LONG DISTANCE CARRIERS

THIS COULD BE YOUR RIFLE. *At Savage, we understand the difference between a shooter and a rifleman. For those wanting to test their skills at extreme distances there is the M110 and M111 rifles in .338 Lapua. A lot of companies make guns for shooters. Savage makes them for riflemen.*

Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

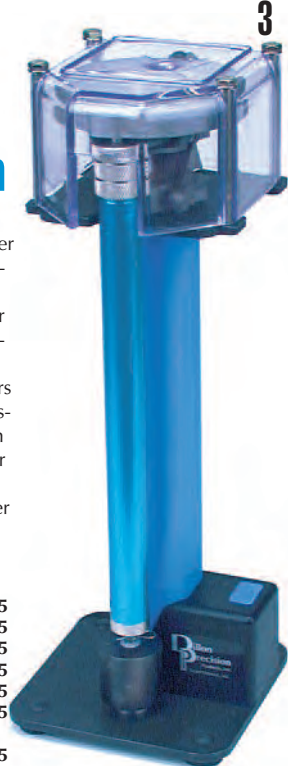

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I must comment on John Marshall's article about the Galil rifle. In 1974 I was in Israel, training the Israeli Customs Service, and many of my students were Army Reservists, armed with the Galil. Mr. Marshall errs in his comments about the bottle opener. All the Galils I saw at that time had the bipod, and they all had the capped bottle opener – but not for beer. The staple drink in the country was orange or grapefruit juice, packaged in glass bottles with "beer bottle" type caps. Everywhere we went in country, we saw cases and cases of these drinks, but no beer for the troops.

Seth R. Nadel – via e-mail

I just read the December 2013 edition of *The Blue Press* and was disgusted with the "Tactical Reload" article on page 20. As a retired federal agent and firearms instructor, I would NEVER instruct my students to retain the withdrawn magazine Mr. Taylor says should be held this way and that. In a "hot corner" I dropped the empty magazine and put in a full one. Keep it simple and survive.

Ron Benjamin – wozle@epix.net

In reference to Duane Thomas (October) and Chuck Taylor (December) *Blue Press* issues regarding the "Tactical Reload." Both methods described have one major fault. You are performing a fine motor skill with your fingers. You will lose that fine motor skill under the stress and adrenalin surge of a gunfight. If you also count how many times the non-firing hand moves from the gun to the mag pouch and pocket and back, it is four (4) times. Reload With Retention (RWR) mentioned by Duane is a much faster and surer method. It is a gross motor skill of only two (2) movements of the non-firing hand: 1) Grab the partially loaded magazine from the handgun. 2) Stuff it into a pocket. 3) Remove the fresh magazine from the mag pouch. 4) Stuff in into the handgun. Finished, faster, surer.

Wayne Johnson – Sacramento, CA

Given the nature of the responses generated by both articles, it's clear that folks have strong opinions regarding the reloading procedure of choice. Next month, I'm going to run Duane's article about "Reload With Retention."

I have been a reader of *The Blue Press* for a long time. I just wanted to drop a note to tell you how satisfied I am with your publication. The articles are very interesting, and it is top notch! Hope you keep everything "as is"! I just ordered my 2014 calendar, and am looking forward to receiving it!

Joe Pults – via e-mail

Thanks, Joe! Your e-mail was like a stream in the desert.

TARGET SHOOTING

PLINKING

LEARNING

THE RUGER® SR22® IS THE DO-IT-ALL .22 PISTOL FOR THE SHOOTER WHO APPRECIATES STYLE AND DEMANDS RELIABILITY!

Packed with versatile features, the SR22® is lightweight (just 17.5 ounces) and perfect for just about anything – target shooting, plinking and learning to shoot. It is easy to field strip, fun to shoot, and will reliably accept a variety of ammunition (not just high-velocity ammunition).

 **RUGER®**

Which Dillon is Right

Square Deal "B"

Dillon's Square Deal "B" was designed to produce large amounts of ammunition in the least possible time for just a little bit of money. At 300 to 400 rounds per hour, you can produce enough ammo for several pistol matches or practice sessions in just a few hours.

See Page 8

RL 550B

More RL 550s have been sold than any other progressive machine in the world, and for good reason: The RL 550B's versatility is almost unlimited. It will load over 160 different rifle and pistol calibers. Its quick-change tool-head allows the user to change calibers without having to readjust dies.

See Page 14

XL 650

Dillon's XL 650 resulted from several years of listening to our customers expressing their fondest wishes. We took every good idea we and our customers ever had, tested them extensively, and then incorporated them all into the design of the XL 650.

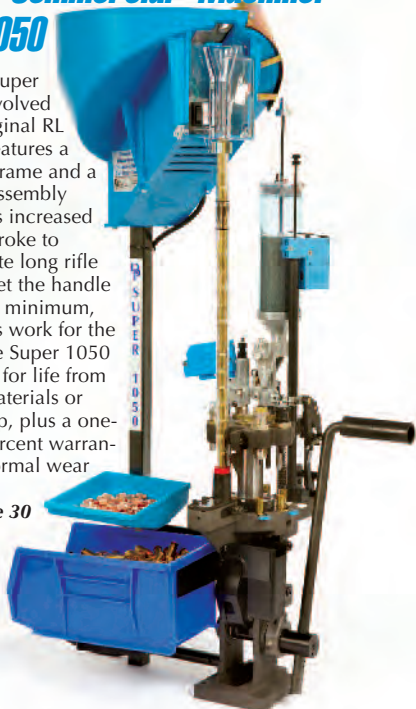

See Page 20

Dillon's "Commercial" Machine: Super 1050

Dillon's Super 1050 evolved from the original RL 1050, and features a lengthened frame and a new crank assembly that provides increased functional stroke to accommodate long rifle cartridges, yet the handle stroke is at a minimum, meaning less work for the operator. The Super 1050 is warranted for life from defects in materials or workmanship, plus a one-year, 100-percent warranty against normal wear and tear.

See Page 30

Right for YOU?

BL 550

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

See Page 13

RL 550B With Accessory Casefeeder

Adding an automatic casefeeder system to your RL 550B will easily increase your ammo production rate by 25 percent or MORE! The casefeeder streamlines the loading process by reducing hand movement, and the RL 550 Casefeeder uses time-tested, proven technology.

