Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

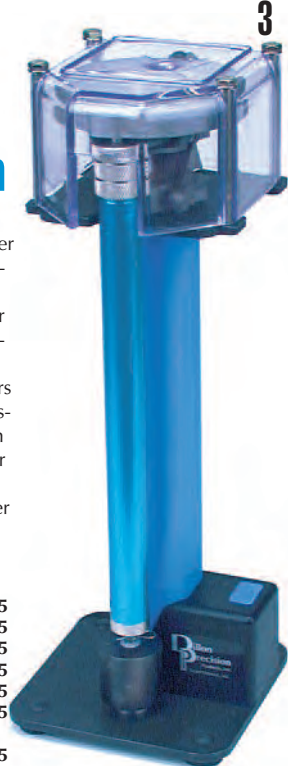

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

Your review ["Stephen Hunter and The Third Bullet," April issue] of Stephen Hunter's new book, "The Third Bullet" revives my old interest in the JFK assassination. I once bought a Carcano and tested it out, and also went to Dealey Plaza on a traffic-free Sunday morning to "scope out" the scene. Whatever Hunter thinks, the various theories are all – in my opinion – based on a wrong foundation.

Oswald was not out to kill JFK. He was after Governor Connally, who had been Secretary of the Navy [January 25, 1961 – December 20, 1961], and had refused to help Oswald bring his Russian wife back to the U.S. when he decided life in the Soviet Union wasn't such a good deal.

Hal Rounds – Somerville, TN

Hal, I have to confess being totally unaware of that information about Connally. That being the case, it DOES make one wonder if Connally might indeed have been the intended (or at least primary) target, especially given Oswald's history of mediocre marksmanship.

Hello guys at Dillon, I never had reason to call as I have never had a problem with your products. I enjoy receiving **The Blue Press** and have been concerned about school shootings. Reading the article ["School Shootings Solution: Not Gun Control or Guard Patrol, but Door Control," March issue] by Selwyn Duke, I was compelled to contact you. I think the guy is right on.

Tony – manglemetal@earthlink.net

Just got my new [April] **Blue Press** issue tonight and immediately read "How to talk to Liberals about 'Assault Weapons' Bans." What a well thought out list of ways and things to say to discount what those who oppose guns say and want to do. It infuriates me when they talk about this subject, and proving their ignorance and stupidity. I completely confess to not understanding all the effects listed until tonight. Obviously, the whole "take this right, then which one is next" argument I've thought about. But the economic distress this would put upon us never reached me 'til now. This should be condensed in form and be required reading for anyone who dares to take a step in the direction of ANY type of gun ban. You guys put out a great publication that I look forward to every month and I just had to hand it to you!! Keep up the great work and greater customer service!

Reviewed by Peter Caroline

Most new toys arrive at Christmas. This one didn't show up at my house until early February, but it was worth the wait. It all started in mid-December, when I got a phone call from my friend, Bill Berlat, in Pinetop, Arizona. Bill always enjoys critiquing my taste in handguns, referring to most of my prized possessions as "catfish anchors." He asked me if I'd seen the new NAA mini-revolver that Jeff Quinn had just reviewed on Gunblast.com. I hadn't, so I got on my laptop, and there it was, a tiny little .22 that Jeff was putting through its paces.

Now, North American Arms has been making little bitty revolvers for a long time, and they've sold a lot of them. They're a simple, 19th century single-action design, precisely fashioned in stainless steel, with a spur trigger. To load or unload them, you pull out the cylinder pin and remove the cylinder. Not

quite what you'd choose for a prolonged gunfight, but that's not what they're for. This is a gun for deep cover; you could conceal it in a Speedo, if your Speedo had a pocket.

This new gun, entitled the Sidewinder, is a whole different ballgame. It has a swing-out cylinder, just like a full-size revolver. Except this cylinder swings out on the right-hand side. To accomplish this, you cock back the hammer about 1/4" until it clicks, then pull the cylinder pin forward and push the cylinder out from the left hand side. There's a star extractor, just like the big guys. And best of all, the Sidewinder can

be ordered with two cylinder/crane assemblies, in .22 Magnum and .22 Long Rifle.

Of course, I had to have one. Why? Because it's new, it's different and, most important, because I didn't have one. You'd think I'd had a deprived childhood or something. I sent off a note to NAA,

The NAA Sidewinder is an elegant and eminently concealable solution to the First Rule of Gunfighting: *Always have a gun.*

American Arms Sidewinder Revolver ¹¹

and they replied, saying that my Sidewinder would be ready sometime after the New Year.

Early in January, I drove to Las Vegas to attend the 2013 SHOT Show. My first stop at the Show was the North American Arms booth, and I got to examine the Sidewinder close up. I was not disappointed; it is a gem. I congratulated the NAA people on finally making a gun for us left-handers. They explained that the reason the cylinder swung to the right was actually so it wouldn't get hung up on the cylinder stop, which is on the left. Oh, okay, never mind.

When my Sidewinder arrived, I had to try it out immediately. I drove down to a spot in the desert that serves as a rough shooting range, and set up an NRA Police Silhouette target at 10 yards. The front sight is a tiny little pin; the rear sight is essentially the top of your firing pin slot. Nonetheless, I was able to put five .22 WMR hollowpoints into the center-of-mass scoring area and, after reloading, five more into the head. I changed cylinders, and got the same results with .22 LR. A week later, shooting from a bench rest at a real shooting range, I was able to consistently get five shots into a 10-yard group you could cover with a silver dollar. With the .22 Magnum ammo, you do have to establish a firm grip on the

Sidewinder; it's tiny and it will tend to twist in your hand; not so much with .22 LR.

Extracting the .22 LR empties is easy; just punch the extractor rod and they fall out. Because the extractor travels only about 1/4", the .22 Magnums require a little help from your fingers at the end of the stroke.

Like NAA's other single-action revolvers, the Sidewinder comes with hammer safety notches milled on the rim of the cylinder between each chamber. The blade firing pin fits into the notch, preventing an accidental impact from setting off the cartridge. The cartridge moves into battery only when you cock the hammer. It's a simple solution, and highly effective.

The NAA Sidewinder comes in a black plastic hard case, complete with a miniscule padlock that can be used either to lock the case or to lock the gun with the cylinder swung open.

At an MSRP of \$349 in .22 Magnum, or \$429 with the accessory .22 Long Rifle cylinder assembly, the NAA Sidewinder is an elegant and eminently concealable solution to the First Rule of Gunfighting: *Always have a gun.*

WANT TO RELOAD? SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K27-21894 \$44.95

THE SHELLSORTER

...is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting.

The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time.

The **SHELLSORTER** is made of ABS, a strong plastic which will give a lifetime of service.

