# Dillon's RF 100 Automatic Primer Filler

**Eliminates the need for primer pick-up tubes!**

**Fills the primer tube while you reload!**

**Clear polycarbonate shield and protective housing**

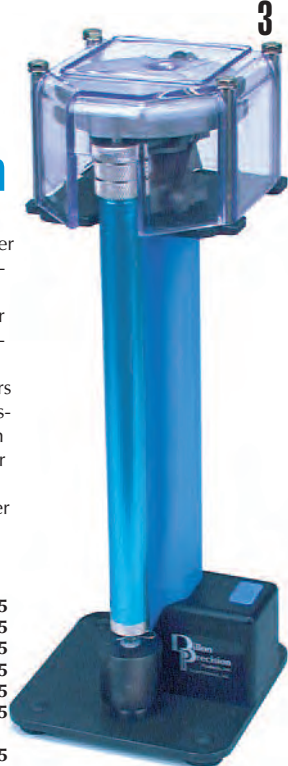

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

## We READ Our Mail!

I don't make it a habit of writing to magazine/catalog publishers, and even though my computer – with its word processor – recently passed on to The Great Beyond, I'm entertaining this undertaking with some nervousness. In a recent magazine article, Massad Ayoob commented that Mike Dillon had a habit of selling only the finest products out there. After ordering from your catalog for not too many years, I've been most impressed as well as satisfied with every item I've purchased from you, especially the latest ones: Dillon Leather by Mitch Rosen holsters. Top quality without paying an arm and a leg! And I'll bet you thought I wanted your catalog/magazine solely for its cover.

Don Mitchell – Selma, AL

I want to recognize the outstanding customer support rendered to me recently by your support team, especially Eric Harvey. My RF 100 Primer Filler began to jam primers into the feed ramp, causing primers to stop falling into the primer tube, or – worse yet – flip upside down, resulting in my Super 1050 loading a round with an upside down primer. Most frustrating! Eric was able to diagnose the problem and proceeded to send me a complete RF 100 update kit at no cost. The directions for modifying my venerable electric primer filler were clear and easy to follow. After a follow up telephone call with Eric, for a minor shim adjustment to the stabilizer plate, I'm back in business with a tool working better than it ever has. Thanks for products that lead the industry in accuracy, reliability and customer support.

Ralph Talbot – San Antonio, TX

*Thanks for the feedback, Ralph. We recognize that unless we provide good customer support, sooner or later we'll run out of customers!*

Here is another appeal for you to re-publish your articles under separate cover. I'm sitting at my desk, cutting back issues of **The Blue Press** to get the reviews, John Marshall's articles, Brian Dillon's articles and other interesting articles. It saves room on my terminally crowded bookshelves, but I would cheerfully find a way to make room for a bound collection of **Blue Press** articles and tech reviews!

Enid Lynch – Hatton, ND

*Enid, we're taking baby steps in that direction with the publication of John Marshall's book, 101 Classic Firearms. I'd love to do a compilation of Brian's articles about his grandfather, Peter Caroline's memoirs and a collection of Duane Thomas' shooting tips, but the guy who signs the check for the printing bill needs to know they'll sell! Let's see how Blue Press readers respond to John's book.*

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our commercial-grade reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

# 10 A SIMPLE SOLUTION

## Knothole Designs Model 2000 Portable Shooting Bench

Reviewed by Peter Caroline

I was walking along the firing line at Shootists Holiday 2014, checking out the vast array of guns, when I came upon an unusual shooting bench. Initially, it appeared to be too simple and compact to be effective, but after watching it in use, I was fascinated. The tag on the top surface identified it as a "Model 2000 Portable Shooting Bench" from Knothole Designs in Alva, Wyoming. Later, I googled Knothole Designs, and called up the proprietor, Jim Gotsch. Mr. Gotsch is One Of Us; he explained that he developed his portable bench as a legitimate excuse to spend more time at gun shows. His price for the bench was most reasonable: \$100, plus shipping, which for my Zip code turned out to be about \$21. I promptly ordered one for review.

Several days later, FedEx delivered a large flat package. I'll admit, I was initially a bit apprehensive. Some years back, I had purchased a folding metal shooting bench, allegedly portable. It weighed just a bit less than my pickup truck, and the set-up was reminiscent of a

Chinese puzzle, involving pressing several spring-loaded buttons at once, and the creative use of Anglo-Saxon obscenities. Folding it up again for transport and storage involved more of the same. The procedure became less arduous with practice, but not much.

The Knothole Designs bench was a wholly different animal. Within five minutes of the FedEx guy's departure, I had the bench completely assembled in my living room. But there is a secret. Included with the bench, there is a set of instructions, with photo illustrations, even. The secret is to **read the instructions**. They are very simple and straightforward. Only five wingnuts are employed in order to put the whole unit together. There are even two extra wingnuts screwed to the bottom of the bench, in case you misplace one of the originals. The only way you can mess up is if you start unscrewing anything that isn't a wingnut. The

moral of this story is: Read The Freakin' Manual!

According to the specifications on Mr. Gotsch's website, the assembled bench weighs just 32 pounds, overall height is 32", seat height is 16" and the top surface is 18" x 48". Seat dimensions are 12" x 16". Seat capacity is 350 pounds. The top and seat are made from 3/4" Grade AB fir plywood, with a deck stain finish. A couple of notches cut in the top accommodate long guns. The sturdy metal parts are powder coated. Fortunately for me, the bench is available in one's choice of

right or left hand configuration.

Now, you might well ask, "How steady can a 32-lb. bench be?" The answer is, it's not a 32-lb. bench when you're sitting on the seat. Your weight pins the bench to the ground, creating a bench/shooter unit that weighs 200 lbs. or more. The double tripod design allows it to be steady on uneven ground, but you might want to carry a few small wood blocks if you require a level surface.

Several days later, I took the Model 2000 bench out to my favorite shooting spot in the desert. The best part of having one's own

portable shooting bench is, any (unpopulated) location can become your own target or varmint range. My shooting buddy, Jim Sanchez, and I put the bench through its paces with both rifles and pistols, and we can both testify to its solidity and stability. You don't have to climb over any structural members to get into position; you just sit down. It was quick and easy to set up from its folded-flat configuration, and just as easy to take down and stow flat under the truck bed cover.

If your local gun club range is too distant, too crowded, too expensive or non-existent, the Knothole Designs Model 2000 portable shooting bench is a practical and affordable alternative. I totally recommend it.

# 101 Classic Firearms by John Marshall <sup>11</sup>

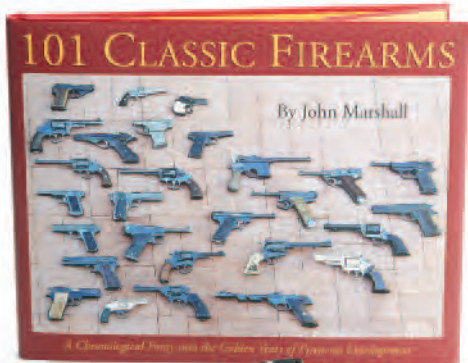

Dillon Precision announces the release of John Marshall's new book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, a compilation of the author's popular articles appearing in *The Blue Press* since 2007.

**101 Classic Firearms** is sure to be a welcome and prized addition to the library of any serious firearms aficionado.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on

some of the world's most important firearms.

About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. He is also an endowment member of the National Rifle Association.

**Price: K95-40133 \$29.95, Autographed K95-97130 \$34.95**

## Pocket Carry: Better Pockets - Not Smaller Guns Constant Companion Clothing is Designed for Pocket Carry of Duty Guns

For years, gun owners have been compromising on small pocket pistols that are comfortable to carry, but lack the capacity and power of duty guns. "I tried a variety of concealment techniques and found that pocket carry was the most comfortable and accessible way for me to carry, but I did not want to compromise on firepower," said company founder, Brandon Trevino. "I knew what I needed was not just a bigger pocket, but a better pocket."