See Page 16

Dillon's "BFR" Big Fifty Reloader

You KNOW you want one! There's nothing quite as thrilling as touching off one of those .50 BMG cartridges and sending 750 grains of copper-jacketed lead downrange. WAY downrange! If the cost of loaded .50 BMG ammo has been putting you off, you no longer have an excuse.

Join the ranks of the LONG-range target shooters and roll your own .50 BMG (and other long-range, specialty cartridges) on Dillon's BFR.

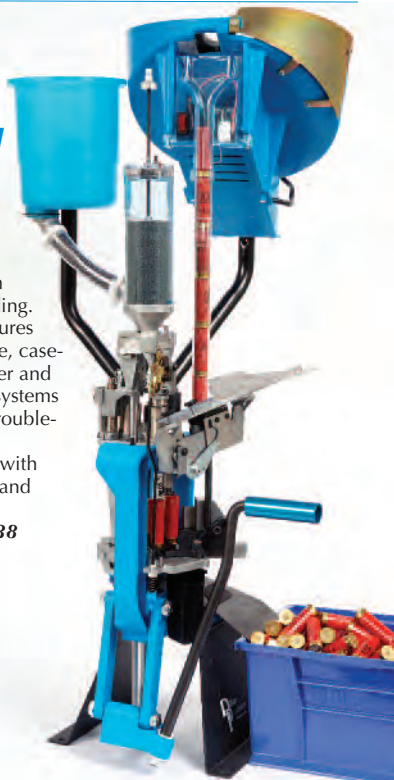

See Page 50

SL 900 Dillon's Shotshell Loader

Dillon's SL 900 is the new standard in shotshell reloading. The SL 900 features easily adjustable, case-activated powder and shot dispenser systems that eliminate troublesome bushing changes, along with spilled powder and shot.

Reviewed by Peter Caroline

I'm pleased to report that you *can* teach an old dog new tricks. My first exposure to the AR format was back in the early 1960s. I was less than impressed. I had trained with, and had carried, the M-1 Garand rifle, and this new contraption looked...weird. Besides, it was chambered for a cartridge that wasn't .30-06, or even .308. Who in hell was going to carry a .22 into battle?

Well, times have changed and, oddly enough, I've gotten a bit more flexible in my old age.

I'm still not all that impressed with the .223/5.56 round, but I've come to appreciate the virtues of the Modern Sport-

ing Rifle. It's accurate, reliable and incredibly versatile. Unlike the iconic Garand, it's a veritable Barbie Doll, just begging to be accessorized with all manner of optics, lights, bipods, buttstocks, etc.

As an incurable Mr. Gadget, I can relate to that.

One of the most recent iterations of the MSR format is Ruger's new SR-762. Two things I immediately found appealing: the 7.62/.308 caliber and the easily obtainable MagPul® PMAG® 20-round magazines. I have one of Ruger's excellent Gunsite Scout rifles, and the only nit I had to pick was its proprietary magazine. Okay, I'm

spoiled; I've had FALs, and surplus mags were cheap and easy to find.

Ruger sent me an SR-762 to test, and the first thing I noticed was it came with its own well-equipped ballistic fabric case, three magazines (hooray!) and fold-down adjustable iron sights. The rear sight has two apertures and is adjustable for windage. The front sight is adjustable for elevation, but does not come with the requisite tool, without which, adjustment is somewhat of a PITA.

The SR-762 has a 16-1/2" barrel, and uses a gas piston system, which is claimed to be cleaner and more trouble-free than the conventional direct gas impingement system. A shooting buddy of

Ruger's SR-762 ships with three 20-round MAGPUL® PMAG® magazines (where legal), a soft-sided fabric case, three finger-grooved rail covers and two additional Picatinny rail sections.

mine was one of the "early adopters" of the original M-16 in Vietnam, and has horror stories of crouching in a muddy ditch, trying to clean his rifle during a firefight. I understand that significant upgrades have been made since then.

At 9 lbs., the SR-762 has an appropriate heft for its caliber. There's a full-length Picatinny rail up top,

RUGER SCORES AGAIN!

The Ruger SR-762

but the handguard is clear of rails on the sides or bottom. You can add them yourself if you're so minded. I found the smooth sides to be more comfortable while shooting. The stock is of the six-position adjustable variety, with a non-slip buttplate.

Just above the barrel is an adjustable four-position gas regulator that can be set for whatever loads you might be using. The "2" position appears to be the standard setting. The "0" position shuts off the gas and allows the rifle to function as a single shot, which aids in quieter operation with a suppressor.

Before going to the range, I fitted a Leupold 2.5X Scout scope, mounted on a 3/4" riser block. The adjustable stock makes easy work of establishing the proper eye relief. The magazines are easy to load even without a loading tool, and come with detachable covers to keep out crud when the magazines are not in use. My ammo selection was limited, thanks to our current supply situation. I had available my own 147-grain FMJ handloads, American Eagle 150-grain FMJB and some surplus NATO 150-grain ball, made by Norma.

Shooting the SR-762 is, without exaggeration, an absolute pleasure. The gun balances well, and recoil is not at all bothersome. I've fired a fairly wide variety of .308s, both semiautomatic and bolt-action, and this is the most comfortable of the lot. Zeroing in the scope at 50 yards, I shot several under-3/4" groups, and at 100 yards, the

groups opened up to 1-1/2" - 2", probably a result of my eyesight and a 2.5X scope. I didn't measure the triggerpull until I got home from the range. It was in the 6-1/2 - 7-lb. range, which was quite surprising. It was quite manageable, and I thought it was a good deal lighter. I suppose, if you're fussy about such things, there are many excellent aftermarket trigger assemblies to choose from.

In my opinion, for whatever it's worth, the Ruger SR-762 is the finest iteration to date of the original .308

AR-10 design. At an MSRP of \$2,195, it's right up there in price with some fancy custom .223 black rifles, but well worth it, and a hell of a lot more fun.

Sturm, Ruger & Company, Inc. • 411 Sunapee Street • Newport, NH 03773 • www.ruger.com

"In my opinion, for whatever it's worth, the Ruger SR-762 is the finest iteration to date of the original .308 AR-10 design."

BL 550 Dillon's Basic Loader

\$259⁹⁵

K72-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K72-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

RL 550B ACCESSORIES

A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

K72-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K72-20782, \$76.95 ea.**
Magnum Rifle Powder Bar **K72-21353, \$29.95 each**
X-Small Powder Bar **K72-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K72-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

K72-20064, \$11.35 each
Three or more, \$10.25 ea.