K27-19972 \$39.95

FROGLUBE CLP

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products. Frequent use will keep firearms running at optimal performance and not harm the FrogLube coating.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K27-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K27-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

RL 550B ACCESSORIES

A. RL 550B CALIBER CONVERSION KITS
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.
K27-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K27-20782, \$76.95 ea.**
 Magnum Rifle Powder Bar **K27-21353, \$29.95 each**
 X-Small Powder Bar **K27-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K27-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

K27-20064, \$11.35 each
Three or more, \$10.25 ea.

X-Large Powder Die, K27-21253, \$19.95 each

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

K27-13909, \$22.95 each
Three or more, \$20.95 ea.

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

K27-22055, \$20.95 each
Three or more, \$18.95 ea.

G. 1" BENCH WRENCH

K27-10842, \$7.95 each
Two or more, \$7.10 ea.

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K27-22080** is **\$254.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below.) Replacement carbide cutting blades, **K27-13141**, are **\$19.95** each. Upper lock rings, **K27-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

K27-20095

Dillon's Case Preparation Equipment

CV-2001
K27-20493
\$187.95

CV-750 K27-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K27-20675 \$72.95

CM-500 Case/Media Separator K27-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K27-22047 \$212.95

Euro CV-750 K27-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls of the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K27-13804** **\$8.95**
Case (20 pc.) **K27-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **K27-13733** **\$8.95**
Case (20 pc.) **K27-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **K27-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag **K27-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag **K27-13496** **\$15.95**

Protecting the Second Amendment -

29 Jan 2013 – We are current or former Army Reserve, National Guard, and active duty US Army Special Forces soldiers (Green Berets).

We have all taken an oath to “support and defend the Constitution of the United States against all enemies foreign and domestic; that I will bear true faith and allegiance to the same....”

The Constitution of the United States is without a doubt the single greatest document in the history of mankind, codifying the fundamental principle of governmental power and authority being derived from and granted through the consent of the governed. Our Constitution established a system of governance that preserves, protects, and holds sacrosanct the individual rights and primacy of the governed as well as providing for the explicit protection of the governed from governmental tyranny and/or oppression. We have witnessed the insidious and iniquitous effects of tyranny and oppression on people all over the world. We and our forebears have embodied and personified our organizational motto, *De Oppresso Liber* [To Free the Oppressed], for more than a half century as we have fought, shed blood, and died in the pursuit of freedom for the oppressed.

Like you, we are also loving and caring fathers and grandfathers. Like you, we have been stunned, horrified, and angered by the tragedies of Columbine, Virginia Tech, Aurora, Fort Hood, and Sandy Hook; and like you, we are searching for solutions to the problem of gun-related crimes in our society. Many of us are educators in our second careers and have a special interest to find a solution to this problem. However, unlike much of the current *vox populi* reactions to this tragedy, we offer a different perspective.

First, we need to set the record straight on a few things. The current debate is over so-called “assault weapons” and high-capacity magazines. The terms “assault weapon” and “assault rifle” are often confused. According to Bruce H. Kobayashi and Joseph E. Olson, writing in the *Stanford Law and Policy Review*, “Prior to 1989, the term ‘assault weapon’ did not exist in the lexicon of firearms. It is a political term [underline added for emphasis], developed by anti-gun publicists to expand the category of assault rifles.”

The M4A1 carbine is a U.S. military service rifle – it is an assault rifle. The AR-15 is not an assault rifle. The “AR” in its name does not stand for “Assault Rifle” – it is the designation from the first two letters of the manufacturer’s name –

ArmaLite Corporation. The AR-15 is designed so that it cosmetically looks like the M4A1 carbine assault rifle, but it is impossible to configure the AR-15 to be a fully automatic assault rifle. It is a single shot semi-automatic rifle that can fire between 45 and 60 rounds per minute depending on the skill of the operator. The M4A1 can fire up to 950 rounds per minute. In 1986, the federal government banned the import or manufacture of new fully automatic firearms for sale to civilians. Therefore, the sale of assault rifles is already banned or heavily restricted!

The second part of the current debate is over “high-capacity magazines” capable of holding more than 10 rounds in the magazine. As experts in military weapons of all types, it is our considered opinion that reducing magazine capacity from 30 rounds to 10 rounds will only require an additional 6-8 seconds to change two empty 10 round magazines with full magazines. Would an increase of 6-8 seconds make any real difference to the outcome in a mass-shooting incident?

In our opinion it would not. Outlawing such “high-capacity magazines” would, however, outlaw a class of firearms that are “in common use.” As such this would be in contravention to the opinion expressed by the U.S. Supreme Court recent decisions.

Moreover, when the Federal Assault Weapons Ban became law

in 1994, manufacturers began retooling to produce firearms and magazines that were compliant. One of those ban-compliant firearms was the Hi-Point 995, which was sold with 10-round magazines. In 1999, five years into the Federal Assault Weapons Ban, the Columbine High School massacre occurred. One of the perpetrators, Eric Harris, was armed with a Hi-Point 995. Undeterred by the 10-round capacity of his magazines, Harris simply brought more of them: 13 magazines would be found in the massacre’s aftermath. Harris fired 96 rounds before killing himself.

Now that we have those facts straight, in our opinion, it is too easy to conclude that the problem is guns and that the solution to the problem is more and stricter gun-control laws. For politicians, it is politically expedient to take that position and pass more gun-control laws and then claim to constituents that they have done the right thing in the interest of protecting our children. Who can argue with that? Of course we all want to find a solution. But, is the problem really guns? Would increasing gun regulation solve the problem? Did we outlaw cars to combat drunk driving?

Why ALL Americans Should Be Concerned ²¹

What can we learn from experiences with this issue elsewhere? We cite the experience in Great Britain. Despite the absence of a “gun culture,” Great Britain, with one-fifth the population of the U.S., has experienced mass shootings that are eerily similar to those we have experienced in recent years. In 1987 a lone gunman killed 18 people in Hungerford. What followed was the Firearms Act of 1988 making registration mandatory and banning semi-automatic guns and pump-action shotguns. Despite this ban, on March 13, 1996 a disturbed 43-year old former scout leader, Thomas Hamilton, murdered 16 school children aged five and six and a teacher at a primary school in Dunblane, Scotland. Within a year and a half the Firearms Act was amended to ban all private ownership of handguns. After both shootings there were amnesty periods resulting in the surrender of thousands of firearms and ammunition. Despite having the toughest gun-control laws in the world, gun-related crimes increased in 2003 by 35 percent over the previous year with firearms used in 9,974 recorded crimes in the preceding 12 months. Gun-related homicides were up 32 percent over the same period. Overall, gun-related crime had increased 65 percent since the Dunblane massacre and implementation of the toughest gun-control laws in the developed world. In contrast, in 2009 (five years after the Federal Assault Weapons Ban expired) total firearm-related homicides in the U.S. declined by 9 percent from the 2005

high (Source: “*FBI Uniform Crime Reporting Master File, Table 310, Murder Victims – Circumstances and Weapons Used or Cause of Death: 2000-2009*”).

