LONG DISTANCE CARRIERS

THIS COULD BE YOUR RIFLE. *At Savage, we understand the difference between a shooter and a rifleman. For those wanting to test their skills at extreme distances there is the M110 and M111 rifles in .338 Lapua. A lot of companies make guns for shooters. Savage makes them for riflemen.*

Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

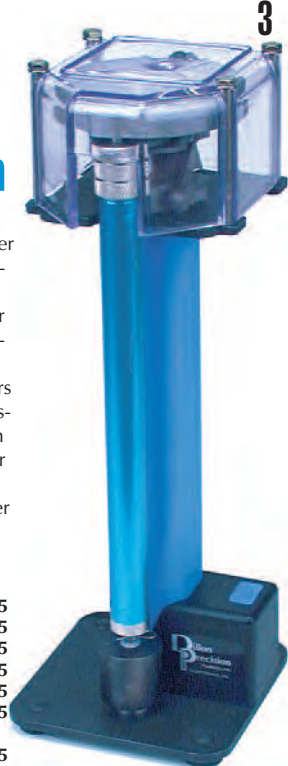

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I think you unknowingly earned a few more customers and probably sold a few more reloaders. A friend of mine, range officer at a local club, and a couple of his buddies are looking to buy reloaders. My friend came over to check out my 650. It has loaded many thousands of rounds. Something broke under the shellplate and my buddy says, "Oh crap, what are we going to do now?" I grabbed my 650 manual and a copy of **The Blue Press**. Looked up three part numbers, called the number on **The Blue Press** back cover. After about five minutes [Dillon customer service representative] Matt says, "Your order is on the way." My friend sat there in amazement and asked, "Is that all there is to it?" I said, "Yep, order will be here in three days." My friend said, "That does it. Dillon for me." Thanks for the great product and service.

Dan Qualls – Oakdale, CA

I own a very small gun shop in southern Indiana and I have been reloading for a while. I've labored with a Lee Loadmaster for years. Mine eyes have seen the Glory! I should have gotten an XL650 a long time ago. If the Almighty had to reload...He would recommend Dillon! You folks are like family. Anything but Dillon is a waste of good money! I am in your debt.

Mikal Wayne Moore – bindhammergroup@gmail.com

Here is a copy of an e-mail I sent to my cousin: "As you remember, I recommended that you get a Dillon press when you wanted to get into reloading.... Well, I want to tell you about an experience that happened today. We got home from a computer-users group meeting and [my wife] said we have an alarm going off in the garage. So I went out and found my low primer alarm buzzing and had to pull the battery to get it to stop. This morning I called Dillon Precision Products at their 800 number and got a tech guy on the line and explained the problem to him and he asked for my address. So I told him, and he said, "I'll have that part right out to you Mr. Skill." I then asked him what that would cost and he said, "Oh, that's under warranty. There's no charge." I said that I've had the press for years and he said that he was sending the unit out without the battery and I would have to supply that. Oh, damn, don't you just hate it when you have to supply the battery for a new part? Just, you furnish the battery and we will furnish the part. Now, that's service. Damn, don't you just hate it when they don't even give you a chance to complain or argue or anything? That's Dillon Precision."

Just thought I would share,
Fred Skill – fskill@shasta.com

THE RUGER® BX-25®

GENUINE RUGER® FACTORY MAGAZINE

We've Taken a **NEW ANGLE** on the 25-Round 10/22® Magazine.

The Ruger® BX-25® magazine offers all of the rimfire autoloading reliability of the original Ruger® rotary magazine, the gold standard in rimfire autoloading magazines. The BX-25® is designed to present cartridges into the action at a 30° angle, the same way the 10/22® action is designed to accept them, increasing feed reliability. BX-25® magazines work with any factory original .22 LR Ruger 77/22® Rifle, 10/22® Rifle, SR-22® Rifle and Ruger American Rimfire™ Rifle.

Stainless steel feed lips are designed to present cartridges into the action at a 30° angle for better feed reliability.

Stainless steel, constant-force spring provides feed consistency round after round.

Easily disassembled for cleaning by removing two stainless steel screws.

Anti-tilt follower is injection molded from a high lubricity polyacetal for consistent reliability.

RUGER®

Which Dillon is Right

Square Deal "B"

Dillon's Square Deal "B" was designed to produce large amounts of ammunition in the least possible time for just a little bit of money. At 300 to 400 rounds per hour, you can produce enough ammo for several pistol matches or practice sessions in just a few hours.

See Page 8

RL 550B

More RL 550s have been sold than any other progressive machine in the world, and for good reason: The RL 550B's versatility is almost unlimited. It will load over 160 different rifle and pistol calibers. Its quick-change tool-head allows the user to change calibers without having to readjust dies.

See Page 14

XL 650

Dillon's XL 650 resulted from several years of listening to our customers expressing their fondest wishes. We took every good idea we and our customers ever had, tested them extensively, and then incorporated them all into the design of the XL 650.

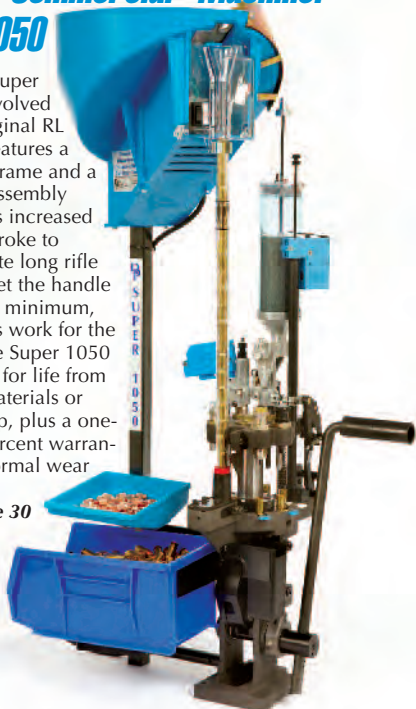

See Page 20

Dillon's "Commercial" Machine: Super 1050

Dillon's Super 1050 evolved from the original RL 1050, and features a lengthened frame and a new crank assembly that provides increased functional stroke to accommodate long rifle cartridges, yet the handle stroke is at a minimum, meaning less work for the operator. The Super 1050 is warranted for life from defects in materials or workmanship, plus a one-year, 100-percent warranty against normal wear and tear.

