Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

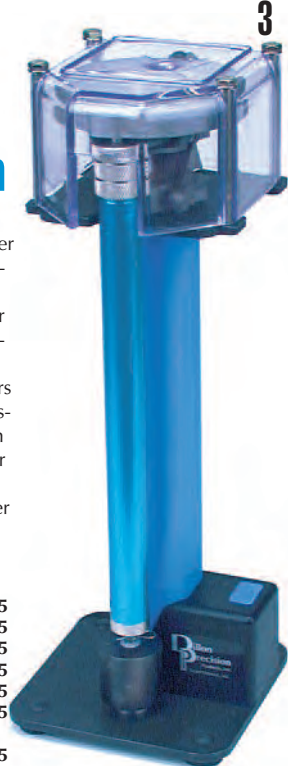

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I'm enclosing pictures of the reloading bench that I built for my new RL550B. I set it back into the bench so I would have a countertop on each side to work from. I'm almost 70 years old so I wanted a bench that I could use from a stool instead of standing. I built a riser so the finished cartridge bin is level with the countertop. I hope you find these pictures interesting.

Bruce Prater - Sandpoint, ID
Bruce, I'm experiencing a SEVERE case of reloading-bench envy right now.

I have several AR-style weapons in both 5.56 and 308. With that said it seems everyone working on new rounds for the AR platform are in reality attempting to re-invent the .30-30. So far I have not seen any new round to equal the performance of the .30-30. Another big difference is the AR platform is not nearly as handy as the Winchester and Marlin lever actions. I fail to appreciate most wildcat type rounds for the AR. An AR 5.56 with a faster twist using the 70-grain Barnes-X bullet should take pigs and deer at normal ranges with no problem. It would seem most are simply a business venture much like the rash of short, fat rounds of the last few years. Thanks for listening.

Bill Hughes - Fort Worth, TX
We agree for the most part, Bill; but in some states, it's not legal to hunt deer with the .223 cartridge. And remember, EVERY cartridge is or was a "business venture." What's different about the 7.62x40 is that it's easy to make out of cheap surplus brass and it only takes a barrel change to convert an AR-15 to shoot it.

Really liked the instinct combat shooting article. Concentrating on a VERY small point and don't be bothered by sights is exactly what our traditional archers have done for centuries.

Dave Easton - Manhattan, KS

SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

TOP BRASS

HENRY BIG BOY .44 MAGNUM/.44 SPECIAL

Reviewed by Peter Caroline

There is something very seductive about the combination of polished brass, blued steel and nicely grained walnut. And that's just part of what I like about the Henry Big Boy .44 Magnum lever-action rifle.

My first exposure to Henry centerfire guns was a .45-70 that I reviewed in the January 2014 *Blue Press*. It was an impressive thumper, quite accurate, and a comfortable gun to shoot despite its caliber. My only quibble was its blued receiver. I really would have preferred brass, but the .45-70 receiver is blued, at least for now. Some time later, I got a phone call from my old friend Doug Myres, the last of the legendary S.D. Myres Saddlery leatherbenders. "Hey, I got a gun you have to try out!" Doug's taste in guns runs to the unusual, so I got over there in a hurry. I was not disappointed. He showed me a very handsome Henry Big Boy lever-action rifle in .45 Colt, resplendent in polished brass, dark blue finished octagonal barrel and a nicely grained walnut stock. I took it to the range and, with no bench rest...just two elbows on the table, and my targets placed at 25 yards, I was quite frankly amazed at how well the gun shot. Five-shot groups were all in one ragged hole.

More recently, at Shootists Holiday at the NRA Whittington Center in Raton, NM, the folks at

Henry were demonstrating the Big Boy in .44 Magnum/.44 Special. I wanted to spend a bit more time with the gun, so I requested a sample to try out on my home grounds. When it arrived, I was quite impressed with the beautifully grained wood. In truth, every Henry I've handled has had nice walnut, but this particular one happens to be very nice.

The Henry Big Boy is made to order for Cowboy Action shooters, and is approved for SASS competition. It's available in the aforementioned .45 Colt and .44 Magnum, plus .357 Magnum. It features a 20" barrel, polished brass receiver, barrel band and buttplate, and a 10-round tubular magazine. The magazine is loaded through a port on the bottom of the magazine tube or by removing the spring-loaded inner magazine tube and dropping the cartridges directly down the spout. It's an arrangement I like better than the usual Winchester or Marlin spring-loaded trapdoor in the side of the receiver, which can be finger trap for the unwary. The open rear sight has an adjustable ramp for elevation, and the white diamond insert can be adjusted for height and/or turned over for your choice of U- or V-shaped notch. The front sight is a traditional, and very visible, gold dot. The receiver is drilled and tapped for scope mounts, if you fancy such gadgetry on your pistol-caliber lever-action rifle.

At the range, I had brought along what .44 ammo I could find locally, Winchester Supreme .44 Magnum 250-grain Partition Gold, and Ultramax .44 Special 200-grain RNFP Cowboy Action Shooting loads. The Big Boy's trigger pull was a consistent 3-1/2 pounds, and recoil was more like a .22 Hornet than a .44, even with the Magnum hunting loads and a brass buttplate. The rifle weighs 7-1/2 pounds, which helps greatly in reducing felt recoil. The traditional open sights, which I thought might pose a challenge to my aging eyesight, were clear and very easy to line up on the target. At both 25 and 50 yards, five-shot groups were nice and tight.

The Henry Big Boy would look good just hanging over the fireplace, but it's demonstrably more

than just a pretty face. It's solidly built, quite accurate and eminently suitable for successful Cowboy Action competition. With hunting ammunition, it would make a very useful woods gun. You might want to add a tube of Flitz or a rouge cloth to your usual cleaning gear, unless you prefer to build up some patina on the brass. The MSRP is \$899.95, but I've seen it retail in the low to mid-\$700s. You've heard the old expression, "They don't build 'em like they used to." Agreed...Henry builds them better.