Are there unintended consequences of stricter gun-control laws and the politically expedient path that we have started down?

In a recent op-ed piece in the *San Francisco Chronicle*, Brett Joshpe wrote, “Gun advocates will be hard-pressed to explain why the average American citizen needs an assault weapon with a high-capacity magazine other than for recreational purposes.” We agree with Kevin D. Williamson (*National Review Online*, December 28, 2012): “The problem with this argument is that there is no legitimate exception to the Second Amendment right that excludes military-style weapons, because military-style weapons are precisely what the Second Amendment guarantees our right to keep and bear.”

“The purpose of the Second Amendment is to secure our ability to oppose enemies foreign and

domestic, a guarantee against disorder and tyranny. Consider the words of Supreme Court Justice Joseph Story: “The importance of this article will scarcely be doubted by any persons, who have duly reflected upon the subject. The militia is the natural defense of a free country against sudden foreign invasions, domestic insurrections, and domestic usurpations of power by rulers. It is against sound policy for a free people to keep up large military establishments and standing armies in time of peace, both from the enormous expenses, with which they are attended, and the facile means, which they afford to ambitious and unprincipled rulers, to subvert the government, or trample upon the rights of the people. The right of the citizens to keep and bear arms has justly been considered, as the palladium of the liberties of a republic; since it offers a strong moral check against the usurpation and arbitrary power of rulers; and will generally, even if these are successful in the first instance, enable the people to resist and triumph over them.”

The Second Amendment has been ruled to specifically extend to firearms “in common use” by the military by the U.S. Supreme Court ruling in *U.S. v. Miller* (1939). In *Printz v. U.S.* (1997) Justice Thomas wrote: “In *Miller* we determined that the Second Amendment did not guarantee a citizen’s right to possess a sawed-off shot gun because that weapon had not been shown to be ‘ordinary military equipment’ that could ‘could contribute to the common defense.’”

A citizen’s right to keep and bear arms for personal defense unconnected with service in a militia has been reaffirmed in the U.S. Supreme Court decision (*District of Columbia, et al. v. Heller*, 2008). The Court Justice Scalia wrote in the majority opinion: “The Second Amendment protects an individual right to possess a firearm unconnected with service in a militia, and to use that arm for traditionally lawful purposes, such as self-defense within the home.” Justice Scalia went on to define a militia as “comprised all males physically capable of acting in concert for the common defense....”

The Anti-Federalists feared that the Federal Government would disarm the people in order to disable this citizens’ militia, enabling a politicized standing army or a select militia to rule. The response was to deny Congress power to abridge the ancient right of individuals to keep and bear arms, so that the ideal of a citizens’ militia would be preserved,” he explained.

Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

Stylemaster-DL \$150

A superior shoulder rig made of best-quality leather with solid brass fittings — no cheap plastic, no soft suede or other low-quality leather.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K27-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K27-11702 89.95**
"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.
- "Officers" Model" Safepacker, RH **K27-11701 89.95**

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

Uncle Mike's Kydex Holsters

Michaels of Oregon's injection-molded Kydex holsters have a level of detailing, quality and affordability unmatched by other manufacturing methods. The almost-vertical rake allows for behind-the-hip carry, and for some applications, the holster can function as a crossdraw. Smaller-size holsters can also be used for "appendix" carry. To aid concealment and to assist in the draw, the holster rides close to the body at a mid-level height. The injection-molded belt loop is designed to accept and support a variety of belts from 1" to 1.75" wide.

**Holster NOT
Included**

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

Dillon Range Bag

Dillon's Modular Range Bag features a MOLLE-style fastener system to make it easy to reconfigure the bag to fit your individual needs. The end compartments and side compartments are removable, and extra end compartments are available.

The Range Bag comes with a removable, open-topped Stage Bag, so you can carry your ammo to shoot a stage

without having to take the entire bag. The main compartment is designed to hold the Stage Bag or a Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 36).

RL 550B (Electronic Scale)	K27-22117	250.95
XL 650 (Electronic Scale)	K27-22118	266.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

SDB Mount	K27-22223	\$64.95
RL550/XL650	K27-22051	48.95
XL650-only	K27-22052	45.95

Bullet Tray Kits

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the "feel" of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550B/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

Bullet Tray Kit	K27-22214	\$41.95
RL 1050 Tray Kit	K27-22215	41.95

RL 550B/XL 650 Toolhead Stands

This all-metal stand provides a place to store your complete caliber conversions: toolhead, reloading dies, powder measure, shellplate and locator buttons. The mounting system makes it possible to secure the toolhead stands to your bench, keeping them from getting knocked over by your well-meaning-but-clumsy shooting buddies.

Dillon's new toolhead stands are finished with a high-quality, durable powder coating designed to meet the needs of even the highest volume, commercial reloading operation. They are available individually or in packages of three, and are packaged with reloading data labels to help you record your favorite loads.

550/650 Stand	K27-22055	\$20.95 ea.
Three or more, \$18.95 ea.		

Low Powder Sensor

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light.

This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Sensor	K27-16306	\$41.95
--------	------------------	----------------

Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel."

A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

------------------	----------------

Dillon's Pistol Die Sets

Size Die

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)

.223 Remington	K27-10839	\$66.95

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mouser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag., .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, K27-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

'Belted Magnum' Powder System

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder.

Like all of Dillon's powder measures, the Belted Magnum Powder System is case-activated and can be used with your RL 550B, XL 650 or AT 500 reloader. It's ideal for loading large-caliber magnum rifle cartridges. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

The "Belted Magnum" Powder System is based on our SL 900 Shot Dispenser, so the Maximum Charge Bar won't work in our standard powder measures – you'll need to buy the entire system. The good news is that the "Belted Magnum" Powder System has an integral drain, so it's easy to empty the hopper in order to change powder types; so, if you load several big calibers with various powders, it's easy to switch from one to another.

Keep plenty of extra powder on hand, because when you're dispensing 100-plus grains into every cartridge, you're gonna need it! Magnum Powder System **K27-97126 \$137.95**

PROTEKTOR MODEL

The Original Leather Sandbag* Rifle Rests

All Protektor Model leather bags are made with the best top grain cowhide available. The welded steel rest is strong enough to stand on and won't break if dropped (*Owl Ear Front Bag sold separately*).

