## 22 CHARGER™ PISTOL

RE-ENGINEERED WITH ENHANCED FEATURES

The Ruger® 22 Charger™ pistol is back – recharged and re-engineered – with enhanced features and a new 22 Charger™ Takedown model. First introduced in 2007, this unique .22 LR pistol became a favorite of long-range target shooters and plinkers alike. The new 22 Charger™ pistol offers improved ergonomics and new features, including the new BX-15® magazine. The takedown model employs the very popular 10/22 Takedown® quick disconnect feature that allows this pistol to be taken down quickly and easily.

Threaded Barrel Features a  
1/2"–28 Thread Pattern

Adjustable Bipod Offers Rock-Steady  
Sighting (Included with Both Models)

Included BX-15® Magazine is the  
Perfect Length When Shooting Prone  
or From the Bench

\* Some pistols may not be available in all states and locales due to laws limiting magazine capacity and feature-based restrictions. Please check with your local law enforcement agency prior to purchasing this firearm to verify that it may legally be purchased and/or possessed in your particular state and locale.

# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

# We READ Our Mail!

**R**e: John Marshall's article on the Savage Model 24 [August 2015 issue]. The first gun I bought was a Model 24. I purchased it on April 21, 1962 for \$38.22. It was .22/.410; the barrels were connected to each other; it had a sliding selector; the .22 barrel (top) was grooved for tip off scope mounts. The "serial number" was in a diamond pattern: At the apex was "2" below this was "K" and then "G", then on the bottom was "O" (I don't think it was a 0). It was a very nice gun and I never had any trouble with it. I sold it to a friend of mine when he retired. Is there a better way to send letters? I couldn't find an address in *The Blue Press*.

Larry Sanford – lsanford@a2gov.org  
 Larry, my direct e-mail address is mpixler@dillonprecision.com as listed below in the masthead. Please feel free to send letters directly to me.

**J**ust read the article by Brian Dillon in the August issue. My 90-year-old father was very interested in the article. He was in the 78th Infantry, 314th Reg, I&R Platoon. He was captured in France and spent the last 100 days of the war in German POW Camps. He had turned in a German P38 to HQ prior to capture. After liberation, he wrote to a cousin still in theater who went to the HQ, retrieved his gun and brought it home. He still has it. Based on S/N and date he got it, the gun was less than 6 months old. Still in pristine condition.

John S. Ryals – lckystar@gmail.com  
 I'm very happy to see a professional shooter on the cover of the May issue. Can't believe you didn't think of this sooner! There are many very attractive and very talented ladies in the shooting sports (i.e. Janna Reeves, Eva Shockley, Tac Tissy, etc.). With this in mind, it seems you could find a suitable cover girl who actually uses a Dillon reloader. I'd like to see more covers like May.

Rob Maine – Newport News, VA  
 Obviously, we've done it again with *Jessie Duff* on this month's cover. For the record, I'm VERY interested in featuring women who enjoy shooting and/or reloading on our covers. So, please submit photos of your favorite lady shooter to mpixler@dillonprecision.com or by mail: Mark Pixler, Dillon Precision Products, Inc., 8009 E. Dillon's Way, Scottsdale, AZ 85260. I'm looking for the highest resolution photos possible, and if I pick your photo for the cover, I'll pay \$500 for the right to use it. I'm emphatically NOT looking for bikini shots, cheesecake, etc., and all photos with firearms must depict safe gun-handling techniques. **HINT: I'm more likely to pick photos that either fit the cover format or have enough room around the subject for me to crop the photo to fit. Good luck!**

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# A FORTUNATE MUTATION

## CMMG MK47 AKM

### Reviewed by Peter Caroline

Sometime during the reign of George H. W. Bush, I bought my first AK, a Polytech folder. It was a fun gun, virtually indestructible, and it was not in the least bit fussy about its diet, happily munching any cheap garbage surplus ammo I fed it. The 7.62x39 cartridge had plenty of punch, relatively equivalent to a .30-30. Unfortunately, the AK might, on a good day, be able to keep its rounds inside a dessert plate at 100 yards. I tried several friends' AKs, with similar disappointing results.

Some years later, while doing some freelance writing for Colt, I acquired several Colt "Sporter Rifles," as they called their AR-15 products at the time. Very nice guns, both accurate and reliable, but I wasn't terribly enthusiastic about the 5.56x45 cartridge. Colt did in fact, in 1993, introduce a Sporter Lightweight Rifle chambered for 7.62x39, the Model R6530, but it never made much of a dent on the market.

Flash to the present. I recently received a package from CMMG, containing their new MK47 AKM...essentially an AR platform adapted to the 7.62x39 AK round. This is not an entirely new concept; there are a number of similar "mutants" on the market, combining the accurate and versatile AR configuration with the more potent and often more inexpensive Combloc cartridge. This one just happens to have some interesting differences.

First of all, CMMG didn't just rechamber a basic garden variety AR for the 7.62x39 cartridge and leave it at that. The MK47 lower is longer and proportioned differently, and will not accept standard dimension AR uppers. The free-floated barrel measures 16.1" and has a 1:10 twist. Instead of

the common AR magazine tunnel with pushbutton magazine release, this carbine features a more open, AK-like configuration with a paddle release, making mag swaps a lot faster and easier. The MK47 comes with two 30-round Magpul PMAGs, and will easily accept a wide variety of common steel or plastic AK magazines. The good news is, most of these magazines are easily obtainable, inexpensive and reliable. The bad news is, like any AK, the MK47 does not have a bolt hold-open feature; the bolt slams shut after the last round. When you insert a new full magazine into the MK47, you have to pull the charging handle back all the way and release it. Speaking of the charging handle, it appears to be of the standard mil-spec variety.

Given the heavier bolt and spring, I'd prefer a larger aftermarket handle to make bolt retraction a bit easier.

Rather than simply enlarging the bolt face, CMMG chose to scale the main body of the bolt to 7.62x39 dimensions, making for a much stronger and longer-lasting component. The rear of the bolt, however, conforms to the dimensions of standard AR buffer tubes, so you're free to replace the supplied Magpul 6-way buttstock with whatever aftermarket stock you choose. Ditto the Magpul MOE pistol grip, which I

found quite comfortable.

In true AR fashion, the MK47 will accept the wide variety of sights, lights, lasers and other paraphernalia that are currently fashionable. The handguard features 48 KeyMod slots on the sides and bottom, with about 21" of Picatinny rail on the top.

