Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

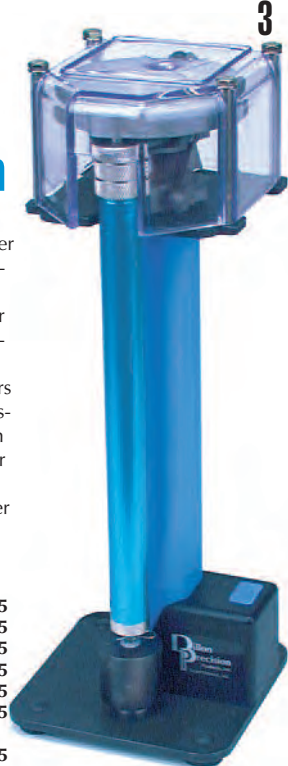

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

Lg. Primer Filler	K18-97077	\$314.95
Sm. Primer Filler	K18-97111	314.95
Lg. (Euro. 220v)	K18-97112	324.95

We READ Our Mail!

As a fan of pretty girls, classic cars, and N-Frame S&W revolvers, I found the January cover featuring Rio to be one of your best ever. Actually, it was a couple minutes before I noticed the car and the gun.

John Knapp – Long Beach, California
Enquiring minds would like to know if Rio is a right- or left-handed shooter?
 James Cropsey – cropseymitchell@juno.com

She shoots right-handed, but Rio's a fully ambidextrous model.

I just received the Jan. 2013 edition. There is an error on Pages 84 and 85 regarding Stage 2 of the IDPA Classifier. Your article refers to strings 10 & 11 of Stage 2. Please refer to the IDPA rulebook, page 68 and you'll see there are only 4 strings on stage 2. Where did you come up with this?

Dan Fox, IDPA Match Director – Jacksonville, Florida
Duane is referring to the strings he is writing about as "Strings 10 & 11" of the entire classifier. I'm sorry that wasn't clear, Dan.

WOW...WOW...WOW...Stephen Poor, you stepped so far out of the shooting box that you are not only DQ from the match, but are not invited to be involved with the shooting sports. Your comments about Katie Weilage were completely UN-called for. When I read that article, my thought was, *What a great person to put herself out there for her country!*

Loel Davis – ldavis@nvc.net

In reply to the e-mail from Stephen Poor of Booneville, Arkansas: What are you, some kind of blank-blank-blanking idiot? The young lady you criticized has worked very hard to get where she is today. You don't achieve such a good position by being lazy or stupid. What have you done to improve your lot in life?

Charlie Rogers – Edgewood, New Mexico

Re: January 2013 issue's "We READ Our Mail." Your response to Stephen H. Poor was a 10X performance. Incredible! If you hear from Katie, tell her I said, "Atta' Girl!" and keep up the great work, both of you.

Bob Payne – payne3559@att.net

RING IN THE OLD:

Reviewed by Peter Caroline

I must admit, I have never been a great fan of the Colt Single Action Army. I know, it's a classic design...simple, rugged and perhaps the most iconic example of American industrial art. It was produced in a wide array of calibers, from .22 rim-fire through .476 Eley. But it never felt right in my hand, even though it is a left-handed design, and I still found the loading and ejecting process tedious and annoying. That said, I've had a number of SAA-type revolvers in my collection, made by Colt, Ruger and Cimarron. They're all fine guns, just not my favorite.

Some months ago, however, I had an epiphany. I was attending the annual Shootists Holiday at the NRA Whittington Center in Raton, New Mexico. This is a veritable all-you-can-shoot buffet of interesting firearms. Participants bring their favorite treasures, and everybody gets a chance to try out everybody else's guns. I was chatting with a gentleman who had a large number of revolvers on display, and he encouraged me to try one in particular, a very much worn and battle-scarred Colt Bisley. It was chambered for .38 WCF, and had a 4-3/4" barrel and beautifully grained but worm-eaten grips. I remember picking it up and thinking, *This grip actually fits me!* I took the Bisley to the firing line, loaded it and put six rounds downrange. I loved the feel of the gun, the trigger pull and the accuracy. I was sorely tempted to make an offer, but I knew that Colt Bisleys, in any condition, started in the low four figures and went straight up from there. Besides, I had reloaded .38 WCF in years past,

and recalled that it could be a ticklish procedure. Nonetheless, I **had** to have a Bisley.

When I got home from Raton, I started doing my homework. Ruger makes its own rendition of the Bisley revolver, but the grips differ from the original. Cimarron Firearms, however, makes a virtual clone of the original. I've owned other Cimarron single actions, made by Uberti in Italy, and I've been impressed with the quality of their work and their affordability. I called Cimarron, and ordered a Bisley in .44 Special, a long-time favorite caliber of mine, with a 4-3/4" barrel, wood grips, and their Antique Original Finish, which makes a brand-new gun look like it had seen a century of hard use. MSRP on this particular configuration is \$698.

When the Bisley arrived several weeks later, I couldn't have been more delighted. It looked like it had shipped out from the Colt factory on the same day as the gun I fired in Raton. The grips were a dark walnut-finished wood. The gold-tone Cimarron medallions, however, were not quite what I had in mind. The action was slick, and the trigger pull measured exactly three pounds. I could hardly wait to fire it. I had a quantity of .44 Special ammo that I'd handloaded for my S&W Triple Lock Target Model several years ago, but I needed some factory ammo as a reference. The next morning, I headed into town and picked up several boxes of Magtech 240-grain flat nose cowboy loads and CCI Blazer 200-grain JHPs.

Before I hit the range, I did a bit of "improvement" on the grips. I popped out the medallions, and filled in the circular depressions with wood

CIMARRON F.A. CO. BISLEY

filler, sanded off the factory finish, attacked the wood with a chain and other blunt instruments, then re-stained the wood and rubbed in a bit of Tru-Oil. Now the wood looks like it's had the same hard life as the metal.