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

- OAL Gauge **K27-14622 \$38.95**
 OAL Gauge, Curved **K27-14862 39.95**
 (Use for auto, lever and pump rifles)

Modified Case (required)

CLASSIC FIREARMS: The Winchester

“The rifle
hand or in
from 1892

By John Marshall

The Winchester Model 1892 rifle, designed by John Browning, is widely regarded as perhaps the smoothest, handiest and most attractive lever action ever produced. Today the originals are collector classics and modern versions of it are still being made all over the world. Conceived as a light rifle for lower-powered cartridges, with modern metallurgy it's strong enough to handle more potent rounds such as the .44 Remington Magnum and the .454 Casull. Cowboy action shooters love it for its quick handling and reliability. Hunters find it just the ticket for shooting medium game in the brush. It's the 19th Century version of an “assault rifle,” as many shots can be triggered off rapidly. As actor Chuck Connors showed in the TV western series “The Rifleman,” a modified version could be made to fire almost as fast as a machine gun. Famed gun writer Jeff Cooper once touted it as an almost ideal home-defense weapon.

How the gun came to be is an interesting story. Let me take you back in time to the year 1892, and let's eavesdrop on an (admittedly apocryphal) conversation between famed firearms inventor John Browning and his visiting guest T.G. Bennett, Oliver Winchester's son-in-law. Bennett, who was then President and General Manager of Winchester Repeating Arms, had already established an alliance with Browning in the design and manufacture of a number of firearms. He had come to Ogden, Utah Territory, to discuss a need and to seal a deal with Browning.

“John,” said Bennett, “Winchester, as always, has been very pleased with the excellent work you've done for us over the past years. Your big Model 1886 lever action rifle in particular has been a terrific success. It's strong and smooth, and we've been able to chamber it for some pretty powerful cartridges like the .45-70 Government. But today I want to talk to you about designing another rifle for us. As you know, we've been producing our Model 1873 for 19 years. It was designed to handle lower-powered cartridges like the .44-40 W.C.F. and 38-40 W.C.F. which have

also been usable in handguns. Of course we've done well with it, but we've decided we'd like to replace it with something smaller, lighter, handier, and stronger. It would be an ideal new companion rifle for revolver shooters who like to use the same cartridges in both their rifles and handguns.”

“Tom,” said Browning, I've been thinking about something along those lines already. A rifle like that would really be something. It would be extremely versatile and I bet you could have used something that handy during your service in the Civil War.”

“You are exactly right, John. I would have loved to have had such a rifle back then. We're in a more modern age now, and with our increased manufacturing capability and better steels, we're ready to make a fine replacement for the Model 1873. We just need your design skills to get this project rolling.”

“What do you propose?” Browning replied.

“We've been thinking,” said Bennett, “that something like a scaled-down Model 1886 might be just the ticket. It's the smoothest rifle we've ever made, and a smaller version of it would be, in our opinion, ideal.”

“Agreed,” Browning replied. “Tell me, what would you propose for my compensation for this new design?” Bennett stroked his chin and said “We're anxious to get started on this project, John. In addition to our usual agreement, we are prepared to offer you a bonus of ten thousand dollars if you can deliver a working prototype in ninety days. If you can do it in sixty days, I'll see to it that you get fifteen thousand. How does that sound to you?”

Browning thought it over for a moment. “Tom, I'll tell you what. If I can deliver it in *one month* or less, you will owe me a bonus of twenty thousand dollars. If I can't, it will be free. Do you want to take me up on my bet?”

Now twenty thousand dollars was a *lot* of money in those days, but Bennett was anxious to get going and the deal was struck. Browning, working diligently and making good on his bet, did deliver a functioning prototype in under a month. For both Browning and Winchester, the Model 1892 proved to be an incredible success.

Winchester Model 1892 Rifle

It was comfortable to handle and carried well in the saddle scabbard. 1,004,675 of them were produced to 1932, and they continued to be sold through 1941.”

Essentially, the rifle did away with the knee-action locking system of the Model 1873 and replaced that with two vertically-moving locking columns that dovetailed into the rear of the breechblock and the receiver. This made for a very strong and smooth action that could be housed in a more compact receiver.

The rifle was comfortable to handle and carried well in the hand or in a saddle scabbard. 1,004,675 of them were produced from 1892 to 1932, and they continued to be sold through 1941. The Model 1892 was offered in several configurations, among them rifles, takedown, carbines, shorter “trapper” carbines and long-barreled “muskets.” The calibers used in the Model 92 and its similar siblings, the Models 53 and 65, were many. These included .44-40, 38-40, .32-20, .25-20 and .218 Bee.

Custom guns could be had on order from the factory, with octagonal barrels, half round and half octagonal barrels, special barrel lengths, different sights, fancy finish and wood, special buttplate styles, engraving, and even gold inlays being available. Collectors salivate today over some of the rare ones that have survived in good condition. After production of the '92 ceased, it was never revived at the factory in New Haven, Connecticut. A direct copy of the '92 was made by *Garate, Anitua y Cia.* in Eibar, Spain from 1915 to 1938. Known as *El Tigre*, it was widely distributed and popular in South America.

Hollywood latched right on to the Model '92. John Wayne, in the classic 1939 western movie “Stagecoach” wielded a special short-barreled '92 with a large-loop lever, twirling it expertly with one hand to actuate it. I've examined the similar gun he used in “True Grit” personally, and it's a real smooth-operating honey. The '92 was a natural in calibers .44-40 and .38-40 for firing the popular 5-in-1 blanks used in the movies in a number of guns. It was rare not to see the readily available '92 in movies and TV westerns.

After World War II, consumer demand for the slick little '92 didn't cease, and a number of other manufacturers jumped in to fill the void by making

virtual carbon copies of Browning's superb design. These newer guns are often found in additional calibers such as .45 Colt, .357 Magnum, .44 Magnum, and even the stomping .454 Casull.

Rossi makes excellent '92s in Brazil, often found stamped “Puma.” Their more recent rifles deviate from the original design with a rotating safety on top of the rear of the breechblock. I have a 1980-vintage Rossi carbine (without the safety thingy) in .357 Magnum chambering, and I find it very pleasant to shoot with either .357s or .38 Specials. It's one of my personal favorites, and I think it's an ideal companion piece for any .357 or .38 Special handgun. In a rifle, the .357 Magnum approaches the power level of the popular .30-30 cartridge.

Chiappa Firearms has made '92s in Italy. Browning Arms Company markets high-quality '92s made in Japan. A Browning '92 carbine made in 1983 is illustrated for this article. It's in .44 Magnum caliber, and of course it will also take the easier-on-the-shoulder .44 Specials. It's quite true to the original design, except that it has the trademark gold-plated trigger of many Browning firearms. John Browning designed the gun with only a half-cock safety, and so that's the way this one was produced. Winchester has resurrected the Model 1892 in recent years. These new '92s are made in Japan in several configurations: “sporting rifle,” “carbine,” “trapper's carbine” and “musket.” These recent Winchesters have lawyer-friendly sliding safeties on the upper tang behind the hammer.

