DESIGNED WITH THE TOUGHEST STANDARDS IN MIND BUILT TO PERFORM IN THE HARSHTEST CONDITIONS

RUGER AMERICAN PISTOL

Anything Else Would Be Un-American.

Designed with the latest U.S. Military standards in mind, the **Ruger American Pistol** is built to perform in the harshest conditions. A true American innovation, this pistol was developed through a rigorous "Voice of the Customer" process—where numerous law enforcement and military trainers, firearms experts, distributors and retailers provided input, feedback and testing in the determination of the form, function and features of this firearm. The resultant new pistol is a revolutionary platform for Ruger, one that utilizes the combination of a recoil-reducing barrel cam (which is designed to better spread recoil energy over time) with a low mass slide, low center of gravity and a low bore axis to provide an unparalleled shooting experience.

Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I just wanted to say thanks for your recent article "Some Perspective on Orlando". It made me recall a sheet of paper that was displayed on a bulletin board at my sons' elementary school a couple of years ago. The paper – a writing assignment – was written by one of the students and it was so forcefully anti-gun/anti-Second Amendment that it disturbed me much more than the usual rhetoric we are all bombarded with on a continual basis. It was clear the young author was parroting someone else's words and had no clue whatsoever about anything related to firearms. Since I was at school for Parent/Teacher conferences, I inquired about the writing assignment. I was told by the teacher that her class had been having debates about various topics and that the Second Amendment had been brought up by one of her students. After the debating, students were instructed to write an opinion on any topic that was brought up. I won't brag too much on this but my 10-year-old son did a fine job of defending the Second Amendment using the history of our country as his ammunition. I guess what I'm saying is that the essence of what we are as a country is a constant struggle even at the youngest and most innocent levels of citizenship. There are those who will be brainwashed, but I take pride and comfort in knowing that my sons and daughters aren't the only young people in this country that will stand up and speak accurately and truthfully when the facts are misrepresented. Thanks for your time and please, keep up the great work.

Tino Valle – mrfolive@hotmail.com

It's always a pleasure to receive my monthly **Blue Press** as through the years, the articles have increasingly become more and more interesting. In the September [2016] issue, author Barrett Tillman hit a grand slam with me when I read his eye-opening article titled: "Some Perspective on Orlando"! If ever there was an article written to best dispel the liberal lies spread for more gun control, this is it! The article ends with "Imagine a world with no guns..." and ends with "It was called the Dark Ages." No truer words were ever spoken. Thank you **Blue Press** for the words of wisdom.

N41-20778, \$21.95

The Savage Rascal is a tiny rifle, chambered for .22 Long Rifle, with dimensions intended to fit a child.

The Savage Rascal features a “second trigger” lever in the fashion of a Glock.

The rear sight assembly is well-designed to be what it is: inexpensive to produce but surprisingly easy and effective to use.

The Rascal's safety is a button, well-placed on the right rear of the rifle, back for Safe...

By Duane Thomas

Around this time last year I had the extreme pleasure of picking out the first-ever firearm to be owned by a 10-year old girl. I won't keep you in suspense, I chose the Rascal by Savage Arms. (And by the way, I think “Savage Rascal” is just the coolest name ever for a cute little single-shot .22 rifle.)

The girl in question is Cayla, the younger of two daughters of a friend of mine, Rita. Cayla is blond-haired, gray-eyed, strong-willed, verbal, and, as her mother puts it, “takes no crap from anyone.” She is also tiny. Petite, fine-boned, at the age of 10 she's 4'7” tall and weighs 75 pounds. Rita calls Cayla her “speck.”

Allow me to seemingly digress for a moment. As gun people, we have a tendency, I think, to sometimes see the world re how Americans relate to guns in stark, either/or terms: you're either pro-gun or anti-gun. You either love guns with a passion pure and true, or you think the world in general and American in particular would be a better place if all those horrible, nasty guns would just magically disappear. The truth however, I think, is that most people aren't pro-gun or anti-gun, they're what I call “non-gun people.” They don't love guns, they don't hate them, and they just don't care very much about them one way or the other.

All of which is my lead-in to mentioning that Cayla's 18-months-older sister, Cameron, is a non-gun person. Her mother is a shooter, and when Mommy comes home from the range and has her guns disassembled and spread out over the

kitchen table for cleaning, Cameron couldn't care less. It's not like she finds guns frightening, she doesn't think they're icy, she just doesn't care. She'd rather be sitting over in a corner reading a book. Cayla, by contrast, is *fascinated*. She's belted up to the kitchen table, leaning over it; she practically has her little nose stuck inside the gun. Now that's the kind of girl who's going to grow up to be a gun person!

About a year ago, Rita took Cayla to the range for the first time, and Cayla was so excited she was about to bounce out of her skin. She fired on her first-ever outing two rifles, as Rita put it, “a bolt action .22 and that fake polymer AR thingy.” (I know, the technical terminology overwhelmed me, too.) Of the two, Cayla said she preferred “the electric gun with newspaper.” Which, when you're nine years old, is apparently how you express “semiautomatic with magazine.”

The day when Cayla would be gifted her own first-ever gun was fast approaching. Obviously this was a direct appeal to my male gunwriter gene. Given her tiny size, obviously this needed to be a small, light firearm actually designed for children. Despite Cayla's enjoyment of the electric gun with newspaper, it really was too long and heavy for her to easily hold up while firing. This all said to me, “Chipmunk.”

As many of you know from your own childhoods, the Chipmunk is a short, lightweight, single-shot, bolt-action rifle, chambered for .22 Long Rifle, designed for children. This thing is so small that as

Cayla's Rifle

...Push forward for Fire. In the "fire" position, a red dot is easily visible.

The Rascal was swiftly and easily brought to point of impact/point of aim.

an adult I literally can't align my eye with the sights, there's just no way to force my adult-sized head down low enough on the stock to do that.

In 2007 the company that manufactured the Chipmunk was purchased by Keystone Sporting Arms (KRA), maker of the Davey Crickett .22 caliber youth rifle, the Chipmunk's primary competitor. Both rifles are still in production and marketed by KRA (keystonesportingarmsllc.com). However, editor Mark Pixler pointed me toward an alternative: the Savage Rascal (savagearms.com).

The problem with the Chipmunk, and this transitions over to the Crickett, is that after inserting a round into the chamber and closing the bolt, cocking the action for firing is accomplished by pulling to the rear a knob that sets the firing pin. While manipulating the bolt can be easily accomplished with child-level strength, pulling the cocking knob to the rear requires adult strength. Mark has referred to the Chipmunk/Crickett as "crew served guns" because there's no way a child can operate them by themselves.

While some might see that as a safety feature, I don't like it. In my opinion this would seriously impact the child's sense of accomplishment, the "I can do it myself" vibe that's such an important part of building their feeling of competence, that they can manipulate this tool alone, which will extend eventually into a sense they can deal with the world. The Savage Rascal, by contrast, cocks its action through the bolt cycling, like a "real" rifle.

There are other differences between the Rascal and the Chipmunk/Crickett. The Rascal has a "second trigger lever" *a la* GLOCK; the Chipmunk/Crickett does not. In operation the Rascal's second trigger lever is so nicely shaped, and depresses so easily, it's almost unnoticeable. The Rascal has an external safety lever, a well-placed knob on the right rear of the rifle, back is Safe, push forward for Fire. On the Chipmunk/Crickett, apparently the heavier-than-hell cocking knob is seen as the safety.