I took the MK47 to my makeshift "range," a stretch of AZ Game & Fish acreage in the desert,

Mk47  
7.62x39

AR15  
7.62x39

“RATHER THAN SIMPLY  
ENLARGING THE BOLT FACE,  
CMMG CHOSE TO SCALE THE  
MAIN BODY OF THE BOLT TO  
7.62X39 DIMENSIONS.”

with a mixed bag of ammunition... Red Army 123-grain FMJ, Hornady 123-grain SST, Winchester White Box 123-grain FMJ, Winchester Super-X 123-grain Power Point, Wolf 122-grain HP, China-Sports 122-grain FMJ and WPA 124-grain HP. I used both the supplied Magpul magazines and several unmarked surplus metal mags. One odd plastic magazine from Master Molder in Wilson, NC, and marked "Law & Gov't Use Only," was too thick to fit in the abbreviated magazine well.

Using a Bushnell TRS-25 Ultra Compact red dot sight, I was able to achieve predictable 1 Minute of Golfball results at 50 yards. This is actually a far better degree of accuracy than I'd been able to get with Combloc AKs in the past. The trigger was a delightful surprise...no creep, about 1/8" of travel and a 6-pound pull that felt like much less. The MK47 happily ate everything I fed it...brass, lacquered or copper-washed steel-case,

both Boxer and Berdan primed...without a hitch. The gun weighs in the neighborhood of 7 pounds, and felt recoil appeared to be much

milder than that of my Maadi AK, probably due to more forward weight bias.

The MK47 blends the virtues of both AR and AK platforms without compromise. It's strong, accurate, made in U.S.A., and supports a wide range of useful accessories. It is well suited to both home defense and feral hog hunting,

although I wish that 7.62x39 ammo were commonly available with heavier projectiles than the 122-124-grain standard. Given the quality of construction, the \$1,499.95 to \$1,849.95 MSRP range, depending on extras, seems quite reasonable.

Strong Mount L54-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

L54-16627, \$82.95

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

L54-20302, \$25.95

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

L54-20251, \$87.95

### OPTIONAL MAGNUM RIFLE POWDER BAR

L54-21353, \$29.95

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

L54-22120, \$30.95

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die:** L54-16629, \$19.95

**Oversize Die:** L54-16626, \$19.95

**Plastic Funnel:** L54-16617, \$5.95

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

L54-20029, \$22.95

**RL 450 Powder Die:**

L54-20308, \$21.95

# RL 550B

**RL 550B DVD**  
**Instruction Manual**  
 L54-19483 \$19.95

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial Period!**

*All for ONLY...*  
**\$439<sup>95\*</sup>**

**L54-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

Total Price as pictured here with optional accessories: **\$737.60**

.45 ACP Die Set	L54-14404	\$64.95
Strong Mount	L54-22051	\$48.95

Cartridge Case Bin/Bracket	L54-11185	\$24.95

# RL 550B ACCESSORIES

## A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

### L54-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **L54-20782, \$76.95 ea.**  
Magnum Rifle Powder Bar **L54-21353, \$29.95 each**  
X-Small Powder Bar **L54-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **L54-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**L54-20064, \$11.35 each**

**Three or more, \$10.25 ea.**

**X-Large Powder Die, L54-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**L54-13909, \$22.95 each**

**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**L54-22055, \$20.95 each**

**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

**L54-10842, \$7.95 each**

One-Inch Bench Wrench	<b>L54-10842</b>	<b>7.95</b>
Square-Deal-Only Wrench	<b>L54-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	<b>L54-22051</b>	<b>\$48.95</b>
XL650-only	<b>L54-22052</b>	<b>45.95</b>
Square Deal "B"	<b>L54-22223</b>	<b>64.95</b>

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	<b>L54-22214</b>	<b>\$41.95</b>
RL 1050 Tray Kit	<b>L54-22215</b>	<b>41.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>L54-97126</b>	<b>\$142.95</b>
----------------------	------------------	-----------------

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	<b>L54-16306</b>	<b>\$41.95</b>
--	------------------	----------------

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	<b>L54-17950</b>	<b>\$45.95</b>
Plastic Roller	<b>L54-22183</b>	<b>40.95</b>

**Quick-Change Cover** for use with powder measure. **L54-11143 \$14.95**

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

### RL 450 Upgrade Components

# Dillon's Case Preparation Equipment

**CV-2001**  
**L54-20493**  
**\$188.95**

**CV-750 L54-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator L54-20675 \$75.95**

**CM-500 Case/Media Separator L54-21045 \$47.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 L54-22047 \$213.95**

**Euro CV-750 L54-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle. **L54-13804** **\$8.95**  
Case (20 pc.) **L54-20255** **135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle **L54-13733** **\$8.95**  
Case (20 pc.) **L54-20256** **135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **L54-21375** **\$135.95**

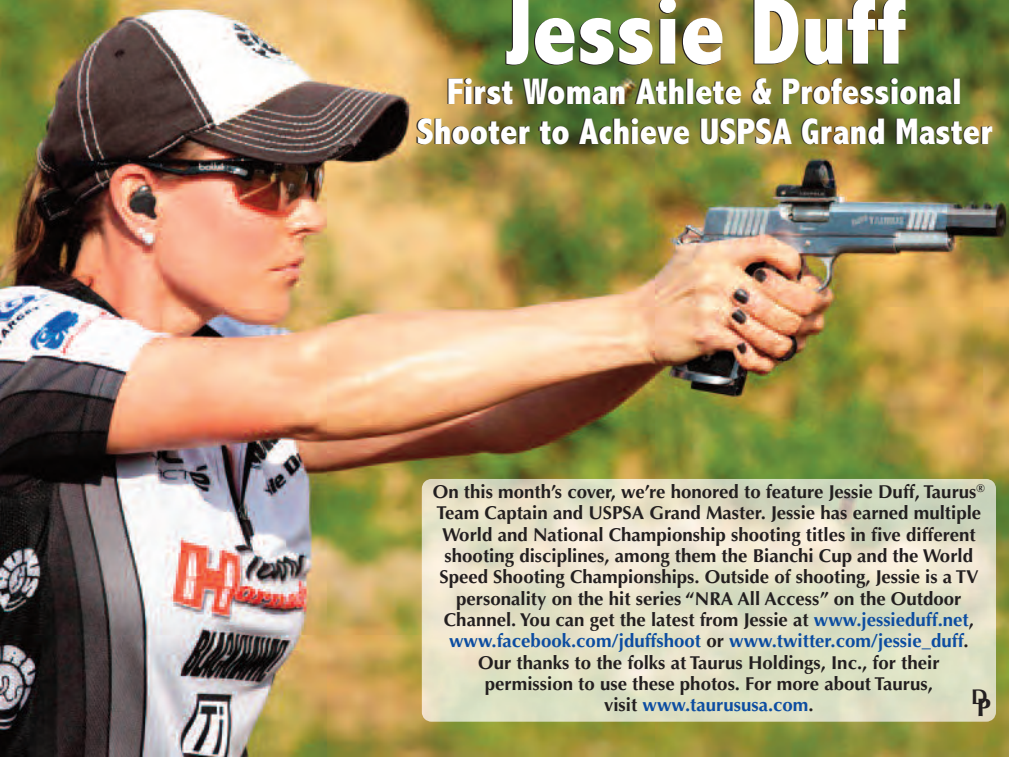

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **L54-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **L54-13496** **\$15.95**