As I had hoped, the Bisley was a delight to shoot. Recoil is very mild, especially with the cowboy loads. Typical of Colt Single Actions, it shot low. Some gentle file work on the front sight is necessary once you've established your favorite load. And also typical of the breed, the sights are period authentic, that is to say...atrocious. Okay, we are a spoiled lot, accustomed to big, black, square, adjustable sights. These aren't, but it's surprising how tight a group you can get with them. The crisp, light trigger helps a lot. I managed to get some five-shot 1" groups at 20 yards off sandbags.

That was with the cowboy loads. The Blazer ammo offered a somewhat snappier recoil, even with the lighter bullet, and the groups opened up by about half an inch or more. The .44 Special is not what you'd describe as a hot cartridge. Case expansion is minimal, and the fired cases usually drop out of the chambers with little or no urging from the ejector rod.

As you might have guessed, I really do like this gun. It has the same "Viejo, feo y fuerte" aura as the original Bisley that inspired this purchase. And it will soon have its own (properly antiqued) custom holster and belt set. To quote my long-suffering spouse, "Oh, God, another barbecue gun!"

A Winner for the NRA Board: STEVE SCHREINER

Why vote for Steve Schreiner?

Schreiner is a Vietnam Vet, Airborne Ranger; awarded CIB, Bronze Star with V Device and Silver Star.

He is a noted supporter of the Second Amendment as exemplified by the following:

1. President, Firearms Coalition of Colorado;
2. Awarded NRA's Best Volunteer Organization of the Year;
3. Successfully Fought for Colorado's CCW;
4. Highly Successful Registered Lobbyist at Colorado Legislature;
5. Fought against semi-auto ban, magazine bans and "safe storage" bills;
6. Member of NRA's Grassroots Committee.

What I stand for:

1. We need to reach out to everyone, especially the younger generation, using their means of accessing information, about the positive aspects of the National Rifle Association and the Second Amendment;
2. We need more emphasis on range development and protection of existing ranges;
3. We need to protect our shooting rights in National Forests and on other Federal lands.

Steve Schreiner

President, Firearms Coalition of Colorado

*"Vote for Silver Star Recipient **Steve Schreiner** for NRA Board of Directors. I am encouraging NRA Board of Directors voters to utilize the 'bullet ballot' procedure. If you vote just for Schreiner, you increase his chances of being elected.*"*

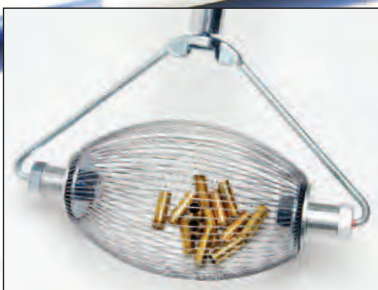

Lt. Col. Robert K. Brown, USAR (Ret.)

Editor/Publisher, *Soldier of Fortune* Magazine

*Bullet balloting does not increase the number of votes cast for Schreiner but it does reduce the number of votes the other candidates receive which, therefore, increases the likelihood of Schreiner's election.

12 WANT TO RELOAD? SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!
K18-21894 \$44.95

THE SHELLSORTER

...is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting.

The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time.

The **SHELLSORTER** is made of ABS, a strong plastic which will give a lifetime of service.
K18-19972 \$39.95

FROGLUBE CLP

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products. Frequent use will keep firearms running at optimal performance and not harm the FrogLube coating.

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K18-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

AUTO PRIME SYSTEM

Includes:

Primer Housing /Shield
Primer Slides, Large/Small
Pickup Tubes, Large/Small
Pickup Tube Tips, Large/Small
Magazine Tubes, Large/Small
Mag. Orifices, Large/Small
Operating Rod
Primer Track Bearing
Housing Screws
Ret. Spring Retaining Pin

K18-16627, \$82.95

PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

K18-20302, \$25.95

AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

K18-20251, \$87.95

OPTIONAL MAGNUM RIFLE POWDER BAR

K18-21353, \$29.95

AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

K18-22120, \$30.95

AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

Powder Die: K18-16629, \$19.95

OverSize Die: K18-16626, \$19.95

Plastic Funnel: K18-16617, \$5.95

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

K18-20029, \$22.95

RL 450 Powder Die:

K18-20308, \$21.95

RL 550B

RL 550B DVD
Instruction Manual
 K18-19483 \$19.95

STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty

All for ONLY...
\$439⁹⁵*

K18-14261

Reloading dies sold separately.

RL 550B ACCESSORIES

A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

K18-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K18-20782, \$76.95 ea.**
Magnum Rifle Powder Bar **K18-21353, \$29.95 each**
X-Small Powder Bar **K18-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K18-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

K18-20064, \$11.35 each
Three or more, \$10.25 ea.

X-Large Powder Die, **K18-21253, \$19.95 each**

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

K18-13909, \$22.95 each
Three or more, \$20.95 ea.

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K18-22080** is **\$254.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below). Replacement carbide cutting blades, **K18-13141**, are **\$19.95** each. Upper lock rings, **K18-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

K18-20095

Dillon's Case Preparation Equipment

CV-2001
K18-20493
\$187.95

CV-750 K18-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K18-20675 \$72.95

CM-500 Case/Media Separator K18-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K18-22047 \$212.95

Euro CV-750 K18-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K18-13804** **\$8.95**
Case (20 pc.) **K18-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **K18-13733** **\$8.95**
Case (20 pc.) **K18-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **K18-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag **K18-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag **K18-13496** **\$15.95**

Hey, it's Rio again in the paint booth at Young Guns Designs (younggunsdesigns.com) with Ruger's SR-556E featuring a Bushnell 1.5-6 x 42 scope on a GG&G mount. It also has MagPul MBUS sights and a PMAG 30. In the photo at right, Rio has a Rock River Arms Performance Piston System Pistol with a Bushnell Trophy TRS-25.

