# Blue Press

May 2015  
\$2.95 U.S./\$3.95 Canada

A woman with blonde hair, wearing a wide-brimmed tan cowboy hat, a purple and brown patterned short-sleeved shirt, blue jeans with a large gold belt buckle, and brown cowboy boots. She is holding a rifle in her right hand and a cowboy hat in her left. A brown leather saddle with intricate tooling is positioned in front of her. The background shows a white fence and a field under a bright, hazy sky.

# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

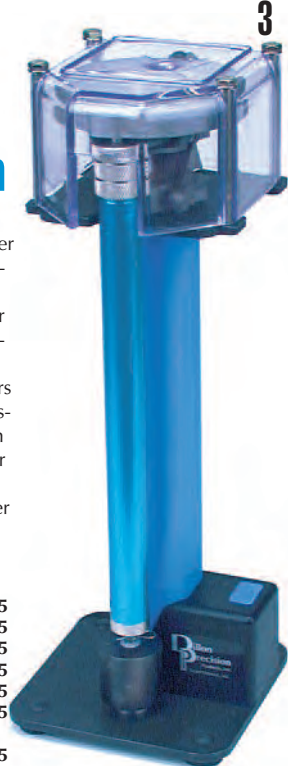

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

## We READ Our Mail!

I just wanted to take the time to write you to let you know how impressed I am with your press. First, let me say that I purchased a [competitor's] press a while back and have had nothing but problems. These are not huge problems, but a problem is a problem is a problem. Huh, it is at the factory as I write this letter. Honestly, I have spent a bunch of money on that press: dies, shellplates and other items and I am over it. I was so frustrated I decided to break down and get a Dillon.

Over the years of reloading I have always used single-stage presses. Here lately, I have been needing to upgrade to a progressive. I have always been told, "Get a Dillon, spend the money, you won't regret it." Well, you work with what you have, money wise and you buy what you can afford. Bunk!

After the headaches, downtime and sheer frustration, the additional cost for a Dillon is chicken feed. I am an old welder/fabricator/machinist and I know QUALITY when I see it. The 550B is "Top Notch." The parts all fit together great. It is a "tight" machine and very, very smooth. The handle and linkage are tight and fit together well. Overall, I am very impressed with the machine. I just like everything about it. Let me say this in closing: I am SOLD on Dillon products. You have a customer and supporter forever.

Michael W. Trentham – Clinton, TN

*Thanks, Michael! It's always great to hear positive feedback from happy customers.*

In November 2014 my base crank assembly broke while reloading. I can't tell you how many rounds I've put through this press, but it's a lot. After calling into Dillon and telling what had happened, in two days I received a replacement part. No questions, no charge, just here it was. Having grown up in the 50s and 60s, your customer service reminded me of those wonderful years. Thanks, Dillon! I'll keep spreading the word about how the American way is still alive and well. Keep up the great work.

Thomas L. Pruett III, US Army (Ret.) – Kamiah, ID  
*Thomas, the customer's right to service was one of the fundamental "rights" Mike Dillon wrote into his original business model for Dillon Precision. I believe it's the one that separates us from the rest of the pack.*

The Wyatt Earp article in the January 2015 edition was very interesting and extremely well written – one of the main reasons why I like your magazine so much.

Fred Dickmeyer – Tampa, FL

*Fred, one of the major perks of my position as editor is getting to read Brian's articles before anyone else. I guess I'm selfish that way!*

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our commercial-grade reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## By Peter Caroline

Seeing as how my personal firearms inventory has not (quite yet) approached ten percent of my net worth, I felt quite confident in heading for Las Vegas this year, looking for strange and wondrous new products. I was not disappointed.

Ruger ([www.ruger.com](http://www.ruger.com)) has brought back their .22 Charger pistol in both takedown and one-piece configurations. Both feature a standard A2-style grip that can be changed for your favorite MSR grip. Ruger was also showing a new .22 Bearcat with sights that are now fully adjustable. This slick little kit gun is available in stainless or blue. Ruger's GP100 Match Champion, introduced last year, is now available with an adjustable rear sight. For the firearms fashionistas, there was a new 22/45 Lite, with a cutaway

Electric Blue barrel and upper, with a top rail in addition to adjustable sights and, of course, the barrel was threaded.

European American Army ([www.eaacorp.com](http://www.eaacorp.com)) was showing a polymer Witness 1911, a very handsomely done iteration of the classic design, with an ambi safety and an accessory rail.

Over at the SIG Sauer booth ([www.sigsauer.com](http://www.sigsauer.com)), I spotted their new P220 10mm pistol, available in both stainless and Nitron finishes. With an 8-round magazine, this is one very serious piece of heavy ordnance for hunting or self-defense.

At one point, I stopped back at the Dillon booth, and Mark Pixler told me, "You definitely want to get over to the Kingston Armory booth

Inland GI 1911A1

Baron Custom North American Arms .22 Magnum

Dan Wesson (CZ-USA)  
Model 715 .357 Magnum

IWI Tavor  
Carry Case

Sarsilmaz ST10 9mm

Windham Weaponry .308 Hunter

([www.kingstonarmory.com](http://www.kingstonarmory.com)) ...they have .22 LR Garands and M14s! Needless to say, I moved out smartly and, sure enough, there were some beautifully crafted replications of these classics, with carefully disguised Ruger 10/22 actions and 10-round rotary magazines. I'm told that these recreations are just a bit lighter than the originals, but not noticeably so. I'm a sucker for .22s, and the budget will suffer!

Speaking of classics, MKS Supply ([www.mkssupply.com](http://www.mkssupply.com)) was showing exact recreations of the WWII Inland M1 and M1A1 .30 caliber Carbines. These are beautifully made and even reproduce the original production's cartouche marks in the wood. They were also showing a 1911A1 Government Model, authentic right down to the lanyard loop and

brown-checked plastic grip panels.

In the wheelgun spectrum, I spotted a very pretty Damascus-pattern Baron Custom-decorated .22 Magnum at the North American Arms booth ([www.northamericanarms.com](http://www.northamericanarms.com)). And, great news for the budget-minded...you can now own Korth's ([www.korthusa.com](http://www.korthusa.com)) new 9mm Para Sky Marshall revolver for right around \$1,000, far less than previous Korth offerings. Dan Wesson, which is now owned by CZ ([www.cz-usa.com](http://www.cz-usa.com)) is actually making a revolver, the Model 715 stainless .357 Magnum, once again.

For you Tavor owners out there, the IWI booth ([www.iwi.us.com](http://www.iwi.us.com)) was displaying some very handsomely appointed tactical nylon cases, with Molle pouches for extra mags, handguns, 9mm conversion kit, etc. The cases come in

# BL 550 Dillon's Basic Loader

**\$259<sup>95</sup>**

**L13-15399**

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount L13-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

**L13-20251, \$87.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**L13-21353, \$29.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**L13-22120, \$30.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: L13-16629, \$19.95**

**OverSize Die: L13-16626, \$19.95**

**Plastic Funnel: L13-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

**L13-20029, \$22.95**

**RL 450 Powder Die:**

**L13-20308, \$21.95**

# RL 550B

**RL 550B DVD**  
**Instruction Manual**  
 L13-19483 \$19.95

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial Period!**

*All for ONLY...*  
**\$439<sup>95\*</sup>**

**L13-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

Total Price as pictured here with optional accessories: **\$737.60**

.45 ACP Die Set	L13-14404	\$64.95

# RL 550B ACCESSORIES

## A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

### L13-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **L13-20782, \$76.95 ea.**  
Magnum Rifle Powder Bar **L13-21353, \$29.95 each**  
X-Small Powder Bar **L13-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **L13-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**L13-20064, \$11.35 each**  
**Three or more, \$10.25 ea.**