BL 550 Dillon's Basic Loader

\$259⁹⁵

L29-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount L29-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

RL 550B ACCESSORIES

A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

L29-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **L29-20782, \$76.95 ea.**
Magnum Rifle Powder Bar **L29-21353, \$29.95 each**
X-Small Powder Bar **L29-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **L29-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

L29-20064, \$11.35 each

Three or more, **\$10.25 ea.**

X-Large Powder Die, **L29-21253, \$19.95 each**

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

L29-13909, \$22.95 each

Three or more, **\$20.95 ea.**

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

L29-22055, \$20.95 each

Three or more, **\$18.95 ea.**

G. 1" BENCH WRENCH

L29-10842, \$7.95 each

Two or more, **\$7.10 ea.**

H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol L29-14450

Small Pistol L29-14451

\$264.95 (110v US Model)

Casefeed 550, w/o Wrench Set	L29-11542	17.95
Square Deal B with Wrench Set	L29-19441	26.95
Dipped Ball-End Hex Wrenches	L29-11483	17.95
One-Inch Bench Wrench	L29-10842	7.95
Square-Deal-Only Wrench	L29-19970	8.95

Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	L29-22051	\$48.95
XL650-only	L29-22052	45.95
Square Deal "B"	L29-22223	64.95

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	L29-22214	\$41.95
RL 1050 Tray Kit	L29-22215	41.95

Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	L29-97126	\$142.95
----------------------	------------------	-----------------

Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	L29-16306	\$41.95
--	------------------	----------------

Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	L29-17950	\$45.95
Plastic Roller	L29-22183	40.95

Quick-Change Cover for use with powder measure. **L29-11143 \$14.95**

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

Dillon's Case Preparation Equipment

CV-2001
L29-20493
\$188.95

CV-750 L29-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator L29-20675 \$75.95

CM-500 Case/Media Separator L29-21045 \$47.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 L29-22047 \$213.95

Euro CV-750 L29-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **L29-13804** **\$8.95**
Case (20 pc.) **L29-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **L29-13733** **\$8.95**
Case (20 pc.) **L29-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **L29-21375** **\$135.95**

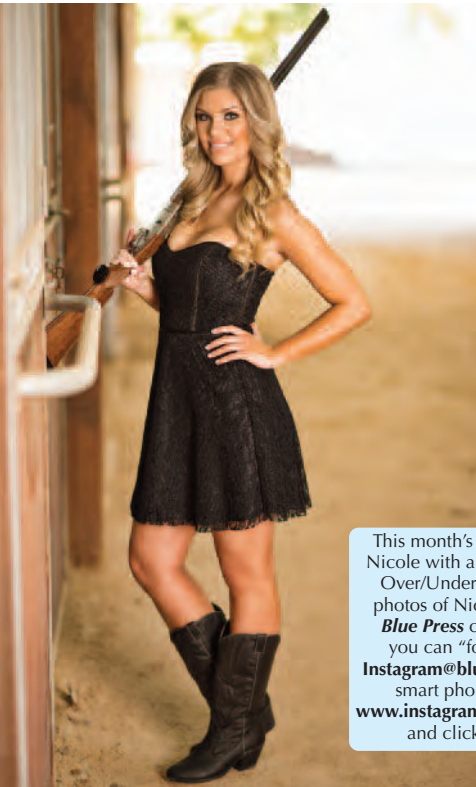

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **L29-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **L29-13496** **\$15.95**

Super 1050/RL 1050 Short Trim Die Toolhead

L29-62219
\$224.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the 1050 toolhead stand is not included.)

Dillon's New Rapid Trim 1500 Case Trimmer ²³

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **L29-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **L29-13141**, are **\$19.95** each. Upper lock rings, **L29-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Packin' Dillon's Way

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop or tablet, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, smart phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

Close & Ready Bedside Holster Caddy

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

Holster NOT Included

Dillon's Pistol Die Sets

Size Die

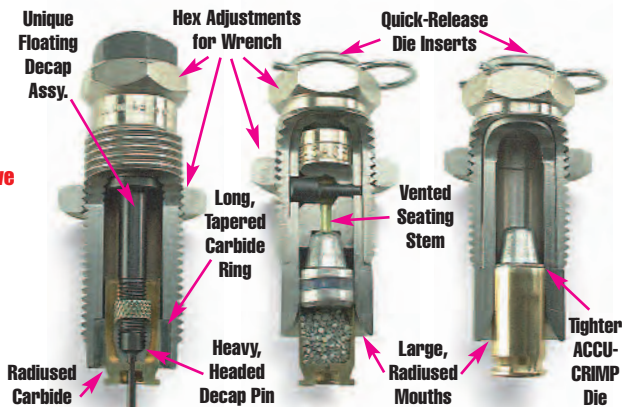

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

WHEN HOG(H

Terrell Coleman and the Chief Pilot confer planeside during hunter change out.

By Col. Mark Lisi, USA (Ret)

Last spring, while I was contemplating retirement, my wife decided I needed a gift and recommended a helicopter hog-hunting trip. I jumped on that like a duck on a June bug. I started gathering information on helicopter hunting in Texas.

Two facts jumped out at me: 1) it's expensive and 2) there are lots and lots of choices. YouTube was a good place to investigate some of these services: type of aircraft, number of shooters, and safety considerations. The more I dug, the more I kept coming back to Heli-Hunter in Ennis, Texas. So the Epic Adventure of 2015 was born. This may not be for everyone, but if you like shooting and airplanes, put this on your bucket list.

Texas recently amended its hunting regulations to allow the use of aircraft in the management of feral hogs. In the two or three years since the regulatory change, lots of "hog from helicopter" operations have started operations in Texas. The Texas hog problem is simply out of control. Smart guys suggest that 2/3 of the current Texas hog population must be killed to maintain the current population. What that really means is that however you hunt hogs in Texas, Texas has a target-rich environment.

Two issues that were of particular importance to me were cost and safety. Most helicopter hog operations operate the Robinson R44 Raven II heli-

copter. It's powerful enough to support two hunters and the pilot and it has a relatively low hourly operating cost. Aircraft safety, gun handling in and around the helicopter, and shooter safety were all very real concerns. I've never fallen out of a helicopter, but I know some who have – it's a very bad deal indeed. Much can be learned by watching videos produced and published by helicopter hog operations; almost all of these questions can be answered by watching these videos.

After my homework, I decided to contact Heli-Hunter [1041 Davis Road, Ennis, TX 75119,

Phone 844-435-4464]. Now, this is not an ad for Heli-Hunter and I paid for my seat like anyone else. Right out of the gate, I tell you hunters and shooters that it was worth the cost – save your lunch money and take this trip. I will also state that

Heli-Hunter did everything I expected them to do and the crew WORKED hard to ensure that every shooter got into good numbers of hogs.

Heli-Hunter can be seen on the Sportsman Channel. They have hosted some heavy hitters in the outdoor media world and have earned their stripes. Everyone in the company knows they are in the service business and conduct themselves accordingly. There are a lot of moving pieces in this operation and nobody just stands around. Air operations, scheduling, aircraft ground operations,

“JUSTIFYING THIS HUNT TO YOURSELF IS MUCH LIKE TRYING TO RECONCILE TAKING YOUR GRANDDAUGHTER TO DISNEYLAND.”

UNTER)S FLY!

and hog recovery. Much of this takes place behind the scenes, but it all takes place.

Heli-Hunter only hunts during the winter months, shutting down the operation with the coming of green leaves. The company flies hunters four days a week. What that really means if you want a reservation, you're too late for the balance of 2015. Booking for 2016 began in April of 2015.

The best part of this operation is the chief pilot. Heli-Hunter's Chief Pilot is a very high-time retired Army pilot who has an extensive UH-60 Blackhawk background. We found some common ground talking about folks that we knew "back in the day." John is a no-nonsense, safety centric, hog-finding machine. It was both exciting and a pleasure to fly with him.

