THE RUGER® LC9s®

LIGHTWEIGHT AND COMPACT PERSONAL PROTECTION

Striker-Fired with Short, Light, Crisp Trigger Pull

Includes Finger Grip Extension Floorplate

Just Slightly Larger (Less than 1" Taller and 1" Longer) than the Popular and Incredibly Compact LCP®

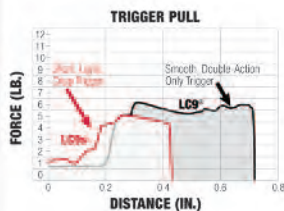

STRIKER-FIRED, CENTERFIRE PISTOL

Dovetailed, High-Visibility Three-Dot Sight System with Drift Adjustable Rear Sight and Fixed Front Sight

LC9s® Pro Comes Without External Safety and Magazine Disconnect

Trigger Pull Comparison

The all new, striker-fired Ruger® LC9s® and LC9s® Pro feature a short, light, crisp trigger pull for faster shooting and improved accuracy. The LC9s® and LC9s® Pro provide slim, lightweight and compact personal protection with a blued, alloy steel slide, a high-performance, glass-filled nylon grip frame, aggressive checkering and an easily acquired three-dot sight system. Both models are just slightly larger (less than 1" taller and 1" longer) than the popular and incredibly compact LCP®.

Dillon's RF 100 Automatic Primer Filler

***Eliminates the need
for primer pick-up tubes!***

***Fills the primer tube
while you reload!***

***Clear polycarbonate shield
and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I purchased a Dillon Square Deal "B" in 2013. With all the extra items I had purchased with the machine it came to nearly \$800. I wasn't sure that I'd ever recoup my money by reloading. However after 15,000 rounds I have more than recovered my money. I have to thank your people for all the help they give me with problems with the press due to this being my first unit. I have heard other people don't like the Square Deal "B" however I find it easy to use now that I have learned a little bit about reloading. I think that the press is easy to use and I have five- and six-year-old grandsons who now think they're masters at reloading. Just recently I had a problem with the primer that slides back and forth after all the use. All it needed was a little adjustment, with which your people helped me. I can't tell you how good it is to deal with a company willing to support their product both with parts and technical support. Thank you.

Glen Burr - Kearns, Utah

I've read with great interest the discussion on the development of the Weaver stance in *The Blue Press*. Col. Cooper's left arm position seems to have been at the center of it all and I'd like to add one observation. I seem to have read somewhere that Col. Cooper was "cross-eye dominant." Photos of him shooting seem to confirm this and I noticed in a videotaped interview of him shortly before his death that his right eye seemed closed and unused. He looked at the interviewer out of his left eye. I noticed that when I attempt to aim with my left eye (I'm not cross-eye dominant), I have to bend my left elbow sharply downward to bring the sights in line with my left eye so that I don't have to move my head to an unnatural position to see the sights. Interestingly, this issue was never discussed in the articles by Weaver, Thomas and others.

Which Dillon is Right for YOU?

Page 8

SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

G.I. or NOT G.I., THAT IS THE QUESTION

The Ruger 9mm American Pistol

Reviewed by Peter Caroline

Some years after I got my discharge from the Army, the Department of Defense changed its official sidearm from the .45 caliber 1911A1 to the 9mm Beretta. They didn't ask me, but I guess it was because everyone else in NATO was using a 9mm handgun, or maybe they just got bored. Anyway, every few years after that, the DOD would start making noises about looking for the Latest New Thing. This is actually a good thing, because it provides firearms manufacturers with an incentive to develop improved, hopefully military-grade, handguns. So far, it's been like Lucy constantly snatching away Charlie Brown's football, but hope springs eternal, and we in the civilian firearms market have the benefit of new and better choices.

One of the most recent developments is the new Ruger American Pistol line, recently introduced in both 9mm and .45 ACP. They sent me a 9mm version to check out and, despite my long-standing attachment to all things 1911, I find it very appealing.

My first impression was, this is a bit of a hoss... in both overall size and weight. Actually, both in overall size and weight, it's almost identical to Ruger's Commander-size lightweight SR1911. The Ruger American Pistol is intended for use as a duty pistol for military or law enforcement, or as a house gun; concealed carry does not really fit into the picture. It came from the factory with three grip inserts; I found the smallest of the three was the best fit for my hand. All three grip options include a molded-in lanyard loop, a handy holdover from the horse cavalry days.

There is no manual safety or (thank God!) magazine disconnect safety, although these features may appear on a later version for sale in jurisdictions that require such things. There is a Glockish trigger safety, which is more than adequate for those of us who observe Rule 3. Trigger pull is right around 6 lbs. and quite manageable. There's even a neat little over-travel stop in the aft portion of the trigger guard.

Controls are very simple. Both the magazine release and the slide lock are ambidextrous, and

the takedown lever is on the left-hand side. And, speaking of takedown, this is just about the simplest system I've ever run into. First, remove the magazine, make sure the chamber is empty (Duhl!) and lock the slide back. Then, you rotate the takedown lever clockwise 90 degrees, pull the slide back to drop the slide lock, and move the slide forward slowly to remove the slide and barrel from the frame. You can then pop out the recoil spring and guide rod from the barrel, and then remove the barrel itself. Ruger does not recommend any further disassembly, however, what I would refer to as the "guts," i.e. the fire control system and rails, are in a single, serial-numbered unit that is held in place in the glass-filled nylon polymer frame by the takedown lever.

Shooting the Ruger American Pistol is a very satisfying experience. The 17-round, Teflon-coated magazine springs out vigorously when you push the button. The magazine has witness holes from 4-16 on the right side, and 5-17 on the left. I used my Uplula™ loader to speed up the loading process. Novak® 3-dot dovetail-adjustable sights give you a quick, clear sight picture. Recoil, even with 147-gr. Black Talon SXT or Corbon 125-gr. +P loads, was negligible. Ruger attributes this lower felt recoil to "recoil-reducing barrel cam, low-mass slide low center of gravity and low bore axis." Whatever the reason, it is a pleasure to shoot. The gun functioned effortlessly with everything I fed it...Finnish NATO 115-gr. hardball, Ruger 80-gr. +P ARX, Blazer Brass 115-gr. FMJ, Aguila 124-gr. FMJ...even some oddball G2

Research R.I.P. rounds, with lots of sharp little things that fly off and complicate medical intervention. From a sandbag rest, 5-round groups averaged around 3" at 25 yards.

The Ruger American Pistol comes in a fitted hard case with two magazines, small (9mm models only), medium and large grip modules and the obligatory cable lock. I have no idea of whether or not Ruger will submit this pistol to any future government trials, and they're not saying. I like it a lot better than the Army's current choice, and at an MSRP of \$579 (less in real life), it's one hell of a bargain.

BL 550 Dillon's Basic Loader

\$259⁹⁵

N11-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount N11-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

AUTO PRIME SYSTEM

RL 550B ACCESSORIES

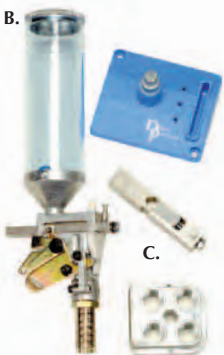

A. RL 550B CALIBER CONVERSION KITS
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **N11-20782, \$77.95 ea.**
 Magnum Rifle Powder Bar **N11-21353, \$29.95 each**
 X-Small Powder Bar **N11-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

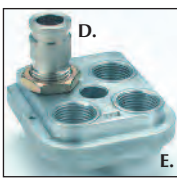

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **N11-22058, \$104.95**
 Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

N11-20064, \$11.35 each
Three or more, \$10.25 ea.
X-Large Powder Die, N11-21253, \$19.95 each

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

N11-13909, \$22.95 each
Three or more, \$20.95 ea.

