) legally owned machine guns in a timely and error-free fashion. (Applications for tax stamps for suppressors take the BATFE three to six months to process.) Adding millions of firearms to the registry would take years and a gigantic administrative effort. Gun registries are notoriously expensive and invariably useless for crime prevention. We would be wasting tens or hundreds of millions of dollars on a bureaucratic boondoggle that would have no effect on crime rates, and it would be ignored and disobeyed on a grand scale.

In addition to harming the public purse by racking up a huge bill without any likely tangible results, an “assault weapons” ban will also hurt the pocketbooks of millions of gun owners who now have to pay vastly inflated prices. Understand that the “assault weapons” ban of 1994 never got rid of the banned firearms, but rather drove their prices up artificially. Magazines that held more than 10 rounds were readily available before the ban, but that \$20 Glock or AR-15 magazine went up to three or four times the pre-ban price. In practice, those gun owners who wanted to have non-neutered magazines for their home defense guns or range plinkers were forced to pay a punitive fear tax for the privilege – money that could have gone to restaurant meals or other family outings.

Lastly, an “assault weapons” ban would hurt one of the few sectors of the economy that’s actually healthy. Gun manufacturers would have to scale back operations, lay off employees, or close shop altogether if the product they make isn’t legal to manufacture or buy anymore. That’s tens of thousands of lost jobs, and a lot of lost tax revenue – not just from the missing taxes paid by those manufacturers, but also from all the taxes paid by the customers downstream, all the way to the end consumer. Is a crime reduction of a fraction of a percent worth the economic damage? (Remember, “assault weapons” are used in very few crimes, and even the 1994 “assault weapons” ban had no measurable effect on the crime rate.)

2. IT WILL HARM THE RESPECT FOR GOVERNMENT AUTHORITY IRREPARABLY.

OUT "ASSAULT WEAPONS" BANS

The certain noncompliance with an "assault weapons" ban and registration brings us to the bigger problem of authority erosion.

Just in December of 2012, the FBI logged over two million background checks for gun purchases. You could bet that most of them weren't purchases of items likely to fall under the proposed assault weapons ban, but you'd probably have better luck winning a million bucks from a gas station scratch ticket. That's two million weapons, and tens of millions of "high-capacity" magazines for them, which would all need to be registered and entered into the NFA database at a punitive tax of \$200 *per item*. Prior efforts to register firearms have been met with high non-compliance rates everywhere they have been introduced. It stands to reason that few owners of newly-banned "assault weapons" would be willing to register or forfeit their new property. And if millions of people simply ignore the law, it will become worse than worthless – it would be a constant reminder that the state is basically impotent, and that other laws may be equally disregarded.

3. IT AMOUNTS TO IMMORAL COLLECTIVE PUNISHMENT.

Let's set that one straight right out of the gate: if it's immoral to punish a classroom full of kids for the misbehavior of a single child, or punish all Muslims for the actions of a few radical terrorists, then it's immoral to punish law-abiding gun owners for the actions of a few mentally ill sociopaths. Collective punishment is unfair and deeply immoral. And passing a law that is demonstrably extremely unlikely to have an effect on the crime rate or the prevention of mass shootings, a law that merely harasses and punitively fines a specific group of people for the act of peacefully owning an object you don't like is the very definition of collective punishment. Having to pay \$100 for a magazine that before the passing of that law cost me \$20 is a *punishment*. Having to pay a \$200 tax and filing federal paperwork for every semiautomatic rifle I own is a *punishment*. Having to possibly surrender thousands of dollars of property that I legally acquired and that won't ever be used by me to commit a violent crime is a *punishment*.

And if you give your consent to such a collective punishment because you agree with it – on what grounds will you protest in the future when someone else wants to punish **YOU** unjustly for the misdeeds of another? How can you be against racism, sexism, classism, and other social injustices if you're willing to invoke collective guilt when it suits you? If you can hold the NRA responsible for Newtown, how can you be morally justified in condemning your neighbor for holding all Muslims responsible for 9/11?

4. IT WILL HAVE LEGISLATIVE REPERCUSSIONS FOR THE PROGRESSIVE AGENDA.

Lots of people own guns. Two million people bought firearms in just the month of December 2012 alone in anticipation of new restrictions. America has tens of millions of gun owners, and that's a lot of votes. Any legislation that restricts the rights of those gun owners, deprives them of their legal property, or hits them in the pocket-book in a substantial way will meet with a backlash at the polls in whatever election – national, state or local – comes next. Pushing hard on gun control will almost certainly mean significant gains for the Republicans in the next few elections, and possibly a Republican-controlled Senate and House. Is the subject of "assault weapons" so important to you that you're willing to trade a successfully enacted gun ban for a repeal of Obamacare, setbacks for marriage equality rights, and all the other items on the Progressive wish list? Are guns so much more important to you than the rest of your legislative agenda that you are willing to risk sacrificing all of them just so you can pass a gun ban that's useless at best and disastrous at worst?