Finally the Rascal has a grooved forend versus the Chipmunk/Crickett's conventional, bellied forend. At first I really didn't like this feature; I still don't admire it esthetically. But obviously this is intended to give small, weak, child-sized hands more purchase on the rifle. I have to say, the more I handle the Rascal, the more I like the feel of the grooved forend. Still don't like the way it looks though.

The Savage Rascal is 31-1/2" long from the tip of it 16-1/8" barrel to the end of its short buttstock; length of pull is 11-1/4"; it weighs 2-2/3 pounds. That all seems eminently little girl-able to me.

The Savage Rascal is available with a plastic stock in a variety of colors, including pink. As Rita put it to me, "Cayla is all about the pink." My reply was, "Rifles like this tend to become cherished family possessions, given down from parent to child through generations. It's not at all impossible Cayla may wind up eventually passing her Savage Rascal on to her own child. And what if

Strong Mount N41-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

AUTO PRIME SYSTEM

Includes:

Primer Housing / Shield
Primer Slides, Large/Small
Pickup Tubes, Large/Small
Pickup Tube Tips, Large/Small
Magazine Tubes, Large/Small
Mag. Orifices, Large/Small
Operating Rod
Primer Track Bearing
Housing Screws
Ret. Spring Retaining Pin

N41-16627, \$82.95

PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

N41-20302, \$25.95

AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

N41-20251, \$88.95

OPTIONAL MAGNUM RIFLE POWDER BAR

N41-21353, \$29.95

AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

N41-22120, \$30.95

AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

Powder Die: N41-16629, \$19.95

OverSize Die: N41-16626, \$19.95

Plastic Funnel: N41-16617, \$5.95

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

Square-Deal-Only Wrench	N41-19970	8.95

Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	N41-22051	\$48.95
XL650-only	N41-22052	45.95
Square Deal "B"	N41-22223	64.95

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	N41-22214	\$41.95
RL 1050 Tray Kit	N41-22215	41.95

Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	N41-97126	\$145.95
----------------------	-----------	----------

Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lip supplied with the measure, and operates on two AAA batteries (included).

	N41-16306	\$41.95
--	-----------	---------

Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Dillon's Case Preparation Equipment

CV-2001
N41-20493
\$188.95

CV-750 N41-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator N41-20675 \$75.95

CM-500 Case/Media Separator N41-21045 \$47.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 N41-22047 \$213.95

Euro CV-750 N41-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **N41-13804** **\$8.95**
Case (20 pc.) **N41-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **N41-13733** **\$8.95**

Super 1050/RL 1050 Short Trim Die Toolhead

N41-62219
\$224.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. *(NOTE: the Blue 1050 toolhead stand – Part Number N41-62200, \$49.95 – is not included.)*

Dillon's New Rapid Trim 1500 Case Trimmer ²³

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **N41-62164** is **\$329.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **N41-13141**, are **\$19.95** each. Upper lock rings, **N41-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Dillon's NEW Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access,

has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

- 4-3/4" SA Colts/clones **N41-11560**
- 4-5/8" Ruger Blackhawk **N41-15765**
- Ruger LCR **N41-29030**
- 2" J-Frame S&W Rev. **N41-15764**

"Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original. This belt is a favorite with law enforcement, military personnel, fire-

fighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

Dillon's Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

Dimensions: 66" x 27.75"

N41-18146 \$65.00

she had a boy? The traditional wood stock seems like a much safer bet to me. It's uni-sex!" And so my article sample piece became a wooden stocked Savage Rascal.

As those of you who've ever beheld a Chipmunk/Cricket/Rascal already know, if any firearm can be described as "cute," it's this one. It's very light, very well-balanced, very easy to handle. Its major metal components are blued steel, the wooden stock has pedestrian straight grain, nothing fancy.

I reposed to the range with the Savage Rascal and four types of .22 Long Rifle ammo. From Federal came three loads, the Auto Match 40-gr. RNL, 31-gr. Hyper Velocity Copper Plated HP, and 40-gr. Gold Medal RNL. Finally from Wolf was their 40-gr. Match Target RNL.

So I had the gun, I had the ammo, how to test it? Cayla lives in a different state from me, so simply going to the range with her, Mom and the Rascal was not an option. Her mother and I discussed matters, we decided I would test the Rascal, if it worked (and I had every expectation it would), I would then acquire a "most favored nation" price from Savage, and the gun would thence wend its way across the United States to Cayla and become a Christmas present.

So, I needed to test this rifle. Problem: I'm too big for it. How to test a teeny little rifle when it's so small you literally can't get your head far enough down on the stock to align your eye with the sights? Why, I'm glad you asked! I used the technique I've been practicing for firing the Chiappa mare's leg (also recently reviewed in *The Blue Press*) of taking the end of the buttstock and placing it right under my right cheekbone. That allowed me to aim and fire the Rascal. Accuracy testing from the bench, 3-shot groups at 50 feet, the maximum distance possible at the indoor range where I do most of my shooting, proceeded.

The Savage Rascal's rear sight rides on a swingarm that pivots on a screw, and is held in place with another screw. To adjust elevation, simply loosen the set screw, lift or lower the rear sight to where you want it, then retighten the screw. The rear sight is an aperture surrounded by a knurled knob, which is inset into a horizontal slot. To loosen the rear sight, turn the knob counterclockwise, move the sight left or right, then turn the

knob clockwise to retighten. Obviously this is not a highly refined, precision, click adjustable rear sight, it is what it is: something designed to be easily adjustable but inexpensive to build. However in use it worked GREAT. Zeroing the Savage Rascal was quickly and easily accomplished. I'm impressed with the Savage Rascal's rear sight system; it's quite clever; there was some really good thought that went into it.

Reliability-wise, I did have one misfire with the Wolf ammo. It popped with a second hit. Having said that, I have had misfires with this load with every gun in which I've ever tested it, so I don't feel we can blame the Savage Rascal for that. With everything else, the Rascal worked perfectly.

The Savage Rascal MSRP's for a whopping \$191 (\$238 w/hardwood stock), and, as we all know, unless you happen to live in Beverly Hills, no gun store sells for full retail. Acquiring one of these for your child, should you so desire, will not exactly break the bank. I am sad that as a child I never had a Savage Rascal. Not that the Rascal actually existed when I was a child, but if it had, I would have loved to have one. Hell, as an *adult* I want one.

But this particular rifle was not for me. In due time the Rascal was packaged up, and off to Cayla it went. She was actually out-of-state visiting family come Christmas-time, then when

she returned home most of the family came down with the flu, so it was actually January before she got the rifle. But one fine morning she came downstairs and found that under the Christmas tree, which her Mom had left up, there was an "extra" present, what looked amazingly like a rifle case, with a big bright bow on it. Her instant response, "Is that mine?"

Cayla loves the fact that her rifle is sized for her. And unlike the two rifles she'd fired before, with the Savage Rascal, because it's so short and light, she has no problem firing it from the standing position. Mission accomplished!

