Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

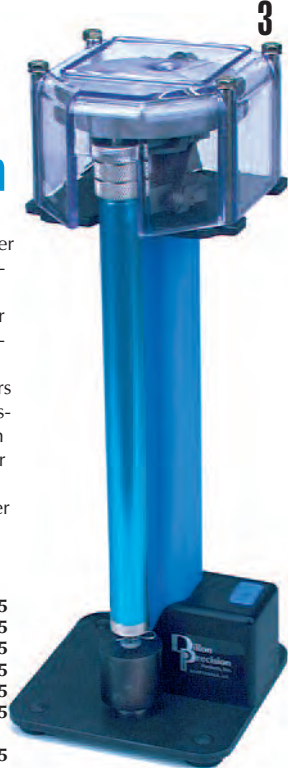

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

Thank You so much for replacing the Automatic Powder System on my Dillon reloader. It is good to deal with a company that produces a precision product with enough confidence in it to back up the product. I have always used Dillon products for reloading various calibers and am very satisfied with the results. Again, Thank You!

Mike Turner – Shiloh, GA

This letter is a special thanks to you and your staff. In cleaning the powder bar and accompanying mechanism, I lost a small plastic bushing. After trying to call numerous times for a week, I finally e-mailed your "contact us" address requesting the part. Today, less than a week after requesting this part, not only did the part arrive, but the entire assembly. I simply want to thank you. I have purchased a fair amount of equipment from you and have never had questions go unanswered or requests not followed through.

Bart Emigh – Pocatello, ID

I have been trying off and on for several days with a question about my HP1 Hearing Protectors.... I am sure you enjoy being busy and making lots of money during these "unusual times" as you call them. But I really think you should consider installing more phones to handle the situation. I would welcome you putting my comment in your **Blue Press** "We Get Mail" column. But I am sure you won't do it.

Thank You,

Herman Hansen – Dekalb, IL

Herman, I'm pretty sure that I speak for everyone in saying that nobody at Dillon – or anywhere else in the firearms industry – is "enjoying" anything about these "unusual times." We anticipated what might happen if the November election went against us, and we ramped up production accordingly. However, nobody could have anticipated the tragedy of December 14, 2012 at Sandy Hook Elementary and its subsequent exploitation by anti-gun politicians. The resulting spate of panic buying has – admittedly – overwhelmed our telephone and computer system infrastructure. The best way to contact us right now is the way that finally worked for you: e-mail.

Mike Dillon founded this company with the intent of providing shooters with The World's Finest Loading Equipment and outstanding customer service when – for any reason – the equipment fails. There's nothing enjoyable about knowing our customers have to wait on hold or can't use our equipment because there are no primers. We consider anything that compromises our ability to serve our customers as failure, and we're working hard to correct it.

¹⁰ NO-BULL BULLPUP:

Reviewed by Peter Caroline

Being a responsible citizen, I listened to the sage advice of our Vice President, “Buy a shotgun. Fire two rounds through the front door.” I wasn’t too clear on who would replace the door, or clean up the mess on the porch, but I certainly wouldn’t argue with the choice of a shotgun as one component of a complete home defense battery. And I have just tested one strong contender.

The Kel-Tec KSG bullpup 12-gauge pump gun has been around for a couple of years, and has a lot going for it. First, it’s just a bit over 26 inches long, making it quite maneuverable even in tight quarters. It has dual, side-by-side magazines, with a total capacity of

6+6+1 rounds of 3” shells. It weighs just under seven pounds, has an 18.5” barrel and Picatinny rails both on top of the barrel and on the bottom of the forend. The KSG also features ambidextrous

front and rear attachment points for a sling, and a 1-1/4” nylon sling is included.

The concept of a high-capacity shotgun is not new. Back in the 1980s, there was a South African design, called the Striker, that featured a 12-round

drum magazine and a folding stock. It was an imposing-looking, albeit cumbersome contraption, and the ATF decided that it was scary enough to be classified as a “destructive device.” The Striker’s American counterpart, the Cobray Street Sweeper, also required a \$200 federal tax stamp for legal ownership. Kel-Tec’s KSG, by contrast, is quite compact, easy to handle and, so far, requires no special permit or tax for purchase and use.

“The biggest surprise were Aguila’s 1-3/4” Minishells. Yes, they actually function through the KSG’s action and, best of all; you can load up to 12 of them in each magazine tube, giving a total capacity of 12+12+1!”

I’ll have to admit, when I first took the KSG to the range, I was a bit apprehensive. My earlier 12-gauge guns, including a Winchester Model 1897, a Ruger O/U, and a Chinese hammer dou-

THE KEL-TEC KSG

ble coach gun, were not pleasant guns to shoot. I'm not particularly recoil-averse (my wife says the correct term is "numb"), but I'm far more comfortable with a 16-, 20- or 28-gauge. With 2-3/4" field loads, the KSG was surprisingly comfortable. The 3" loads get your attention, but are still quite manageable. The biggest surprise were Aguila's 1-3/4" Minishells. Yes, they actually function through the KSG's action and, best of all; you can load up to 12 of them in each magazine tube, giving a total capacity of 12+12+1! Recoil with the Aguilas is very mild, making this a house gun that everyone in the house can use with no fear or trepidation.

The KSG is quite easy and instinctive to use. The unloaded center of gravity is directly over the grip assembly. Shells are loaded into the two magazine tubes from underneath, and the forend travel is only 4.1". It works like any conventional pump shotgun, with one exception: after you've fired all the shells in one magazine tube, you reach underneath, flip the magazine selector to the other tube, and you're once again in business. Although the pump action is quite smooth, I fitted a vertical

foregrip on the lower rail, which makes the action even faster and easier. I also attached front and rear flip-up sights to the upper rail, although a red dot or laser sight would work equally well.

Disassembly and cleaning of the KSG is easy, once you've read the instruction manual. And this manual is a pleasure to read. It is simple, straightforward and very well illustrated with color photographs and illustrations. The gun comes with a lifetime warranty, and Kel-Tec has an excellent and well-deserved reputation for prompt service on their warranty work. Manufacturer's recommended retail price for the Kel-Tec KSG is \$1,197. In normal times, the street price on most guns is less than MSRP. Lately, as we are all aware, the situation has changed and, like ARs, AKs, etc., the KSG is being bid up to some really stupid high prices on the on-line auction sites. If you can get hold of one, new or used, without breaking the bank, I say go for it!

12 WANT TO RELOAD? SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K34-21894 \$44.95

THE SHELLSORTER

...is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting.

The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time.

The **SHELLSORTER** is made of ABS, a strong plastic which will give a lifetime of service.