See Page 30

ht for YOU?

BL 550

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

See Page 13

RL 550B With Accessory Casefeeder

Adding an automatic casefeeder system to your RL 550B will easily increase your ammo production rate by 25 percent or MORE! The casefeeder streamlines the loading process by reducing hand movement, and the RL 550 Casefeeder uses time-tested, proven technology.

See Page 16

Dillon's "BFR" Big Fifty Reloader

You KNOW you want one! There's nothing quite as thrilling as touching off one of those .50 BMG cartridges and sending 750 grains of copper-jacketed lead downrange. WAY downrange! If the cost of loaded .50 BMG ammo has been putting you off, you no longer have an excuse.

Join the ranks of the LONG-range target shooters and roll your own .50 BMG (and other long-range, specialty cartridges) on Dillon's BFR.

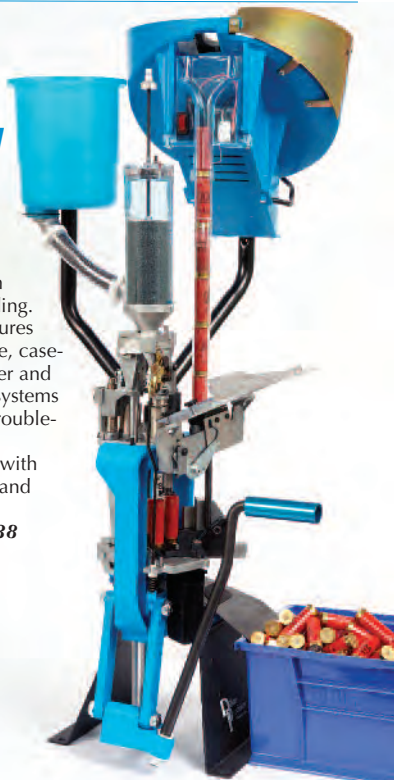

See Page 50

SL 900 Dillon's Shotshell Loader

Dillon's SL 900 is the new standard in shotshell reloading. The SL 900 features easily adjustable, case-activated powder and shot dispenser systems that eliminate troublesome bushing changes, along with spilled powder and shot.

Remnants of the author's misspent youth, including a Bannerman's catalog and the barrelled action of his "Crud Cannon."

By Peter Caroline

My mother always said that I was switched in the hospital, because no one else in the family had guns or voted for Republicans. When I was seven years old, someone (Mom said, "It must have been an enemy of the family.") gave me a brand-new Daisy Golden Eagle BB gun. I was allowed to keep it because my parents assumed that I didn't have the strength to work the lever. I discovered, however, that if I sat on the barrel, I could pull the lever back with both hands. And the lack of BBs was remedied by asking a few friends.

My second "gun" was a gift from my uncle, a Navy surgeon. One of his patients had brought back a Japanese "knee mortar" from the Pacific. It was thought to be an acceptable gift for a ten-year-old because ammo was not available. At least it wasn't available at Iver Johnson's large firearms emporium in downtown Boston. I know, because I asked. Their answer was, "Get the hell outta here, kid!"

What really got me into full-fledged firearms enthusiasm, however, was a visit to the branch library in our suburban Boston community. There, in a glass display case, was a small World War I exhibit. There was an Imperial Prussian battle flag, a German canteen and mess kit, the obligatory *Pickelhaub* and a Mauser C96 "Broomhandle" pistol. I saw this pistol and it transformed my life. I wanted this gun, I wanted to know all about this gun. I drew pictures of it, and tried to find references to it in the library's card catalog. I even tried

to make a model of it, using a Prince Albert tobacco can as a "magazine" and some lamp tubing as a barrel. While researching the C96, I also managed to find and read every other gun-related book in the local library. There was a bookstore near the train station in our town, and out front they had several display cases of used books for 10¢ and 25¢. This was the beginning of my firearms reference library, and I still have those books to this day, classic works by Askins, Hatcher, McGivern, Kephart, Himmelwright, Reichenbach and Roper, to name but a few.

I also acquired a Bannerman's catalog. Francis Bannerman's Sons was an incredible "war surplus" store, located on lower Broadway in New York City. They dealt in surplus arms and military equipment dating from the War of 1812 on through WWI. My mother would visit friends in New York occasionally, and I kept begging her to buy me something — *anything* — at Bannerman's. Finally, she relented. She requested that the clerk find a gun that would never be capable of firing, and he managed to dig up an African trade rifle, a flintlock converted to percussion, with a rust-plugged nipple and a hammer that wouldn't stay cocked. As I recall, she paid \$4 for it. Using several large sewing needles, I managed to clear the nipple. The bore was worn and filthy, but relatively clear, and after I figured out how the lock worked, some filing resulted in a hammer that would stay cocked. One of my 25¢ purchases was a book entitled, *The*

FOUND THE PATH TO TRUE GUNLINESS (CHAPTER I)

Boys' Book of Chemistry, printed in 1919. There was a whole section entitled, "The Chemistry of Warfare," in which one could find formulas for such things as black powder, gun cotton and various poison gasses. I stuck to black powder, fortunately for my family and the community at large. With homemade black powder and percussion caps made from capgun fodder and aluminum foil, I was able to fire the gun (at some distance from my home), and no one was the wiser.

I gradually built up my collection. A kindly neighbor donated a Stevens Gould Model .22 single-shot target pistol, sans firing pin...a component easily fabricated with a nail and some file work. Likewise, I returned a .22 bolt-action rifle that had seen better days to firing condition. It had a hair trigger and it would occasionally discharge if I closed the bolt too rapidly, but I got it for free, so I was not about to complain.

When I was 13, my parents sent me to a small summer camp in Maine, where I was introduced to the NRA Junior Marksmanship Program. With my splendid .22 rifle, which the camp director dubbed "the Crud Cannon," I managed to achieve Sharpshooter rating with, as I recall, three bars. I continued my rifle marksmanship practice in the high school rifle club. Our faculty sponsor had barred my Crud Cannon, as a menace to life and limb, so I

was reduced to using one of the club's DCM surplus Winchester 513T .22s, which I was convinced weighed nearly as much as I did at the time.