Jerry Ahern's Interview with

By Jerry Ahern, Photos by Sharon Ahern

When Sharon and I were growing up, we both were fans of the television show "Cheyenne," an hour-long western – the very first hour-long western and the first hour-long dramatic series with continuing characters – which ran from 1955 to 1963 on ABC. The hero, Cheyenne Bodie, was tall, well spoken, kind to women and children and quick to go after evildoers and set things right. Did I mention he was quite handsome? He stood 6' 6", had a 48" chest and a 32" waist. I remember reading an article about "Cheyenne" in *TV Guide* years ago and some woman was quoted as saying that every time Cheyenne took his shirt off, she would go kick her husband.

Cheyenne was played by Clint Walker, fresh from an acting job in Cecil B. DeMille's latest film, "The Ten Commandments." He was born in Hartford, Illinois in 1927, and grew up during the Great Depression. As a teenager, Clint worked at various jobs, many involving manual labor. He dropped out of school at 16 and joined the Merchant Marine at 17. Clint worked in the Texas oil fields, was a carnival roustabout, a Mississippi River boatman, etc. He then moved on to Las Vegas where he worked as a deputy sheriff at the Sands Hotel; there he was encouraged to try his hand at acting in Hollywood. It would take him over a year to get his break but he did land some bit parts, including a Tarzan-like character in a Bowery Boys movie "Jungle Gents," that brought him to the attention of Warner Brothers Studios. The studio was going to groom Clint for movies but then they decided to do a television western and Clint seemed perfect for the starring role.

After seven successful years portraying Cheyenne Bodie (he was off for a season during a contract dispute with Warner Brothers), Clint went on to star in numerous motion pictures such as "None But The Brave," "The Great Bank Robbery," "The Dirty Dozen," "Night of the Grizzly," and "Yellowstone Kelly." He later returned to television to star in the series "Kodiak" and then did TV movies and features. In 1971, a freak skiing accident in which a ski pole pierced Clint's heart slowed him down for a short time. However, only months later he was filming "Pancho Villa" in Spain with Telly Savalas.

I was honored to speak with Clint Walker and to hear him reminisce about his younger years and his thoughts on our present-day society.

JERRY: I know you are an outdoorsman. Do you hunt and fish?

CLINT: I like to see animals the way they are. The only way I'd kill them is if one became a predator who's killing people or killing stock to the degree that he would need to be done away with. Other than that, live and let live. I like to see animals in the wild. We get bear coming through here on occasion and definitely quite a few moun-

tain lion. When I work outside, I always carry a gun on my hip just as an equalizer if I would need it."

JERRY: What do you carry?

CLINT: I just carry a .357 Smith & Wesson. I still like the old Single Action Colt I got so used to wearing, but it is a little bigger and a little heavier."

JERRY: I know you are a writer and an inventor, a very versatile person. You have had an album of ballads that was produced by Warner Brothers and recently you've partnered with western writer Kirby Jones on a novel entitled *Yaqui Gold*. You're very versatile indeed.

CLINT: Of course, I'm a Gemini! Gemini are noted for getting involved in a lot of things. Sometimes they don't accomplish too much because they're involved in too many things and not enough of them get done. So I have to watch myself there.

JERRY: I learned there are two ways of saying that. You can say that you are a jack of all trades and a master of none or that you are a Socratic or renaissance man.

CLINT: I can do a lot of things, but I'm not a master of any of them.

JERRY: You always did a masterful job in your acting career.

I was curious as to how you were able to build up and maintain such a well-developed body. I understand that a film critic once described you as "having a pair of shoulders rivaling King Kong's."

CLINT: My bodybuilding started when I read advertisements in *Popular Mechanics* for the Charles Atlas course. I saved my money and sent off for the course, which I used when I was in the Merchant Marine and so on. I also became very inventive. During the depression, I learned how to

Our copy of Clint Walker portraying Yellowstone Kellogg hangs in a spot of honor in the office. The original watercolor was done by actor and artist Buck Taylor, who you may remember as the deputy during the last eight seasons of the television series "Gunsmoke" and more recently as Turkey Creek Jack Johnson in the movie "Tombstone."

make my own toys, and I probably had more fun than the rich kids did. Because of that, I learned to love tools. I have a shop now. When I have the time, I'm an inventor. I used to build most of my workout equipment.

I think the first workout equipment I made was when I took a little dishpan and I got hold of some pipe, cut it to the proper length, drilled holes in it, put some nails in it and hung it from a tree limb and poured concrete in that bowl and hardened it up and turned it over. Then I did the other end and attached Folger's coffee cans to make my dumbbells. And that was my first workout equipment.

When I was in the Merchant Marine, I built a punching bag from an old leather seat and placed it in an abandoned area where they once housed the gun crew. I borrowed stuff for dumbbells and barbells from the engineers down below. I'd climb the guy wires hand over hand to keep in shape. It was important for me to keep in good shape.

It carried on over when I got into pictures and that's what got the attention I needed to break into the business. Basically, the Good Lord opened those doors for me. I always had a job somewhere, mowing lawns or shoveling snow, my mother would make potholders and aprons and I would go door to door and sell them. Then when I got older, I worked in a warehouse loading trucks with bags of cement.

I worked at a place that was the largest paper mill in the world and I worked with what was called the straw gang. We handled the straw bales all day long – in the summer we would stack them and in winter we would tear them down and put them in the green machine where they would go up to where they'd be made into paper. And then when I was in high school I'd get up at three o'clock and work at Duncan's Foundry in Illinois and work an eight-hour shift with all the grown men. My job was, as the big castings came out of the mold – these castings weighed 150 pounds or so – they'd be put on air hoists and I'd then take a big sledge hammer and knock all the sand out of them, then I would cut off the wires from the mold, grind them down and then grind a spot to put a number on them and send them on their way.

JERRY: Sounds like you always had a great way of staying in good physical shape. Is there any-

thing in movies or television these days that you particularly like or dislike?

CLINT: I dislike bad language in movies today. I think that it's, quite frankly, part of a program to bring down the morality of this country by giving bad examples to young people. It is entirely unnecessary. All our western heroes – the Gary Coopers – never had to resort to that.

