# Dillon's RF 100 Automatic Primer Filler

**Eliminates the need for primer pick-up tubes!**

**Fills the primer tube while you reload!**

**Clear polycarbonate shield and protective housing**

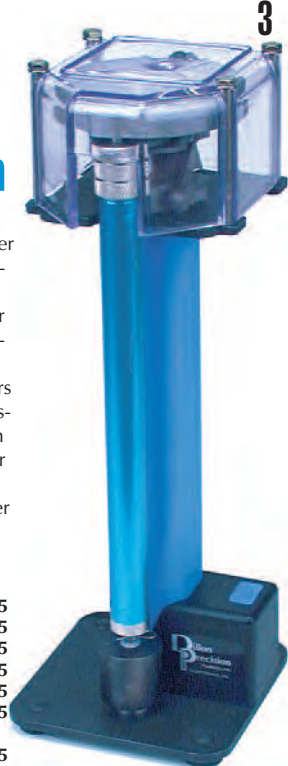

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

# We READ Our Mail!

On *The Blue Press* October 2013 cover, Kayla is wearing a sleeveless black zippered-front dress. I know you do not sell dresses, but I would like to find out where this dress was purchased. I would like to shop for one for my wife. Thank you.

Larry Kampa – LMKampa@aol.com  
Kayla shops at Forever 21.

I have always heard about Dillon's legendary customer service and I'm here to tell you, it's true. I recently needed a replacement shellplate bolt for my terrific little Square Deal B. I called Dillon's toll-free number and got through to Matt who immediately told me he'd send out a replacement bolt – at no charge. When I also mentioned that the plastic magazine orifice was wearing a bit, he said he'd also send out a replacement for that – again at no charge. Thank you, Matt, and thank you, Dillon Precision, for being the kind of all-American company we too rarely see these days.

Bill Casale – Prescott, AZ

A big thank you to Dillon Precision and Gary Boyd. The Aroller bracket on my Dillon RL 550 broke. A short phone call to Gary at Dillon and a new bracket – at no charge – was on its way the next day. Gary also included a new owners manual, as mine was so old it was outdated. Thanks again for a great product and excellent customer service.

Joe Podesta – wyatt45lc@yahoo.com

I saw an ad in the latest *Blue Press* for a free defensive pistol course. Have you actually gone to the URL listed there? I just did, and after being bored to death by an interminable sales pitch (spoken, with no way to skip ahead), it was *finally* revealed that I could get the "free" course only by purchasing something else. That isn't really what "free" means. The ad is misleading, and certainly not up to the standards that I've come to expect from Dillon. It also undermines confidence in the products offered in other ads that you run. ("Are those other advertisers as sleazy as this one?") You might want to consider either pulling the ad, or making it clear that the course in question requires a purchase.

Ian Underwood – holdenvcaulfield@gmail.com  
*Ian, you're not the first Blue Press reader to complain. After the first complaint, I went to the website, endured the sales pitch, then e-mailed the advertiser, who responded, "I 100% agree with you that those videos are annoying, but they get results and the top marketers use them...." We subsequently agreed to part ways.*

# THE ULTIMATE URBAN

## Reviewed by Peter Caroline

Israel is a tiny country, bordered on one side by the Mediterranean, and on all the other sides by hostility. Given that their neighbors have never been particularly enthusiastic about the existence of a Jewish state, the Israelis, a creative lot, have shown a distinct talent for developing some interesting small arms, such as the Uzi submachine gun and the Galil assault rifle.

In recent years, the Israeli Defense Force has been faced with an increase in urban warfare. Their existing long guns, primarily the Galil, the M-16 and M4, were not ideally suited for close-quarter operations or rapid deployment from a vehicle. In 1995, the IDF, working with Israeli Weapon Industries (IWI), began development of a radically new rifle to meet their changing needs. The result, officially adopted in 2003, was a compact (26-1/8" OAL) bullpup carbine with a 16-1/2" barrel, weighing in at about 8 pounds, and chambered for the 5.56 x 45mm NATO (.223 Rem.) cartridge. It was designated the Tavor TAR-21, named after Mount Tabor in Israel's lower Galilee.

My first hands-on encounter with the Tavor was at the 2013 Shootists Holiday at the NRA Whitington Center in Raton, NM. This annual event is a wonderful show & tell session, where participants get to handle and fire each others' guns, old and new. I was walking down the line, and I spotted this odd-looking gun. It was the U.S., semiauto-only, version of the Tavor. The owner asked if I wanted to shoot it. Of course I did. I noticed that the ejection port was on the right hand side,

maybe an inch ahead of my cheek, perhaps not a promising experience for this left-handed shooter. I fired it anyway, and was relieved to note that the empties ejected slightly forward. The Tavor felt rather heavy for its size, and recoil was even lighter than the .223 AR-15s I've fired. I liked the gun and, when I got home, contacted IWI's U.S. subsidiary in Harrisburg, PA, to request a sample for review.

When the Tavor arrived and I unpacked it, my first impression was that I would have to find some iron sights for it. Wrong. The iron sights are cleverly concealed in the full-length Picatinny rail, and fold up for use (it helps to read the manual first). The gun they sent me was configured for a left-handed shooter, even though the conversion procedure is explained in the manual. Conversion kits for 5.45 x 39mm and 9mm Luger will soon be available (I'd also like to see a .22 LR conversion!). The Tavor is designed to use standard G.I. M-16 magazines, but comes with a deluxe IWI polymer 30-round magazine with a clear viewing window and cartridge counter. Interesting enough, the counter goes up to "28," but when the magazine is filled to capacity, a little white button protrudes from the base. I suppose that the button could be painted in camo colors to satisfy the terminally tactical among us.

After reading the owners manual, checking the chamber and inserting the magazine, my first test of the Tavor was to take it out to the garage to see how see how it fit my own "Personal Combat Vehicle," a Honda Ridgeline pickup.

# ACCESSORY: TAVOR SAR<sup>11</sup>

Holding the gun in firing position, I was able to get in and out of the vehicle quickly and easily. Score one for the bullpup!

At the range, I first fired the Tavor with the built-in iron sights. The rear sight is a fixed aperture. The front sight can be adjusted for windage and elevation with a supplied tool. Having gone through basic training with an M-1 Garand (yeah, I'm that old), I'm not wildly excited about this now-common set-up, but it does work. Trigger pull is about 9 pounds, but the gun holds so steady that you don't really notice the weight of pull. I shot a dozen rounds of Federal bulk-pack 55-grain at 25 yards to zero the iron sights, and got some nice tight little groups. Then I installed an EO Tech holographic sight to see how the Tavor would perform with perhaps a more typical sighting arrangement on a modern battlefield. I couldn't

have been more delighted. At 50 and 75 yards, the gun was printing predictable 1/2" to 1" three-round groups. At some point, I had run out of the factory ammo and went to some .223 rounds I had handloaded about 15 years ago. The results were identical. This is not a sniper rifle and was never intended to be, but for its purpose, it is perfect. After shooting, takedown and clean-up were simple...again, following the manual.