While in college in New York, I joined the school's rifle club, which practiced in one of the school's subterranean steam tunnels, so now I can legitimately claim that I was a member of an armed underground group at Columbia University. It sounds a hell of a lot more exciting than it was. New York, at that time, held many gun-related attractions...the aforementioned Bannerman's, Robert Abels' antique gun shop, plus a number of shops and warehouses specializing in old gun parts and ancient ammunition. I probably spent more time at Bannerman's than I did in class.

After college, I enlisted in the Army for a two-year hitch and, after Basic, was assigned to Fort Belvoir, VA. There, I was drafted on to the pistol team, competing with rack-condition 1911s that rattled when you shook them. I also volunteered (I know...never volunteer) as *pro tem* firearms curator for the Corps of Engineers Museum on post, classifying and cleaning assorted war trophy guns for the museum's displays. I also moonlighted, off post, for Interarms in Alexandria, where I got to play with a wonderful assortment of surplus hand-guns, rifles and machine guns.

It was a good start.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K73-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K73-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

AUTO PRIME SYSTEM

RL 550B ACCESSORIES

A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

K73-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K73-20782, \$76.95 ea.**
Magnum Rifle Powder Bar **K73-21353, \$29.95 each**
X-Small Powder Bar **K73-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K73-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

K73-20064, \$11.35 each
Three or more, \$10.25 ea.

X-Large Powder Die, **K73-21253, \$19.95 each**

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

K73-13909, \$22.95 each
Three or more, \$20.95 ea.

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

K73-22055, \$20.95 each
Three or more, \$18.95 ea.

G. 1" BENCH WRENCH

K73-10842, \$7.95 each
Two or more, \$7.10 ea.

H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol **K73-14450**

Small Pistol **K73-14451**

\$254.95 (110v US Model)

Large Pistol **K73-14453**

Small Pistol **K73-14454**

\$264.95 (220v Euro Model)

CASEFEEDER CALIBER CONVERSIONS (Page 17)

Casefeed 550, with Wrench Set

K73-11540 \$28.95

Casefeed 550, w/o Wrench Set

K73-11542 \$17.95

Bullet Tray Kits

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the "feel" of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

Bullet Tray Kit **K73-22214 \$41.95**
RL 1050 Tray Kit **K73-22215 \$41.95**

Quick- Change Dust Cover

Quick-Change Cover for use with powder measure. **K73-11143 \$14.95**

Accessory Package Deal

Includes: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook* (not pictured, see Page 62).

RL 550B (Balance Beam Scale)

K73-21143 \$181.95

RL 550B (Electronic Scale)

K73-22117 \$250.95

Low Powder Sensor

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

K73-16306 \$41.95

Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel." A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

Alum. Roller **K73-17950 \$45.95**
Plastic Roller **K73-22183 \$40.95**

Belted Magnum Powder System

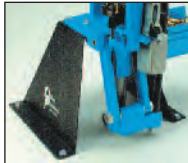

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System

K73-97126 \$142.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

RL550/XL650 **K73-22051 \$48.95**

RL 450-to-RL550B Upgrade Parts

You can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

RL 450 Upgrade Components

Dillon's Case Preparation Equipment

CV-2001
K73-20493
\$188.95

CV-750 K73-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K73-20675 \$73.95

CM-500 Case/Media Separator K73-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K73-22047 \$213.95

Euro CV-750 K73-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K73-13804** **\$8.95**
Case (20 pc.) **K73-20255** **\$135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel." A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

Alum. Roller **K73-17950 \$45.95**

Plastic Roller **K73-22183 \$40.95**

Belted Magnum Powder System

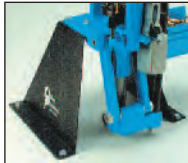

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System

K73-97126 \$142.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

RL550/XL650 **K73-22051 \$48.95**
XL650-only **K73-22052 \$45.95**

Powder Check System

Quit worrying about squib loads and double-charged cases.

K73-21044, \$68.95 each

Three or more, \$61.95 ea.

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K73-22080** is **\$267.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below.) Replacement carbide cutting blades, **K73-13141**, are **\$19.95** each. Upper lock rings, **K73-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K73-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K73-11702 89.95**

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

Dillon's Pistol Die Sets

Size Die

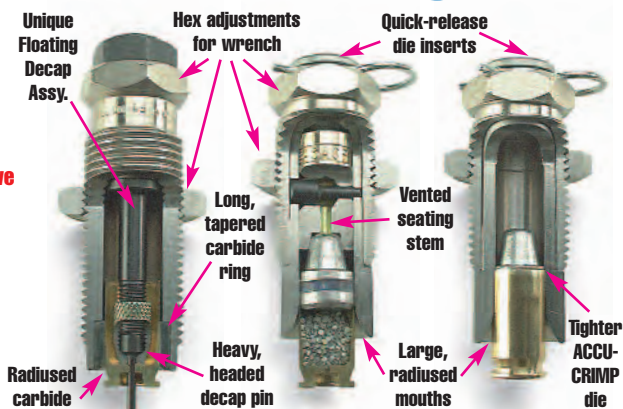

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mouser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag., .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, K73-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

 *Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.

AP Custom USA

AP Custom USA's Shotshell Carriers are 100-percent machined from solid billet aluminum, and utilize proven 303 Hi-Yield Stainless steel leaf springs to contain either three or four 2-3/4" 12 Gauge shells in their slots, depending on model. Both models offered here feature the BLADETECH Tek-Lok™ Universal Belt Clip. The 4x4 Shotshell Carrier holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong or weak-handed. The 3x3 holds three 2-3/4" 12 Ga. shells in two adjacent slots.

TACCOM, LLC Tactical and Competition Accessories

TACCOM, LLC's Duaload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a BLADETECH Tek-Lok™ Universal Belt Clip (included) that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE **K73-19530 \$9.95**
 4Up w/Tek-Lok™ **K73-19531 29.95**
 6Up w/Tek-Lok™ **K73-19532 34.95**

TACCOM, LLC's Quaload Shotshell Holder is a serious game changer! It's so radical that they are patenting the device.