**X-Large Powder Die, L13-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**L13-13909, \$22.95 each**  
**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**L13-22055, \$20.95 each**  
**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

**L13-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

## H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol L13-14450

One-Inch Bench Wrench	<b>L13-10842</b>	<b>7.95</b>
Square-Deal-Only Wrench	<b>L13-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	<b>L13-22051</b>	<b>\$48.95</b>
XL650-only	<b>L13-22052</b>	<b>45.95</b>
Square Deal "B"	<b>L13-22223</b>	<b>64.95</b>

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	<b>L13-22214</b>	<b>\$41.95</b>
RL 1050 Tray Kit	<b>L13-22215</b>	<b>41.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>L13-97126</b>	<b>\$142.95</b>
----------------------	------------------	-----------------

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	<b>L13-16306</b>	<b>\$41.95</b>
--	------------------	----------------

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	<b>L13-17950</b>	<b>\$45.95</b>
Plastic Roller	<b>L13-22183</b>	<b>40.95</b>

**Quick-Change Cover** for use with powder measure. **L13-11143 \$14.95**

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

### RL 450 Upgrade Components

## Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge and Bullet Comparator

(Caliper not included)

### Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy.

Straight L13-14622 \$38.95

Curved (use for auto, lever and pump rifles) L13-14862 \$39.95

Modified Case (required)

\$6.99 each

.223 Rem. L13-14627

# Dillon's Case Preparation Equipment

**CV-2001**  
**L13-20493**  
**\$188.95**

**CV-750 L13-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator L13-20675 \$75.95**

**CM-500 Case/Media Separator L13-21045 \$47.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 L13-22047 \$213.95**

**Euro CV-750 L13-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle.	<b>L13-13804</b>	<b>\$8.95</b>
Case (20 pc.)	<b>L13-20255</b>	<b>135.95</b>

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle	<b>L13-13733</b>	<b>\$8.95</b>
Case (20 pc.)	<b>L13-20256</b>	<b>135.95</b>

<i>Half and Half</i>	10 bottles of polish /10 of lube
Case (20 pc.)	<b>L13-21375</b> <b>\$135.95</b>

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **L13-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **L13-13496** **\$15.95**

This month's cover model is Cowboy Mounted Shooting Association (CMSA) competitive shooter Kenda Lenseigne. A feature by Robin Taylor about Kenda starts on Page 48. ## Super 1050/RL1050 Short Trim Die Toolhead

**L13-62219**  
**\$224.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the 1050 toolhead stand is not included.)

# Dillon's New Rapid Trim 1500 Case Trimmer <sup>23</sup>

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **L13-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **L13-13141**, are **\$19.95** each. Upper lock rings, **L13-13559**, are **\$4.99** each.

# MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# Packin' Dillon's Way

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

L13-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop or tablet, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, smart phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

## Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

## "Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

# SAFARILAND Holsters<sup>29</sup>

**Safariland Custom Fit 567**

**Safariland Model 6377 ALS™**

## Safariland Custom Fit 567 Holsters

The Model 567 Custom Fit holster is one of the lightest, thinnest, best fitting concealment holsters available. True to its name, it adjusts to a wide variety of popular handguns, giving each a "custom fit" in this holster.

**Safariland Model 5188**

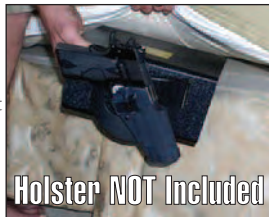

## Safariland Model 5188 Open Top Concealment Paddle Holster

This is a compact and lightweight concealment paddle holster that features an injection molded paddle design offering a comfortable, close to the body fit. IDPA approved, and with a tough STX finish.

Springfield 1911 w/Picatinny Rail	L13-19451	\$39.95
-----------------------------------	-----------	---------

## Close & Ready Bedside Holster Caddy

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

**Holster NOT Included**

L13-18046 \$29.95

## Comp-Tac: Holsters Dedicated to Your Victory

### Comp-Tac International

The International features a modular mounting system that offers the versatility of different mounting options, combining a belt holster, belt drop offset holster, paddle holster and paddle drop offset holster into one.

# Dillon's Pistol Die Sets

## Size Die

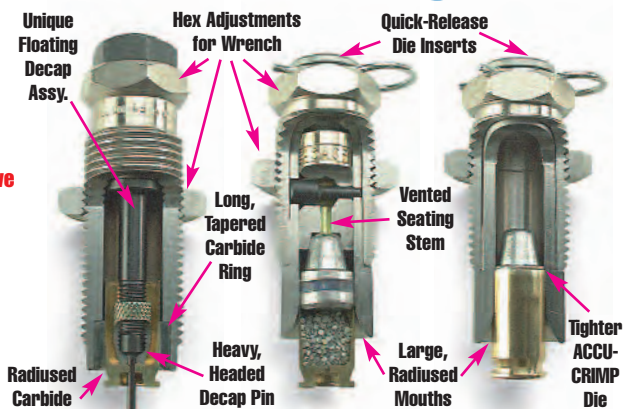

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	L13-10839	\$67.95
.308 Winchester	L13-15574	67.95
.30-06 Springfield	L13-10840	67.95

### SHOT Show 2015, continued from Page 11

Black or Flat Dark Earth (The Color Formerly Known as Khaki).

TV Western fans will appreciate Chiappa's ([www.chiappafirearms.com](http://www.chiappafirearms.com)) new Model 1892 Mare's Leg, available in both .44 Magnum and .45 Colt, with a choice of 9" or 12" barrels.

The Browning booth ([www.browning.com](http://www.browning.com)) had an amazing array of 1911-22s in both standard and shorter barrel lengths, several different colors and even one with a threaded barrel. Someone referred to that particular model as the SWTF (Sleeps With The Fishes) Special. Next to this display of rimfire loveliness was Browning's new 1911-380...same size as the 1911-22, but chambered for the John M. Browning-designed .380 ACP cartridge. Two things that impressed me...an ambidextrous safety, and a slide that is actually easy to operate.

Speaking of John M. Browning designs, remember those neat little "hammerless" .32s and .380s

that Colt used to make prior to WWII? Well, the Colt booth ([www.colt.com](http://www.colt.com)) was displaying a parkerized and "U.S. PROPERTY"-marked Model 1908 .380 General Officers Pistol that will be part of a limited edition coming out soon. There will also be a model in polished blue. Yes, they will be pricey, but far less than a NIB original.

On the subject of .380s, Taurus ([www.TaurusUSA.com](http://www.TaurusUSA.com)) has once again stretched the boundaries of the human imagination with a little item called the Curve...billed as "The world's first and only firearm engineered to fit the unique contours of your body." A light and laser are built into the frame, which has an attached belt clip for IWB carry. There is no conventional sight, as such, but white "cross hairs" incised on the back of the slide. Oh...it's currently available only in right-handed configuration; we sinistrally-inclined folk will have to wait and fidget.

Kimber ([www.kimberamerica.com](http://www.kimberamerica.com)) had some delivery delays with their all-black 9mm Solo DC

MAC (Eagle Imports)  
1911 Bobcut .45 ACP

compact, due to finish issues, I had heard. But they have apparently solved the problem, and promise to have these neat little numbers ready to go.

Last year, Remington ([www.remington.com](http://www.remington.com)) created quite a stir with a 9mm Para recap of their 1920s-vintage Model 51. The prototypes worked well enough to garner some enthusiastic reviews; the production models...not so much. So, back to the drawing boards. A revamped and presumably reliable R51 will soon be available, and I will have one to test.

Some time back, I reviewed the Boberg Arms Corp. ([www.bobergarms.com](http://www.bobergarms.com)) 9mm pistol, a unique design with a magazine that feeds from the rear. This year, Boberg is showing a similarly configured pistol in .45 ACP. I look forward to some range time with this one.