Of course, you couldn't have Cayla get a super-cool new rifle as a present and not have Cameron get one, too. That's like an invitation to extreme sibling rivalry, and SO not a good idea. Thus there were actually two rifle cases under the Christmas tree, and I will also be writing a follow-on article titled "Cameron's Rifle."

Cayla's thousand-watt grin on the range communicates her opinion of her new rifle.

Dillon's Pistol Die Sets

Size Die

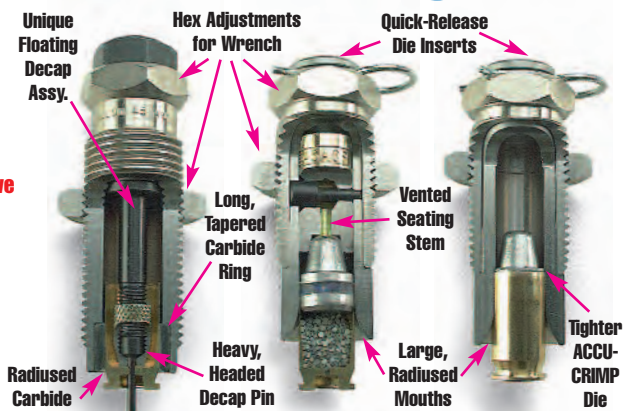

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets 35

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)

.223 Remington	N41-10839	\$67.95
.308 Winchester	N41-15574	67.95
.30-06 Springfield	N41-10840	67.95

Dillon Carbide Rifle Dies (Three-Die Sets)

OOD Ru

Making A Case for the R

By Peter Caroline

As you may or may not recall, I reviewed Lipsey's stainless iteration of the Bearcat in the May 2014 issue of *The Blue Press*. It's a great little trail or kit gun, and the only nit I had to pick was that extraction was at times a bit sticky. The solid-frame single action revolver is a time-tested design, but one of its less charming features is the one-chamber-at-a-time plunger-type extractor. The stainless Bearcat Shopkeeper has a 3" barrel which dictates an equally short extractor that often doesn't poke out expended cartridges consistently.

Recently, Lipsey's introduced a new version. This time, it's a blued model with a longer 3-1/2" barrel and (thank you, Ruger and Lipsey's) a longer extractor. I ordered one, and it did not disappoint. Extraction is now far more positive, and trigger

pull and accuracy are identical to that of the original stainless version...about 4-1/4 to 4-1/2 lbs., with 10-yard groups in the 1-1/2" range. I find the sights in the new blued version easier to use than the stainless, even though it still shoots low, like its stainless forebear(cat). Both the stainless and blued Bearcat Shopkeepers feature a transfer-bar safety. This feature allows you to safely carry the revolver with all six chambers loaded. This is "A Good Thing," because you couldn't roll up a five-dollar bill in the empty .22 LR chamber if you tried. Unlike its predecessor, the new Bearcat Shopkeeper has a fluted cylinder with no engraving. Birdshhead grips appear to be a rosewood laminate, with inset Ruger logo medallions. Looking at the blued and stainless versions, side by side, I could see that Ruger spared no effort in fit or fin-

n Amok?

uger Bearcat Shopkeeper

ish. The joint between trigger guard and frame, for example, in both guns is hardly discernable. Unlike some .22 pistols, these were built to a standard, not a price. Also, they cried out to be displayed as a set. And therein lies a tale.

Now, if you go online looking for a custom-fitted pistol case, you will not be disappointed. There are any number of sources for custom pistol cases. I'm not talking about utilitarian plastic cases intended for those who simply want to transport guns to the range. I wanted a wooden presentation case with an interior shaped to show off a brace of good-looking handguns and of course some provision for ammunition. There are any number of custom-crafted cases available, in your choice of exotic woods and fitted interiors.

We're talking some serious bucks here. At this point, it occurred to me, maybe this project was getting a bit out of hand. It was time to think out of the box...or at least, out of the pistol box. So, what else might utilize a wooden chest, approximately 14" x 10" x 3"? The first thing that came to mind was silver flatware. We do have a cased set of sterling flatware that was handed down over several generations, and we've never used the contents. Although the dimensions of the wooden chest were ideal for the project, the saner half of the marriage raised some serious objections, so I went online.

After some consulting with my friend Google, I found a flatware chest of the appropriate size for thirty dollars. The interior was configured to hold tableware, but that was easily removed. At Walmart, the hobby department yielded some 1/4" artboard and 1" foam, which I cut to size

and cut out to fit the two revolvers and two boxes of .22 LR. I then sprayed this assembly with Rust-Oleum® flat black primer and, when that was dry, brushed on a thick coat of black undercoat adhesive. The next step was to apply a black suede finish, using a simple spray-on flocking suede applicator and black nylon suede fibers. The whole flocking kit ran about twenty-seven dollars, and was quite simple and foolproof.

Now, I have a nicely cased pair of Ruger Bearcat Shopkeeper revolvers. But I'm not quite sure what I'll do if

Ruger/Lipseys's comes up with a Turnbull color casehardened version.

California Competition Works' Tandem Tactical Strippers can be used to hold either shotshells or AR-15/M4/Mini 14 magazines, or a combination of both by installing or removing the aluminum spacers provided with each stripper. The Tandem Tactical Stripper holds a maximum of eight rounds of 12 Gauge (10 rounds of 20 Gauge) shotshells or two AR-15/M4/Mini 14 magazines. Each Tandem Tactical Stripper features a BLADETECH Tek-Lok™ Universal Belt Clip, four removable aluminum spacers, and the screws and Allen wrench required to install them.

Tandem Tactical Stripper N41-00303 \$55.00

California Competition Works' Tactical Strippers are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84 attachment device

(C. & D.) that will accommodate up to a 2-1/4" duty belt.

CLASSIC FIREARMS: The Barrett

By John Marshall

This is probably the most expensive plinking rifle you could ever imagine. That is, if you want to plink at targets at a range of over a mile and in the process absolutely

destroy them! Civilians know it as the M82A1 rifle, and in our military it's the M107. Both camps often refer to it as "the Barrett Light Fifty." Whenever employed or displayed, its "wow factor" is unmatched.

But I'm getting a bit ahead of myself. Here's a bit of history first. In 1918, John Browning designed a .50 caliber machine gun that is still in use by our armed forces today. In 1967, legendary U.S. Marine sniper Carlos Hathcock discovered that by mounting a high-power Unertl scope on one of those enduring M2HB Browning .50 caliber machine guns, he could take out targets at incredible distances. With that specially sighted "Ma Deuce," he forthwith set a record for the longest sniper kill ever up to that time, killing a Vietcong guerrilla at a range of 2,500 yards. Although that record has since been broken, Hathcock's feat initiated a lot of interest in and some subsequent employment of the .50 BMG (Browning Machine Gun) cartridge as a sniper round. This behemoth cartridge is essentially the .30-06 round scaled up to .50 caliber dimensions. It's also known as the 12.7x99mm NATO cartridge. Its effect is devastating on enemy personnel and equipment at even amazingly long ranges.