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

N11-22055, \$20.95 each
Three or more, \$18.95 ea.

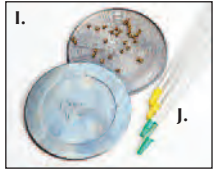

G. 1" BENCH WRENCH

N11-10842, \$7.95 each
Two or more, \$7.10 ea.

N11-11143, \$14.95

P. UNIVERSAL MOUNTING HARDWARE KIT

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.
N11-14355, \$5.49

Dillon Reloading Accessories

Dillon's Reloading Accessory Package Deals include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

SDB (Balance Beam Scale)	N11-14482	\$192.95
SDB (Electronic Scale)	N11-14483	251.95
RL 550B (Balance Beam Scale)	N11-21143	191.95
RL 550B (Electronic Scale)	N11-22117	250.95
XL 650 (Balance Beam Scale)	N11-21430	207.95
XL 650 (Electronic Scale)	N11-22118	266.95

Dillon's Toolholders are available for your RL 550B, XL 650, SL 900, and Square Deal B, and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650 with Wrench Set	N11-11555	\$29.95
XL 650 w/o Wrench Set	N11-11554	18.95
RL 550 with Wrench Set	N11-11541	28.95
RL 550 w/o Wrench Set	N11-11543	17.95
Square Deal B with Wrench Set	N11-19441	26.95
Dipped Ball-End Hex Wrenches	N11-11483	17.95
One-Inch Bench Wrench	N11-10842	7.95
Square-Deal-Only Wrench	N11-19970	8.95

Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	N11-22051	\$48.95
XL650-only	N11-22052	45.95
Square Deal "B"	N11-22223	64.95

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	N11-22214	\$41.95
RL 1050 Tray Kit	N11-22215	41.95

Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	N11-97126	\$145.95
----------------------	-----------	----------

Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lip supplied with the measure, and operates on two AAA batteries (included).

	N11-16306	\$41.95
--	-----------	---------

Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	N11-17950	\$45.95
Plastic Roller	N11-22183	40.95

Quick-Change Cover for use with powder measure. N11-11143 \$14.95

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

Dillon's Case Preparation Equipment

CV-2001
N11-20493
\$188.95

CV-750 N11-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator N11-20675 \$75.95

CM-500 Case/Media Separator N11-21045 \$47.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 N11-22047 \$213.95

Euro CV-750 N11-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **N11-13804** **\$8.95**
Case (20 pc.) **N11-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **N11-13733** **\$8.95**
Case (20 pc.) **N11-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **N11-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag **N11-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag **N11-13496** **\$15.95**

Super 1050/RL1050 Short Trim Die Toolhead

N11-62219
\$224.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. *(NOTE: the Blue 1050 toolhead stand – Part Number N11-62200, \$49.95 – is not included.)*

Dillon's New Rapid Trim 1500 Case Trimmer ²³

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **N11-62164** is **\$329.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **N11-13141**, are **\$19.95** each. Upper lock rings, **N11-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Dillon's NEW Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access,

has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

\$79.95

"Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original. This belt is a favorite with law enforcement, military personnel, fire-

fighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

Dillon's Pistol Die Sets

Size Die

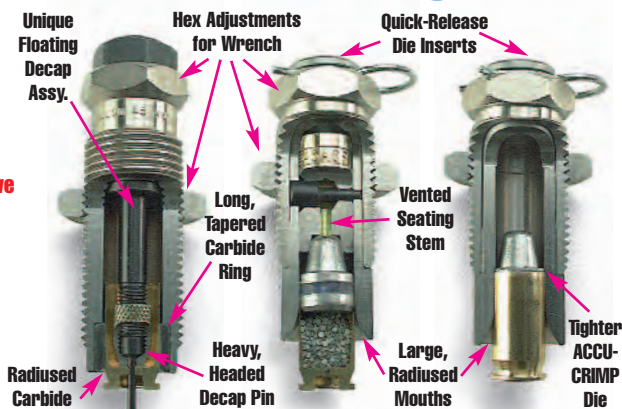

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets 35

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process.

Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

By Cameron Benz

Somewhere along the way, pockets had ceased to have enough capacity. I realized I needed more stuff than I could fit in my pockets and it was a daily issue. Enter the everyday carry (EDC) bag and all the stuff that it contains.

Initially, it started with a bag in which I could carry my stuff to work, particularly when I was riding my motorcycle. I had found myself in need of batteries for a portable Bluetooth speaker, frequently my laptop, a small first aid kit, a backup battery for my laptop, etc. When I left the work force to focus on my writing, it continued to morph.

That first bag was a Maxpedition Sitka Gear Slinger (single sling) in khaki. It was a good bag, but its capacity was limited for my needs and the

khaki had a bad tendency to show dirt. It was followed by two nearly identical bags that I swapped between, a Mil Spec Monkey Adapt Pack in black and a Grey Ghost Gear Lightweight Assault Pack in Kryptek Typhon. Those two were both good bags but lacked the organization I came to need for everyday use. Then, for Christmas, my girlfriend Kim bought me a Maxpedition Kodiak in black. Apparently she had been listening to my complaints and saw a chance to be helpful. It has been very much appreciated.

With a suitable bag now in my hands, I set about filling it. The first items in, by absolute necessity after having received a Type 1 diabetes diagnosis, are my blood sugar test kit and an insulin pen, along with the appropriate needles. I

s In Your Bag? ³⁷

have, thus far, resisted going to an insulin pump as I can break nearly anything. So, those items found their way into the top most pocket along with an Altoids tin containing a travel size ibuprofen tube, Dramamine and some Chapstick. This pocket also typically ends up having my ear buds for my iPhone.

On the back of the bag, I attached a Tactical Tailor Admin Pouch Enhanced for my pens, any map I may need (not a bad place to carry a map in the event you have to hoof it), and a small (semi-good) quality AA flashlight. In this case an old Fenix LD10 that I was unable to get a replacement pocket clip for.

On the side of the bag is a bottle carrier where I typically keep a water bottle. If I drink from it during the day, I top it off at night. If you choose to do this, you may want to clean the bottle occasionally to keep it from getting funky. Another option would be to put a water bladder in the appropriate compartment but I have never been a fan of the way that feels on my back. It might be better if there was something like a frame sheet in the bag (a flat piece of plastic or aluminum that adds some semblance of structure to the bag).

In the sleeve, in the big pocket inside, I frequently carry my laptop and charger. This tends to be a necessity as I spend a lot of time writing. In this pocket, I also keep an Antigravity Batteries PPS lithium-ion backup/jumpstart battery. I use it to recharge my laptop and my cell phone and it occasionally gets used as a jump battery. So far, I have used it to jumpstart a Subaru Tribeca. It has also proven to be very useful for charging my phone while traveling.

In the square-ish back pocket, I usually carry a small first aid kit. In it I have: 3 hand cleansing wipes, 4 Neosporin packets, 10 2x2 inch gauze pads, 10 butterfly closures, 1 roll of paper tape (1/2 inch x 5 yards), 3 5x7.6 cm nonstick pads, 4 knuckle Band-Aids, 4 regular Band-Aids, 4 long Band-Aids, burn gel, allergy meds, and tweezers. I

chose to include the small, possibly unnecessary, survival kit in this pocket. It started life as an Adventure medical Kits Pocket Survival Pak Plus and then I added some things. In it are a space bag, wire saw, Spark-Lite fire starter and fuel, signal mirror (Rescue Flash), Doug Ritter/CRKT MK 5 knife, Duct Tape, SOL Led Light, three square feet of aluminum foil, button compass, 4 #10 fish hooks, Fresnel lens magnifier, six feet of stainless steel safety wire (.020" diameter), 2 size 12 snap swivels, 2 Split Shot (tin), Sterile 1L bag, 4 pieces of Tinder Quik (could possibly be replaced by

Vaseline-soaked cotton balls but I haven't tested that yet), 2 pieces of waterproof paper, a rescue whistle, a pencil, 6 Micropur MP1 water purification tablets, 2 Cyalume light sticks, 1 sewing needle, and some sewing thread.