X-Large Powder Die, **K72-21253, \$19.95 each**

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

K72-13909, \$22.95 each
Three or more, \$20.95 ea.

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

K72-22055, \$20.95 each
Three or more, \$18.95 ea.

G. 1" BENCH WRENCH

K72-10842, \$7.95 each
Two or more, \$7.10 ea.

H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol **K72-14450**

Small Pistol **K72-14451**

\$254.95 (110v US Model)

Large Pistol **K72-14453**

Small Pistol **K72-14454**

\$264.95 (220v Euro Model)

CASEFEEDER CALIBER CONVERSIONS (Page 17)

\$23.95 each

K. 550 SPARE PARTS KIT

- 1 Seating Punch, Small
- 1 #10 Tinnerman Insert
- 1 Primer Cup, Large
- 1 Primer Cup, Small
- 1 Bellcrank Cube
- 3/8" Index Ball
- 1 550 Brass Tip Set Screw
- 1 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 1 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)
- 1 Seating Punch, Large
- 1 550 Index Ball Spring
- 2 Pickup Tube, Small, Yellow Tips
- 2 Magazine Orifices, Large
- 1 Toolhead Pin

I. PRIMER FLIP TRAY

K72-13606, \$20.95 each

J. PRIMER PICKUP TUBES

- 1 Lg. tube **K72-22029 \$7.99**
- 1 Sm. tube **K72-22028 7.99**
- 2 Sm., 2 Lg. **K72-20056 23.95**
- 4 Lg. tubes **K72-20050 23.95**
- 4 Sm. tubes **K72-20049 23.95**

- 2 Pickup Tube, Large, Green Tips
- 2 Magazine Orifices, Small
- 1 550 Primer Cup Spring
- 2 Retaining Clips
- 2 Dispensing Tip, Large
- 2 Dispensing Tip, Small
- 1 Failsafe Bushing Rev. B

K72-20048, \$18.95

L. MACHINE MAINTENANCE KIT

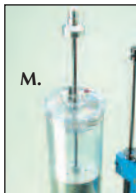

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

Maint. Kit & RL 550B Spare Parts Kit **K72-97016, \$32.95**

M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

K72-16306, \$41.95

N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550B Cover, **K72-13795, \$23.95**

(O.) Master lock, **K72-13083, \$3.95**

Quick-Change Cover (for use with powder measure) **K72-11143, \$14.95**

P. UNIVERSAL MOUNTING HARDWARE KIT

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

K72-14355, \$5.49

Dillon Tool- holders

Dillon's Toolholders are available for your RL 550B, XL 650, SL 900, and Square Deal B, and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

RL 550 with Wrench Set

K72-11541 \$28.95

RL 550 w/o Wrench Set

K72-11543 \$17.95

Casefeed 550, with Wrench Set

K72-11540 \$28.95

Casefeed 550, w/o Wrench Set

K72-11542 \$17.95

Bullet Tray Kits

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the "feel" of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

Bullet Tray Kit **K72-22214 \$41.95**
RL 1050 Tray Kit **K72-22215 \$41.95**

Quick- Change Dust Cover

Quick-Change Cover for use with powder measure. **K72-11143 \$14.95**

Accessory Package Deal

Includes: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook* (not pictured, see Page 62).

RL 550B (Balance Beam Scale)

K72-21143 \$181.95

RL 550B (Electronic Scale)

K72-22117 \$250.95

Low Powder Sensor

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

K72-16306 \$41.95

Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel." A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

Alum. Roller **K72-17950 \$45.95**
Plastic Roller **K72-22183 \$40.95**

Belted Magnum Powder System

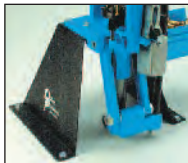

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System

K72-97126 \$142.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

RL550/XL650 **K72-22051 \$48.95**

RL 450-to-RL550B Upgrade Parts

You can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

RL 450 Upgrade Components

Dillon's Case Preparation Equipment

CV-2001
K72-20493
\$188.95

CV-750 K72-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K72-20675 \$73.95

CM-500 Case/Media Separator K72-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K72-22047 \$213.95

Euro CV-750 K72-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K72-13804** **\$8.95**
Case (20 pc.) **K72-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **K72-13733** **\$8.95**
Case (20 pc.) **K72-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **K72-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag **K72-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag **K72-13496** **\$15.95**

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

RL550/XL650 **K72-22051 \$48.95**

XL650-only **K72-22052 \$45.95**

Powder Check System

Quit worrying about squib loads and double-charged cases.

K72-21044, \$68.95 each

Three or more, \$61.95 ea.

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K72-22080** is **\$267.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below.) Replacement carbide cutting blades, **K72-13141**, are **\$19.95** each. Upper lock rings, **K72-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K72-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K72-11702 89.95**

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

Dillon's Pistol Die Sets

Size Die

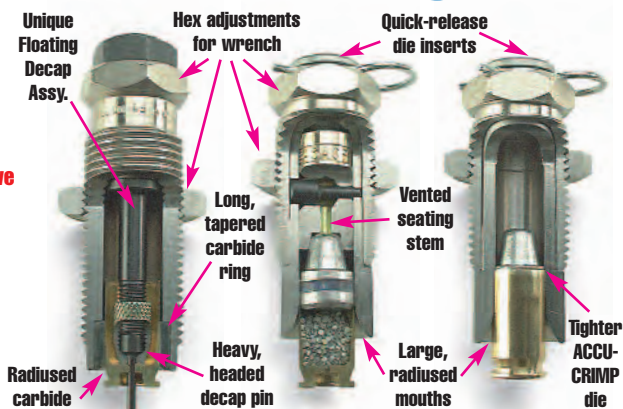

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Extra Loading Data Labels, K72-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

 *Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.

AP Custom USA

AP Custom USA's Shotshell Carriers are 100-percent machined from solid billet aluminum, and utilize proven 303 Hi-Yield Stainless steel leaf springs to contain either three or four 2-3/4" 12 Gauge shells in their slots, depending on model. Both models offered here feature the BLADETECH Tek-Lok™ Universal Belt Clip. The 4x4 Shotshell Carrier holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong or weak-handed. The 3x3 holds three 2-3/4" 12 Ga. shells in two adjacent slots.