# Jessie Duff

First Woman Athlete & Professional  
Shooter to Achieve USPSA Grand Master

On this month's cover, we're honored to feature Jessie Duff, Taurus® Team Captain and USPSA Grand Master. Jessie has earned multiple World and National Championship shooting titles in five different shooting disciplines, among them the Bianchi Cup and the World Speed Shooting Championships. Outside of shooting, Jessie is a TV personality on the hit series "NRA All Access" on the Outdoor Channel. You can get the latest from Jessie at [www.jessieduff.net](http://www.jessieduff.net), [www.facebook.com/jduffshoot](http://www.facebook.com/jduffshoot) or [www.twitter.com/jessie\\_duff](http://www.twitter.com/jessie_duff).

## Super 1050/RL 1050 Short Trim Die Toolhead

**L54-62219**  
**\$224.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the 1050 toolhead stand is not included.)

# Dillon's New Rapid Trim 1500 Case Trimmer <sup>23</sup>

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **L54-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **L54-13141**, are **\$19.95** each. Upper lock rings, **L54-13559**, are **\$4.99** each.

# MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	L54-62124	\$20.95

# Dillon's NEW Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access,

has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

4-3/4" SA Colts/clones **L54-11560**  
 4-5/8" Ruger Blackhawk **L54-15765**  
 Ruger LCR **L54-29030**  
 2" J-Frame S&W Rev. **L54-15764**

## "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

## UM Tactical Universal Sight Mount and Holster System

UM Tactical has created a universal sight mount that will fit all pistols with a 1913 picatinny rail. Although many sight mounts exist; what makes the unit produced by UM Tactical unique, is that it will mount and dismount from your firearm in under 30 seconds with no tools or gunsmithing. Once set up with your favorite scope or red dot sight, the mount and optic can be taken on and off your firearm and still hold the zero. This high quality mount is constructed from CNC machined aluminum and is finished in Mil-Spec Type III anodizing.

UM Tactical's UMH3 Universal Holster attaches to the UM3 sight mount and not your handgun. This unique design is hand made and is constructed of thermoformed plastic (Boltaron).

UM Tactical Sight Mount L54-43271 \$99.95  
UM Tactical RH Holster L54-43272 \$64.95  
UM Tactical LH Holster L54-43273 \$64.95

# BLADE-TECH™

## “Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?!). No excuse, Sir!

L54-19257 \$11.95

# Dillon's Pistol Die Sets

## Size Die

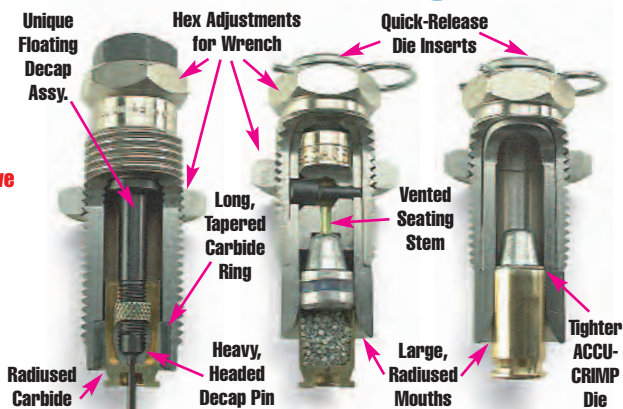

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	L54-10839	\$67.95
.308 Winchester	L54-15574	67.95
.30-06 Springfield	L54-10840	67.95

### Dillon Carbide Rifle Dies (Three-Die Sets)

# The Canik TP9: But

A photo supplied by Century Arms of the TP-9 V2, the currently offered version – slightly different from the version tested.

## By J.B. Wood

If I were on a committee giving a Design Award for 9mm striker-fired pistols, this one would get my vote. It's the Canik TP9, made in Turkey and imported by Century Arms. Before we look at its numerous innovative features, I want to point out that the one mainly shown here is an early version, slightly different from the one currently offered.

The main changes were a slightly different barrel-length, and a moderate re-design of the frame. One of the latter additions was a more adaptable standard rail at the front, giving more options for the mounting of lasers or lights. Otherwise, all of the other features of the original version were retained.

The TP9 is a full-sized pistol, and the double-column magazine holds 17 rounds. A frame of high-tech polymer keeps the empty weight down to around 23 ounces. The other numbers: Overall length is 7.1 inches, height 5.7 inches, and width 1.35 inches. Barrel length, on this early version, is 4.09 inches.

Inside, the operating parts are all steel, and the barrel is cold-forged. The Canik factory has an ISO-9000 rating, so they know about precision. And, that 17-round magazine is made for them by Mec-Gar of Italy. That means it's the best that can be obtained. On the back of the magazine, 17 little holes let you check the load.

Unlike most modern striker-fired pistols, the TP9 is **NOT** a DA-Only. Initial loading or firing

sets the striker at full-cock for single-action shooting. On top of the slide there's a striker-uncocking device. Push it downward, and the striker will safely return to un-cocked position, ready for a double-action pull.

Which, by the way, is remarkably smooth on my gun, averaging about 8 pounds. On single-action, a small amount of take-up, then a clean five-pound let-off, and no over-travel. Internally, there's an automatic striker-block that is always "on-safe" until the last fraction of trigger-pull. There is no separate manual safety. With the other features, you don't need one.

The locking system is a cammed version of the classic falling-barrel type. The recoil spring is a single flat-coil, absorbing the force well, but easy on slide-cycling. Also, it's a captive unit on its steel guide, so it won't fly away during the easy disassembly for cleaning.

The sights are excellent – square-picture, three white dots, and the rear one is laterally screw-adjustable. Also included are two other front sights of different heights, so you can adjust vertically for various loads. There's even a tool for installation, and complete instructions. The three white dots are tritium-infused for low-light pick-up.

