**PERSONAL PROTECTION FOR RESPONSIBLE CITIZENS**

# RUGER® COMPACT HANDGUNS

Ruger offers lightweight, compact handguns for every personal protection need.

## 380 AUTO LCP® CUSTOM

Designed with the shooter in mind, the Ruger® LCP® Custom is affordable, comfortable and perfect for licensed carry for personal protection, or as a backup firearm for law enforcement.

## 9MM LUGER LC9S®

Chambered in 9mm Luger and sized just slightly larger (less than 1" taller and 1" longer) than the LCP®, the LC9S® is compact, powerful and features a short, light, crisp trigger pull for faster shooting and improved accuracy.

## 380 AUTO LC380®

The LC380® provides 7+1 rounds of effective .380 Auto personal protection. Slim and lightweight for easy concealment, the LC380® combines reduced recoil with modern safety features in an easy-to-rack design.

22 LR, 22 WMR,  
38 SPL +P,  
357 MAG,  
9MM LUGER

## LCR®

Now available in five calibers, there is a lightweight, reliable and easy-to-shoot LCR® for every need – from personal protection to low-cost practice at the range.

Join Ruger and help us raise \$4,000,000 for the NRA.

# Dillon's RF 100 Automatic Primer Filler

*Eliminates the need for primer pick-up tubes!*

*Fills the primer tube while you reload!*

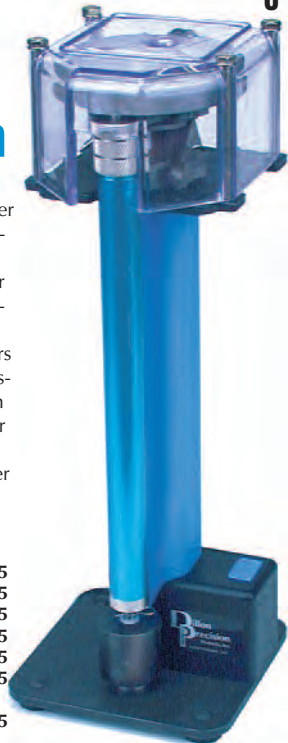

*Clear polycarbonate shield and protective housing*

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

## We READ Our Mail!

Re: "Can I Have a Moment of Silence?" – January 2016 issue! I'm sure glad that I read that article. It lit up a light bulb for me, so I just ordered a second set of electronic hearing protector muffs. Now I'll have an old set of electronic Peltors for the range, plus a new set for my home. I'll be able to protect my hearing if I need to fire either my Glock 22 or the Mossberg 500 against an intruder. A plus will be that I'll be able to hear an intruder without looking for my hearing aids. A suppressor at over 1,000 bucks screwed into the barrel of my Glock doesn't appeal to me or my wallet, it wouldn't fit into my pistol safe, and it would limit me in my choice of firearms in an emergency. According to the story, the suppressor lowers dB about 30 while muffs are about 22 dB. Final cost 33 bucks for the suppressor per dB, 2.5 bucks for the muffs. Electronic hearing protectors hanging on the wall for each person in the house seems like a more practical choice, and much, much cheaper. BTW, hearing aid batteries are cheap! I know.

Wayne Doenges – New Haven, IN

Wayne, to me the obvious question is, "How much did your hearing aids cost?"

While Dr. Dillon's article ["Grandpa Dillon's Saddle Gun" – January 2016 issue] is very interesting, it illustrates something I have advocated for years. As an amateur military historian, I always wonder about the history of the guns I collect. The old, "If only this gun could talk!" And I encourage everyone – every gun owner – that if you have a "family" gun, sit down today and write down everything you know about it. It may not have been used in war, or protected health and home, but it is a part of our history – our heritage. So what if it's an old single-barrel 20 gauge that granddad bought in Pennsylvania before the family moved West. It embodies the memories of Granddad, Dad, You, and hopefully the next generations. Every item on the Antiques Road Show is more valuable if it has "provenance" – a story. So does every gun. Together, they weave the history of your family into the fabric of our Nation's history, and along the way show that these artifacts, these guns, are a normal part of life. I have several guns I carried while employed as a Federal Agent. None were ever fired in defense, but they trace a pattern of evolution of Law Enforcement guns, from the 5-shot .38, to the 6-shot .357 Magnum, finally to the semi-autos. They are already destined to go to a museum, along with some other artifacts from my career – and some facts about where I served.

Seth R. Nadel – sleuth@wildblue.net

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# 10 The “Glock 34 Killer”

By Robin Taylor, [www.taylorfreelance.com](http://www.taylorfreelance.com)

Long, lean, and dark, the 5" PPQ M2 has an understated lethality about it. Like some kind of metallic shark, it blends in with all the other "Glock wannabes" – until you shoot it. At that point, the shark shows its teeth.

Gunwriter Patrick Kelley first described the 5" PPQ as Walther's "Glock 34 killer." It's too short in the frame to totally dethrone the king of plastic pistols, but unless you have wide hands, the PPQ deserves a second look. It offers a much smoother, cleaner trigger release and a more-robust interchangeable grip system, along with excellent accuracy potential. For its part, the Glock has a lower bore axis, a grip system that works for big hands, and you can find parts anywhere.

Friends of mine have shied away from the PPQ due its lack of aftermarket support, but that's changing in 2016, with various sorts of options, including extended basepads, and even a magwell from multiple sources.

The real "edge" the PPQ offers is its trigger. Every one I've picked up has been remarkably smooth, with a positive single-click reset. After

about 150 rounds my 5" M2 settled to where it broke ultra-smoothly at a measured 3.5 pounds. Compare that to the relatively rough "3.5 pound trigger" of the Glock 34 (which actually breaks at 5 pounds plus), and the PPQ starts look appealing. Better yet, the PPQ drops into holsters meant for the S&W M&P, which means ready-to-go gear is as

close as your corner sporting goods store. For mag pouches, look for ones that work with mags in the SIG 226 class – the PPQ's are noticeably narrower than the M&P.

"The PPQ has really taken off lately," says Cody Osborn, a Walther dealer support rep. He's been actively bringing the PPQ out to IDPA and USPSA matches, getting shooters familiar with their top-of-the-line model. "Once they feel that trigger, it's a lot better than trying to spend \$200 to improve another system."

From what I see, the 5" PPQ could have been purpose-built to conquer IDPA's "Stock Service Pistol" and USPSA's "Production" divisions. It's got the longer sight radius, adjustable sights, and rough-and-tumble reliability cues that are the hallmark of good USPSA/IDPA guns. Those aftermarket options will help the PPQ

**“It offers a much smoother, cleaner trigger release and a more-robust interchangeable grip system, along with excellent accuracy potential.”**

# Walther's 5" PPQ M2<sup>11</sup>

in the "racier" divisions too – especially magwells that extend the effective length of the frame.

Walther's trigger stands apart because of its rotating sear – which works like a miniature trap door. Most striker-fired pistols operate by pulling the sear directly off the striker. Small angled surfaces drag the sear across the face of the striker until the striker pops free. On the PPQ, the striker is held back by a rotating sear, which in turn is held up by what I call the "sear lever" (which connects to the trigger). Picture that big lever that drops the floor of a gallows in Western movies. The sear lever gives the "hangman" tremendous leverage. You feel very little "drag" as it moves – just a steady, even approach to an inevitably smooth release.

Some Olympic air pistols employ a similar concept. The Crossman Skanaker and Feinwerk-bau 65 I shot in college used a uniform smooth stroke like this – rather than the "breaking glass rod" idea common to 1911s. Slicked-up Glcks operate that way too, but the PPQ does it without having to spend hours installing and polishing new springs or parts.

I had the chance to share the PPQ with some expert shots at the range, including Team Gotta captain Jordan Castro – lead athlete for the fastest Scholastic Pistol Program team in the United States in 2015. He and his high school teammates had just set the national centerfire speed record with a mix of G34s and M&P Pros (nudging out the US Military Academy at West Point).

"I like how responsive the trigger is," says Castro. "It's positive on the reset."

We all agreed the higher bore axis and shorter frame tends to make the PPQ feel "snappier" in recoil than the Glock 34, but it compares favorably to guns with similar bore heights, like the SIG 320 or HK P30.

Practical accuracy seems to be the PPQ's strong suit. Once I had the zero, I started hammering tight little groups with Atlanta Arms and

Ammo practice ammunition. On a lark, I taped a business card to the target 15 yards out – then shot five rounds at it. All five impacted inside the business card. Another five rounds shredded the card. I'd be hard-pressed to do as well with a match .22, much less an out-of-the box striker-fired 9mm.