The Constant Companion clothing line features a front pocket that is over 16" deep and constructed from ballistic nylon. It's lint free, snag free, padded and contoured to maintain the upright orientation of your weapon. Unlike traditional pants, the gun

rests on your outer thigh, rather than on the top of your leg, making it easier to move and sit, while the cargo pocket prevents printing. The pants allow for rapid one-handed access to most full-sized and compact handguns. The pants are **Made in the USA** and available online at [www.concealedcargo.com](http://www.concealedcargo.com).

Strong Mount K95-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**K95-16627, \$82.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**K95-20302, \$25.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**K95-20251, \$87.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**K95-21353, \$29.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**K95-22120, \$30.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: K95-16629, \$19.95**

**Overize Die: K95-16626, \$19.95**

**Plastic Funnel: K95-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

**K95-20029, \$22.95**

**RL 450 Powder Die:**

**K95-20308, \$21.95**

# RL 550B

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty

All for ONLY...

**\$439<sup>95\*</sup>**

**K95-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

# RL 550B ACCESSORIES

**A. RL 550B CALIBER CONVERSION KITS**  
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**VERSION \$45.95 (Exotic calibers, \$55.95)**

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K95-20782, \$76.95 ea.**  
 Magnum Rifle Powder Bar **K95-21353, \$29.95 each**  
 X-Small Powder Bar **K95-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K95-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**K95-20064, \$11.35 each**  
**Three or more, \$10.25 ea.**  
**X-Large Powder Die, K95-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**K95-13909, \$22.95 each**  
**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**K95-22055, \$20.95 each**  
**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

**K95-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

## H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol K95-14450  
 Small Pistol K95-14451  
**\$254.95 (110v US Model)**

Large Pistol K95-14453  
 Small Pistol K95-14454  
**\$264.95 (220v Euro Model)**

## CASEFEEDER CALIBER CONVERSIONS (Page 17)

**\$23.95 each**

## K. 550 SPARE PARTS KIT

- 1 Seating Punch, Small
- 1 #10 Tinnerman Insert
- 1 Primer Cup, Large
- 1 Primer Cup, Small
- 1 Bellcrank Cube
- 1 3/8" Index Ball
- 1 550 Brass Tip Set Screw
- 1 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 1 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)
- 1 Seating Punch, Large
- 1 550 Index Ball Spring
- 2 Pickup Tube, Small, Yellow Tips
- 2 Magazine Orifices, Large
- 1 Toolhead Pin

## I. PRIMER FLIP TRAY

**K95-13606, \$20.95 each**

## J. PRIMER PICKUP TUBES

- 1 Lg. tube **K95-22029 \$7.99**
- 1 Sm. tube **K95-22028 7.99**
- 2 Sm., 2 Lg. **K95-20056 23.95**
- 4 Lg. tubes **K95-20050 23.95**
- 4 Sm. tubes **K95-20049 23.95**

## L. MACHINE MAINTENANCE KIT

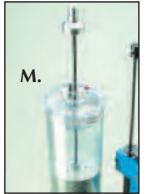

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

**Maint. Kit & RL 550B Spare Parts Kit K95-97016, \$32.95**

## M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

**K95-16306, \$41.95**

## N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550B Cover, **K95-13795, \$23.95**  
 (O.) Master lock, **K95-13083, \$3.95**  
 Quick-Change Cover (for use with powder measure) **K95-11143, \$14.95**

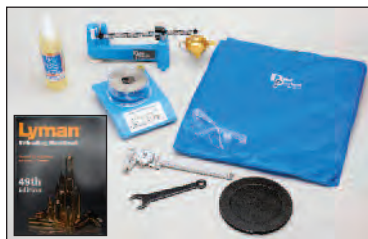

## P. UNIVERSAL MOUNTING HARDWARE KIT

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.  
**K95-14355, \$5.49**

# 16 Dillon Reloading Accessories

**Dillon's Reloading Accessory Package Deals** include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

SDB (Balance Beam Scale)	<b>K95-14482</b>	<b>\$182.95</b>
SDB (Electronic Scale)	<b>K95-14483</b>	<b>251.95</b>

One-Inch Bench Wrench	<b>K95-10842</b>	<b>7.95</b>
Square-Deal-Only Wrench	<b>K95-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	<b>K95-22051</b>	<b>\$48.95</b>
XL650-only	<b>K95-22052</b>	<b>45.95</b>
Square Deal "B"	<b>K95-22223</b>	<b>64.95</b>

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	<b>K95-22214</b>	<b>\$41.95</b>
RL 1050 Tray Kit	<b>K95-22215</b>	<b>41.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>K95-97126</b>	<b>\$142.95</b>
----------------------	------------------	-----------------

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	<b>K95-16306</b>	<b>\$41.95</b>
--	------------------	----------------

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	<b>K95-17950</b>	<b>\$45.95</b>
Plastic Roller	<b>K95-22183</b>	<b>40.95</b>

**Quick-Change Cover** for use with powder measure. **K95-11143 \$14.95**

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

## Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge and Bullet Comparator

(Caliper not included)

### Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy.

Straight K95-14622 \$38.95  
Curved (use for auto, lever and pump rifles) K95-14862 \$39.95  
**Modified Case (required)**

.223 Rem.	K95-14627	\$6.99 each
.22-250	K95-14628	
.243 Win.	K95-14631

# Dillon's Case Preparation Equipment

**CV-2001**  
**K95-20493**  
**\$188.95**

**CV-750 K95-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator K95-20675 \$73.95**

**CM-500 Case/Media Separator K95-21045 \$46.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 K95-22047 \$213.95**

**Euro CV-750 K95-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle. **K95-13804** **\$8.95**  
Case (20 pc.) **K95-20255** **135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

*D.C.L. Dillon Case Lubricant*

8 oz. bottle **K95-13733** **\$8.95**  
Case (20 pc.) **K95-20256** **135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **K95-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.  
15-pound bag **K95-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.  
10-pound bag **K95-13496** **\$15.95**

## Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.  
 4-3/4" SA Colts/clones **K95-11560**  
 4-5/8" Ruger Blackhawk **K95-15765**  
 Ruger LCR **K95-29030**  
 2" J-Frame S&W Rev. **K95-15764**

## "Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport - and no more - so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

1911 Holster **K95-19947** \$139.95  
 Mag Pouch **K95-19946** 44.95

# Dillon's New Rapid Trim 1500 Case Trimmer <sup>23</sup>

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **K95-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **K95-13141**, are **\$19.95** each. Upper lock rings, **K95-13559**, are **\$4.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	<b>K95-62124</b>	<b>\$20.95</b>

# The Safepacker

**THE WILDERNESS' SAFEPACKER™ HOLSTER** is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

**Mark Pixler, editor**

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K95-11703** **\$89.95**  
*"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.*
- "Commander" Safepacker, RH **K95-11702** **\$99.95**  
*"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.*
- "Officers" Model" Safepacker, RH **K95-11701** **\$99.95**  
*"Officers Model" Fits: Colt Officers' Model, GLOCK 19/23/30/32/36, Para P-12, etc.*
- "GLOCK 26/27" Safepacker, RH **K95-11700** **\$89.95**  
*"GLOCK 26/27" Fits: G 26/27, Springfield XD Subcompact, Makarov, etc.*
- "J-Frame" Safepacker, RH **K95-11699** **\$89.95**  
*"J-Frame" Fits: S&W Centennial, Taurus M85, Walther PPK, KelTec P-11, etc.*
- "Mustang" Safepacker, RH **K95-11698** **\$89.95**  
*"Mustang" Fits: Colt Mustang, Pony, KelTec P-32, Beretta Tomcat, etc.*

## Close & Ready Bedside Holster Caddy

**Holster NOT Included**

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

**K95-18046** **\$29.95**

## The Pistol Sheath by Center of Mass LLC

Center of Mass LLC's **Pistol Sheath** is an adjustable, ambidextrous, multi-fit KYDEX® holster that is durable, affordable and Made in Idaho!