Collectors ardently pursue any Winchester '92 in good working condition, and the high prices asked for them reflect this demand. For those anxious to know more about their original '92s, the factory records are available at the Cody Firearms Museum in Cody, Wyoming, from serial number 1 through 379999. Luckily for anyone wanting a Model '92 in a more modern caliber, affordable quality reproductions of the original Winchesters are available almost everywhere. John Browning's masterpiece design has lived on for 120 years, and shows no sign of becoming obsolete. It will probably still be around well into the 22nd Century!

The M2 Chronograph comes with sensors, screens and one two-foot mounting bracket. A nylon carrying case and tripod are available options. The CED7000 Shot Timer is a breakthrough in technology. No other timer to date offers this combination of advanced features, compact size and light weight. This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

Take out your frustrations, and build your grip strength at the same time! Just think about...oh, the new Supreme Court, socialized medicine, tax increases, high-capacity magazine bans, etc., and use the one-pound ball. Or, think about the "bailout" legislation and the luxury resort vacation the execs at AIG enjoyed on YOUR DIME. You'll need the two-pound ball for THAT one!

HALF-PRICE

Concealed Carry Permit Training

Former CIA Officer now sharing his remarkable concealed carry course online. Thanks to law §18.2-308(G)(7), you never have to leave your home for one of the nation's most valuable concealed carry permits.

This course includes 7 free concealed carry gifts. Blue Press readers can now use coupon code Guns19 and get this course for HALF-PRICE. (This code expires May 15, 2013.)

Here's what others say about this course: "I loved your course, I've learned a lot, and the material that came with it is invaluable. I'm telling everyone about it."~*Peter Martin, Prescott, AZ.* And James Dunner from Las Vegas, NV says, "Jason's concealed carry course is a no brainer. I recommend it to anyone concerned about crime and defending their family in an increasingly unpredictable world." For full details visit...

*FAQ About Berry's Preferred Plated Bullets

1. What is "DS?"

"Double Struck." Double-Struck bullets go through an extra sizing process after being plated. This makes the bullet 100 percent symmetrical. This can give you an edge in competition, but most shooters won't notice the difference.

2. What is the difference between Plated/Jacketed/Cast bullets?

Berry's Preferred Plated bullets begin as a swaged lead core. The plating process works through electrolysis. The swaged lead cores are tumbled in an electrically charged cyanide bath containing high-grade copper ingots. The copper clings to the lead and the longer the bullets remain in the bath, the thicker the plating.

3. How do I load Berry's Preferred Plated Bullets?

Plated bullets occupy a position between cast bullets and jacketed bullets. They are soft lead, but have a hard outer shell on them. When loading plated bullets we have found best results using low- to mid-range jacketed data in the load manual. You must use data for a bullet that has the same weight and profile as the one you are loading. Do not exceed mid-range loads.

4. How fast can I shoot these bullets?

Velocities depend on the caliber, but as a rule of thumb, we recommend you don't shoot our plated bullets over 1200 fps (feet-per-second). Our 44s actually shoot best around 1150 fps. 45s are generally good at 850-900 fps. Our bullets are NOT recommended for magnum velocities.

5. Can I shoot your plated bullets in my GLOCK?

Yes. We have a large contingent of loyal GLOCK shooters using our bullets. The plating is thick enough that you will not get lead fouling in your bore, which is the nemesis of polygonal barrels.

*DS = Double Struck, TP = Thick Plate, HB = Hollow Base, RN = Round Nose, FP = Flat Point, SWC = Semi Wadcutter, WC = Wadcutter

About SNS Casting: SNS Casting, Inc. is a family owned and operated business located in rural Flanagan, Illinois and was officially founded by Jim Stinar in the winter of 2008. Jim's casting history actually began in the mid 1980s as a hobby. This supplied not only himself but a group of friends and fellow avid shooters who were tired of paying too much for inferior products. Eventually, word was spreading throughout the surrounding states of his bullets, which were priced right for the quality.

Today, SNS Casting features four of Magma Engineering's Mark VIII casters and two Lube Master luber/sizers fitted with M-A Systems Collators. **Our lead is a certified factory alloy of 92 percent lead, 6 percent antimony and 2 percent tin, which is purchased in 44,000-pound lots to ensure consistent quality. The lube we use is Magma blue lube.**

We have two full-time employees at SNS Casting. Jim Stinar and son Ryan are avid USPSA (A30909, A63666) shooters, SASS members and NRA members.

NOTICE: There is a \$20.00 minimum 'Hazardous Material' (HazMat) handling fee for shipping PRIMERS. This fee is assessed in increments of 10,000 primers. Primer orders MUST be shipped separate from other items, and require a separate shipping and handling charge. Shipping and HazMat fees are not included in prices.

The Otis Technology, Inc. Breech-to-Muzzle Cleaning System cleans rifles .22 to .50

cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal.

The system includes three memory-flex rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

K27-18174 \$39.95

Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jig sized for a tight bore fit

which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Concealed Carry Tote⁴⁷

\$45⁰⁰
K27-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged nylon fabric, with heavy-duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5"x11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner **K27-10252** **\$24.95**

TUFF PRODUCTS MAG POUCHES

Front view with flap.

Front view without flap.

Rear shows loops and Molle fasteners.

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system; for instance, the Dillon Range Bag, a tactical vest or body armor carrier. Available in black or coyote brown.

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. Plus, it passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You'll love your Stinger and undoubtedly draw a great deal of security and peace of mind from its mere presence. You deserve a Stinger today!

Comtech STINGER Keychain **K27-19495** **\$9.95**

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?!). No excuse, Sir!

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	K27-19220	\$29.95
Advanced Trauma Kit (A.T.K.)	K27-19322	69.95

Streamlight's Nano Light® LED flashlight is super bright (10 lumens), can be seen a mile away, is made of virtually indestructible machined aluminum with an anodized finish, is weatherproof, nearly weightless and fits on your keychain or zipper pull tab!

K27-19942 \$11.95

INSIGHT TECHNOLOGY'S HX150 Programmable LED Flashlight comes with a limited lifetime warranty and is equipped with Smart-Power Technology™ that allows the operator to pre-program the desired "On" mode. A programmed mode can then be easily turned off and reprogrammed to adapt to any newly desired "On" mode. Modes of operation include: Constant On Mode, Momentary On Mode, Strobe Mode From On, Strobe Mode From Off, Strobe Mode to Constant Mode, Strobe Mode OFF, Dimming Mode, Dim to Bright Mode, Dim Mode OFF, Auto On/Off, and S.O.S. Mode.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily.