## GRANDSON OF THE P99

Talking with Cody Osborn and Walther exec Everett Deger, I learned that the PPQ descends directly from the S&W/Walther P99. I've shot a handful of original PPQ M1s, and the paddle-style mag releases and compact format they inherited from the P99 were a little too European for my taste. Apparently I wasn't alone, because the controls on the PPQ M2s (all of them) have morphed into something more "American." The paddles are gone, replaced by a reversible mag release button, adjustable sights, and forward cocking serrations. The steel mag release engages the mag tube at a different location (M1 and M2 mags aren't compatible); so order carefully when you're buying spares.

The M2's drift toward 1911-style controls was an intentional gambit to better suit the American shooter, and speaking for my small slice of the market, it worked!

"Walther was looking to get into the competition market," says Osborn. "They wanted something that stood out a little bit."

Walther's assault on the competition market has begun. They've already made agreements with multiple top-level shooters in IDPA, and just signed a 3-Gunner as well. That focus on performance bodes well for customers, as so many of the features on today's defensive handguns spring directly from practical competition. Whether or not you compete, keep an eye out for the PPQ. With the rise of aftermarket support, serious shooters of all stripes have a new corporate player in the game, pushing a new, viable option – the 5" PPQ M2.

Walther PPQ M1 (left) and M2 mags aren't compatible, so order carefully when you're buying spares.

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount L86-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

L86-16627, \$82.95

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

L86-20302, \$25.95

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

L86-20251, \$88.95

### OPTIONAL MAGNUM RIFLE POWDER BAR

L86-21353, \$29.95

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

L86-22120, \$30.95

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: L86-16629, \$19.95**

**Oversize Die: L86-16626, \$19.95**

**Plastic Funnel: L86-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

**L86-20029, \$23.95**

**RL 450 Powder Die:**

**L86-20308, \$21.95**

# RL 550B

**RL 550B DVD**  
**Instruction Manual**  
 L86-19483 \$19.95

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial Period!**

*All for ONLY...*  
**\$439<sup>95\*</sup>**

# RL 550B ACCESSORIES

## A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**L86-RL550B CON-**

**VERSION \$45.95** (Exotic calibers, \$55.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **L86-20782, \$77.95 ea.**  
Magnum Rifle Powder Bar **L86-21353, \$29.95 each**  
X-Small Powder Bar **L86-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **L86-22058, \$104.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**L86-20064, \$11.35 each**

**Three or more, \$10.25 ea.**

**X-Large Powder Die, L86-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**L86-13909, \$22.95 each**

**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**L86-22055, \$20.95 each**

**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

**L86-10842, \$7.95 each**

**Two or more, \$7.10 ea.**

## H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Square-Deal-Only Wrench	<b>L86-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	<b>L86-22051</b>	<b>\$48.95</b>
XL650-only	<b>L86-22052</b>	<b>45.95</b>
Square Deal "B"	<b>L86-22223</b>	<b>64.95</b>

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	<b>L86-22214</b>	<b>\$41.95</b>
RL 1050 Tray Kit	<b>L86-22215</b>	<b>41.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System  
**L86-97126 \$145.95**

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

**L86-16306 \$41.95**

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	<b>L86-17950</b>	<b>\$45.95</b>
Plastic Roller	<b>L86-22183</b>	<b>40.95</b>

**Quick-Change Cover** for use with powder measure. **L86-11143 \$14.95**

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

### RL 450 Upgrade Components

## Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge and Bullet Comparator

(Caliper not included)

### Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy.

Straight L86-14622 \$38.95

Curved (use for auto, lever and pump rifles) L86-14862 \$39.95

Modified Case (required)

\$6.99 each

.223 Rem. L86-14627

# Dillon's Case Preparation Equipment

**CV-2001**  
**L86-20493**  
**\$188.95**

**CV-750 L86-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator L86-20675 \$75.95**

**CM-500 Case/Media Separator L86-21045 \$47.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 L86-22047 \$213.95**

**Euro CV-750 L86-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle. **L86-13804** **\$8.95**  
Case (20 pc.) **L86-20255** **\$135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle **L86-13733** **\$8.95**  
Case (20 pc.) **L86-20256** **\$135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **L86-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **L86-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **L86-13496** **\$15.95**

## Super 1050/RL1050 Short Trim Die Toolhead

**L86-62219**  
**\$224.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the Blue 1050 toolhead stand – Part Number L86-62200, \$49.95 – is not included.)

**Rifle** – It's the finest rifle enthusiast's journal available! Readers will benefit from its in-depth, technical emphasis on getting maximum performance, accuracy and reliability from their guns and ammunition.

**Handloader** – This is the original journal of ammunition reloading for those who reload centerfire and shot-shell ammunition or who cast bullets. It contains detailed information on loads for rifles, pistols and shotguns; along with ammunition performance and evaluations.

# Dillon's New Rapid Trim 1500 Case Trimmer <sup>23</sup>

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **L86-62164** is **\$329.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **L86-13141**, are **\$19.95** each. Upper lock rings, **L86-13559**, are **\$4.99** each.

# MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

**L86-18843**

# Dillon's NEW Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access,

has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

\$59<sup>95</sup>  
L86-17001

## Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

4-3/4" SA Colts/clones **L86-11560**  
4-5/8" Ruger Blackhawk **L86-15765**  
Ruger LCR **L86-29030**  
2" J-Frame S&W Rev. **L86-15764**

\$79<sup>95</sup>

## "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

## UM Tactical Universal Sight Mount and Holster System

UM Tactical has created a universal sight mount that will fit all pistols with a 1913 Picatinny rail. Although many sight mounts exist; what makes the unit produced by UM Tactical unique, is that it will mount and dismount from your firearm in under 30 seconds with no tools or gunsmithing. Once set up with your favorite scope or red dot sight, the mount and optic can be taken on and off your firearm and still hold the zero. This high quality mount is constructed from CNC machined aluminum and is finished in MIL-SPEC Type III anodizing.

UM Tactical's UMH3 Universal Holster attaches to the UM3 sight mount and not your handgun. This unique design is hand made and is constructed of thermoformed plastic (Boltaron).

UM Tactical Sight Mount L86-43271 \$99.95  
UM Tactical RH Holster L86-43272 \$64.95  
UM Tactical LH Holster L86-43273 \$64.95

# BLADE-TECH™

## “Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

### Spare Decapping Pins

Package of 10	<b>L86-21528</b>	<b>\$5.75</b>
---------------	------------------	---------------

# Dillon's Rifle Die Sets 35

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process.

Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	<b>L86-10839</b>	<b>\$67.95</b>

# The Colt Model

By J. B. Wood

One of the best designs of John Moses Browning, the Colt Model 1903 Pocket Hammerless was first offered only in .32 Auto chambering. Five years later, with a slight change in the barrel and slide, Colt introduced a .380 version, and altered the .32 to match it. Both calibers were made until the World War II era.

As many readers will know, a certain number will be found with a “U.S. Property” marking, as it saw a long service as an issue sidearm for high-ranking officers. Those are, of course, treasured by collectors. So are the “ordinary” ones, both for collecting and regular use. As a result, average prices have reached a substantial level.

And now, the Model 1903/08 is back, thanks to MGE Wholesale, U.S. Armament Corporation, and the approval of Colt. In .32 Auto chambering, it is available in blue or classic military-style “Parkerized” finish. It even has the “U.S. Property” stamp-

ing on the right side of the frame. No worry about faking – the serial numbers would be wrong.

Obviously, the original production equipment at Colt was long gone, so I suspect that U.S. Armament simply took a nice example of the 1903/08

**“Serious collectors would never think of actually shooting this elegant reproduction. I, of course, am not in that category.”**

and “reverse-engineered” it. They did a beautiful job. But then, they have some experience in this sort of thing: They are also the makers of that marvelous replica of the Gatling Gun.

My sample of the MGE pistol is the blued version, and the finish is superb. The nicely-checkered walnut grips have the gold-colored Colt medallions. The slide markings are exactly the same as those on an original gun,

including the 1897 and 1903 patent dates and the rampant colt logo at left rear.

On the right side of the slide, below the “Colt Automatic” marking, is the original “Calibre 32 Rimless Smokeless.” This has always amused me in several ways: The French spelling of “caliber,”

# 1903 Returns

no dot before "32", and the fact that the .32 Auto cartridge is, in fact, not "rimless" – it's a semi-rim. Main thing, though, it's all very authentic.

If you are familiar with the Pocket Model, you'll find that everything works the same. When the internal hammer is cocked by cycling the slide, the grip safety pops out to block the sear. The manual safety is also a sear-block, up for safe, down to fire. Sights are also the same, rounded front and V-notch dovetail-mounted rear.

The magazine holds eight rounds, and is marked on the bottom, "Cal.