I tried the TP9 at the range standing, two-hand hold, at 7 yards and 25 yards. Ammo was my favorite accuracy load, the 147-grain JHP from

# Wait... There's More! <sup>37</sup>

Right and left views of the Canik TP-9 pistol.

Push down on the decocker forward of the rear sight and the striker is un-cocked.

Simple takedown into five parts.

Holster, spare magazine, loader – the kit supplied with the TP-9 is quite extensive.

Black Hills. Close-in, groups were 2.5 to 3 inches. At 25 yards, they expanded to an average of 4.5 inches. All were well-centered, no sight adjustment necessary. Also, no malfunctions. The felt-recoil was mild.

For the suggested retail price of around \$400, the kit you get with the TP9 is awesome. I've already noted the extra front sights, here's the rest of the list: A spare magazine, magazine loader, larger frame backstrap insert and its tool, cleaning rod, bore brush, all housed in a nice hard-polymer case with a handle.

As they used to say in the old (and some not-so-old) TV ads, "But wait... there's more!" A polymer holster with a trigger guard latch and two back-pieces, slip-on and belt-type, fully adjustable to any angle. Amazing, isn't it?

## AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

**AP Custom USA's** Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

## TACCOM, LLC Tactical and Competition Accessories

**TACCOM, LLC's** Duaload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip (included)** that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

<b>2Up Belt/MOLLE</b>	<b>L54-19530</b>	<b>\$9.95</b>
<b>4Up w/Tek-Lok™</b>	<b>L54-19531</b>	<b>29.95</b>
<b>6Up w/Tek-Lok™</b>	<b>L54-19532</b>	<b>34.95</b>

**TACCOM, LLC's** Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holder and not have to worry about rim overlay...the rims are already overlapped in the correct position!

<b>4Up Quaload Shotshell Holder</b>	<b>L54-19543</b>	<b>\$39.95</b>
<b>8Up Quaload Shotshell Holder</b>	<b>L54-19544</b>	<b>69.95</b>

# CLASSIC FIREARMS: The Sto

## By John Marshall

I've been on this planet for quite a number of years – perhaps more than I'd like to admit. There are very few firearms that I haven't seen, handled or read about over the years, and I pride myself on being fairly knowledgeable about what's out there. However, I was quite surprised a couple of years ago at a small gun show when I encountered a firearm I knew absolutely nothing about. It was strange and quirky, with an action that defied easy visual analysis or description. It was like a scruffy puppy dog at the pound that – despite its appearance – wins your heart and you wind up taking it home. Such was my introduction to the Stevens Visible Loader pump-action .22 repeater, and it won a place in my gun rack. It also wins a place in the lineup of classic firearms if only for its peculiar functionality.

The action on this rifle is unique. The breechblock is not housed within the frame, but operates above it. Upon pulling the forearm to the rear, while the breechblock is cocking the external hammer, a lifter pushes a round upward from the 11-round tubular magazine into massive twin extractors. These also serve as cartridge guides on the face of the breechblock. The upward movement of the round by the lifter pushes the previously fired cartridge case upward and out, as there is no ejector as such. This means that the last fired case must be plucked manually from the breechblock. When the round is being loaded, since there is no surrounding frame, it's fully visible, exposed not only to view but also to the elements. As the forearm is moved forward, the cartridge, held rigidly horizontal by the extractors, moves into the chamber and the breechblock is locked in battery by a small and rather flimsy pivoting locking piece. There is no safety other than a half-cock notch on the hammer. The hammer drives a free-floating firing pin forward and upward at an angle to strike the rim of the car-

tridge when the trigger is pulled. Only when the hammer is fully forward can the forearm be pulled to the rear again to repeat the cycle. While there is no disconnecter, the action cannot be fully closed if the trigger remains pulled while pumping. Thus it cannot be "slam fired" by holding the trigger back while being operated. The breechblock is integral with the outer magazine tube, and the tube moves back and forth during cycling. The blued barrel is held in the case-hardened frame by a single transverse tapered pin, capped by a covering screw on the frame's right side. While the gun featured standard open sights, the upper grip tang was drilled and tapped for aftermarket peep sights. The action is not especially strong, and is only rated for standard velocity .22 Long Rifle cartridges. Modern high-velocity rounds will chamber but should not be fired in this gun. Seen from the side, the rifle somewhat resembles its predecessor in the line, the single-shot Stevens Favorite, which had a levered dropping-block action. In fact, some of the parts in both guns are identical.

*"Be it known that I, Edward E. Redfield, a citizen of the United States, residing in Glendale, in the county of Douglas and State of Oregon, have invented a new and useful Magazine-Rifle...."* So began the patent application for what became the Visible Loader. The patent was granted on April 20, 1907. In that same year, the J. Stevens Arms and Tool Company of Chicopee Falls, Massachusetts (founded in 1864) purchased the patent rights. They quickly began manufacture of the arm, marked "Visible Loading Repeater" on the barrel. The catalog listed it as the "Visible Loading No. 70" and it was chambered to use the .22 Short, Long and Long Rifle interchangeably. Round barrel lengths of 20" or 22" were initially available. A number of variations in chamberings, sights, stocks, finish and barrels spawned various model numbers through the years. The "Number 70-1/2,"

# Stevens Visible Loader Rifles

“It wins a place in the lineup of classic firearms if only for its peculiar functionality.”

chambered for .22 Short only, was one offered. A patent granted to George S. Lewis and assigned to Stevens, was granted on Sept. 28, 1909. This covered minor improvements, one of which was claimed to strengthen the action. In 1916, the company name was changed to the J. Stevens Arms Company, and it was purchased by the Savage Arms Company in 1920. Savage retained the Stevens name and products reflecting that name. In 1931, a “Model 71” was cataloged that had a 24” octagonal barrel and a pistol-gripped stock. There were no .22 Short-only chamberings for this version. A detachable-stock option was offered near the end of production.

The Visible Loader was first put on the market at an attractive price. It undercut Winchester’s premium Model 1890 pump action repeater, designed by John Browning, by quite a margin. The pressure of this competition caused Winchester to bring out a less expensive version of the Model 1890, which was known as the Model 1906. It was offered at a reduced price specifically to compete with the Visible Loader. For this, Winchester fans were quite grateful to Stevens! Eventually the Model 1906 morphed into the Model 62, which lasted until 1959.

The Visible Loaders continued to be produced through 1934. Some were assembled from remaining parts and sold in 1941. In all, it’s estimated that over 100,000 were produced over the 26 years it was in production. None were ever serial numbered. A prominent alphanumeric assembly marking was usually stamped on the lower grip tang, and this is often mistaken for a serial number. There is no way today to correlate these assembly markings with a date of manufacture, so only an educated guess can be made as to the age of any specific example. Most Stevens production records were lost after World War I. By my estimate, the rifle illustrated was made circa 1922, based on its barrel markings. It’s in very good and operable condi-

tion, and still works as intended. Barrel length is 22”, and the overall length is 36”.