It would seem that nowadays, everyone except maybe General Mills and Pfizer are making 1911s. Because they sell. The latest that I spotted at the Show was at the Caracal booth

([www.caracal.ae.com](http://www.caracal.ae.com)). The boys from Abu Dhabi have actually come up with a very nicely crafted bobtail Commander-sized specimen with all the bells and whistles. In addition, there's another brand called MAC ([www.Eagleimportsinc.com](http://www.Eagleimportsinc.com)) with a similarly configured 4.25" barrel 1911, called the Bobcut.

If you win the PowerBall lottery and have a close relative at the BATFE, you might be able to own an original Mauser Model 712 *Schnellfeuer-pistole*. This selective-fire beauty had a 20-round magazine and on full-auto, could empty that mag in one second. Gletcher Air Guns ([www.gletcherguns.com](http://www.gletcherguns.com)) was displaying a selective-fire, CO2-powered replica that fires .177 caliber pellets or BBs at 361 fps. *Bitte, schieessen sie nicht deinen augel!*

I have been attending the SHOT Show since 1982, and worn out a lot of shoe leather. This year was the best one yet. And I suspect that next year will bring many new surprises.

# Comp-Tac's Trojan Horse Long Gun Case 39

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Standard Trojan Horse Long Gun Case **L13-19388 \$75.00**  
 Heavy Rated Trojan Horse Gun Case **L13-16229 100.00**

## ADCO SUPER

**ATHUMB®** offers models for popular centerfire pistols and 10/22 style magazines.

**ST1** is for 9mm and .40 caliber Beretta, Browning, Ruger, SIGARMS, S&W, etc. In addition, the

*\*Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.*

## AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

**AP Custom USA's** Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

## TACCOM, LLC Tactical and Competition Accessories

**TACCOM, LLC's** Duaload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip (included)** that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.  
**2Up Belt/MOLLE** **L13-19530 \$9.95**  
**4Up w/Tek-Lok™** **L13-19531 29.95**  
**6Up w/Tek-Lok™** **L13-19532 34.95**

**TACCOM, LLC's** Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shells come out of the holder and not have to worry about rim overlay...the rims are already overlapped in the correct position!  
**4Up Quaload Shotshell Holder** **L13-19543 \$39.95**  
**8Up Quaload Shotshell Holder** **L13-19544 69.95**

# CLASSIC FIREARMS: The Ruger .44

## By John Marshall

The .44 Magnum cartridge, when fired in a light carbine, is a marvelous short-range game-getter. It's especially effective on deer, black bear, feral hogs and the javelina of the Southwest. However, as I can personally attest, firing a light lever action or single shot rifle in that caliber will leave you with a bruised shoulder that you'll feel for weeks. Way back in 1960, however, Bill Ruger, working closely with famed designer Harry Sefried, found the solution: a .44 Magnum self-loader in which the action absorbed much of the recoil, making it more comfortable to fire and offering quick follow-up shots. Weighing in at 5 pounds and 12 ounces, it was handy to pack and quick to bring into action. Although most folks today are not aware of it, this was only the first of two distinct models that had quite different actions.

The first model *[top photo]* was introduced in this manner: "America's newest game rifle...Proven on the plains of Africa, the RUGER 'Deerstalker' carbine is a technological breakthrough for the benefit of American sportsmen...proven not only on Whitetails in North America, but on Leopard, Hyena, Wart Hog, Topi and many other species in Africa...developed to provide the sportsman with the best possible rifle for hunting deer and other medium-sized game in brush country."

Bill Ruger did indeed personally test this gun on a variety of African game, including killing a leopard with one shot at 100 yards. Accounts and photos were extensively used in Ruger advertising.

The carbine measured 36-3/4" overall. The 18-1/4" barrel (later lengthened to 18-1/2") had 12 rifling grooves with a 1 turn in 38" twist. The receiver was machined from chrome-molybdenum steel. The tubular magazine held four rounds, and

was filled through an opening in the bottom of the receiver, just forward of the trigger guard. It used a short-stroke piston to drive an internal slide that rotated the bolt to unlock the breech from the receiver. The bolt remained open after the last shot was fired, and could be released with a latch ahead of the trigger guard. There was a cross-bolt safety in front of the trigger that locked both the sear and the internal hammer. Lyman front and rear sights were standard, and the top of the receiver was drilled and tapped to accept Weaver-type scope mounts.

The standard carbine stock was oil-finished American walnut. International (full length) and Sporter style stocks were offered as options. Both of these had sling swivels and pistol grip caps, and were checkered at the wrist and forend.

Retail prices in the 1960 catalog were \$108 for the standard, \$118 for the sporter, and \$128 for the international model. The guns themselves began to be distributed in September 1961. It's worth noting that a virtual lookalike clone of this carbine in .22 Long Rifle caliber was offered in 1964, the Ruger 10/22 carbine, which continues in Ruger's lineup to this day.

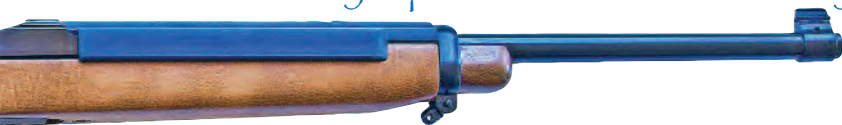

The initial name "Deerstalker" was not used on the carbine for long. It seems that the Ithaca Gun Company had a "Deerslayer" shotgun, and according to Ruger, "...to avoid any hard feelings, we changed our rifle's name to simply 'the Ruger 44 Carbine.'"

The carbine proved to be nearly indestructible, built "like a tank" in the tradition of most Ruger guns. Two samples were sent to the H.P. White Laboratory in Maryland to see what it would take to blow them up. Even with a full case of fast-burning Bullseye powder, generating over 100,000 pounds per square inch of pressure, the guns held together, although a ring in the chamber was generated. One caution had to be observed in the use of the guns; only jacketed bullets were recommend-

# .44 Magnum Semiauto Carbines

“These interesting rifles have now become classics for which a modern-day equivalent does not currently exist.”

ed. Shaved lead from lead bullets would foul the gas port, leading to malfunctions that would be very difficult to remedy.

This first Ruger carbine was made through 1985, with a production total of over 250,000. A final 25th anniversary model was made, with a Ruger “phoenix” medal in the stock. The gun was finally dropped from the Ruger lineup due to increased production costs. This left a gap in the autoloading .44 niche for 15 years, when in 2000, the company launched the second version [bottom photo] of the genre, the “Deerfield” .44 Magnum semiauto carbine.

Capitalizing on its experience with the successful Mini-14 .223 carbines, Ruger decided to apply the strong and simple M1 carbine-style action to work with the .44 Magnum cartridge. Adapting the action of the Mini-14 to .44 Magnum was simple enough, but inasmuch as the .44 is a rimmed cartridge, a box-magazine feed system was out of the question. The rims would catch on each other as they moved upward and forward in a conventional box magazine. The answer was right there in front of them – the rotary magazine of the 10/22 carbine (itself based on the Savage Model 99 rifle) was made specifically to deal with rimmed cartridge feeding. The decision was made to craft a similar four-shot rotary mag in .44 Magnum. This was done. It was discovered that two problems existed with the action. First, the exposed operating rod’s movement could be restricted with the support hand on the forend. This problem was solved with a black polymer covering shield which also serves as a top handguard. A Ruger crest is molded into it. Secondly, because the M1-type action ejects empty cartridges upward, a scope mounted over the action would be hit repeatedly by the ejected brass. The solution here was a leather “scope protector” which was provided with each rifle. It could be fitted around the scope turrets to protect them from the impact of the brass. This was a bit less than elegant, but it worked with most scopes. The action does not lock back after the last round is fired, but a pin in the bolt handle like that on the military M1 carbine can be pushed down when the

bolt is retracted to keep it there. A crossbolt safety nearly identical to the original is utilized.