32", and "Colt", like the originals. Included with the pistol are two excellent document reprints. One is a parts procurement guide from the U.S. Bureau of Ordnance and the other is a copy of the original instruction manual. Unlike those of today, it is not filled with lawyer-inserted warnings.

Serious collectors would never think of actually shooting this elegant reproduction. I, of course, am not in that category, so I took it out to the Big Tree Area. I did avoid subjecting it to my favorite CorBon DPX load, and used regular FMJ rounds from Magtech. At seven yards, with a two-hand hold, it kept all shots in the 8-inch black of a Champion VisiShot target.

With Browning's design and U.S. Armament's precise manufacturing, it worked perfectly. I don't know exact production figures for each finish variation, but it's going to be a "limited" item.

Included with the pistol is a reproduction of the original Colt instruction manual.

Suggested retail is \$1495.

# CLASSIC FIREARMS: The Colt Model 1877

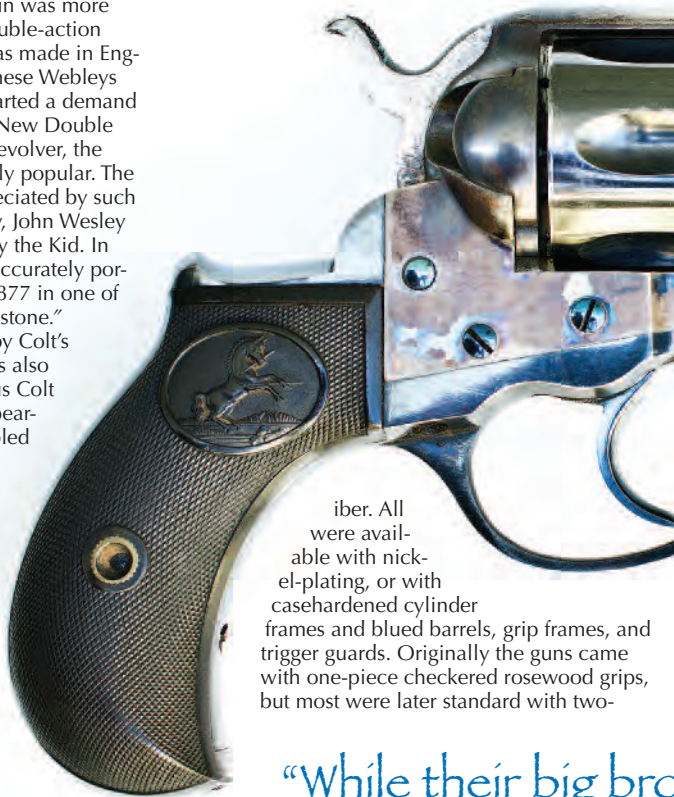

By John Marshall

The double-action (or self-cocking) revolver has been around for quite a while, with its roots going back to the 19th Century. Revolvers of this type can be instantly fired simply by pulling the trigger. We take revolvers like this for granted today, but they were virtually unknown until the second half of the 1800s. The very first successful cartridge-firing double-action revolver in the U.S. was made by Colt's Patent Firearms Manufacturing Company and offered to the public for \$15.00 in January of 1877. It was known, logically enough, as the Colt Model 1877, and was produced as late as 1909. By actual count, 166,849 were made. This gun was more than probably a response to the double-action Webley Bulldog revolver, which was made in England beginning in 1872. Many of these Webleys were imported into the U.S. and started a demand that Colt's envied. First named the New Double Action Self Cocking Central Shot Revolver, the iconic Model 1877 became instantly popular. The double-action advantage was appreciated by such western characters as Doc Holliday, John Wesley Hardin, Sheriff Pat Garrett, and Billy the Kid. In fact, you can see actor Val Kilmer accurately portray Doc Holliday using a Model 1877 in one of my favorite western movies, "Tombstone."

The Model 1877 was invented by Colt's employee William Mason, who was also involved in the design of the famous Colt Single Action Army revolver. In appearance, these guns somewhat resembled a smaller Single Action Army, but with a larger smooth curved trigger and a more open trigger guard. Another distinguishing feature was the distinctive "bird's head" grip shape that has been widely copied in recent years on modern replica single actions that never originally used that style of grip. Aside from their double action capability, these double-action revolvers were operated quite similarly to their single-action Model 1873 forebears. They were loaded through a gate on the right side of the frame when the hammer was brought to half cock. They emulated the M1873 by having 3 notches to position the hammer – safety, half cock, and full cock. They could also be thumb-cocked in order to squeeze off a more precise single-action shot. As with a single-action gun, it was prudent to load them with only five rounds rather than six, with the hammer resting on an empty chamber. With the hammer fully down, the firing pin would otherwise rest on a live round, an invitation to disaster. Unlike the Single Action Army, the locking notches on the

cylinder were at the rear of the cylinder rather than around its periphery.

The Model 1877 was made in three calibers. These were .32 Colt, .38 Long or Short, and .41 Colt. Nicknames were first assigned to guns in each of these calibers by Benjamin Kittredge, a major distributor for Colt, although the manufacturer never referred to them in this manner. The .32s (somewhat rare) were "Rainmakers," the .38s were "Lightnings," and the .41s were "Thunderers." The nicknames stuck, and modern collectors often use them to refer to the specific guns instead of by cal-

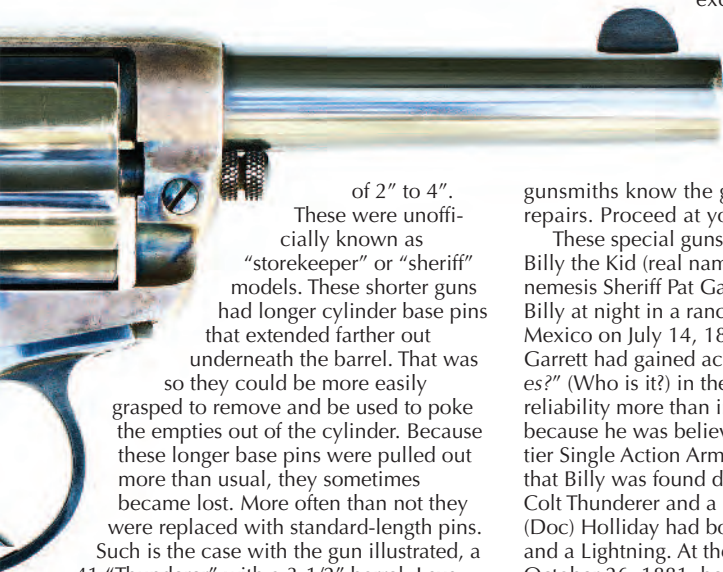

iber. All were available with nickel-plating, or with casehardened cylinder frames and blued barrels, grip frames, and trigger guards. Originally the guns came with one-piece checkered rosewood grips, but most were later standard with two-

“While their big brother had an incredible reputation, such was not the case with Colt's first foray into double-action. It was not exact

# Model 1877 Double-Action Revolvers

piece hard rubber (gutta-percha) checkered grips with the rampant colt logo in an oval at the top. One-piece hardened rubber grips are found very rarely. Ivory and other special-order grips were also available.

There were two styles of barrels – those with ejector housings and rods, and those without them. The ejector-equipped barrels ranged in length from 4-1/2" to 7-1/2", with 7" and 7-1/2" on special order only. Longer barrel lengths were also available on special order. Some very rare guns had target sights. The ejectorless guns had barrel lengths

of 2" to 4".

These were unofficially known as "storekeeper" or "sheriff" models. These shorter guns had longer cylinder base pins that extended farther out underneath the barrel. That was so they could be more easily grasped to remove and be used to poke the empties out of the cylinder. Because these longer base pins were pulled out more than usual, they sometimes became lost. More often than not they were replaced with standard-length pins. Such is the case with the gun illustrated, a

.41 "Thunderer" with a 3-1/2" barrel. I suspect an earlier user was content to eject the empties with a pen or pencil, as this was commonly done. This gun is currently owned by [AZFirearms.com](http://AZFirearms.com) in Avondale, Arizona.

But all was not roses with these double-action guns. While their big brother single actions

other single actions  
reputation for reliability,  
case with the M1877s.  
double-action lockwork  
ly masterful. "

an incredible reputation for reliability, such was not the case with the M1877s. Colt's first foray into double-action lockwork was not exactly masterful. The mechanics are delicate and intricate, quite prone to breakage with extended or careless use. Failure can occur through operation in either actual firing or dry firing. Because of this shortcoming, these guns have unfortunately earned a couple of derogatory sobriquets, either "Gunsmith Special" or "Gunsmith's Nightmare." In view of this, it's suggested that still-working specimens not be subjected to actual firing or

excessive manipulation. Spare parts are hard to come by, and most gunsmiths will tell you that they are not very interested in trying to repair an M1877. Reproduction parts do exist, and some (very few)

gunsmiths know the gun well enough to attempt repairs. Proceed at your own risk.