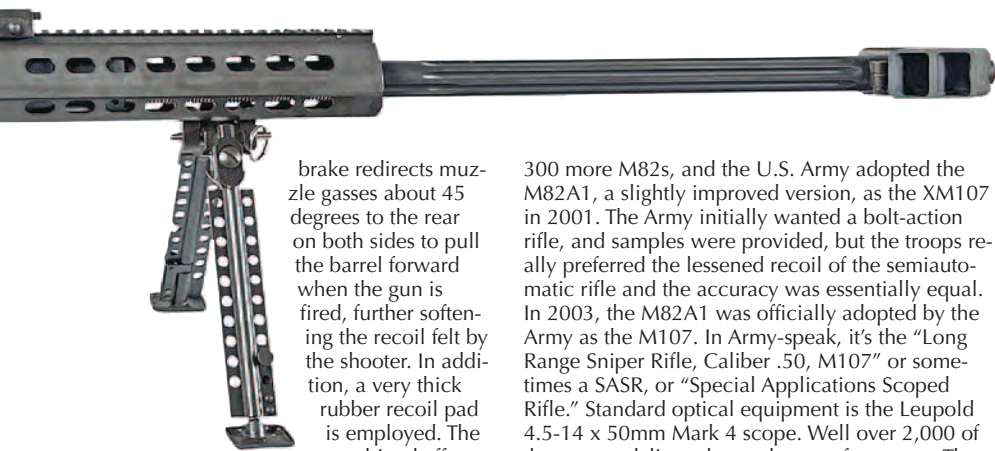

Born in Murfreesboro, Tennessee, in 1954, Ronnie Barrett started out as a professional photographer following his graduation from high school. He was also a long-range target rifle competitor, and longed for an accurate rifle that could reach way out there. Noting the .50 caliber machine gun mounted on a gunboat he was photographing in 1982, he thought that he might be able to design a semiautomatic target rifle that would chamber the monster .50 BMG cartridge. He knew that taming the recoil of this round would be a challenge. Custom bolt-action rifles chambered for it could launch a 650- to 750-grain bullet at over 2700 feet per second, but the recoil was absolutely brutal.

He reasoned that a semiautomatic could soak up a lot of rearward energy, and together with a proper muzzle brake, the recoil might be made almost tolerable. Although he had no engineering or manufacturing experience, he sketched out some ideas and showed them to some machine shops in his area. He began to collaborate with Bob Mitchell, a tool and die maker and machinist in Smyrna, Tennessee. The two of them, working in Barrett's garage, got the basic mechanism worked out, and engaged a sheet metal shop to fabricate the upper and lower receivers. Harry Watson, one of the shop's employees, helped out immensely. Inside of four months, the first prototype Barrett .50 rifle became a reality. A second prototype incorporated some needed improvements, and Ronnie displayed it at a Houston, Texas, gun show. Three folks gave him deposits to make rifles for them. With this initial capital, Barrett set up a shop in his garage and crafted an initial batch of 30 rifles. After advertising his new rifle in *Shotgun News*, he was contacted by the U.S. Central Intelligence Agency, who purchased a number of them for use in Afghanistan by the Mujahideen, then fighting against the Soviet Union. The ball had started rolling.

Barrett's "M82" rifle has heavy-gauge sheet-steel upper and lower receivers that contain the moving parts. These receivers can be separated for parts maintenance very much like on the M16 rifle. The gun operates on the short-recoil system. Both the barrel and the bolt assemblies move to the rear a short distance against two strong recoil springs on guide rails and a buffer assembly when the rifle is fired, absorbing a lot of the recoil by spreading it over a longer time. Then the heavy 3-lug bolt is rotated, unlocking it from the barrel by a cam slot in the upper receiver. The barrel is arrested in its movement, but the bolt continues to the rear to eject the spent cartridge. The twin recoil springs then move the bolt forward to chamber another

M82A1/M107 "Light Fifty" Rifle

round from the steel double-column magazine that holds 10 rounds. The trigger, sear, hammer and safety switch layout is essentially a scaled-up AR-15 system. A massive double-baffle muzzle

brake redirects muzzle gasses about 45 degrees to the rear on both sides to pull the barrel forward when the gun is fired, further softening the recoil felt by the shooter. In addition, a very thick rubber recoil pad is employed. The combined effect diminishes recoil

by almost 70 percent and the gun pretty much duplicates the felt recoil of a 12-gauge shotgun. The barrel length is optionally 20 or 29 inches. Overall length for the 20-incher is 48 inches, and with the longer barrel, it's 57 inches. Weights, respectively, are 29.7 and 30.9 pounds. The operating handle works from the right-hand side, where it reciprocates with the bolt. The ejection port is on the left side. A Picatinny rail is employed on top of the upper receiver for various scope sights. 30mm steel scope rings are employed which are in themselves adjustable for both windage and elevation. This gives more available sighting latitude for longer-range shots. A levered magazine release resides in front of the trigger guard. Backup folding iron sights can be used in the event of scope failure, and the rifle incorporates a folding carrying handle. The bipod is very similar to that used on the M60 machine gun, but it can fold both forward and backward. The pistol grip is quite like the one on the M16A2 rifle and the M4 carbine, except that it has more rearward slant.

Because of the incredible noise and whopping shock wave generated by this gun, ear protection for both the shooter and those nearby is an absolute necessity. A helpful hint for those who are close is to stand directly to the rear of the shooter lest the side-directed muzzle blast play extreme havoc with one's sensibilities.

The Barrett rifle was soon employed by the Norwegian army, which found it ideal for explosive ordnance disposal duties. Operation Desert Storm saw the first combat use of the rifle, when 100 of them were purchased by the U.S. Marine Corps.

The rifles were used to take down hard targets, bunkers and vehicles. They also found use against light armor, with vastly improved range over rocket-based munitions. The Marines soon ordered

300 more M82s, and the U.S. Army adopted the M82A1, a slightly improved version, as the XM107 in 2001. The Army initially wanted a bolt-action rifle, and samples were provided, but the troops really preferred the lessened recoil of the semiautomatic rifle and the accuracy was essentially equal. In 2003, the M82A1 was officially adopted by the Army as the M107. In Army-speak, it's the "Long Range Sniper Rifle, Caliber .50, M107" or sometimes a SASR, or "Special Applications Scoped Rifle." Standard optical equipment is the Leupold 4.5-14 x 50mm Mark 4 scope. Well over 2,000 of them were delivered over the next four years. They are provided with special hard or soft carry cases for transportation between locations, spare magazines and other accessories. M107s are currently being used in Afghanistan, where they have been found superior in precision to machine guns or rockets for stopping explosive-laden suicide vehicles. Personnel targets at very long ranges have been destroyed so impressively that the negative psychological effect on the near-standing enemy has been quite noticeable.

In 2010, Barrett ceased production of the M107, and in January 2011, the successor M107A1 was announced. Improvements include weight reduction, a new titanium muzzle brake and some titanium internals. These modifications allow the use of a sound suppressor designed by the Barrett Company. Barrett rifles have now been bought by government agencies in at least 30 countries. They are also used quite prolifically for civilian long-range rifle shooting competitions here in the U.S. and elsewhere. The rifle illustrated for this article is a commercial M82A1 topped by an optional Swarovski 4.5-14 x 40mm scope.