The Tavor will never win any beauty contests, but it couldn't be handier, it gets on target quickly and, with its advertised "six points of contact," it's easy to maintain a steady sight picture and hit what you're shooting at. It's available in black or flat dark earth. Like everything else, it comes at a price: MSRP is \$1,999, and worth every penny.

# BL 550 Dillon's Basic Loader

**\$259<sup>95</sup>**

**K49-15399**

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount K49-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing / Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**K49-16627, \$82.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**K49-20302, \$25.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**K49-20251, \$87.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**K49-21353, \$29.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**K49-22120, \$30.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: K49-16629, \$19.95**

**Overize Die: K49-16626, \$19.95**

**Plastic Funnel: K49-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

**K49-20029, \$22.95**

**RL 450 Powder Die:**

**K49-20308, \$21.95**

**RL 550B DVD**  
**Instruction Manual**  
 K49-19483 \$19.95

# RL 550B

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty

*All for ONLY...*  
**\$439<sup>95</sup>\***

**K49-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

Total Price as pictured here with optional accessories: **\$736.60**

.45 ACP Die Set	K49-14404	\$63.95
Strong Mount	K49-22051	\$48.95
Alum. Roller Handle	K49-17950	\$45.95
Low Powder Sensor	K49-16306	\$41.95
Aluminum Bullet Tray	K49-22214	\$41.95
RL 550 Toolholder with Wrench Set	K49-11541	\$28.95
Cartridge Case Bin/Bracket	K49-11185	\$24.95

# RL 550B ACCESSORIES

## A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**K49-RL550B CON-**

**VERSION \$45.95** (Exotic calibers, \$55.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K49-20782, \$76.95 ea.**  
Magnum Rifle Powder Bar **K49-21353, \$29.95 each**  
X-Small Powder Bar **K49-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K49-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**K49-20064, \$11.35 each**  
**Three or more, \$10.25 ea.**

X-Large Powder Die, **K49-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**K49-13909, \$22.95 each**  
**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**K49-22055, \$20.95 each**  
**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

**K49-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

## H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol **K49-14450**

Small Pistol **K49-14451**

**\$254.95 (110v US Model)**

Large Pistol **K49-14453**

Small Pistol **K49-14454**

**\$264.95 (220v Euro Model)**

## CASEFEEDER CALIBER CONVERSIONS (Page 16)

**\$23.95 each**

## K. 550 SPARE PARTS KIT

- 1 Seating Punch, Small
- 1 #10 Tinnerman Insert
- 1 Primer Cup, Large
- 1 Primer Cup, Small
- 1 Bellcrank Cube
- 3/8" Index Ball
- 1 550 Brass Tip Set Screw
- 1 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 1 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)
- 1 Seating Punch, Large
- 1 550 Index Ball Spring
- 2 Pickup Tube, Small, Yellow Tips
- 2 Magazine Orifices, Large
- 1 Toolhead Pin

## I. PRIMER FLIP TRAY

**K49-13606, \$20.95 each**

## J. PRIMER PICKUP TUBES

- 1 Lg. tube **K49-22029 \$7.99**
- 1 Sm. tube **K49-22028 7.99**
- 2 Sm., 2 Lg. **K49-20056 23.95**
- 4 Lg. tubes **K49-20050 23.95**

- 2 Pickup Tube, Large, Green Tips
- 2 Magazine Orifices, Small
- 1 550 Primer Cup Spring
- 2 Retaining Clips
- 2 Dispensing Tip, Large
- 2 Dispensing Tip, Small
- 1 Failsafe Bushing Rev. B

**K49-20048, \$18.95**

## L. MACHINE MAINTENANCE KIT

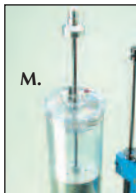

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

Maint. Kit & RL 550B Spare Parts Kit **K49-97016, \$32.95**

## M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

**K49-16306, \$41.95**

## N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550B Cover, **K49-13795, \$23.95**

(O.) Master lock, **K49-13083, \$3.95**

Quick-Change Cover (for use with powder measure) **K49-11143, \$14.95**

## P. UNIVERSAL MOUNTING HARDWARE KIT

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

**K49-14355, \$5.49**

# A Casefeeder UPGRADE for YOUR RL 550B

**\$254<sup>95\*</sup>**

# Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K49-22080** is **\$254.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below.) Replacement carbide cutting blades, **K49-13141**, are **\$19.95** each. Upper lock rings, **K49-13559**, are **\$4.99** each.

# MILITARY BRASS?

**Eliminate the "Grunt Work" with Dillon's Super Swage 600**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

**K49-20095**  
**\$100.95**

# Dillon's Case Preparation Equipment

**CV-2001**  
**K49-20493**  
**\$187.95**

**CV-750 K49-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator K49-20675 \$72.95**

**CM-500 Case/Media Separator K49-21045 \$46.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 K49-22047 \$212.95**

**Euro CV-750 K49-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle. **K49-13804** **\$8.95**  
Case (20 pc.) **K49-20255** **135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle **K49-13733** **\$8.95**  
Case (20 pc.) **K49-20256** **135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **K49-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.  
15-pound bag **K49-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.  
10-pound bag **K49-13496** **\$15.95**

This month's cover model is Rachel with a Cimarron 1873 Winchester chambered in .45 Colt. In the photo at right, she's armed with a Ruger Bisley Hunter in .44 Magnum. # The Guns at the End o

By Alan Korwin

Behind closed doors, democrats and the amnesty-coalition secretly imagine that when 30-million illegal immigrants (the “news” lately calls them “11 million undocumented migrants”) are granted citizenship, they will gain a gigantic voting bloc and permanent control of Congress for the progressive socialist agenda. But will they?

Right now, the mega-million multitudes, by whatever body count you prefer, are *prohibited possessors*, that special class of people banned from the right to keep and bear arms by 18 USC §922(g), the federal law that describes who cannot have a gun. There are nine basic categories. “Illegal alien” is the biggest group in the NICS Index, the official computerized list, at 5.3 million, followed by mental cases at 2.8 million (see chart).

Most of the illegals are of Mexican origin, as near as anyone can tell. Mexicans are used to flat-out denials where gun rights are concerned. Their government has guns, and desperados controlling their towns and the drug business have guns. But average people in cities and towns are basically unarmed, helpless and subject to beheadings and slaughter by the tens of thousands at the whim of heavily armed criminals.

Our politicians are hoping, or dreaming, that once the illegals are granted citizenship here, they will adopt the values of the “progressives” who welcomed them on board, and that includes rejection of the right to arms. After all, guns are evil dirty things that no one in their right mind would want. Only the police (and criminals) have guns (hmmm, just like Mexico). Now that you are U.S. citizens, why would you ever go down that path? We gave you amnesty, we hate guns, stick with us.