 3x3 Shotshell Carrier **K72-14344 69.95**

TACCOM, LLC Tactical and Competition Accessories

TACCOM, LLC's Duaload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a BLADETECH Tek-Lok™ Universal Belt Clip (included) that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE **K72-19530 \$9.95**
 4Up w/Tek-Lok™ **K72-19531 29.95**
 6Up w/Tek-Lok™ **K72-19532 34.95**

TACCOM, LLC's Quaload Shotshell Holder is a serious game changer! It's so radical that they are patenting the device.

The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holer and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder **K72-19543 \$39.95**
 8Up Quaload Shotshell Holder **K72-19544 69.95**

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

CLASSIC FIREARMS: The Russia

By John Marshall

Most gun-knowledgeable people will tell you that you can't efficiently sound-suppress a revolver because the barrel-cylinder gap will allow some high-pressure gas (and noise) to escape. Former Russian secret police agents would laugh at that, because they fitted both factory and improvised suppressors to their revolvers routinely. Their revolvers were model 1895 "gas seal" Nagants. This revolver's most interesting feature was that it effectively and ingeniously sealed the barrel-cylinder gap, allowing no gas to escape there. That fact alone richly qualifies this old seven-shot revolver as a true classic.

In the late 19th century, the invention of smokeless powder by the French made most extant weapons obsolete. The Russians had been using .44 Russian Model Smith & Wesson black powder top-break revolvers since 1870. These were referred to by the Russians as "4.2-line" revolvers based on their bore size. The old Russian measuring system defined a "line" as 1/16 of an inch. The big Smiths were effective and popular, but the Tsarist government wanted something more modern and innovative. The *Fabrique d'Armes et Leon Nagant* came into being in 1859, founded by Leon and Emile Nagant in Liege, Belgium. Their Nagant revolver was invented in the late 1880s and early 1890s. The brothers were already well known to the Russians, as the Tsar's military had recently adopted the Model 1891 Mosin-Nagant rifle. The model 1895 revolver with its unique gas seal mechanism made a great impression on the Tsarist representatives, and it was quickly and officially adopted as the standard issue handgun for the Russian Army. It was also standard for police officers, including the later *Cheka*, *OGPU*, *NKVD* and *KGB* secret police operations. In addition to Russia, this unique revolver was also adopted by a number of other countries, notably Sweden and Poland. Initial production was in Belgium, but after the Imperial Russian government purchased the patent rights in 1900, Russian revolvers were exclusively manufactured in Russia at the Tula, Sestroryetsk and Izhevsk arsenals. Initial Russian production was almost all in single action only (the "Private" model), although Liege production was in single/double action. After the Russian Revolution in 1917, Russian-made revolvers were nearly all single/double action (the "Officer" model) and most of the earlier single-action revolvers were then converted to double action. Production officially continued until

1945 in the U.S.S.R. despite the adoption in 1933 of the Tokarev semiauto pistol. Some manufacture is reported to have occurred as recently as 1950. Russian railway security departments and far-flung police departments still have them in their inventories and presumably use them. Reportedly, there were some special models made in .38 Special and .22 Long Rifle that did not have the gas-seal mechanism. There was a short-barreled *GRU* model and various silenced types. In WWII, some revolvers were fitted with the "Bramit device" (a standardized suppressor) for recon and scout troops. The

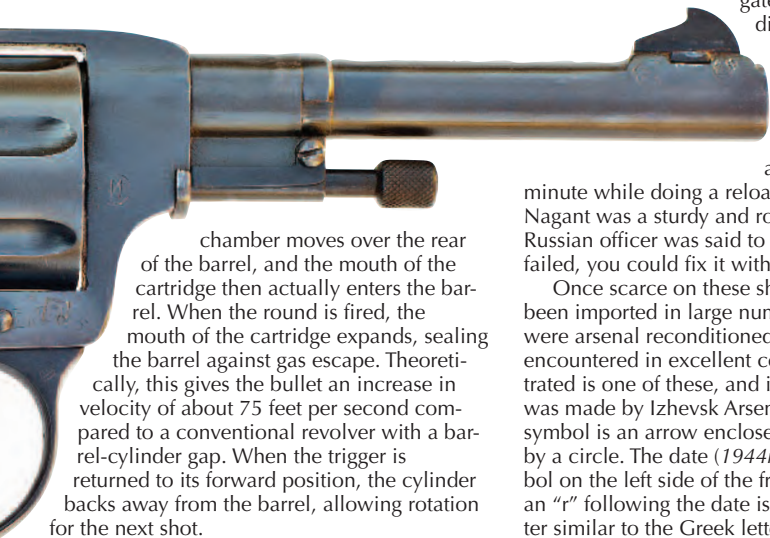

"In WWII, some revolvers were fitted with the 'Bramit device' (a standardized suppressor) for recon and scout troops. The secret police also used suppressed Nagants for political assassinations.

secret police also used suppressed Nagants for political assassination purposes. In 1930, Charles and Maurice Nagant, sons of Leon, sold Liege's rights, machinery and large quantities of parts to Poland. The model 1895 was then made in Poland as the Radom Ng30 (Ng was shorthand for Nagant in the designation). Produc-

an Model 1895 Nagant Revolver

tion continued until the Polish adoption of the VIS-35 Radom 9mm pistol in 1935.

The mechanism of the revolver is built around its unique cartridge, the 7.62x38mmR (7.62mm Nagant). The bullet is seated deeply *below* the mouth of the case, with a mouth reduction and crimp just above the bullet. The 7.62mm diameter of the bullet was chosen to simplify barrel-boring machinery, as the standard rifle of the time was also of that dimension. Following rotation, the mechanism of the revolver forces the cylinder and the cartridge aligned with the barrel forward. The

chamber moves over the rear of the barrel, and the mouth of the cartridge then actually enters the barrel. When the round is fired, the mouth of the cartridge expands, sealing the barrel against gas escape. Theoretically, this gives the bullet an increase in velocity of about 75 feet per second compared to a conventional revolver with a barrel-cylinder gap. When the trigger is returned to its forward position, the cylinder backs away from the barrel, allowing rotation for the next shot.