In the interior, semi hidden, water bladder compartment, are 2 17-round magazines for the Glock 19 I typically carry. These are in addition to the spare I carry on my body. I initially started with an elastic loop Velcro-backed magazine carrier but have since opted for a Kydex magazine carrier with Velcro backing.

Some may have concerns about the bag looking too "tactical". No one has ever said anything and the Molle has proven to be a great place to tuck a short adapter cord and keep

and pen clipped on the outside. Others may think this bag is too big, but I wanted to have a bag big enough to carry other things in should I venture to the store on my motorcycle or take a stroll through a farmers market.

I continue to change things as time goes on. Right now, the next things I plan to add are a tourniquet and some Celox gauze (they will likely be in the bag before you read this. I had considered an AR pistol but this bag isn't big enough for that unless a person went with a folding buffer tube kit. Also, let's face it, bags can get heavy quickly. All in all, I'm happy with the set up and will continue to update it as my needs change. **P**

Maxpedition Kodiak with attached Tactical Tailor Admin Pouch Enhanced. Note the chemlight and USB adapter tucked into the Molle webbing.

California Competition Works' Tandem Tactical Strippers can be used to hold either shotshells or AR-15/M4/Mini 14 magazines, or a combination of both by installing or removing the aluminum spacers provided with each stripper. The Tandem Tactical Stripper holds a maximum of eight rounds of 12 Gauge (10 rounds of 20 Gauge) shotshells or two AR-15/M4/Mini 14 magazines. Each Tandem Tactical Stripper features a BLADETECH Tek-Lok™ Universal Belt Clip, four removable aluminum spacers, and the screws and Allen wrench required to install them.

Tandem Tactical Stripper **N11-00303 \$55.00**

California Competition Works' Tactical Strippers are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84 attachment device

(C. & D.) that will accommodate up to a 2-1/4" duty belt.

A. Six-Shell Tactical Stripper **N11-18606 \$23.95**

CLASSIC FIREARMS: The Smith &

By John Marshall

In 1952, Smith & Wesson introduced their .38 Special 5-shot snubby Centennial revolver, which was a “hammerless” type designed to be snag-free when drawn from under clothing. It was equipped with a grip safety and was double-action only. The Centennials served their purpose of close-range self-defense quite well and became quite popular in the law enforcement community. There was only one thing lacking with these diminutive guns. They lacked the ability to be thumb-cocked for a light and crisp single-action trigger pull. This would be an advantage when the intended target might be located farther away than belly-to-belly. Although some people are quite skilled in hitting targets at some distance in double-action mode, the long, heavy trigger pull of the Centennials put most users at a disadvantage for precision work at a distance. Colt’s competitive Detective Special exposed-hammer snubby revolver offered the option of an attachable hammer shroud. This revealed only the tip of the hammer for thumb-cocking, yet allowed snag-free drawing. It was an advantage that the S&W Centennial revolvers could not provide.

S&W met this demand for a snag-free small revolver that could be fired in either double- or single-action mode by designing a new model. It was based on the same small frame size as its Chiefs Special and Centennial guns (the “J-frame” in factory parlance). However this new model had an upward-extending “humpback” frame incorporating an integral hammer shroud. The exposed hammer spur tip was a different configuration than that on the Chiefs Special, with a lower profile and being slightly wider for easier cocking. Like the previous belly guns, this one also had the rounded butt and Magna-style stocks that matched the butt contour.

Seeking a leg up on the shroud-equipped Colt Detective Special, S&W decided to introduce its new 5-shot .38 Special revolver with an aluminum frame and steel cylinder, giving it a noticeable weight advantage. The lighter weight of the gun made it better suited for possible backup pocket carry by law enforcement. Inasmuch as pressing a grip safety while cocking the gun might cost some precious employment time in re-adjusting the user’s grip, the squeeze-safety of the Centennial was eliminated. The new gun was to be called the Bodyguard.

Smith & Wesson produced the first Bodyguards on August 15, 1955. The initial serial number was 66,000, numbered in the J-frame series. In the first year of production, 2,422 of these revolvers were produced. These early guns had four-screw sideplates, flat-cylinder release thumbpieces and

pinned barrels. The upper sideplate screw was phased out that same year in favor of a dovetailed tab at top of the sideplate. In 1957, when all of S&W’s handguns were assigned model numbers, the lightweight Bodyguard was officially designated as the Model 38. It began to have its model number stamped in the crane recess. The flat cylinder release thumbpiece was changed to a standard concave design in 1966, and in 1968, the central diamond surrounding the stock screw in the wooden stocks in both models was eliminated. Barrel pinning ceased in 1982.

“Seeking a leg up on the
Colt Detective Special,

Bodyguard with an aluminum frame,
giving it a noticeable

Wesson Bodyguard Revolvers

In 1959, responding to a request from the Massachusetts State Police, S&W decided to produce a steel-frame Bodyguard, making it a more rugged version for extensive use. Its new gun was given the model number 49, and its serial series began with number 163,051 in the J-frame lineup. The Model 49 underwent engineering changes identical to those of the Model 38 over the years.

The Model 38 and the Model 49 were available with either a blue or a nickel finish. Most were made with nominal 2" barrels, although some very rare ones were made with 3" tubes. A

the shroud-equipped
cial, S&W decided to
ot .38 Special revolver
ne and steel cylinder,
e weight advantage.”

nickeled Model 49 is illustrated for this article. It was shipped in February 1976 and remains in near-perfect condition with its original box, instructions, cleaning rod and brush. The Bodyguards proved so popular that the Centennial models were discontinued in 1974, albeit resurrected by popular demand in somewhat altered and renumbered versions in later years. A stainless-steel version designated as the Model 649 was introduced in 1985 at the request of the Michigan State Police.

Both the Model 38 and the Model 49 were made on occasion with a two-tone finish, a blued frame and a stainless steel cylinder. In 1993, the finish options on both models were changed to matte blue and satin nickel. The nickel option for the Model 38 was dropped in 1996, and the cylinder release thumbpiece was changed to a teardrop pattern on all models. With a changeover to the J-magnum frame in 1997, the Model 38 guns were specifically rated for +P extra power .38 Special loads. The Model 49 was discontinued in 1997 in favor of the Model 649, while the Model 38 continued in the line until January of 1999. The eventual successor to the Model 38, the Model 638 Bodyguard Airweight Stainless, made its first appearance in 1989. Only about 1200 were manufactured. This gun was re-introduced in 1996 with the J-magnum frame, rated for +P ammo. The 638-3 is still in production.

Model 649 Stainless Bodyguards in .38 Special were discontinued in 1999, as the 649-3 in .357 Magnum chambering (which began in 1996) became the new standard. An ejector rod shroud made its appearance. The 649-5 saw the introduction of an internal key lock system in 2001, identified by (in my opinion) an unsightly and unnecessary politically correct black hole in the left of the frame over the cylinder release thumbpiece. A small run of 649s in .38 Special only was produced in 2003 as the Model 649-6. These also had the internal lock.

The Bodyguard revolvers continue today in the modern iterations of the Models 649 and 638. The utility of a smooth-drawing and snag-free double-action belly gun that can be thumb-cocked for precision single-action fire is still valid. Some people have opined that the open channel for the hammer on these guns could collect lint and debris that might foul the action. In actual practice, this has seldom been the case, particularly with routine cleaning. While the early Bodyguards have become collector pieces, all can still find employment as effective and reliable self-defense revolvers. They continue to be great guns, popular, and definitely classic.