It’s true that many illegals are so indoctrinated in the ways of their homelands, and so indebted to the lefties, that this idea of being free people able to bear arms may be totally alien and won’t even cross their minds. They will shun guns like their hoplophobic (gun-fearing) sponsors.

The leftists who are fighting to bring them into the American fold are already doing whatever

they can to project an image of victimization and dependence on the state. This is good if you’re trying to maintain control. It’s the model the left relies upon. “Gun control” isn’t about guns, it’s about **CONTROL**.

The idea of 11 million new gun owners (or 30 million, take your pick) is frightening to them. They’ve got little training, no understanding of the responsibilities that go with it, and little culture of gun ownership. It could present problems...or opportunity. Shouldn’t we help them correct their misunderstandings and lack of education?

Like it or not, as soon as the illegals are legal – they’re no longer *prohibited possessors*, instantly.

The very thing that keeps them banned by law evaporates with the stroke of a pen. They can walk into gun stores and shooting ranges just like the rest of us. They come under the protection – and enjoyment – of our glorious Second Amendment, and that’s a good thing. You can’t arm slaves and expect them to remain slaves. We have a

responsibility, even a duty, to stand by them.

Emancipated illegals will discover, for the first time, the beauty and liberty of being free to own firearms, and the sovereignty and dignity this provides. Whatever the politicians, lefties and “news” media do or say, the free market will have 30 million new potential customers on their hands, and that is one helluva force to reckon with.

The anti-rights hoplophobes will have to compete with that – and it’s just common sense to make the powers of darkness eat dirt against the hard artifacts of freedom you can buy and hold in your hand. The bigots must compete uphill against a shiny new symbol of empowerment, and friends who want to go to the range and experience liberty’s teeth. And you know how newcomers at the range react – they smile and want more ammo.

The democrats will find themselves in a very hard place, because they can’t embrace the whole gun thing without alienating their entire anti-gun-rights base. And while the republicans can’t alienate their anti-amnesty base, they can embrace new citizens once immigration reform inevitably

SOURCE: FBI website. The prohibited categories are abbreviated to fit the chart. The denial items ranked 5 and 10 did not clearly match any of the statutory list of prohibited persons. Ten million Americans are currently permanently banned from firearms ownership, a figure expected to grow, as laws and reasons for prohibition are debated and added. Procedures for removing the disability can be as costly and unclear as the secretive federal no-fly list.  
Chart by Alan Korwin 2013 GunLaws.com. Permission to circulate granted

# f Immigration Reform <sup>21</sup>

hits the fan, because legal citizens have Second Amendment rights that need protecting. Gun-rights are totally on the right side of the ledger sheet. This levels the playing field. If you want to protect your right to arms, you can't stand with the viciously anti-rights democrats.

Whatever happens, gun-rights groups are going to sprout Spanish-language divisions. Catalogs are going to need Spanish-language editions, and store-window signs will be advertising *armas de fuego* (firearms).

Let's not forget that Latinos are not completely out of the loop either. Metallic Silhouette competition originated in Mexico, and *Siluetas Metalicas* matches use Spanish commands: *Listo!* (ready) *Fuego!* (fire) *Alto!* (cease fire). [For more information about Metallic Silhouette competition, go to [www.imssu.org](http://www.imssu.org), or [www.ihmsa.org](http://www.ihmsa.org).]

This all presents enough of a dilemma that the progressives, not known for fairness in anything but lip service, might actually try to concoct a conditional citizenship formula for amnesty citizens. Give them voting rights and welfare benefits, social security and the "right" to pay taxes (to support our aging population, which all the parties are eying with desire), but not the right to buy all the guns and ammo they want. Or any, just for the safety of themselves and little children of course. A sort of three-fifths citizenship deal straight out of 1783 or the Dred Scott decision. There is little chance that would fly, but it is not without precedent.

Even today, the ACLU is interested in restoring rights for seven million people who cannot vote because they are felons. Most of them are hardened convicts (or just dope smokers), and would presumably vote as democrats, again creating that highly desirable and presumably rock-solid left-wing bloc. But there is no interest in restoring ALL their rights, just the right to vote, another sort of three-fifths citizenship solution that doesn't seem to bother leftists.

Rational people seem to believe otherwise. If you're not sufficiently back in society enough to keep and bear arms, are you safe enough to have the vote and control the direction of the nation? The left would like to overlook that

small detail and just get the voters.

Now, it's likely the tens of millions of illegals – we'll have to sign the bill to find out how many – might notice all the gun stores, and gun publications, and NRA ads, and shooting ranges, and gun shows, and learn, like their fellow citizens, that guns are good. Guns save lives. Guns protect you. Guns stop crime. And guns are why America is still free.

And they might become marksmen and aficionados of firearms like the 100 million of their now countrymen who already keep and bear arms. They might decide to join the club. Certainly, many of them will.

It's in the interest of freedom that they be encouraged toward this sort of decent, honorable, patriotic behavior, especially in the face of socialists trying to deceptively dissuade the newly freed virtual slaves.

And if these new Americans adopt gun-rights freedoms, that would be a good thing. But boy would it upset the liberal democrats and the takings coalition and do them harm.

***Siluetas Metalicas* is an "animal friendly" version of a shooting sport once popular in Mexico where the targets were live animals staked out at varying distances. The targets are referred to by their Spanish names, *gallina* (chicken), *javelina* (pig), *guajalote* (turkey) and *borrego* (ram). Photo courtesy of Magnum Target**

Because, when you become a gun owner you start to realize certain things.

When you are legally able to pick up a gun, you are holding the artifact of physical freedom in your hand, as a tangible thing, as a free person. This might be an absolutely unique and transformative experience for a person who has previously lived in the shadows, hiding from John Law.

If you've only known corruption and abuse in a country you escaped from to get here, you might like that, and want to defend and protect that. You might want that for your kids. You might want a reloading press, and one of my books, and you might want to join the NRA and a local chapter. You might find you like the good side of the "The Force." And immigration reform might have a silver lining for the future of gun rights in America.

*Alan Korwin runs [GunLaws.com](http://GunLaws.com) and is the author of ten books on gun law, including his latest, *Your First Gun – Should you buy one and join 60 million safely armed American homes, soon to be released in Spanish, the perfect book for gun owners to get for their gunless friends. His company, Bloomfield Press, established in 1988, is the largest publisher and distributor of gun-law books in the country.**

# XL 650

## STANDARD FEATURES:

- Automatic Indexing
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 800-1000 Rds./Hr.