In Ronnie Barrett's home state of Tennessee, the Barrett Model 82A1/M107 has been declared as the official State Firearm! His rifle has now been around for over 30 years, and has become an indispensable tool for military and police forces around the world. If you want to go plinking or target shooting with one, this modern classic will only set you back in the (rough) range of 9 to 13 thousand dollars, depending on being new or used, condition and optional accessories. It's indeed a modern classic, albeit one that requires a very healthy bank account!

46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

N41-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

Berry's Mfg. Clear Ammo Can

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

N41-21894

\$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

"Real World"

Pistol Transitions

Note that the white target is our "no shoot" and we have moved the targets close in for the purposes of photography. (No targets were harmed in this demonstration.)

Inset, far left: The shooter demonstrates muzzle position as he transits over the "no shoot." Note that the muzzle is pointed above the head of the "no shoot."

Inset, left: The shooter transitions past the "no shoot" with the muzzle pointed at the ground in front of the "no shoot," somewhat lower than the low ready position.

By Cameron Benz

The term "transition" as it relates to defensive shooting refers to the time interval between firing the last shot on one target and the first shot on the next target, i.e. how fast you can move the gun between targets. A skill that separates highly-skilled shooters from less-skilled shooters is the ability to do swift target transitions. However, in pursuit of maximum speed, this generally means moving the gun between targets in a straight line. But what if, in the real world, between bad guys there are innocent bystanders whom that straight line would cross? If at all possible, we would like to avoid pointing our gun at any person who doesn't need to be shot, when moving it between people who do need to be shot. In this article we'll discuss techniques allowing us to do that.

In competition, we are concerned primarily with speed. In the real world, we have two factors to consider: speed and bystander safety. While it's obviously a good thing to shoot everyone who needs to be shot, as fast as possible, also we want to not shoot those who shouldn't be shot. These could include loved ones, friends, bystanders, or (in the case of law enforcement officers) co-workers. One of the Four Universal Firearms Safety Rules is, "Never point a gun at anything you are

not willing to destroy." With that in mind, it's obvious we may need to modify our competitive, "maximum speed transitions" approach for the real world. In my experience, the increase in transition time with the following techniques is minimal; how minimal will of course depend on the individual shooter's skill level.

Real World Transitions – Handgun

Where transitions are concerned, handguns are fairly simple to address. When moving the gun to the next target, you have two choices for directions to point the muzzle: up (over the bystander) or down (pointing at the ground).

If you choose to direct the gun upward over the bystander, raise the muzzle to somewhere between 30 and 45 degrees – perhaps higher if they're tall or physically close in. If you decide instead to direct the muzzle downward, pull the gun into a "Compressed Ready Position," elbows bent, muzzle pointed downward at an angle. Another option would be to roll the gun on its side across the knuckles of the support hand, dip the muzzle as though you were going to move it to Position Sul, as you move the gun from side-to-side, then re-extend your arms back out into your shooting stance to engage the next target.

Real World Transitions – Long Gun

For long guns, the principles are largely the

Target Transitions

Carbine Transitions

Insets, far left: In tracking to the second target, the shooter has broken the stock weld, lowered the muzzle to clear to safely clear our bystander. This is a technique that allows for easier tracking close in.

In the front view, the shooter demonstrates muzzle up, or high ready.

Insets, left: The shooter has chosen to drop the muzzle below the bystander's feet and move the stock above the shoulder. The

carbine can be fired with the butt above the shoulder and is a useful technique in confined spaces. The front view shows muzzle down, a bit lower than low ready position so as to clear the feet of the bystander.

same, with the additional consideration of dealing with a long buttstock. The techniques described here would apply to a carbine, rifle, or even a shotgun.

If the target is far enough away, you can probably keep the long gun shouldered as you point its muzzle over or under the bystander. At closer ranges, you may need a slightly different technique. If you intend to guide the muzzle of your long gun over the bystander, bring the stock down off your shoulder as you lift the muzzle, then re-shoulder the stock as you come back down on-target. This is also an effective way of working around a close-in bystander to engage targets that are farther away.

In the event "up" is not a safe direction to direct your muzzle, the option exists to move the stock from the shoulder pocket to on top of the shoulder, then direct the muzzle downward. Should a target suddenly appear at close range, a carbine can be readily fired with the stock on top of the shoulder; this is actually an effective method of employment when working in tight spaces.

Summary

With any of these techniques, we need to take into account our environment. If we point the muzzle toward the ground, what kind of surface is that? Dirt, concrete, a hard stone

floor? Would an unintentional discharge result in a ricochet endangering innocent bystanders? If we lift the muzzle up over the bystander, are we inside a building where a bullet could penetrate the ceiling and hit someone on the floor above? If so, do we know for a fact the upper floor is uninhabited?

One last thing to keep in mind is, as a general rule, if the muzzle is up, for some reason we as humans have a tendency to keep our heads up, whereas if we point the muzzle downward, we seem to have a corresponding sympathetic reflex tendency to direction our vision downward. The latter approach can lead to a lack of situational awareness as we look down instead of at our surroundings.

In the end, experiment with the techniques. Some ranges may have rules that prevent you practicing some or all of them. Practice what you can. Train to be aware of your surroundings. As you use these techniques more, you'll find yourself being able to employ them reflexively rather than spending critical time thinking instead of acting should you ever actually need them.

I would like to extend a hearty "Thank You" to the Mason County Sportsman's Association in Shelton, Washington, for allowing me to use their facility for this article.

50 "Big Fifty Reloader"

STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

ElZetta

Tactical Flashlight Mounts

Every ElZetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the ElZetta® ZFL-M60. (Sizing Adapters are not required when using an ElZetta ZFL-M60 or other 1-inch lights.) The ElZetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular ElZetta ZFH1500.

The NEW ElZetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the ElZetta ZFL-M60. The ElZetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

The Hand-Sized Pi

By Duane Thomas

Recently I shot a match called the Hand-Sized Pistol Championship. Put on by the Renton Fish & Game Club in Renton, Washington, this match was run under the rules of Action Shooting International (ASI) – basically, not very many rules at all.

The Hand-Sized Pistol Championship, as the name would suggest, was built around the idea of firing smaller, more easily concealable guns than you typically see at “combat” pistol matches. If you were shooting an autopistol, it could not have a barrel longer than 3.5”, if a revolver, no longer than 3”. Minimum allowable caliber in autos was .380 ACP; in revolvers it was, believe it or not, .38 Short Colt as a nod to cowboy action shooters (more about which later). If you wanted to shoot the match with a larger gun, it wasn’t forbidden.

This was intended to be an easy match for people to shoot. As is typical in ASI matches,

per-stage round count was low. There were 12 stages, 10 of which required only five rounds, one a whopping 10 rounds. Assuming you were hitting what you aimed at, the Hand-Sized Pistol Championship could be completed with only one reload. There was also one steel stage with five targets; you did three runs and only your fastest counted for score. Depending on your gun’s capacity, you might need to reload between runs on that one, but those were “off the clock” administrative reloads. To complete this match required only 75 rounds, assuming you hit all the targets, decided to fire no extra shots, never missed steel, etc.

This was not a match at which we saw only what I call “first tier guns.” It was mostly a “run what you can bring” match, and suddenly we started seeing brands like Bersa and Taurus that you typically don’t see at more serious combat pistol matches. Most people did bring their small

Hand-Sized Pistol Championship

63

blasters: Ruger LC9s; compact Kimbers; club president Rick Breneman shot his daily carry gun, a vintage Detonics CombatMaster; and a few hardy souls actually brought a Smith J-frame or the Taurus equivalent, etc.