John Wayne might use some of that on the set, but certainly wouldn't use it in the picture. Pictures have such an influence, especially on young people, and they know that. I enjoy acting and I

resent how they brought acting down with this crudity. There's no substitute for quality.

If you've got a bunch of guys on a ship or construction crew or oil field or a bunch of people that are used to that kind of thing, then what the heck? I've been a merchant seaman, I can handle that if it's just a bunch of guys, but I really resent it when there are women or children around and they use that kind of language.

At any rate, I also resent anything that tears this country down. This country was

founded on Judeo-Christian principles.

JERRY: Sharon and I watched a few episodes of *Cheyenne* recently and both of us agreed that unlike some episodic shows in that genre, *Cheyenne* has held up well over the course of 50 years and I believe it will still be relevant 50 years from now.

CLINT: I'm glad I had the opportunity to do something that had a good effect on so many people.

Speaking with Clint Walker was an experience I will always remember. Life goes on for all of us but perhaps, those of us who grew up with role models such as *Cheyenne* Bodie may have tried to stand a little taller and reach a little higher to be more like the "Big Guy." After the interview, we spent a few moments discussing the state of the world as it is today and Clint Walker's final remark was this: "We'll just keep standing up for what we believe in."

You can learn more about Clint Walker by visiting his website at www.clintwalker.com. Also, check your local listings for a station carrying episodes of *Cheyenne*. If you grew up watching the show and enjoying it as much as we did, share it with a younger family member or friend who was not as blessed.

A black and white of Clint Walker as Cheyenne and a copy of *Cheyenne and the Lost Gold of Lion Park*. It wasn't until after our marriage that Sharon and I discovered that each of us had been fans of the show and had read the same young-adult book based on the main character. We still have both of our copies.

XL 650

STANDARD FEATURES:

- Automatic Indexing
- Uses Standard 7/8" x 14 Dies

Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

Stylemaster-DL \$135

A superior shoulder rig made of best-quality leather with solid brass fittings — no cheap plastic, no soft suede or other low-quality leather.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K18-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K18-11702 89.95**
"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

Uncle Mike's Kydex Holsters

Michaels of Oregon's injection-molded Kydex holsters have a level of detailing, quality and affordability unmatched by other manufacturing methods. The almost-vertical rake allows for behind-the-hip carry, and for some applications, the holster can function as a crossdraw. Smaller-size holsters can also be used for "appendix" carry. To aid concealment and to assist in the draw, the holster rides close to the body at a mid-level height. The injection-molded belt loop is designed to accept and support a variety of belts from 1" to 1.75" wide.

The De Santis Elastic Belly Band accommodates small autos and revolvers with one reload and a pair of handcuffs. Fastest when worn under an un-tucked shirt, but can be used with a tucked-in shirt for deep concealment.

24"- 28" waist **K18-18557**

30"- 34" waist **K18-18558**

36"- 42" waist **K18-18559**

44"- 50" waist **K18-18560**

The Santis' Apache ankle holster's wide, elastic leg band largely eliminates the unwanted rocking motion commonly associated with ankle holsters. A sheepskin pad makes the Apache comfortable to wear.

Holster NOT Included

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

XL 650 (Electronic Scale)	K18-22118	266.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

SDB Mount	K18-22223	\$64.95
RL550/XL650	K18-22051	48.95
XL650-only	K18-22052	45.95

Bullet Tray Kits

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the "feel" of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

Bullet Tray Kit	K18-22214	\$41.95
RL 1050 Tray Kit	K18-22215	41.95

RL 550B/XL 650 Toolhead Stands

This all-metal stand provides a place to store your complete caliber conversions: toolhead, reloading dies, powder measure, shellplate and locator buttons. The mounting system makes it possible to secure the toolhead stands to your bench, keeping them from getting knocked over by your well-meaning-but-clumsy shooting buddies.

Dillon's new toolhead stands are finished with a high-quality, durable powder coating designed to meet the needs of even the highest volume, commercial reloading operation. They are available individually or in packages of three, and are packaged with reloading data labels to help you record your favorite loads.

550/650 Stand **K18-22055 \$20.95 ea.**
Three or more, \$18.95 ea.

Low Powder Sensor

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light.

This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Sensor **K18-16306 \$41.95**

Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel."

A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

Dillon's Pistol Die Sets

Size Die

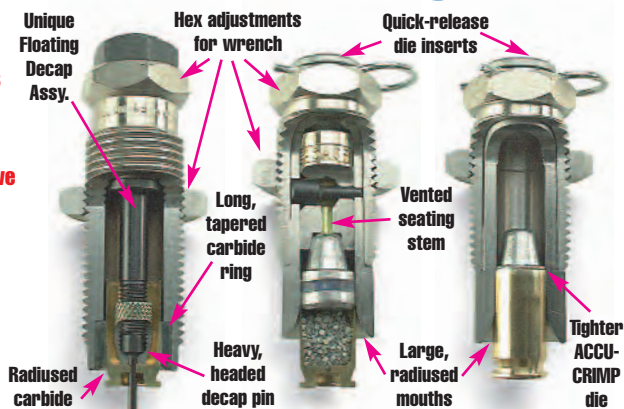

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)

.223 Remington	K18-10839	\$66.95

"Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, K18-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use.

Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

'Belted Magnum' Powder System

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder.

Like all of Dillon's powder measures, the Belted Magnum Powder System is case-activated and can be used with your RL 550B, XL 650 or AT 500 reloader. It's ideal for loading large-caliber magnum rifle cartridges. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

The "Belted Magnum" Powder System is based on our SL 900 Shot Dispenser, so the Maximum Charge Bar won't work in our standard powder measures – you'll need to buy the entire system. The good news is that the "Belted Magnum" Powder System has an integral drain, so it's easy to empty the hopper in order to change powder types; so, if you load several big calibers with various powders, it's easy to switch from one to another.