The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holer and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder **K73-19543 \$39.95**
 8Up Quaload Shotshell Holder **K73-19544 69.95**

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

K73-19525 \$39.95

By John Marshall

It's perhaps the most recognizable military longarm on the planet. It also happens to be the most prolific, being found around the world by the untold millions in many variants. It's been long associated with the Communist empire and terrorists, but by itself, it is neither good nor evil. It's just a tool, but one of the most successful tools ever. It's simple, totally reliable, durable, intimidating, easy to disassemble and maintain, and sufficiently accurate for battlefield use within 150 yards. Many experts have voted it the number one combat rifle of all time. It's the famous AK47 assault rifle.

The *Avtomat Kalashnikova* was the brainchild of Mikhail Timofeyevich Kalashnikov. Until recent years, little was known about the man, but following the downfall of the Iron Curtain, interesting information has come to light about him.

Born November 10, 1919 in Alma-Ata in south-eastern Kazakhstan, Mikhail entered the ten year school, which was roughly equivalent to the American system of grade and high schools, at the age of seven. Graduating in 1936, he went to work for the Turkestan-Siberian Railroad, where he was promoted to become a technical secretary. He was conscripted into the Red Army in 1938. His interest and skill in weapons made him a natural for mechanical work and on the recommendation of his commander, he was trained as a tank driver.

During his training, he designed a fuel consumption measuring device and an improved track assembly for tanks. Soon he was promoted to sergeant, and in 1939 he was sent to Leningrad to be a technical advisor to the factory manufacturing the tank parts he designed. When the Germans invaded the Soviet Union in June 1941, his life changed considerably. He was assigned to the Western front, where he became a tank commander. In September 1941, a German shell hit

his T34 tank, and he received a very bad wound in his shoulder.

Hearing tales of superior German weapons while in the hospital, Kalashnikov began thinking he could contribute more to the war effort by designing firearms. He requested technical books on firearms and studied them hard. During his six-month convalescence leave, he designed a submachine gun. While not adopted by the Soviets, his design was noted favorably. He was assigned to design work in the Moscow Aviation Institute, and then became a technician at the small arms proving ground at Ensk. The Soviets had been very interested in the German 7.92mm Kurz cartridge, which was very effectively used in the MP44/StG44, the first mass-produced "assault rifle" or *sturmgewehr*.

This intermediate-power cartridge was modified for Soviet use in caliber and other minor ways to become the 7.62x39 cartridge first used in the *Samozaryadnyya karabin Simonova* carbine (SKS45) designed by Sergei Simonov in the waning days of World War II. Kalashnikov was introduced to this new cartridge at Ensk. The wheels in his brain started turning and he went to work with a purpose. Others doing design work there aided his recognized talents, and with them, he was able to design the Soviets' first officially accepted selective-fire assault rifle. Kalashnikov's design was crafted in 1947 and was designated as the AK47. It was adopted by the Soviets as its standard longarm in 1949.

The first AKs utilized a sheet-metal receiver. Around 1951, the receiver was strengthened by machining it from a forging. After minor modifications, a third variation was manufactured from around 1953 to 1959, when the AKM, or *Modernizirovanniy avtomat sistemi Kalashnikova*, was introduced. This fourth and final 7.62x39mm version used an improved stamped sheet-metal receiver.

: The AK-47 Rifle

“It’s been long associated with the Communist empire and terrorists, but by itself, it is neither good nor evil. It’s just a tool, but one of the most successful tools ever.”

er. A folding stock version became the AKMS. The AKM in both versions became the Soviet standard until 1974 and was cloned throughout the Communist world by many nations.

The AK design is an exercise in simplicity. The reciprocating bolt handle doubles as a forward assist. The trigger design is effective, and based on that used in the American M1 Garand rifle. The safety/selector lever is also an ejection port cover, and no bolt hold-open device is incorporated. A tracer round is generally used for the last round in the magazine, giving a visual clue that the next pull of the trigger will result in a “click.” There are some other minuses to the design. The safety is noisy, slow and hard to operate. The open rear sight, while optimistically calibrated for long range, is really only good out to roughly 300 yards. The AK is not especially known for accuracy, but in fairness, it was not designed as a target rifle. At the same time, it’s boringly reliable under almost any environmental condition including rain, dirt, mud and firing debris. It’s compact, particularly when equipped with the folding stock. It is very robust, and almost impossible to damage sufficiently to the point of malfunction. It’s quite easy to manufacture on widely available equipment.

Almost anyone can be instructed on how to field strip an AK and clean it without special tools. Remove the magazine and cycle the action, checking the chamber to be sure it’s harboring no live round. Push in the action spring retaining rod on the rear of the receiver cover, and lift the receiver cover off the receiver. Take out the action spring and retaining rod by pushing them forward, and then lift them up and back out of the receiver. Remove the bolt and bolt carrier (with its attached gas piston) by pulling them back and out. Take the bolt out of the carrier by twisting it and pulling it out of the front of

the carrier. Further disassembly is possible but not required. Most AKs have cleaning rods under the barrel, and the wood stock versions generally have a cleaning kit in the butt of the stock.

Later designs based on the 7.62x39mm AK are plentiful, including the now-standard AK74, which is much the same, only chambered for the M74 5.45x39.5mm cartridge, the Soviets’ answer to the 5.56mm NATO round. Variants on the AK design have been made worldwide, and are too plentiful to cover here. Countries known to have manufactured AK-type rifles include Bulgaria, China, Czechoslovakia, East Germany, Egypt, Finland, Hungary, Israel, Netherlands, North Korea, Poland, Romania, South Africa, Yugoslavia, and more recently, even the United States. Currently, Russia is considering the adoption of an updated AK, the AK12. This latest version of the AK design incorporates modern niceties such as accessory rails and advanced optics, making it somewhat similar in concept to the U.S.’s M4 carbine.

The rifle illustrated is a semiautomatic-only 7.62x39mm Type 56 Chinese-made AKMS, typical of many versions that are generally legal to own in the United States. It’s not a dreaded selective-fire “assault weapon.” It can fire only **one** shot per pull of the trigger, hoplophobic hysterics to the contrary notwithstanding.

Mikhail Kalashnikov passed away on December 23, 2013 at the age of 94. He was proud that he had invented a rifle that would help protect his country, yet regretful that it was often used unlawfully. He had attained the rank of General in the Russian Army and was well-regarded throughout the world as an intelligent and pleasant man.