These special guns are steeped in history. Both Billy the Kid (real name Henry McCarty) and his nemesis Sheriff Pat Garrett owned one. Garrett shot Billy at night in a ranch house in Fort Sumner, New Mexico on July 14, 1881. Entering the room where Garrett had gained access, Billy cried out "*Quien es?*" (Who is it?) in the dark. Evidently Pat valued reliability more than innovation at the time, because he was believed to have used a Colt Frontier Single Action Army in this instance. Word was that Billy was found dead on the floor with both a Colt Thunderer and a knife beside him. John Henry (Doc) Holliday had both a nickel-plated Thunderer and a Lightning. At the OK Corral gunfight on October 26, 1881, he put his Thunderer into action, firing several times. Finally fatally blasting Frank McLaury with a borrowed shotgun, Holliday himself was wounded in the fracas. Prolific killer and lawyer John Wesley Hardin was known to have had two M1877s. He had one on him while playing dice in El Paso's Acme saloon on August 19, 1895. Reportedly spotting antagonist John Selman storming through the batwing doors behind him in a mirror, he went for the two-inch-barreled Lightning in his waistband. This proved futile, as Selman swiftly shot him in the head, instantly killing him. More shots to the chest and arm followed as he lay on the floor. Subsequent to his arrest, a hung jury mistrial enabled Selman to go free on bond. The self-defense issue had been unresolvable. Before a new trial could take place, Selman himself was killed in an altercation with a U.S. Marshal.

The Rainmakers, Lightnings and Thunderers were indeed very fast and handy guns. They certainly gave an edge to those on both sides of the law who carried them. They're true classics.

## 46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

L86-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

# GOOD NEWS FOR RALPHIE! <sup>47</sup>

## Smart Shot BBs

Reviewed by Peter Caroline

Most of us have probably watched "A Christmas Story" on TV at least half a dozen times, and we all understand the horrific danger posed by BB gun ownership. As one

of the fortunate few who did not lose an eye to the perils of BB gun marksmanship, I will still readily admit that steel BBs will indeed ricochet off metal or any other hard surfaces. Many of us, including yours truly, have learned this lesson by personal experience. It's part of growing up or, at least in my case, growing older.

Several weeks ago, I received a press release announcing the introduction of a new line of copper plated lead BBs that claim to be more resistant to ricochets than the steel BBs that have been the standard for nearly a century. Air Venturi, a Cleveland, Ohio importer of international airgun brands, is promoting their new

Smart Shot BBs, which feature a double coating of copper plating over heavyweight lead shot. Their claimed benefit is, when the BB hits a steel object, it will flatten out and drop to the ground rather than bouncing back and menacing the shooter and other vulnerable objects.

This is all well and good, but is it true? I had to find out, so I sent for a couple of 500-round cans. My two test guns were a Daisy Model 25 Centennial Pump Gun and a Gletcher M712 CO2 pistol, a select-fire .177 caliber replica of the legendary Mauser *Maschinenpistole*. Average velocity of both guns runs in the 360-380 f.p.s. range. I

wanted a shooting area in which spent BBs would be relatively easy to spot. My back patio with its smooth concrete surface seemed ideal, so I set up a 14" diameter 1/4" thick steel disk on a 40"

length of rebar about 24 ft. away from my firing point. The plate was angled slightly downward, so that ricochets wouldn't likely be heading straight back at me. And yes, I was wearing protective goggles!

I fired 10 standard steel BBs from both the Daisy pump gun and the Gletcher pistol. Then I fired 10 of the new Smart Shot copper plated lead BBs from both guns. The steel BBs (those I could find) ended up behind me. The Smart Shot

BBs lived up to their advertising. Most were lying at the base of the target disk, and were flattened to a hemispherical shape. None were any further than 4 ft. from the target.

The new Smart Shot

BBs have a lot going for them. They're exactly the same diameter as conventional steel BBs; The double copper plating eliminates any questions about handling lead; they hit harder because they're heavier than steel BBs; and they're far less likely to ricochet any significant distance after hitting a hard object. At about ten bucks for a 500-round can, they're a lot less expensive than .22 LR (and much easier to find).

# THE TACTICAL TAILOR OPERATOR'S CAP<sup>49</sup>

By Duane Thomas

This article came about because **Blue Press** editor Mark Pixler mentioned to me over the phone, from him in sunny Phoenix, Arizona to me in cloudy Tacoma, Washington, "the coolest baseball cap I've ever seen, it's made by a company called Tactical Tailor." My reply was, "Yeah, I'm familiar with Tactical Tailor. They're out of Lakewood, a suburb of Tacoma. I lived in Lakewood for 20 years, and even today I'm only about a 10-minute drive away. I'm familiar with their building, I know right where it is, I've driven past it many times, would you like me to go get some samples and write up the Tactical Tailor cap?" And so it was done.

The item in question is called by Tactical Tailor their Operator's Cap. It definitely has a military vibe to it. Made from 100% cotton, it's pretty darn heavily constructed. The front has sewn in place a 2" x 3" Velcro panel intended to accept the "morale patches" many military units now allow personnel to add to their gear. On top, where the six triangular pieces of cloth, of which the cap is made, meet, in the place you'd normally find a rivet, instead there is a 1" square, sewn-in fuzzy Velcro tab, sized and shaped to take an IR patch. If you do not, in fact, happen to be a military member who needs to be easily visible to allies from above, and have no use for either an IR patch or a piece of fuzzy Velcro on top of your head, I've seen people just cut off that little tab. In any event, it is nice to not have a rivet there, which, as those of us used to wearing shooting earmuffs already know, gets in the way.

The Operator's Cap is available in multiple colors/patterns, including Black, Nomad, Typhon (my personal favorite), MultiCam, Olive Drab, Tan and Wolf Grey. Size-wise there is Small aka Youth (available in MultiCam only), Regular, which can be adjusted from hat size 7 to 7-5/8, and X Large, which goes 7-3/4 to 8. The Operator's Cap adjusts in back via a strap consisting of a piece of heavy duty webbing with an adjustable slip lock buckle. A bit of overkill, frankly, but you certainly can't accuse Tactical Tailor of stinting in the area of strength re the cap's adjustment system.

An interesting option is what Tactical Tailor calls the Bad Things Hat. Based on a hat famously photographed being worn by England's Prince Harry, after it was given to him by an American SF trooper during Harry's time serving in Afghanistan, it fea-

tures an embroidered American flag on the front, and on the back, above the adjustment strap, are the words WE DO BAD THINGS TO BAD PEOPLE. Apparently those photos of Prince Harry caused quite a stir when they hit Jolly Old England, their media just came unglued over seeing their prince wearing a cap emblazoned with the American flag. And that saying on the back...barbaric! Apparently matters between the civilized world and radicals whose idea of religious debate is beheading anyone

who disagrees with them, who think it's a great idea to stone to death any woman who gets raped, and who strap bombs to their children before sending them out to blow up infidels could all be resolved peaceably and reasonably if we just invited them over for a spot of tea.

The Bad Things Hat does not have a Small/Youth version; it's available in Black, Nomad, Typhon, MultiCam, Olive Drab and Tan only (no Wolf Grey); and not all colors are available in all sizes. You can call toll free 866-984-7854 or email [orders@tacticaltailor.com](mailto:orders@tacticaltailor.com) with questions as to availability. The Operator's Cap sells for \$14.95, the Bad Things Hat goes \$22.00. Plus the

ever-popular shipping & handling fees, I'm sure, should you not happen to live in Lakewood/Tacoma, Washington. Their website is [tacticaltailor.com](http://tacticaltailor.com).

One of the cooler things about Tactical Tailor is that all their products are not only made in America, they are also deliberately built solely from materials made in the good ol' US of A. No outsourcing of American jobs to other countries, or purchasing of cheap foreign materials, here!

As much as possible, Tactical Tailor has always tried to hire workers who are ex-military, retired military, or military spouses because their founder, Logan D. Coffey, an ex-scout sniper who tragically died in a car crash in 2008, was well aware of the financial hardships often facing military members and their families. Logan's personal motto was, "Do what's right, because it's right." Just thought you'd like to know the philosophy from whence your Operator's Cap and/or Bad Things Hat came, when you order it.

Duane's website is [Self-Defense-Handguns.com](http://Self-Defense-Handguns.com) 

# 50 "Big Fifty Reloader"

## STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...  
**\$1049<sup>95</sup>**

**L86-50000**

**L86-50204 \$149.95**  
*(Dies NOT included)*

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**L86-50050, \$399.95**

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**L86-50075, \$869.95**

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

**L86-50125, \$76.95**

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**L86-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

**L86-50001, \$299.95**

### E. (1) PRIMING CONVERSION

Converts Swager to Priming System.