The biggest problem with the Nagant was in

vers were fitted with
a standardized sup-
and scout troops.
so used suppressed
assassination purposes.”

ejecting the cases preparatory to reloading. First, the ejector rod, located centrally under the barrel, had to be twisted and pulled straight out to its limit. This was difficult with gloved hands. The next step was to rotate the tight ejector rod housing out as far as it would go, putting the ejector rod in line with one chamber. Next, the loading gate had to

be swung open. Then the non-spring-loaded extractor rod had to be pressed through each chamber and retracted manually in turn, ejecting each case singly. The cylinder was rotated manually to line things up. Cases, with the mouths expanded larger than the rear chamber diameter, didn't eject easily, either. Then the ejector rod housing had to be rotated back into position under the barrel, and the ejector rod pressed in and locked in place by turning. Following all of this, new rounds were fed singly into the cylinder through the open loading gate, and the loading

gate then closed. Was this difficult and time-consuming in combat? You bet. When those seven rounds were expended, the Nagant was only about as useful as a brick for about a

minute while doing a reload. At any rate, the Nagant was a sturdy and robust revolver. One Russian officer was said to have remarked that if it failed, you could fix it with a hammer!

Once scarce on these shores, Nagants have been imported in large numbers recently. Most were arsenal reconditioned after WWII, and are encountered in excellent condition. The piece illustrated is one of these, and its markings reveal that it was made by Izhevsk Arsenal in 1944. The Izhevsk symbol is an arrow enclosed by a triangle enclosed by a circle. The date (1944r) is just under that symbol on the left side of the frame. What looks to be an “r” following the date is actually the Cyrillic letter similar to the Greek letter *gamma*, meaning “year of God.” In use, the trigger pull is atrocious, but manageable. The firing pin on the hammer is long and resembles a witch's claw, making it look very sinister when cocked. You can't reload it quickly. But it's fun to shoot, very accurate, and many Russians still swear by it. In fairness, it worked then, and it still works now.

These reconditioned Nagants can be had, complete with a holster, cleaning rod, screwdriver and lanyard for under \$100. Military ammunition is still rather scarce, but some new-made ammo is being imported. .32 ACP conversion cylinders are being made, and are available for about \$50. You can make your own Nagant ammo using .32-20 brass, and reloading dies are available. Jacketed bullets are recommended, as lead bullets tend to foul up the rear of the barrel where tolerances are critical.

The model 1895 Nagant revolver holds its niche in history as the prime sidearm of Russia for many years, and as a unique solution to gas escape from the barrel-cylinder gap of a revolver. It's an interesting foray into solving a minor problem in a complex manner. There's no doubt that it's an enduring classic handgun.

*FAQ About Berry's Preferred Plated Bullets

1. What is "DS"?

"Double Struck." Double-Struck bullets go through an extra sizing process after being plated. This makes the bullet 100 percent symmetrical. This can give you an edge in competition, but most shooters won't notice the difference.

2. Plated/Jacketed/Cast bullets: What's the difference?

Berry's Preferred Plated bullets begin as a swaged lead core. The plating process works through electrolysis. The swaged lead cores are tumbled in an electrically charged cyanide bath containing high-grade copper ingots. The copper clings to the lead and the longer the bullets remain in the bath, the thicker the plating.

3. How do I load Berry's Preferred Plated Bullets?

Plated bullets occupy a position between cast bullets and jacketed bullets. They are soft lead, but have a hard outer shell on them. When loading plated bullets we have found best results using low- to mid-range jacketed data in the load manual. You must use data for a bullet that has the same weight and profile as the one you are loading. Do not exceed mid-range loads.

4. How fast can I shoot these bullets?

Velocities depend on the caliber, but as a rule of thumb, we recommend you don't shoot our plated bullets over 1200 fps (feet-per-second). Our 44s actually shoot best around 1150 fps. 45s are generally good at 850-900 fps. Our bullets are NOT recommended for magnum velocities.

5. Can I shoot your plated bullets in my GLOCK?

Yes. We have a large contingent of loyal GLOCK shooters using our bullets. The plating is thick enough that you will not get lead fouling in your bore, which is the nemesis of polygonal barrels.

*DS = Double Struck, TP = Thick Plate, HB = Hollow Base, RN = Round Nose, FP = Flat Point, SWC = Semi Wadcutter, WC = Wadcutter

SNS Casting has officially become a coated bullet supplier. The advantages of a coated bullet are that there's no risk of losing lube during shipping, there's no wax lube to get into your reloading dies, and there's significantly less smoke than standard cast bullets. The end result is cleaner hands, guns/barrels, and loaders!

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K72-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

K72-10252

\$24.95

Concealed Carry Tote⁴⁷

\$45⁰⁰

K72-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

TUFF PRODUCTS MAG POUCHES

Front view with flap.

Front view without flap.

Rear shows loops and Molle fasteners.

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system; for instance, the Dillon Range Bag, a tactical vest or body armor carrier. Available in black or coyote brown.

Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

K72-19495 \$9.95

Baschieri & Pellagri 12 Ga. Target Slug

Reduced recoil, 1200 fps
25 per box

K72-19214 \$21.00

DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

K72-19371 \$29.99

“Mighty Mouse” Munson —

By Robin Taylor, www.taylorfreelance.com

Photos by Paul Hyland, www.liveshots.net

If Lisa Munson had a theme song, “Burning Down the House” by Talking Heads gets my vote.

Lisa looks about as threatening as a warm glass of milk, but don’t be fooled. Her sunny personality hides a power player – a physical dynamo. When she took on the workout regimen that transformed her shooting game in 2003, Lisa weighed 97 pounds and stood 5’2”. (Shooters called her “the Smurf.”)

She gained 20 pounds of lean muscle mass that year, and discovered a new world of possibility.

By 2003, she’d already won five USPSA national titles, but the re-shaped Lisa

re-defined “how women shoot.” Because of her (and her 12 national titles), all top female practical shooters now sing the virtues of P90X, Crossfit, or any of several other intense workout systems. It’d be easy to think *Athleticism? In pistol shooting?* – but picture this: At one Nationals, I watched Lisa run full-speed along a wall toward a final shooting position. Hidden behind the wall lay a single target. Every shooter in the match (male or female) had run to the end of the wall and stopped at a fault line, leaning out to shoot. Lisa hit the fault line running full-tilt and leaped high, twisting and firing in midair. She had two “alpha” hits on the target *before her feet hit the ground.*

You could hear jaws drop.

We called it the “Air Lisa.”

Now, with 27 years in the game, Lisa’s got a new focus.

She’s on a quest to see how long she can stay in the top tier of the practical shooting universe. Already she’s helped the U.S. win gold in Indonesia, in Greece, and recently qualified to represent the U.S. again at the upcoming World Shoot.