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

### Measured Waist

# BLADE-TECH™

## “Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

Scope Battery Cap Remover*

This is a MUST-HAVE range-bag accessory. It's a squib rod (for removing stuck bullets), magazine base removal tool, and scope windage adjustment and battery cap removal tool.

**K95-15250      \$12.95**

The Otis Technology, Inc. Breech-to-Muzzle Cleaning System cleans rifles .22 to .50 cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal. The system includes three memory-flex rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

**K95-18174      \$39.95**

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?!). No excuse, Sir!

**K95-19257      \$11.95**

# Dillon's Pistol Die Sets

## Size Die

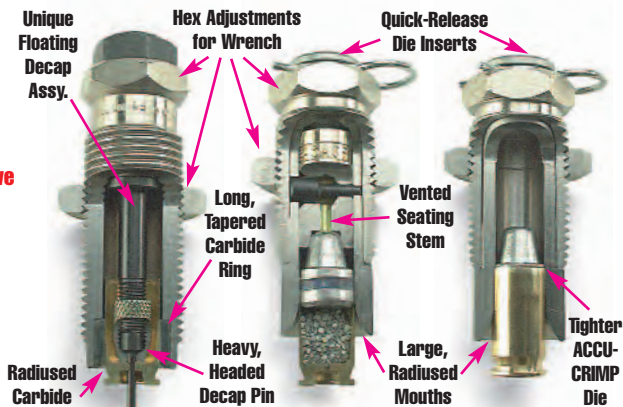

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets 35

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	K95-10839	\$66.95
.308 Winchester	K95-15574	66.95
.30-06 Springfield	K95-10840	66.95

# Let's Quit Smoking (and get t

Hard  
Cast  
Lead

Copper  
Jacketed

By Larry Drake

When I select a bullet for competition shooting there are a lot of factors that help me decide which bullet is the best choice. The bullet has to be available, accurate, affordable and clean. Clean means a lot to me. Clean is so important that it's a higher priority than affordable. I'll pay more for clean because, to me, it's worth it. Traditionally, the choices have been between lead, plated, moly coated and jacketed bullets with each having pluses and minuses for my criteria. Now, with some new players on the field, it might be a good time to examine exactly which bullet is the best for the volume of shooting I like to do.

Straight lead is the cheapest, generally the smokiest and most prone to depositing lead where I don't want it – anywhere outside the berm I'm shooting the bullet into! Frequently, the smoke is caused by the lubricant that is applied to the outside of the bullet. This lubricant is necessary and it does help reduce fouling, but the smoke it produces is a problem in its own right. The problem is compounded when shooting at night under overhead lights. Light reflecting off of the smoke can obscure your vision and make hitting – or even seeing – the targets difficult. This smoke is caused by our choice of projectile and powder. The right combination can be nearly smoke free. The wrong combination can resemble a coal-fired freight

train. Combine that with little-to-no wind and you've got a problem. Leading is a problem as well. Everyone thinks of leading as something that happens in the bore. While that's certainly a problem as it can degrade accuracy and, in extreme cases, create a dangerous situation, it isn't the only place a handgun will lead. I shoot a lot of revolver competition and lead residue builds up above the

forcing cone and on the cylinder face. Left unattended, that lead build up can cause the cylinder to bind, and that super nice trigger job turns into a super heavy trigger. Thankfully, a little work with a wire brush and a scraper cleans it all up.

Plated bullets are a bit more expensive and generally have little-to-no problems with smoke or leaving deposits of lead. Unfortunately, plated bullets are often somewhat soft and cannot be pushed to higher velocities without shedding their plating

to reveal the softer lead underneath. There have also been many reports of reduced accuracy with plated bullets. That being said, I've used plated bullets for years in various shooting matches and haven't had any problems with them.

Jacketed bullets are the most expensive, but can be the cleanest, least smoky, bullets as well. Debates rage back and forth over whether or not they are as accurate as lead bullets but in the end they're the only choice for certain applications. Gas-operated rifles, like the AR15, or compensat-

"Straight lead is the cheapest, generally the smokiest and most prone to depositing lead where I don't want it."

he lead out while we're at it)

Copper  
Plated

Hi-Tek  
Coated

ed handguns, for example, should never be run with lead bullets. Jacketed, and some plated bullets, are the only way to avoid fouling the weapon and clogging up the gas system or leading the compensator.

Over the last few years some new choices have appeared and one in particular is looking really promising. J&M Specialty of Australia is marketing a bullet coating they call

Hi-Tek Lube. It is a polymer-based coating that completely encapsulates the projectile to reduce smoking and virtually eliminate leading. The coating is applied via a method that might best be described as "shake and bake." The lead bullets are sized before being placed in a bucket where a very small amount of the liquid polymer coating is drizzled onto them before they are gently shaken to distribute the coating. After dumping the bullets out to let the coating dry, they're baked in a convection type of oven to cure the polymer. Once cooled, the process is repeated a second time to help build up a nice thick layer of the coating. Once the final cooling process is complete, the bullets are ready for resizing. No lube or other prep is necessary.

Lead bullets coated with moly, or molybdenum disulfide, have been around for several years as well and they offer some of the same benefits as the Hi-Tek coating. Smoke and leading are reduced, and the cost is usually in line with the

Hi-Tek coated bullets and a bit less than the plated variety. They can be kind of messy during the actual reloading process as the moly coating can come off on your hands. That kind of mess doesn't bother me, just as long as the bullet shoots clean.

I've been shooting the Hi-Tek coated bullets offered by SNS Cast Bullets for several months now and I'm pretty happy with the results.

They're readily available both online and through a local retailer (check the selection out in this very catalog). They are accurate enough that I shot a one-hole group at 25 yards with my 627 (even if it was kind of a big hole). Pricing at Dillon is \$78, which puts them at a whopping \$4 more than the uncoated bullets. That's right I said \$4. They sell this product as a kit that you can apply yourself, but I think for \$4 per thousand more I'll let the pros take care of coating the bullets. Last, but not

least, they are clean. Clean enough, anyway. I've shot several thousand of them through my pistols and while there's some smoke, it isn't enough for me to notice while shooting. As far as leading goes, I haven't had to get the wire brush or the scraper out since I've been using these bullets.

In the end, I may not have completely stopped smoking, but I think I've found a patch, or, if I want to be really current, an e-cigarette. Either way I've got less smoke, no lead and more money in my pocket. I think I'll take that compromise.

"Over the last few years some new choices have appeared and one in particular is looking really promising."

# Comp-Tac's Trojan Horse Long Gun Case 39

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Standard Trojan Horse Long Gun Case **K95-19388 \$75.00**  
 Heavy Rated Trojan Horse Gun Case **K95-16229 100.00**

**A**DCO SUPER **ATHUMB®** offers models for popular centerfire pistols and 10/22 style magazines.

**ST1** is for 9mm and .40 caliber Beretta, Browning, Ruger, SIGARMS, S&W, etc. In addition, the ST1 has interior rails and grooves to accommodate Colt Government magazines.

**K95-18607 \$7.95**

**ST2** is for GLOCK and Para-Ordnance magazines.

**K95-18608 \$7.95**

## AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

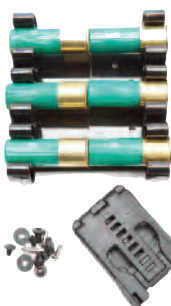

**AP Custom USA's Shotshell Caddies** are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

## TACCOM, LLC Tactical and Competition Accessories

**TACCOM, LLC's Duaload Shotshell Holder** is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip (included)** that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

<b>2Up Belt/MOLLE</b>	<b>K95-19530</b>	<b>\$9.95</b>
<b>4Up w/Tek-Lok™</b>	<b>K95-19531</b>	<b>29.95</b>
<b>6Up w/Tek-Lok™</b>	<b>K95-19532</b>	<b>34.95</b>

**TACCOM, LLC's Quaload Shotshell Holder** is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shells come out of the holder and not have to worry about rim overlay...the rims are already overlapped in the correct position!