He is the aircraft commander, and should you stray and do it your way, you will be corrected. What he really does is get the shooter right down into the treetops and set up shooting solutions for a gun that shoots well at 40 or 50 yards. Nine pellets of 00 Buckshot get pretty tired after 50 yards and are not very effective beyond that. John can wring every ounce of capability out of the Raven II. He likes it so much that he flies a Robinson R22 back and forth between his hangar and the lodge. Heli-Hunter has absolutely found the right guy for the chief pilot job. The pilot is the key cog in the event. He must know how to work the ground with the helicopter and what altitudes to hold to ensure the shooter can put a fatal load of shot on the target. The real fun I had with John was working coyotes. We killed four in a 30-minute flight – make no mistake about this, Mr. Coyote is a much more challenging target when he's on the run.

Heli-Hunter provides both the gun and ammunition as part of the price of your hunt. The ammo is 2-3/4" 00 Buckshot and the gun is a sexy number built by Firebird Precision (firebirdprecision.com). The TAC-12 A1 is an autoloading 12 gauge built on the AR platform. It starts life as an AR-15 style shotgun, the Russian American Armory Co. Akdal MKA-1919. This gun is highly modified by Firebird Precision and topped with an EOTech optic. This provides the shooter with a 12 bore self-loading gun with 10 rounds in the magazine. These guns run with little recoil. Most gun issues are a function of the charging handle banging into the aircraft frame because the shooter does not lean far enough out of

the door. I DO know something about this and once I learned to do as I was instructed, the gun ran every time I pulled the trigger. All things considered, and being the crusty old shooter I am, I asked if I could use my own gun should I return. I was told yes, and I look forward to running my Remington 1100 Tactical with a full choke. Ammunition management and reloading is very concrete in the helicopter and the extended tubular magazine on the 1100 Tactical fits right into the process. Use of your own gun is an issue that you MUST address with the ownership prior to the hunt. I must reinforce the fact that at Heli-Hunter, the gun and the ammunition are supplied as part of the cost of the hunt. Heli-Hunter hunts only with shotguns based on ground-safety protocols and agreements with the landowners.

Heli-Hunter makes an effort to gather every animal that is killed. Not every hunter wants or needs that much pork, or simply can't move that much frozen meat back home. Heli-Hunter is connected with a nonprofit that takes the hog carcasses, has them cut and wrapped and has a distribution system that gets the pork into the hands of those who are in need. Hogs for a Cause (hogsforsacause.org) is headquartered in Belton, Texas and they keep a refrigerated trailer

staged at the Heli-Hunter Lodge to support the Heli-Hunter operation.

Terrell Coleman and Craig Meier have created a first-class operation that provides access to a "once in a lifetime" event. Both men are down to earth and very approachable. They are fun fellows to just hang around with. Dare I say it, they both appear to be the same personalities that you meet in their television program. While they do not get in the helicopter with you, they are always around and approachable. Take a minute and talk to them.

They're not going to run out of hogs in Texas, but there are a finite number of hog-hunting days during the winter. I you wish to book a hunt with Heli-Hunter, you need to be on the phone. If you should hunt with Heli-Hunter, take a minute and ask Craig about his "airborne pistol shot"; it will be worth your time. This is not a hunting trip, it is cull work. It ain't fair chase, it's simply chase. Justifying this hunt to yourself is much like trying to reconcile taking your granddaughter to Disneyland – it's worth every penny!

Col. Lisi's "Ranger Buddy" Dennis with a TAC-12 A1 in front of the Robinson R22.

Comp-Tac's Trojan Horse Long Gun Case 39

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Standard Trojan Horse Long Gun Case **L29-19388 \$75.00**
 Heavy Rated Trojan Horse Gun Case **L29-16229 100.00**

ADCO SUPER

ATHUMB® offers models for popular centerfire pistols and 10/22 style magazines.

ST1 is for 9mm and .40 caliber Beretta, Browning, Ruger, SIGARMS, S&W, etc. In addition, the ST1 has interior rails and grooves to accommodate Colt Government magazines.

AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

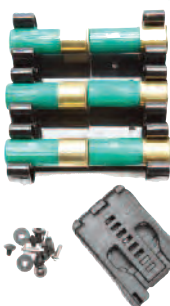

AP Custom USA's Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

TACCOM, LLC Tactical and Competition Accessories

TACCOM, LLC's Dualload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip** (included) that can be attached at various angles. The Dualload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE	L29-19530	\$9.95
4Up w/Tek-Lok™	L29-19531	29.95
6Up w/Tek-Lok™	L29-19532	34.95

TACCOM, LLC's Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holer and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder	L29-19543	\$39.95
8Up Quaload Shotshell Holder	L29-19544	69.95

CLASSIC FIREARMS: The German

By John Marshall

One of the most iconic and recognizable weapons of the World War II period was the German *Maschinenpistole* 40 (MP 40) submachine gun and its look-alike predecessor, the MP 38. These were commonly called "Schmeissers" by Allied troops, but in fact most of the development work for these guns can be attributed to someone other than Hugo Schmeisser. His main contribution was the design of the magazine for this series. In Hollywood movies, one could get the impression that almost every German soldier was armed with an MP 40, but although this arm was indeed widely issued, the Germans' main battlefield individual weapon during WWII

was the bolt-action K98k

7.92mm Mauser rifle. The features

of the MP 40, while not revolutionary, were effective enough that they were copied to some degree in the design of the British Sten and American M3/M3A1 submachine guns. The story of this highly regarded weapon is an interesting one.

In 1936, anticipating the need for a more advanced submachine gun than the WWI-era wooden-stocked MP18, the German Army tasked and funded the manufacturing firm *Erma Werke* to develop one. What resulted was a machined steel prototype called the MP 36. It was developed by Berthold Geipel. Geipel based his design on certain features originated by Heinrich Vollmer in his earlier VPM 1930 and EMP submachine guns. The MP 36 was not really suited for economical manufacture, so the German *waffenamt*, or weapons authority, put out a request for a better version. Vollmer then undertook to do that, simplifying Geipel's design and submitted a prototype. This was a blowback folding-stock 9mm Parabellum design with a 32-round magazine. It was accepted as the MP 38, and was quickly put into production. It was produced from 1938 to 1940 at *Erma Werke*.

The full-automatic-only design had a recoil spring that was fully enclosed by three telescoping tubes that served as a sort of pneumatic buffer and helped to keep dirt away from the spring. The ribbed upper receiver had a slot for the operating handle, and had a "safety slot" for the handle to enter, holding the bolt more securely to the rear. The gun had a forward-folding metal stock, and the magazine well also served as a front grip. A reinforced plastic lower section joined the upper with the aluminum lower receiver. Usually colored dark reddish brown or black, it served as a heat shield to protect the user from burns on the hands when carrying the piece. There was a long firing pin at the front of the recoil spring that protruded con-

stantly from the face of the bolt. This was in effect a replaceable substitute for a fixed firing pin. Pulling the trigger released the bolt to go forward under the pressure of the recoil spring, chamber a round, slam fire it, and continue to do so until the trigger was released or the magazine emptied. A plastic or metal "resting bar" with a forward projection ran the lower length of the barrel. Its purpose was to keep the muzzle from pulling back from armored vehicle ports or edges, thus helping to prevent inadvertent firing while inside the vehicle. The grip panels were plastic. A two-leaf notched rear sight worked with a hooded front sight. The muzzle was threaded for accessories and had a screw-on protector.