K34-19972 \$39.95

FROGLUBE CLP

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products. Frequent use will keep firearms running at optimal performance and not harm the FrogLube coating.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K34-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K34-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K34-22080** is **\$254.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below.) Replacement carbide cutting blades, **K34-13141**, are **\$19.95** each. Upper lock rings, **K34-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

Dillon's Case Preparation Equipment

CV-2001
K34-20493
\$187.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

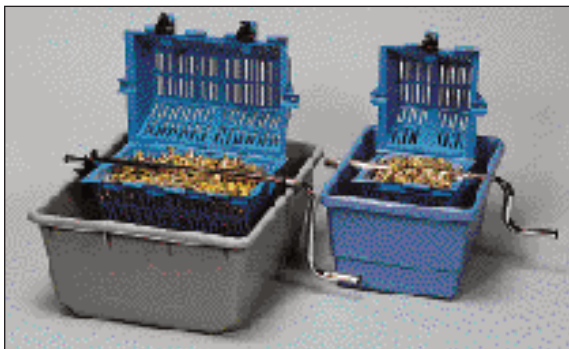

CV-750 K34-19455 \$144.95

Limited Work Space?

Dillon is introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K34-20675 \$72.95

CM-500 Case/Media Separator K34-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K34-22047 \$212.95

Euro CV-750 K34-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K34-13804** **\$8.95**
Case (20 pc.) **K34-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

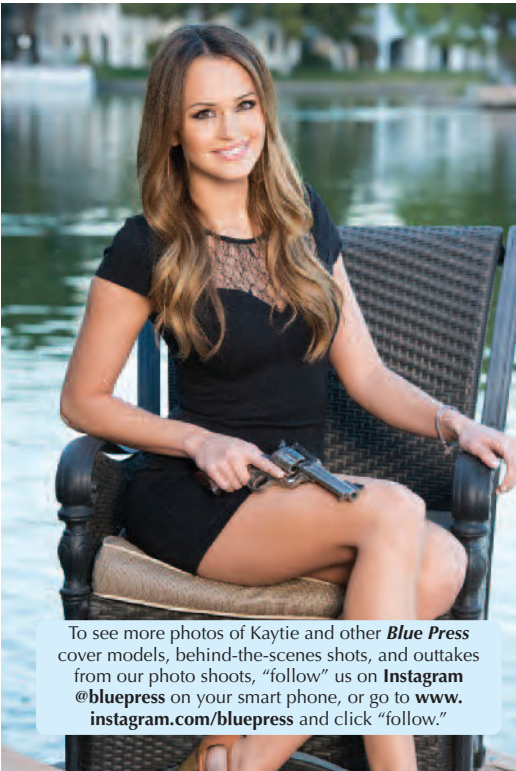

8 oz. bottle **K34-13733** **\$8.95**
Case (20 pc.) **K34-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **K34-21375** **\$135.95**

Don't Forget Polishing Media!

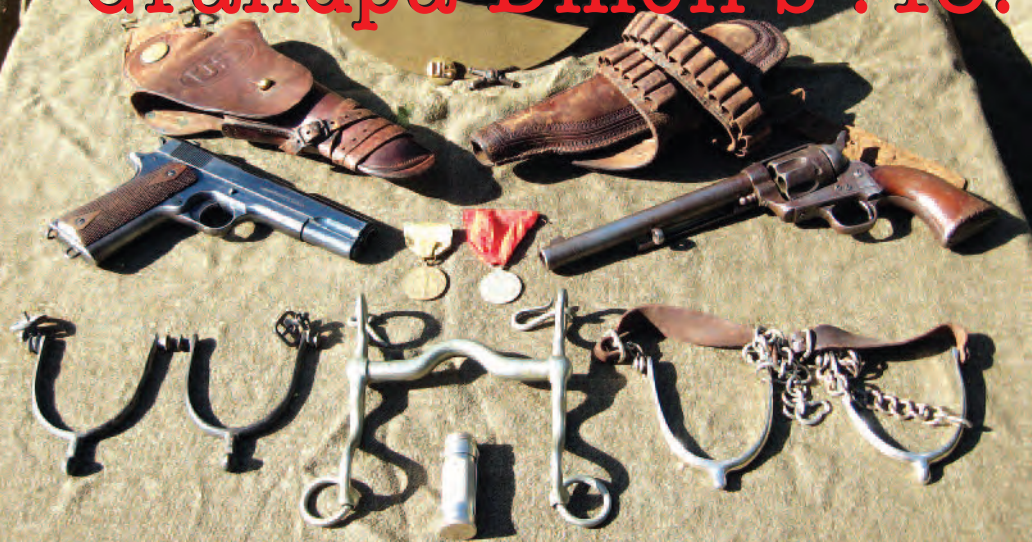

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag **K34-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag **K34-13496** **\$15.95**

Grandpa Dillon's .45:

First Sergeant William T. Dillon's Model 1911 .45 Auto Colt Pistol at left, made in November 1912, with its U.S. Army Rock Island Arsenal cavalry swivel holster as issued in 1913. Dillon's campaign hat, dress spurs, duty spurs, and bit were all used during his Mexican border service, 1914. Border service Medal and Mexican Villista friendship medal at center. Dillon's waterproof match case at bottom. The 1876 Colt Single Action Army with four notches on the grip, in the Mexican left-handed holster at right, is a souvenir of Dillon's border service.

By Brian Dervin Dillon, Ph.D.

Anybody who shoots pistols will probably agree that the best semi-automatic ever made is the Model 1911 .45 ACP. It is the right gun, in the correct caliber. Exactly one hundred years ago, my grandfather, William T. Dillon (1869-1938) was issued a first-generation Model 1911. The pistol has remained in the family ever since. The gun, with a five-digit serial number, was made in November 1912, the very first year of manufacture. Contrary to popular belief, no Model 1911s were actually made in 1911. It came in a Rock Island Arsenal cavalry swivel holster dated 1913. The swivel was so that the pistol would hang straight while you were mounted. My grandfather inked his initials and the pistol's serial number inside the holster flap, where they are still visible.

W. T. Dillon was a six-foot, one-inch tall Mustang officer who spoke four different languages (English, German, French and Spanish) and fought on four different continents (Asia, Africa, the Americas and Europe). He did this under three different names, in three different military organizations, laundering his identity with each successive enlistment. He was seven years old when Custer bit the big one at the Little Bighorn. His father was an Irish corporal and color bearer of the 16th U.S. Infantry who survived being shot five times at the Battle of Stones River, Tennessee, and subsequently being left for dead on the battlefield for three days afterwards. The lucky one, he was the only one of four Irish brothers in the Union Army not killed in the Civil War.

My grandfather enlisted as a private in Company A, 1st California Volunteer Infantry Regiment in

May, 1898, in San Francisco, for the Spanish-American War. He spent more than a year in the Philippines, fighting first the Spaniards, then the Filipinos during the subsequent Insurrection. Mustered out in 1899, he immediately took ship for South Africa, where he joined an Orange Free State Boer Commando. Grandpa fought against the British as a mounted guerilla during the first five months of the Boer War. This was the only place on the planet where an Irishman could shoot at Englishmen and get away with it. Dillon returned to the Philippines in the late spring of 1900, now enlisting in the Field Artillery as a regular private. He was just in time to be sent, as part of Reilly's Battery, to China for the relief of the Peking Legation. The second American over the wall at Tientsin, he also helped blow down the gates of Peking with his 3.2-inch horse-drawn cannon. Afterwards, he was sent back to the Philippines.