46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

N11-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

ETHAN INOCANDO —

By Robin Taylor, www.taylorfreelance.com
 Hizron Auza Photos Courtesy Elias Inocando

Ethan Inocando and I have a strange relationship. I'm a successful youth coach, having fielded national-level teams for the past six years. Last year my top guns on Team Gotta beat everyone that shoots a .22 in

scholastic speed steel, regardless of age. We beat West Point, we beat Texas A&M, we beat everybody at one time or another — except a skinny high-school kid from Texas named Ethan Inocando.

Inocando and the South Texas Juniors have terrorized the southern half of the United States, dominating the Scholastic Pistol Program (now renamed the "Scholastic Action Shooting Program").

They're a large team (roughly 20 athletes at any given time), fielding as many as five competitive squads.

At just 15, Inocando anchors their *fastest* rimfire team — a team that outstrips not just other high school teams, but the college teams as well. (Texas A&M's rimfire team has never beaten them.) To look at Ethan, he fits a certain Philippine stereotype — studious, small-framed, dark hair — but the eye is deceived.

Ranked 5th nationally as a competitive chess player, Inocando plays classical piano. He told me: "Chess informs my life. That, and Powerlifting."

Wait, did you say *Powerlifting*?
 "Yeah. I deadlift about 315."

According to his former shooting coach Mark Self, Inocando weighs 124 pounds soaking wet, yet he "lifts" competitively for Sharyland High School in Mission, Texas, right on the border of Mexico.

"He's intensely competitive. He took a class from Max Michel, and Max told him he needed to bulk up," says Self. "Ethan took him seriously. Now he lifts in the 125-pound class, but weighs 124."

Ethan started shooting with his father (Elias) at age 8, and (with the support of his mother, Gemma) has steadily moved up from his father's Walther P22.

On his Scholastic Action team, he's driving a mostly-stock Ruger Mark III, lightly enhanced with a

SOUTH TEXAS PRIDE ⁴⁹

trigger job and a Volquartsen bolt. At USPSA matches he shoots a borrowed Akai Custom STI 2011 in .38 Supercomp. His new sponsor plans to change that to a new full-boat LimCat 2011 short-ly, but when he and his dad go out for fun, they bring a .45.

Ethan's work ethic creates success, but the Inocandos' story wouldn't be possible without the rise of the Scholastic Action Shooting Program. Coach Self recruited Inocando three years ago, coached him until he emerged as a junior national champion, and introduced him to a wider practical shooting world.

"Ethan showed up at my local USPSA shoot with his dad. He was a real newbie, and we talked him into joining my SPP team. I didn't expect him to be that fast," says Self.

Ethan jokes that he now shoots in two environments, one adult world where he has to be mature, and a student environment where he can joke around. It's that blend of social support, mentoring, and practical support that makes the "magic" of SASP. The program represents both a new youth sports opportunity and a new scholarship track for *practical* shooters. Speaking as someone that has been "in" practical shooting for a few decades – this is a sea change.

Inocando went on at length about his gratitude to Coach Self, to his father, and to the practical shooting community in general. "Even though they're better than you, they're bringing you up to be better than them in the end. One of my great mentors is Dr. Henry Ruiz...if I'm getting all good grades, I have the use of his \$7,000 Open gun."

I asked Ethan why he ended up on top at nationals, instead of some other kid.

"Really, it's because I failed last year. Failure is a better teacher than success."

Stung by finishing with a score in the 60s (good, but not competitive) Ethan didn't touch his gun for months, then started re-training, hard. His next club match score was a 39. Only a half-dozen kids have broken 40 seconds in SASP history.

"Now I go back and forth dryfiring with the poster that

I have on my wall that shows all the targets, and shooting live-fire on the range."

Ethan went on to explain that "if you want to be a successful athlete, you have to train like one."

Whether that was Self's influence, or Michel's, or his mother Gemma's, Ethan is training "like a champion would" for everything he does.

Shooting For As – On and Off the Range

Coach Self speaks very highly of Ethan as a *scholastic* athlete – that's something very different than athletes who tend to be one-trick ponies.

"The joke about Ethan is that he always shoots for As at the range."

He brings his books to matches to study, and "it's not unusual when he's done shooting on Tuesday nights, you'll find him out there studying."

He's had the chance to learn from some of the greats in the sport: Max Michel briefly, but also BJ Norris, one of the best steel shooters living. He trains to shoot like his champion mentors do, and studies with an eye toward becoming a doctor like Dr. Ruiz.

Self and Norris have known each other for years, a connection that brought untold training and wisdom-transfer opportunities for the Self family and the South Texas team. Similarly, Self's daughter Shea grew up shooting Sportsman's Team Challenge events with 3-Gun phenom Lena Miculek. Today Shea shoots shotgun for Texas A&M.

Culturally, they're all part of the larger story of youth shooting teams pushing back against the curtain of political correctness.

In an era where students have been expelled for drawing pictures of handguns in school, young men like Ethan Inocando are adopting pistol shooting as their primary sport. The best in turn are being recruited by Bethel University, Texas A&M, Southern Illinois College, and many more.

Where the future will take shooting student athletes like Inocando is anyone's guess, but to my eye, young men and women like this that hold the future of America's shooting sports. **DP**

50 "Big Fifty Reloader"

STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies

Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

ElZetta

Tactical Flashlight Mounts

Every ElZetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the ElZetta® ZFL-M60. (Sizing Adapters are not required when using an ElZetta ZFL-M60 or other 1-inch lights.) The ElZetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular ElZetta ZFH1500.

The NEW ElZetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the ElZetta ZFL-M60. The ElZetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

Let's Hold on to

By Duane Thomas

In this article I am going to debunk an idea, a “quote” that a lot of pro-gunners want to believe is true. There is an important reason I will do this. If you examine the history of the gun control debate over the past few decades, it becomes blatantly obvious the pro-gun forces are winning. When I was in my very early 20s I couldn't get a concealed carry permit because, being in the Army, therefore living wherever I was assigned, I lived in states, primarily North Carolina and California, with no provision at the time for issuing a CCW. It wasn't until I was reassigned to Fort Lewis in 1986 that I got my first CCW, because Washington State has had a shall-issue CCW system in place since 1965. Today there are only a few laggardly holdouts among states with no provision for issuing a CCW to anyone who can pass a state and federal background check. In just the past few years, we've seen landmark Supreme Court decisions affirm the right to keep and bear arms as an individual right, forever scotching the old “It's about the militia, not individual rights” anti-gun argument.

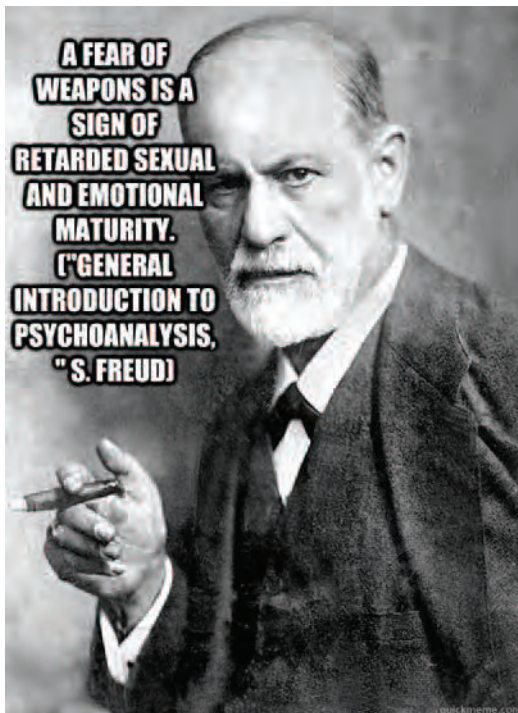

One major reason we're winning is simply because we have the facts on our side. Every credible statistical study on the effects of guns in American society shows they're used to prevent far more crime than they're used to commit, that they cause far more good than harm. While it's tempting to say the truth doesn't matter because our opponents will lie anyway – and they will – the reality is that being a liar catches up with people eventually. It makes them look bad. When the only way you can make your side of an argument look remotely plausible is to lie, distort, misrepresent, over time you, and your position, begin to look at best ignorant, at worst actively dishonest. This is what has happened to the anti-gun movement. To support their position they had to put forth lies, empty rhetoric, appeals to emotionalism over factual data, the results of specious

“studies” that couldn't stand the scrutiny of real statisticians, attempting to dupe the gullible. Over time, they lost credibility. All we, with the facts on our side, had to do was tell the truth.