“I’m fighting the inevitable – loss of muscle mass, loss of reaction time, vision problems,” she says, but so far she’s winning that fight. “I know I’m stronger than I ever have been. Shooting aside, all this workout stuff has really helped me. I feel great. I feel 15 years younger than my actual age.”

Michael Jordan talked about training differently as he aged, and at age 52, Lisa experiments constantly with new ways to overcome age-related issues.

Take vision for example: “I’m having a lot of success with my glasses set up for monovision. My dominant eye is corrected for my front sight’s focal range while my left eye is corrected for distance,”

she says. “It takes about a half an hour for my eyes to adjust to this when I first put them on, but the results have been great. The best part is that with a fixed focal range, you *can’t* be tempted to look past your sights and out at the target.”

To this day, Lisa’s explosive, physical style mirrors the top male shooters. She’s hardcorps run-and-gun all the way, and has the injuries to prove it.

At the 2013 Area 3 in Grand Island, Nebraska, Lisa’s hard-charging style met with an immovable object. Dashing toward a shooting area her foot slipped on deceleration and slammed into the edge of a steel box staked to the earth. She jammed her toes so hard she bruised the bones in her feet,

ankle, and lower leg. (The hospital pictures look ugly.) Ignoring the pain, she shot the last two stages hopping on one foot from position to position. After that, she couldn’t stand. Her travel partner Debbie Keehart wheeled her into the awards ceremony that night on a hotel baggage cart. She needed to go, because despite hopping on one foot (in a game where elapsed time is part of your score), she’d out-shot all the other women at the match, and finished 13th overall.

This year she’s working with a sports trainer who’s studying film footage of the top male shooters, analyzing what the guys do better than the women. Their first goal? Improve Lisa’s foot speed. That means ladder drill, wind sprints, and additional exercises to strengthen her back and shoulders. Listening to her talk about her two-a-day workout regimes, you’d

think she was training to fight in the UFC.

“I did a private workout Monday early, went back to the gym for total body that evening. The next day was yoga, and Wednesday we did wind sprints in the morning and total body workout in the afternoon....”

The physicality that so many young men take for granted plays a big role in USPSA/IPSC shooting – especially among women. As Lisa will tell you, when you watch the average club shooter, you can see how they drop a half-second here, a half-second there because of inefficient movement, or lack of physical fitness.

“The sport is so dynamic,” says Lisa. “There’s so much burst movement. You have to be able to lower your center of gravity to stabilize yourself as you go along. You can do an awful lot to help yourself be able to do that.”

Lisa in SV blue. Until recently she was one of the last proponents of the tube-style red dot scope (shown). Today she’s running a C-More sight tipped sideways to get the dot down closer to the bore.

Burning Down the House

49

Tiny little Lisa was one of the first (if not *the* first) woman to hold a “Master” classification in USPSA’s Open and Limited division. Only about a dozen women have achieved “Master” status in the last 25 years. None have achieved “Grand Master.”

“For the ladies, that’s the holy grail,” she says.

She’s become so popular as a trainer (working mostly with “Babes With Bullets” www.babeswithbullets.com) that she’s on the road four or five months out of the year.

We caught up with Lisa on a typical two-week, multi-state turnaround – the kind of trip where you wake up and can’t remember what town you’re in. She was halfway through shooting the Area 2 in Phoenix on a hurry-up schedule, en route to a “Babes” class in Tucson, Arizona.

I asked her how she keeps up with the workouts while on the road.

“I travel with resistance bands, and can do a pretty good body weight workout in my hotel room if I’ve got a six foot square of open space,” she responded. “I actually end up training in my room more than the exercise area at the hotel.” At her San Antonio stop, she planned on teaching an optional yoga session for the campers, on top of the shooting.

Recoil Master

Weird as it sounds, tiny Lisa made her reputation rocking and rolling with a hard-kicking .45 back in the days when USPSA used .45s – and loaded them to the level of today’s law enforcement .40 S&W loads. She and her husband Eric got involved with USPSA as a husband-and-wife pair in 1987, shooting a Springfield Armory 1911 they bought for \$289 new.

In 2004, Lisa told me “we ended up putting a \$15 mag funnel on it, eventually a trigger job, and that’s all we did to it.”

After 80,000 rounds it was in pretty sad shape – but she dug it out of the safe to place second at USPSA’s first Limited Nationals.

“Hikaru Uesaka was there to take pictures of the gals’ guns. When he saw it he said ‘THAT! You almost won with THAT!’”

Today she shoots an amazing high-cap STI 2011 custom-built for her by Cameron’s Custom. Her Limited gun (an STI Apeiro .40) has the front sight mounted directly to the barrel, and gener-

ates far less recoil than that old .45. The Open gun that she’ll likely take to Worlds is chambered in .38 Super Comp, and wears a sideways-mounted C-More optic. Laying the scope sideways brings the lens down close to the slide, making transitions from iron sights to optics much easier. That gun stays flat in recoil, but the roar it gives off launching a 121-grain Montana Gold IFP at 1400 fps is deafening.

Over the years Lisa has taken the skills learned under the harsh tutelage of that old 1911, blended them with her amazing physical fitness, and translated it all into speed.

“My theory is that especially before I started

trying to put on some muscle weight, I got bounced around by everything I shot, Open or Limited. The Limited gun moves for everybody, I’m just more adapted to it.”

When it comes to training someone on how to keep a hard-kicking pistol under control at speed, she’s got “street cred” a mile long.

Longevity Through Perspective, Relaxation

Burnout affects all of us, and the typical “life span” of a shooter in USPSA (according to Munson) is about six years. So how is she still at the top of the heap, passionately chasing gold for the U.S. three decades later?

Munson hangs up her guns every year, taking a well-planned break from all things shooting.

“After the Area 2, I’ll take two solid months off. I don’t

touch a gun, don’t load a round of ammo, I just step back,” she said. “I really think that’s a key thing for keeping me involved. If I hadn’t done that way-back-when, I’d have burned out a long time ago.”

Looking Back

If USPSA ever puts together a “hall of fame” Lisa Munson will certainly be in it. She’s left her mark on the sport, and vice-versa.

“USPSA shooting has changed my life,” said Munson.

But let’s not start thinking of Lisa in the past tense just yet.

As we wrapped up the interview we talked briefly about her team titles. She looked up and said “It’s been a great ride, I’ve loved every minute of it,” then paused. With a wink she added “...but I’m on a quest to see if I can get another one.”