There are not many of these workable Visible Loaders still around today, and in my opinion there are a number of reasons for this. First, the action was never a strong one; certainly never in the same class as other more robust designs. Secondly, unless the exposed open action was cleaned and lubricated religiously, dirt, grit, rust and wear tended to take their toll. A broken part would often sound the death knell for a gun, as it was a nightmare to disassemble. Even seasoned gunsmiths are reluctant to work on one today. Over the years, parts became scarce and eventually unavailable except by cannibalization of other non-functioning guns. Due to manufacturing changes over the years, some parts will not interchange. Most of these guns were probably neglected following breakage and disposed of after sitting around in basements, barns or closets and rusting for years. Such things earned the gun the popular sobriquet “the miserable loader.” Guns that were kept clean, well lubricated and used in moderation were the only ones spared the ravages of time. The one I acquired was previously owned by an old-timer who had kept it since childhood. He had taken it out recently, shot it to verify that it still worked reliably, cleaned it and lubed it, and offered it up for sale. I was lucky to find it. These few working guns have been handed down for a couple of generations more as uncommon curiosities than anything else, and they’re pretty rare.

While the Visible Loaders were mostly a detour with a dead end in firearms history, by their unusual design, working specimens have become interesting and desirable collector items. They can be had for still-reasonable prices when rarely found. I predict that the passing years will make them ever more valuable as attrition continues to take its toll on these old guns. They are becoming classic for their innovative and unusual design.

# 46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

L54-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

## SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

L54-21894

\$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

L54-19972

# MAKING A CASE FOR

## Dillon's Concealed Carry Tote

\$59<sup>95</sup>

L154-17001

### Reviewed by Peter Caroline

In the mid-1970s, there was an effort in Massachusetts to pass legislation that would ban the sale, transfer and ownership of all handguns in the Commonwealth. Fortunately, it was proposed as a public referendum, which was a welcome relief, given the Massachusetts legislature's propensity for passing gun control legislation

under cover of darkness. Being a pessimist, I immediately rented a large safe deposit box in a downtown Boston bank, and placed my more valuable handguns therein. I also looked for a somewhat more legal method of carrying the means of self-defense should the law be passed.

In my daily occupation, I commuted into Boston from the suburbs, toting a basic "Mad

# OR INVISIBILITY

Men" Samsonite briefcase. After some experimentation, I discovered that this briefcase would accommodate my 12-gauge Model 97 takedown pumpgun, once the barrel had been reduced to a bit over 18". True, it took a few moments to get the gun together and into action when needed, but it was better than nothing. Fortunately, the referendum was soundly defeated by a 3-1/2 to 1 margin. The briefcase project was placed on the back burner.

More recently, the concept of a dual-purpose "tactical briefcase" came up again. The people at Dillon, always on the lookout for new and useful products, developed a versatile carry tote for a laptop and other business impedimenta that also serves as an auxiliary (or primary) handgun case. While you may already commute into the urban jungle with a holstered handgun, this new case affords you a practical and inconspicuous means of carrying a larger pistol, such as an Uzi, CZ Scorpion or Desert Eagle in a concealed but readily accessible hook & loop-secured pocket. It will even conceal a folded pistol-caliber carbine, such as a Kel-Tec Sub 2000.

There is a main compartment that will readily accommodate a laptop, legal pads and other office-type paraphernalia. This compartment also incorporates two large, clasp-secured pockets plus three smaller auxiliary pockets. On the front of the outside, there are two roomy zippered pockets, each with an inner pocket. On the back, there's even a zippered compartment that will conceal a 13" x 9" ballistic armor plate, should the need arise. Included is a carry strap with a very comfortable, padded shoulder strap.

What I found very commendable about this piece of luggage is that Dillon resisted the temptation to put any identifying logo or insignia on it. The Concealed Carry Tote is black, anonymous and totally inconspicuous in any urban, commuting environment. Concealed remains concealed.

Dillon's new concealed Carry Tote measures 15" x 11.5" x 3" deep, and is constructed of tough nylon fabric. The price is \$59.95, less than a couple of boxes of .45 ACP defense loads. It is definitely a prudent means of going about your business.

## Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring L54-14067 \$1.35

5-Pack of Die Lock Rings L54-10669 4.15

1" Dillon Bench Wrench L54-10842 7.95

(Buy two or more 1" Bench Wrenches for \$7.10 each)

Wrench/Lock Ring 5-Pack L54-10668 9.95

# ElZetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

ZFH1500 AR15 Flashlight Mount    **L54-12020    \$29.95**

# THE LIGHTWEIGHT THE EX-ULTIMATE MARTIAL

By Duane Thomas

I am just old enough to remember a time when the Colt Lightweight Commander was considered “the ultimate martial artist’s carry gun.” Originally termed simply the Commander, this gun came out of the post-World War II military pistol trials to address criticisms leveled at the 1911’s wartime service, which centered around its size, weight and recoil level.

What was wanted was a smaller, lighter gun chambered for 9mm. Though the Army did not, in fact, wind up replacing the 1911 .45 with a 9mm until 1986, two guns developed specifically for the late ‘40s pistol trials, the Smith & Wesson Model 39 and the Colt Commander, were offered successfully on the commercial market.

The Commander hit the gun stores in 1950, and for its time it was really something special. Reduction in size on the Commander was achieved by chopping the barrel from the 5” length of a full-sized Government Model down to 4-1/4”,

with a corresponding shortening of the slide and dust cover. Weight was dropped from 38 to 27 ounces by making the frame out of aluminum instead of steel.