It goes bang every time. It’s hardy. It’s found everywhere in the world. It’s the famous AK – a true classic in every sense of the word. Mikhail Kalashnikov did himself proud in designing it.

SNS Casting has officially become a coated bullet supplier. The advantages of a coated bullet are that there's no risk of losing lube during shipping, there's no wax lube to get into your reloading dies, and there's significantly less smoke than standard cast bullets. The end result is cleaner hands, guns/barrels, and loaders!

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K73-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

K73-19972 \$39.95

Concealed Carry Tote⁴⁷

\$45⁰⁰

K73-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

Inset Photo by Alec Sukoski

There aren't many teenage girls who love to hang out on the range shooting revolvers, but every time I've seen Molly Smith, more women with guns on their hips magically appear. Her contagious self-confidence just draws people.

At 17, Smith exudes a curious mixture of maturity and teenage "fan girl" enthusiasm. I for one didn't expect to hear about the Supreme Court holding Eric Holder in contempt from a teenage blonde who loves Mumford and Sons (a folk/pop band). Smith will graduate from a California high school soon, and has applied to East Coast undergraduate schools near Washington D.C.

She's "going East" in pursuit of her lifetime goal – to become a justice of the Supreme Court. She "got the legal bug" in part thanks to the NRA. She came to the DC area for the NRA Youth Education Summit in 2012, and can't wait to go back.

On The Range

As "junior captain" for Team S&W, Molly punches well above her weight.

She shoots for S&W in Steel Challenge, ICORE, and Bianchi Cup events, spanning the competition with a huge-looking S&W 627 revolver. Too many shooters carry the belief that "revolver + girl = slow." There's just no hope for "gun store commando" opinions like that when a 17-year-old girl bests you in front of your friends – shooting a revolver. She did that to the gunbloggers at their annual rendezvous match in Reno this year, making her the darling of the blogs for weeks.

Competing for the junior titles nationwide landed her a "clerkship" of a different sort. Smith serves as the assistant to S&W's team manager

Julie Golob – one of the most influential women in the history of Practical Shooting.

"That's one of greatest opportunities I've ever had," says Smith. "Julie has been mentoring me the entire time, teaching me the business side of things, social skills, all kinds of stuff."

Golob was a young phenom like Smith, becoming the first (and only) female member of the Army Marksmanship Unit's action shooting team before moving on to shoot for Glock and S&W. She's the only person to win the USPSA Ladies' title in all six USPSA divisions.

Thanks in part to Golob, Smith writes articles and represents S&W almost weekly, including regular contributions to her BlogSpot blog, "the Molly Minute."

"The common misconception is that I'm captain of the junior team," says Smith. "We don't have a junior team. The juniors are part of the team."

Smith picked up her nickname "Millisecond Molly" by being competitive – "down to the last millisecond." Photographers at the Gunblogger Rendezvous match I mentioned caught still images of Molly flying headlong into a prone shooting position – she's airborne, left hand out to slow her crash to the ground, revolver safe in the other. That competitive spirit brought her into the sport.

"My dad wanted my brother and I to know gun safety when I was about 10, so he took us to the range. My brother was having a great time, and I was bored," says Smith. "A range officer friend winked at my dad and said 'I bet you shoot like a girl and can't shoot the center out of the target.' He knew that would get me going.... Took me about three weeks to totally shoot out the center or a target, totally removing the X-ring."

“Millisecond Molly” Smith, Rolling With S&W

After that, she was hooked. She discovered a natural affinity for revolvers, and charged down that road with gusto. She won her first S&W 627 at the 2008 International Revolver Championships in Moro Bay, California – she was 12 years old.

She’s still not old enough to own a gun in her own name, but she’s been back to the IRC almost every year since, placing second lady and first junior (limited) in 2013, behind S&W’s Annette Aysen. She’ll be back again in June, the day after her high school graduation. With a big smile, she says she plans to shoot the match in her cap and gown. “I don’t know how it will work with a gown and a holster, but it’s lots of style points!”

Smith travels on her own sometimes now, logging 30-40 hotel nights a year on the road. “My mom and I have been everywhere,” says Smith. “In 2010 we went to Australia for the Action Pistol Championship. For Steel Challenge in 2013 we went as a family. I’m getting very comfortable with airports.”

This year will include the MGM Grand Nationals, the IRC, two ICORE regionals, the Bianchi Cup, Steel Challenge, a hoped-for return to the Action Pistol World Championship, and a trip to support HAVA – the Honored American Veterans Afield. At their range day in Tennessee this year, Smith will come in to train the women and girls.

Since she’s not yet “of age” she can’t travel with her guns, but if she’s flying out to teach, she doesn’t always need them.

“I send my guns ahead of time, or I borrow one,” she says.

The No. 1 Gun

Peek into Smith’s shooting bag while she’s on the road, and odds are you’ll see that same 5” 627 from the S&W Performance Center she won in 2008. Equipped with an orange fiber optic front sight, and ultra-small-diameter rosewood grips made for her hands by Hogue, it’s a very capable machine.

She can’t tell you how many rounds she’s fired through it, but in five years, it’s “A LOT.”

“That’s been my gun of choice for everything I’ve done except Production shooting at the Bianchi Cup.”

This year she’s been picked up by Atlanta Arms & Ammo, the top custom ammo maker serving practical shooters in the U.S. An ammo sponsorship takes a huge load off any serious

shooter, and Smith is relishing the opportunity to work with AAA’s pro team.

Revolver whiz John Bagakis has been working with AAA on competitive loads for the .357 Magnum using .38 Long Colt cases. “I shot his gun and fell in love with it,” says Smith. Loaded with a special 170-grain round nose bullet and a stiff charge of Bullseye, the stubby little cases make the 627 easy to reload. Speedy wheelgunners have used them off-and-on for a long time in ICORE, but AAA’s project should result in the first commercial loading. Felt recoil is noticeably sharper than .38 Special, but “they’re the magic bullets,” says Smith.

For high-accuracy and speed events like Bianchi Cup and Steel Challenge she switches to 125-grain loads in normal cases. For the Cup itself, a tuned S&W Model 64 appears, rigged to shoot .38 Special in the “Production” category.

Off The Range

On the street, Smith blends in with her school-mates. She drives back and forth to school in a beat-up Toyota Prius, handed down by her father.