Nothing makes your argument look better than having the facts on your side. Conversely, nothing makes your side look weaker than putting forth “facts” that are (to anyone willing to do even a bit of research) demonstrably untrue. Thus I view it with more than a bit of alarm when I see significant numbers of pro-gunners doing exactly that.

Spend any time at all on social media, in short order you will become familiar with the concept of the meme. Originally the word “meme” was

coined by evolutionary biologist Richard Dawkins as a shortening of the Greek word “mimeme” which means “imitated thing” and referred to “an idea, behavior, or style that spreads from person to person within a culture.” As we commonly hear it used today, it refers to a combination of words and imagery – a photo or drawing with words overlaid onto it – putting forth a particular idea, generally meant to be humorous, instructive, or both. I swear to God, for many on social media, the meme is their sole form of communication. In many cases, it seems to be the only way they gather data.

The problem with this meme is that it's NOT TRUE.

Among pro-gunners, a popular meme puts forth a “quote” attributed to Sigmund Freud, often though not always combined with a photo of the famed Austrian psychoanalyst, that goes. “A fear of weapons is a sign of retarded sexual and emotional maturity.” Again frequently though not always, this statement is claimed to come from Freud's famous work, “General Introduction to Psychoanalysis.” The problem with this meme is that it's not true.

The origins of this supposed quote actually come from a magazine article written by gun rights scholar Don B. Kates, Jr. refuting the idea, put forth by anti-gunners, that those who like guns are compensating for sexual inadequacy.

the High Ground! ⁶³

Kates never said “A fear of weapons is a sign of retarded sexual and emotional maturity” was a Freud quote, rather that was Kates’ assessment of content from the essay “Dreams in Folklore” co-written by Freud and Ernst Oppenheim. I actually read that Kates article when it first appeared, and at the time that quote struck me, and still does, as simply an inversion of the old “Liking guns is a sign of sexual dysfunction” anti-gun argument: “No, DISLIKING guns is a sign of sexual dysfunction. So there.”

Today we live in a wonderful Information Age. I am old enough to remember a time before the existence of the Internet, when, if you wanted a piece of information, you went to the library, looked in the card catalog, found a book on the topic that interested you, went and pulled it off the shelves, opened the book, flipped to the back, and just hoped and prayed it had an index. Today, information is as close as typing a few words into an Internet search engine. True, there is a lot of garbage out there – I am in the process of disproving some of it now – you have to be careful what you choose to believe. Still, as that great sage Fox Mulder said, the truth is out there. Finding it has never been easier, for those sufficiently motivated to hunt facts instead of basing their worldview, and arguments, solely on the content of memes.

Good news for those so inclined: the full contents of both “General Introduction to Psychoanalysis” and “Dreams in Folklore” are easily available online. Further good news, they’re both available in PDF versions within which it’s easy to run a word search. Thus I can tell you, with absolutely no worries of being wrong, that the statement “A fear of weapons is a sign of retarded sexual and emotional maturity” occurs nowhere in “General Introduction to Psychoanalysis.” In fact the only time Freud ever mentions weaponry in tandem with sexuality is when he makes his famous statement that penis shaped objects, including weaponry, in dreams generally represent male genitalia: “...the male organ, has symbolical substitute in objects of like form, those which are long and upright, such as sticks, umbrellas, poles, trees, etc. It is also symbolized by objects that have the characteristic, in common with it, of penetration into the body and consequent injury, hence pointed weapons of

every type, knives, daggers, lances, swords, and in the same manner firearms, guns, pistols and the revolver, which is so suitable because of its shape.” Note that nowhere in this statement does Freud equate weaponry, or a person’s attitude toward weapons, with sexuality in either a positive or negative sense.

Likewise this quote does not occur in “Dreams in Folklore.” Compared to “General Introduction to Psychoanalysis,” “Dreams in Folklore” is actually very short, only about 25 pages, and deals with penis and, ickily enough, feces symbolism in dreams. The only time weaponry is mentioned in tandem with sexuality in this essay is when a sexually frustrated wife recounts a dream in which she sees a dagger floating in the air before her, according to the writers this represents her husband’s penis, thus the frustration she feels from

his lack of attention, and far from reacting with fear, in the dream she reaches out to grasp it.

In debate there is a concept called “argument by authority” which means to put forth as the truth of a particular idea, a particular statement, the fact a certain person said it. “Aristotle said this, so it must be true.” “Freud said this, so it must be true.” Argument by authority is seen as one of the great logic errors, and pretty generally a sign the speaker is intellectually weak, cannot think for themselves, and is therefore willing to let someone they perceive as an authority do it for them. A pro-gunner cannot afford to be that sort of person.

We are winning because we have the facts on our side. Putting forth as one of our arguments, one of our statements, one of our truths, something that is easily, demonstrably untrue by anyone willing do a few minutes worth of ‘net research weakens our position. If argument by authority is intellectually weak, then the person engaging in it when their supporting “quote” never actually occurred is weaker still. Those who lie, or put forth untruths through ignorance, over time lose credibility. When you occupy the intellectual, therefore the moral, high ground, and we do, this is not something you want to give up. So let’s put this “quote” to bed, and instead occupy our time putting forth the many demonstrable truths supporting the pro-gun position.

Duane’s website is Self-Defense-Handguns.com 

“Nothing makes your argument look better than having the facts on your side. Conversely, nothing makes your side look weaker than putting forth ‘facts’ that are (to anyone willing to do even a bit of research) demonstrably untrue.”

64 *Get your "stuff" together, then keep it that way!*

Extra Loading Data Labels, N11-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Swab-its® - A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning

- rods, and are tough and reusable.
- .22/5.56mm (6 ea.) **N11-15310 \$4.98**
 - .243/6mm (6 ea.) **N11-15311 4.98**
 - .307/.62mm (6 ea.) **N11-15312 4.98**
 - .357/9mm (6 ea.) **N11-15313 4.98**

E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth	N11-18613	\$6.99
-----------------	------------------	---------------

The Larry™ Pocket Work Light

The Larry™ 8 LED Pocket Work Light is the essential handyman light. 8 powerful LEDs provide 60 lumens of bright white light. The rotating magnetic clip gives you convenient hands-free lighting. The reinforced plastic body design is shock-proof and water-resistant, making the Larry™ basically indestructible.

	N11-15432	\$9.99
--	------------------	---------------

M-PRO™ Gun Cleaner is odorless, non-toxic and biodegradable. "Safely cleans rifles, handguns, shotguns..., black powder, corrosive priming deposits and much more."

4 oz.	N11-10139	\$11.95
8 oz.	N11-10138	18.95
32 oz.	N11-11298	40.95

M-PRO™ Copper Remover works up to four times faster than ammonia-based cleaners and is odor free.