Keep plenty of extra powder on hand, because when you're dispensing 100-plus grains into every cartridge, you're gonna need it! Magnum Powder System **K18-97126 \$137.95**

PROTEKTOR MODEL

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

Bullet Comparator

Correct bullet seating depth is critical to accuracy. In addition, minor variations in bullet seating depth will have an effect on both pressure and velocity. The L-N-L Bullet Comparator provides precision handloading dimensions.

CLASSIC HANDGUNS: The R

By John Marshall

This long-out-of-print pocket pistol has been described by many experts as the most ergonomic handgun ever produced. It's a slim and compact handgun that fits most hands like a glove and works very reliably. It can be concealed safely, brought into action quickly and points instinctively. One expoliceman recalls that a lot of cops back in the day carried it as a backup gun; they called it "the steel finger." Its operating system is unique and there has been nothing like it before or since. General George S. Patton, Jr. carried one given to him by General Kenyon Joyce. Famed science fiction novelist Robert Heinlein owned one, as did noted gun writer and adventurer Colonel Charles Askins, Jr. The Remington-UMC Model 51 is today a little-known collectible, but certainly deserves to be called a classic for its advanced features.

The Model 51 was the invention of John D. Pedersen. John Browning himself once referred to Pedersen as "the greatest living arms designer and probably the greatest of all time." While that is arguable given Browning's acknowledged brilliance as a designer, Pedersen was certainly an accomplished inventor.

In the early 19-teens, Pedersen was employed as a designer by Remington, which was then teamed with Universal Metallic Cartridge Corporation. The combined companies were known as Remington-UMC. At Remington, his task in this period was to develop an advanced pocket pistol that would not violate Browning's blow-back pistol patents. In this, he was quite successful.

The single-action Model 51 uses a retarded-blowback action which is quite innovative. The breechblock is a separate spring-loaded part within the slide. Upon firing, the force of the cartridge case blowing back moves both the slide and the breechblock back a very short distance. The breechblock stops in its travel and locks against an abutment in the frame. Then the moving slide cams it up away from the frame so the slide and breechblock can continue to the rear together. This momentary hesitation in the action allows a much lighter and thinner slide, permits higher-pressure ammo and gives softer recoil than a straight blow-back pistol. The design of the grip on this pistol was adopted after much study, using plywood grip mockups and enlisting the aid and opinions of many. The result was a grip that would be perfect for most people with average-sized hands. Such deliberate ergonomic designing was way ahead of its time. There were no screws used in the pistol;

the grips were slid on and off after depressing a transverse pin at the base of the grips. The trigger was much like the one on the 1911 pistol, incorporating a yoke through which the magazine could be inserted. A more or less conventional magazine release was placed behind the lower part of the trigger on the left side. The slide and barrel were positioned very close over the hand, an advantage in controlling recoil. The recoil spring surrounds the barrel, making this feature possible. The pistol points very naturally, which is a good thing given its relatively tiny fixed sights. A grip safety serves four functions. First, it prevents the pistol from firing unless it is depressed. Secondly, it serves as a cock-

ing indicator. When the pistol's internal hammer is cocked, the grip safety is visibly extended to the rear.

Third, when the slide is retracted and the grip safety is released before the slide's final travel rearward, the grip safety allows the disconnecter to come up in front of the breech, locking the slide to the rear for inspection of the chamber. Finally, a simple squeeze of the grip allows the locked-back slide to jump forward, cham-

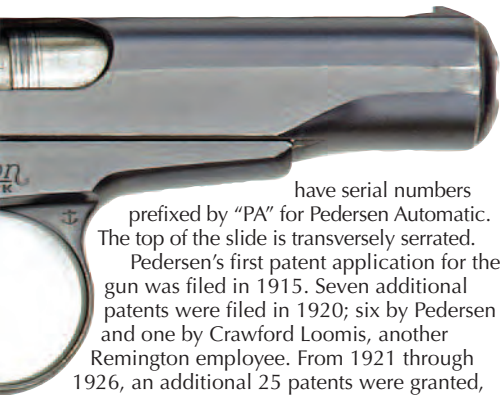

bering a round quickly if there is a cartridge or cartridges in the magazine. A magazine safety prevents the firing of a round in the chamber if the magazine

John Browning himself referred to Pedersen as "the greatest living arms designer and probably the greatest of all time."

Remington-UMC Model 51

is removed. There is also a rotating manual safety at the left rear of the grip frame.

There is no manual slide lock, and the slide returns forward after the last round is fired, giving no visual indication that the gun is out of ammo. Another minor criticism of the design is that the disassembly and assembly procedure is complex, non-intuitive, and awkward to the extent that one wishes for three hands to do it! The seven-round magazine is very well made, featuring a stamped-steel multi-shaped follower and a convex spine. It's quite reliable and sturdy. Although early prototypes used an exposed hammer, the Model 51 has an internal hammer more appropriate to a pocket pistol. All pistols

have serial numbers prefixed by "PA" for Pedersen Automatic. The top of the slide is transversely serrated. Pedersen's first patent application for the gun was filed in 1915. Seven additional patents were filed in 1920; six by Pedersen and one by Crawford Loomis, another Remington employee. From 1921 through 1926, an additional 25 patents were granted, most of them to Pedersen. Production of the Model 51 began in 1918 and continued through 1927. Some were assembled and sold as late as 1935. Most, a little over 84 percent, were in .380 ACP caliber ("Series of 1918"), although some were also made in .32 ACP ("Series of 1921"), mostly for the European market. A grand total of approximately 64,796 were manufactured. The pistol illustrated is chambered in .380 and left the factory in 1924. It's still in great shape and could easily serve its intended purpose. These were quality handguns, precision crafted and very effective self-defense weapons. In just holding one, you begin to appreciate that. The Model 51 was built to last a lifetime, and good examples are still employed today. Other cheaper guns, the popularity of revolvers, a complex design and the stock market crash of 1929 finally limited the pistol's commercial success. Still, these classic pocket pistols are among the best of their genre, and are hot items for collectors today. **P**

self once referred to
best living arms designer
greatest of all time."