The MP 38 was not without its problems, and some needed improvements were made. For one thing, if the bolt was forward on an empty chamber and a loaded magazine was inserted, dropping the gun could cause the heavy bolt to drop back behind the magazine under inertia and against spring pressure. It would then go forward, stripping a round from the magazine into the chamber and firing it. This was not conducive to the health of the user. A field expedient was the issuance of a leather harness with a small loop that could be wrapped around the bolt handle to keep the bolt in the forward position. Later MP 38s had the bolt handle as a separate part, which could be pushed into one of two notches in the raceway to lock the bolt either forward or back.

Soon, the product-improved MP 40 was adopted. It dispensed with the machined grooved upper receiver, substituting a simpler stamped and formed part. A large hole in the magazine housing was eliminated. This space was replaced by stamped ribs. The formerly aluminum rear grip frame was now stamped from steel and formed. The steel middle section of the telescoping spring tube was drawn and pinched. A new extractor and magazine release assembly was fitted. There were other minor improvements. These things saved some weight and reduced production time and cost. A common problem with both the MP 38 and the MP 40 was that soldiers often grabbed the magazine itself as a forward grip, pulling it out of correct

Man MP 40 Submachine Gun

alignment and causing misfeeds. The Germans quickly instructed their troops to grasp only the magazine well, not the magazine itself. A problem that was never solved was that although the magazine was a double-stack type, it had a single point feed arrangement. The traffic jam of rounds meeting there and the additional friction that system caused did not make for reliability. Users often loaded the magazine with 30 or 28 rounds rather than 32 to lessen the increased friction inherent in a fully-loaded mag. Unfortunately, the British Sten and the U.S. M3/M3A1 subguns copied this arrangement instead of using

tice, one can tap off single shots. The effective range was about 80 yards.

During the war 40,576 MP 38s and 869,792 MP 40s were produced. The prime manufacturers were *Erma Werke*, *Steyr*, *Haenel*, and *Erfurter Maschinenfabrik B. Geipel GmbH*. Although the arm was ideally suited for the *fallschirmjaegers* (paratroopers) of the *Luftwaffe*, it was also initially issued to squad and platoon leaders in the *Wehrmacht* and the *Waffen SS*. By the war's end it was widely distributed through all the services and issued to nearly all ranks.

Noticing that the Russians on Germany's eastern front were using PPSH 41 sub-

machine guns with 71-round drum magazines, a variation of the MP 40 was made that could use 64 rounds contained in two side-by-side 32-round magazines. These could be individually selected in a side-sliding mount.

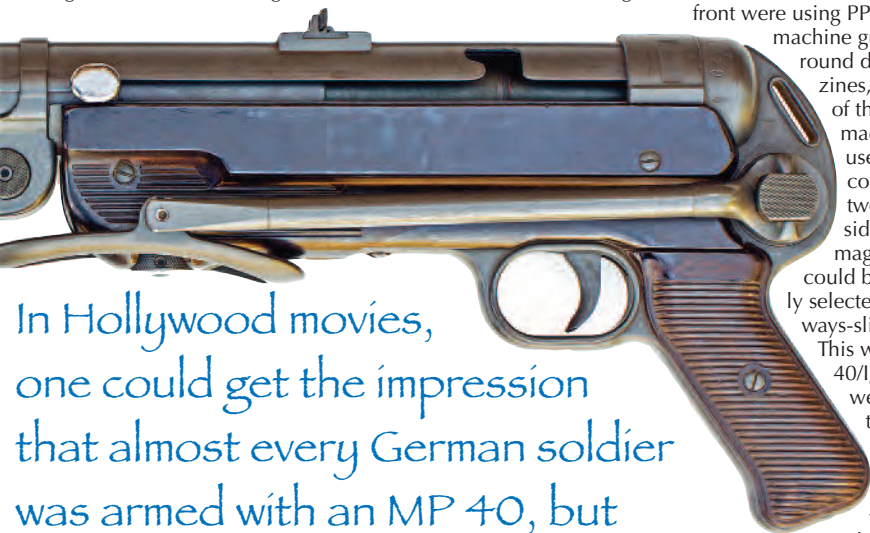

This was the MP 40/1, and its weight was thereby increased by a little over a pound. A wood-

stocked selective-fire version was designed by Hugo Schmeisser for *Haenel*, and was designated as the MP 41. In 1944, efforts began to replace both the MP 40 and K98k rifle with the selective-fire MP44/StG 44 *Sturm-*

gewehr assault rifle, which used an intermediate-power rifle cartridge. Unfortunately for the Germans, this revolutionary and effective arm never achieved full production before the war was over.

After the war, captured MP 40s were often distributed by the Allies to developing countries, and were used in Greece, Israel, Korea, and Vietnam. The Norwegian Army used them from 1945 to about 1970, and their Home Guard issued them until the early 1990s. Some are still encountered around the world in various conflicts.

The MP 40, while imperfect, was still a formidable submachine gun, and was highly respected during WWII. It was, and is, a classic weapon of that war.

In Hollywood movies, one could get the impression that almost every German soldier was armed with an MP 40, but although this arm was indeed widely issued, the Germans' main individual weapon was the K98k Mauser rifle.

the well-thought-out Thompson SMG-type magazine which reliably fed its double-stack rounds alternately from one side and then the other.

The MP 40 weighed about 8.8 pounds empty, had a barrel length of 9.9 inches, and measured 32.8 inches with the folding stock extended. Folded, it taped out at a compact 24.8 inches. Its rate of fire was from 500 to 550 rounds per minute. Muzzle velocity varied with the 9mm ammunition, but was in the 1250 to 1300 fps range. I have had the opportunity to fire the one illustrated a few years ago, made by Haenel (located in Suhl), in 1942. It had little recoil, and was as easy to fire as spraying a garden hose. I was quite impressed with it. Although the arm is full automatic only, with prac-

46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

L29-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

L29-21894

\$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

ROCK'N ROLL IS HERE TO STAY

Gletcher M712 .177/4.5mm CO₂ Pistol

Reviewed by Peter Caroline

At age 10, I had a Daisy Golden Eagle BB gun, several Hubley cap pistols and a Japanese knee mortar that someone had brought back from the Pacific. But my real interest in guns began with a visit to our local public library. There was a small World War I exhibit, and inside a glass case was an assortment of period insignia and medals, a Prussian spiked helmet and, best of all, a big black pistol, inscribed on the side "WAFFENFABRIK

MAUSER/OBERNDORF A. NECKAR." It was the first C96 Mauser Broomhandle that I'd ever laid eyes on, and it was love at first sight. I had never before (or since) seen anything so beautiful in its utter nastiness.