The hope was to bring in people from IDPA and USPSA and even SASS (the aforementioned cowboy action shooters) to check out a match run under ASI rules, and maybe the ASlers would get to see their game played at a somewhat higher level. As mentioned in my recent *Blue Press* review of Action Shooting International (asi-usa.org), one purpose of ASI is to be a feeder system into IDPA and USPSA. After the match, during the award ceremony, Rick Breneman said to everyone, "If you're an ASI shooter and you liked this match, you liked shooting on moving targets, you liked shooting out of a car, you liked shooting on steel, come on out and shoot an IDPA match with us, this is the sort of thing we do all the time."

In all, 62 people shot this match. For final match placement, they split everyone into two groups: ASI and Overall (which wasn't actually an overall ranking, it was "all others," IDPA, USPSA, etc., basically everyone not registering as an ASI shooter). The idea was to split out the ASlers who tend to be newbies from the more experienced shooters with a higher level of skill and experience. There were 19 ASI shooters; 15 of them shot "hand sized" guns, four went full-sized instead. There were 43 Overall shooters, which really should have been called "IDPA division," though we did have at least one SASS shooter, who commented humorously, "I'm just a cowboy action shooter, you guys are making me feel intimidated."

That comment should let you know just how seriously everyone took the Hand-Sized Pistol Championship. This was all good fun. Speaking for myself, I did in fact have a lot of fun at this match, and I'll be doing it again next year.

64 *Get your "stuff" together, then keep it that way!*

Extra Loading Data Labels, N41-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Swab-its® - A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning

- rods, and are tough and reusable.
- .22/.56mm (6 ea.) **N41-15310 \$4.98**
 - .243/6mm (6 ea.) **N41-15311 4.98**
 - .307/.62mm (6 ea.) **N41-15312 4.98**
 - .357/9mm (6 ea.) **N41-15313 4.98**
 - .40/10mm (5 ea.) **N41-15314 4.98**
 - .45 Caliber (5 ea.) **N41-15315 4.98**

Gun-tips® 3" Precision Tip foam swabs are reusable. 24-count value pack. **N41-15345 \$9.99**

Gun-tips®

Gun-tips® Extended Reach Firearm Cleaning swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package. **N41-12583 \$9.99**

Bore-Whips™

Bore-Whips™ .17 and .22 caliber (pictured) by Swab-its® are ideal for air rifles, rimfires or any other .17 or .22 caliber firearm that's difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator.

- .17 Cal. **N41-12689 \$9.99**
- .22 Cal. (Pictured) **N41-12690 9.99**

Gun-tips®

Gun-tips® foam swabs are reusable and replace cotton swabs. 9-pack **N41-15316 \$4.99**

Ram Rodz Barrel and Breech Cleaners

The RamRodz® Range Kit comes with 400 Breech Cleaners, 100 .22-Caliber swabs, 60 .38-Caliber swabs, 50 .40-Caliber swabs, 40 .45-Caliber swabs and 30 .50-Caliber swabs. **N41-43293 \$34.95**

MIL-COMM Extreme Performance Lubricants

TW-25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

8 oz.	N41-10138	18.95
32 oz.	N41-11298	40.95

M-PRO7™ Copper Remover works up to four times faster than ammonia-based cleaners and is odor free.

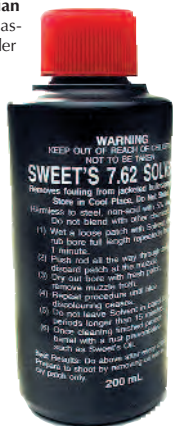

4 oz.	N41-19370	\$11.95
-------	-----------	---------

Sweet's Australian

7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

N41-13128	\$12.95
-----------	---------

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	N41-15571	\$7.95
Slide-Glide Lite	N41-15572	7.95

Micron UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

N41-75125	\$9.95
-----------	--------

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

N41-18599 \$14.95

On-Target Productions, Ltd. Videos

On-Target Productions, Ltd. videos are designed to educate enthusiasts about the selection, proper use, cleaning, disassembly/reassembly, and accessorizing of firearms. On-Target Productions' videos are 100 percent digital quality, focused on the details and are entertaining and educational. Every video features clear, close-up photography to enhance the instructional narrative from start to finish.

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Alice Chong: General Ch

By Brian Dervin Dillon, Ph.D.

In the dark days of late 1941 and early 1942 after the attack on Pearl Harbor, it seemed like every encounter American forces had with the Japanese resulted in another disaster. The only bright spot in the dismal military picture was provided by the most unlikely of all warriors, a maverick flyer previously known best for his disagreements with the top brass on every tactical issue imaginable. Claire Chennault (1890-1958) had been thrown out of the American Army as a lowly Captain in 1937, and went off to China to train pilots in Chiang Kai Shek's fledgling air force. When America suddenly found itself at war with Japan on December 7, 1941, Chennault had already been fighting the Japanese for four long years. But he was not the only one.

Perhaps the most unique person to play a pivotal role in the eventual victory over the Japanese was another American, Alice Chong, an unsung heroine as modest and obscure as Chennault was flamboyant and famous. Alice, my wife's aunt, was quite possibly the most remarkable American woman of World War II. She was the only American-born Chinese (ABC) woman to serve with Chennault in a secret, intelligence capacity. Along with her friend and Kunming roommate, Eloise Witwer, a multilingual missionary refugee from Burma, the two women became General Chennault's secret weapon, the "brains" of his outfit.

Alice Chong had been in China longer than Chennault. An English teacher who spoke five different languages, she had, in fact, taught him and other American advisors, like Jimmie Doolittle, enough Chinese to communicate with their Chinese hosts, student pilots, and mechanics. She also provided an important cultural link between

two completely different worlds, united after 1941 in the desperate fight against a merciless and powerful enemy.

Alice Chong (1909-1972) was born on the isolated and beautiful south coast of Kauai, Territory of Hawaii. Her father had been a teenaged refugee from the Tai Ping Rebellion (1850-1864) that almost toppled the hated Manchu overlords. He fled China with a price on his head, learned Hawaiian, and became Queen Emma's royal rice farmer in the Lawai Valley. With three wives (two Hawaiian, one Chinese) he fathered more than 30 children in

his own Island paradise. Alice grew up speaking Hakka Chinese at home, and Hawaiian and Japanese with her neighbors and age-mates on Kauai.

She learned English last of all in grammar school. Beginning in 1924, she became pen-pals with a girl in the American Midwest; the hundreds of letters she sent this pen-pal over a 48-year period include those chronicling her years spent behind Japanese lines in China. These plus her three photo albums are a priceless record of a time and place unfamiliar to most Americans. Alice graduated from the University of Hawaii in 1933, then took ship for China, where she taught English in a Peking girls' school.