# The Safepacker

**THE WILDERNESS' SAFEPACKER™ HOLSTER** is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

**Mark Pixler, editor**

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K49-11703 \$89.95**  
*"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.*
- "Commander" Safepacker, RH **K49-11702 89.95**  
*"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.*
- "Officers" Model" Safepacker, RH **K49-11701 89.95**

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

## Uncle Mike's Kydex Holsters

Michaels of Oregon's injection-molded Kydex holsters have a level of detailing, quality and affordability unmatched by other manufacturing methods. The almost-vertical rake allows for behind-the-hip carry, and for some applications, the holster can function as a crossdraw. Smaller-size holsters can also be used for "appendix" carry. To aid concealment and to assist in the draw, the holster rides close to the body at a mid-level height. The injection-molded belt loop is designed to accept and support a variety of belts from 1" to 1.75" wide.

# BLADETECH INDUSTRIES

## holsters, magazine/speedloader pouches

### "Revolution" Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

**Holster NOT  
Included**

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

## "Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

# 'Belted Magnum' Powder System

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder.

Like all of Dillon's powder measures, the Belted Magnum Powder System is case-activated and can be used with your RL 550B, XL 650 or AT 500 reloader. It's ideal for loading large-caliber magnum rifle cartridges. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

The "Belted Magnum" Powder System is based on our SL 900 Shot Dispenser, so the Maximum Charge Bar won't work in our standard powder measures – you'll need to buy the entire system. The good news is that the "Belted Magnum" Powder System has an integral drain, so it's easy to empty the hopper in order to change powder types; so, if you load several big calibers with various powders, it's easy to switch from one to another.

Keep plenty of extra powder on hand, because when you're dispensing 100-plus grains into every cartridge, you'll need it!

Magnum Powder System **K49-97126 \$137.95**

## Forster Products Datum Dial Ammunition Measurement System

Forster Products' easy to use Ammo Measurement System gives you the data you need to refine your case-sizing and bullet-seating operations. For example, using the average relative measurement taken from several cases that have been fire-formed from the same firearm, you can then adjust your sizing die to produce cartridges with a headspace tailored to your firearm's chamber. This complete kit includes one Datum Dial tool for checking cartridge cases, both bullet/cartridge dials for use with .17, .204, .224, .243, .257, .264, .277, .284, .308, and .338 caliber bullets, a laminated chart showing common datum diameters, complete instructions and storage box. (A caliper is required.)

**K49-18960 \$157.00**

## Evolution Gun Works Chamber Checkers

Speed up the round-checking process when you're getting ready for a match! EGW uses actual Clymer chamber reamers to produce its chamber checkers.

## Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

### Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

OAL Gauge **K49-14622 \$38.95**  
OAL Gauge, Curved **K49-14862 \$39.95**  
(Use for auto, lever and pump rifles)

.300 Win. Mag. **K49-14655 6.99**

### Bullet Comparator

Correct bullet seating depth is critical to accuracy. In addition, minor variations in bullet seating depth will have an effect on both pressure and velocity. The L-N-L Bullet Comparator provides precision handloading dimensions.

(Caliper not included)

# The Mitchell PPSH-41/22

By J. B. Wood

A little over 50 years ago, I had a brief but memorable experience: I fired an original Russian PPSH-41 submachine gun. In two trigger pulls, I used up about half of the 71 rounds in the drum magazine. In today's restricted world, a repeat performance is very unlikely. For a moment, though, I could have imagined that I was a heroic Russian soldier, defending Stalingrad against the Nazis.

Now, thanks to Mitchell Manufacturing and Pietta of Italy, you can do your own imagining. They have made a neat re-creation of that gun, a semi-auto in .22 Long Rifle. It lacks, of course, a full-auto switch, but it is otherwise extremely authentic. For sale in states with oppressive governments, the basic model comes with a 10-round magazine.

If you live in a state where it's still America, you can give it a more authentic look with the optional 50-round drum or 30-round curved magazine, available at extra cost. Both of these are also offered "blocked" to 10 rounds. Here in free Kentucky, I will definitely go with the 50-round drum.

The nicely done finish is a matte blue, and I noticed that the construction is practically all steel, even the sights and trigger guard. The only visible alloy parts are the stock buttplate and the filler-piece around the magazine. The stock material is listed as "hardwood," and its walnut stain adds to the authentic look.

The sights are a V-notch rear and a square-post front. The rear sight is dovetail-mounted, laterally adjustable. The rocker-type manual safety is located on the right at the rear of the receiver. Rearward is on-safe, forward to fire, alternately exposing white and red dots. The trigger pull is good. Minimal take-up, and a clean six-pound break.

At the Big Tree range, I tried it standing, offhand, at 15 yards, and from a casual rest at 25 yards. I used all three magazine types – the standard 10-

round, the 30-round "banana," and the 50-round drum. All of them worked perfectly with my favorite load, CCI Mini-Mags. I normally distrust drum magazines, but this one was flawless in operation.

The 50-round drum deserves further comment. Most of the magazines of this type have a lever or handle to wind them up after you load. This one, you don't have to. There is a bent-oblong opening on the back to access thumb-recesses on the rotor,

and you wind it as you load. On the outer edge of the rotor, each cartridge has an individual recess. Ten little windows on the back let you check each round. The drum comes with a well-written and illustrated manual.

The targets were interesting. Whether shooting from a casual rest or standing, the group sizes were consistent, nearly all of them measuring 3 inches, and well centered in the 8-inch black of the Champion VisiShot targets. On the "casual rest," an MTM Shooting Stick, more of them were in the dead center number one ring. I'll admit that after the target work, I fired the rest of one drum at dirt clods on the ground, belt level, submachine gun style.

Yes, it's definitely in the "fun gun" category. Even so, with its accuracy, you could hunt with it. And, if you ever had to use it in a serious situation, it does look like an SMG. The overall dimensions are very close – 33.15 inches for the original, and 33.5 inches for this .22 version.

The weight is quite different, of course. With a fully loaded drum, the original tipped the scale at nearly 12 pounds. The PPSH-41/22 weighs 4.4 to 5.1 pounds, depending on the magazine used.

The basic gun, with a 10-round magazine, has a suggested retail price of \$495. The cool drum magazine is priced at \$149.

Mitchell Manufacturing • P.O. Box 9295

The 10-round and 30-round magazines, and two of the test targets.

# Dillon's Pistol Die Sets

## Size Die

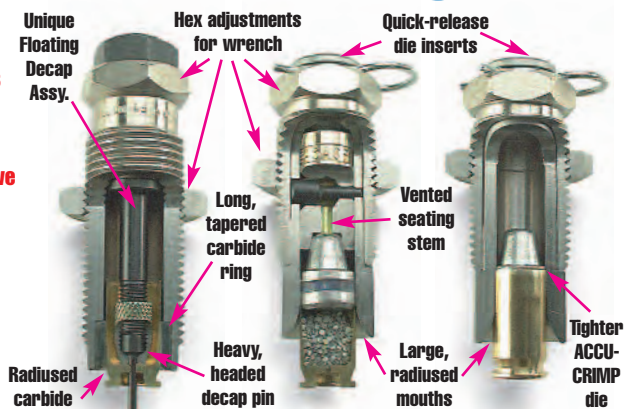

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

---------------	-----------	--------

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

Extra Loading Data Labels, K49-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# California Competition Works

## 12 Gauge Shotshell Tactical Strippers

A.