For years, I lusted after that gun, but it was not the sort of thing that my liberal parents were likely to subsidize. It wasn't until I was 18 and working on a construction project in Bangor, Maine, that I was finally able to purchase this object of desire. I spotted a very worn Broomhandle in a local gun shop and, after three weeks of layaway payments, was able to pony up the required total of \$35. Firing it for the first time was a thrill, but a mixed blessing. It had an impressive muzzle blast, but the ergonomics were not conducive to much practice, particularly to someone accustomed to .22 LR.

I've had a number of Broomhandles since then... a mint commercial 1930, several Bolos and Red 9s, a Chinese Shansei Arsenal .45 ACP and, very briefly, a Model 712 Schnellfeuer, which on full-auto would empty a 20-round magazine in one second flat... very dramatic, but uncontrollable.

Today, a Broomhandle of any description, in decent condition, will fetch stupid prices. My current Shansei .45, in its Mysterious Eastern fashion, works when it feels like it. So, I haven't been actively seeking new specimens. But at the 2015 SHOT Show, I happened to spot a brand-new iteration of my old love at the Gletcher/SMG booth. The Gletcher M712 is a faithful copy of Mauser's 1932 Model 712 Schnellfeuer pistol, right down to the working Westinger-patent selector mechanism. Like the original, the Gletcher is of all-metal construction, weighing a bit over 3 pounds unloaded, actually slightly heavier than the original. Unlike the original, which is chambered for the bottlenecked 7.63x25mm Mauser cartridge, the Gletcher M712 is CO₂ powered, and fires standard steel .177/4.5mm BBs. This

is not only economical, but also very nice if you might enjoy some backyard selective-fire, without upsetting the neighbors or the ATF.

Of course, I had to tell my friends at the Dillon booth about this new treasure, and they responded with great enthusiasm (translation: "You're a sick puppy!"). After the Show, I requested a sample for Test & Evaluation. When the gun arrived, I removed the "magazine," which holds a CO₂ cartridge and a spring-loaded magazine that accom-

modates 18 BBs. On my back patio, I set up a paper target on a cardboard liquor case and, from a sandbag on my patio table, fired five rounds, semiautomatic, at five yards. All five shots stayed in the 1" ten ring, decent minute-of-pigeon accuracy for an unrifled barrel, and went completely

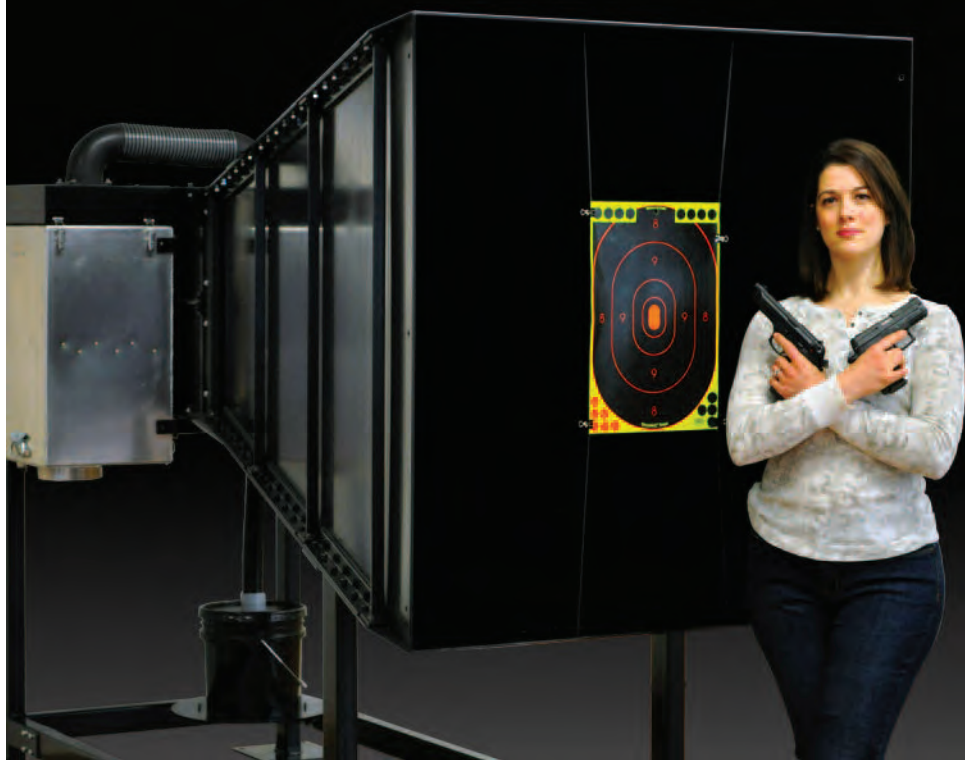

through the box. Switched to full-auto, the group opened up, as might be expected. The bolt reciprocates, just like the original, with each shot. The rear sight is adjustable for elevation, and is optically graduated from 50 to 1,000 meters. Average velocity is advertised at 361 fps, and the BBs will completely pass through an empty beer can. Trigger pull is a consistent five pounds in both semi- and full-auto. Full-auto, by the way, can be addictive. It takes approximately two seconds to empty a full 18-round magazine, which would amount to a cyclic rate of 540 rounds per minute, less than half that of the original. Tons o'fun!

Granted, I am a Broomhandle addict, but whatever your firearms preferences, this one's a keeper. To sum up, a near-exact replica in terms of dimensions, weight, fire controls, sights, safety, (imitation) wood grips, etc. Add the advantages of non-gun status, low-cost operation and freedom from NFA regulation, and a \$179.95 pricetag, about 1.3 percent of the original...we definitely have a winner here. The gun even has the appropriate grip slot for a holster stock, which I hope will be offered in the near future.

P.S. Gletcher also offers an intriguing selection of CO₂-powered replicas of such items as Lugers, Tokarevs, UZIs, SIGs, Stechkins, Makarovs and other semiautos and revolvers.

RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring

Sun Devil Mfg. AR-15/10 ADIGS

Sun Devil Manufacturing's Adjustable Drop In Gas System for AR-15 and AR-10 rifles allows you to adjust your rifle's gas system for best performance.

L29-19674 \$59.95

EGW AR-15 Forward Assist Plug

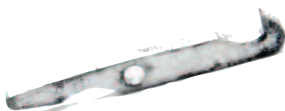

Evolution Gun Works' AR-15 Forward Assist Plug is for use on competition rifles that do not use the forward assist. It's anodized for long life, matted to match most uppers.