5. IT WILL SET A STRONG PRECEDENT FOR IGNORING OR REMOVING OTHER AMENDMENTS.

This is perhaps the single biggest reason for Progressives to oppose an evisceration of the Second Amendment: it creates a blueprint for others to invalidate the civil rights *they* oppose. If we can just cancel a Constitutional amendment because the outraged masses of the day want it gone, then the Bill of Rights is worthless. If you get rid of the Second Amendment because it's "no longer relevant," then you invite the people from the other side of the aisle to do the same to the other Amendments, and you will have no legal or moral leg to stand on when you oppose that. Your team will not always be in charge, and you should never assent to the government exercising sweeping powers if you're not comfortable with the idea of the same powers being used against you. Because history teaches us that sooner or later, that's *precisely* what will happen.

Your average gun-hostile Progressive debate opponent largely supports an "assault weapons" ban because "it's better than doing nothing," and because they don't think themselves inconvenienced in the least by it. Show them in a calm and rational manner that this kind of law is, in fact, much worse than "doing nothing," and you may very well sway their opinion toward the side of less government intrusion and greater personal freedom...which are, after all, *supposed* to be Progressive principles.

KEEP YOUR GUNS!

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	K25-15571	\$7.95
Slide-Glide Lite	K25-15572	7.95

Micron UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

J. Dewey Mfg. Co.

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits all AR-15s and AR-10s with standard and oversized take-down pins up to .316" in diameter.

To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

Evolution Gun Works
 These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

stable could it be in that sixth-floor window? Why didn't Oswald shoot when the limousine was closest to the depository building? How did Oswald manage two hits of three shots when he was such a clown?"

Since Oswald was killed by Dallas strip-club operator Jack Ruby before a proper interrogation, those questions went unanswered. Therefore, Hunter/Swagger took up the case as practical riflemen.

Steve has a foot in two worlds: nonfiction and fiction. With a Pulitzer Prize as a *Washington Post* movie critic, he draws interesting comparisons between Tinseltown and *The Gun Culture*. "Shooters are much more interesting than actors," he declares, "and so are writers and directors, who don't rely on their good looks."

Among Steve's nonfiction is *American Gunfight*, a detailed collaborative account of the 1950 Puerto Rican assassination attempt on Harry Truman.

Steve says he rarely gets writer's block because guns open his mind: "I've spent my life thinking, reading, and writing about guns and shooting guns." Firearms are the collective fusilological muse that sprinkles literary pixie dust on Steve Hunter, who says, "the gun culture has nourished me."

"The gun culture has nourished me."
— Stephen Hunter

Living in Baltimore, Steve tries to shoot three or four times a week at an indoor pistol range, where regular patrons recognize him but courteously leave him alone. His ultimate goal is to move somewhere he can carry concealed — if not Arizona perhaps Northern Virginia or Pennsylvania. But any move will require his wife Jean's retirement several years downstream.

Steve deadpans: "She's of Filipino descent, and when she gets angry I remind her that my people invented the 1911 to stop her people from chopping us to pieces."

While writing his next novel (a WW II sniper tale) Steve still yearns to run a comprehensive test of the Oswald rifle. "I'd like to have real-world snipers and big game hunters with some competent friends — people who have shot for blood and know what's involved." But the rifle and related artifacts are held by the U.S. government at the National Archives, and access appears unlikely.

So who shot JFK? You can find out what Bob The Nailor learned for the ridiculously low price of \$26 at finer emporiums near you.

So THAT'S how you grease that little S.O.B. (Slick-Operating Bolt, that is.) M-14/M1A Bolt Roller Greaser

K25-18531 **\$6.75**

The Pressure Plug
For AR15 .22 LR Inserts and Dedicated Uppers

Does your .22 LR insert move back and forth in your upper? Did you know that the very top of your lower receiver takes all the recoil of your .22 LR insert? You can eliminate those problems by inserting the pressure plug in front of your buffer. The front of the plug has a taper that allows you to open and close the weapon just like always.

76 Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards. Compact design, 30mm tube and bright illumination of the reticle are just a few of the many features of the DMS-1. Bright red illumination of the reticle adds to the quickness of the sighting system in day and low-light conditions. At one power it works well as a reflex sight and at longer ranges the four-X magnification gives increased accuracy.

K25-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES ⁷⁷

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **K25-25374 \$72.95**
 Scout Scope Mount for SKS Rifle **K25-25373 67.95**

90 Degree C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE

(Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

A. Ruger MK1 **K25-19535 \$79.95**
 B. Browning Buckmark **K25-19534 79.95**

Tactical Sports 45° Offset Optics Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)

45° Offset Optics Mount **K25-14472 \$14.99**

How do you make a Savage rifle even more accurate? Well, as the adage goes, you can't kill what you can't see, so you include a Nikon 3-9x40 BDC reticle scope, mounted and bore sighted. This unique reticle can be ballistically matched to your exact cartridge using Nikon "Spot On" Software. Coincidentally, the price of the New package is "Spot On" too. See your favorite Savage dealer for details.