The Commander has always seemed to me an example of what happens when you marry together two theoretically desirable things, and wind up with a third thing not at all desirable. The Commander came out of a time when we believed the .45 ACP was much more effective, in an anti-personnel role, compared to other service cartridges, than we now know to be the case. Though designed as a 9mm, the Commander’s most popular chambering has always been .45 ACP. And obviously, light weight in a carry gun is desirable, right? Unfortunately when you combine a light

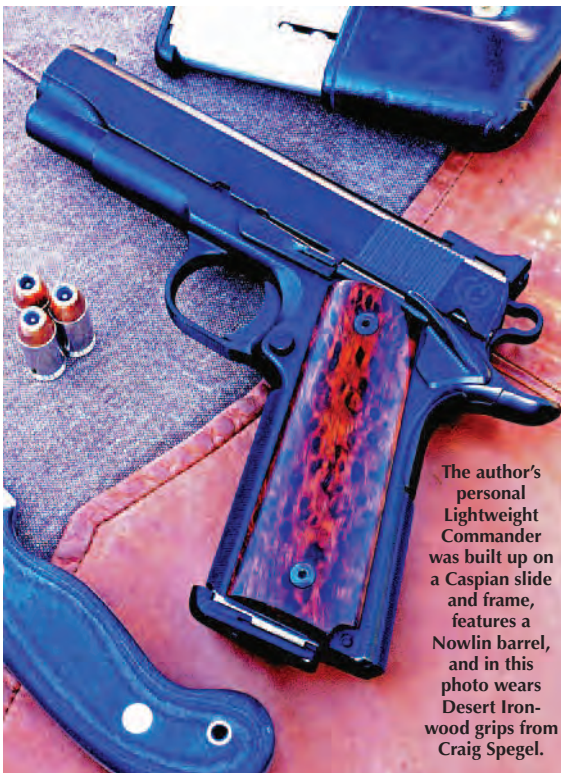

aluminum frame with the .45 ACP cartridge, you wind up with really heavy recoil. It’s a commonplace of gunwriting to compare the recoil of an aluminum-framed Commander firing .45 hardball to the .357 Magnum. And while I don’t buy into that – there’s no way the Commander is that brutal – still I will say that with most loads this gun/cartridge combination is not particularly pleasant to fire.

In my experience, there are two .45 ACP combat loads that have notably soft recoil, the Winchester 185-grain Silvertip and the Hornady 200-grain XTP, and if I carried a Commander for self-defense I would be carrying it loaded with either Winchester 185-grain Silvertips or Hornady 200-grain XTPs. More easily controllable recoil equals faster follow up shots, more readily attainable accuracy under flat-out rapid fire, and more rounds put where they need to go to solve the problem.

In 1970, Colt introduced the Combat Commander, which retained

the external dimensions of the Commander (shorter barrel, slide, dust cover) but gave the gun a steel instead of aluminum frame. At that time, Colt renamed the Commander the Lightweight Commander to differentiate it from the heavier gun. I have always found it amusing that, though the aluminum gun was the original Commander, in my experience over time people have started referring to the aluminum-framed gun as the Lightweight Commander and the later, heavier, steel framed gun as simply the Commander.

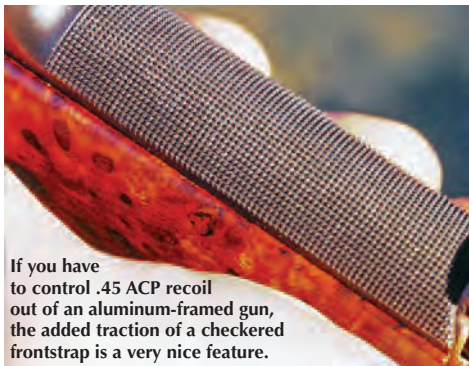

By the standards of its time, the Commander was considered a small handgun, at least for an autopistol chambering a full service cartridge. But standards for what constitutes a full service-sized handgun have shrunk over the years, as have

The author's personal Lightweight Commander was built up on a Caspian slide and frame, features a Nowlin barrel, and in this photo wears Desert Ironwood grips from Craig Spegel.

# T COMMANDER

## IAL ARTIST'S CARRY GUN

If you have to control .45 ACP recoil out of an aluminum-framed gun, the added traction of a checkered frontstrap is a very nice feature.

A Lightweight Commander with a round in the chamber, a 7-round mag in the gun, and two spare 7-rounders in a mag pouch (also from Matt Del Fatti) gives the shooter 22 rounds of .45 ACP.

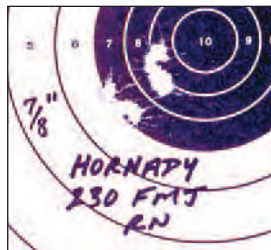

standards for what constitutes a first choice carry gun. Today, guns considered full-sized service pieces, like the GLOCK 17, SIG P226, etc., are all about the same overall size as the Commander, albeit somewhat thicker through the slide and grip. At the same time, guns considered first choice carry guns for the serious shooter, the GLOCK 19, SIG P228/P229, etc., are now quite a bit smaller than a Commander.

The Lightweight Commander really is a relic of a time gone by. I love mine, but it has not escaped my notice that it's large by the standards of modern concealment guns, carries a mere eight or nine rounds (depending on whether

This FBI tilt holster for the author's Commander was made by Matt Del Fatti.

This 5-shot group, fired at 50 feet, shows a well set up example of a Lightweight Commander is capable of delivering more than acceptable accuracy.

you're running seven- or eight-round magazines), and comes at the price, with most loads, of really heavy recoil. Today, most serious gun carriers – or handgun martial artists, if you prefer – can be found toting compact 9mms that are smaller than a Lightweight Commander, have more readily controllable recoil, and hold twice as much ammo. But even by modern standards, well over half a century after it was first introduced, though it may no longer be “the ultimate martial artist's carry gun,” the person carrying an aluminum-framed Commander would be a long way from unarmed.

Duane's website is [Self-Defense-Handguns.com](http://Self-Defense-Handguns.com)

Extra Loading Data Labels, L54-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.
"Square Deal" Bin	L54-13756	\$2.95	\$15.30	\$24.84

"SL 900" Bin	L54-17125	10.50	56.94	106.92

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# Swab-its® - A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!"

The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam tip is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	<b>L54-15310</b>	<b>\$4.98</b>

Gun-tips® 3" Precision Tip foam swabs are reusable. 24-count value pack. **L54-15345 \$9.99**

## Gun-tips®

Gun-tips® Extended Reach Firearm Cleaning swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

**L54-12583 \$9.99**

## Bore-Whips™

Bore-Whips™ .17 and .22 caliber (pictured) by Swab-its® are ideal for air rifles, rimfires or any other .17 or .22 caliber firearm that's difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator.

.17 Cal.	<b>L54-12689</b>	<b>\$9.99</b>

## E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth	L54-18613	\$6.99
-----------------	-----------	--------

**Snake Oil** is a derivative of an FDA certified medical lubricant used in high-speed medical drills.

- Provides a film that separates and protects moving parts, for smoother operation and increased efficiency.
- Contains no evaporants and has a film affinity in excess of two years.
- Reduces the collection of dirt, dust and other contaminants.
- Performance in extreme conditions is unparalleled.