“It’s white, with a few scuff marks here and there – I’m really bad at parking,” she says self-consciously. “It actually broke down on my way home tonight.”

When she’s not shooting, “I do teenage girl stuff,” she says. “I hang with my friends, listen to music, read books. I’m going through this huge Hemingway/Steinbeck phase.”

“Hemingway/Steinbeck phase?” I asked.

“Yeah. I read *East of Eden* and my mind exploded, so I’ve read *Cannery Row*, *Grapes of Wrath*, you name it.” (Let’s pause here to appreciate a non-geeky teenager who read John Steinbeck’s *Grapes of Wrath*, because she WANTED TO?)

Smith couldn’t name a favorite band at first, so I asked her to hit the play button on her iPod and tell me what came up.

“Northern Downpour” by Panic at the Disco, she said.

Suddenly we were talking bands. Mumford and Sons stands at the top of her list. “Can’t believe I didn’t think of that. I’m going through a folk phase right now....”

Looking at Molly’s life, I’m reminded of a 1980s pop tune called “The Future’s So Bright, I Gotta Wear Shades” by TIMBUK3.

She’ll be an asset where ever she lands, bringing discipline, wide social connections, and that same irrepressible joy.

50 "Big Fifty Reloader"

STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...

BFR Accessories

A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

K73-50050, \$384.95

B. 50 BMG CARBIDE SIZE DIE
 The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

K73-50075, \$869.95

C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

K73-50125, \$76.95

D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

K73-50200, \$149.95

E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

Includes: RCBS Trim Pro manual case trimmer, plus an assortment of shell holders and pilots for most popular calibers. Shell holders 2, 3, 4 and 10. Pilot calibers: 22, 24, 25, 27, 28, 30, 35, 44 and 45.

RCBS Scale Check Weights

Standard Set: 60.5 grains for powder charges.	K73-12297	\$34.95
Deluxe Set: 510.5 grains for bullets, cases and powder.	K73-12458	\$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	K73-14067	\$1.35

SAA 2-Driver Set K73-15486 \$19.95

Take out your frustrations, and build your grip strength at the same time! Just think about...oh, socialized medicine, tax increases, high-capacity magazine bans, etc.

1 lb. K73-15532 \$7.99

2 lb. K73-15533 \$14.95

Note: These Come in Assorted Colors

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

K73-19538 \$13.95

The **TACCOM Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is **KEY** for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

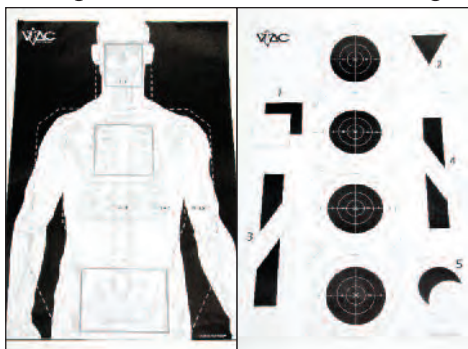

K73-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The **TACCOM Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

K73-19533 \$7.95

Viking Tactics 35" x 23" Rifle Target

Double-Sided Rifle Target (Pkg. of 10) **K73-40057 \$10.00**

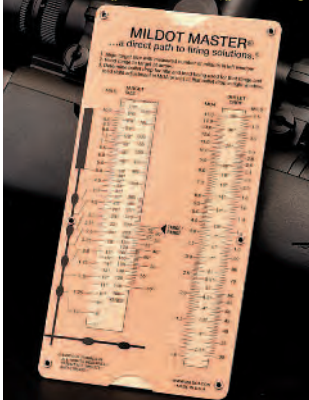

\$52.99

The **De Santis Elastic Belly Band** accommodates small autos and revolvers with one reload and a pair of handcuffs. Fastest when worn under an un-tucked shirt, but can be used with a tucked-in shirt for deep concealment.

24" - 28" waist **K73-18557** 30" - 34" waist **K73-18558**
36" - 42" waist **K73-18559** 44" - 50" waist **K73-18560**

MILDOT MASTER

You can become a master at using a Mil Dot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

Mildot Master® **K73-14762 \$29.95**

Schuster Mfg. Inc. Adjustable M1/M1A Gas Systems

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

Ultimate Advanced Revolver with Jerry Miculek – The World's Greatest Revolver Shooter
 Jerry Miculek is recognized as the fastest and most accurate revolver shooter in the world. His speed and skills are, in one word...Amazing! They've been verified in hundreds of local and national competitions. In this program, he shares with you some of the techniques and secrets he has mastered over the past 25 years to become the shooter he is today. And, you'll see an incredible display of revolver shooting and reloading. 100 min.

K73-14608 \$19.95

Competition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

Shooting Tip:

The Reload With Retention

Left: The Reload With Retention is very simple. The shooter ejects the partially depleted magazine out into his hand and stores it somewhere on his body. (The author prefers the waistband.)
Above: Then simply does a speed reload.

By Duane Thomas

In my previous article on the Modern Tactical Reload (MTR), I mentioned I did not have the necessary space to address the Reload With Retention (RWR), which I consider a superior technique. In this article we'll rectify that sad state of affairs.

In order to discuss the superiority of RWR, we must first begin by reexamining the steps necessary to execute MTR:

1. Begin as in a speed reload. Pull the gun in slightly toward the body, place the shooting hand thumb on the mag button. Grasp the magazine in the spare mag pouch with your index finger along the front of the pouch, thumb and other three fingers wrapped around the mag body.
2. As you draw the spare magazine and move it toward the gun butt, let the mag body slip between your index and middle fingers.
3. Bring the fresh magazine up to the gun butt; hold your hand in place, with the thumb and index finger in a "pincers" position to accept the old magazine as it ejects.
4. Depress the magazine release button, pop the mag into the palm of your hand, grip with the thumb and index finger and extract it from the gun.
5. Insert the fresh mag and slap it home.
6. Store the partially depleted magazine somewhere on your person.

Now let's discuss RWR, which has only three steps:

1. Pop the magazine in the gun out into the support hand.
2. Store the partially depleted magazine somewhere on your person.
3. Do a speed reload.

Thus RWR requires fewer small, dexterous hand movements, the sort that can be cataclysmically impacted under the adrenaline dump of the fight-or-flight response in combat, or even under match

stress. Also it builds on a technique with which any halfway decently trained defense-oriented handgunner should already be familiar – the speed reload.