The Deerfield “99/44” carbine resembles the original carbine in general configuration, but measures a full 37 inches, just 1/4” longer. The stock, no longer having to conceal a tubular magazine, is somewhat slimmer. The standard carbine configuration includes front and rear quick-release sling swivel mounts. A folding aperture rear sight mounted closer to the eye on the rear of the receiver is provided, and can be removed when a scope is mounted. As with the original carbine, optional International and Sporter stock configurations were available. This newer gun weighs 6 pounds and 3 ounces, a bit heavier than the original. It has an 18-1/2” barrel with a 1:20 twist, and six-groove rifling versus the old 12-groove type. Ruger scope rings and one magazine were included with each rifle when new, and the introductory retail list price was \$649.

This carbine proved to be quite accurate, with one-inch 50-yard three-shot groups being common with most ammunition. Within 100 yards, like its predecessor, it’s a very handy and effective medium game dropper.

This gun could have had an alter ego as an effective defense carbine if a high-capacity magazine had ever been designed for it, perhaps similar to the current Ruger BX-25 .22LR mag that works so well in the 10/22 carbine. Sadly, that possibility was never explored, and with lackluster sales, the Deerfield 99/44 passed into history in 2006. Production figures are sketchy, but it appears that roughly over 18,000 of these guns were manufactured.

Today, both Ruger .44 Magnum autoloading carbines are experiencing resurging demand on the collector market, and with those who would find them ideal for hunting in the brush. They are becoming a challenge to find, as their owners tend to hang onto them. “As new” in-the-box examples have become quite pricey lately when rarely found. These interesting rifles have now become classics for which a modern-day equivalent does not currently exist.

## 46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

L13-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

# KENDA LENSEIGNE

## IRONY IN MOTION

By Robin Taylor, [www.taylorfreelance.com](http://www.taylorfreelance.com)  
Photo by Douglas Smith, WYSIWIG Photography

All the shooting sports have unusual athletes. Call them “champions,” or even “stars.” Among “stars” you find “greats” that do more than win. They change the sport.

Kenda Lenseigne grew beyond “star” status some time ago, becoming part of the cultural bedrock of mounted shooting. In the course of winning multiple titles on the national and world stage, Kenda transformed the guns, the gear, even the saddles used by the current generation of riders and shooters.

“If you’d have asked me 16 years ago if I thought I could make a career out of this I wouldn’t have said yes,” says Kenda. “Who would have known you could do something you love so much and make a living at it?”

Today Kenda is both “making a living” and “living a message” of responsible firearm use that opens doors worldwide. As a trainer, shooter, rider, and ambassador for the shooting sports, there is a lot to be said for Kenda Lenseigne.

“She’s had an amazing impact on the mounted shooting world,” says Ken Amorosano, former publisher of *Western Shooting Horse*, and current publisher of *Cowgirl* and *True West*. “She became a role model for hundreds of girls that wanted to

be just like her, and she’s never let them down.”

I caught up with Kenda at her New River, Arizona, home, freshly returned from an American Quarter Horse Association (AQHA) night event in Scottsdale (the Sun Circuit Championship). Like most people, I’d always assumed that mounted shooting was primarily regulated by SASS – the major governing body for cowboy-style events. Not true!

Mounted shooters and SASS “ground shooters” have very different needs, and when Kenda got started shooting in 1998, the Cowboy Mounted Shooting Association (CMSA) had just branched out from SASS. Since then, the two organizations have followed different roads. The most visible difference being CMSA’s decision to eliminate SASS’ long-standing costume requirements.

“Changing the required dress code changed everything,” says Kenda. “That one decision opened up the sport to the broader equestrian sports world,” says Kenda. The result was a modern rodeo event akin to barrel racing – with guns.

Later this year Kenda will make her fourth trip to France to serve as an ambassador/trainer for the growing community of western shooting enthusiasts there.

European mounted fans are overcoming arduous gun control requirements – using cap-and-ball revolvers if they have to – in order to shoot from horseback. Some European riders are bringing their dream to learn all there is to know about the mounted shooting and cowboy lifestyle all the way to the United States to compete.

With the AQHA now recognizing mounted shooting as an official event, mounted shooting's future appears very bright.

### **New Sport = New Gear**

Back in the late 1990s, Kenda and her fellow riders had no gear that really “worked” for mounted shooting. Some things could be adapted (barrel racing saddles, for example), but most of the “gun stuff” was just wrong.

Imagine trying to re-holster a SAA one-handed using a period-correct “slim jim” holster at full gallop. It's not quite like threading a needle, but you get the idea.

“We had people wearing their rigs in between stages, with water bottles stuffed in their holsters to get them to stay open,” says Kenda. “And I was one of them!”

Problem became opportunity when Kenda met Safariland's Scott Carnahan at NRA's Bianchi Cup in Colombia, Missouri. The holster innovations that practical shooters like Carnahan take for granted – low-cut fronts for faster draws, laminated holster materials, adjustable draw tension – all that was unknown to the mounted community.

Carnahan connected Kenda with his design staff, and the Bianchi Cowboy line has offered Kenda Lenseigne signature holsters ever since. Kenda's line takes advantage of the technology that Safariland is known for, but holds the standard of a traditional look and feel. “It's like an old model car with a new engine.”

The same story applies to handguns.

“When you look at the products I've been involved in helping develop, people essentially are benefiting from my decade of learning the hard way,” laughed Kenda.

As Kenda explained, it's difficult to shoot a standard Peacemaker well right out of the box due to the stiff hammer action. Competitive shooters immediately lighten the hammers.

“When I first started in the sport, I had heard about the legendary Bob Munden being the go-to gunsmith, so I sent him my guns. When I got them back, \$300 per gun later, I had hair triggers – which is absolutely NOT what you want for mounted.”

Once Kenda found the right gunsmiths, her mounted guns began to evolve.

“The original hammer spur on the old Peacemaker tends to open your grip when you're shooting one-handed,” Kenda explained. “So, we took that hammer spur and made it lower and wider for quicker access.”

Today Uberti firearms offers the Kenda Lenseigne signature line as a package “racegun” for mounted shooting. They sell well to mounted

shooters, and to “ground shooters” that compete in SASS events.

### **Back in the (Circle Y) Saddle**

Certain brands have become household words among horse people in the United States. One of the largest is Circle Y Saddles.

“In January of '09 Circle Y contacted me to design a saddle for them, saying, “We want to be the first in the industry that builds a saddle specifically for your sport.”

Kenda was shocked. What an honor!

“This is the saddle brand that practically EVERYBODY grew up riding, or at least wanting to ride. Basically, if you own a horse, you know Circle Y.”

Kenda had ridden many different disciplines over the years, so she had a lot to say.

“They sent out their designer to visit with me, and we sat down with a yellow pad. We sketched out what I thought would be a good design for the sport: a forward-tilted horn to allow clearance for your gun leather, free moving stirrups, and a deep seat to hold you in while in motion.”

A contract to ride for Circle Y developed, and things got very serious.

“They hand-delivered the prototype to one of the CMSA majors in Arizona. They put it on my horse, did a photo shoot, then gave me the option to ride it in the upcoming event, or ride my regular saddle.”

As any sponsored competitor knows, running brand-new gear at an important match invites disaster. If it works, you're a hero. If it fails, you damage yourself and the brand. It's a high-stakes “hero or zero” gamble.

“I warmed up my horse in the saddle for about 45 minutes, liked it, and decided the time was right to believe in my design and go for it.”