In 1902, he was promoted to Sergeant, and sent to the San Francisco Presidio, joining the 61st Company of the brand-new Coast Artillery. His unit scored the first-ever perfect score for a big-gun (12 inch) battery that same year. He helped build Forts Baker and Barry across the Golden Gate. In 1906 he ran one of the dynamite squads blowing up buildings in San Francisco ahead of the post-earthquake fires. He then served in Cuba, again in the Philippines, and in 1910 was made First Sergeant of the 61st C.A.C. For the next three years was the gun captain at Battery Spencer, the highest-scoring big gun battery in the United States. Battery Spencer still remains, high atop the bluff, now overlooking the north tower of the much later Golden Gate Bridge.

Its First Hundred Years²¹

In 1914, as a response to the Mexican Revolution, simmering for the previous three years, my grandfather was sent to the Mexican Border as the First Sergeant of the First Provisional Field Artillery. This was the first time grandpa's .45 ACP saw duty in a field campaign. Dillon was once again running 3.2-inch horse-drawn field pieces. A second deployment on the border in 1916 was interrupted when he was jumped from the enlisted ranks and made a Captain early in 1917. With our entry to WWI, granddad was made the San Francisco Presidio Ordnance Officer, then the Company Commander of the 67th Coast Artillery, and sent to France. His .45 ACP, now six years old, went with him across the Atlantic.

Captain Dillon, because of his language skills, was made a liaison artillery officer to our French allies, and commanded railroad guns shelling German positions. During a visit to a French munitions depot, the base came under attack from German twin-engined bombers. All the French troops ran away, leaving granddad the only man standing. So, with a French, stick-fed Hotchkiss machine gun, he shot down one German bomber, put holes in all the others, and sent them back over the German Border. For this he was awarded the *Croix de Guerre*. Later, during an artillery bombardment, he was blown out of his motorcycle sidecar, unconscious

into a ditch full of poison gas. He would spend much of the rest of his life in the Letterman Hospital Gas Ward. Grandpa was given a battlefield promotion to Lieutenant Colonel, and also decorated by our Belgian and Russian allies. The British were still mad about his Boer War service, so no medal from the Limeys. After the Armistice, he was bumped back down to Captain, but made the Ordnance officer of the St. Nazaire outshipment depot, where he served for another half-year.

In September 1919, at Pershing's request, Captain Dillon brought back a shipload (2700 tons) of German War loot and presented it to the Smithsonian Institution. He was himself presented to the House of Representatives by Congressman Julius Kahn and to the Senate by Senator Hiram Johnson as one of California's premier war heroes. He then

moved on to Fort Lewis, Washington, as the Commander of the 59th Company, Coast Artillery, now running 8-inch, tractor-pulled, howitzers. Grandpa closed out his military career as the caretaker commander of his old post, Fort Baker, when it was put into mothballs as part of the nationwide military drawdown, also serving with the Inspector General's Department at west coast army bases.

Dillon fathered four sons, all born either at the San Francisco Presidio, or at home in Sausalito. In the 1920s and early '30s he taught them all to shoot his .45 by getting mess hall garbage from the Marin Forts or the Presidio and "chumming" Great White sharks off the Fort Baker pier. The lanyard loop on

the pistol and magazine came in handy while the Dillon boys were shooting sharks through their open mouths in San Francisco Bay. When Captain Dillon died in 1938, he was buried in uniform at the San Francisco Presidio Cemetery. Before the casket was closed, his medals and ribbons were removed, and given to my grandmother. His 1911 .45 was given to my uncle John A. Dillon (1915-2001), who shortly afterwards followed in his father's footsteps by becoming a second-generation Mustang.

Drafted into the Coast Artillery as a private early in 1941, my Uncle Jack made Sergeant that same summer. He was the second Dillon non-com to carry the old 1911 on active duty.

After the American entry to World War II at the end of the year, Jack Dillon was jumped from the ranks, sent to OCS and made an officer. Leaving the artillery for armor, Lieutenant Jack Dillon trained with Patton in the California desert, then went overseas, taking his father's 1911 .45 on its second trip across the Atlantic.

Promoted to Captain, Uncle Jack served as lead scout in front of the Patton's tanks, spotting enemy positions and drawing enemy fire from a jeep. He carried four guns: his father's .45 Colt, now in a tank's shoulder holster, a captured "hideout" 9mm Luger, a BAR with recoil washers removed to cut down its rate of fire, and a captured German MP-43 submachine gun. Jack Dillon was wounded in action twice, and went AWOL from the hospital

William T. Dillon, First Sergeant of the 61st Company, Coast Artillery, wearing his Colt .45 ACP and extra magazines on the Mexican border, 1914. Photographer Unknown

Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

Stylemaster-DL \$150

A superior shoulder rig made of best-quality leather with solid brass fittings — no cheap plastic, no soft suede or other low-quality leather.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K34-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K34-11702 89.95**
"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.
- "Officers" Model" Safepacker, RH **K34-11701 89.95**

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

Uncle Mike's Kydex Holsters

Michaels of Oregon's injection-molded Kydex holsters have a level of detailing, quality and affordability unmatched by other manufacturing methods. The almost-vertical rake allows for behind-the-hip carry, and for some applications, the holster can function as a crossdraw. Smaller-size holsters can also be used for "appendix" carry. To aid concealment and to assist in the draw, the holster rides close to the body at a mid-level height. The injection-molded belt loop is designed to accept and support a variety of belts from 1" to 1.75" wide.

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

"Wild Bunch" 1911 Holster & Mag Pouch

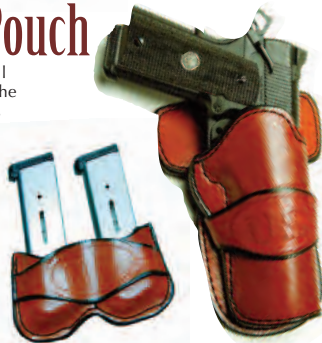

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

K34-13755 \$25.95

Dillon Pistol Cases

Protect your handguns with Dillon's rugged, padded nylon pistol cases. These cases feature a pouch on one side for cleaning gear or other accessories and magazine/speedloader pouches on the other. The "Small" Dillon Pistol Case will

accommodate most "Limited" class autos and the "Large" case will accept pistols with scopes and extended compensators.

Small - 7.5" x 11.5"	K34-10161	\$18.95
Large - 9.5" x 12.5"	K34-10162	21.95

We READ Our Mail!

Just a heads up, the Second Amendment Letter signed by 1100 Green Berets was drafted and originated at Professionalsoldiers.com, not SOFREP.com.