L29-18991 \$9.99

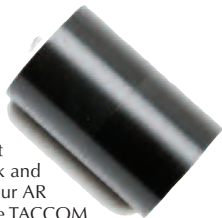

TACCOM's Enhanced Firing Pin for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

L29-19538 \$13.95

The TACCOM Extreme Extractor is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

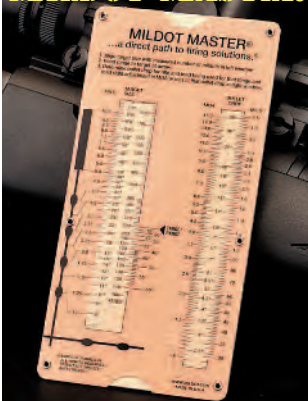

L29-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The TACCOM Pressure Plug will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

L29-19533 \$7.95

Compact Carry Pistol: N

A Glock 19 carried in a Mitch Rosen holster, with a double mag pouch from the same maker, would be right at home in IDPA's new Compact Carry Pistol division.

By Duane Thomas

Recently I watched an entertaining podcast on YouTube, the eighth installment of USPSA Grand Master/IDPA Master Ben Stoeger's *Practical Pistol Show* where one of his guests, Caleb Giddings, said he thought the great "hider division" of 2015 would be to shoot in IDPA's new Compact Carry Pistol (CCP) division with a Glock 19. I offer my own thoughts here simply in the spirit of discussion, not that I'm slamming Caleb, but I profoundly disagree with that idea, for the following reasons:

For those of you who don't recognize the term, a "hider division" is a division of competition in a particular shooting sport that isn't very popular, and is not competed in by very many good shooters. Therefore, if you are a good shooter, and you care more about

winning than pitting yourself against real competition, you can shoot that division, knowing you're going to win. Not to put down revolver shooters, but in both USPSA and IDPA, historically the great hider approach has been to shoot a revolver. Yes, I am well aware there are some great revolver shooters in the world. I have also seen great auto pistol shooters decide to run a revolver in IDPA for a few matches before a state championship, and at the state match itself, knowing that would be an easy way for them to become an IDPA state champion. Most places, the level of skilled competition with a revolver simply isn't there.

IDPA CCP Division + Glock 19 = LOUSY Place to Hide!

Now, let's consider the idea of "IDPA CCP as hider division." Admittedly I'm staring into my crystal ball here, while simultaneously attempting nationwide mind reading, but I believe that many people are going to perceive CCP as being "what IDPA should have always been, competing with real carry guns." I don't totally agree with that, for numerous reasons, but still I predict that (a) CCP will swiftly become the most popular division in IDPA, (b) the Glock 19 will swiftly become the most popular gun in CCP. So the guy thinking he's going to "hide" in CCP with his Glock 19 is going to be GROSSLY disappointed.

I do understand what Caleb meant by "with a Glock 19." The G19 is a ridiculously easy gun to shoot fast and well, especially for such a small, light piece firing a full service cartridge. If you want to do well in CCP, you could do a lot worse than to choose a G19 as your match gun. My friend Jon Stein has commented he considers the G19 "a veritable little sports car of a gun," and I can't argue with that. So, yes, in CCP, in my opinion, the G19 would be the smart choice. Thing is, the desirability of G19 shooting qualities is something that a HUGE number of gun carriers already figured out decades ago.

I mean, really, folks, Glocks are by far the most popular choice among serious gun carriers, and also by far the most popular choice among IDPA shooters. The joke is that IDPA's Stock Service Pistol division should be renamed the Glock Service

OT a Good Place to Hide

Pistol division, so popular is the Glock in SSP. And among Glocks, the Model 19 is far and away the most popular concealed carry gun. So, let's see: the most popular gun type in IDPA, combined with the most popular carry gun in the Glock catalog, equals...a great place to hide? I'm thinking, no.

Of course, this is the attitude of a guy who's planning on shooting CCP with a Glock 19 this year. And I ain't doing it to hide. I'm doing it because (a) I can shoot a Glock 19 better than any other Glock, better than a 17, better than a 34, there's just something about the Model 19, how it fits my hand, how it points for me, how it recoils, that has always worked really well for me, (b) this is where the real heat, the real movement, is going to be in IDPA for at least the next few years.

The existence of IDPA has already put paid to some treasured myths. Look at the whole idea of "a 1911's short, light, consistent, single action trigger pull gives it a great advantage over DA/SA trigger actions, or the short DAO trigger systems like the Glock." But in IDPA, for the first time, we had really great shooters using DA/SA or DAO guns going head-to-head against other really great shooters armed with SAO guns. And (gasp, shock) the expected difference in shooting performance failed to materialize. Because it's the

shooter, how hard they've practiced, how grooved-in they are on their equipment, how well that particular equipment suits them, that matters, not that one sort of trigger system gives an insurmountable edge over all others. IDPA has acknowledged that fact with their recently updated classifier standards, where the great gap between what it takes to make rank in SSP (where SAO guns are illegal), and what takes to make rank in ESP/CDP (where they're allowed) was largely closed up.

I predict the next great myth to gum the big one will be that full-sized guns are hugely easier to shoot than middleweights (a term I use to describe guns that are essentially cut-down versions of larger service pistols, the modern classic example of which would be the Glock 19 being basically a cut-down Glock 17). Because, for the first time, we will have really great shooters armed with middleweights competing against other really great shooters armed with full-sized service pistols. And the truth will be out.

IDPA Compact Carry Pistol division + Glock 19 = a LOUSY place to hide. If you disagree with me, or even if you don't, all I have to say is, my Glock 19 and I will see you on the range.

Extra Loading Data Labels, L29-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

"SL 900" Bin	L29-17125	10.50	56.94	106.92

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Sweet's Australian

7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

L29-13128	\$12.95
-----------	---------

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	L29-15571	\$7.95
Slide-Glide Lite	L29-15572	7.95

Micron UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ L29-11313 \$19.95

Bore-tips® Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

*Sand not included.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

L29-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

L29-15384 \$29.95

TARAN TACTICAL INNOVATIONS

The **TTI Magazine Extension** for MagPul AR-15 5.56 PMAGs is constructed of machined aluminum.

L29-15770 \$39.99

The **TTI Benelli Extended AccuGuide Carrier** is the first extended carrier ever manufactured from one solid piece of SAE 304 Stainless Steel, which eliminates the need for welding. It is heat-treated and polished, providing optimal performance. The Carrier features an extended guided rail on each side to assist in centering the round while reloading. It will provide you the speed and comfort of not having your thumb torn up after reloading. Compatible with: Benelli M1/M2/M3/SBE, Versamax.

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Winchester Pump .22s:

By **Brian Dervin Dillon, Ph.D.**

In the late 1950s, when we youngsters complained of boredom, the old folks would say: “*You kids these days are so spoiled! Why, when we were your age all we had to do was go down to the dump and shoot rats!*”

This statement backfired, because few things sounded like more fun to five-year-olds than stalking rodents with .22s down at the town dump. The family rat-killer was a venerable old Winchester Model 1906 .22 Long Rifle pump. Everybody called this gun *The Old Trombone*. One of the most familiar firearms of recent American history, almost two million of these very reliable little rifles – in four different model variants – were made. For 95 out of every 100 American kids, over three-quarters of a century, the old

Winchester *Trombone* was the first repeating rifle ever shot, usually at county fairs, carnivals, or local “shooting galleries.” Since many were chambered only for the little .22 Short cartridge, and intended for shooting indoors, the Winchester pump was also commonly known as the “gallery gun.”