Kenda set the world record on her first pass, and her saddle design went “hero” instantly.

“The design was a hit from day one, we've only made some minor changes since then. Different grades of leather, etc,” she says.

Not every project has worked out so well, but as she'll tell you “You can't excel unless you fail a time or two and learn from your experiences.”

### **The Life**

Kenda's life involves many pieces. She describes herself as “horse-heavy at the moment” with six of her own quarter horses in varying stages of training, plus several more that she's training for customers. As you might imagine, training a horse to deal with a gunshot fired near its head isn't easy – and would-be competitive riders are more than willing to pay her for her help.

Kenda's involved with every piece of the puzzle, firing .22 blanks from horseback on her home range, and taking horses to the Ben Avery complex to shoot the louder .45s.

In an internet age, Kenda's an irony in motion. She's competing, training, traveling the world, designing, and doing media appearances – all because of her skill with a horse and a gun.

# 50 "Big Fifty Reloader"

## STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

L13-50050, \$384.95

B.

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

L13-50075, \$869.95

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

L13-50125, \$76.95

C.

D.

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

L13-50200, \$149.95

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

L13-50001, \$299.95

### E. (1) PRIMING CONVERSION

Converts Swager to Priming System.

L13-50003, \$76.95

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

L13-50002, \$299.95

### F. (1) SWAGER CONVERSION

Converts Priming System to Swager.

L13-50004, \$76.95

## Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

# Otis Technology B.O.N.E. Tool and RIPCORD 55

Otis Technology's B.O.N.E.® Tool effectively cleans the AR-15 bolt carrier assembly area including the bolt, bolt carrier and firing pin.

The RIPCORD™ is a rapid firearm cleaning system featuring Nomex® fibers that act as both a brush to loosen and a patch to capture fouling particles.

## Sun Devil Mfg. AR-15/10 ADIGS

Sun Devil Manufacturing's Adjustable Drop In Gas System for AR-15 and AR-10 rifles allows you to adjust your rifle's gas system for best performance.

L13-19674 \$59.95

## EGW AR-15 Forward Assist Plug

Evolution Gun Works' AR-15 Forward Assist Plug is for use on competition rifles that do not use the forward assist. It's anodized for long life, matted to match most uppers.

L13-18991 \$9.99

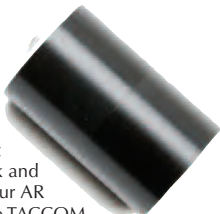

TACCOM's Enhanced Firing Pin for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

L13-19538 \$13.95

The TACCOM Extreme Extractor is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

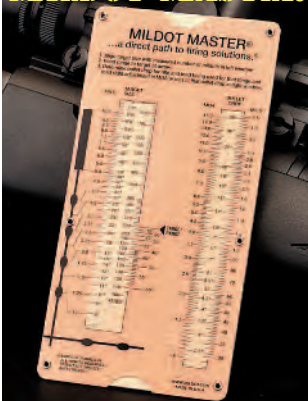

L13-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The TACCOM Pressure Plug will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

L13-19533 \$7.95

## MILDOT MASTER

You can become a master at using a Mil Dot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

Mildot Master® L13-14762 \$29.95

## The Larry™ 8 LED Pocket Work Light

The Larry™ 8 LED Pocket Work Light is the essential handyman light. 8 powerful LEDs provide 60 lumens of bright white light. The rotating magnetic clip gives you convenient hands-free lighting. The reinforced plastic body design is shock-proof and water-resistant, making the Larry™ basically indestructible.

# KEN HACKATHORN

The Wizard Drill was designed by famed weapons trainer Ken Hackathorn, shown here firing a 1911 "rail gun" with SureFire X200 weapon-mounted light attached.

Equipment for the Wizard Drill was Thomas' everyday carry gear, a lightly customized Glock 17 in a straight drop Blade-Tech Standard Belt Holster.

## By Duane Thomas "How to Become a Handgun Wizard!"

The name Ken Hackathorn needs no introduction to those heavily involved in the firearms training community, either as instructors or students. A former Green Beret and current cop, he's also been one of our most well-known and well-respected firearms trainers for the past 30 years. Recently he commented in an online article, "Of the vast number of people that carry guns for self defense, only a very small number are competent with them...I am often asked to provide a skill check or 'test' for those that take their combat marksmanship seriously...I offer the following 'Wizard Drill'. It is very simple, requires only five rounds of ammo, and can be shot on any range that allows work from the holster."

Okay, you show me a drill put forth by a well-known instructor to be considered competent with the concealed carry handgun; I'll show you a drill I had to try. Thus I reposed to the range with my everyday carry gun and carry gear. The gun was a Gen-3 Glock 17, mildly customized; the holster was a straight drop Blade-Tech Standard Belt Holster; ammo was Winchester 127-gr. SXT +P+; the concealing garment was a Concealed Carry Clothiers Double Action vest.

Hackathorn's Wizard Drill uses a single USPSA or IDPA target with a 4" circle centered in the target's head. The handgun must be carried concealed; ammo is what you normally carry. There are four strings to the Wizard Drill, the first three take one round each, the last one takes two, for a total of five rounds. Allowable time for each of the four strings is a putative 2.5 seconds per, but in actuality it's 2.7 seconds. Hackathorn suggests setting the par time on your timer at 2.5 seconds, but he actually allows up to 2.7 seconds to complete each string since "that is about the length of

the buzzer on most timers." If pocket carrying, you may start with your hand on the gun in the pocket. Otherwise, hands begin hanging normally at sides, off the gun.

When you're done, you should have three hits in the head and two in the body. Any miss of the entire target is an automatic fail. You can drop two points and still pass the test, any more than that is also a fail. Hits inside the 4" head circle or cutting the line are considered down zero points, outside the circle but inside the head perforation is down one point per. For the body shots, whether you're using the IDPA or USPSA target, you score it like an IDPA target, i.e. a hit in the target's highest scoring area, either the IDPA -0 circle or USPSA A-zone is down zero points, a hit in the IDPA "center mass" -1 zone or USPSA target's C-zone is down one point, a hit in the IDPA "peripheral hits" -3 zone or USPSA target's D-zone is down three points. In other words, anything outside the C-zone/-1 zone, you automatically fail. There is no Major/Minor scoring; every hit counts the same no matter what caliber inflicted it.

Okay, let me dispel the suspense. Did I pass the Wizard Drill? Yes, I did. However, it was not the slam-dunk I thought it would be. It actually took me three tries to get it. The first run, I stopped part-way through because I missed a head shot. Second run, my times were good but I dropped three points. Third time was the charm, made the times and only dropped two points. Here are the four strings of the Wizard Drill, and the times I posted on my passing run:

String 1: Start at three (3) yards. On signal, draw and fire one (1) head shot master hand only. My time: 1.94 seconds.

String 2: Five (5) yards. On signal, draw and fire one (1) head shot. On this string, and every other string until the end of the test, you may place both

# 'S "WIZARD DRILL" 63

The draw from concealment. Note the "Get some!" facial expression, extremely important for success on drills like these.

Thomas' first pass of the Wizard Drill on the USPSA target would have been a fail if he'd been using an IDPA target, turning his "down two" into a "down four".

This pass, dropping only one point off possible, would still have been down only one point even on an IDPA target. The third head shot is hiding inside the line of the head circle at about five o'clock.

hands on the gun. My time: 1.99 seconds.

String 3: Seven (7) yards. On signal, draw and fire one (1) head shot. My time: 1.91 seconds.

String 4: Ten (10) yards. Draw and fire two (2) body shots. My time: 2.52 seconds.