B.

C.

D.

California Competition Works' Tactical Strippers are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum\* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84 attachment device

(C. & D.) that will accommodate up to a 2-1/4" duty belt.

A. Six-Shell Tactical Stripper **K49-18606 \$23.95**

B. Four-Shell Tactical Stripper **K49-18605 22.95**

C. Three-Shell Aluminum Stripper\* **K49-19475 34.95**

D. Six-Shell Covered Tactical Stripper **K49-19225 33.95**

\*Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.

### AP Custom USA Shotshell Carriers

AP Custom USA's Shotshell Carriers are 100-percent machined from solid billet aluminum, and utilize proven 303 Hi-Yield Stainless steel leaf springs to contain either three or four 2-3/4" 12 Gauge shells in their slots, depending on model. Both models offered here feature the BLADETECH Tek-Lok™ Universal Belt Clip. The 4x4 Shotshell Carrier holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong or weak-handed. The 3x3 holds three 2-3/4" 12 Ga. shells in two adjacent slots.

an accomplished sniper in 1944 at the age of 20, commanded a squad of female snipers, who proved to be the scourge of the German army. These courageous young women used a rifle that was state-of-the-art at the time, the Mosin 91/30 PU.

**Warning!** Prices for these authentic snipers will go up very soon! **Call Now!**

## The Last\* Original K98k Mauser Rifles from WWII Germany

ZF41 Sniper Rifle

FREE  
Accessories

Original ZF41 Collector Rifle without Scope \$999  
Some scopes are also available.

An original K98k WWII German K98k Mauser with the *Original Scope Mount Base* permanently built into the barrel in the correct position at the factory (unlike reproduction adaptor bases, the Zero point will not wander).

## Popular, Brand New Production Rifles

**PPSh-41/22**  
A Direct Descendant  
of the Soviet  
PPSh-41

Its

full-auto

ancestor was  
made famous in  
1945 at the Battle  
of Berlin. This PPSh is

Fun, Accurate and Inexpensive to Shoot.  
(You can also buy it 50-rod drum, if it's legal where you live).

**Free:** Original Soviet Oil Can and Soviet  
Leather and Web Sling with Swivels.  
New PPSh-41/22 .22LR semi-auto rifle \$495.

Here's a next generation version of the famous M16 — **The Black Lightning.**

Dealers  
Invited

The Black Lightning has a full-length Picatinny rail to accept M16-style sights or a variety of scopes and even a bi-pod. Semi-auto in .22 Magnum.

Powerful, affordable and very accurate!  
**Rifle with scope rings Only \$595.**

Each rifle has its own Original military accessories.

**You get all of this for only \$799.**

**Get Yours Now, While You Still Can!**

## \* The Last Ones!

**The End of an Era. There are No More!**

We've emptied the Communist warehouses and delivered tens of thousands of quality Mausers to happy customers. Now, except for a very few stragglers, we have found no more stashes of WWII German Mausers for 4 years now. Similarly, we believe we have found the last of the good Soviet snipers.

If you are looking for an historical Mauser or Soviet sniper, we sincerely recommend you **Call us Now** to get what you want, or at least get your name on the list -- before the last few in our warehouses are gone and **Prices Go Out of Sight!**

## 800-274-4124

The **M2 Chronograph** comes with sensors, screens and one two-foot mounting bracket. A nylon carrying case and tripod are available options. The **CED7000 Shot Timer** is a breakthrough in technology. No other timer to date offers this combination of advanced features, compact size and light weight. This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

## Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.) K49-19220 \$29.95  
Advanced Trauma Kit (A.T.K.) K49-19322 69.95

# Dillon Reloading Accessory Package Deals! <sup>43</sup>

### \*FAQ About Berry's Preferred Plated Bullets

#### 1. What is "DS?"

"Double Struck." Double-Struck bullets go through an extra sizing process after being plated. This makes the bullet 100 percent symmetrical. This can give you an edge in competition, but most shooters won't notice the difference.

#### 2. What is the difference between Plated/Jacketed/Cast bullets?

Berry's Preferred Plated bullets begin as a swaged lead core. The plating process works through electrolysis. The swaged lead cores are tumbled in an electrically charged cyanide bath containing high-grade copper ingots. The copper clings to the lead and the longer the bullets remain in the bath, the thicker the plating.

#### 3. How do I load Berry's Preferred Plated Bullets?

Plated bullets occupy a position between cast bullets and jacketed bullets. They are soft lead, but have a hard outer shell on them. When loading plated bullets we have found best results using low- to mid-range jacketed data in the load manual. You must use data for a bullet that has the same weight and profile as the one you are loading. Do not exceed mid-range loads.

#### 4. How fast can I shoot these bullets?

Velocities depend on the caliber, but as a rule of thumb, we recommend you don't shoot our plated bullets over 1200 fps (feet-per-second). Our 44s actually shoot best around 1150 fps. 45s are generally good at 850-900 fps. Our bullets are NOT recommended for magnum velocities.

#### 5. Can I shoot your plated bullets in my GLOCK?

Yes. We have a large contingent of loyal GLOCK shooters using our bullets. The plating is thick enough that you will not get lead fouling in your bore, which is the nemesis of polygonal barrels.

\*DS = Double Struck, TP = Thick Plate, HB = Hollow Base, RN = Round Nose, FP = Flat Point, SWC = Semi Wadcutter, WC = Wadcutter

**A**bout SNS Casting: SNS Casting, Inc. is a family owned and operated business located in rural Flanagan, Illinois and was officially founded by Jim Stinar in the winter of 2008. Jim's casting history actually began in the mid 1980s as a hobby. This supplied not only himself but a group of friends and fellow avid shooters who were tired of paying too much for inferior products. Eventually, word was spreading throughout the surrounding states of his bullets, which were priced right for the quality.

Today, SNS Casting features seven of Magma Engineering's Mark VIII casters and three Lube Master lube/sizers fitted with M-A Systems Collators. **Our lead is a certified factory alloy of 92 percent lead, 6 percent antimony and 2 percent tin, which is purchased in 44,000-pound lots to ensure consistent quality. The lube we use is Magma blue lube.**

SNS Casting's founder/owner Jim Stinar and his son Ryan are avid USPSA (A30909, A63666) shooters, SASS members and NRA members.