The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

Dimensions: 66" x 27.75"
Shooting Mat **K27-18146 \$65.00**

Dillon's New Bench Wrench Fits new 1" die lock rings

Trim Pro™ Case Trimmer Kit K27-15021 \$119.95

Includes: RCBS Trim Pro manual case trimmer, plus an assortment of shell holders and pilots for most popular calibers. Shell holders 2, 3, 4 and 10. Pilot calibers: 22, 24, 25, 27, 28, 30, 35, 44 and 45.

RCBS Scale Check Weights

Standard Set: 60.5 grains for powder charges.	K27-12297	\$34.95
Deluxe Set: 510.5 grains for bullets, cases and powder.	K27-12458	\$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

About Grace USA: Grace USA gun care products are made with precision, and designed specifically for gun enthusiasts who care about keeping their firearms in prime condition. We are proud of our products and look forward to providing you with durable tools that fit your needs and guarantee satisfaction.

DOC ALLEN'S VERSATOOL

Doc Allen's Versatool fits easily in your pocket and functions as either a screwdriver or a wrench. The Versatool includes 11 tool bits and an extension shaft with the loop handle. The loop slides to three different positions to provide varying degrees of leverage to suit the needs of the job at hand.

K27-15757 \$12.95

The Tru-Weight Trigger Tension Scale has a range from eight ounces to eight pounds. A unique weight indicator remains at the exact point of trigger release, making it easier to read your trigger pull pressure.

K27-14838 \$26.95

Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K27-14760 \$24.95**

Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K27-18630 \$14.95**

C. Bullet Forward Slide Release **K27-18629 19.95**

Protecting the Second Amendment -

[Continued from Page 21] On September 13, 1994, the Federal Assault Weapons Ban went into effect. A *Washington Post* editorial published two days later was candid about the ban's real purpose: "[N]o one should have any illusions about what was accomplished [by the ban]. Assault weapons play a part in only a small percentage of crime. The provision is mainly symbolic; its virtue will be if it turns out to be, as hoped, a stepping stone to broader gun control."

In a challenge to the authority of the Federal government to require State and Local Law Enforcement to enforce Federal Law (*Printz v United States*) the U.S. Supreme Court rendered a decision in 1997. For the majority opinion Justice Scalia wrote: "this Court never has sanctioned explicitly a federal command to the States to promulgate and enforce laws and regulations. When we were at last confronted squarely with a federal statute that unambiguously required the States to enact or administer a federal regulatory program, our decision should have come as no surprise.... It is an essential attribute of the States' retained sovereignty that they remain independent and autonomous within their proper sphere of authority."

So why should non-gun owners, a majority of Americans, care about maintaining the Second Amendment right for citizens to bear arms of any kind?

The answer is: "The Battle of Athens, Tennessee." The Cantrell family had controlled the economy and politics of McMinn County, Tennessee since the 1930s. Paul Cantrell had been Sheriff from 1936-1940 and in 1942 was elected to the State Senate. His chief deputy, Paul Mansfield, was subsequently elected to two terms as Sheriff. In 1946 returning WWII veterans put up a popular candidate for Sheriff. On August 1, Sheriff Mansfield and 200 "deputies" stormed the post office polling place to take control of the ballot boxes, wounding an objecting observer in the process. The veterans, bearing military-style weapons, laid siege to the Sheriff's office demanding return of the ballot boxes for public counting of the votes as prescribed in Tennessee law. After exchange of gunfire and blowing open the locked doors, the veterans secured the ballot boxes, thereby protecting the integrity of the election. And this is precisely why all Americans should be concerned about protecting all of our right to keep and bear arms as guaranteed by the Second Amendment!

Throughout history, disarming the populace has always preceded tyrants' accession of power.

Hitler, Stalin, and Mao all disarmed their citizens prior to installing their murderous regimes. At the beginning of our own nation's revolution, one of the first moves made by the British government was an attempt to disarm our citizens. When our Founding Fathers ensured that the Second Amendment was made a part of our Constitution, they were not just wasting ink. They were acting to ensure our present security was never forcibly endangered by tyrants, foreign or domestic.

If there is a staggering legal precedent to protect our Second Amendment right to keep and bear arms and if stricter gun control laws are not likely to reduce gun related crime, why are we having this debate? Other than making us and our elected representatives feel better because we think that we are doing something to protect our children, these actions will have no effect and will only provide us with a false sense of security.

So, what do we believe will be effective? First, it is important that we recognize that this is not a gun-control problem; it is a complex sociological problem. No single course of action will solve

the problem. Therefore, it is our recommendation that a series of diverse steps be undertaken, the implementation of which will require patience and diligence to realize an effect.

These are as follows:
1. First and foremost, we support our Second Amendment right in

that "A well regulated militia being necessary to the security of a free state, the right of the people to keep and bear arms shall not be infringed."

2. We support State and Local School Boards in their efforts to establish security protocols in whatever manner and form that they deem necessary and adequate. One of the great strengths of our Republic is that State and Local governments can be creative in solving problems. Things that work can be shared. Our point is that no one knows what will work and there is no one single solution, so let's allow the State and Local governments with the input of the citizens to make the decisions. Most recently, the Cleburne Independent School District will become the first district in North Texas to consider allowing some teachers to carry concealed guns. We do not opine as to the appropriateness of this decision, but we do support their right to make this decision for themselves.

3. We recommend that Assisted Outpatient Treatment (AOT) laws be passed in every State. AOT is formerly known as Involuntary Outpatient Commitment (IOC) and allows the courts to order certain individuals with mental disorders to comply with treatment while living in the community.

Why ALL Americans Should Be Concerned 61

In each of the mass-shooting incidents the perpetrator was mentally unstable. We also believe that people who have been adjudicated as incompetent should be simultaneously examined to determine whether they should be allowed the right to retain/purchase firearms.

4. We support the return of firearm safety programs to schools along the lines of the successful "Eddie the Eagle" program, which can be taught in schools by Peace Officers or other trained professionals.

5. Recent social psychology research clearly indicates that there is a direct relationship between gratuitously violent movies/video games and desensitization to real violence and increased aggressive behavior, particularly in children and young adults (See Nicholas L. Carnagey, *et al.* 2007. "The effect of video game violence on physiological desensitization to real-life violence" and the references therein. *Journal of Experimental Social Psychology* 43:489-496). Therefore, we strongly recommend that gratuitous violence in movies and video games be discouraged. War and war-like behavior should not be glorified. Hollywood and video game producers are exploiting something they know nothing about. General Sherman famously said, "War is Hell!" Leave war to the Professionals. War is not a game and should not be "sold" as entertainment to our children.