You will find in this article a photo of my resulting target. Am I happy with my performance on this run? I am not. I used a USPSA target because that was the only clean target I had on hand. If I'd been using an IDPA target, one of my body shots, and quite possibly both, would have been outside the -0 circle, which would have given me four points down and a fail. When I showed up at the range, to be brutally honest, it had been about a month and a half since I had been able to live fire, and during that time frame I also sloughed off on my dry fire. It showed in a serious anticipation-of-recoil issue that pulled shots low. Also, even though we technically get a max of 2.70 seconds to complete each string, I really didn't like that it took me over 2.50 seconds for the 10-yard work.

Well, there was no way my ego could handle that. It might be (barely) worth mentioning that, after passing the Wizard Drill the first time, I did some bench rest shooting and found that the sights on the gun needed to be adjusted seriously to the right. And, and, the sun was in my eyes (on the indoor range). And if you don't like those excuses... I have others! The pieces of white tape tell the tale (check out the second target photo), it took me some practice to turn in a run I could live with. And Winchester 127-gr. SXT +P+ doesn't just grow on trees, you know. Talk about motivation to get it right in fairly short order; pulling the trigger on your dwindling store of that stuff will do it. "Pass" was not good enough. "Pass if this was an IDPA target" was good enough. My "good enough" run showed times of 2.15, 2.16, 2.03 and

2.57 seconds, and only dropped one point – and that would have been only one point even if I'd been shooting on an IDPA target. I'm still not thrilled about my time on String 4, but at least my accuracy wasn't completely wretched.

I found it very interesting that I was consistently faster at seven yards than I was at five. You'd think it would be the other way around. The only way I can explain this is that I simply do so much of my shooting practice at seven yards.

So I guess that, according to the results of the Wizard Drill, I am indeed competent to carry a gun for self-defense. Though I did pass the Wizard Drill in short order, the truth is this test would be pretty brutal for most people. Also I will say, there is something to be said for carrying a "real gun" like my Glock 17. As Hackathorn commented, "Don't be surprised to find that those little 2" Air-weight .38 Special revolvers and pocket .380 autos are nearly impossible to pass this drill with. In police work we call this 'a clue.'"

I have never really bought into the argument, which you see repeated over and over again in so many gun articles when talking about the bitty shootin' irons, "For the vast majority of self-defense encounters, this gun's [teeny sights, crappy trigger pulls, wimpy cartridge, low capacity, two-finger grip surface] should be perfectly adequate." It's like people think their self-defense emergency is going to somehow magically build itself around the gun they're carrying. I've always figured the self-defense emergency will be whatever it is, and if I'm not carrying enough gun to deal with the problem, well, that's too bad for me. That's why you'll never see me carrying one of the tiny .38s/.380s as my only gun, and my primary carry gun tends to be a bit larger than most folks'.

Duane's website is [Self-Defense-Handguns.com](http://Self-Defense-Handguns.com).

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mouser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag., .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, L13-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps. L13-18599 \$14.95

# drymate™

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ L13-11313 \$19.95

# Bore-tips® Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (thinking fast), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

## Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless L13-18600 \$49.99  
Blued L13-18601 49.99

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

Four-Magazine Storage Sleeve L13-19226 \$14.95  
Six-Magazine Storage Sleeve L13-19227 17.95  
Magazine Sleeve I.D. Tag/Hanger L13-19476 1.95

## Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight L13-18210 \$53.95

Secure Firearms Products' Universal Spring Tester will help you determine if the recoil spring in your pistol needs replacing, and you'll save time and money by testing and organizing loose recoil springs in your shooting bag.

Recoil Spring Tester L13-15305 \$39.95

MAGPUL 1911 Grip Panels feature reinforced polymer construction and a unique diamond-shaped cross section to prevent twisting in the hand. They also have an aggressive mag-release cut out and are compatible with ambidextrous safeties.

# ElZetta

## Tactical Flashlight Mounts

Every ElZetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the ElZetta® ZFL-M60. (Sizing Adapters are not required when using an ElZetta ZFL-M60 or other 1-inch lights.) The ElZetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular ElZetta ZFH1500.

The NEW ElZetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the ElZetta ZFL-M60. The ElZetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

ZFH1500 AR15 Flashlight Mount	L13-12020	\$29.95

## PROTEKTOR MODEL

### The Original Leather Sandbag\* Rifle Rests

All Protektor Model leather bags are made with the best top grain cowhide available. The welded steel rest is strong enough to stand on and won't break if dropped (Owl Ear Front Bag sold separately).

A. Front Bag	L13-10880	\$19.95
B. Rifle Rest	L13-10883	49.95
C. Std. Front Bag	L13-10881	22.95
D. Rear Bag	L13-10882	26.95

\*Sand not included.

## The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

L13-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

L13-15384 \$29.95

# TARAN TACTICAL INNOVATIONS

The **TTI Magazine Extension** for MagPul AR-15 5.56 PMAGs is constructed of machined aluminum.

L13-15770 \$39.99

The **TTI Benelli Extended AccuGuide Carrier** is the first extended carrier ever manufactured from one solid piece of SAE 304 Stainless Steel, which eliminates the need for welding. It is heat-treated and polished, providing optimal performance. The Carrier features an extended guided rail on each side to assist in centering the round while reloading. It will provide you the speed and comfort of not having your thumb torn up after reloading. Compatible with: Benelli M1/M2/M3/SBE, Versamax.

MAGPUL 30-Round polymer PMAG GEN M2 M-16/AR-15 magazines.

L13-12644 \$14.95

## Enhanced Self-Leveling AR-15/M16 Mag Follower

MAGPUL's Enhanced Self-Leveling Follower is a drop-in replacement for USGI 30-round magazines. Features a four-way anti-tilt design.

3-Pk. L13-12606 \$6.95

## Enhanced Trigger Guard, Aluminum AR-15/M16

The MagPul® Enhanced Trigger Guard™ is a black anodized aluminum drop-in replacement for the AR15/M16 weapons platform. It features a shallow "V" shape for better use of gloves in tactical shooting or cold weather operations. It's non-folding and has rounded edges.

Aluminum Trigger Guard L13-12611 \$19.95

## "Battery Assist Device" for AR-15/M16

Developed from the experience of the MagPul® Team, the B.A.D. Lever™ is designed to improve the speed and efficiency of the AR-15/M16 by enabling the shooter to manipulate the bolt catch without moving away from the ready position.

MagPul B.A.D. Lever L13-27058 \$29.95

## GRSC CQB Slings, Sling Mounts and Front Swivels

A.

B.

C.

D.

The GRSC CQB Sling was designed as a mission-specific sling for CQB operations. It attaches only at the rear of the firearm and allows the operator to quickly transition to a handgun if necessary.

A. CQB Sling With Quick-Release Hook L13-19172 \$39.95  
 CQB Sling Without Hook (not pictured) L13-19173 \$24.95

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot. TRS-25 **L13-11643** **\$89.95**

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **L13-25374** **\$79.99**  
Scout Scope Mount for SKS Rifle **L13-25373** **78.99**

**L13-19671** **\$29.95**

# Show & Tell With

**Figure 1: George Armstrong Custer with one of his Remington Rolling Block rifles and a bull elk just killed with it. The gun is a No. 1 Sporting Rifle with standard 26-inch octagon barrel, just like the Dillon family buffalo gun. Most historians believe that Custer's rifle at the Little Bighorn was this same .50-70 Remington Rolling Block. After he was killed there on June 25, 1876, the rifle passed into Indian hands. The above photo was taken during Custer's September, 1873 Yellowstone Expedition. Photo courtesy of the National Archives.**

## By Brian Dervin Dillon, Ph.D.

George Armstrong Custer (1839-1876) owned several Remington Rolling Block rifles in different calibers. His favorite was the .50-70 buffalo gun he took on his Yellowstone expedition of 1873. Custer appears with this rifle in several photos, in some alongside his Indian scouts, in others with game he killed with it (Figure 1). This .50-70 Rolling Block is thought by most scholars to have been with him at the Little Bighorn when he was killed. Arguments about the precise spot where Custer fell have, for decades, depended upon the archaeological presence or absence of fired casings from this rifle, for these were unlike the smaller, standard issue, carbine rounds fired by his troopers. The Sioux, Cheyenne and Arapahoe won the battle on June 25, 1876, but had already lost the larger war: their "on the hoof" food supply was fast disappearing to swarms of buffalo hunters. On that day Custer's Rolling Block rifle became an Indian trophy. Its whereabouts have been unknown for the past 140 years.