Pros & Cons: MTR vs. RWR

The great difference between these techniques is that in MTR the spare magazine is inserted into the gun *before* the partially depleted mag is put away. In RWR the spare magazine is inserted *after* the partially empty magazine is secured. In IDPA the RWR has almost completely supplanted the MTR for the following reasons:

1. It's faster. With MTR you have to bring your support hand down and then back up twice (down to grab the fresh mag, up to seat it, down to put away the old mag, up to reacquire your two-handed grip). In RWR it's only necessary to bring the hand down and up once (down to put away the old mag, up to insert the new mag and regrip the gun). There's simply no way, given an equal skill level, to be as fast with a technique requiring twice as much movement.
2. It works better under stress. Yes, it's faster, but RWR's greatest advantage over MTR is not its speed but rather that it's a far simpler, more stress-resistant technique. Removing the magazine from the gun butt and putting it away is a gross motor skill involving only a few simple movements, and thereafter you only have to do a speed reload, a technique that should already be acid-etched into the motor nerves of every shooter, so you can tap into existing muscle memory. By contrast MTR requires several small, dexterous hand movements, and also requires juggling two magazines in one hand at the same time. This sleight-of-hand is easy to screw up when your fine motor control goes south under stress.
3. It's easier to learn. Pop the magazine, put it away, do a speed reload. How much simpler can it get?

Reload With Retention

1.

2.

3.

4.

5.

The Modern Tactical Reload

1. As the spare magazine is brought up to the gun butt, the support hand's index finger slips around the mag body; the magazine winds up gripped securely in your fist.
2. The partially depleted magazine is ejected into the palm of the hand.
3. The magazine is then pulled out of the gun with the thumb and index finger.
4. The fresh magazine is inserted into the magazine well.
5. Slap the fresh mag home. The old magazine winds up held securely between the thumb and index finger.

Note: Before executing MTR, the fresh magazine is held with the index finger along the front of the mag. After executing MTR, the old magazine winds up gripped between thumb and index finger.

This is not to say that MTR is without its advantages. While the technique overall is slower than RWR, what is considerably shorter is the amount of time the gun has no magazine in it. In MTR the amount of time the partially depleted mag is out of the gun before a fresh one is inserted is a fraction of a second. In RWR, assuming an "average trained" shooter, you're looking at three or four seconds. For me, it's about two seconds.

If I'd had the opportunity to compare these two methods when I first began shooting, there's no doubt in my mind that, after a thorough examination of both techniques' pros and cons, I'd have chosen RWR over MTR. When a technique is simpler, faster overall, more efficient, allows you to tap into already existent muscle memory for most of its movements, has great economy of motion, and is more stress-resistant because it uses gross instead of fine motor skills, it doesn't take a genius to figure out which is the better technique. But, not to date myself here, RWR simply didn't yet exist when I started shooting. Once it did show up, eventually I was able to retrain myself in the new, better way.

The "Look Good" Factor

MTR is a high-dexterity technique, and one on which not that many people have been trained. Therefore most of your fellow competitors will be very impressed when they watch you execute it. It IS a bit of a kick to perform this elegant looking technique at a match and listen to the other shooters going, "Ooooooh, how'd he do that?" You just look good with MTR.

I believe the amount of work necessary to master this technique is the main reason that some people who've been using MTR for years resist switching to RWR. When you've put in all the practice necessary to master a refined technique, then along comes a dead-simple procedure that anyone can do

with a minimum of training, that gets the same job done better than the skill you've put so much time and effort into acquiring – boy, does that frost you. An old acquaintance of mine – an MTR fan – refers to RWR as "the bozo technique" for just that reason: any bozo can do it, with very little training. However, I would point out that simplicity and ease of learning are both good things.

SUMMARY

For all the preceding discussion of the virtues and vices of MTR versus RWR, honestly I don't have much use for either as a potential combat technique. I know how to do them because in IDPA the rules are set up to outlaw the speedload, pure and simple. Both MTR and RWR require too much dexterity for me to make them a go-to part of my self-defense skill set.

However, I am glad I know how to do both MTR and RWR, quite apart from any possible match or self-defense usage, because I regard them as excellent range techniques. When you're out shooting at a serious handgun training class, where you must expend magazine after magazine while standing on line, it's a great help if you know a technique allowing you to reload your gun without constantly dropping magazines on the ground with speedloads. Not only does it save you the trouble of having to bend down dozens of times a day to rescue magazines, it ensures they don't get clogged with mud or other debris, or stepped on by a fellow student.

Both MTR and RWR have their pluses and minuses. However, after lots of thought and practice, I've decided that the speed, simplicity and stress-resistance of RWR makes it, for me, the technique of choice if I must use one or the other. Almost all IDPA shooters, and quite a few firearms trainers and legally armed, self-defense oriented shooters as well, have come to the same conclusion.

Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

K73-18599 \$14.95

drymate™

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ K73-11313 \$19.95

Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar steel stock and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

*Sand not included.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

K73-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

Comp-Tac's Trojan Horse Long Gun Case

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,

30mm tube and

bright illumination of the reticle are just a

few of the many features of the DMS-1. Bright

red illumination of the reticle adds to the quick-

ness of the sighting system in day and low-light condi-

tions. At one power it works well as a reflex sight and at

longer ranges the four-X magnification gives increased ac-

curacy.

K73-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

K73-11643 \$89.95

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle K73-25374 \$79.99
Scout Scope Mount for SKS Rifle K73-25373 78.99

Tactical Sports 45°-Offset Auxillary Optics Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Auxillary Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)
45° Offset Optic Mount K73-14472 \$14.99

TACCOM, LLC 90° C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE (Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

SHEEP, WOLVES

By Barrett Tillman

Lt. Col. Dave Grossman, U.S. Army (Ret.), is best known for his combat mindset survey, *On Killing*. Published in 1996, it remains on military and other professional reading lists for its historical perspective and insight.

A former paratrooper and ranger, Grossman continues sharing his knowledge and views with the military, police, and emergency services communities as well as armed citizens. Traveling 300 days a year for 16 years, he sees a wide variety of groups and individuals who have been or might be exposed to violence. Many of his appearances are sold out, and in December 2013 he spoke to a near-capacity audience in Mesa, Arizona.