John Douglas Pedersen was born in Grand Island, Nebraska on May 21, 1881. His parents, Danish immigrants, were ranchers and John grew up in Jackson Hole, Wyoming. Young John traveled extensively, and proved to have a keen knack for mechanical things. His educational credentials are unknown, but in the second decade of the 20th Century, he went to

work for Remington-UMC as a designer.

Pedersen is most remembered for inventing the top secret Pedersen device of WWI, which was a semiautomatic conversion for Model 1903 Springfield Mark I rifles. It utilized a .30 caliber pistol-sized round. These devices came on stream too late to be utilized for the war, and most of the 65,000 produced were later destroyed, making existing examples quite valuable.

He designed a number of sporting guns for Remington in addition to the innovative Model 51 pistol. These included the Model 10 pump shotgun and the Models 12, 14, and 25 pump rifles. He refined John Browning's initial work to develop the Model 17 20-gauge shotgun, which served as the basis for the Remington Model 31, the Browning BPS, and the Ithaca 37. He also designed a .45 semiauto pistol based on principles used in the Model 51 pocket pistol. The resulting Remington Model 53 was accepted by the U.S. Navy for production, but when WWI started, the Colt/Browning Model 1911 became standardized, and his pistol was never produced.

During WWII, Pedersen teamed with the Irwin family of Grand Rapids, Michigan, who manufactured furniture. Their new company, the Irwin-Pedersen Arms Company, contracted to manufacture 100,000 M1 carbines. Due to many difficulties, the company manufactured only 3,500 carbines, none of which met military standards, and as a result, the facilities were taken over by the Saginaw Steering Gear division of General Motors. Irwin-Pedersen carbines are rarely encountered today and bring premium collector prices.

In the 1920s, the Army Ordnance Corps selected his .276 Pedersen cartridge to become the new combat rifle standard. However, Army Chief of Staff General Douglas MacArthur nixed the idea in favor of keeping the older .30-06, a decision which helped streamline supply lines in WWII. In his lifetime, Pedersen was granted over 70 firearms patents and was highly regarded in the arms industry. **P**

UTG AR15 Brass Catcher

Brass Catcher K18-15478 \$9.99

This tool provides that "third hand" you need to remove the handguards on carbines and full sized AR15 style rifles. All areas that contact the rifle are protected to prevent damage to the rifle's finish. Fits the AR15, M16 and M4.

Handguard Tool K18-15479 \$14.99

BLACKHAWK! Sling for Collapsible-Stock ARs

Fully adjustable 3-point sling design with a bilateral transition buckle allows shooting from both strong or support side for proper cornering. Available in coyote brown only!

Tactical Sling K18-15480 \$9.99

Concealed Carry Tote⁴⁷

\$45⁰⁰
K18-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged nylon fabric, with heavy-duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5"x11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. Plus, it passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You'll love your Stinger and undoubtedly draw a great deal of security and peace of mind from its mere presence. You deserve a Stinger today!

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	K18-19220	\$29.95
Advanced Trauma Kit (A.T.K.)	K18-19322	69.95

Streamlight's Nano Light® LED flashlight is super bright (10 lumens), can be seen a mile away, is made of virtually indestructible machined aluminum with an anodized finish, is weatherproof, nearly weightless and fits on your keychain or zipper pull tab!

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily.

The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

Dimensions: 66" x 27.75"
Shooting Mat **K18-18146 \$65.00**

RCBS Scale Check Weights

Standard Set: 60.5 grains for powder charges.	K18-12297	\$34.95
Deluxe Set: 510.5 grains for bullets, cases and powder.	K18-12458	\$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	K18-14067	\$1.35
5-Pack of Die Lock Rings	K18-10669	4.15
1" Dillon Bench Wrench	K18-10842	7.95
(Buy two or more 1" Bench Wrenches for \$7.10 each)		
Wrench/Lock Ring 5-Pack	K18-10668	9.95

Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K18-14760 \$24.95**

Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K18-18630 \$14.95**

C. Bullet Forward Slide Release **K18-18629 19.95**

GLOCK® Factory Original Parts:

D. Extended Mag Release (Small Frame) **K18-18569 \$9.95**

Lone Wolf Distributors' Match-Grade Barrels for GLOCK Pistols

These replacement barrels are manufactured from the highest grade mill-select 416 stainless forgings. Standard land-and-groove rifling makes these an excellent choice if you wish to shoot lead, plated or jacketed bullets. Can be used in factory ported or stock pistols. Ready to use, pre-fit drop in. No gunsmithing required.

Shooting Tips: The IDPA Classifier;

1. While waiting for the start signal at the barricade, already be in your shooting position: knees flexed, leaned forward, looking around barricade to visually acquire the first target to be engaged. 2. Don't crowd the barricade; the author actually gets so far back in the Bianchi barricade his feet are against the back of the box.

Photos 5 through 10: When doing a Reload With Retention (RWR) at the barricade, get the magazine out of the gun and stashed (notice in photo #7 that the author puts it in his waistband) as fast as possible.

By Duane Thomas

Previous entries in this series on recommended techniques to improve performance on the IDPA classifier covered Stages 1 and 2. We know move on to Stage 3, most of which is fired around a barricade at 20 yards. This is where most people screw up – even those who've done well on the first two stages – because they can't hit the 8" circles from 20 yards while off-balance, leaning around the barricade. They kill themselves with dropped point time penalties. This is the stage where people do the most things wrong, thus it will also be the one with the most tips, so much so we will cover each of this stages three strings in its own separate article.

STRING 12: Draw and fire two shots each T1-T3 from one side of barricade, reload, fire two shots each T1-T3 from opposite side of barricade.

(My time: 13.57 seconds.)

Tip #1: If right handed, shoot around the right side barricade first. It's a shorter movement of gun to target to draw from a right side holster to the rightmost target than to simultaneously lean and draw to the left.