Jeff Hinton, Master Sergeant, Special Forces, Ret. – JD@professionalsoldiers.com

My apologies for that error. One of the problems with the proliferation of information on the Internet and by e-mail is that sometimes the correct links get lost along the way. I thought the information in the article was important enough to print in its entirety, and will do my best to see that the right people get the credit. – editor

First, let me say Dillon makes great machines – I have three! My question is, on Page 61 [May issue] you gave a site for commo with SF letter. Do you have a better address? I have seven years in SF USAR and would like to sign up. Thank you,

John Harris –
transworldjph@yahoo.com

As JD noted above, the letter originated at Professionalsoldiers.com, and here's the correct link: <http://www.professionalsoldiers.com/forums/showthread.php?t=40772>

Re: "Protecting the Second Amendment...." Excellent Article. I "borrowed" some of the ideas and quotations from that article and posted them on my Facebook page. I hope that someone sits up and takes notice that we veterans didn't serve this country just to hand it over to a bunch of bleating sheep waiting for the wolves to descend on the fold. The same goes for those politicians who believe they're doing what's best for the rest of us. Thanks again for publishing that article, and thanks to the 1,100 Green Berets who signed it, and to whichever of them wrote the article.

Joseph A. Clark, RMC (SW) USN, Ret.

I have just read, "Protecting the Second Amendment- Why ALL Americans Should Be Concerned" in the May 2013 issue of **The Blue Press**. I must say it's an outstanding article. I imagine that you, or the author(s) have already thought of this, but perhaps you should send a copy of this to every elected official in the U.S. Government. Maybe if we are lucky, your articles will allow some of these politicians to "see the light."

Jeff, USN (Ret)

I have just finished reading the May issue of **The Blue Press**. I am a Marine and as a result I dislike agreeing to anything the U.S. Army and the Green Berets have to say.

However, their article hit the nail on the head in regards to firearms violence. All the "feel good" firearms laws being proposed at the state and federal level will do NOTHING to stop the violence. The politicians fail to understand the concept that criminals are so called because they do not obey the laws.... The laws being proposed will only affect the law abiding – NOT the criminals.

Ralph G. Schwartz – Bowling Green, KY

Concerning the Protecting the Second Amendment article in the May 2013 issue of **The Blue Press**, in my opinion it is excellent. There are a great many facts, figures and information about our Bill of Rights, the Second Amendment, reasons for its existence, and various Supreme Court decisions and opinions. But the authors are missing the target. They are preaching to the choir. Most of the people reading **The Blue Press** and those who've read this article are supporters of the Second Amendment to various degrees. The correct targets are the non-firearms owner, those who don't vote because "my vote don't count," those whose only source of news is the biased media, and those whose ideals are only slightly left/liberal slanted. The only way I know to spread the word about the importance of the Second Amendment is to keep talking, writing letters to the editor and by using every other means of personal communication.

Jeffrey Lon Rodger, MKCS, USCG, Ret. – Ketchikan, AK

Dillon Reloading Accessory Package Deals!

Dillon's Package Deals include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

Dillon's Pistol Die Sets

Size Die

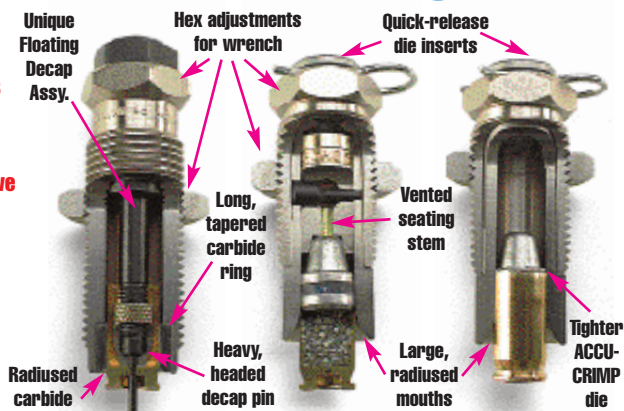

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Extra Loading Data Labels, K34-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

'Belted Magnum' Powder System

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder.

Like all of Dillon's powder measures, the Belted Magnum Powder System is case-activated and can be used with your RL 550B, XL 650 or AT 500 reloader. It's ideal for loading large-caliber magnum rifle cartridges. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

The "Belted Magnum" Powder System is based on our SL 900 Shot Dispenser, so the Maximum Charge Bar won't work in our standard powder measures – you'll need to buy the entire system. The good news is that the "Belted Magnum" Powder System has an integral drain, so it's easy to empty the hopper in order to change powder types; so, if you load several big calibers with various powders, it's easy to switch from one to another.

Keep plenty of extra powder on hand, because when you're dispensing 100-plus grains into every cartridge, you're gonna need it! Magnum Powder System **K34-97126 \$137.95**

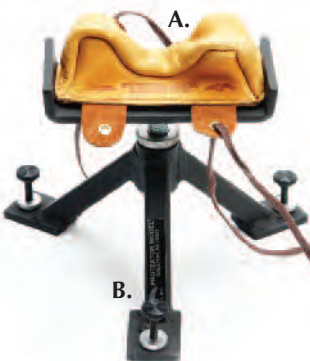

PROTEKTOR MODEL

The Original Leather Sandbag* Rifle Rests

All Protektor Model leather bags are made with the best top grain cowhide available. The welded steel rest is strong enough to stand on and won't break if dropped (*Owl Ear Front Bag sold separately*).

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

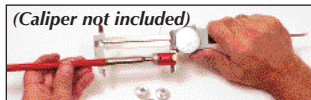

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

CLASSIC FIREARMS: The Rem

By John Marshall

When you say “shotgun” I’ll bet that most people will visualize the popular Remington 870. There are good reasons for that. Since its introduction in 1950, year after year, it’s been a best seller. It is now arguably the best-selling shotgun of all time. It configures easily for just about any task. Change out barrels, stocks and accessories and you can have an upland bird gun, a duck gun, a skeet gun, a trap gun, a riot gun, or a tactical defense gun. It’s simple. It looks good. It’s reliable. It’s easy to maintain. I’ve heard it said that one can never have too many Remington 870s. It’s that good.

Still, in spite of its immense popularity for over 60 years, few people actually know how the enduring design came to be. So here’s a little history. After World War II, Remington designers were working on a family of shotguns to offer the public. The first to hit the market was the 11-48 semiauto in 1948. It was decided that many of the parts of the 11-48 could also be applied to a pump-operated counterpart. Four Remington engineers were assigned the task of developing that pump gun. They were Ray Crittendon, Phillip Haskell, Ellis Hailston, and G.E. Pinckney.

These skilled men went to work with the 11-48 design as the core of the gun. They used the receiver, trigger housing group, and a number of other common parts. While the gun was a quality piece, it was also economical, first because it used many of the same parts as the 11-48, but also because most of the parts were easy to manufacture. The receiver, the bolt and the barrel were made of the finest steel. There were a number of stamped parts that were easy to make in the trigger housing group. The twin action bars were also stamped parts. Using two bars instead of one made for reliability, with no problems of twisting or binding inherent in a single-bar design. It was lighter than most shotguns, because the design team chose the 16-gauge receiver of the 11-48 to work with 12-gauge components. That also made the new gun a bit slimmer than the 11-48 12-gauge. The push-button trigger-blocking safety behind the trigger

“There are so many fac
list in this short article
of stock materials, man
models, sighted barrel
and special guns ma

was carried over from the semiautomatic gun and a bolt-release lever forward of the trigger guard was incorporated into the trigger housing group. The bolt has a cammed locking block that fits into an extension on the barrel to lock these units together in the forward position.