0.5 oz. Bottle	L54-16035	\$4.95
2 oz. Bottle	L54-16508	8.95

-------	-----------	---------

## Sweet's Australian 7.62 Solvent

easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

L54-13128	\$12.95
-----------	---------

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	L54-15571	\$7.95
Slide-Glide Lite	L54-15572	7.95

**Microlon UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

**FrogLube** is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

## Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

S54-18599 \$14.95

# CCW Tandem Tactical Stripper

Sorry, Baschieri & Pellagri target slugs not included.

California Competition Works' Tandem Tactical Strippers can be used to hold either shotshells or AR-15/M4/Mini 14 magazines, or a combination of both by installing or removing the aluminum spacers provided with each stripper. The Tandem Tactical Stripper holds a maximum of eight rounds of 12 Gauge (10 rounds of 20 Gauge) shotshells or two AR-15/M4/Mini 14 magazines. Each Tandem Tactical Stripper features a BLADETECH Tek-Lok™ Universal Belt Clip, four removable aluminum spacers, and the screws and Allen wrench required to install them.

## ADCO SUPER THUMB®

Offers models for popular centerfire pistols and 10/22 style magazines. ST1 is for 9mm and .40 caliber Beretta, Browning, Ruger, SIGARMS, S&W, etc. In addition, the ST1 has interior rails and grooves to accommodate Colt Government magazines.

- ST2 is for GLOCK and Para-Ordinance magazines. L54-18607 \$7.95
- ST3 handles virtually all centerfire, single-column magazines. L54-18608 \$7.95
- ST22 is for Ruger 10/22 rifles. L54-18610 \$7.95
- STJR is for Ruger, Browning, Colt and High Standard .22 pistols. L54-18611 \$7.95

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

- Four-Magazine Storage Sleeve L54-19226 \$14.95
- Six-Magazine Storage Sleeve L54-19227 17.95
- Magazine Sleeve I.D. Tag/Hanger L54-19476 1.95

## Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight L54-18210 \$53.95

Secure Firearms Products' Universal Spring Tester will help you determine if the recoil spring in your pistol needs replacing, and you'll save time and money by testing and organizing loose recoil springs in your shooting bag.

Recoil Spring Tester L54-15305 \$39.95

MAGPUL 1911 Grip Panels feature reinforced polymer construction and a unique diamond-shaped cross section to prevent twisting in the hand. They also have an aggressive mag-release cut out and are compatible with ambidextrous safeties.

- FDE L54-43237 \$19.95
- BLK L54-43236 19.95
- ODG L54-43238 19.95

# CHECK-MATE M14/M1A Magazines

Currently Check-Mate Industries is the largest M14/M1A magazine manufacturer for the United States Military. Check-Mate Industries is recognized as being America's number one manufacturer of M14 magazines. We offer CMI M14/M1A magazines in 5-, 20- and 25-round capacity.

5-round M14, Phosphate Finish  
L54-27055 \$22.00

### The Larry™ 8 LED Pocket Work Light

The Larry™ 8 LED Pocket Work Light is the essential handyman light. 8 powerful LEDs provide 60 lumens of bright white light. The rotating magnetic clip gives you convenient hands-free lighting. The reinforced plastic body design is shock-proof and water-resistant, making the Larry™ basically indestructible.

L54-15432 \$9.99

### FIXR: 20 Tools in 1

A **REVOLUTION** in Multi Tools that features: 1) quick-release clip 2) bottle opener 3) cutting blade 4) pry bar 5) nail file 6) wire stripper 7) nail cleaner 8) box opener 9) large flat driver 10) medium flat driver 11) eyeglasses screwdriver 12) medium Phillips driver 13) small Phillips driver 14) bicycle spoke wrench 15) 2" ruler 16) 1/4" wrench 17) 5/16" wrench 18) 3/8" wrench 19) 1/2" wrench 20) 9/16" wrench. Comes with its own leather sheath.

L54-43294 \$14.99

### 3 Gun Ammo Bags

TUFF Products 3 Gun Ammo Bags (Set of 3) are made of 1000 Denier Cordura® and equipped with dual 550 cord cinch strings for secure closure. The Red/Blue bags hold up to 200 loose pistol/rifle rounds and Black bag holds up to 200 loose shot-gun rounds.

L54-15773 \$19.95

Streamlight's Nano Light® LED flashlight is super bright (10 lumens), can be seen a mile away, is made of virtually indestructible machined aluminum with an anodized finish, is weatherproof, nearly weightless and fits on your keychain or zipper pull tab!

L54-19942 \$11.95

The Kershaw Nerve has 3-D machined G-10 scales that provide a great grip without roughing up your pocket. Jumping on the back of the handle and in the index-finger contour further enhances grip. It's made of 8CR13MoV stainless steel with CNC-machined G-10 scales, a liner lock, and a 3-1/8" blade.

L54-15391 \$19.95

## TARAN TACTICAL INNOVATIONS

The **TTI Magazine Extension** for MagPul AR-15 5.56 PMAGs is constructed of machined aluminum.

L54-15770 \$39.99

The **TTI Benelli Extended AccuGuide Carrier** is the first extended carrier ever manufactured from one solid piece of SAE 304 Stainless Steel, which eliminates the need for welding. It is heat-treated and polished, providing optimal performance. The Carrier features an extended guided rail on each side to assist in centering the round while reloading. It will provide you the speed and comfort of not having your thumb torn up after reloading. Compatible with: Benelli M1/M2/M3/SBE, Versamax.

L54-15769 \$79.99

L54-43240  
\$17.95

FOR MAGPUL MAGS ONLY

## MAGPUL QD SLING SWIVEL

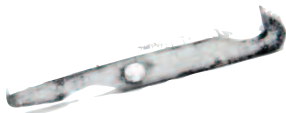

L54-43239  
\$14.95

## TACCOM, LLC .22 Rimfire AR Components

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

L54-19538 \$13.95

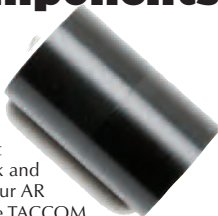

The TACCOM **Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

L54-19539 \$10.95

Does your .22 Long Rifle insert

move back and forth in your AR upper? The TACCOM **Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

L54-19533 \$7.95

## M-16/AR-15 BUTTSTOCK CLEANING KIT

In "MIL-SPEC Speak," this is a KIT, CLEANING, BUTT STOCK M16A2 RIFLE, which contains: ROD, CLEANING, SMALL ARMS: M11E3; CASE, SMALL ARMS ACCESSORIES; BRUSH, CLEANING SMALL ARMS; BRUSH, CLEANING SMALL ARMS: BORE; BRUSH, CLEANING SMALL ARMS: CHAMBER; AND BOTTLE ASSEMBLY LSA 5 OZ. It just doesn't get much more MIL-SPEC than that.