<b>4Up Quaload Shotshell Holder</b>	<b>K95-19543</b>	<b>\$39.95</b>
<b>8Up Quaload Shotshell Holder</b>	<b>K95-19544</b>	<b>69.95</b>

# CLASSIC FIREARMS: The Ar

## By John Marshall

Back in the mid-1950s, the U.S. Air Force sought a new small-caliber survival rifle to be part of their pilots' emergency gear. It was to be used in case of ejection over hostile territory. Their request was for a .22 Hornet-chambered arm that would be compact, light and that could float in water. The Air Force was then using two main firearms designed for downed pilot survival. The first of these was the M4 Survival Weapon. Designed in 1949 by (then USAF Major) Burton T. Miller, it was a bolt-action rifle with a retractable wire stock, chambered for the .22 Hornet. The second was the M6 Aircrew Survival Weapon, an over-under firearm designed and produced by Ithaca in 1951. It was chambered for the .22 Hornet and the .410 shotgun round. Responding to the Air Force request, a new survival weapon was designed by Eugene Stoner of ArmaLite, then a division of Fairchild Aircraft.

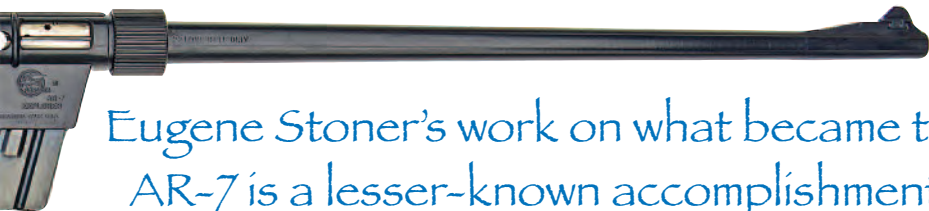

The AR-5 was a lightweight 4-shot bolt action in .22 Hornet. The action, magazine and detachable barrel of the AR-5 could be stowed in its removable stock. It could float either stowed or assembled. This firearm was adopted by the Air Force in 1956 as the MA-1. However, with its large inventory of previous survival weapons, the Air Force never opted to actually place the MA-1 into general issue. While Stoner was disappointed in this setback, he decided to develop a .22 semi-automatic survival rifle for the civilian market. It would be based on some of the concepts pioneered with the AR-5, using much of the research and tooling for that rifle.

Stoner, born in 1922, had an interesting history, and was destined to become one of the premier post-WWII weapons designers. He attended high school in Long Beach, California, but soon afterwards went to work for the Vega Aircraft Company, installing armament in airplanes. When America

became embroiled in World War II, Stoner enlisted in the Marine Corps. Working in aviation ordnance, he served in the South Pacific and northern China. Following the end of the war and his honorable discharge from the Marines, he found work in the machine shop of Whittaker, an aircraft equipment company. He became a design engineer, and in 1954, started work as chief engineer for ArmaLite. Stoner is perhaps best known for designing lightweight combat rifles, notably the 7.62 x 51mm AR-10. Its scaled-down offspring, the AR-15, morphed into the family of M16 weapons still used by the U.S. and many other nations. His work on what became the AR-7 is a lesser-known accomplishment, but still a significant firearms development.

First introduced by ArmaLite in 1959 as the "AR-7 Explorer," it became instantly popular on the civilian market. The rifle used a lightweight 16" detachable barrel, first made of aluminum (later composite polymer) with a steel liner. When detached, it would fit into the plastic stock along with the aluminum receiver and an 8-round single-stack magazine. Capping the stock with a rubber buttplate, the disassembled and stowed rifle measured just 17-1/2" in length. Overall length when assembled was 35-1/4". The action was a conventional blowback type, with a pull-out operating handle in the bolt and a pivoting safety lever on the right side. The magazine was released with a lever located in the forward part of the trigger guard. The keyed barrel slid into the externally threaded forward part of the receiver. A multi-grooved threaded nut mounted around the barrel screwed onto the receiver threads, tightening the barrel firmly into the receiver. The rear sight was a simple aperture plate, crudely adjustable for elevation, and locked into position with a single screw. The front sight was ramped, and could be adjusted for windage by tapping it in its dovetail either right or left as necessary. The right side of the receiver featured the ArmaLite "Pegasus" flying-horse-superimposed-on-crosshairs logo. Below that, cast into the receiver, was "AR-7/EXPLORER/COSTA MESA, CALIF. U.S.A./PATENTS PENDING." The serial

# ArmaLite AR-7 Survival Rifle

Eugene Stoner's work on what became the AR-7 is a lesser-known accomplishment.

number was stamped vertically into the forward portion of the trigger guard. The barrel was marked “.22 LONG RIFLE ONLY” on its right side.

The stock, buttplate, receiver, magazine and barrel had a gloss black finish, while the bolt and operating handle were not blued. Very early stocks can be found with a solid brown or marbled/swirled brown color. There was no hold-open device, and the bolt did not lock back on the last shot. The cartridge feed ramp was made part of the magazine. The stock was secured when assembled to the receiver with a long thumbscrew, the head of which was recessed into the pistol grip. On the left side of the receiver, a single screw retained a sideplate. When this was removed, it allowed access to the trigger and hammer mechanism for cleaning and lubrication. The screw could also secure a special scope mount to the receiver if desired. Extra-capacity aftermarket magazines of 10, 15, 20 and 50 rounds quickly appeared on the marketplace. These, of course, would not fit for storage into the stock. The twin recoil springs on this rifle are fairly stiff, and require high-speed ammo for reliable functioning. Accuracy, while not stellar, is sufficient for use on small game up to 50 yards. The trigger pull is of only average quality.

The AR-7 has been popular as a survival and plinking rifle since its introduction. Disassembled and stowed, it fits easily into a backpack, and weighs a scant 2.5 pounds. Contrary to its use by Sean Connery as James Bond in the 1963 movie “From Russia With Love,” it’s probably not the best thing for bringing down helicopters. That movie, however, did tend to boost sales! The stowed rifle does fit easily into a briefcase, giving it some utility for covert activity by secret agents who might need such things.

ArmaLite shipped some AR-7s to Israel as survival weapons. The Israelis modified them with a telescoping stock, a pistol grip, a Mauser K98k-type front sight, and shortened barrel. Some have been re-imported to the United States with a permanently mounted muzzle brake to meet our 16-inch minimum requirement. These are valued collector items now.

In 1973, ArmaLite sold the manufacturing and sales rights to the AR-7 to Charter Arms. The rifle illustrated here bears ArmaLite markings, but was

sold in a Charter Arms box marked with its serial number in January of 1974. An original ArmaLite gun in a transitional box has now become a sought-after collector item. This pretty well nails the manufacturing date on this particular gun as sometime in late 1973. When Charter Arms began manufacture, there were some initial reports of spotty quality control, reliability issues and warped barrels. These things were apparently corrected in later production. Charter Arms produced a pistol version of the AR-7 called the Explorer II. Looking a bit like the Mauser C96 “broomhandle,” it had a built-in pistol grip that accepted a spare 8-round magazine. The rear sight was an open notch type adjustable for both windage and elevation. The usual barrel length was 8 inches. The barrels of the rifle and pistol are not interchangeable. Modifying a rifle receiver and a pistol barrel to make a short-barreled rifle is illegal unless proper federal registration and payment of a \$200 tax is accomplished first.

An outfit known as AR-7 Industries made solid steel barrels for the AR-7, which of course were much heavier, and tended to defeat the lightweight objective of the original design.

In 1980, Charter sold the rights to the AR-7 to Henry Repeating Arms. Some of their rifles have been marked “Survival Arms.” Henry made some minor revisions to their product. ABS thermoplastic material has replaced the original plastic for the stock. This gives better impact resistance and resilience. The stock can now accommodate three magazines (1 in the receiver, 2 spares). The latest versions are billed as completely waterproof, unlike the previous types that could leak water into the stock when submerged. It would still be prudent to wrap some waterproof tape around the buttplate seam to be sure. A Picatinny-style rail is currently incorporated into the receiver for scope rings, and a Teflon coating is employed.