Barrels could be easily interchanged without fitting by simply removing the magazine cap and slipping them on and off. The standard stock fit almost everybody. When the gun was announced in January 1950 as the Model 870 “Wingmaster,” it became an immediate hit. The only alloy part was the non-stressed trigger housing, which was anodized to match the bluing on most of the steel parts. The older Remington Model 31 needed over 580 machining operations to produce it, while the 870 needed only about 150. These cost savings could be passed on to the customers, and the 870 was never a particularly expensive item. As a matter of interest, although there have been some cosmetic changes depending on the intended use of the various iterations of the gun, it has remained mechanically the same since its introduction. That’s a real tribute to its excellence.

The reliability of the 870 action is legendary. This fact has not been lost on police departments in the United States, and 870 riot guns can be found almost universally with them. It’s a rare police cruiser that doesn’t have one on board. The intimidating metallic “shuck-shuck” sound of a round being chambered is usually enough to settle any disagreement without a shot being fired. Officers who are trained with the gun are instructed to operate the action vigorously. As with most pump actions, not pulling the forearm all the way back (a

Remington Model 870 Shotgun

factory configurations that they are impossible to . There are left-handed actions, a wide variety of different gauges and chamber lengths, youth models, moisture-resistant and camouflage finishes, and models made for competition such as skeet and trap.”

“short stroke”) can induce a hang-up. A round in the 870 can then jam halfway out of the magazine, back over the lifter. For this reason, many departments have modified the lifter with a central longitudinal slot. This enables pushing a jammed round back into the magazine with a key, a pen, or a knife, putting the gun back into action easily. Home-defense guns can be modified similarly; it's easy enough to do with a Dremel® or similar tool and a cutoff wheel. Current 12-gauge guns have a “Flexi-tab” lifter with a U-shaped slot that alleviates the problem.

The factory has offered various configurations over the years. Almost standard among outdoor sportsmen are the 28-inch-barrel field models with a ventilated rib and a modified choke. In recent years, “Rem-choke” barrels have become available; these have interchangeable choke tubes that screw into the muzzle of the barrel. This arrangement allows selection of an open, improved, modified or full choke in just a few moments. Many older barrels were custom equipped with adjustable chokes and/or compensators such as the Cutts models.

Riot guns with shorter barrels (usually 18” or 20”) and with more mundane metal and stock finishes are considered ideal for police and home defense work. The 870 is easily adaptable to allow different stocks, barrels with rifle sights, extended magazines, extra ammo brackets, etc. Custom-configured “tactical” models are easy enough to put together for those interested in doing so. There are even forearms with built-in high intensity flashlights for use in the dark or low-light environments. Aftermarket polymer stocks and folding or

collapsible stocks are also available. Guns without shoulder stocks and using just pistol grips make for handiness in confined areas, but are not for the recoil-sensitive.

There are so many factory configurations that they are impossible to list in this short article. There are left-handed actions, a wide variety of stock materials, many different gauges and chamber lengths, youth models, sighted barrels, moisture-resistant and camouflage finishes, and special guns made for competition such as skeet and trap.

The gun illustrated here is my old 12-gauge 870 TB trap model. It's equipped with a 30” ribbed barrel featuring two “stack ‘em” beads. By the standard Remington date code on the barrel, it was made in February of 1969. I've put thousands of rounds through it and it's still as good as new. If you're wondering about the pieces of red and blue tape on the forearm, they were put there to distinguish my gun from all the others in the racks at the trap range – it seems almost everyone where I competed had one a lot like it. With practice and this fine gun, I was able to hit 50 straight pretty regularly before my interests wandered to other endeavors. The trap and skeet models typically had premium wood, finely figured and finished. This old gun is no exception. It's a beautiful piece.

Over 10 million 870s have been built and sold from 1950 to 2010, and this shotgun shows no signs of any decline in popularity. Parts and accessories are available almost anywhere and on the Internet. Sportsmen, police, the military, shooting competitors and those just wanting effective self-protection all think the world of it. If you don't have one, well – why not?

Rechargeable Batt. Pack for Above	K34-12117	48.00
Nylon Carrying Case	K34-18145	35.95
Tripod	K34-18126	39.95
2-Ft. Skyscreen Mounting Bracket	K34-18120	14.95
Replacement Skyscreens	K34-18124	21.95
Replacement M2 Sensor	K34-18877	36.95

The M2 Chronograph comes with sensors, screens and one two-foot mounting bracket. A nylon carrying case and tripod are available options. The CED7000 Shot Timer is a breakthrough in technology. No other timer to date offers this combination of advanced features, compact size and light weight. This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

Take out your frustrations, and build your grip strength at the same time! Just think about...oh, the new Supreme Court, socialized medicine, tax increases, high-capacity magazine bans, etc., and use the one-pound ball. Or, think about the "bailout" legislation and the luxury resort vacation the execs at AIG enjoyed on YOUR DIME. You'll need the two-pound ball for THAT one!

*FAQ About Berry's Preferred Plated Bullets

1. What is "DS?"

"Double Struck." Double-Struck bullets go through an extra sizing process after being plated. This makes the bullet 100 percent symmetrical. This can give you an edge in competition, but most shooters won't notice the difference.

2. What is the difference between Plated/Jacketed/Cast bullets?

Berry's Preferred Plated bullets begin as a swaged lead core. The plating process works through electrolysis. The swaged lead cores are tumbled in an electrically charged cyanide bath containing high-grade copper ingots. The copper clings to the lead and the longer the bullets remain in the bath, the thicker the plating.

3. How do I load Berry's Preferred Plated Bullets?

Plated bullets occupy a position between cast bullets and jacketed bullets. They are soft lead, but have a hard outer shell on them. When loading plated bullets we have found best results using low- to mid-range jacketed data in the load manual. You must use data for a bullet that has the same weight and profile as the one you are loading. Do not exceed mid-range loads.

4. How fast can I shoot these bullets?

Velocities depend on the caliber, but as a rule of thumb, we recommend you don't shoot our plated bullets over 1200 fps (feet-per-second). Our 44s actually shoot best around 1150 fps. 45s are generally good at 850-900 fps. Our bullets are NOT recommended for magnum velocities.

5. Can I shoot your plated bullets in my GLOCK?

Yes. We have a large contingent of loyal GLOCK shooters using our bullets. The plating is thick enough that you will not get lead fouling in your bore, which is the nemesis of polygonal barrels.