**L86-50003, \$76.95**

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

**L86-50002, \$299.95**

### F. (1) SWAGER CONVERSION

Converts Priming System to Swager.

**L86-50004, \$76.95**

**EXTRA "BFR" TOOLHEADS L86-19831, \$179.95**

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

Deluxe Set: 510.5 grains for bullets, cases and powder.

**L86-12458 \$49.95**

## Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	<b>L86-14067</b>	<b>\$1.35</b>
5-Pack of Die Lock Rings	<b>L86-10669</b>	<b>4.15</b>
1" Dillon Bench Wrench	<b>L86-10842</b>	<b>7.95</b>
(Buy two or more 1" Bench Wrenches for \$7.10 each)		
Wrench/Lock Ring 5-Pack	<b>L86-10668</b>	<b>9.95</b>

## Comtech's STINGER

### THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

L86-19495	\$9.95
-----------	--------

Take out your frustrations, and build your grip strength at the same time! Just think about...oh, socialized medicine, tax increases, high-capacity magazine bans, etc.

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).  
 ZFH1500 AR15 Flashlight Mount **L86-12020 \$29.95**  
 ZSM Tactical Shotgun Mount **L86-18050 39.95**  
 ZRX Tactical Flashlight Mount **L86-15487 35.00**

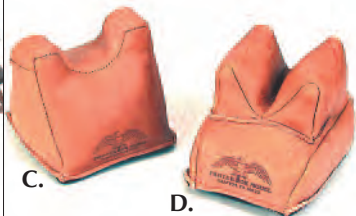

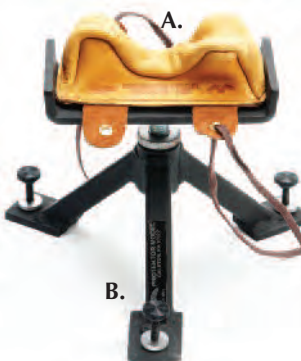

# PROTEKTOR MODEL

## The Original Leather Sandbag\* Rifle Rests

All Protektor Model leather bags are made with the best top grain cowhide available. The welded steel rest is strong enough to stand on and won't break if dropped (Owl Ear Front Bag sold separately).

\*Sand not included.

## Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.  
 Dimensions: 66" x 27.75"

**L86-18146 \$65.00**

## MILDOT MASTER

Become a master at using a Mildot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

Mildot Master® **L86-14762 \$29.95**

## TARGET SPORTS® TACTICAL

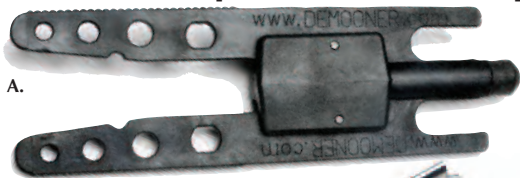

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

**L86-15384 \$24.95**

The ERGO Grip Delta Grip™ is the first truly ergonomic grip for J Frame revolvers. Designed for the most important part of the gun, the shooter, the Delta Grip was engineered to fit the natural point of aim and mechanics of the human hand, wrist and arm. The result is a grip with a superior natural point of aim, comfort and control. Fits round butt J-Frames. Will not fit on Smith and Wesson Bodyguard 38 Model (sku 103037 and 103038).

**L86-19684 \$19.95**

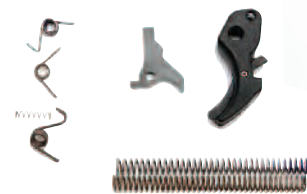

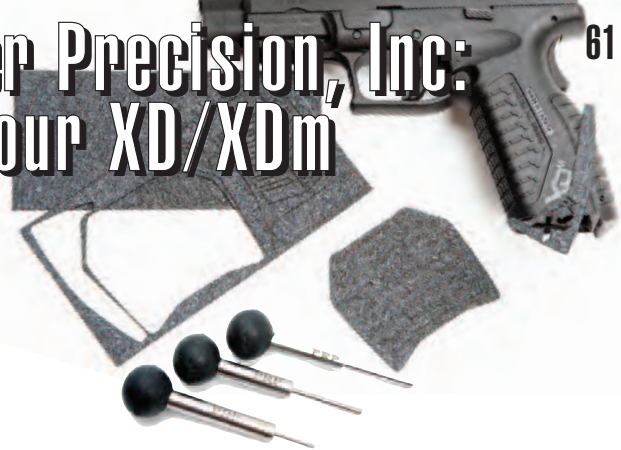

## DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

**L86-19371 \$29.99**

# 62 The Beginning of the .410 Pistol

## THE THOMPSON/CENTER 45/410

Above: An early version of the Thompson/Center Contender, with an octagonal barrel chambered in .22 LR. Below, examples of T/C 45/410 barrels with external and internal chokes. Neither barrel is factory marked 45/410.

By Paul L. Schimel PE

Have you ever shot a .410 shotshell out of a handgun? Were it not for Warren Center's invention and the devotion of his staff, there would be no .410 handguns today.

In the early 1960s, a decade or so before my time, Warren Center had an idea. His idea was that of a single-shot hunting pistol featuring a frame type platform, a break-open action, and interchangeable barrels. He approached some leading firearms manufacturers of the time with the idea, including Colt, Smith & Wesson and a few others. These companies had absolutely no interest in his idea. So he did what he felt was necessary. He began looking outside the firearms industry. He reached out to Ken Thompson at the K.W. Thompson Tool Works. I don't know how the relationship was courted or what the incubation period was, but in a short time, the two teamed up. They pulled together a wood shop to make the forearms and the pistol grips. They machined all of the necessary parts at Ken's "K.W. Thompson Tool Works" and the Contender was born of the Thompson/Center alliance.

In 1968 or so, TC offered a .45 Colt barrel with the chamber augmented (hogged out) to accept a 3" magnum .410 shotshell. The first barrels were octagonal, with an external removable choke. The barrels were, of course, rifled. The concept was that

the choke would stay on for the .410 loads. When switched to .45 Colt cartridges with solid bullets, the choke would be removed. This was controversial. In years prior the ATF had outlawed the H & R Handy Gun as being a "sawed-off shotgun." The bore was smooth, the barrel was under 18" long and there was a pistol grip on the handy gun. In all respects the Handy Gun fit the description of a "sawed-off shotgun" and was ruled as such.

The 45/410 legal debacle started at the product's introduction, that of a TC Contender, with a pistol grip and a 10" rifled barrel that shot either .410 or .45 Colt. The ATF got wind of this and questioned it. This pistol was not restricted under NFA or as amended under the Gun Control Act of 1968. These things essentially define a shotgun as having a smooth bore and a long barrel and being fired from the shoulder. The TC 45/410 barrel was neither designed to be fired from the shoulder or of smooth bore. It was also not in the "Any Other Weapon" category, which specifically excludes a pistol or revolver with a rifled barrel. According to the legal criteria, the TC contender with a 45/410 barrel was not an NFA firearm. It was not a sawed-off shotgun, it was not an "any other weapon," it was simply a handgun that happened to also shoot a shotgun shell.

There was an internal memo circulated within the ATF in 1968 or 1969 that confirms this stance

in full. The director of the ATF at the time agreed with this conclusion in the memo.

As with all things involving the government, it's never that simple. In 1969 ATF agents visited the TC factory. They told management that the TC Contender with the 45/410 barrel was in fact an NFA article and ordered that production be stopped immediately. The factory had no choice but to comply. People were fired, production lines halted. Sales took a large hit. There is suspicion that the ATF agents knew full well of the internal memo stating that the 45/410 barrel was not an illegal article, but large, empowered groups often exert their power regardless.

And this is where the fight started. By this time, the TC Contender had gained some popularity. The quality was exceptional. The trigger was a marksman's dream. Everything was hand fitted, beautifully blued and simply gorgeous. The proprietors and founders didn't want to let it die. They didn't want to give up. They knew they had something worth fighting for.

By this point TC had some stand-up employees, one of whom was board member and corporate counsel Ed Bartlett; another was master gun designer Ken French. Both petitioned the ATF endlessly to restart production of their barrel that had been deemed legal.

While the legal battle was going on, the 45/410 barrel was not in production. However if one purchased a .45 Colt barrel, and contacted their distributor, the barrel could be sent back to the factory, hogged out for 3" magnum .410, the removable choke added and returned to the customer.

TC also introduced "Hot Shot" barrels in .357 and .44 Magnum to try to maintain the following and the market. These barrels also had removable chokes. They were designed for the respective rounds that were loaded with the plastic capsules full of birdshot. I commonly refer to these as "snake loads" and I've heard them called "rat shot" as well. They are often offered by CCI. The choke would restrict the capsule a little and offer a better-controlled pattern.