Lisa goes for a reload. Thanks in part to her small hands, Lisa rigs her pistols with the mag release on the right side. Note how she’s releasing the magazine using her trigger finger.

50 "Big Fifty Reloader"

STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...

BFR Accessories

A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

K72-50050, \$384.95

B. 50 BMG CARBIDE SIZE DIE
 The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

K72-50075, \$869.95

C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

K72-50125, \$76.95

D. 50 BMG PRIMER SEATING DIE
 One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

K72-50200, \$149.95

E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

RCBS Scale Check Weights

Standard Set: 60.5 grains for powder charges.	K72-12297	\$34.95
Deluxe Set: 510.5 grains for bullets, cases and powder.	K72-12458	\$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

TACCOM, LLC Accessories for .22 LR AR-15 Conversions 55

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

K72-19538 \$13.95

The **TACCOM Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is **KEY** for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

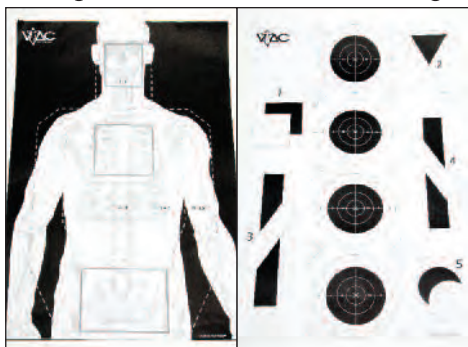

K72-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The **TACCOM Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

K72-19533 \$7.95

Schuster Mfg. Inc. Adjustable M1/M1A Gas Systems

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K72-14760 \$24.95**

Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K72-18630 \$14.95**

C. Bullet Forward Slide Release **K72-18629 19.95**

Lone Wolf Distributors' Match-Grade Barrels for GLOCK Pistols

These replacement barrels are manufactured from the highest grade mill-select 416 stainless forgings. Standard land-and-groove rifling makes these an excellent choice if you wish to shoot lead, plated or jacketed bullets. Can be used in factory ported or stock pistols. Ready to use, pre-fit drop in. No gunsmithing required.

Ultimate Advanced Revolver with Jerry Miculek – The World's Greatest Revolver Shooter
 Jerry Miculek is recognized as the fastest and most accurate revolver shooter in the world. His speed and skills are, in one word...Amazing! They've been verified in hundreds of local and national competitions. In this program, he shares with you some of the techniques and secrets he has mastered over the past 25 years to become the shooter he is today. And, you'll see an incredible display of revolver shooting and reloading. 100 min.
K72-14608 \$19.95

Competition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.
K72-14341 \$19.95

Shooting Tip: Speed Sh

Aimed-In – Several of the drills, such as Drill #1, begin with the gun aimed-in on-target.

Transition – Drill #2 consists of beginning with the gun aimed-in on-target, firing one shot, then transitioning to another target and firing one more shot.

The target array for the IHS drills is three USPSA or IDPA cardboard targets at seven yards, one yard between targets edge-to-edge. The white target center is the author's own modification.

By Duane Thomas

There are certain abilities that might be called core combat handgun shooting skills: firing multiple shots on a single target, transitioning between targets, speedloading, using a Ready Position, drawing from a holster, and multiple target work from the draw. The skill-improvement drills put forth here are the old graduation exercises from the Intensive Handgun Skills speed shooting course at Greg Hamilton's InSights Training Center. Although Greg no longer uses these drills in the IHS course, they have been a frequent part of my own practice sessions for 20 years.

These drills are shot on three cardboard USPSA or IDPA targets. I staple a sheet of typewriter paper over each target center, to extend target life and save on taping. Once a sheet of paper is shot up, simply staple another piece over it versus taping every single bullet hole. Also this makes it very obvious whether you hit or not. If the bullet hole is in the brown, you missed. The targets are set up at seven yards, with one yard between targets edge-to-edge.

DRILL PROCEDURES

You may or may not choose to do these drills from concealment. My own testing years ago convinced me there is very little difference, either in technique or time, between doing a concealed or unconcealed draw. I have gone literally years without practicing a concealed draw and then had no problem doing one when required. If your holster has retention devices,

begin each holstered string with all of them closed. Ammunition will be either your carry load or something generating equivalent recoil. It takes 55 rounds to complete the drills.

You will need an electronic timer. Drills #1-3 only measure shot-to-shot speed so you don't actually need to go right on the timer's buzzer. Drills #4-6 measure total time to complete each run including reaction time, so you must go at the buzzer.

These drills test six skills, five runs each for a total possible score of 30 Passes. There are time limits for each drill. To pass a rep you must have all hits, within the time standard. In order to be considered an overall pass for a drill, you must pass at least three of its five reps. I do not record my time for a particular run if I post a Miss on it, I don't even look at the timer, I simply annotate "Miss" on the score sheet. Ideally, we want to get 30 out of 30 Passes. Failing that, we want all six drills to have at least three of five Passes.

Drill #1: TWO SHOTS ON ONE TARGET

Begin with the gun aimed-in at a target. Fire two shots. Time standard is no more than .50 second between shots.

Drill #2: ONE SHOT ON TWO TARGETS

Begin with the gun aimed-in on target. Fire one shot, transition to another target, fire one shot. The standard is .50 second.

Drill #3: SPEEDLOAD

Begin with the gun aimed-in on target. Fire one

ooting Practice Drills

Speedload – Drill #3 entails firing one shot on-target, doing a speedload and firing one more shot on-target.

Above: Ready – Drill #4 is firing from a Ready Position.

Thomas prefers the technique of beginning with the gun aimed-in at the opponent's pelvic girdle, then raising the gun to the chest.

Left: Draw – Drills #5 and 6 both require a fast draw from the holster.

shot on target, speedload, fire another shot on the same target. Time standard is 3.0 seconds.

Drill #4: READY POSITION

Beginning with this drill, your time for every run includes your reaction time so you must go on the buzzer. Begin with the gun in your preferred Ready Position. At the timer's buzzer fire one shot on-target. Time standard is 1.0 second.

Drill #5: DRAW

Begin with your gun holstered. On the timer's buzzer, draw and fire one shot on one target. Time standard is 2.0 seconds.

Drill #6: DRAW & MULTIPLE TARGETS

Begin with your gun holstered. On the timer's buzzer, draw and hit each of the three targets once apiece. Time standard is 3.0 seconds.