**NOTICE: There is a \$20.00 minimum 'Hazardous Material' (HazMat) handling fee for shipping PRIMERS. This fee is assessed in increments of 10,000 primers. Primer orders MUST be shipped separate from other items, and require a separate shipping and handling charge. Shipping and HazMat fees are not included in prices.**

# SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K49-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

K49-19972 \$39.95

## Stainless Steel Dial Caliper

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

K49-13462 \$28.00

## High Tech Digital Caliper

**Accurate,  
Easy to Read!**

K49-17171 \$39.95

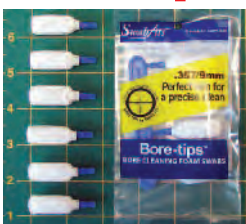

The Otis Technology, Inc. **Breach-to-Muzzle Cleaning System** cleans rifles .22 to .50

cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal.

The system includes three memory-flex rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

K49-18174 \$39.95

## Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of sol-

vents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

# Concealed Carry Tote<sup>47</sup>

\$45<sup>00</sup>

K49-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy-duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5"x11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

## 'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

## Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

K49-19495 \$9.95

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?!). No excuse, Sir!

K49-19257 \$11.95

## DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

K49-19371 \$29.99

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

K49-50050, \$374.95

B.

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

K49-50075, \$849.95

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

K49-50125, \$74.95

C.

D.

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

K49-50200, \$149.95

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

K49-50001, \$299.95

### E. (1) PRIMING CONVERSION

Converts Swager to Priming System.

K49-50003, \$74.95

Deluxe Set: 510.5 grains for bullets, cases and powder.	K49-12458	\$49.95

## Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	K49-14067	\$1.35
5-Pack of Die Lock Rings	K49-10669	4.15
1" Dillon Bench Wrench	K49-10842	7.95
<i>(Buy two or more 1" Bench Wrenches for \$7.10 each)</i>		
Wrench/Lock Ring 5-Pack	K49-10668	9.95

## Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Armorer's Block **K49-19536 \$29.95**

# Grace USA<sup>53</sup> Gun Care Tool Set

This custom designed 12" x 9" x 1-1/2" case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

Take out your frustrations, and build your grip strength at the same time! Just think about...oh, socialized medicine, tax increases, high-capacity magazine bans, etc.

1 lb. K49-15532 \$7.99

2 lb. K49-15533 \$14.95

Note: These Come in Assorted Colors

**T**ACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

**K49-19538 \$13.95**

**T**he **TACCOM Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you constant extraction, which is **KEY** for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

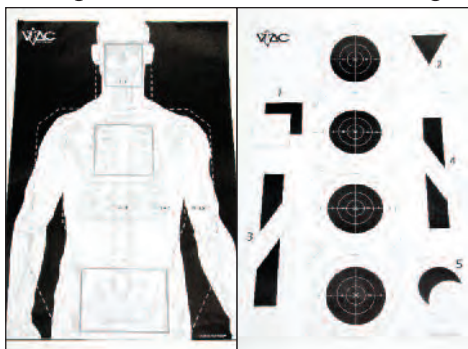

**K49-19539 \$10.95**

**D**oes your .22 Long Rifle insert move back and forth in your AR upper? The **TACCOM Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

**K49-19533 \$7.95**

## Viking Tactics 35" x 23" Rifle Target

Double-Sided Rifle Target (Pkg. of 10) **K49-40057 \$10.00**

# 58 Performance Parts for Your GLOCK® Firearm

## Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K49-14760 \$24.95**

## Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K49-18630 \$14.95**

# 60 CAPT. WHEELER'S GUN RETURNS

**By John Marshall**

I have written about Captain Harry Wheeler before in these pages (*Harry Wheeler and his Gun* – June, 2013 issue). Just as a summary, Wheeler was one of Arizona's legendary lawmen in the early part of the 20th Century. Following service in the U.S. Cavalry, he volunteered to be a member of the famed Arizona Rangers. He worked his way up from Private to Captain of the Rangers. Following the disbanding of that outfit by the Arizona legislature, he served as a three-term Sheriff of Cochise County, Arizona. He was also the muscle behind the Bisbee Deportation, when as sheriff, he and his deputies rounded up over 1,300 labor agitators during World War I and removed them on railroad cattle cars from the copper mines in Bisbee to exile in the desert of southern New Mexico. Although widely criticized for this action, Harry was also regarded by large numbers of folks as a stalwart patriot. He took the initiative to allow copper to continue to be available for the strategic production of munitions and communications equipment for the nation's war effort.

Following the Bisbee Deportation, Harry resigned as Sheriff of Cochise County to join the army. He was an expert marksman with both rifle and pistol, and had a fine collection of firearms. One of them was the subject of my previous article. It was a little Colt Model 1903 hammerless pocket pistol in .32 ACP caliber. He bought it for personal protection before shipping out to France in WWI as a captain in the U.S. Army Expeditionary Force, and he kept it for the rest of his life.

Harry died before his time at the age of 50 from pneumonia in 1925, and was buried in Bisbee's Evergreen Cemetery, where he rests beside his second wife Jessie Wheeler Adams and their son Bobby, who died in infancy.

Following his demise, Harry's guns passed to his family, and were dispersed. Eventually some were sold, and I acquired the little Colt. It had passed through a couple of collectors, principally in the state of Kansas. Living in Arizona, I was glad that Harry's gun had returned to his home state. However, I thought it fitting that the gun should go full circle and be pictured resting upon its former

owner's grave marker. This would be a reunion that would be almost 88 years in the making.

My wife and I visit Bisbee fairly often, and on a recent trip, I took his gun and my camera along with us. We passed through Tombstone, where Harry held forth as Sheriff in the old Cochise County Courthouse. Moving on to Bisbee, about 26 miles southeast of Tombstone, we came to the Evergreen cemetery, which is located in the Lowell mining district of the town. Wheeler's gravesite was not difficult to locate; it is prominently placed not far from the entrance to the old cemetery, just west of the gravesite of another prominent Arizonan, George Warren. The Bisbee mining district of Warren is named for him, and his image is part of the Arizona State Seal, where he is pictured leaning on a mining pick. As a side note, Warren was quite eccentric, and after discovering copper in Bisbee, he lost his fortune after betting that he could win a foot race between himself and a horse. That didn't work out very well. As I had mentioned before, my maternal grandparents are also at rest in that cemetery, about 30 paces from Captain Wheeler's grave.

I had also decided to bring along a couple of replica badges as a tribute to the Arizona offices that Wheeler held. One was an Arizona Rangers Captain's badge, and the other was a Cochise County Sheriff's badge. I respectfully placed the gun and the badges on Captain Wheeler's headstone and took some pictures, which you see here. The circle was now complete. Harry Wheeler was symbolically re-united with the gun he once owned, and the event was recorded. My wife and I took a few moments of silent contemplation. I thought it was a good way to honor the memory of the man, an outstanding lawman and patriot. And now, as the late Paul Harvey was fond of saying, you know the rest of the story.

with Jerry Miculek – The World's Greatest Revolver Shooter Jerry Miculek is recognized as the fastest and most accurate revolver shooter in the world. His speed and skills are, in one word... Amazing! They've been verified in hundreds of local and national competitions. In this program, he shares with you some of the techniques and secrets he has mastered over the past 25 years to become the shooter he is today. And, you'll see an incredible display of revolver shooting and reloading. 100 min.