Tip #2: A common error is crowding the barricade, forcing shooters to actually lean backward while shooting. Thus every time they fire the gun, recoil rocks their body backward, destroying both shot-to-shot speed and accuracy. If shooting from inside a Bianchi barricade, get as far back in the box as possible to start, with your heels right up against the back of the box.

Tip #3: While waiting for the buzzer, already be leaning significantly forward. The forward lean stops recoil from rocking you backward. Already

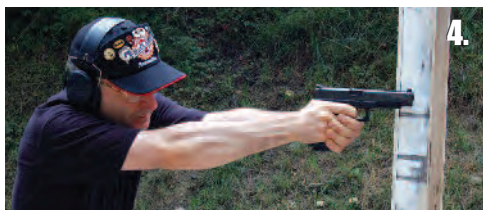

being in this position saves you time and movement versus acquiring it AFTER the buzzer.

Tip #4: Flex your knees; consciously drop your butt toward the ground. Be in a definite crouch. This will allow you to get much further around the barricade and still be well balanced (immensely important when engaging the far left target from around the right side barricade, and the far right target from around the left side). Barricade shooting with legs straight by contrast forces you to lean your upper body radically to the side to engage targets; you'll find it difficult to get far enough around the barricade to engage T1 from the right and T3 from the left. With knees flexed, you can get much farther around the barricade and still be well-balanced doing it.

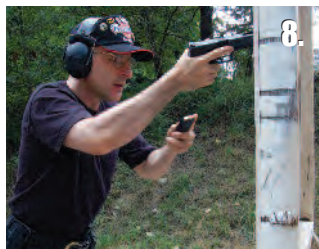

Tip #5: If the Safety Officer (SO) allows it, while waiting for the buzzer, lean out around cover and visually acquire the first target, then simply draw to it. This is quite legal and the SO should allow it because IDPA rules define "behind cover" as exposing no more than 50 percent of your upper body and none of your lower. You can begin the stage looking at the first target and still be behind cover to start.

Tip #6: Some SOs have their own definition of "behind cover" that has nothing to do with the IDPA Rule Book and absolutely insist you begin Strings 12 and 13 standing fully behind the barricade. You can still draw straight to the target by, as you assume your position behind the barricade preparatory to shooting, leaning slightly around it, one side then the other, visually acquiring T1 and T3, then memorizing points on the barricade that are right in line between your eye and those targets. It may be a knot in the wood, staple, splinter,

Stage 3, String 12: Barricade Work ⁶¹

Photos 3 and 4: For a fast first shot at the barricade, if it's not possible to visually acquire the first target, pick a point on the barricade right in line between your eye and that target, and simply draw to that point. (Don't actually point with your finger; the author is only doing that for purposes of illustration.)

Photos 5 through 10 (continued): Keep the gun high and move it in a straight line across the barricade to the other side rather than dropping down low then coming back up.

whatever. At the timer's signal, consciously draw the gun to that pre-chosen point as you lean out, then to the opposite point after the reload. This ensures that when you draw the gun, and then bring it back to firing position after the reload, the gun moves right where it needs to be to instantly fire your first and seventh shots.

Tip #9: Prep the trigger for the first shot while the gun is moving toward the target; don't wait until the gun is already there THEN start the trigger pull. This one change will save you immense time on your first shot.

Tip #8: For best accuracy at distance, prep the trigger for every shot. Prep the trigger between shots on the same target, and prep it while moving between targets. By the time you complete a transition, be a fraction of a pound away from firing the next shot. This is the single most important tip I can give you to increase both speed and accuracy from the barricade.

Tip #9: Okay, we have to do either a Tactical Reload (TR) where we draw and insert a fresh mag before putting away the old mag, or a Reload With Retention (RWR) where we store the old mag before grabbing a new, while moving to the opposite side of the barricade. Everyone does a RWR on String 12 since it's a simpler, faster sequence of movements than a TR.

Tip #10: As you've just fired your sixth shot and begin to come back behind cover to RWR, punch the mag button as soon as possible. In IDPA all reloads must be started and completed behind cover, however remember "cover" means no more than 50 percent of your upper body exposed. You

don't have to wait until you're back 100 percent behind the barricade to begin the reload. Your goal is, by the time your body is all the way behind the barricade you should have the old magazine stashed. That won't actually happen, you'll actually be 100 percent behind cover before you can even depress the mag release button; however, thinking of it this way will still cut major time.

Tip #11: Another advantage of not crowding the barricade: it'll give you much more room to execute the reload without the barricade actually interfering with it. Keep the gun up at eye level while reloading instead of dropping it down as so many people do.

Tip #12: Keep the gun, as much as possible, straight up-and-down, don't cant it in an attempt to get it further around the barricade. You'll have much more natural sight tracking, with resultant better shot-to-shot speed and accuracy, if you have your front sight right over the gun's barrel versus having it to one side.

Tip #13: Do not let any part of your arms, hands, or the gun touch the barricade, or recoil during firing will cause the gun to recoil violently away from the barricade, destroying your shot-to-shot speed and accuracy.

Tip #14: One reason many people screw up on Strings 12 and 13 is they're just not used to shooting at distance. This gives them a huge mental barrier; because they've never done it, they don't realize that getting good hits at this distance is easy. If at all possible, set up Stage 3 and practice it. You'll find in short order it's really not that tough a nut to crack.

Ultimate Advanced Revolver with Jerry Miculek – The World's Greatest Revolver Shooter Jerry Miculek is recognized as the fastest and most accurate revolver shooter in the world. His speed and skills are, in one word... Amazing! They've been verified in hundreds of local and national competitions. In this program, he shares with you some of the techniques and secrets he has mastered over the past 25 years to become the shooter he is today. And, you'll see an incredible display of revolver shooting and reloading. 100 min.

K18-14608 \$19.95

Competition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

Never Compromise

By Alan J. Chwick and Joanne D. Eisen

We American gun owners may become the last remaining bastion of individual sovereignty. We should never compromise away the birthright of our children. We are few, when compared to the global masses who are fearful of weapons. We are the most personally armed nation.