6. We support repeal of the Gun-Free School Zones Act of 1990. This may sound counter-intuitive, but it obviously isn't working. It is our opinion that "Gun-Free Zones" anywhere are too

tempting of an environment for mentally disturbed individuals to inflict their brand of horror with little fear of interference. While governmental and non-governmental organizations, businesses, and individuals should be free to implement a Gun-Free Zone if they so choose, they should also assume Tort liability for that decision.

7. We believe that border states should take responsibility for implementation of border control laws to prevent illegal shipments of firearms and drugs. Drugs have been illegal in this country for a long, long time, yet the Federal Government manages to seize only an estimated 10 percent of this contraband at our borders. Given this dismal performance record that is misguided and inept (example: "Fast and Furious"), we believe that border States will be far more competent at this mission.

8. This is our country, these are our rights. We believe that it is time that we take personal responsibility for our choices and actions rather than abdicate that responsibility to someone else under the illusion that we have done something that will make us all safer. We have a responsibility to stand by our principles and act in accordance with them. Our children are watching and they will follow the example we set.

The undersigned Quiet Professionals hereby humbly stand ever present, ever ready, and ever vigilant.

1100 Green Berets signed the above letter.

TACCOM, LLC Tactical and Competition Accessories

TACCOM's Enhanced Firing Pin for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions will ignite your .22 rounds, whether you use a GI trigger or a three-pound match trigger. This direct-replacement firing pin is made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many, many firings. Every inside corner is radiused to eliminate stress points. The tip of the pin has been reduced in area to help give you a deeper dent in the primer. You can use the stock spring, yet the return pressure will be reduced by about two pounds, helping promote reliable ignition. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

The TACCOM Extreme Extractor is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you the reliability of consistent extraction during live fire. Up till now, your rounds have been coming out of the ejection port erratically! Install the Extreme Extractor and your rounds will come out looking like they are being put thru a garden hose! Consistent extraction is KEY for a reliable firearm. This extractor will help with your live round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut. TACCOM, LLC has seen and has been told by their testers that leaving a round in the chamber all but went away with the Extreme Extractor.

Does your .22 Long Rifle insert move back and forth in your AR upper? Did you know that the very top of your lower receiver takes all the recoil of your .22 LR insert? Simply inserting the TACCOM **22 Insert Pressure Plug** in front of your buffer eliminates those problems. The Pressure Plug will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. Being about an inch and a half long, this plug gives an added cushion, utilizing your recoil spring to reduce the battering your lower takes on recoil. You can install and remove the pressure plug in seconds with no tools.

QUICK CADDY...light, easy, simple! Made from Delrin, TACCOM's Quick Caddy holds the shot shell by the rim only, allowing for easy access to the shells for simple and fast removal. Holds four 12 gauge shells, any length! Comes with a belt strap to attach to your belt, but allows you to use the TEKLOK or ELS systems and is adaptable to MOLLE system as well.

Steve Anderson: "It's All About The Shooting" 63

By Steve Anderson

Refinement and Repetition: Dry Fire Drills for Dramatic Improvement is made up of 38 dry fire drills, including the exact drills I used to achieve the rank of Grand Master in one year after buying my first Open Gun. I'm obviously a huge believer in the power of dry fire practice to make all of the skills required to fire a pistol accurately at high speed truly subconsciously controlled. When the basic gunhandling skills are subconsciously controlled, you're no longer drawing, aiming, pulling the trigger and firing the gun. You're simply shooting.

I analyzed the USPSA classifiers and realized that most of them in involved shooting six rounds, reloading, and then shooting six more rounds at

K27-14730 \$23.99

K27-14733 \$26.99

NEW!

various target arrays. From there it was simple to devise drills to address those challenges. These became the first 12 drills in *Refinement and Repetition*. The others came after a similar analysis of the skills that are needed in common USPSA stages.

Principles of Performance: Refinement and Repetition 2 is the log-

ical continuation of *Refinement and Repetition*. The new book places a heavy emphasis on match consistency and the mental qualities required for solid USPSA match performance. It's designed to take a good shooter with sound fundamentals and basic skills to a place where he or she can better utilize those basic skills in the world of high-stress competition.

There are drills designed specifically to improve field course skills, as well as drills designed to isolate the challenges a shooter begins to see at larger matches.

Principles of Performance also covers the common mistakes seen at every USPSA match, as well as their solutions.

Competition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

K27-14341 \$19.95

Picking the Right

The author “rigged heavy” for coyotes near the Moses Coulee, Washington. The rifle is a heavy barreled Remington Model 700 in .220 Swift with a Harris Bipod, and the shotgun is a full-choke, 28-inch Beretta Model 390.

By Colonel Mark Lisi

All shooters are compelled to work through selecting the right tool for a particular application. Yes, there are some rifles and pistols that can generally be categorized as multi-purpose; the 4” .38 Special revolver can be used as a defensive pistol, as well as for plinking, hunting and action-pistol sports. However, it’s not the “best” fit for any of those applications. As shooters and hunters, we can’t just buy the newest shiny object and expect it to fit our hunting needs. Several years ago, I started on a requirements-based gun journey that was only recently resolved.

Let’s just get this nugget of information out in the open: I like to hunt varmints – squirrels, gophers, chucks and prairie dogs. It’s not for everyone, but I do enjoy it so. So much so, that I have five rifles (in different calibers) dedicated to the singular pursuit of ground-mounted critters. I thought that “a varmint gun was a varmint gun” and that any of my rifles could be forced into the anti-coyote role without any further consideration. I would soon find out that just was NOT so. My .22 K Hornet is a light, nimble rifle, but lacks the range required of a ‘yote gun, my heavy barreled .223, .22-250 and .220

Swift rifles are simply too big and heavy to carry all day and shoot off of shooting sticks. The Requirement: a lightweight, .22-caliber centerfire capable of MOA accuracy at 300 yards. Frankly, I was surprised that I didn’t have one of these in the gun box. But, alas, I did not.

As we all know, it is not easy to get “another” gun. My wife is wise to all the gun-buying gambits that I know, so this purchase was going to really have to be based on need. My reasoned arguments and demonstrations, however, bore fruit and I was given permission to seek out this mythical “walking around” rifle.

I settled on .223 Remington as the caliber. It’s deadly at 300 yards, and I already had all the tools to reload ammunition for it. The platform I was after was the H&R Handi-Rifle™. I could not find one in my local buying area. After some hard-core shopping, I found a .243 Winchester carbine with a laminated wood stock. While a bit more costly than the Handi-Rifle, I noted that it could also be forced into the deer role when I need a very lightweight deer gun. This gun, however, would not shoot any better than about 3 MOA. I did kill a deer with it in Montana, but it needed work. After

Tool for the Job

65

installing a Timney trigger that had little impact on the accuracy, the gun was sold. Still I had a niche that needed to be filled. This time I found an H&R Ultra Hunter HB in .223. I still have this gun and it is the designated "truck" gun. It shoots 52-grain HP like a dream and drives tacks at 200 yards. However, it does have the stock trigger in it. My guess is that it breaks at about six pounds. After researching a trigger job for this rifle, I decided to leave the trigger alone and just learn to deal with it. Three weeks ago, I laid a "song dog" out at about 160 yards with an offhand shot. However, the heavy barrel defeated the "lightweight" requirement. This rifle's barrel is heavy enough to drag the muzzle down when carried with a sling – UNSAT!