The AR-7 continues in its popularity to this day. With collectors, the original guns with ArmaLite markings command a premium. I think Gene Stoner would be proud of how his invention has performed in the marketplace over the years. Sadly, this prolific firearms designer died on April 24, 1997, leaving an impressive legacy of many iconic and classic firearms.

# SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K95-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

K95-19972 \$39.95

**Competition Reloading with Brian Enos** guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

# Concealed Carry Tote<sup>47</sup>

\$45<sup>00</sup>

K95-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

## 'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

## Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

## Baschieri & Pellagri 12 Ga. Target Slug

Reduced recoil, 1200 fps  
25 per box

K95-19214 \$21.00

## DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

K95-19371 \$29.99

# Jordon Castro – New

By Robin Taylor, [www.taylorfreelance.com](http://www.taylorfreelance.com)

Not many “serious” shooters wear a Mohawk. Or have summer jobs picking berries. Much less shoot with a high school pistol team.

Enter Jordon Castro. Affable, quirky, and distinctly American, he’s a new face in a new sport called SPP – the Scholastic Pistol Program. Castro gave up rugby to take up pistol shooting a couple of years ago, and found his groove with SPP. At his first major SPP event in July, Jordon blasted his way through “the 4-minute-mile” of student steel – the “40-second barrier” – shooting a combined

time of 39.37. He’s a typical teenager in a great many ways, and his story shows how youth steel teams (typical of SPP) are changing the landscape of our “shooting culture.”

SPP supplanted an older program run by the now-dissolved Steel Challenge Shooting Association a couple of years ago. It’s a simplified version of Steel Challenge, and hundreds of students are discovering speed shooting through it. Critically, SPP is a TEAM sport, played by full-time students age 12 and up. You need a 4-person team to play.

With the support of the Scholastic Shooting Sports Foundation, SPP has found “traction” like you can’t believe, dotting the calendar with state championships, regional and national events. Even the normally staid NRA has climbed on board, offering SPP-specific coaching certification.

## Scholastic Push

SPP Director Scott Moore and his associate Tammy Mowry have wisely taken on the trappings of NCAA-like competition. This year they started awarding an all-American-style designation, and sponsors like S&W and HiViz Shooting Systems have begun bankrolling small college scholarships. Together, that’s raising the prestige and the intensity.

While nobody’s getting a full-ride-scholarship as yet, a few thousand makes a tremendous difference in the financial life of a student – and in the attitude of the parents.

All this support (and success) in a program that DIDN’T EXIST five years ago? That’s amazing!

## Endowment Grants = Long Term Stability

Shooting takes money, and travel more so. To offset that, Larry and Brenda Potterfield have stepped in to bankroll grants that help local teams build up an endowment account to pay for such things long-term. The Potterfields (who deserve to be knighted for this) give hundreds of thousands of dollars to SPP and others, who in turn offer participation and prize purses to competitive teams.

When teams compete in major events, they can win four- and five-figure endowment contributions, often just for showing up. Jordon’s team alone has built up an endowment worth more than \$125,000 – about 1/4 of which came from winning matches. They can only draw 5 percent per year, but that 5 percent yields more than \$5,000 for ammo, travel, uniforms, etc.

Surprisingly, this program got rolling in blue-state New England, spreading up and down the East Coast: Harvard has a team; West Point; University of Vermont (UVM); Florida State; and Massachusetts Revolver Club. They’re overcoming institutional resist-

ance to do the politically impossible. Yale still won’t allow its student team to call itself the “Yale” pistol team, so the students pick a euphemism (“Yela” or “Yalu”) and show up anyway!

## How It Works:

SPP shooters shoot four specific arrangements of steel plates. You shoot each arrangement five times as quickly as possible, dropping your slowest run. (The match requires a total of 100 rounds.) Fastest 4-person team wins.

While Jordon set the national record in rimfire at the nationals, one guy doesn’t make a team. The excellent South Texas Juniors won the SPP Nationals in rimfire with a team time of 184 seconds – Jordon and “Team Gotta” placed second at 192.

Students in SPP come from all walks of life. You’ll find the American “melting pot” on display here – and Jordon brings much of that together in

# Face in a New Game

49

one person. Jordan looks Hispanic, but he's actually Filipino/Japanese on his father's side, and German/Welsh/Polish on his mother's.

"People expect me to speak Spanish, especially when I'm picking," says Jordan – but the family's second language is French!

## Getting To The Top

Jordan and teammate Adam Thomas steam-rolled their way through various local junior titles until the Steel Challenge World Championship this year, when Jordan got a rude surprise.

For the first time he "got owned" by another junior – Idaho NSSF whiz Kolby Pavlock.

"For the SPP Nationals, I took it a lot more seriously," says Jordan.

He wasn't the only one. SPP participation exploded this year, drawing 328 athletes from 15 states to the SPP Junior/Senior Nationals in Sparta, Ill. A separate event for College teams happens in March at Fort Benning.

"We've seen amazing growth at this year's Junior/Senior Nationals – over 50 percent," says Scott Moore. "We've become the largest youth action event in the country."

Jordan spent a month dryfiring in his basement, hitting team practices, and shooting side events geared to sharpen his game. Right up to the night before the match, Jordan and his teammates had posters showing the course layout taped up in one of their hotel rooms. They took turns dryfiring the course over and over again with a SIRT laser trainer.

"The poster really helped a lot," says Jordan. "It really helped me figure out the timing of each stage."

Using a tip from NSSF Champion Ron Stricklin, Jordan burned down the SPP stage called "Go Fast."

"Go Fast" puts four big 18" x 24" plates 10 yards away, with a 12" stop plate in the middle. Shooting all five takes an average competitor 2.5 seconds. If your four runs total less than 8 seconds, you're competitive nationally.

Jordan did it in 6.05!

## SPP Gear

New SPP shooters start out with an iron-sighted .22, and transition to a 9mm service pistol like a Glock or S&W M&P over time.

Jordan shoots a plain-looking Browning Buckmark in "senior rimfire." His teammates shoot a mix of unremarkable S&W 22As, Rugers, Buckmarks, etc. Students can shoot rimfire for two years before the SPP rules force them to shoot 9mm. Jordan's already shooting a Glock 34 in practice, preparing for that transition.

## Rimfire Ammo For The Kids

Jordan and the other SPP kids would be finished without the .22 ammo supplies flowing to them from Winchester, ATK and Focchi. At big SPP events, teams can typically buy 4,000 rounds of Winchester M22 for about \$205. Once a year, teams can buy as much as 15,000 rounds from ATK. As we shooters well know, that's huge. The sponsors see the value in what Moore and company are doing, and (like the Potterfields) they're investing in America's youth.

SPP is changing the shooting culture, and pushing back against the anti-gun dynamic in our schools. Young shooters like Jordan are taking on shooting as their primary sport, and industry leaders have put up the money to make that dream permanent. If you'd like to learn more, look up SPP on the Scholastic Shooting Sports Foundation website, [sssffonline.org](http://sssffonline.org).

## Gun-tips®

Gun-tips® Extended Reach Firearm Cleaning swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**K95-50050, \$384.95**

**B. 50 BMG CARBIDE SIZE DIE**  
 The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**K95-50075, \$869.95**

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

**K95-50125, \$76.95**

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

**K95-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

**K95-50001, \$299.95**

### E. (1) PRIMING CONVERSION

Converts Swager to Priming System.

**K95-50003, \$76.95**

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

**K95-50002, \$299.95**

### F. (1) SWAGER CONVERSION

Converts Priming System to Swager.