*DS = Double Struck, TP = Thick Plate, HB = Hollow Base, RN = Round Nose, FP = Flat Point, SWC = Semi Wadcutter, WC = Wadcutter

About SNS Casting: SNS Casting, Inc. is a family owned and operated business located in rural Flanagan, Illinois and was officially founded by Jim Stinar in the winter of 2008. Jim's casting history actually began in the mid 1980s as a hobby. This supplied not only himself but a group of friends and fellow avid shooters who were tired of paying too much for inferior products. Eventually, word was spreading throughout the surrounding states of his bullets, which were priced right for the quality.

Today, SNS Casting features four of Magma Engineering's Mark VIII casters and two Lube Master luber/sizers fitted with M-A Systems Collators. **Our lead is a certified factory alloy of 92 percent lead, 6 percent antimony and 2 percent tin, which is purchased in 44,000-pound lots to ensure consistent quality. The lube we use is Magma blue lube.**

We have two full-time employees at SNS Casting. Jim Stinar and son Ryan are avid USPSA (A30909, A63666) shooters, SASS members and NRA members.

NOTICE: There is a \$20.00 minimum 'Hazardous Material' (HazMat) handling fee for shipping PRIMERS. This fee is assessed in increments of 10,000 primers. Primer orders MUST be shipped separate from other items, and require a separate shipping and handling charge. Shipping and HazMat fees are not included in prices.

The Otis Technology, Inc. Breech-to-Muzzle Cleaning System cleans rifles .22 to .50

cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal.

The system includes three memory-flex rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

K34-18174 \$39.95

Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jig sized for a tight bore fit

which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reuseable.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

\$24.95

Concealed Carry Tote⁴⁷

\$45⁰⁰

K34-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged nylon fabric, with heavy-duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

TUFF PRODUCTS MAG POUCHES

Front view with flap.

Front view without flap.

Rear shows loops and Molle fasteners.

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system; for instance, the Dillon Range Bag, a tactical vest or body armor carrier. Available in black or coyote brown.

Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

K34-19495 \$9.95

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?!). No excuse, Sir!

K34-19257 \$11.95

DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily.

The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

Dimensions: 66" x 27.75"

RCBS EQUIPMENT

Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

58 Performance Parts for Your GLOCK® Firearm

Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K34-14760 \$24.95**

Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K34-18630 \$14.95**

C. Bullet Forward Slide Release **K34-18629 19.95**

GLOCK® Factory Original Parts:

both times to rejoin his unit. He helped liberate two Nazi concentration camps, and stopped taking SS prisoners soon afterwards. Dillon was awarded the Bronze Star, and received two battlefield promotions in the European Theater. At the end of the European War, in Czechoslovakia, Jack Dillon was surrounded by 200 mounted Hungarian Hussars moving westward, trying to outrun the Russians. Grandpa's .45 was handed over for a brief period, then handed back, along with 200 Hungarian .380 Automatics (Figure 4) as all of the cavalymen surrendered to him.

His reward for such exemplary service in the ETO was to be sent to the Asiatic Theater. Grandpa's 1911 .45 now crossed the Pacific for the first time. After the "formal" Japanese Surrender in September 1945, Uncle Jack Dillon was sent to Korea, where he continued to take surrenders from isolated Japanese units moving south from China for some additional months. Promoted to full bird Colonel, Dillon was made the military Governor of Pusan province. He stayed on halfway through 1946, creating his own M.P. force of ex-Imperial Marines, all Koreans over six feet tall. Colonel Dillon's little army still wore their Japanese uniforms, but with U.S. collar badges, still armed with Arisaka 7.7 rifles.

One of ours beats three of yours. Mustang Colonel John A. Dillon carried his father's 1911 to Europe, then to Asia, for service in the pistol's second World War. Jack Dillon took the three pistols on the right, a German 9mm Luger, a Hungarian .380, and a Japanese 8mm Nambu, away from their rightful owners while carrying a real pistol in the correct caliber: the Dillon family .45 ACP.

The last time that Grandpa's .45 was pulled from its holster, ready for business, was in the spring of 1946. Shortly before returning stateside, Uncle Jack asked his ex-Imperial Marine Sergeant what a Japanese Banzai charge looked like. The non-com said that he couldn't describe it, but he could act it out. The sergeant got a squad of former Japanese Marines together, their issue swords out, huddled for a while as they worked themselves up, then charged Dillon, who reacted by pulling his .45 and almost killing his own sergeant before they all stopped, less than a yard away, with their swords in the striking position. In 1946 the .45 came back across the Pacific to California, where it has been ever since.

When my Uncle, Colonel Jack Dillon, retired from the U.S. Army, his father's 1911 passed to me. I have shot the .45 and used it as a teaching pistol ever since. For years, whenever brand-new pistols have jammed or failed, grandpa's old 1911 was used as a test-bed to determine what was wrong with the newer guns. And, whenever a new shooter asks me what kind of pistol to buy, I always take pains to point out that, at least in our family, one .45 beats all the other calibers, combined. In a world increasingly populated by plastic guns in the wrong calibers, I am proud to say that grandpa's 1911 .45 ACP is still in the family, now going on its second century.

About the Author: Brian Dervin Dillon is a fifth-generation Californian. He was the youngest-ever Ph.D. in archaeology from the University of California, Berkeley. For the past 40 years he has done archaeological and historical fieldwork in California and in four different Central American countries, and is widely published in his field. An NRA member, he is a Chief Range Safety Officer, a certified Rifle, Pistol Shotgun and Reloading Instructor, and a Boy Scout Rifle and Shotgun Merit Badge Instructor.

Captain William T. Dillon's 1911 Colt with holster, his WWI "tin hat" with aerial dogfight scene painted by a German prisoner of war, and captured 1916 "lobstertail" steel Pickelhaube from the Crown Prince's household in November 1918. Medal row, left to right: WWI Victory Medal, with campaign bars for Oise-Aisne, Verdun, St. Mihiel, Meuse Argonne, and Defensive Sector; Disabled Emergency Officers of the World War Cross; French Croix de Guerre' French Verdun Medal; Belgian War Commemorative Medal and Imperial Russian Alexander Medal for Valor. Insignia row, left to right: Dillon's Warrant Officer Cap Badge; Regular Army Officer Cap Badge; 6th Coast Artillery Collar Insignia; 1919 St. Nazaire multi-branch (Coast Artillery, Ordnance, Engineers and Signal Corps) collar badge; Ordnance Officer Collar Badge. Bottom Row: left to right, Dillon's 1918 Lieutenant Colonel's leaf; 6th Harbor Defense Artillery Regiment Distinctive Unit Insignia.

Powder River Precision, Inc: Perfecting Your XD/XDm

Powder River Precision X-Treme Grips: CNC Laser Cut 360° Grip Enhancement for your XD/XDm, made of high-quality adhesive-backed traction tape.