Over the years I've been doing these drills, I had to come up with a way to analyze my overall performance, to refine that down to one number. I take my average times to complete each drill, add them up, and then add to that number the full time standard for each run on which I Missed. In other words, add .50 second to my score for each non-Passed run on Drills #1-2, one second for Drill #4, two seconds for Drill #5, and three seconds for Drills #3 or 6. I like this system because it penalizes the shooter severely for Misses, especially on the longer, more dexterity dependent, complex skills.

I have always thought that if a shooter can run these drills will a cumulative score, includ-

ing time penalties, of 15 seconds, then they've done them pretty darn well. Under 10 seconds equals really well. I have done it in the 6s several times. I have a dream to one day do it under 5.

SLIDING-SCALE STANDARDS

One comment I have heard about these drills is that the time standards put forth above require a fairly advanced skill set to pass, though I personally consider them intermediate. Thus I have developed Basic, Intermediate and Advanced standards for these drills. The obvious answer is for Basic standards to double the time limits, for Advanced to half them.

	Basic	Intermediate	Advanced
Drill #1	1.0 second	.50 second	.25 second
Drill #2	1.0 second	.50 second	.25 second
Drill #3	6.0 seconds	3.0 seconds	1.50 seconds
Drill #4	2.0 seconds	1.0 second	.50 second
Drill #5	4.0 seconds	2.0 seconds	1.0 second
Drill #6	6.0 seconds	3.0 seconds	1.50 seconds

Yes, there are people who, when first building their skill set, could find doing a six second speedload, or a four second draw, a challenge. Using sliding-scale standards allows such folks to begin at a level they can, in all probability, handle. Over time they can work themselves up to the tighter standards. And by pushing for the Advanced standards, I can continue using these drills to improve my own skill level for years to come.

Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

K72-18599 \$14.95

drymate™

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ K72-11313 \$19.95

Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar steel stock and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless **K72-18600 \$49.99**
Blued **K72-18601 \$49.99**

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

*Sand not included.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

K72-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

Comp-Tac's Trojan Horse Long Gun Case

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,

30mm tube and

bright illumination of the reticle are just a

few of the many features of the DMS-1. Bright

red illumination of the reticle adds to the quick-

ness of the sighting system in day and low-light condi-

tions. At one power it works well as a reflex sight and at

longer ranges the four-X magnification gives increased ac-

curacy.

K72-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

K72-11643 \$89.95

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle K72-25374 \$79.99
Scout Scope Mount for SKS Rifle K72-25373 78.99

Tactical Sports 45°-Offset Auxillary Optics Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Auxiliary Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)
45° Offset Optic Mount K72-14472 \$14.99

TACCOM, LLC 90° C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE (Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

The DoubleTap

Above: The DoubleTap Derringer, right side. Inset One: The muzzles of the .45 ACP barrel unit, with optional porting. Inset Two: The barrel unit tipped up, with two 9mm rounds in place.

By J. B. Wood

In two-shot derringers, we have come a long way from the classic Remington of 1866. No, actually, with the DoubleTap, I think we have come all the way, as far as we can go. The maker was originally a small division of a larger high-tech manufacturer. It's now a separate company, but the design of this gun is definitely "space age."

There have been other DA-Only derringers in the past. The neat little .22 by High Standard comes to mind. This one, though, is very different. Here's a mechanical example: The others, in both DA and SA versions, pretty much copied William Elliot's design for alternate firing of the two barrels, a pivoting block inside the single hammer. The DoubleTap uses two separate hammers, a much stronger system.

In external shape, the DoubleTap looks a lot like a small semiauto pistol. When the low-profile latch is moved rearward, the spring-powered barrel unit tips up for loading. At its widest point – the

barrel-latch buttons – the width is only 0.665". In its two serious chamberings, 9mm and .45 auto, nothing can match it for "flatness."

With its aluminum frame and stainless-steel barrel unit, the empty weight is 12 ounces. The other numbers: 5.5" in overall length, height 3.9", and a 3" barrel. Very concealable. At the lower back of the grip, there's a recessed cross-pin, in case you'd like to hang it from a neck-cord or your belt.

Considering its primary self-defense use, the sights are minimal – a low-profile ramped front, and a wide groove in the top of the frame at the rear, square-picture. Where the barrel unit meets the breech face, there is a small opening on both sides, so you can easily see the rims of chambered cartridges. The front of the grip frame and trigger guard are cross-grooved, and the wide checkering on the sides gives a good hold.

In a quick, smooth DA pull of the trigger you won't notice it, but the trigger can be "staged" with a slow pull, if you need to use the hesitation-

ap Derringer

Above: The DoubleTap Derringer, left side. Inset Three: A trap in the butt holds a two-round loading strip. Inset Four: A 9mm test target. 7 yards, two-hand hold. Also shown, a six-round "loading strip."

point at the end for careful aim. In some situations, this might be useful. In any DA-Only handgun, I think this is an advantage.

Shooting the DoubleTap was interesting. For a DA-Only derringer, it was remarkably accurate at the classic seven-yard distance. With the ported .45 barrel unit in place, I put on a padded shooting glove to protect the aging bones of my hand. A 12-ounce gun in this caliber delivers substantial felt-recoil. With a two-hand hold, the two shots stayed in the eight-inch black of the Champion VisiShot target.

I fired exactly two .45 rounds. Then, I pushed out the barrel unit pivot pin, and installed the 9mm unit. With that one, two hands, and "staging" the trigger, the DoubleTap delivered one amazing 1-inch group, both in the 1-ring of the target. For personal defense, you could choose which button you want to hit on the bad guy's coat. As you would expect, felt-recoil with the 9mm is less, but still sharp.

It is rumored that other chamberings may be available, later on. I would like to see it in a .32-caliber version, perhaps the .327 Federal Magnum. This would also allow use of other .32 revolver rounds, including the .32 H&R Magnum. For the recoil-sensitive, this would be good news. You could then get two – a .45 for the "Hell, that ain't much of a kick!" guy, and a .32 for the lady's purse.

A two-shot derringer is not, of course, meant to be a primary carry piece. It's a back-up, and the DoubleTap will serve well in that role. For its dependability and high-tech precision manufacture, the DoubleTap has a reasonable basic price of \$499. Extra barrel units are \$199, and porting adds about \$70. There is also a DoubleTap with a titanium frame, which costs quite a bit more, starting at \$729 for the non-ported version.

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.