Our own .50-70 Remington Rolling Block buffalo gun (Figure 2) occupied a place of honor up on the wall above the dining table, alongside

other rifles and carbines, some older, some younger. Grandpa Dillon, a U.S. Army mustang, avid gun collector and teetotaler, bought the monster from the Gold Dust Saloon in Sausalito, California, in January 1920, shortly before prohibition forced its closure. For many years the rifle resided over the bar of that saloon. Its neighbor was a .56-50 Spencer Carbine also brought home to the Dillon house (*Blue Press* No. 273). Both were potent reminders of the historical forces that had moved our forbears westwards across the American continent. The Gold Dust Saloon was just outside the Fort Baker military reservation, and catered to off-duty soldiers. Grandpa Dillon was familiar with it from many visits as Sergeant of the Guard, beginning in 1902, while removing obstreperous, inebriated, enlisted patrons. How the old rifle came to be there remains a mystery.

Over a 30-year period more than a million Remington Rolling Blocks were made in just about every caliber under the sun. More of these single-shot rifles were shipped to Asia, Europe, the Middle East, and Latin America than were ever sold at home. Although they could be had in as fancy a grade as any customer desired, at many times the

# the Buffalo Gun

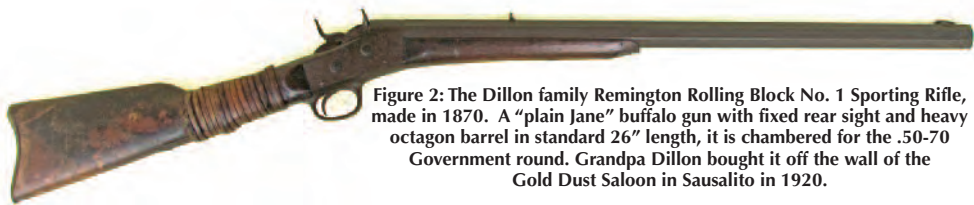

Figure 2: The Dillon family Remington Rolling Block No. 1 Sporting Rifle, made in 1870. A "plain Jane" buffalo gun with fixed rear sight and heavy octagon barrel in standard 26" length, it is chambered for the .50-70 Government round. Grandpa Dillon bought it off the wall of the Gold Dust Saloon in Sausalito in 1920.

cost of the basic rifle, most guns sold both domestically and abroad were "plain Jane," no-frills versions. Remington began chambering its rifles in the .50-70 Government centerfire cartridge for the Army and Navy as early as 1867. The Dillon family gun, an octagon-barreled variant with fixed rear sight and very low serial number, was one of the first offered to civilians in 1870. By 1872, the company was advertising a round-barreled variant as its ".50-70 Government Buffalo Rifle" capitalizing on the popularity of the earlier version.

The Dillon family rolling block is a very early Model No.1 with straight bar extractor, and faint "50" caliber marking stamped on its barrel's underside. After a few years of use as a buffalo gun in the early 1870s, it passed into the possession of a Plains Indian. At some point, its new owner's horse rolled over, snapping the Remington's stock in half just behind its receiver. The gun was repaired, Plains Indian fashion, with strips cut from tin cans with a hunting knife, hammered on with small brads. Afterwards the stock was tightly wrapped with a single, very long, green buffalo rawhide thong and soaked in water, forcing it to contract, tightening and hardening it like iron.

The premier buffalo gun just before the Civil War was the Sharps, beautifully made and supremely accurate. A percussion breech-loader employing a linen cartridge, it was much faster to reload than any contemporary muzzle-loader. And, if you ran out of its special cartridges, in a pinch you could still "roll your own," wrapping homemade rounds with newspaper. During the Civil War tens of thousands of .52 caliber Sharps carbines, but many fewer rifles, were used by Union troops. Most of the Sharps in the hands of buffalo hunters immediately after the Civil War were these same .52 percussion guns, now sold as Army surplus.

Meanwhile, the .50 Government had become the first U.S. Army centerfire rifle cartridge, rendering the larger caliber muzzle-loaders used by both sides during the Civil War obsolete. The Union experiment with rimfires – a couple thousand .44 Henrys, but more than 80,000 big-bore Spencers, both rifles and carbines, as well as a few old percussion Sharps carbines re-chambered for metallic cartridges – had convinced the ordnance department that the finicky, low-powered rimfires had to be superseded by centerfire cartridge guns. The first of the new .50-70-450 centerfire rifles were

issued in 1866, only a year after the war's end. As more of the longer-range and more reliable single-shot centerfires were produced, the old rimfire repeaters were phased out, although some special troops (Indian scouts) still carried them.

The first all-new, post-Civil War, civilian Sharps was the Model 1869, also the earliest purposely designed for metallic cartridges. These were offered in several calibers, the most popular the tried and true Government .50-70. A few months later, Remington chambered its No.1 Rolling Block Rifle for the same round, standard in the U.S. Army-issue Springfield Trapdoors for the preceding four years. So, by 1870 three different single-shot breechloaders (Springfield, Sharps and Remington) were chambered for the same .50-70 Government round. Of the three, the Remington Rolling Block became the most common buffalo gun. It was simple, easy to make, and inexpensive to buy. By comparison, the Model 1869 Sharps was produced in much smaller numbers and was costly. Foreign governments and journeyman market hunters alike found it too expensive and bought the Remington instead. The Rolling Block was joined, after 1873, by large numbers of Army surplus .50-70 Springfield Trapdoors, made obsolete by the new, .45-70 round. From the mid-1870s onwards, as the herds dwindled, these surplus Springfields became the poor man's buffalo gun.

In 1874, the Sharps concern was reorganized, relocated, and renamed the *Sharps Rifle Company*. It then brought out its most famous rifle, the Model 1874, still in small numbers compared to the many thousands of Remingtons produced. The .50-90-600 Sharps cartridge appeared in 1872, an obvious attempt to outdo the .50-70, now six years old. But few guns were chambered for the .50-90 until the new model Sharps became available two years later. The .50-90 used a 2-1/2 inch casing, compared to the shorter, 1-3/4 inch case of the .50-70. The later Sharps .50-100 and .50-110 rounds used the same .50-90 case, simply increasing the charge while lightening the bullet. These were the rounds frequently identified by modern writers as fired in "Big Fifty Buffalo Guns" despite the fact that very few were ever actually used for buffalo hunting. Even as these fancy rifles began to appear in "Wild West" shows east of the Mississippi, they remained too costly for most workaday buffalo hunters on the plains. The Sharps .50-90, -100 or -110 cartridges were hard to find, and pro-

80 hbitively expensive to shoot, so it was the earliest “buffalo cartridge,” the .50-70 Government, that killed the greatest number of woolies out on the Plains. Only a few behemoths went down to the exotic, Johnny-come-lately, “Big Fifty” Sharps rounds.