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	K34-19220	\$29.95
Advanced Trauma Kit (A.T.K.)	K34-19322	69.95

Steve Anderson: "It's All About The Shooting" 63

By Steve Anderson

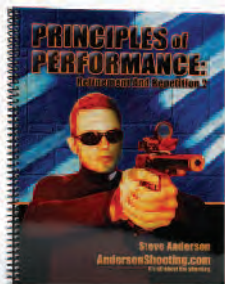

Refinement and Repetition: Dry Fire Drills for Dramatic Improvement is made up of 38 dry fire drills, including the exact drills I used to achieve the rank of Grand Master in one year after buying my first Open Gun. I'm obviously a huge believer in the power of dry fire practice to make all of the skills required to fire a pistol accurately at high speed

truly subconsciously controlled. When the basic gun-handling skills are subconsciously controlled, you're no longer drawing, aiming, pulling the trigger and firing the gun. You're simply shooting.

I analyzed the USPSA classifiers and realized that most of them involved shooting six rounds, reloading, and then shooting six more rounds at various target arrays. From there it was simple to devise drills to address those challenges. These became the first 12

K34-14730 \$23.99

K34-14733 \$26.99

drills in *Refinement and Repetition*. The others came after a similar analysis of the skills that are needed in common USPSA stages.

Principles of Performance: Refinement and Repetition 2 is the logical continuation of *Refinement and Repetition*. The new book places a heavy emphasis on match consistency and the mental qualities required for solid USPSA match performance. It's designed to take a good shooter with sound fundamentals and basic skills to a place where he or she can better utilize those basic skills in the world of high-stress competition.

There are drills designed specifically to improve field course skills, as well as drills designed to isolate the challenges a shooter begins to see at larger matches. *Principles of Performance* also covers the common mistakes seen at every USPSA match, as well as their solutions.

VIKING TACTICS' TRAINING DVDS, BOOKS

3GM "Shooting Techniques of the Grand Masters" brings you the experience and know how of three of the top Grand Masters in the sport today: Max Michel, Saul Kirsch, and Angus Hobdell. Each shares with the viewer his technique in skills like stance and balance, recoil control, accuracy, the draw, specialty draws, reloads and transition between positions. This production highlights the differences between the techniques used by these champions. Watch, learn and choose which technique works best for you. Run time: 160 minutes.

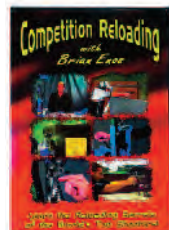

K34-11630 \$49.95

Ultimate Advanced Revolver with Jerry Miculek – The World's Greatest Revolver Shooter Jerry Miculek is recognized as the fastest and most accurate revolver shooter in the world. His speed and skills are, in one word... Amazing! They've been verified in hundreds of local and national competitions. In this program, he shares with you some of the techniques and secrets he has mastered over the past 25 years to become the shooter he is today. And, you'll see an incredible display of revolver shooting and reloading. 100 min.

K34-14608 \$19.95

Competition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

K34-14341 \$19.95

A New Concept in Police

Draw! (Left) – Every string of fire on the MCSO Jail qualification begins with a draw from the holster, here being executed by Corrections Officer (CO) Anita Ward with her Glock 23.

One Hand Only (Right) – Author Duane Thomas (foreground) and CO Todd Hilyard fire the one-hand-only portion of Stage 1 with their Glock 17 and Beretta 92FS respectively.

Speedload (Left) – The author speedloads his Glock during Stage 2. **Flappedload** (Right) – Sergeant Joe Ott goes for a spare magazine for his .45 ACP Glock 21 during Stage 2.

Close Range Cover (Left) – Duane Thomas engages a close-range target around cover during Stage 3.

Back Behind Cover (Right) – CO Todd Hilyard engages a target while tucked back tight behind cover on Stage 3.

By Duane Thomas

Recently I was invited to attend the firearms qualification shoot for the Mason County Sheriff's Office Jail division here in Washington State. Whereas most police qualification courses of fire, even today, have evolved little beyond "stand and shoot" exercises, the MCSO Jail qual proved to be much more varied and innovative.

The firearms instructor for the MCSO Jail division is Sergeant Bruce Bennett (familiar to long-time *Blue Press* readers from my previous article, "Bruce Bennett, Bionic Shooter" dealing with his successful battle with Parkinson's disease). One interesting thing about this qual, it wasn't shot on

a standard B27 police silhouette; it used primarily multiple USPSA cardboard targets, and also incorporated steel shooting in the guise of a USPSA mini-popper (that small steel knockdown target that looks like a scale model Pepper Popper).

There were three stages to the MCSO jail division qualification. Stage 1 was the most conventional, a series of stand-and-shoot drills run from 5 to 15 yards. However they were not shot on the standard B27 silhouette but instead three USPSA targets. Sergeant Bennett commented, "I've been using cardboard USPSA targets since I began running the MCSO Jail qualification in 1983. I felt the USPSA target was a much better representa-

Firearms Qualification

Long Range Shots
(Left) – CO Tammy Reeves (with her Heckler & Koch USP .40) fires the 15-yard portion of Stage 1 of the MSCO Jail firearms qualification.
Paper & Steel (Right) – CO Jason Zanewski fires his European American Armory Witness .45 on cardboard and steel during Stage 2 of the MSCO Jail firearms qual.

Classroom (Left) – During classroom training after Stage 2, Sergeant Bennett instructs his officers in the concept of hit factor and how it can relate to their survival.
Shooting While Moving (Right) – CO Dave Sushak in plainclothes practices shooting while moving with his 9mm Smith & Wesson 639 during Stage 3.

Crouching Cover
(Left) – Sergeant Joe Ott crouches to shoot around cover during Stage 3.
Long-Range Cover
(Right) – CO Tammy Reeves engages a target from 15 yards around cover during Stage 3.

tion of the areas on the human body that – more than likely – would incapacitate an adversary in the real world.”

Stage 2 was a speed shoot, during which officers had to engage a mini-popper and four USPSA paper targets, two each flanking the steel on each side. This stage was clocked using an electronic timer, and shooters were given their hit factor (a number telling you how many points on target you posted per second during the drill). This is the sort of fast shooting combined with the need for accuracy that you get very little of, if any, during normal police qualification courses.

Stage 3 incorporated use of cover both left

and right while shooting at varying distances and absolutely forced you to deliver accurate shots while moving. Again, this is something you get very little of, if any, during the typical police qualification.

Summary

This qualification course was, I found, a thought-provoking experience. Granted, such a program requires much more time, effort and ingenuity to implement than simply running the exact same “stand and shoot” course over and over, for decades on end. But there is much here to ponder, I think, not only for law enforcement officers but also for legally armed citizen shooters.

J. Dewey Mfg. Co.

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits all AR-15s and AR-10s with standard and oversized take-down pins up to .316" in diameter.

To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

ElZetta

Tactical Flashlight Mounts

Every ElZetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the ElZetta® ZFL-M60. (Sizing Adapters are not required when using an ElZetta ZFL-M60 or other 1-inch lights.) The ElZetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular ElZetta ZFH1500.