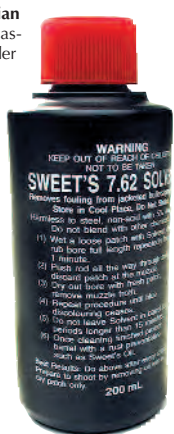

4 oz.	N11-19370	\$11.95
-------	------------------	----------------

Sweet's Australian 7.62 Solvent

7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

	N11-13128	\$12.95
--	------------------	----------------

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	N11-15571	\$7.95
Slide-Glide Lite	N11-15572	7.95

Micron UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

Dewey's AR-Link Cleaning

Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

BURRIS

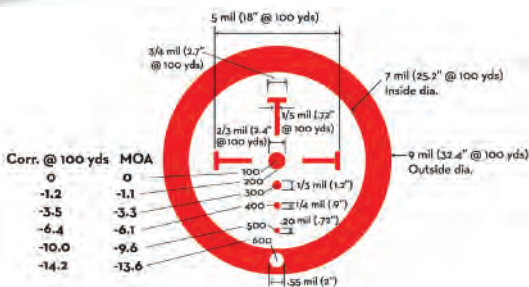

MTAC 1.5-6x42mm

The resilient MTAC 1.5-6x42mm riflescope is tough, with superb, glare-resistant glass and a sleek, snag-free profile. This compact model is perfect for 3-Gun, close quarter battle (CQB), or big-game stalking. With its high-performance glass, solid 1-piece tube, and internal double spring-tension assembly, this MTAC Rifle scope can handle the harshest shooting environments.

And it's guaranteed by the Burris Forever Warranty™.

The fast-action Ballistic CQ™ reticle was designed for competitive shooters and law enforcement and military operators. The low-magnification, bright, fast-action reticle also serves dangerous game hunters well.

A circular, center "donut" provides ultra-fast engagement at close distances, and smaller reticle dots provide

trajectory compensation out to 600 yards for the 5.56 and 7.62 cartridges. The illuminated reticle gets you on target faster in any lighting condition and increases accuracy when the target is dark.

Elevation and windage dials are calibrated to 1 click = 0.5 MOA; both can be reset to 0 once the scope is sighted-in. The eye relief is generous – up to 4" – for comfortable shooting.

The scope features an ergonomic power ring for easy grip and quick power setting changes; finger-adjustable MTAC mil-rad target knobs for easy precision adjustments; and a rubber-coated eyepiece provides protection, comfort, and style.

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Left for Dead on

The Union chain of command at the Battle of Stones River, Tennessee. From left: Major General William S. Rosecrans, commanding, *Library of Congress*; Major General George H. Thomas, Commander of the Center, *Matthew Brady portrait, National Archives*; and First Division Commander Major General Lovell H. Rousseau, *National Archives*.

By Brian Dervin Dillon, Ph.D.

William Edward Dervin (1840-1916) was one of the 2.5 million Americans who fought in the Civil War. He was also my great-grandfather.

Enlisting at Watertown, Wisconsin, on November

2, 1861, Dervin was promoted to Corporal and served as a courier for Company F, 1st Battalion, 16th United States Infantry. He fought in several 1862 battles and skirmishes, but his proudest hour came during the Battle of Stones River, Tennessee, often called Murfreesboro by Southern Historians. The epic struggle began at daybreak on December 31, 1862, and ended at dusk on January 3, 1863. It took place 30 miles southeast of Nashville, a short distance to the west of the town of Murfreesboro, close to the meandering course of the Stones River.

Some 83,000 soldiers, 46,000 blue and 37,000 gray, fought in the murderous fray, and nearly 24,000 of them were killed or wounded. It was, in terms of percentage of combatants lost as casualties (Union 28 percent, Rebels 27 percent) the bloodiest engagement of the Civil War.

Not as well-remembered as the 1863 battles of Gettysburg or Chickamauga following it, Stone's

River was nevertheless the most critical battle of 1862 for both sides. After their string of 1861-1862 victories, the Confederates were confident of European recognition, and one more success might just bring Britain and France in as allies and

protectors. Abraham Lincoln countered with his Emancipation Proclamation, believing that no European power could oppose such a morally defensible document. If Stones River had been a Rebel triumph, like the Seven Days Battles or Fredericksburg, Lincoln's "scrap of paper" might have been overlooked. But Stones River, if not a clear-cut Northern victory, nevertheless broke the South's winning streak, drove the Rebels from middle Tennessee, and started their long, slow, slide towards eventual defeat.

By mid-1862 Lincoln had exhausted all patience with the commanders of his two gigantic armies. George McClellan in the east and Don Carlos Buell in the west seemed incapable of

besting their Confederate adversaries, so he fired them both. In October the President replaced Buell with William S. Rosecrans (1819-1898). The new western commander was told to deliver a northern victory by the year's end, or tender his

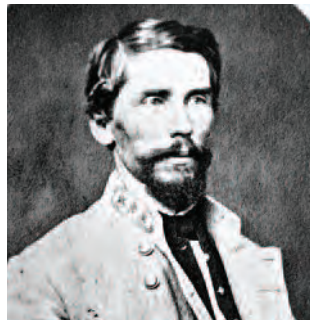

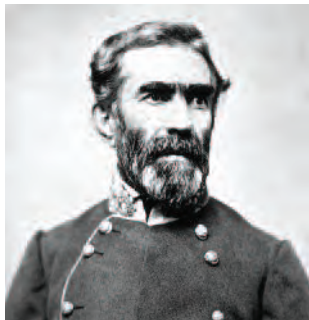

The Battle of Stones River, Tennessee. By 11 A.M. on the morning of December 31, 1862, after repeated attacks had demolished the Union right wing, Rosecrans's "Regular Brigade" was the only body of northern troops still advancing towards the Rebels. All others were in retreat.

Detail from Map 81, Volume 1, West Point Atlas of American Wars (Esposito), 1959.

New Year's Eve

79

The Confederate chain of command at Stones River. From left: General Braxton Bragg, Commander of the Army of Tennessee; Corps Commander Lieutenant General William J. Hardee; and Major General Patrick Ronayne Cleburne, 2nd Division Commander. All photos Library of Congress.

resignation. Rosecrans' army was divided into three parts, left, right, and center. It was composed of over 140 volunteer infantry regiments recruited mostly from the Midwestern states, plus supporting volunteer cavalry and artillery units, but only four understrength Regular Army infantry regiments. Rosecrans' most able subordinate was his Commander of the Center, George H. Thomas (1816-1870), a no-nonsense Virginian who had stayed with the Union. Within a year, after another climactic western battle, Thomas would gain everlasting fame as the "Rock of Chickamauga." Thomas' 1st Division of the Center was commanded by Lovell Rousseau (1818-1869). A numerically small component of what came to be called the Army of the Cumberland, yet critical in terms of prestige, experience, and reliability, was its 4th or "Regular Brigade," the core of Rousseau's 1st Division. The "regulars," commanded by Lieutenant Colonel Oliver P. Shephard, incorporated elements of the 15th, 16th, 18th and 19th U.S. Infantry Regiments, made up of troops from all northern states. Their officers were mostly professional soldiers, unlike the inexperienced political appointees of the volunteer regiments. Rosecrans complied with his Lincolnian deadline with only days to spare. He pushed his army slowly south-east of Nashville along the course of the Nashville-Chattanooga Railroad line until, on December 29th and 30th his scouts encountered the Rebel Army of Tennessee.

Led by General Braxton Bragg (1817-1876), the Confederates were massing in and around the small town of Murfreesboro. Both sides now prepared for battle on the final day of 1862. Bragg was the least popular general of the Civil War on either side. His subordinate commanders hated and distrusted him. All were convinced they could do better, and constantly undermined his authority. One leading historian described his failures as "tactical apoplexy." Lieutenant General William J. Hardee (1815-1873) was Bragg's most skilled Corps commander. Irish-American Hardee was a

famous tactician, whose emphasis upon the rifle, with its much greater range and accuracy over the old, obsolete smoothbore muskets, had revolutionized instruction at West Point during the preceding decade. Hardee's most aggressive Division Commander was Irish-born Patrick Cleburne (1828-1864), so brave and steady in battle that his own troops called him the "Western Stonewall".