**K95-50004, \$76.95**

## Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	K95-14067	\$1.35
5-Pack of Die Lock Rings	K95-10669	4.15
1" Dillon Bench Wrench	K95-10842	7.95
<i>(Buy two or more 1" Bench Wrenches for \$7.10 each)</i>		
Wrench/Lock Ring 5-Pack	K95-10668	9.95

## Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Armorer's Block **K95-19536 \$29.95**

K95-09992 \$12.95

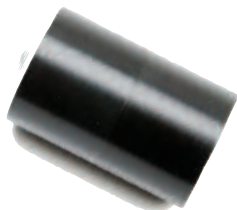

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 S5 heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

K95-19538 \$13.95

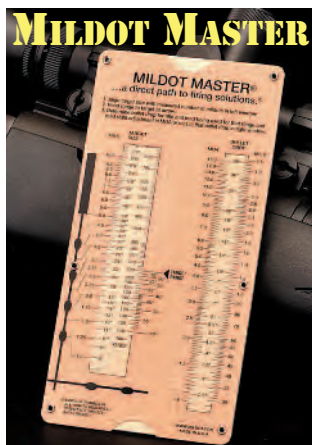

The TACCOM **Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

K95-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The TACCOM **Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

K95-19533 \$7.95

You can become a master at using a Mil Dot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

Mildot Master® K95-14762 \$29.95

## Schuster Mfg. Inc. Adjustable M1/M1A Gas Systems

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

# Hi-Point's Surprisingly Imp

The Hi-Point Model JHP is a large, single action, striker-fired autopistol chambered for .45 ACP. The Model JHP gets around the need for a heavy recoil spring, common in blowback autopistols chambered for service cartridges, by having a large and heavy slide.

The JHP's safety lever has three functions. Up is Safe. Down is Fire. When the slide is pulled to the rear and the lever manually pushed up into the hold-open notch, it can be used to lock the action open.

## By Duane Thomas

Hi-Point's Model JHP is a large, blowback-operated, striker-fired autopistol chambered in .45 ACP. The slide is an aluminum/zinc casting, the frame is polymer. The gun is rated for +P ammo.

The trigger is a smooth-faced plastic unit. For a single-action gun, the trigger stroke is quite long, almost like a short double action, though amazingly smooth. The trigger broke at an even five pounds according to my NRA weight set.

Grip panels, surprisingly, are separate units, held in place with large Phillips-head screws. The overall handle is shockingly comfortable. Magazines are single stack, blued steel, hold nine rounds, and have absolutely huge baseplates. One of the few nits I can pick with this gun is that, of the two sample mags supplied with the article test gun, only one would fall free when I pressed the mag button with the slide locked to the rear.

Speaking of which, the slide does lock back

when you shoot the gun dry. There is, however, no external slide lock, so getting the slide back into battery after reloading entails pulling it to the rear, then releasing to go forward.

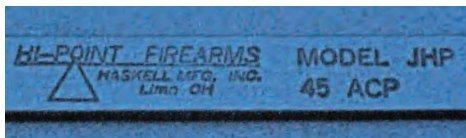

As the name indicates, the Model JHP is intended to feed hollowpoints. Thus I repaired to the range with an assortment of ammunition including Black Hills "blue box" hardball, Winchester 185-gr. Silvertips, and from Hornady their standard pressure XTP and TAP-CQ +P hollowpoints, both 200-grainers.

Reliability-wise the Model JHP was flawless with hardball and the Silvertips which feature a rounded, hardball-like ogive. The gun did not like either of the two loads featuring a truncated cone bullet shape. When I say, "didn't like," I mean the rounds wouldn't even come out of the magazine. I fired three rounds of XTPs and had one failure to feed. I fired two rounds of TAP-CQ +P and had two failures to feed. Returning to hardball and Sil-

# ressive Model JHP .45 Auto <sup>63</sup>

The trigger is plastic. Trigger pulls were quite smooth, if a bit long. The trigger broke at five pounds even.

As the model designation indicates, this gun is intended to feed hollowpoints – and in Thomas' testing did, as long as the hollowpoint featured a rounded ogive.

The ejection port on the Model JHP is huge. The extractor is spring-loaded.

Black Hills "blue box" hardball reloads put five rounds into this respectable group at 50 feet from the bench, but POI was 3-1/2" above POA with the adjustable rear sight bottomed out.

Winchester 185-gr. Silvertips put five rounds into less than an inch. POI was 1-1/2" above POA.

vertips restored 100 percent function. It's worth noting that several multi-thousand-dollar 1911s of my experience wouldn't feed truncated cone shaped bullets either, so you can hardly fault the Model JHP in that regard.

Blowback autos, on which the barrel does not move during cycling, being instead immovably fixed to the frame, can be quite accurate, and such was the case here. Best group from the Black Hills ball was 1.6" with three of the five bullets going into one hole, however that group impacted 3-1/2" high with the adjustable rear sight totally bottomed out. The Winchester Silvertips posted a quite satisfying 0.9" group, only 1-1/2" high.

The Model JHP has a fully adjustable rear sight, click adjustable for windage and elevation. The rear sight is highlighted with two red dots, the front sight with a yellow bar. I didn't find that yellow front sight the most visible thing on Earth, frankly. In the near future, those "highlighted"

sights will be having an appointment with a black Sharpie. With more visible sights I don't doubt I could shrink the Model JHP's not-exactly-huge groups considerably.

I placed a USPSA target at five yards and fired a full gunload, 10 rounds of factory .45 hardball, in a series of five double taps. Every round struck well within the A-zone, with shot-to-shot speeds between .22 and .25 second.

I would trust this gun with hardball or a hollowpoint featuring a rounded, feed-reliability-enhancing bullet profile. The Hi-Point Model JHP was more accurate than many guns I have tested over the decades costing far more. Trigger pulls were smooth, the grip comfortable, the gun's shooting qualities excellent. This proved to be a surprisingly impressive handgun. For something full retailing at under \$200, it was kind of amazing, actually.

Extra Loading Data Labels, K95-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

## E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth	<b>K95-18613</b>	<b>\$6.99</b>
-----------------	------------------	---------------

**Snake Oil** is a derivative of an FDA certified medical lubricant used in high-speed medical drills.

- Provides a film that separates and protects moving parts, for smoother operation and increased efficiency.
- Contains no evaporants and has a film affinity in excess of two years.
- Reduces the collection of dirt, dust and other contaminants.
- Performance in extreme conditions is unparalleled.

0.5 oz. Bottle	<b>K95-16035</b>	<b>\$4.95</b>
2 oz. Bottle	<b>K95-16508</b>	<b>8.95</b>
Grease, (2) 4cc Tubes	<b>K95-17073</b>	<b>4.95</b>
0.5 oz. Oil, 4cc Grease	<b>K95-10059</b>	<b>5.95</b>

**M-PRO7™ Gun Cleaner** is odorless, non-toxic and biodegradable. "Safely cleans rifles, handguns, shotguns..., black powder, corrosive priming deposits and much more."

4 oz.	<b>K95-10139</b>	<b>\$11.95</b>
8 oz.	<b>K95-10138</b>	<b>18.95</b>
32 oz.	<b>K95-11298</b>	<b>40.95</b>

**M-PRO7™ Copper Remover** works up to four times faster than ammonia-based cleaners and is odor free.

4 oz.	<b>K95-19370</b>	<b>\$11.95</b>
-------	------------------	----------------

**M-PRO7™ Synthetic Grease** is specifically formulated to adhere, protect, and lubricate metal-on-metal sliding surfaces.