In 1986, Stephen Halbrook wrote a memo to ATF director Steve Higgins at the request of VP and then senior TC counsel Ed Bartlett. The memo referenced the prior work and conclusions; it also cited the internal memo at the ATF in 1969 that stated that the 45/410 was NOT an NFA article.

The response was finally clear. The 45/410 barrel was officially recognized as being a legal barrel. Production of the 45/410 was resumed in 1986, 17 years after it had been shut down because it was "different."

To understand this, we have to give pause and rationalize. What gun company today would endure a 17-year legal battle? What cadre of shareholders would fund this? What leadership would support such a thing? All answers are in the pejorative. Any battle that long requires both the capital and the devotion and enough vision to figure out what to do win or lose. Let's face it, our modern world is viewed by big data, Wall

Street and directors on a quarterly basis. You have 90 days to do, risk, sow and reap. After that, somebody pulls the plug. So if you approached the "modern" board of directors at a gun company with a potential 17-year legal battle, you'd be abruptly stopped at a minimum. Times being what they are, you'd probably be the subject of a couple corporate retreats, a black list, a voodoo ritual and maybe an exorcism or two.

The number of .45 Colt barrels that were hogged out in the interim remains unknown, but they are legal as well. The stamp on the side of the barrel tells the tale. If you have a barrel marked only ".45 Colt" and it has a 3" chamber and a removable choke, you have an interim barrel.

As a single-shot pistol aficionado, a Contender collector, a benchrest shooter and an avid reloader, this little bit of history is near and dear to me. When I shoot at public ranges, I tap out a submoa group with a Super 14 barreled TC Contender pistol while sitting next to folks with all sorts of semiautomatic rifles that talk about that 1/2" group at 1,000 yards, but don't deliver at 50. A single-shot anything isn't fashionable these days, but having been born and raised with it I can tell you that it is a discipline worth knowing.

I've done a lot of hunting with the TC Contender and the larger-framed Encore. Check carefully with your state laws on cartridge size and caliber for pistol season. In general, you can't hunt fowl with the 45/410 barrel; however, you can hunt fur-bearing animals with it. This is traceable back to a heated discussion that we had with a game warden at the Green River game farm near Ohio, Illinois and some long stares and comprehension of the state rule book.

What is often overlooked and taken for granted is the impact that Warren Center's invention of the TC Contender had on the shooting community as we know it. Were it not for the untiring efforts and passion of the TC employees, there would be no handguns in .410 today – nobody else would have fought that battle. Their efforts paved the road, and they paved it with a stand-up style, excellence and dedication that has yet to be rivaled. I find this admirable.

To me, it seems ironic that one of the companies that had no interest in Warren Center's idea 46 years ago now owns TC. I hope to see them rekindle the brand and not thumb their nose at it or dismantle it on some manifest destiny boardroom rant. Such aggrandizement would only serve the slayers and it surely wouldn't shine on a quarterly report as "growth." To the growth end of things, I'd like to get the TC Collectors Association going again!

PS: For a real thrill, (if the range master will allow it – you will have to show and convince him!) try skeet shooting with the 45/410 barrel on a TC Contender or Encore pistol. It's a gas. Stations 1, 7, and 8 are the most fun. You will get a lot of curious bystanders. Have some extra rounds and let them try. It's tough, but it's addictive.

**64** *Get your "stuff" together, then keep it that way!*

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mouser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag., .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, L86-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

# Swab-its® - A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!"

The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

## E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth	<b>L86-18613</b>	<b>\$6.99</b>
-----------------	------------------	---------------

**Snake Oil** is a derivative of an FDA certified medical lubricant used in high-speed medical drills.

- Provides a film that separates and protects moving parts, for smoother operation and increased efficiency.
- Contains no evaporants and has a film affinity in excess of two years.
- Reduces the collection of dirt, dust and other contaminants.
- Performance in extreme conditions is unparalleled.

0.5 oz. Bottle	<b>L86-16035</b>	<b>\$4.95</b>
2 oz. Bottle	<b>L86-16508</b>	<b>8.95</b>
Grease, (2) 4cc Tubes	<b>L86-17073</b>	<b>4.95</b>
0.5 oz. Oil, 4cc Grease	<b>L86-10059</b>	<b>5.95</b>

**M-PRO7™ Gun Cleaner** is odorless, non-toxic and biodegradable. "Safely cleans rifles, handguns, shotguns..., black powder, corrosive priming deposits and much more."

4 oz.	<b>L86-10139</b>	<b>\$11.95</b>
8 oz.	<b>L86-10138</b>	<b>18.95</b>
32 oz.	<b>L86-11298</b>	<b>40.95</b>

**M-PRO7™ Copper Remover** works up to four times faster than ammonia-based cleaners and is odor free.

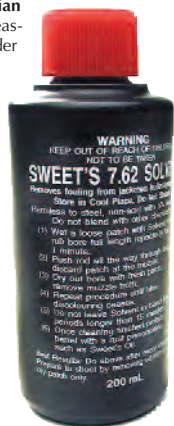

4 oz.	<b>L86-19370</b>	<b>\$11.95</b>
-------	------------------	----------------

## Sweet's Australian 7.62 Solvent

easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

<b>L86-13128</b>	<b>\$12.95</b>
------------------	----------------

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	<b>L86-15571</b>	<b>\$7.95</b>
Slide-Glide Lite	<b>L86-15572</b>	<b>7.95</b>

**Microlon UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

**FrogLube** is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

4 Oz. Paste	<b>L86-15443</b>	<b>\$10.99</b>
4 Oz. Liquid	<b>L86-15444</b>	<b>\$17.59</b>

## Dewey's AR-Link Cleaning

Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

L86-18599 \$14.95

# On-Target Productions, Ltd. Videos

On-Target Productions, Ltd. videos are designed to educate enthusiasts about the selection, proper use, cleaning, disassembly/reassembly, and accessorizing of firearms. On-Target Productions' videos are 100 percent digital quality, focused on the details and are entertaining and educational. Every video features clear, close-up photography to enhance the instructional narrative from start to finish.

Six-Magazine Storage Sleeve	<b>L86-19227</b>	17.95
Magazine Sleeve I.D. Tag/Hanger	<b>L86-19476</b>	1.95

## Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight **L86-18210** \$53.95

Secure Firearms Products' Universal Spring Tester will help you determine if the recoil spring in your pistol needs replacing, and you'll save time and money by testing and organizing loose recoil springs in your shooting bag.

Recoil Spring Tester **L86-15305** \$39.95

**MAGPUL 1911 Grip Panels** feature reinforced polymer construction and a unique diamond-shaped cross section to prevent twisting in the hand. They also have an aggressive mag-release cut out and are compatible with ambidextrous safeties.

- FDE **L86-43237** \$19.95
- BLK **L86-43236** 19.95
- ODG **L86-43238** 19.95

# CHECK-MATE M14/M1A Magazines

# BURRIS

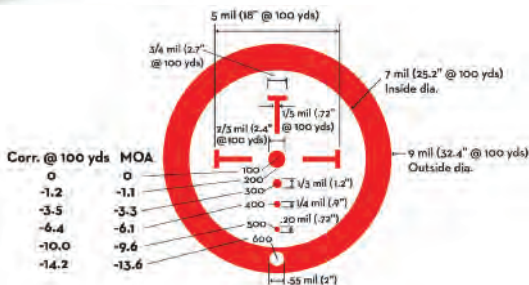

## MTAC 1.5-6x42mm

The resilient MTAC 1.5-6x42mm riflescope is tough, with superb, glare-resistant glass and a sleek, snag-free profile. This compact model is perfect for 3-Gun, close quarter battle (CQB), or big-game stalking. With its high-performance glass, solid 1-piece tube, and internal double spring-tension assembly, this MTAC Rifle scope can handle the harshest shooting environments.

And it's guaranteed by the Burris Forever Warranty™.

The fast-action Ballistic CQ™ reticle was designed for competitive shooters and law enforcement and military operators. The low-magnification, bright, fast-action reticle also serves dangerous game hunters well.

A circular, center "donut" provides ultra-fast engagement at close distances, and smaller reticle dots provide

trajectory compensation out to 600 yards for the 5.56 and 7.62 cartridges. The illuminated reticle gets you on target faster in any lighting condition and increases accuracy when the target is dark.

Elevation and windage dials are calibrated to 1 click = 0.5 MOA; both can be reset to 0 once the scope is sighted-in. The eye relief is generous – up to 4" – for comfortable shooting.

The scope features an ergonomic power ring for easy grip and quick power setting changes; finger-adjustable MTAC mil-rad target knobs for easy precision adjustments; and a rubber-coated eyepiece provides protection, comfort, and style.