The Model 1906 Winchester’s immediate ancestor was the Model 1890, a pump-action gun with exposed hammer chambered for the old, black-powder rimfire rounds in .22 Short, .22 Long, .22 Long Rifle and .22 Winchester Rim Fire. It got off to a slow start, possibly because of its high price, \$16, three times the cost of a contemporary single-shot .22. Over time, however, its price came down, and the old gun could chamber the new, smokeless, .22 cartridges that became available around the turn of the century. A takedown version with an improved rear sight, now adjustable for elevation, was offered in 1892. The old Model 1890 stayed in the lineup until 1941, actually longer than its later-appearing younger brother the Model 1906. The older

model also beat the newer one in sales, too – over 750,000 in all.

The little Model 1906 pump rifle was designed for the new smokeless rounds from the get-go. Externally, it was almost indistinguishable from the Model 1890, but for its flat butt in comparison with its predecessor’s curved one. The Winchester ‘06 was a hit right from the start, and it was priced right, at just over 10 bucks. Over 50,000 were sold during its first year of production. For the first two years, the model 1906 was chambered only in the .22 Short, also then commonly called the .22 Pistol cartridge. These earliest rifles were mostly sold to shooting galleries or to young families as “junior’s first gun.” Then, beginning in 1908, the Model ‘06 was chambered in .22 Long Rifle as well, and sales really took off. The new chambering

allowed these guns to shoot all three forms of .22 ammo: short, long and long rifle. More than 400,000 were sold by 1914. Model 1906 “gallery guns” in .22 Short (only) continued to be made for the niche market they had dominated from the outset. By the time the

Bringing home the bacon with a Winchester Trombone. The author with three Maya Indian friends and dinner – a collared peccary – in 1977. A very beat-up Model 62 .22 LR takedown pump, evolved from the earlier 1890 and 1906 Models, was his Central American archaeological field camp rifle for more than a year.

1906 Winchester pump was discontinued in 1935, more than 700,000 had been produced.

Unfortunately, after World War I, the Winchester Company went off the rails, going completely nuts. Trading on its good name and consumer loyalty, it tried to expand into every possible market, from hand tools, paint, iceboxes to even baseball gloves. The sales pitch now was “as good as the gun” but the results were predictable, once too many buttoned-down Eastern types came to dominate a company originally built upon quality firearms mostly sold out West. The boardroom brigade drove the company farther and farther away from its roots, and shooters who previously were Winchester loyalists now believed that the company “was getting out of the gun business.” To a certain extent, they were correct. For reasons

“The Old Trombone” 79

still not clear, at least to this writer, by the early 1930s Winchester decided that their strong-selling Model 1906 .22 pump should be superseded by a hammerless design, so they brought out the Model 61 Hammerless .22 Pump in 1933. The Model 61 .22 repeater quickly gained a reputation for being very dangerous in the hands of young shooters, obviously its target market. After all, with no exposed hammer, a neophyte could not easily tell if his gun was cocked or not. A whole generation began to put these guns away loaded and cocked, only to later have the live rounds in their chambers go off when least expected, most often while cleaning them indoors. In 1940, the Model 61 sold for \$25.00. It was made until 1963, with just over 340,000 produced over its 30-plus-year run.

The fourth Winchester .22 pump, and the third hammer gun, also was introduced that same year of 1933: it was designated the Model 62. Its 23-inch barrel was an inch shorter than the Model 61 hammerless, but still looked longer in relation to its tubular magazine than the earlier Model 1890 and 1906. The Model 62 was easily distinguished from its older brothers, by its very long forepiece or slide grip, now a third longer than before. It sold for \$18.00 in 1940, and was finally discontinued in 1959; after all three hammer trombone models had been made for nearly seventy years. Adding the 400,000+ Model 62s to the earlier runs, nearly two million Winchester hammer *Trombones* were made in all. Why four very similar Winchester pump .22s (Models 1890, 1906, 61 and 62) were marketed simultaneously in competition with each other (not to mention with the products of other gunmakers) as our country slid into the Great Depression has never been explained to anybody's satisfaction. The decision was probably made by the Winchester golf club or lawnmower division, not by the last few old-fashioned, stick-in-the-mud folks now sidelined in the company's firearms division.

Collectors stay away from the old gallery guns, for most were completely “shot out,” turned into smoothbores, from the hundreds of thousands of rounds fired through them and all but destroyed from daily abuse by ham-fisted, first-time shooters. Not a few eager, but incautious, collectors have bought old Winchester *Trombones* only to jam them repeatedly, the first time out. Most have unwittingly purchased a .22 Short *ONLY* version and have loaded .22 Long Rifle cartridges into it: they soon realize that a size ten foot into a size six shoe will not go.

Nearly 40 years ago, while running a long-term archaeological field camp in Central America, I was given one of these little rifles, a Model 62 .22LR breakdown variant. On loan from oil prospectors, it had already seen jungle service in one temporary field camp after another for more than 20 years. Not one microscopic trace of origi-

nal bluing remained on the old gun, and at some earlier time it had been squibbed repeatedly until the end of its barrel split. So, the shade-tree fix had been to hacksaw off the last few inches of the barrel, close the tail end of the crack with a brazing rod, re-crown the muzzle with a lap stone, then braze in a new front sight, cut from kitchen pot metal, onto the foreshortened barrel. The re-incarnated rifle shot true, and its action was absolutely reliable. I was very grateful to have it at a time and in a place where guns of any kind were so rare as to be almost nonexistent.

I had been shooting .22 rifles since I was 8 years old; now my new Maya Indian friends taught me to hunt with one. They still took deer by running them down with dogs and machetes, so to them, a .22 repeating rifle was a technological advantage of supersonic proportions. Their favorite saying when we were out with the old *Trombone* was “one is all you need.” Still words to live by. Forty years ago in Central America a box of 50 .22LR cartridges, when you could find one, cost you \$5.00 American. In the 'States, the same box of ammo would have been sixty-nine cents. So, you made every shot count – you couldn't afford not to. My old *Trombone* could hold 15 .22 Long Rifle rounds in its underbarrel loading tube, or 18 .22 Longs, or 22 of the little .22 Short pistol cartridges, which only cost \$3.50 per box, an entire day's wages at the time. Serious shooters, defined as those who hit their targets more often than they missed them, left camp with only those rounds already in the tubular magazine, additional ones being an unnecessary, wasteful, extravagance.