Grossman gave a six-hour presentation covering numerous aspects of what he calls the “sheepdog” philosophy. He opines that 98% of humans are sheep waiting to be sheared or worse; 1% are wolves and 1% are protective sheepdogs. He covers a wide range of topics including heavy Second Amendment emphasis, insisting, “Only predators can hunt down other predators,” hence the armed good guys (sheepdogs) are needed to deter the human wolves.

Rather than crazed individuals or theological zealots, Grossman insists, “Our enemy is denial.” Part of the problem he sees is individual and institutional inability to conceive that something atrocious could happen to *them*. From local non-responders at Columbine High School and other U.S. mass murders to nation-state atrocities such as the Holocaust, humans have proven to be supreme deniers of what history proves not only possible, but also inevitable.

New in Firearms History

Typically history oriented, Grossman notes that civilian mass killings with firearms are new in the 500-year history of gunpowder. Offenders come from across the spectrum: rich, poor, smart, dumb, etc. The worst cases have been in Europe (notably Finland) and there are many edged-

weapon killings in China. Grossman believes the reason for high body counts in the U.S. appears to be the recent juncture of (usually) illegally acquired guns and extremely violent video games. He described how to “win” some of the most appalling games, but First Amendment considerations usually triumph in court.

Meanwhile, Islamists believe that the best way to advance their violent cause is to kill infidel children. The best (worst) example occurred when Chechen zealots took over a Russian school in 2004. Grossman says the opposition sees that incident as a model for Over Here. He recounted some horrific (an understatement) details of what the terrorists inflicted on 1,000 captives, mostly kids and mothers. More than 300 hostages died in

“ONLY
PREDATORS
CAN
HUNT DOWN
OTHER
PREDATORS”

the three-day horror. Nearly 50 perpetrators were killed or caught but about 12 escaped and are considered potential leaders for the next round. Al Qaeda reputedly says that the U.S. and West owe “The Base” about 2,000,000 deaths.

In a startling contrast, Grossman explains that we spend billions on fire protection (often half the cost of a new building) but almost zip in hardening entrances (at the cost of less than \$25 per window!) There have been zero school fatalities to fire in 50-plus years. Yet only now are more schools deploying armed guards, which has been SOP in Israel for decades. Guess what: *No terrorist shootings have occurred in Israeli schools in decades.*

Elsewhere, mass murderers pick on schools because they’re usually undefended and the kids offer easy targets. But Grossman believes that any action can be helpful, as many killers stop at the first sign of resistance. In practice, he taught his grandchildren to throw books at his head, then run.

“Throw harder, Billy.”

“Gosh, Grampa, this is fun!”

In the future, Grossman says we can expect mini-WMDs in terrorist “events” at schools and

AND SHEEPDOGS

malls: explosives and firebombs. Most 55-gallon drums are portable and potent. Also expect use of toxic gas.

But in context of serial and mass murderers, Grossman has some solid suggestions. First, stop calling mass murderers “shooters.” They are *murderers*. Grossman adds, “They’ve taken our sport, our lifestyle, and made it a horrible name.” Those who believe in self defense need to win the war of words, much as Alan Korwin (www.gunlaws.com) has long advocated the use of the term “marks-men” rather than “gun nuts.”

Using one example from his native Arkansas, Grossman cited a massacre in 1998. Two juveniles stole guns from a relative (a game warden) and murdered five people at a school near Jonesboro. Because of lenient sentencing laws, they were released at age 21 and one of them resumed a life of crime.

Investigators noted that the Aurora, Colorado, killer passed up two theaters that did not prohibit weapons. That’s what detectives call “A Clue.”

“Newtown was just the start,” Grossman asserts. He considers Virginia Tech’s 32 dead as “inevitable” given the university’s no-defense policy.

Schools definitely can be made into harder targets, especially with armed personnel, secure doors and windows. But Grossman contends that shall-issue CCW is “the greatest grassroots movement in US history.” Nearly every state now has shall-issue requirements, excepting criminals and the mentally incompetent. (Criminals will violate the law anyway – that’s why they’re called criminals.)

The national homicide rate has remained flat line for decades, but aggravated assault has spiked alongside releases from prison. Conclusion: We’ll never build enough prisons or have enough mental-health people and medications to handle all the potential perps, so expect things to get worse. But keep in mind: Only an armed sheepdog can protect the flock’s lambs from the wolves circling out beyond the perimeter.

The Loose Puppy

As an army officer, Grossman pays close attention to veterans’ concerns. Some health care

experts declare that PTSD is permanent. Clearly this is not so, but there’s money in them-thar counseling sessions. Grossman notes that of about 2.8 million military vets of the international terror war, none have committed mass killings upon return. (*A WWII army veteran murdered 13 in New Jersey in 1946, while the 1966 Texas Tower killer saw no combat as a marine. In 1995, Desert Storm veteran Timothy McVeigh blew up the federal building in Oklahoma City. The 2012 slayer of six Sikhs in Wisconsin was a former non-combatant soldier.*)

It’s important to realize that the mammalian (“puppy”) brain can break through the frontal-lobe doggie door and take over for a spell, hence the phenomenon of combat vets jumping for cover at the sound of an auto backfiring. The syndrome has

been known for decades but only now is starting to be accepted as fairly normal, with wider discussion and understanding.

We asked about former Homeland Security czar Janet Napolitano’s concern of vets being potential terrorists. Grossman said it’s hardly discussed in the groups he addresses because it’s understood that she’s a liberal with an agenda.

Meanwhile, what can individuals do in an increasingly violent world? For starters, they can recognize that The State has zero obligation to protect them individually.

Twice the U.S. Supreme Court has ruled that police are not required to respond to cries for help from you, Mr. Tommy Timid or Ms. Mary Meek. You can read *Warren v. District of Columbia* (1981) and *Bowers v. DeVito* (1982).

Secondly, individuals have not only the responsibility to defend themselves, but also the *right* (often miscast as permission in some jurisdictions). When crime victims are denied the means to defend their lives where The State fails – whether on 9-11 or in an urban jungle – the options are clear. Either avoid the problem by voting with one’s feet, or as Grossman insists, get involved in the political process. After all, Sheepdogs are not limited as to where they may roam.

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.