I continued to hunt with the heavy M700 until we had an engagement with 'ol Wile E. Coyote, and the gun could not be brought to bear; the

coyote was faster on the draw and he survived to play another day. We needed a shotgun in the mix.

The addition of a shotgun really reinforced the need for a lighter, faster rifle. One that can be

slung across the hunter's back, while the shotgun is the primary gun (moving into and out of the hide). More gear is always problematic. Where do I carry what items and how can I ensure easy access should I need the weapon I'm not carrying? All I've found to do is sling the rifle muzzle down across my back, stock on right shoulder and barrel across left hip. I put the shotgun down, pull the rifle up across my chest and loop the sling over my head. Yes, it looks rather like an odd dance, but it's the most efficient way to get to the rifle. I've yet to find a way to work shooting sticks into the exercise. Perhaps I'll stick with a bipod.

All of this was about the same time as "the Editor" ran my revolver article and I had a little jingle in my pocket. That is to say, I didn't need gun-buying permission from my wife. I was drawn to the Savage Axis, but I didn't like the trigger. The counter man then pulled out a Savage Arms Model 11/111 Trophy Hunter XP Package in .223 with an AccuTrigger and 3-9 x 40 Nikon BDC scope for a mere \$505 after tax. The tapered barrel and synthetic stock really help to lighten this rifle. This is precisely the right tool for the application. The Trophy Hunter XP Package ensures that all the typical post-rifle-purchase purchases do not need to be made: aftermarket trigger, rings, mount and scope.

While the rifle comes with a trigger-adjustment tool, I found the trigger manageable right out of the box. This rifle likes 50-grain Hornady V-MAX™ ammo and is printing about 3/4" groups at 100 yards. I need to shoot it at 200 yards to ensure that I have a true 250-yard zero. I also like the removable magazine that this rifle is equipped with. Removing the magazine is a simple way to unload a rifle. Here is where I would like to tell ya'll that I took it out and whacked some song dogs right off the bat...but no joy. But it's early in the winter season – there's still time.

Shooters, I have taken you the long way around to tell you that I've purchased a new rifle. We all buy new rifles to meet particular needs. I sleep better if I know that I have the right tool in my gun safe to meet any sporting requirement. Imagine my shame if I were invited to Africa to hunt Cape buffalo and had to beg

off because I didn't own a suitable medium rifle. Truth is, I have a .375 Ruger and a black powder Express rifle in .54 x .54 – Happy Face!

Much has been written about coyote guns and every hunter has his own ideas about what is best. I say .22 caliber centerfire, six-

to-seven pounds, minimum six-power optic, two-to-three pound trigger and shooting sticks. If you are .220 Swift man, then shoot the Swift. If you like *über* long rangers, then shoot a 6.5 x 284 Norma. When we are hunting and having fun, we should take the gun that pleases us the most. Not all song dogs are shot at 600 yards; I dare say that most are taken between 100 and 200 yards. They're not hard to kill. Even the .22 Long Rifle will do the trick if you get them in to shotgun range. I've had very good success with .223 and have yet to have one walk away. A coyote guru I know from Oregon used a Browning lever gun in .222, and this guy has taken more coyotes than I will ever see.

It is not the gun that makes the hunter successful. It's the right tool in the hands of the skilled practitioner that puts more pelts on the pole. Know your zero, know how your ammo behaves, know the range to the target and read the wind. Closer is always better, and – in some cases – lighter is better. At the end of the day, you are the hunter and you make the choices you want to make. Carry the gun that pleases you and the one you shoot the best.

**The Requirement:
a lightweight, .22-caliber
centerfire capable of MOA
accuracy at 300 yards.
Frankly, I was surprised
that I didn't have one
of these in the gun box.
But, alas, I did not.**

KEEP YOUR GUNS!

E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth **K27-18613** **\$6.99**

Snake Oil is a derivative of an FDA certified medical lubricant used in high-speed medical drills.

- Provides a film that separates and protects moving parts, for smoother operation and increased efficiency.
- Contains no evaporants and has a film affinity in excess of two years.
- Reduces the collection of dirt, dust and other contaminants.
- Performance in extreme conditions is unparalleled.

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	K27-15571	\$7.95
Slide-Glide Lite	K27-15572	7.95

Micron UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits all AR-15s and AR-10s with standard and oversized take-down pins up to .316" in diameter.

To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

Evolution Gun Works
 These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.
 Stainless K27-18600 \$49.99

ElZetta

Tactical Flashlight Mounts

Every ElZetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire®, and of course, the ElZetta® ZFL-M60. (Sizing Adapters are not required when using an ElZetta ZFL-M60 or other 1-inch lights.) The ElZetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular ElZetta ZFH1500.

The NEW ElZetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the ElZetta ZFL-M60. The ElZetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

TACCOM, LLC Duaload Shot Shell Holders

TACCOM, LLC's Duaload Shot Shell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. We're offering the 2Up version that can be either attached to a belt or MOLLE gear, as well as the 4Up and 6Up versions with a BLADETECH Tek-Lok™ Universal Belt Clip (included) that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun. It's quick, easy and (most important) intuitive!

76 Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards. Compact design, 30mm tube and bright illumination of the reticle are just a few of the many features of the DMS-1. Bright red illumination of the reticle adds to the quickness of the sighting system in day and low-light conditions. At one power it works well as a reflex sight and at longer ranges the four-X magnification gives increased accuracy.

K27-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES ⁷⁷

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **K27-25374 \$72.95**
 Scout Scope Mount for SKS Rifle **K27-25373 67.95**

90 Degree C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE

(Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

A. Ruger MK1 **K27-19535 \$79.95**
 B. Browning Buckmark **K27-19534 79.95**

Tactical Sports 45° Offset Optics Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)

45° Offset Optics Mount **K27-14472 \$14.99**

How do you make a Savage rifle even more accurate? Well, as the adage goes, you can't kill what you can't see, so you include a Nikon 3-9x40 BDC reticle scope, mounted and bore sighted. This unique reticle can be ballistically matched to your exact cartridge using Nikon "Spot On" Software. Coincidentally, the price of the New package is "Spot On" too. See your favorite Savage dealer for details.