Estimates of the US civilian owned gun stock generally run about 270 million, or a trifle over 40 percent of the global civilian guns, according to the Small Arms Survey. It is no wonder that we are in their sights. If they can just get our guns, they feel, that getting the rest of the global arms should be a piece of cake.

We have local prohibitionists and global fear mongers pounding at the door. US gunowners are under siege on at least two fronts – the not-so-dead Arms Trade Treaty (ATT) and the media response to mass murders here at home.

First, on the ATT front, the UN will persist. The cessation of deliberations last July at the UN without a treaty actually benefitted the ATT proponents. It should not be considered a win for us, as it freed the proponents from the burden of a 100-percent consensus. A 100-percent consensus means that any single state could quash anything it disliked, so that the treaty, in order to be acceptable to all, would not possibly include in its scope things like victim reparations. By negotiating with a consensus defined as less than 100 percent, fewer nations will be required to pass a proposal, so anything could happen. And, we believe that when the next round of talks begins, anything will.

An ATT is as good as a done deal. The Secretary General of the UN, Ban Ki-moon, said, “this is not the end of the ATT.” The ATT will not

reduce weapons violence, as proponents promise, even if it could work as proposed. But it will affect US gunowners.

If you don't believe that an international treaty could affect our laws, just ask yourself, “What if it does?” Why not be prepared!

We should never compromise on an ATT whose sneaky and treacherous provisions have the potential to disarm us, in a step by step process, and stigmatise our culture of freedom.

**We should
no longer
compromise.
Compromises
mean greater
restrictions for
the law abiding,
especially
when they are
based on lies.**

Second, on the home front, the plague of mass murders here in the US, though seemingly newsworthy, is only so because they are statistically rare. In 1998, Simon Chapman, an Australian public health activist, instructed his friends that “gun control advocates should prepare for the dreadful inevitability of such incidents...” And prepare they did.

The recent mass murders with small arms brought out our local fear

mongers. As an example, a Violence Policy Center statement called the incidents, “a tragic demonstration of the firepower that is available to virtually anyone.”

The local prohibitionists parade before us the dead bodies, the funerals, the survivors, the relatives, and the maimed victims. The dead, and suffering victims, invoke our sympathies. We do cry with them. But we gun owners need to know that we have the statistics on our side. The statistics show that restrictive gun laws and regulations do not improve the carnage; in fact, they do often worsen it.

During the 1980s and 1990s a mass of faulty research attempted to prove that restrictive gun laws were necessary to improve public safety, and we firearm owners accepted the new restrictions.

Bore-tips™ Bore Cleaning Foam Swabs

Now, there I was...in my office, cleaning my 686 SSR when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!”

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit

which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

We were fooled once, we should not be fooled again, merely because different people are using different slogans. This time, we know for sure that they lie. If we weaken and accept the lies as truths, freedom will be lost to our progeny.

Here are the simple truths:

In 1996, John Lott and William Landes statistically explained in their online article "Multiple Victim Public Shootings" that responding to mass public shootings with more restrictive firearms possession laws is counter productive (<http://www.thevrwc.org/JohnLott.pdf>), because with the greater possibility of the presence of armed civilians, they said, "many attackers are either deterred from attacking or when attacks do occur they are stopped before the police can arrive."

In 2003, a definitive meta-study from the Centers of Disease Control (CDC), called "First Reports Evaluating the Effectiveness of Strategies for Preventing Violence: Firearms Laws" (<http://www.cdc.gov/mmwr/preview/mmwrhtml/5214a2.htm>), examined and reviewed restrictive gun laws. The CDC report found that "Evidence was insufficient to determine the effectiveness of any of these laws..." Try as they might, the anti-gun CDC could find no positive benefit from restrictive laws.

In 2005, the National Academy of Sciences published a 328-page report which examined 253 journal articles, 99 books and 43 government publications and found that no link could be established between restrictive laws and violence (National Academy of Sciences, Firearms and Violence: A Critical Review, <http://www.nap.edu/openbook.php?isbn=0309091241>).

Now, we see a Quinnipiac University poll, taken August of 2012, that claims 40 to 50 percent of people living in a gun-owning household favor bans on high-capacity magazines. How many rounds make a high-capacity magazine? Fifty? A hundred? Or the single-round weapons that the prohibitionists might allow some of us to possess, until one bullet is considered too much?

A Luntz poll, reported by Reuters, for the group

Mayors Against Illegal Guns, showed that gun owners – including NRA members – are in favor of restrictions. However, the presence of restrictions will strengthen the black market while reducing access to law-abiding citizens. Restrictive gun laws do not decrease violence.

We need to be able to explain the futility of restrictive gun laws to our doubting friends and elected officials. We need to have the understanding that our children are safer in homes where parents keep weapons. Our children are safer in towns, cities, and states where civilian gun possession is the rule, rather than the exception.

We should no longer compromise. Compromises mean greater restrictions for the law abiding, especially when they are based on lies.

This is the moment when we must fight for freedom. Not with our blood, but with ourselves as examples of sovereign men and women. We must fight with a calm passion that is strong enough to hold back the tsunami of global lies and untruths. We must counter their untruths with truths. And, we must never, ever, doubt ourselves.

Evolution Gun Works
 These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

76 Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards. Compact design, 30mm tube and bright illumination of the reticle are just a few of the many features of the DMS-1. Bright red illumination of the reticle adds to the quickness of the sighting system in day and low-light conditions. At one power it works well as a reflex sight and at longer ranges the four-X magnification gives increased accuracy.

K18-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

K18-11643 \$89.95

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES ⁷⁷

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **K18-25374 \$68.95**
 Scout Scope Mount for SKS Rifle **K18-25373 67.95**

90 Degree C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE

(Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

ONESHOTONEKILL

We call it the B.A., even though it's the farthest thing from "liberal arts" imaginable. However, if you use the creative side of your brain, it won't take you long to figure out what B.A. stands for.