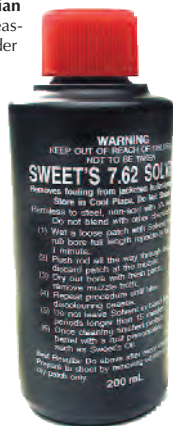

4 oz.	<b>K95-16180</b>	<b>\$14.95</b>
-------	------------------	----------------

## Sweet's Australian 7.62 Solvent

easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

<b>K95-13128</b>	<b>\$12.95</b>
------------------	----------------

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	<b>K95-15571</b>	<b>\$7.95</b>
Slide-Glide Lite	<b>K95-15572</b>	<b>7.95</b>

**Micron UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

**FrogLube** is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

4 Oz. Paste	<b>K95-15443</b>	<b>\$10.99</b>
4 Oz. Liquid	<b>K95-15444</b>	<b>\$17.59</b>

Nylon Gun Parts Cleaning Brush	K95-16389	\$2.25

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1)

Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps. K95-18599 \$14.95

# drymate™

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ K95-11313 \$19.95

# Bore-tips® Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	K95-15310	\$4.98

## Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless	K95-18600	\$49.99
Blued	K95-18601	49.99

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

Four-Magazine Storage Sleeve	K95-19226	\$14.95
Six-Magazine Storage Sleeve	K95-19227	17.95
Magazine Sleeve I.D. Tag/Hanger	K95-19476	1.95

## Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight	K95-18210	\$53.95

# ElZetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

B. Rifle Rest	<b>K95-10883</b>	<b>49.95</b>
C. Std. Front Bag	<b>K95-10881</b>	<b>22.95</b>
D. Rear Bag	<b>K95-10882</b>	<b>26.95</b>

\*Sand not included.

## The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

**K95-18146 \$65.00**

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

**K95-15384 \$29.95**

# TARAN TACTICAL INNOVATIONS

The **TTI Magazine Extension** for MagPul AR-15 5.56 PMAGs is constructed of machined aluminum.

**K95-15770 \$39.99**

The **TTI Benelli Extended AccuGuide Carrier** is the first extended carrier ever manufactured from one solid piece of SAE 304 Stainless Steel, which eliminates the need for welding. It is heat-treated and polished, providing optimal performance. The Carrier features an extended guided rail on each side to assist in centering the round while reloading. It will provide you the speed and comfort of not having your thumb torn up after reloading. Compatible with: Benelli M1/M2/M3/SBE, Versamax.

**K95-15769 \$79.99**

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.  
TRS-25 **K95-11643** **\$89.95**

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **K95-25374** **\$79.99**  
Scout Scope Mount for SKS Rifle **K95-25373** **78.99**

**K95-19671** **\$29.95**

# THE BATTLE OF

**Figure 1:** U.S. Marine Corps marksmen and Federal Prison Guards (lower left) fire rifle grenades at the barred windows of Alcatraz Federal Penitentiary Cell Block D (upper right). After inmates got firearms and took over part of the prison, FBI Agents, Prison Guards and U.S. Marines assaulted the cellblocks. The good guys eventually killed three of the bad guys, recaptured the cellblocks, and freed the surviving hostages. By the time the fighting was over, two guards were dead, and nine wounded. Two of the surviving convicts were later sent to the gas chamber.

*San Francisco Chronicle Photograph*

## By Brian Dervin Dillon, Ph.D.

On May 2, 1946, San Francisco was enjoying some very good spring weather. Instead of the fog rolling in as usual, that day it was bright and clear. The Golden Gate Bridge, one of the most beautiful sights in the country, was spectacular, and tourists, some of them servicemen still in uniform, were walking across it. Around 3:15 P.M. pedestrians on the bridge heard what sounded like gunfire. At the same time the Sausalito Police in the town just north of the bridge began getting calls from nervous residents. People reported gunshots, one after another. Once the cops rolled, they too heard the firing but could not pinpoint where it was coming from. Before too long they realized the sound was borne by a light wind: the gunshots were coming from San Francisco Bay. Before too long word came that inmates at Alcatraz Federal Penitentiary had taken over one of their cellblocks. They had guns, were holding guards hostage, and had begun shooting. And now, the guards were shooting back.

Alcatraz (Pelican) Island is the 20-acre tip of a seamount about a mile and half out into San Francisco Bay from that city's shoreline. It became a military installation soon after California statehood in 1850. During the Civil War it served as an arsenal, hosted a small permanent garrison, and mounted over 80 cannon. A few Confederate sympathizers were also jailed there. In 1868 its primary function changed from

artillery post to military prison, where the worst offenders from Pacific Coast units were sent. Some American Indians also spent time there as prisoners. Alcatraz was the primary West Coast military prison until October 1933, when it passed into civilian hands. It became a Federal Penitentiary in August of 1934.

With the well-deserved reputation as the country's most secure prison, it was conceived of as America's own "Devil's Island" where incorrigibles, the "worst of the worst" convicts culled from all other federal prisons, would be sent. Escape would be impossible, for not only would Alcatraz have one of the highest guard-to-prisoner ratios anywhere, but the island itself was surrounded by an effective natural barrier: the cold waters of San Francisco Bay. Prevailing currents would most likely sweep any swimming convict out through the Golden Gate and into the Pacific Ocean, if the sharks didn't get him first. Prisoners were always brought to Alcatraz by U.S. Marshals or FBI Agents, never by local police or sheriffs, and no publicity of any kind ever accompanied a prisoner transfer. When word came of the hostage situation at Alcatraz, all levels of law enforcement around the Bay Area concluded that, being a Federal problem, then the Feds themselves would have to solve it. All off-duty Alcatraz prison guards were ordered to report in, and every available FBI Agent was to head towards the penitentiary by any means possible. One who did so was my Uncle Bill Dillon.

# ALCATRAZ, 1946 <sup>79</sup>

William Burke Dillon (1911-1989) was the oldest of four brothers. Born at the San Francisco Presidio, he grew up across the Golden Gate at Fort Baker, where his father was First Sergeant of the 61st Coast Artillery Company, later the Mustang Captain in charge of the Presidio's Ordnance Department, and last of all the caretaker C.O. of Fort Baker when it went into mothballs after WWI. We have already met Grandpa Dillon in past issues of *The Blue Press* (#253, 255 and 263) as well as Bill Dillon's brother Jack (#266 and 267). Like all the Dillon boys, Bill was an expert with rifle, shotgun and pistol and hunted from the age of four to five.

In 1932, when he was 21, Uncle Bill became a Sausalito Policeman. Dillon went to "wheel school" and learned to ride a police Harley-Davidson. The most exciting moment of his Sausalito Cop career came while chasing a malefactor. Bill managed to run his motorcycle through a barbed-wire fence, both losing the suspect and earning himself a short stay in the hospital. But most of his time was spent writing parking tickets, his pistol always firmly in his holster, his Harley up on its stand. The small town opposite San Francisco was the choke point for thousands of daily commuters by ferry, and traffic snarls were the biggest and most constant police headaches. Young Bill's war hero father urged him to get a more challenging job, so he attended college full time while still working weekends as a traffic cop.

Uncle Bill's next step up the ladder came after getting his B.A. from the University of California. In 1934 he was sworn in as California State Policeman No. 18. The State Police was a little-known elite force with very few officers. Begun in 1887 to protect public servants in Sacramento, the State Capitol, its jurisdiction later was also extended to the State Supreme Court in San Francisco. For decades it was limited to just a dozen, plain-clothes, officers. By the 1920s California State Police jurisdiction was statewide, and its officers were nicknamed "the Governor's Bodyguard." Their function was equivalent in many ways to that of the Secret Service in Washington, D.C. In 1929 a second, and much larger, state police force was created. The California Highway Patrol, or CHP, however, was staffed only by "traffic officers" with none of the intelligence or bodyguard functions of the much older State Police. In 1995, the offspring consumed the parent; the State Police, after 108 years, was absorbed by the CHP.

Bill Dillon's 1934 "beat" as a State Policeman was the California Supreme Court. This was convenient as he was now after a law degree at Hastings Law School, also in San Francisco. Halfway through his coursework, during the summer of 1935, he learned of a new law enforcement agency being formed on the East Coast. It would have nationwide jurisdiction, and be called the

Federal Bureau of Investigation. Dillon decided that once done with law school, he would *investigate* this new agency. He was the Honors Graduate of UC Hastings Law School, the oldest such institution west of the Mississippi, in 1936, then immediately recruited into J. Edgar Hoover's one-year-old FBI. Dillon had everything going for him: the highest educational qualifications, impeccable references, and experience in the most selective law enforcement agency of his home state. After training at Quantico, Virginia, he was "doubly sworn." He was now an FBI agent, on the Federal payroll, yet retained his State Police authority.