My digs were an abandoned oil camp, rapidly being overtaken by the jungle. My nearest human neighbors were 32 kilometers downriver by boat. At night, jaguars walked through camp, their paw-prints visible in the mud the next morning. By daylight you could spot, and sometimes shoot, white-tailed deer grazing in my “front yard” right through the mosquito netting covering my “windows.” Long ago, and far away, and not in this jurisdiction, I killed everything that ran, flew, crawled, burrowed or even, sometimes, swam with my old Winchester *Trombone*. Deer, both white tailed and brocket, collared and white-lipped peccaries, armadillos, iguanas, big boa constrictors, turkeys, guans, tinamous, currasows, chachalacas, and doves, and, on occasion, channel catfish and alligator gars, fell to the versatile old *Trombone*. In Central America at the time, getting caught with a gun of any kind, even a little .22, sometimes was enough to earn you a bullet. So, greatly appreciated was the little Winchester's concealability. Takedown models had the large, projecting, knurled and grooved knob on the side; if you couldn't muscle it loose with thumb and forefinger, you could always do so with a quarter standing in as a broad-tipped screwdriver, for that

80 is what the knob was milled to receive. When confronted with roadblocks, river inspection points, or approaching bodies of not readily identifiable men, any of which could either be military or guerilla, I broke the little rifle down into its two parts, stuffed the stock down one pants leg, the barrel and action down the other, and shuffled through the barricade or floated past the inspection point, unimpeded.

For more than a year I carried this ancient rifle every day, rain or shine. It put the meat in our oil-drum smoker and on our table, and fed my entire field crew. Big animals, deer and pig, were killed with .22 Long Rifle cartridges, birds and fish with .22 Shorts. If you went out after birds, but encountered a deer or a pig instead, you were stuck with the little .22 Shorts in the tube and had to emphasize accuracy over knockdown power. I am not the only person who has killed deer with a .22 Short cartridge fired from a Winchester *Trombone*, but one of the very few to have done so legally. This was with a single head shot after stepping out of my back door, going for turkey but finding deer instead. I ate the entire backstrap, almost raw, by myself while butchering the rest of this deer. My most convenient kill ever, it was made only 50 feet from my kitchen fire, still burning from breakfast. I came nose-to-nose with jaguars twice, and with ocelots on numerous occasions. The *Law of the Jungle* prevailed; my fellow predators got a salute, not a bullet, for I only killed to eat. With one important exception: *Fer de lance* (*Bothrops Atrax*) the deadliest snake of the American tropics, I always shot on sight. Known everywhere as the *Barba Amarilla*, or "yellow beard" because of its light-colored lower jaw, the local Kekchi Maya name for this snake was *Icbolai*. In my rain-forest home these mankillers were as abundant as they were aggressive. Territorial, they never meekly slithered off if you "walked on their grass," invading their turf, but came at you instead, motivated by sheer cussedness.

Mature *Icbolai* were often over six feet in length, and eight-footers were not unknown. Since they could strike half as high as their body length, foot and ankle protection was of little use against them. Triple-threat snakes, they both swam and climbed trees. They could come up over the gunwhale of your dugout canoe out on the river or drop down onto you from branches while you were cutting trails. Worse, their venom contains both a neurotoxin and a hemotoxin, as lethal to ivory-tower intellectuals as it is to quasi-neanderthal football players. I had the misfortune to be present on three occasions when people were bitten by *Icbolai*; two died, but the third victim, at least in part through my help, survived. The ancient Maya god of the mountains, the rivers, the wind, rain and the jungle was said to sleep underground in a cave; he was so powerful that his hammock was made of interwoven *Icbolai*. My Maya friends believed that every part of the snake was poisonous, so we never ate them after shooting them.

The ubiquitous boa constrictors, however, were another matter. Big boas usually provided a good return of edible meat for the investment of a single .22 Short cartridge. Head-shot boas were only slowed down by the little .22 bullets, but enough so that you could finish the job with your machete. Boas get high marks for persistence: I recall many happy hours trudging down jungle trails with freshly killed, decapitated boas. These snakes would coil themselves around me, trying to break the bones in my arm more than an hour after head removal. I am still frequently asked if large terrestrial reptiles, such as boas and iguanas, "taste like chicken" or not. My answer is, and always has been, no, the only thing that tastes like chicken is chicken itself. Boa constrictor tastes like a cross between fish and a rubber truck tire, but even a truck tire becomes appetizing – after the application of enough *chile* – if you are hungry enough.

I am also one of the very few people to have shot fish with a .22 *Trombone* on a regular basis. "Chumming" narrow tributaries to the largest river in tropical Central America attracted big channel catfish, up to 75 pounds weight, and alligator gars, often over four feet in length. Once we had enough of these monsters in our stream to make it worth our while, we quickly blocked it off downstream with stakes driven into its muddy bed, too narrowly spaced for the fish to escape through, then dropped a log into it, damming it and lowering the downstream water level enough to expose the now half-grounded fish. .22 head shots started the big channel cats on their path towards the dinner table, but, like *Mongo* in Mel Brooks' classic *Blazing Saddles*, shooting alligator gars in the head just made them madder than they already were. Multiple .22 head shots, however, eventually slowed them down enough for a camp-axe *coup de grace*. Not quite shooting fish in a barrel, but close. Once you've shot fish, you'll never go back to hook and line.

Sadly, Winchester's lawnmower division finally triumphed over its firearms division, and the company did indeed get out of the small rifle business. Their wonderful old .22 pump design, after so many American-made Model 1890, 1906, and 62s had been sold, dried up and blew away, never to return. Only a distant echo of it remains today in the Rossi Model 62, a copy by the Brazilian company with the Italian name. This new rifle frequently shows up on ranges in the hands of youngsters, our next generation of shooters. Grandpas and sometimes even great-grandpas walking past do double-takes, until they realize that these are different guns from their old childhood favorite, the *Trombone* they knew and loved 50, 60, or even more years ago.

I never made it to my hometown dump to shoot rats with the Dillon family .22 Winchester pump. But, down in Central America, my own old *Trombone* lives on, cared for by the kids and soon, by the grandkids, of the same Indians who taught me to hunt with it so long ago.

Phalanx Defense Systems Stealth Operator™ Multi-Fit Holsters ⁸¹

The Stealth Operator Holster is a lightweight, low-profile holster developed to provide low-print, maximum concealment. It features patent-pending Frame-Lock™ technology, which ensures positive retention.

UM Tactical Universal Sight Mount and Holster System

UM Tactical has created a universal sight mount that will fit all pistols with a 1913 picatinny rail. Although many sight mounts exist, what makes the unit produced by UM Tactical unique, is that it will mount and dismount from your firearm in under 30 seconds with no tools or gunsmithing. Once set up with your favorite scope or red dot sight, the mount and optic can be taken on and off your firearm and still hold the zero. This high quality mount is constructed from CNC machined aluminum and is finished in Mil-Spec Type III anodizing.

UM Tactical's UMH3 Universal Holster attaches to the UM3 sight mount and not your handgun. This unique design is hand made and is constructed of thermoformed plastic (Boltaron).

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics. The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll. The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*