Stones River was one of the most "Irish" of all Civil War battles. Murfreesboro's name was, of course, a garbling of the common Irish surname Murphy, and Irish-American and Irish-born soldiers, on both sides, influenced the course of the battle from start to finish. The South had fewer enlisted Irishmen than the north, yet still many Hibernians amongst its highest-ranking officers. Estimates of the percentage of Irish immigrants and first-generation Irish-Americans in the Union Army vary from 25 to 40 percent. Irish immigrants, discriminated against in the North for the preceding two decades, understood that their ticket to full acceptance in their new country was service in the Union army, and they joined by the thousands. Few Northern officers were Irish, except in the all-Irish volunteer units, but "micks" were ubiquitous as non-coms throughout all branches of the service, especially the infantry. One bluecoat Irish officer, above all others, made his reputation at Stones River. Recently promoted Brigadier General Philip Sheridan (1831-1888) was the commander of the Union Right Wing's 3rd Division, under Major General Alexander McCook. Historians list no fewer than six different birthplaces for Sheridan, including County Cavan, Ireland. He was described by one recent biographer as "short, unattractive, argumentative and poor...[and] obviously Irish Catholic."

By midnight of December 30th, the Federals had stretched a line of troops over three miles long southwards from a big bend of the Stones River. My great-grandfather's 1st Battalion of the 16th U.S. Infantry, along with the other units of Rousseau's 1st Division, was in reserve behind the

Union Center, placed there so as to easily stiffen any part of the line, left, right, or center. The Southerners had a much shorter line of only two miles' length facing the bluecoats, with Hardee and Cleburne at its far left or southernmost part, and Lieutenant General Leonidas Polk's Corps to their north. Unfortunately for the Rebels, just under 1/3 of their entire army, Hardee's 1st Division, under Major General and former Vice President John C. Breckinridge (1821-1875), had been placed on the wrong side of the Stones River by Braxton Bragg. Here during the entire first, critical, day of the four-day engagement they faced no Union troops at all. Breckenridge would be of no help whatsoever to Hardee on the left, where he might have tipped the scales towards a resounding Confederate victory.

At first light on the last day of 1862, Polk's Rebels hit the Union Center, while Hardee's men hit the right wing, which collapsed under their onslaught. Hardee's Confederates continued their attack northwards, trying to flank the Union right. Many late-rising bluecoats, their breakfast interrupted, ran to the rear, abandoning rifles still stacked. By 8:00 am, the rebels were fighting units commanded by Brigadier General Phil Sheridan. "Little Phil's" assigned position had been at the innermost part of the right wing, hinging on Thomas' Center Divisions. Sheridan had awakened his troops two hours before any other Right Wing commander, fed them, and gotten them into line just before the Rebel attack. First holding off Polk's Corps, Sheridan then fought Hardee's troops. When the other two Divisions to his right melted away, Sheridan found himself at the far right end of the Union line. While McCook's other troops fled to the rear in terror, Sheridan's men gave ground slowly, buying time for the rest of the bluecoat army. They swung back first to the west, then to the northwest, refusing their line, keeping the Confederates from wrapping completely around the Union Army's dissolving Right Wing.

Sheridan's stubborn bravery allowed Rousseau's reserves to move from the Center to reinforce the Right Wing. Rousseau's 4th Division, with its Regular Brigade at its forefront, took up positions to Sheridan's right. The regulars were now at the far right of the Union line, and not a moment too soon. Sheridan's men, after fighting all morning, were out of ammunition, and withdrew from the line. The 4th Division was left completely exposed on three sides. Rousseau's fresh soldiers were the only

remaining force that could stop Hardee's Rebels from pushing through the Union Right and obliterating Rosecrans' entire army from the rear. Beginning at about 11 on the morning of December 31, 1862, the 15th and 16th U.S. Infantry Regiments, at the front of Rousseau's Division, stood against the oncoming Rebels. Corporal William E. Dervin's First Battalion, 16th U.S. Infantry, was at the right of Lieutenant Colonel Shephard's Regular Brigade; only one other battalion, of the 15th U.S. Infantry, was farther right.

Through scattered rocks and cedars they faced Confederate Brigadier General James E. Rains' 2nd Brigade, which included the 29th North Carolina, 11th Tennessee, 9th Georgia and 3rd Georgia. The two regular bluecoat infantry regiments, with Corporal Dervin in the lead as the 16th's regimental color-bearer, were now the only units of Rosecrans' army advancing towards the enemy. The 16th U.S. Infantry soon outdistanced its neighbor the 15th. Great-grandfather Dervin was at its right-hand corner, exposed to Confederate fire from three different directions. The Federals stood and traded fire with the Rebels wrapping around them, while all other northern units, of the Center, Right and Left Wings, retreated. In less than an hour the Regular Brigade suffered more than 50 percent casualties: my great-grandfather was one of them.

As color-bearer at the head of his Regiment, Corporal William E. Dervin was, next to the Sergeant carrying the National Colors, and their commanding officer, the most obvious target for volley fire. When Rains' Rebels let fly,

Dervin was hit simultaneously by five minie balls. Luckily the 29th North Carolina had aimed low, or possibly, simply at the regimental flag Dervin was carrying before him, for four of the five bullets that struck him hit his right leg between the ankle and the knee. His flag moved forwards, then back, in other hands. The Regular Brigade retreated, leaving Corporal Dervin on the battlefield amongst hundreds of his dead and dying comrades half a mile behind the new Confederate lines.

The Union Army was pushed farther and farther back, contracting more and more as Hardee's Rebels compressed it, until by the end of the day the bluecoat line was less than a third of its original length. In the late afternoon, Bragg finally brought Breckenridge's troops across the Stones River to reinforce men who had been fighting for 10 consecutive hours. Compounding his tardiness was his order that these fresh troops attack the

William E. Dervin was the color bearer for the 16th U.S. Infantry Regiment at the head of the Regular Brigade, in front of the entire Union line. When the Rebels fired, my great-grandfather was hit by five rifle bullets simultaneously. Left for dead on the battlefield for four days, Corporal Dervin survived for another 54 years with unhealed wounds. Photo with his granddaughter Ruth Dervin O'Brien at Christmas, 1909. Courtesy Robert de Langre.

strongest point of the Federal line, instead of its weakest, where they could have made all the difference. The next morning, unlike so many previous battles, the bluecoats did not withdraw, but instead clung to their positions. On New Year's Day 1863, Rosecrans sent his Left Wing, under Major General Thomas L. Crittenden, across the Stones River to the Confederate side, prompting Bragg to return Breckenridge's troops there to counter the threat. But the Union Left wing sat out a second day without fighting, facing Rebels a mile to their south, while Hardee and Polk's exhausted forces on the other side of the river still hammered away at the Federals, now to little effect.

On the third day, Bragg sent Breckenridge to attack Crittenden on the east side of the River, and pulled General Cleburne from the far left of the Rebel line and sent him to its opposite end to support Breckenridge. The Rebels managed to dislodge Crittenden, but while doing so exposed their left to massed Federal artillery on the opposite bank, which inflicted the greatest Confederate casualties of the battle. The January 2, 1863 attacks had no effect on the main body of Rosecrans' army. In fact, towards the end of the day, George Thomas sent troops from the Union Center across the Stones River to attack the Confederate flank, and drove Breckenridge back to his start point. The battle limped along for one more day, mostly as cavalry skirmishes around the fringes of the two armies. By the late morning of the fourth day, January 3, 1863, Hardee, still at the far left of the Rebel line, began to withdraw back to Murfreesboro. That night, Polk also withdrew, as did Cleburne and, finally, Breckenridge, early on the morning of January 4th. The Battle of Stones River was over, and Lincoln had, if not an unqualified and glorious victory, then at least not another stinging Union defeat.