## Competition Reloading

with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

## Build the Perfect Survival Kit

By John D. McCann

When an unexpected emergency situation rears its ugly head, will you be up to the challenge? "I wasn't prepared for that!" will no longer be a valid response with the survival-kit-building methods in this book from survival expert John McCann. According to McCann, the secret to surviving any life-threatening crisis is being prepared through careful advance planning, and that means designing, building and carrying your very own customized survival kits. 192 pages, published by krause publications.

**K49-19394 \$16.99**

## Build the Perfect Bug Out Bag

By Creek Stewart

Be ready when disaster strikes! If an unexpected emergency or disaster hits, are you prepared to leave your home – fast? You will be if you follow the advice in this book. *Build the Perfect Bug Out Bag* shows you how to create a self-contained disaster preparedness kit to help you survive your journey from ground zero to a safer location. Survival expert Creek Stewart details from start to finish everything you need to gather for 72 hours of independent survival – water, food, protection, shelter, survival tools, and so much more. 208 pages.

**K49-19393 \$16.99**

# Shooting Tip: Isometric

It is very important, from a standpoint of holding down muzzle flip, to get our pivot points, such as the web of the hand, as high up relative to the bore axis as possible.

This image from above of the author's arm position also shows the "big hug."

**By Duane Thomas**

Recently on the [Self-Defense-Handguns.com](http://Self-Defense-Handguns.com) message board, one of the members asked me, "What do you think of the concept of using isometric tension to control recoil?" The short answer is that generating any sort of isometric tension on the gun – if by that you mean push-pull – is generally a bad idea because it interferes with consistent sight tracking. In this article we'll get more in-depth with that answer.

Let's begin with a clear understanding of what we want to happen between shots on a fast, accurate string of fire. When we fire a shot, the gun will flip its muzzle because it's on a pivot, our hands, and the top of where our hands contact the gun butt, the web of the master hand at the grip tang, is below the line of energy the gun is giving us, the barrel. Therefore the gun in recoil has leverage to flip its muzzle.

Ideally we want to begin with the gun aimed-in perfectly, then in recoil its muzzle comes up, tracking consistently up and then down, right back to the same spot. If that happens, we can fire the gun as fast as possible and still have every succeeding shot hit close to the same place as the previous shot. What we want then is a neutral technique that allows that to happen, and does not generate any forces onto the gun that interfere with it doing that and nothing else.

There are two basic approaches to cutting down muzzle flip between shots, we use (1) our muscles to fight recoil, (2) skeletal alignment to passively cause the gun to track consistently. I greatly prefer the latter. Not only is it a much less energy intensive approach, and less tiring to execute during a

USPSA/IPSC Grand Master Ben Stoeger shows a picture perfect Modern Isosceles Stance. Note the elbows rotated toward the outside rather than down toward the ground.

The Modern Isosceles Stance in action. The author fires a 1911 .45 with full-power Black Hills hardball. The muzzle is already down from recoil, the gun aimed-in for the next shot, even though the empty shell casing has only moved a few inches from the ejection port.

long practice session, on a basic level it just works a whole lot better.

A gun with a low bore axis, where the barrel rides barely above the web of our master hand, all else being equal, will have less muzzle flip and perceived recoil than a gun with a higher bore axis because the gun has less leverage to flip its muzzle. While our hands are a pivot point, so is our wrist, elbow, and shoulder. Any of these points can flex, allowing the gun to flip more. Thus the maximally muzzle-flip-resistant shooting technique would be one that, as much as possible, gets all our pivot points in a straight line, as close to the bore axis as possible. Raise our pivot points by keeping our arms straight, and we have in effect lowered the gun's bore axis, therefore it will not flip nearly as much in recoil.

With that in mind, let's examine the classic Weaver Stance. The master side arm is slightly bent, coming down from the gun, so our wrist, and to a greater extent our elbow, is significantly *below* the gun. The support side arm is more radically bent, with the elbow pointing toward the ground, therefore our wrist and elbow are even more greatly below the bore axis. Not only does this give the gun a lot of leverage for muzzle flip because your arms are coming *down* from the gun, the arms tend to flex under recoil, like an accordion, back and forth, which in turn imparts a lot of excess movement to the gun.

Within reason it does not matter how high up the muzzle of the gun moves in recoil, as long as it comes back to the same spot. Isometric tension, i.e. pushing forward with the master hand and arm while pulling to the rear with the support hand and arm in the Weaver Stance, because of its downward

# Tension & Arm Position

Left: This frontal view of shooting great Grand Master Brian Enos shows the elbows rotated toward the outside. Center: An excellent example of the “big hug” arm break of the Modern Isoceles Stance can be found in the

cover image of Brian Enos’ groundbreaking book, *Practical Shooting: Beyond Fundamentals*. Right: A much more recent photo of Brian, from a front/side view, highlights the bent elbows.

Left: USPSA/IPSC Grand Master Phil Strader uses an iteration of the Modern Isoceles Stance that incorporates isometric side-to-side pressure, here while shooting the USPSA Nationals.

Right: This low-angle image shows Phil Strader’s arms position, with only a slight bend, though the “elbow break” is still there.

bent arms, not only accentuates muzzle flip because your pivot points are coming down from the gun, it interferes with consistent sight tracking because you are generating forces onto the gun that cause it to do a hula dance in recoil.

Thus the popularity among serious speed shooters of the Modern Isoceles Stance, which allows us to get our pivot points, as much as possible, up high and in-line with the gun. Given the reality of gun design (we need to ride the sights above our hands, and also allow clearance for an auto pistol’s slide to move back-and-forth), we will never be able to get all our pivot points directly in-line with the gun barrel. Besides, our head, and eyes, ride above our shoulders, so to a certain extent our arms will always come down from the gun. However the closer we can get our pivot points to the bore axis, the better (as long as our attempts to do so don’t compromise our technique in other areas – however that is a topic for another article).

What differentiates the Modern Isoceles Stance from the classic Isoceles Stance, arms position-wise, is that in MIS the arms are not totally straight, rather there is a slight break at the elbows. The elbows are not pointed toward the ground, rather they’re pointed toward the outside. It might be said that our arms are only “straight” in that all our pivot points are on the same horizontal plane, however our arms are curved toward the outside like we’re giving a big hug. The reason for the slight break is that when we fire a gun, if our arms are perfectly straight, the recoil energy flows down our arms until it hits our body. This tends to rock us backward slightly. This is no big deal, and might not even be noticeable, while firing one shot at a time because

the level of recoil energy from one shot is so slight, and our body has time to recover between shots.