One of the most outstanding American heroes of World War II, the charismatic and controversial General Claire Chennault, standing in front of one of his "shark mouth" P-40s. Cashiered as a Captain from the Army Air Corps in 1937, he became a Colonel in the Chinese Air Force, and trained Chinese pilots to fight against the Japanese. The Chinese loved him and called him "old leather face." In 1941 he created the AVG – the famous Flying Tigers. They were the only American unit scoring victories against the Japanese early in the war, while all others were going down to defeat. The American Volunteer Group morphed into the 14th USAAF, the U.S. Army took him back, and finally gave him two stars.

Life Magazine photo, August 30, 1942.

She traveled throughout China, and also learned Mandarin, her fifth language, during her first three years in the Far East. Alice returned to Honolulu in 1936 to complete an advanced degree at the U.H. A job offer from Ginling College in Nanking, the most upscale girls' school in all of China, compelled her to cut short her graduate studies, and she set off across the Pacific a second time, bound for Shanghai.

Alice's timing was terrible, and potentially deadly. She boarded her ship, the *Empress of*

ennault's Secret Weapon⁷⁹

Canada, on August 13, 1937, the same day that the Empire of Japan launched its all-out attack by land, sea, and air on Shanghai. Japan had gone to war with China in 1895, and beaten her badly. From then onwards, a Japanese presence on the north Asian mainland was a given, even more so after Japan annexed Korea in 1910. Siding with the Allies in WWI, Japan's reward was the former German holdings at Tsingtao, which became an important foothold. Just over a dozen years later, in 1931, the Japanese invaded

Manchuria, no great distance from the old Chinese capital at Peking. Consolidating their holdings in northernmost China did not satisfy them, so in the early summer of 1937, the Japanese fabricated an "incident" on the Marco Polo Bridge, captured Peking, and prepared their campaign against China's largest city, Shanghai, and the Nationalist capital upstream on the Yangtze River, Nanking. As Alice Chong's ship steamed across the Pacific in August of 1937, it was heading towards a holocaust.

The *Empress of Canada* was stopped by the Japanese Naval blockade and had to anchor just off the coast of Shanghai. For two days Alice watched the Japanese attack the city, and the heroic, if ineffective, efforts of the Chinese Air Force to repel the invaders. At night the flames of the burning city lit up the sky. Alice's steamer picked up around 1,000 refugees, mostly women and children, before heading south to British Hong Kong and safety. Meanwhile, the Japanese, after subduing

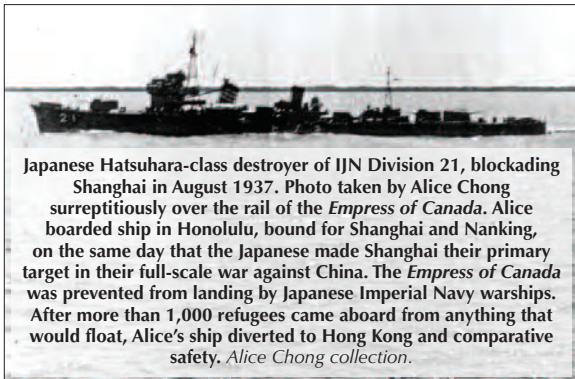

Shanghai, moved upriver to Nanking, where they committed one of the worst sustained atrocities of the 20th Century. Hundreds of thousands of innocent civilians were murdered, and tens of thousands of women and children were raped, in

production-line fashion. Surrendered Chinese soldiers were executed, sometimes by roping them together, then marching them by the hundreds into the Yangtze to drown. One tiny island of questionable security within Nanking in late 1937 and early 1938 was Ginling Girls College,

Alice's original destination. Here a lone American missionary teacher, Minnie Vautrin (1886-1941), gave sanctuary to more than 10,000 Chinese women and children. Vautrin defended them against Japanese troops who repeatedly tried to drag the innocents off, day after day, week after week. Recently, four movies have been based upon this incredible story, one of them ("Flowers of War," 2011) a joint Chinese-Hollywood effort. Vautrin is, even today, still honored by the Chinese as the "American Goddess of Mercy."

Meanwhile, Alice Chong finally reached Shanghai six months after her first attempt to do so. Ginling College had been evacuated to the neutral, British-controlled, part of the city, but roving,

frequently drunken, bands of Japanese soldiers continued to murder innocent Chinese with impunity. Unburied dead lay in the streets, and no part of Shanghai was truly safe from the Japanese. So on July 13, 1938, Alice began leading a group of Ginling students and faculty on an epic, 2,500

Japanese Hatsuara-class destroyer of IJN Division 21, blockading Shanghai in August 1937. Photo taken by Alice Chong surreptitiously over the rail of the *Empress of Canada*. Alice boarded ship in Honolulu, bound for Shanghai and Nanking, on the same day that the Japanese made Shanghai their primary target in their full-scale war against China. The *Empress of Canada* was prevented from landing by Japanese Imperial Navy warships. After more than 1,000 refugees came aboard from anything that would float, Alice's ship diverted to Hong Kong and comparative safety. Alice Chong collection.

Hawaiian-born Alice Chong, seated on truck bumper, with Ginling Girls College refugees from Nanking. A few months after this photo was taken, multilingual Alice Chong led a group of Ginling girls through Japanese lines, talking her way through roadblocks, getting them out of Shanghai. She then guided them more than 2,500 miles through war-torn China by train, truck, riverboat and on foot. The Ginling refugees, just one step ahead of the invading Japanese, finally reached sanctuary in "Free China." The woman wearing the hat may be Minnie Vautrin. Undated photo, Shanghai, probably March 1938. Alice Chong collection.

The real "Terry and the Pirates": a 14th U.S. Army Air Force B-25H "ship-killer" mounting a 75mm cannon in its "shark mouth" below its four .50-caliber nose guns. Intelligence received from "stay behind" Chinese observers behind Japanese lines, or from Japanese radio intercepts, then translated by Alice Chong, enabled 14th USAAF flyers to surprise, then sink, Japanese shipping in the South China Sea, and to wipe out enemy troop formations on land. Chennault and his boys broke every tactical rule in the book to obtain victory after victory over the Japanese. Sour grapes American brass, like Vinegar Joe Stilwell, despised them for such "unmilitary" behavior.

Undated (1944?) Internet photo in public domain.

mile trek through Japanese-held territory, then in a great circle through China, always just one step ahead of the advancing Japanese. They traveled by truck, train, steamship, riverboat, and on foot. City after city fell to the Japanese just after Alice's group left it, but they finally reached Chengdu, near Chungking, Chiang Kai Shek's new, post-Nanking capital. Alice wrote home to Honolulu, "We shall now have to fight with our backs to the wall."

Alice had escaped to "Free China," where Chennault and other Americans were training the infant Chinese Air Force, equipped with American Curtis and Russian Polikarpovs, both obsolete biplane fighters. Alice taught Chennault and other American advisors enough Chinese to communicate with their student pilots and mechanics, and published a regular column in the Honolulu newspapers: her byline, from 1938 through 1940, was "Behind the Lines." Alice became friends with many Chinese Air Force fighter pilots, including the very first American Ace of World War II, another ABC, like her, Portland, Oregon-born Arthur Chin.

Chin, flying a biplane, had shot down 9 Japanese planes by 1939. Alice's letters matter-of-factly

noted air raid after Japanese air raid, some inflicting thousands of local casualties, and occasionally wrote home how wrenching it was when one of her pilot friends was shot down in flames.