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **L86-25374**

**\$79.99**

Scout Scope Mount for SKS Rifle **L86-25373**

# SHOOTING TIP: THE DIAMOND TECHNIQUE

By Duane Thomas

Serious shooters can have long, animated discussions regarding stance. Sadly, this often turns into “my technique is better than your technique.” The truth is that which technique works best has been well established for decades. It is also true there is a huge lack of information on exactly how to execute that technique. In this article, we will rectify that sad state of affairs.

Let’s start by working backwards; instead of starting with a discussion of technique, we will begin by figuring out what we want the technique to accomplish. Ideally we want a technique that, when we put the gun out in front of us in our normal shooting stance, points it right where we’re looking, with no other effort on our part. There’s no “up, down, to the side, ah, now it’s perfect,” we just put the gun out in front of our face, it’s on-target.

When we fire the gun, there will always be a certain amount of muzzle flip. The gun is on a pivot, our hands, and the pivot point is below the bore axis, the line of energy the gun gives us coming to the rear, therefore the gun has leverage to flip its muzzle with every shot. There is nothing we can do, with a non-compensated, self-defense oriented handgun, to completely stop that happening. However, it is a desirable thing to have as little muzzle flip as possible IF WE CAN ACCOMPLISH THAT WITHOUT ALSO MAKING THE GUN DO OTHER THINGS WE DON’T WANT IT TO. The reason to decrease muzzle flip is not, as so many people might say, “faster follow-up shots” *per se*. It’s that, if the gun doesn’t flip its muzzle very much between shots, and comes right back to the

same spot after every shot, this allows us to make our aiming A CONTINUOUS PROCESS.

When most people fire a handgun, their experience of the sights goes like this: see sights, aim, fire, boom! the sights disappear, reacquire sights, re-aim, fire the next shot. This is slow. If we want to fire faster than we can accomplish that process, and the gun is not tracking consistently right back to the same spot after every shot, when we up the speed our group size explodes. What we want, by contrast, is to see the front sight through its entire arc of recoil, we want to know where it is at all times. If we can accomplish that, even though the

process of the sights realigning occurs too fast for us to consciously affect it, our subconscious mind can manage and affect how fast and well they come back into realignment, far faster than our conscious mind. Thus, when the sights track consistently, and come back to the same spot every time, we can fire every shot even at max speed KNOWING where the sights were at the instant the gun fired.

This does, in fact, lead to faster shot-to-shot speeds with greater accuracy, because we don’t have that uncertainty factor, there is not always this part of our brain, even though we’re not aware of it, wondering if we missed with the last shot. We know we hit with the last shot because we saw where the sights were when the gun fired. Thus we can let go of what just happened, and focus only on what’s happening NOW. This is all much easier to accomplish if, when we fire the gun, it just doesn’t move very much, and comes right back to the same spot every time. This is the only reason it’s important we hold down muzzle flip: it’s easier

Legendary shooting instructor Ken Hackathorn demonstrates the Weaver stance.

From above, the “diamond” in Thomas’ arm position is readily apparent.

to see the sights through their entire arc of recoil if they just don’t move very much when we fire the gun.

The three most popular techniques among serious shooters, when it comes time to fire a handgun, are the Weaver, the Isosceles, and the Modified Isosceles. When you get right down to it, the differences between the techniques relate mostly to arm position.

Let’s start with Weaver which is built around the concept of isometric tension, i.e. it’s a *muscle centric* technique that attempts to use muscular force and tension to control muzzle flip.

The right arm (assuming a right-handed shooter, sorry, lefties) is slightly bent, the left arm is sharply bent with the elbow pointing much more toward the ground, the left hand pulls to the rear on the right hand which pushes forward. This creates front-to-rear tension on the gun that holds down on muzzle flip.

That’s the theory, anyway. In reality the Weaver stance accentuates muzzle flip and leads to very erratic sight tracking. With an extreme break to the arms, and front-to-rear isometric tension, the wrists bend backward easily when the gun fires, the bent arms collapse, in and out like an accordion, leading to extreme muzzle flip, and the front-to-rear isometric tension generates forces onto the gun that cause it to do a hula dance in recoil.

The Weaver stance was developed in 1959 by Jack Weaver. Originally all the term “Weaver stance” referred to was the idea of holding the gun at eye level with two hands on the gun and aiming using the sights. Eventually the technique was formalized by Jeff Cooper into a somewhat

more arcane and complex version, the radically bent arms, push/pull jobbie we now call the Classic Weaver stance. There is a persistent story – and I have no idea whether this is true or falls into the category of Unverified Rumor Control – that Cooper incorporated a radically bent left arm into his version of the Weaver stance because he’d broken his left shoulder and couldn’t straighten out his left arm.

Next up in the evolution of technique, once good shooters figured out the Weaver stance didn’t work very well, was what I call the Hard Isosceles stance. In this technique, both arms are

locked out hard, forming an isosceles triangle. The Hard Isosceles stance is a *skeletal alignment* technique, i.e. it uses the alignment of the long bones of the arms to create a solid, triangular brace behind the gun. This is better than the Weaver stance because at least your arms aren’t collapsing and then re-extending every time you fire the gun. The downfall of this technique is that, while you get a good lateral brace behind the gun, there’s really nothing stopping your wrists

from bending upward with recoil. People attempt to compensate for this by gripping the gun really hard with their hands. And then you’re right back to generating forces onto the gun that give you really weird, unpredictable sight tracking.

The Hard Isosceles stance does have its good points. It’s very simple to teach, it’s easy to understand, and it’s easy to execute, especially if you’re one of those people who doesn’t practice very much.

So, the search for a better shooting technique continued, eventually settling on what has come to popularly be called the Modern Isosceles or Modified Isosceles stance. You’ll hear it called MI

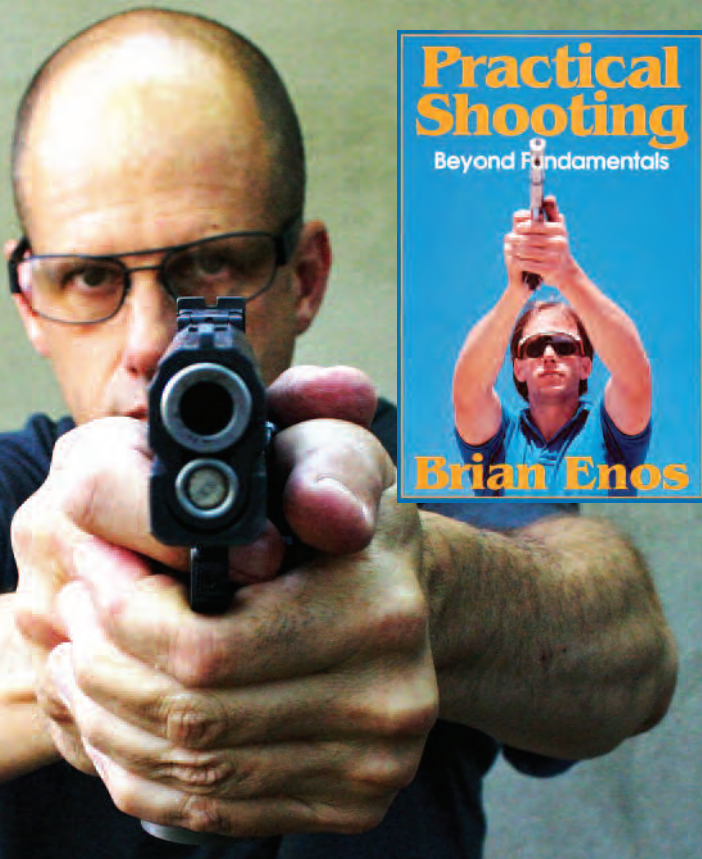

This is what happens when a handgun is fired with both arms locked out in a Hard Isosceles stance. Note both wrists bending backward, leading to extreme muzzle flip.

In the large photo, action pistol shooting great Brian Enos demonstrates his shooting technique. Note the elbows rotated outward in “the diamond.”

The inset photo is a great example of “the diamond” from the cover of Enos’ classic book, *Practical Shooting: Beyond Fundamentals*.

for short. This is a frustrating technique to learn because, frankly, there’s not terribly much information about it out there. Even most people using the technique, much less teaching it, don’t really understand how to execute it for best results.

The most readily, visually noticeable difference between the Hard Isosceles stance and MI is that in the latter the arms are not locked out hard, forming an isosceles triangle, rather there is a slight bend to each elbow. When looking at the arms from above or below, they don’t actually form a triangle, they form a diamond. Thus, rather than the Modern/Modified Isosceles, I tend to think of this as the Diamond technique because that seems to me more accurately descriptive.