Meanwhile, Corporal William E. Dervin had been left for dead since New Year's Eve. Wrapped in his blanket, he was rained and sleeted on for four days and nights, the blood from his wounds periodically freezing him to the ground. Dervin somehow survived the wounds that would have killed a lesser man. My great-grandfather's five wounds were not a Stones River nor even a brigade record. That dubious honor was held by Major S. D. Carpenter of the 19th U.S. Infantry, three positions to Dervin's left: Carpenter survived being shot six times. Corporal Dervin was found by a burial detail and carried to unskilled army surgeons overwhelmed by the sheer numbers of wounded. Some, but not all, of the five bullets that had hit him were pulled from his mangled right leg, and more than six inches of splintered tibia was removed. No amputation was performed for he was adjudged to be a "hopeless case." He was shunted aside with the dying and the already dead.

But Corporal Dervin refused to die, day after day, week after week. Discharged from the Army on May 6, 1863, he was a "danglefoot" in the cruel parlance of the time. He got around on crutches, dragging his maimed leg after him. Bone splinters worked their way up through his skin, and the Rebel lead he carried slowly poisoned him for the next half-century. But he was the lucky one, as family legend holds that all three of his older, Irish-born brothers, bluecoat soldiers all, were killed in action on other Civil War battlefields.

Great-grandfather William E. Dervin married Mary Bridget Dillon (1849-1909), a Famine Irish refugee from County Clare. She was the daughter of James Dillon, another Irish veteran of the Battle of Stones River. Great-great-grandfather Jimmy Dillon (1823-1890) enlisted in Company C of the 9th Missouri, which was later absorbed by the 59th Illinois Infantry. He fought at Perryville, where his regiment began that battle with 291 men but ended it with only 183. Then, at Stones River, his unit saved a Union battery from capture by pulling the guns to the rear with human muscle power after the Rebels had killed all of its horses.

William and Mary Dervin's four children were baptized in St. Bernard's Catholic Church, Watertown, Wisconsin. Father William Corby (1833-1897), the former Chaplain of the Union Army's famed Irish Brigade, presided. Corby later moved to Notre Dame University, home of the "Fighting Irish." In 1872 great-grandpa Dervin helped enlarge Corby's church: its new cornerstone was quarried from the Rock of Cashel, the ancient seat of Irish kings. This stone was brought across the Atlantic by exiles of the great Irish diaspora, who had fought and bled for their new promised land, the United States of America.

In later years William E. Dervin was active in his Church and in its Catholic Total Abstinence Society, and elected its Marshal in 1878 and 1879. But he was proudest of his Civil War service and became a leader of the Grand Army of the Republic, Post 94. Dervin put on his sword and uniform and led patriotic parades. He wore his G.A.R. medal, his special talisman, on his vest under his coat every day, until, after 40 years, its outer surface was abraded almost smooth. His fellow veterans presented him with a second, replacement medal. An intense patriot to his dying day, my great-grandfather told all listeners that he would "rather be a corporal in the U.S. Service than prime minister of an empire." In January, 1916, shortly before the Banshee finally claimed him, he wrote that he had lived with "open wounds since Dec. 31, 1862." Left for dead on New Year's Eve, but sustained through faith and willpower alone, Corporal Dervin survived to celebrate more than 50 subsequent New Year's Days.

Dervin's Civil War G.A.R. medal. Dervin wore out an earlier medal, completely abrading away the relief on both sides, by wearing it under his coat for more than 40 years.

Making Ammo: A Beginner's Guide to Hand-loading by Kyle Lynch – Ammo shortage? Not anymore! Learn a new hobby that will save you money and ensure that you always have enough of the right ammunition for your shooting needs. This guide offers you an opportunity for first hand information from an experienced reloader as he takes you through the reloading process. Examples explain what works and what doesn't. If you are new to reloading or want to understand the fundamentals more fully, this guide provides simple step-by-step instructions.

N11-43270 \$23.95

Legally Armed: A Concealed Carry Gun Law Guide – Learn the basics of concealed carry and the laws associated with this astronomically growing group of self-reliant Americans. If you depend on a handgun for the protection of yourself or your family, arm yourself with knowledge, too. What's inside? What to consider before carrying a firearm • Protecting oneself: discharging a firearm in self-defense • What to do when interacting with Law Enforcement • Gun handling, practice and storage • State-by-state quick reference guide to carry laws where you live and travel.

N11-43269 \$14.95

Armed & Smart: A Beginner's Guide to Concealed Carry – If you are new to concealed carry and need a great resource for information, this is the book for you. This book covers all the basics a beginner needs to know.

Before you make the decision to exercise your Second Amendment right to bear arms through concealed carry, you should consider factors like what type of gun is best for carry, when to carry a firearm, how to carry concealed, and why you should carry a concealed firearm.

We carefully cover handgun safety and the proper steps for using and caring for your firearm. Other topics include cartridge selection, accessories available, practice techniques, and range etiquette. **N11-43232 \$16.95**

Armed & Smarter: Advanced Concealed Carry Weapons & Training – Once you have mastered the basics for carrying your concealed firearm, you need a book to build on that foundation and hone your skills to those of an intermediate-level handgunner. After obtaining your concealed carry permit and securing a firm grasp of the responsibilities attendant to carrying a concealed firearm, it's time to focus on becoming an excellent marksman.

In **Armed & Smarter**, our authors prepare you, the shooter and gun owner, to handle and use your handgun responsibly. By the end of this book, you will understand the importance of strong habits and perfect practice. **N11-43233 \$16.95**

Wise Company's "Grab & Go" Emergency Food Kits

Wise Company's **18 Wise Favorites 72-Hour Kit** includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.

Wise Company's **60 Serving Gourmet Entrée Only "Grab and Go" Food Kit** includes two servings per day (entrées only) for one adult for one month or four adults for one week. **Product within this Bucket is:** Savory Stroganoff (8 servings), Chili Macaroni (8 servings), Pasta Alfredo (8 servings), Creamy Pasta and Vegetable Rotini (8 servings), Cheesy Lasagna (4 servings), Teriyaki and Rice (8 servings), Creamy Ala King and Rice (8 servings), and Creamy Tomato Basil Soup (8 servings).

Wise Company's **60 Serving Gourmet Freeze Dried Meat "Grab & Go" Food Kit** includes 60 servings of assorted gourmet-seasoned freeze dried meat and a 20-serving bonus of long-term emergency rice, for a total of 80 servings. **Product within this Bucket is:** Roasted Chicken (12 servings), Teriyaki Style Chicken (8 servings), Cheesy Beef (8 servings), Southwest Style Chicken (12 servings), Savory Roasted Ground Beef (12 servings), Stroganoff Style Beef (8 servings), and Long-Term Instant Rice (20 servings).

Wise Company's **120 Serving Breakfast Only "Grab & Go" Food Kit** includes 120 servings of breakfast assortment (no entrées). **Product within this Bucket is:** Apple Cinnamon Cereal (40 Servings), Crunchy Granola (40 Servings), and Brown Sugar and Maple Multi-Grain (40 Servings).

Wise Company's **120 Serving Freeze Dried Vegetable and Sauce "Grab & Go" Food Kit** includes 120 servings of vegetable and sauce assortment. **Product within this Bucket is:** Corn (24 servings), Peas (16 servings), Broccoli (24 servings), Green Beans (24 servings), Butter Sauce (8 servings), Cream Sauce (8 servings), Cheese Sauce (8 servings), and Mushroom Sauce (8 Servings).

Wise Company's **120 Serving Freeze Dried Fruit and Snack "Grab & Go" Food Kit** includes 120 servings of fruit and snack assortment. **Product within this Bucket is:** Bananas (16 servings), Strawberries (16 servings), Peaches (16 servings), Apples (16 servings), Caramel Sauce (16 servings), Yogurt (16 servings), and Pudding (16 Servings).

Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.