However when we fire multiple shots fast we get what I call “cumulative recoil.” Because, when firing at speed, our body does not have time to recover from being shoved slightly off-balance before the next shot occurs, and the next wave of recoil energy arrives, every succeeding shot tends to throw us ever more greatly off balance. Therefore we get the cumulative effect of having very heavy recoil, our body pushed further and further off balance with each shot, even though each individual shot, taken in and of itself, would be no big deal if we had time to recover from it.

Therefore the slight break in the arms with the Modern Isoceles Stance, since instead of the recoil energy flowing down our arms and into the body as with both arms straight, when the recoil energy hits that break it stops, and never reaches the body. Therefore we do not get the effect of cumulative recoil because the recoil energy is isolated away from our body.

Some of our more advanced level shooters, such as USPSA/IPSC Grand Master Phil Strader, use a variation of the Modern Isoceles Stance that does incorporate muscular tension, only they don’t bend their arms downward and push-pull as with the Weaver Stance, they use an MIS arm position and press *inward*. As Phil has put it, “You should feel a slight burn in your pecs at the end of a long practice session.” While that technique doesn’t work for me (because everyone’s body is different), it sure as hell works for him, and is definitely something worth experimenting with.

## Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless K49-18600 \$49.99  
Blued K49-18601 49.99

## Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it. Adjustable Pistol Sight

K49-18210 \$53.95

## California Competition Works Magazine Storage Sleeves

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

Four-Magazine Storage Sleeve K49-19226 \$14.95  
Six-Magazine Storage Sleeve K49-19227 17.95  
Magazine Sleeve I.D. Tag/Hanger K49-19476 1.95

## Secure Firearm Products 1911 Armorer's Tools

Secure Firearms Products' 1911 Recoil Spring Tester (left) will help you determine if the recoil spring in your needs replacing, and you'll save time and money by testing and organizing loose recoil springs in your shooting bag.

The 1911 Firing Pin Stop Tool (right) is used to safely remove and replace the firing pin stop from 1911-style slides.

Recoil Spring Tester K49-15305 \$33.99  
Firing Pin Stop Tool K49-15304 10.99

# CHECK-MATE M14/M1A Magazines

Currently Check-Mate Industries is the largest M14/M1A magazine manufacturer for the United States Military. Check-Mate Industries is recognized as being America's number one manufacturer of M14 magazines. We offer CMI M14/M1A magazines in 5-, 20- and 25-round capacity.

5-round M14, Phosphate Finish	<b>K49-27055</b>	<b>\$22.00</b>

**DCO SUPERTHUMB®** offers models for popular centerfire pistols and 10/22 style magazines.

**ST1** is for 9mm and .40 caliber Beretta, Browning, Ruger, SIGARMS, S&W, etc. In addition, the ST1 has interior rails and grooves to accommodate Colt Government magazines. **K49-18607 \$7.95**

**ST2** is for GLOCK and Para-Ordnance magazines. **K49-18608 7.95**

**ST3** handles virtually all centerfire, single-column magazines. **K49-18609 7.95**

**ST22** is for Ruger 10/22 rifles. **K49-18610 7.95**

**STJR** is for Ruger, Browning, Colt and High Standard .22 pistols. **K49-18611 7.95**

## UPLULA MAG LOADER

The UPLULA™ is a military quality personal universal pistol magazine loader. Loads virtually all 9mm, .357 SIG, .40 S&W, 10mm and .45 single- and double-stack magazines.

**K49-19239 \$33.95**

## New Bulgarian AK Mag

New steel 30-round AK-47 magazines from Bulgaria.

**K49-12022 \$24.95**

# ElZetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).  
 ZFH1500 AR15 Flashlight Mount **K49-12020 \$29.95**  
 ZSM Tactical Shotgun Mount **K49-18050 39.95**  
 ZRX Tactical Flashlight Mount **K49-15487 35.00**

## PROTEKTOR MODEL

The Original Leather Sandbag\* Rifle Rests

All Protektor Model leather bags are made with the best top grain cowhide available. The welded steel rest is strong enough to stand on and won't break if dropped (Owl Ear Front Bag sold separately).

\*Sand not included.

## The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

**K49-18146 \$65.00**

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

**K49-15384 \$29.95**

**K49-19395 \$6.50**

## Comp-Tac's Trojan Horse Long Gun Case

**T**he Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

**K49-19388 \$115.00**

# Magna-Matic Specialty Tools for Armorsers

**M**agna-Matic's Carbon Removal Tools quickly remove carbon from your rifle with ease and precision.  
**CRT-15 (AR15/M16) K49-11705 \$49.95**  
**CRT-25 (AR10/SR25) K49-29025 49.95**  
**CRT-14 (M1A/M14) K49-29823 41.99**

**M**agna-Matic's AK Front Sight Tool is 400 percent stronger than the competition! It's compatible with Bulgarian, Chinese, Egyptian, Romanian, Polish, Russian and Yugo AKs, and Czech VZ-58s as well.  
**K49-29026 \$29.95**

## M-16/AR-15 BUTTSTOCK CLEANING KIT

**I**n "MIL-SPEC Speak," this is a KIT, CLEANING, BUTT STOCK M16A2 RIFLE, which contains: ROD, CLEANING, SMALL ARMS: M11E3; CASE, SMALL ARMS ACCESSORIES; BRUSH, CLEANING SMALL ARMS; BRUSH, CLEANING SMALL ARMS: BORE; BRUSH, CLEANING SMALL ARMS: CHAMBER; AND BOTTLE ASSEMBLY LSA 5 OZ. It just doesn't get much more MIL-SPEC than that.

## Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,

30mm tube and

bright illumination of the reticle are just a

few of the many features of the DMS-1. Bright

red illumination of the reticle adds to the quick-

ness of the sighting system in day and low-light condi-

tions. At one power it works well as a reflex sight and at

longer ranges the four-X magnification gives increased ac-

curacy.

K49-19458 \$249.95

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

K49-11643 \$89.95

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle K49-25374 \$79.99  
Scout Scope Mount for SKS Rifle K49-25373 78.99

### Tactical Sports 45° Offset Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)  
45° Offset Optic Mount K49-14472 \$14.99

### 90° C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE (Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.  
Ruger MK1 (pictured) K49-19535 \$79.95  
Browning Buckmark K49-19534 79.95

Millett's 100-percent aircraft aluminum alloy mount allows you to attach your optics or accessories on a Picatinny rail while maintaining co-witness with your iron sights. For added versatility, the mounts are equipped with removable shims for 1" to 30mm tubes.

How do you make a Savage rifle even more accurate? Well, as the adage goes, you can't kill what you can't see, so you include a Nikon 3-9x40 BDC reticle scope, mounted and bore sighted. This unique reticle can be ballistically matched to your exact cartridge using Nikon "Spot On" Software. Coincidentally, the price of the New package is "Spot On" too. See your favorite Savage dealer for details.