Grand Master Dave Sevigny actually refers to this arm position as “the big hug,” and further elaborates, “From the side it might look like my arms are straight, but I actually have my arms bent like I’m giving someone a big hug.” All most people understand about the Diamond technique arm position is “you put a break into your elbows, because when recoil hits that angle it’ll stop, therefore the recoil never reaches your body.” While that’s true as far as it goes, there is quite a bit more to it. The bent arms in the Diamond technique are not there simply to be bent arms *per se*. They’re there because doing that is necessary in order to allow us to do other things, that will give

us great benefits in reduced muzzle flip and consistent sight tracking.

There is a technique in unarmed martial arts called “the unbendable arm,” which means: (1) When our arm is bent too much it loses power, specifically it can be easily collapsed. This is what happens when we shoot with a Weaver arm position, the arms accordion and bend with every shot. (2) When our arm is locked all the way out it also loses power, and turns into a fulcrum that can be easily moved around and manipulated by foes intent on doing all manner of horrible things to that helpless, extended appendage. This is what happens when we shoot with a Hard Isosceles stance. (3) However there is an arm position, somewhere between bent too much and totally locked out, where the muscles and bones of the arm align, and it suddenly becomes unbendable.

Stick out one of your arms, lock it out hard, then push on it, up, down, left, right. With your arm locked all the way out, you’ll find it has no strength; you can move it easily in any direction. Then bend the arm a lot, as for instance you would with your support arm in a Weaver stance, you’ll find you can also move it easily in any direction. Specifically if you push on it from the front, as would recoil from a handgun, it just collapses. It does not matter how much effort and muscular tension you put into it, you cannot stop

the arm from collapsing, this is just an innately weak arm position. Now put your arm out again, locked out, then begin incrementally bending it inward, with ever greater amounts of elbow bend, pushing on it between every position. You'll soon find there is a particular amount of bend where suddenly the arm stops moving when you press on it. It doesn't matter from which direction the pressure comes either, up, down, left, right, front, the arm simply will not move. Then do the same thing with the other arm.

In the unarmed martial arts, this is the amount of extension used to give a straight punch. More bend than that, you aren't getting maximum power, less bend (straight) and the arm also loses power, turning into an easily movable fulcrum. Exactly the amount of bend necessary to get to the unbendable arm varies from person to person. Even within the same person, it can vary from arm to arm. For some people, it will require more bend to one arm or the other to make it "unbendable." For me, it's pretty close. IT DOESN'T REALLY MATTER IF THE AMOUNT OF BEND TO BOTH ARMS IS IDENTICAL, AS LONG AS THEY'RE BOTH UNBENDABLE.

This is the attitude we want our arms to be in when we fire a handgun.

However, even at that there are other advantages to the Diamond technique. In addition to having both arms in a rock solid unbendable arm position, the slight arm bend is necessary to allow

us to PUSH INWARD with both arms. This lets us put muscular tension on the gun. While the Weaver stance is muscle centric, the Hard Isosceles stance uses skeletal alignment, the Diamond technique uses BOTH muscular tension and skeletal alignment to control the gun. When we bend the arms slightly and press inward, as in the Weaver stance we are generating isometric tension onto the gun, however in this case it's not front-to-rear pressure with our arms held in such a position they can be easily collapsed by recoil. Instead it's side-to-side pressure that will not only do its bit to greatly reduce muzzle flip because it LARGELY PREVENTS OUR WRISTS FROM BENDING BACKWARD WITH RECOIL, it also makes the gun point naturally and track consistently between shots, right back to the same spot. It will do all this with an arm position that absolutely will not collapse under recoil. Suddenly, shooting and fast and well becomes EASY.

Beginning shooters, when watching shooters of a more advanced skill level, often comment, with something of despair in their voices, "You make it all look so easy." Well, the truth is that shooting well IS easy. The reason good shooters look like they're not working nearly as hard is because we aren't. It just takes years if not decades of practice to learn the techniques that work so much better they're a lot easier to execute, and work much better. Hopefully this article can take some of that development time off your own skill level.

# 101 Classic Firearms by John Marshall <sup>83</sup>

Dillon Precision announces the release of John Marshall's new book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, a compilation of the author's popular articles appearing in **The Blue Press** since 2007. **101 Classic Firearms** is sure to be a welcome and prized addition to the library of any serious firearms aficionado.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on

some of the world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance

writer whose articles have appeared in **The Blue Press**, **Gun Digest**, **Guns & Ammo's Handguns**, and **American Gunsmith**. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. He is also an endowment member of the National Rifle Association.

**Price: L86-40133 \$29.95, Autographed L86-97130 \$34.95**

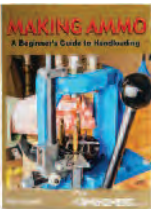

**Competition Reloading with Brian Enos** guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting.

Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

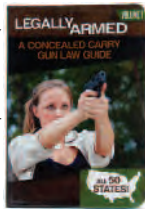

**L86-14341 \$19.95**

**Making Ammo: A Beginner's Guide to Handloading** by Kyle Lynch – Ammo shortage? Not anymore! Learn a new hobby that will save you money and ensure that you always have enough of the right ammunition for your shooting needs. This guide offers you an opportunity for first hand information from an experienced reloader as he takes you through the reloading process. Examples explain what works and what doesn't. If you are new to reloading or want to understand the fundamentals more fully, this guide provides simple step-by-step instructions.

**L86-43270 \$23.95**

**Legally Armed: A Concealed Carry Gun Law Guide** – Learn the basics of concealed carry and the laws associated with this astronomically growing group of self-reliant Americans. If you depend on a handgun for the protection of yourself or your family, arm yourself with knowledge, too. What's inside? What to consider before carrying a firearm • Protecting oneself: discharging a firearm in self-defense • What to do when interacting with Law Enforcement • Gun handling, practice and storage • State-by-state quick reference guide to carry laws where you live and travel.

**L86-43269 \$14.95**

**Armed & Smart: A Beginner's Guide to Concealed Carry** – If you are new to concealed carry and need a great resource for information, this is the book for you. This book covers all the basics a beginner needs to know.

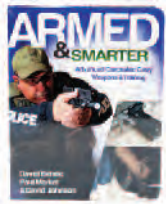

Before you make the decision to exercise your Second Amendment right to bear arms through concealed carry, you should consider factors like what type of gun is best for carry, when to carry a firearm, how to carry concealed, and why you should carry a concealed firearm.

We carefully cover handgun safety and the proper steps for using and caring for your firearm. Other topics include cartridge selection, accessories available, practice techniques, and range etiquette. **L86-43232 \$16.95**

**Armed & Smarter: Advanced Concealed Carry Weapons & Training** – Once you have mastered the basics for carrying your concealed firearm, you need a book to build on that foundation and hone your skills to those of an intermediate-level handgunner. After obtaining your concealed carry permit and securing a firm grasp of the responsibilities attendant to carrying a concealed firearm, it's time to focus on becoming an excellent marksman.

In **Armed & Smarter**, our authors prepare you, the shooter and gun owner, to handle and use your handgun responsibly. By the end of this book, you will understand the importance of strong habits and perfect practice.

**L86-43233 \$16.95**

# Wise Company's "Grab & Go" Emergency Food Kits

Be prepared for any emergency with Wise Company's **72 Hour Emergency Entrée Kit**. Each kit includes four servings per day (total of 12 servings) of 20 ounce lunch and dinner entrées shown in the following schedule: **Day 1:** Two 10-ounce servings of Cheesy Lasagna and Beef cook-in-the-pouch entrée; and two 10-ounce servings of Pasta Alfredo with Chicken cook-in-the-pouch entrée. **Day 2:** Two 10-ounce servings of Noodles and Beef in Savory Mushroom Sauce cook-in-the-pouch entrée; and two 10-ounce servings of Teriyaki Chicken and Rice cook-in-the-pouch entrée. **Day 3:** Two 10-ounce servings of Chili Macaroni with Beef cook-in-the-pouch entrée; and two 10-ounce servings of Creamy Pasta and Vegetable Rotini with Chicken cook-in-the-pouch entrée.

**\$37.95**  
L86-15296

Wise Company's **60 Serving Gourmet Entrée Only "Grab and Go" Food Kit** includes two servings per day (entrées only) for one adult for one month or four adults for one week. **Product within this Bucket is:** Savory Stroganoff (8 servings), Chili Macaroni (8 servings), Pasta Alfredo (8 servings), Creamy Pasta and Vegetable Rotini (8 servings), Cheesy Lasagna (4 servings), Teriyaki and Rice (8 servings), Creamy Ala King and Rice (8 servings), and Creamy Tomato Basil Soup (8 servings).

**\$119.95**

# Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics. The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll. The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.