The NEW ElZetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the ElZetta ZFL-M60. The ElZetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

TACCOM, LLC Tactical and Competition Accessories

QUICK CADDY... Light, easy, simple! Made from Delrin, TACCOM's Quick Caddy holds the shot shell by the rim only, allowing for easy access to the shells for simple and fast removal. Holds four 12 gauge shells, any length! Comes with a belt strap to attach to your belt, but allows you to use the TEKLOK or ELS systems and is adaptable to MOLLE system as well.
K34-19537 \$24.95

TACCOM, LLC's Dualload Shot Shell Holder is available in 2-, 4-, or 6-shell versions and can be customized to carry your shotgun ammo in several configurations. We're offering the 2Up version that can be either attached to a belt or MOLLE gear, as well as the 4Up and 6Up versions with a BLADETECH Tek-Lok™ Universal Belt Clip (included) that can be attached at various angles. The Dualload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun. It's quick, easy and (most important) intuitive!
 2Up Belt/MOLLE **K34-19530 \$9.95**
 4Up w/Tek-Lok **K34-19531 29.95**
 6Up w/Tek-Lok **K34-19532 34.95**

TACCOM's Enhanced Firing Pin for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions will ignite your .22 rounds, whether you use a GI trigger or a three-pound match trigger. This direct-replacement firing pin is made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many, many firings. Every inside corner is radiused to eliminate stress points. The tip of the pin has been reduced in area to help give you a deeper dent in the primer. You can use the stock spring, yet the return pressure will be reduced by about two pounds, helping promote reliable ignition. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.
K34-19538 \$13.95

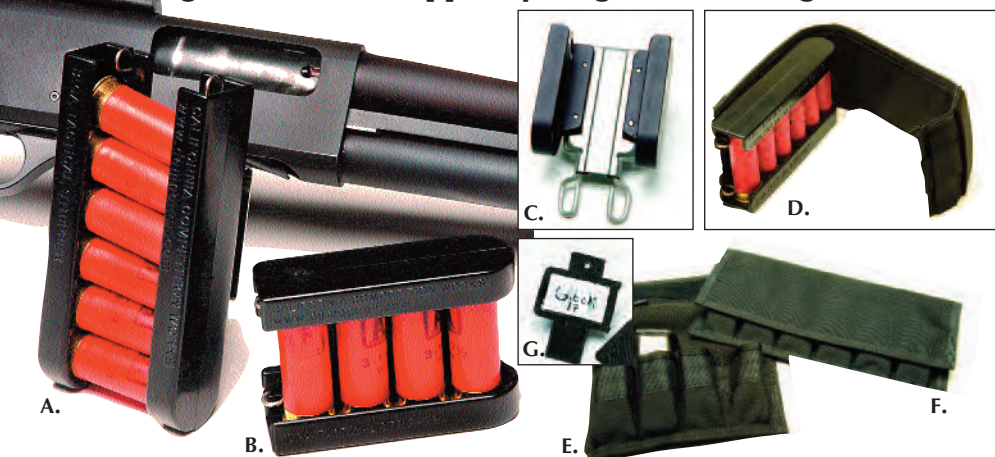

The TACCOM Extreme Extractor is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you the reliability of consistent extraction during live fire. Up till now, your rounds have been coming out of the ejection port erratically! Install the Extreme Extractor and your rounds will come out looking like they are being put thru a garden hose! Consistent extraction is KEY for a reliable firearm. This extractor will help with your live round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut. TACCOM, LLC has seen and has been told by their testers that leaving a round in the chamber all but went away with the Extreme Extractor.
K34-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? Did you know that the very top of your lower receiver takes all the recoil of your .22 LR insert? Simply inserting the TACCOM 22 Inset Pressure Plug in front of your buffer eliminates those problems. The Pressure Plug will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. Being about an inch and a half long, this plug gives an added cushion, utilizing your recoil spring to reduce the battering your lower takes on recoil. You can install and remove the pressure plug in seconds with no tools.
K34-19533 \$7.95

California Competition Works

12 Gauge Tactical Strippers, Magazine Storage Sleeves

California Competition Works' Tactical Strippers are available in three, four or six-shell versions that allow you quick access to your shotgun reloads or specialty ammunition. Engineered to carry up to 3" magnum* shells as well as the longer European shotshells such as Eley and Sellier & Bellot. All are equipped with a stainless-steel belt clip that will accommodate up to a 2-1/4" duty belt.

**"Battery Assist
Device" for
AR-15/M16**

Developed from the experience of the MagPul® Team, the B.A.D. Lever™ is designed to improve the speed and efficiency of the AR-15/M16 by enabling the shooter to manipulate the bolt catch without moving away from the ready position.

MagPul B.A.D. Lever

M-14 Bolt Roller Greaser

So THAT's how you grease that little S.O.B. (Slick-Operating Bolt, that is.)
M-14/M1A Bolt Roller Greaser

K34-18531 **\$6.75**

CBD™-M1

The Chambersafe CBD™-M1 is a revolutionary design for firearm safety that actually blocks the chamber of the firearm. It's easy to use and extremely fast to remove. The CBD™-M1 allows for visual confirmation that a firearm is safe to handle. Applicable to all fields where firearms are used and works with many firearms.

K34-14342 **\$9.95**

74 Noveske K9 Barricade Support

The K9 was developed by the Noveske Shooting team to address the problem with shooting off, through and around non-sturdy barricades.

K34-11624 \$49.00

Emergency AR(epair) Kit

Crucial Parts for Your AR-15

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring.

K34-19460 \$19.95

Tac Latch

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/AR-10 charging handle. It works especially well for "flat-top" rifles equipped with low-mounted optics.

K34-10379 \$18.95

Jerry Miculek AR-15 Compensator

Jerry Miculek's three-chamber AR-15 Compensator fits threaded-barrel rifles and may be "clocked" for left- or right-handed shooters. Used by many top three-gun competitors.

Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards. Compact design, 30mm tube and bright illumination of the reticle are just a few of the many features of the DMS-1. Bright red illumination of the reticle adds to the quickness of the sighting system in day and low-light conditions. At one power it works well as a reflex sight and at longer ranges the four-X magnification gives increased accuracy.

K34-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

K34-11643 \$89.95

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle K34-25374 \$72.95
Scout Scope Mount for SKS Rifle K34-25373 67.95

Tactical Sports 45° Offset Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)

45° Offset Optic Mount K34-14472 \$14.99

90° C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE (Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

Ruger MK1 (pictured) K34-19535 \$79.95

Browning Buckmark K34-19534 79.95

Millett's 100% aircraft aluminum alloy mount allows you to attach your optics or accessories on a Picatinny rail while maintaining co-witness with your iron sights. For added versatility, the mounts are equipped with removable shims for 1" to 30mm tubes.

How do you make a Savage rifle even more accurate? Well, as the adage goes, you can't kill what you can't see, so you include a Nikon 3-9x40 BDC reticle scope, mounted and bore sighted. This unique reticle can be ballistically matched to your exact cartridge using Nikon "Spot On" Software. Coincidentally, the price of the New package is "Spot On" too. See your favorite Savage dealer for details.