By 1941, Chennault and Chiang Kai Shek had persuaded the American government to send the most modern fighter available, the P-40, to the Far East, and to recruit military fliers into the American Volunteer Group. The AVG soon became better known by its nickname, the Flying Tigers. Chennault left China to organize this new force in India and adjacent Burma, and was still doing so when the attack on Pearl Harbor came on December 7. The Japanese attack on Hawaii was particularly significant for Alice Chong, for no fewer than four of her brothers, part of "the U.S. Navy's Chinese Mafia," were at Pearl Harbor that day. One brother, David Chong, my eventual father-in-law, and an Olympic-class swimmer, swam through burning fuel six times on December 7, 1941 to rescue badly burned sailors that otherwise would have drowned.

The Flying Tigers' first engagement against the Japanese took place just under two weeks after the

ON ASIATIC FRONT—Alice Chong, local Chinese girl who is now working to win with Maj. Gen. Claire Chennault's 14th AAF in the Far East. The picture was taken at Chengtu, in western China.

After teaching at Ginling College in exile for five years, Alice Chong felt she had to do more for the war effort. So, she became General Chennault's intelligence expert at Kunming in 1943. On the books as a "Librarian," Alice's real job was translating Japanese and Chinese intercepts, and providing critical targeting intelligence to the 14th Air Force. She enabled them to hit the Japanese over and over again where they least expected it. *Clipping from the Honolulu Advertiser, 1943.*

Pearl Harbor attack. Unfortunately, the enemy advance pushed the unit out of Burma, so it relocated at Kunming in South China, where it continued fighting until it was disbanded in July 1942. Meanwhile, the flexible, adaptable, brilliant Chennault was welcomed back into the U.S. Army, and given command of what became, in March of 1943, the 14th Army Air Force. A first star was eventually followed by a second. Alice Chong resigned her position at Ginling College in Exile and went to Kunming to work as one of Chennault's two most trusted intelligence experts. She translated Japanese radio intercepts, and reports sent by "stay behind" Chinese informants in Japanese-occupied areas. Alice provided critical targeting information that made the 14th USAAF the nemesis of the Japanese Army on the Chinese mainland, and the Japanese Navy in the South China Sea. She spent Christmas 1944 in a slit trench at Kunming, suffering through one more of the dozens of Japanese air attacks she survived between 1937 and 1945.

Meanwhile, Alice's boss, Chennault, was under attack not only by the Japanese, but also by "by the book" American brass, especially his superior, General Joseph Stillwell. After the inevitable showdown, Stillwell was recalled, not Chennault. Chennault's most important ally in Washington, D.C., was Wild Bill Donovan, and the *quid pro*

quo he had to pay for Donovan's support was to accept the OSS at Kunming, after both Nimitz and MacArthur had barred it from their own theaters. Suddenly, dozens of inept "cloak and dagger" operatives, including the future "French Chef" Julia Child and former Hollywood director John Ford – none of whom spoke Chinese, much less Japanese – swarmed all over the old Flying Tigers air base, spying on each other and questioning the need for "untrained civilians" like Alice Chong. So in 1945, with the Japanese retreating on all fronts, Alice finally went home, after eight years in war-torn China.

Alice Chong was one of only two female members of the 14th US Air Force Association. The other was her friend and fellow translator Eloise Witwer, the missionary who evacuated Burma with the Flying Tigers, driving one of Chennault's trucks all the way to Kunming. Any Flying Tiger or 14th USAAF veteran visiting post-war Honolulu always looked up Alice Chong. From General Chennault's secret weapon in China, she became the embodiment of the Aloha spirit in Hawaii. When she died in 1972, the 14th Air Force Association held a memorial service for "their true friend and comrade who typified the ideal of womanhood and patriotism," the most remarkable woman its members had the privilege of knowing during WWII.

Alice Chong (at center) with some of her "boys," 14th U.S. Army Air Force air crew, ground crew, officers and enlisted men, on the Kunming airstrip in front of a C-54. Alice was the most unique female to make a contribution to the American war effort in WWII. She was the only American-born Chinese woman doing intelligence work for General Chennault and the 14th USAAF, and this after her heroic trek leading the Ginling College girls across all of China to safety. Undated photo, probably late 1944, Alice Chong collection.

101 Classic Firearms by John Marshall ⁸³

Dillon Precision announces the release of John Marshall's new book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, a compilation of the author's popular articles appearing in **The Blue Press** since 2007. **101 Classic Firearms** is sure to be a welcome and prized addition to the library of any serious firearms aficionado.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on

some of the world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in **The Blue Press**, **Gun Digest**, **Guns & Ammo's Handguns**, and **American Gunsmith**. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. He is also an endowment member of the National Rifle Association.

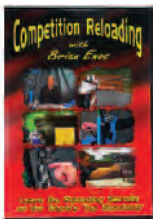

Price: N41-40133 \$29.95, Autographed N41-97130 \$34.95

Competition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting.

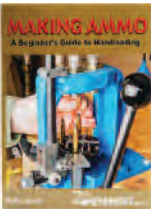

Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

Making Ammo: A Beginner's Guide to Hand-loading by Kyle Lynch – Ammo shortage? Not anymore! Learn a new hobby that will save you money and ensure that you always have enough of the right ammunition for your shooting needs. This guide offers you an opportunity for first hand information from an experienced reloader as he takes you through the reloading process. Examples explain what works and what doesn't. If you are new to reloading or want to understand the fundamentals more fully, this guide provides simple step-by-step instructions.

N41-43270 \$23.95

Legally Armed: A Concealed Carry Gun Law Guide – Learn the basics of concealed carry and the laws associated with this astronomically growing group of self-reliant Americans. If you depend on a handgun for the protection of yourself or your family, arm yourself with knowledge, too. What's inside? What to consider before carrying a firearm • Protecting oneself: discharging a firearm in self-defense • What to do when interacting with Law Enforcement • Gun handling, practice and storage • State-by-state quick reference guide to carry laws where you live and travel.

N41-43269 \$14.95

Armed & Smart: A Beginner's Guide to Concealed Carry – If you are new to concealed carry and need a great resource for information, this is the book for you. This book covers all the basics a beginner needs to know.

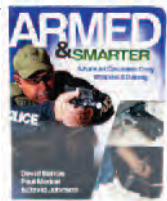

Before you make the decision to exercise your Second Amendment right to bear arms through concealed carry, you should consider factors like what type of gun is best for carry, when to carry a firearm, how to carry concealed, and why you should carry a concealed firearm.

We carefully cover handgun safety and the proper steps for using and caring for your firearm. Other topics include cartridge selection, accessories available, practice techniques, and range etiquette. **N41-43232 \$16.95**

Armed & Smarter: Advanced Concealed Carry Weapons & Training – Once you have mastered the basics for carrying your concealed firearm, you need a book to build on that foundation and hone your skills to those of an intermediate-level handgunner. After obtaining your concealed carry permit and securing a firm grasp of the responsibilities attendant to carrying a concealed firearm, it's time to focus on becoming an excellent marksman.

In **Armed & Smarter**, our authors prepare you, the shooter and gun owner, to handle and use your handgun responsibly. By the end of this book, you will understand the importance of strong habits and perfect practice. **N41-43233 \$16.95**