Using the costly 1874 Sharps rifles with their rare and expensive ammunition at long-distance shooting competitions in New Jersey did not make them “buffalo guns.” Nor were those much later rifles, chambered for exotic, long-range cartridges towards the end of the 1880s “buffalo guns” either, for these appeared only *after* the great herds had already been wiped out. The Sharps, instead, became the favorite of well-heeled competitive shooters back East, only infrequently fired by such greenhorns during short-term junkets out west. For every Philadelphia rube that stuck a hundred-dollar Sharps target rifle out the window of a slow-moving train, 50 to 100 professional buffalo hunters were each taking down hundreds of the big animals, day after day, with ten-dollar surplus Springfields, or newer, twenty-five-dollar, Remingtons.

The more pedestrian, and earlier, Sharps Model 1869 .50-70 buffalo gun shot the same cheap, plentiful, ammo as the Remingtons and Springfields, yet market hunters could buy three brand-new rolling blocks for the price of a single Sharps, or, once the Army surplus guns became available, up to ten used Springfields for what the new Sharps cost. They did exactly that. More importantly, the thousands of rounds of obsolete .50-70 government surplus ammo fired every day, day after day, by professional buffalo hunters only cost pennies compared to the expensive, dedicated, “big 50” Sharps rounds expended only occasionally by wealthy sportsmen.

The last buffalo hunters on the plains were the also the first, the American Indians. No reservation Indian could have afforded expensive “big fifty” Sharps ammunition, but .50-70 rounds were cheap, plentiful, and still available long after they had been made obsolete by the .45-70. Fifty years after Grandpa Dillon’s buffalo gun became a Plains Indian rifle, Bannerman’s was still selling Army surplus .50-70 Government ammunition for \$2.50 per 100 rounds or \$25.00 per thousand. In 1927 they still came in the original U.S. Army surplus wooden cases of 1,000 rounds. The ancient ammunition remained in stock as late as 1940.

More than half a century ago, in my California grammar school, we studied American history. The curriculum out on the Pacific Coast was very light on pigtailed Bostonians in funny short pants, heavier on wagon trains crossing the plains, and heavier

still on gold prospecting in places locally familiar to us kids. When it came time for third grade “show and tell,” most boys brought in autographed baseballs, and mumbled something incomprehensible about batting averages. No baseballs for me; I lugged Grandpa Dillon’s .50 Caliber Remington Rolling Block buffalo gun to class instead. I talked for twenty minutes about the westward movement of the 19th century, buffalo hunting on the Plains, and the Transcontinental Railroad. My 1870 buffalo gun was visible proof of the story I was spinning. I told the class that by the early 1880s the buffalo, numbering millions before the Civil War, had been

**Figure 3: The “business end” of the 1870 .50-70 Remington Rolling Block, at right, compared with a .30 caliber Model 94 Winchester at center, and a .22 caliber Model 43 Mossberg bull-barrelled .22LR Target Rifle at far left. The old buffalo gun had a hard life, to judge by the battering on its muzzle.**

almost completely wiped out. I explained that hunting the great northern and southern herds to the brink of extinction was no accident, but by the 1870s was strategic American military policy to end the long, drawn-out, Indian Wars. If the Plains tribes were “starved out,” they would have to stop fighting. My “show and tell” episode ended with George A. Custer dead at the Little Bighorn in 1876, killed beside his own .50-70

Remington Rolling Block, just like the one I was holding. His rifle, again just like mine, then became an Indian gun. My buffalo gun was the ice-breaker. I later took other guns to school for show and tell, as props for subsequent lectures on the Civil War, the California Gold Rush, and so forth and so on. These became so routine that other kids sometimes asked, “What, no gun today?” when I showed up on the playground without one.

Long ago and far away, as an 8-year old, I took guns to school for show and tell. The guns carried into the classroom were universally recognized as historically important, icons of our shared experience way out west. The old Dillon family buffalo gun first went to school in 1961. It has continued to do so, off and on, ever since. It has appeared repeatedly as a teaching tool in my college-level American History, American Indian Ethnology and Historical Archaeology lectures. I have had the privilege, on several occasions over the past 40 years, of showing it to American Indians descended from warriors who fought at the Little Bighorn. The rifle, with its buffalo hunting and Custer connection, never fails to spark a reaction. My Indian friends always tell me that “Custer had it coming,” then, when they heft the old rifle, some say “if only we had had something like this long before Custer came along....” The old .50-caliber Remington Rolling Block also takes center stage in my NRA Reloading classes, then is put away long before any live ammunition gets made. So, for more than 50 years, the family buffalo gun has been going to school for “show and tell.” It always steals the show.

## UM Tactical Universal Sight Mount and Holster System

UM Tactical has created a universal sight mount that will fit all pistols with a 1913 picatinny rail. Although many sight mounts exist; what makes the unit produced by UM Tactical unique, is that it will mount and dismount from your firearm in under 30 seconds with no tools or gunsmithing. Once set up with your favorite scope or red dot sight, the mount and optic can be taken on and off your firearm and still hold the zero. This high quality mount is constructed from CNC machined aluminum and is finished in Mil-Spec Type III anodizing.

UM Tactical's UMH3 Universal Holster attaches to the UM3 sight mount and not your handgun. This unique design is hand made and is constructed of thermoformed plastic (Boltaron).

UM Tactical Sight Mount	L13-43271	\$99.95
UM Tactical RH Holster	L13-43272	\$64.95
UM Tactical LH Holster	L13-43273	\$64.95

# 101 Classic Firearms by John Marshall <sup>83</sup>

Dillon Precision announces the release of John Marshall's new book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, a compilation of the author's popular articles appearing in **The Blue Press** since 2007. **101 Classic Firearms** is sure to be a welcome and prized addition to the library of any serious firearms aficionado.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on

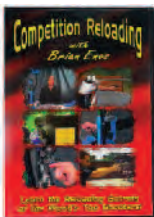

some of the world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance

writer whose articles have appeared in **The Blue Press**, **Gun Digest**, **Guns & Ammo's Handguns**, and **American Gunsmith**. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. He is also an endowment member of the National Rifle Association.

**Price: L13-40133 \$29.95, Autographed L13-97130 \$34.95**

**Competition Reloading with Brian Enos** guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting.

Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

**L13-14341 \$19.95**

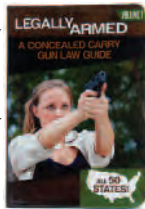

**Making Ammo: A Beginners Guide to Hand-loading** by Kyle Lynch - Ammo shortage? Not anymore! Learn a new hobby that will save you money and ensure that you always have enough of the right ammunition for your shooting needs.

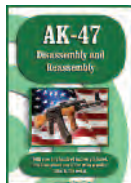

This guide offers you an opportunity for first hand information from an experienced reloader as he takes you through the reloading process. Examples explain what works and what doesn't. If you are new to reloading or want to understand the fundamentals more fully, this guide provides simple step-by-step instructions.

**L13-43270 \$23.95**

**Legally Armed: A Concealed Carry Gun Law Guide** - Learn the basics of concealed carry and the laws associated with this astronomically growing group of self-reliant Americans. If you depend on a handgun for the protection of yourself or your family, arm yourself with knowledge, too. What's inside? What to consider before carrying a firearm • Protecting oneself: discharging a firearm in self-defense • What to do when interacting with Law Enforcement • Gun handling, practice and storage • State-by-state quick reference guide to carry laws where you live and travel.

**L13-43269 \$14.95**

**On-Target Productions, Ltd.** videos are designed to educate enthusiasts about the selection, proper use, cleaning, disassembly/reassembly, and accessorizing of firearms. On-Target Productions' videos are 100 percent digital quality, focused on the details and are entertaining and educational. Every video features clear, close-up photography to enhance the instructional narrative from start to finish.

# Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics. The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll. The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit **L13-19220** **\$34.95**  
Advanced Trauma Kit **L13-19322** **69.95**