Dillon tracked down wanted fugitives on the West Coast and delivered prisoners to Alcatraz. When the war came in 1941, he went undercover as a counter-sabotage agent in aircraft plants from San Diego to Seattle. He looked for saboteurs and black marketeers, making security recommendations and checking out defense workers with questionable identities. After VJ-Day, Dillon resumed his pre-war duties, rooting-out swindlers and interstate crooks for the Federal Government. He was in the San Francisco FBI office when the call came in from Alcatraz around 3:30 P.M. on May 2nd, 1946.

Two convicts had slugged a guard, gotten his keys away from him, and opened more cells. Then an armed guard had been overpowered, and the cons now had a .30-06 rifle, a pistol and ammunition. Eventually nine guards were made "prisoners of the prisoners" and dozens of cons were released from their cells. The inmates' plan was to use their hostages as bargaining chips onto the prison boat making the daily round-trip to the mainland. Once aboard, they would batten their hostages below deck, cruise to a deserted stretch of shoreline, and lose themselves in the Bay Area towns and cities. But the cons in their haste broke off a stolen key in the lock of the only door leading down to the dock, and the boat left before they could force their way onto it. When they realized they were still marooned, the cons gave in to frustration and began shooting at the guard towers overlooking the exercise yard, hitting an unsuspecting tower guard. Other guards raised a general alarm, and returned fire. These were the shots heard on the Bridge and in Sausalito. The cons now began shooting their hostages; killing one, wounding four more. Around 5:00 P.M. a large body of armed guards tried to retake the cellblock; after four were wounded and one killed, they retreated. No more "guards only" assaults would be attempted.

Uncle Bill's daily carry gun was a .38 revolver, of little use against barricaded convicts armed with a high-powered rifle. Like all FBI original agents of the 1930s, however, he was also qualified with 12-gauge shotgun, .30-06 Browning Automatic Rifle, and .45 ACP Thompson subma-

chine gun, the "Tommy Gun." When he got the call, he signed out a BAR and magazines from the armory, went down to the waterfront, and got the U.S. Coast Guard to run him over to Alcatraz. The Coast Guard then set up a floating perimeter around the island. Shortly after Agent Dillon got there, a platoon of combat-ready U.S. Marines arrived, and he showed them where to set up. The Marines had been no farther away than the next island over, on Treasure Island, complete with their own landing craft. This first Marine detachment came to Alcatraz with small arms and grenades, but night fell before much headway could be made against the inmates. Unbeknownst to the Feds, only six convicts wanted to continue fighting, the rest, with cold feet, had returned to their cells.

Meanwhile, an aquatic media circus had surrounded the Island. Newspaper and newsreel reporters chartered anything that would float to cover what was already being called "The Battle of Alcatraz." Civilian spectators with more curiosity than sense ran their boats in too close for comfort as the shooting continued. At 10:00 P.M. the San Francisco Police Department showed up with some of their police boats, one of which Agent Dillon commandeered "for the duration." He established a firing position for his BAR on the front deck, then asked the other SFPD officers, most of whom he knew, to get the civilian craft out of the way and herd them back

across the water to San Francisco. That first night a few Marines got up atop the roof of the cellblock, cut holes in it, and dropped grenades down onto the barricaded convicts below.

The next morning the Marine assault, the first since the end of the Pacific War only eight months before, made banner headlines in every newspaper, Coast to Coast. A second platoon from Treasure Island now joined the first, and the reinforced body of Marines pulled back and began shooting at the most likely cellblock windows behind which the armed convicts were thought to be holed up. The angles of view of the marksmen on Alcatraz Island were necessarily limited, so Agent Dillon, familiar with the building interior from

years of escorting prisoners and interrogating convicts, directed fire for the Marines from his floating gun position, guiding their shots in; they simply followed his own hits from his BAR. The Marines quickly determined that the best way to soften up the inmates was to fire rifle grenades at the barred windows until their fragments could penetrate through them. This was done for much of the morning of the second day, and on into its afternoon, interspersed with more rooftop hand grenade drops. Firing continued through the second night. On the morning of the third day, after an hour-long barrage of rifle grenades, the cellblocks were stormed by the Marines, with Prison Guards and FBI agents as their guides. All of Alcatraz

was retaken before noon on May 4th. The head of Federal Prisons flew in from Washington, D.C. that same day just in time to survey the wreckage.

Three of the convict ringleaders had been killed, two of them possibly within the first 24 hours. No Marines or FBI agents were killed or wounded, but one convict and nine guards had been hit in addition to the two killed by the inmates. FBI Agent Dillon now served as one of nine board members conducting the after-action investigation. Their findings were that negligence by two guards had facilitated the escape attempt, and that the Warden was also culpable. He was replaced. The three convict gunmen still alive on May 4th were all tried for murder. The youngest was given a second life term, and

finally released in 1973. The other two went to the gas chamber at San Quentin, where they were executed, sitting side-by-side, in 1948.

The "Battle of Alcatraz" soon captured the attention of novelists, songwriters, and Hollywood hacks alike. Almost before the smoke had cleared, facts were discarded in favor of fiction. Now it was claimed that "every law enforcement agency" in California had been in on the attack, as had the U.S. Army and Navy, and that everything from mortars and bazookas to "heavy artillery" had been fired at the convicts, whose numbers had also been impossibly inflated. The first movie loosely based on the event hit the screens within only one year. It was followed by many more, then

**FBI Agent Dillon assaulted Alcatraz in 1946 from a SFPD police boat like this one, firing a Browning Automatic Rifle at the barricaded convicts from the prone position on the front deck.** Photo by J. B. Cook, former SFPD Chief of Police, courtesy of the Bancroft Library, University of California, Berkeley.

by T.V. Dramas. One film was made by, and starred, ex-jailbirds. Not surprisingly, within it the guards became the bad guys, the convicts the heroes. This movie inspired Jerry Leiber and Mike Stoller to write *Riot in Cell Block Number Nine*, which became a 1954 Rock 'n Roll hit. Three years later their *Jailhouse Rock*, sung by Elvis Presley, really scored. By 1957 the "Battle of Alcatraz" had become completely unrecognizable in American popular culture.

Meanwhile, FBI Agent Bill Dillon continued, quietly, with his law enforcement career. He was made the head of the Boise, Idaho, office at his request, for this was his wife Eleanor's hometown. Being the Boise Special Agent in Charge suited Uncle Bill just fine. A quiet backwater as far as crime went, during his watch, no potatoes were ever smuggled into Idaho from Canada. Dillon retired from the FBI after 29 years, came back to California, and ran for Sheriff of Sonoma County. In 1966 he was part of the conservative backlash against the Hippie movement then just getting started. He ran, of course, on a statewide law-and-

order ticket. Uncle Bill lost, but the top man on his slate, Ronald Reagan, was elected Governor, his first major step towards the white house 14 years later. In 1984 Uncle Bill Dillon went back to Boise, saying that the California inmates were now running the asylum. By moving he pioneered the mass-migration of retired California Law Enforcement Officers to what most now term the "Free World," the state with potatoes on its license plate. When he could be persuaded to talk about his 34 years as a local Cop, a State Policeman, and finally as an FBI Agent, Bill Dillon simply characterized his participation as part of the endless struggle between right and wrong.

Alcatraz Island was decommissioned as a prison in 1963. It is now a National Park, on the tourist circuit. Most of the thousands of visitors who cruise past it every year have seen two, three or even four completely fictional movies about "the rock" but few if any, know the true story of what happened there in early May of 1946. Many years ago Uncle Bill told me all about it, and gave me the FBI holster he wore, way back then. 

## Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

K95-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

The **CED7000 Shot Timer** is a breakthrough in technology. No other timer to date offers this combination of advanced features, compact size and light weight. This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

# Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.