L54-15383 \$14.99

Adjustable  
M1/M1A  
Gas Systems

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

## Emergency AR(epar) Kit

Crucial Parts for Your AR-15

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring.

L54-19460 \$19.95

## Tac Latch

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/AR-10 charging handle. It works especially well for "flat-top" rifles equipped with low-mounted optics.

L54-10379 \$18.95

## Jerry Miculek AR-15 Compensator

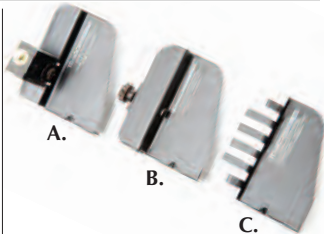

Jerry Miculek's three-chamber AR-15 Compensator fits threaded-barrel rifles and may be "clocked" for left- or right-handed shooters. Used by many top three-gun competitors.

L54-11328 \$49.95

## TRUGLO Tactical Sights

AR15  
Tritium/Fiber Optic  
Front Sight

L54-18626 \$69.95

TC-Accessories' AR-15/M-16 Brass Deflectors are CMP/NRA approved for service-rifle competition. Now you can pile your spent brass at your feet instead of wasting time hunting it down.

A. Standard AR-15	L54-12541	\$19.95
B. Flat-top	L54-12542	19.95
C. Removable Carry Handle	L54-12543	19.95

## KNS Precision, Inc.

Perma-Pin Firing Pin Retainer for M-16 and AR-15 replaces the standard cotter pin found in the bolt carrier to retain the firing pin (as in original Stoner rifles). Made of tool steel. No modification to gun required.

L54-19927 \$9.00

## AccuWedge

The AccuWedge fits between the upper and lower receiver on your AR-15, removing excess movement.

AccuWedge  
L54-19122 \$4.95

## AR-15 Extractor Upgrade

The AR-15 Extractor Upgrade increases the tension on the extractor, pushing it deeper into the cartridge extractor groove.

\$89.95

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic  
pictured here is NOT  
included with the  
Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle L54-25374 \$79.99  
Scout Scope Mount for SKS Rifle L54-25373 78.99

# A LONG WAY FRO

## The *Blue Press* Tour of **RUGER's** Prescott, Arizona Pistol Factory

By John Marshall

The fledgling firm of Sturm, Ruger & Company, funded initially by a stake of \$50,000 in 1949, had its humble beginnings in a red barn in Southport, Connecticut. Its sole product then was an innovative .22 pistol, the "red eagle" Ruger Standard. Today, many years later, the direct descendants of that pistol are still being made at an ultra-modern 250,000-square-foot facility in Prescott, Arizona. It was started up in April 1989, but with constant expansion and improvements, it's a far cry from how it looked then. While revolvers and long guns are made at other Ruger facilities, all Ruger semiautomatic pistols except the Ruger Charger (really a 10/22® made as a pistol) and the SR22 are produced in this plant in Prescott. *Blue Press* editor Mark Pixler and I were privileged to take a complete tour of the plant recently, and since most folks don't get that opportunity, I thought I'd share some of the many pictures I took there. I think you will be as impressed as we were!

On arriving at the plant, the first thing you will notice is a massive statue of a cowboy riding a bucking bronco. At the base of the statue is a plaque, which expresses Bill Ruger's guiding work philosophy. It's a quote by Fred Fellows, titled "An Honest Day's Work."

*In the vast reaches of the American West, the work ethic still exists. The man who makes his living on horses that are bound to buck earns his pay. A good hand is loyal to his outfit, meets a challenge, and takes pride in an honest day's work.*

The interior of the plant is not open to the general public due primarily to strict government regulations. So it was with great pleasure that Mark

and I obtained special permission from Ruger Product Manager Brandon Trevino to take a look around. We drove up to Prescott from Phoenix, and Brandon was there to greet us and walk us through. On entering, all people, both visitors and employees, must go through a security inspection.

Firearms are not allowed through, but knives are OK. We had to remove all metal objects before going through their metal detector, placing them in a tray, just like at the airport. Once we passed inspection, we signed in and were issued visitor badges. Eye and ear protection is mandatory, as the production floor is a very busy and noisy place. I was warned that I would not be able to photograph some areas, which were involved in yet-to-be-announced new products.

Brandon took us to his office, where he gave us an overview of how the plant operates. It's chock-full of computer-controlled automatic equipment that transforms raw materials such as bar stock into fully formed barrels, slides, receivers and other non-contracted smaller parts. The work is carried out by the hundreds of American workers employed at the plant. Although most functions are automated, the products also demand some skilled individual work involved in assembly, finishing and final testing. At any given time, there are multiple production lines, each turning out a particular pistol from start to finish. Every pistol is subjected to a proof load (heavily overloaded cartridge), test fired with a full magazine of ammo, and returned back for disassembly, cleaning, lubrication, re-assembly and final inspection. From there, the pistols go to the packing area where they are provided with accessories and literature and then boxed. The boxed guns are next palletized for shipment to one or more of Ruger's

# M THE RED BARN <sup>79</sup>

authorized US distributors. Ruger sells only to distributors, not directly to individuals or gun stores. While Ruger's marketing efforts are extensive, distributors do most of the actual selling – Ruger has a small national sales force.

While we were in his office, Brandon showed us a nice solution to a particular challenge with their lightweight aluminum-framed 1911 pistols. Modern hollow point ammo tends to chew up the feed ramps in aluminum-framed pistols. Cartridges slam into the ramp on the way into the chamber of the barrel from the magazine. Steel frames have historically withstood this battering fairly well, but aluminum frames have not. Ruger's solution was to insert a titanium feed ramp where the bullets strike the frame while chambering.

It's not usual, but if you have a problem with any Ruger pistol, you should definitely call their customer service department in Prescott. You will be treated courteously and pleasantly, and every

effort will be expended to see that your concern is addressed. If you need to send your gun in for examination, in most states (your state law may vary) it can be sent directly – no need to go through an FFL dealer. Ruger's objective is to return your gun within a couple of days.

Close by to the customer service phone people, several skilled technicians are examining and working on guns sent in for service. They are extraordinarily efficient, and are surrounded with the proper parts to get almost any Ruger pistol up and running properly again quickly.

Thousands of tools are needed to process the many parts that go into making the pistols here. The central clearinghouse for storage and maintenance of these tools is the tool crib. As old tools wear out, new ones are put on line to replace them, maintaining the necessary tolerances in the part produced.

*(Continued on Page 81)*

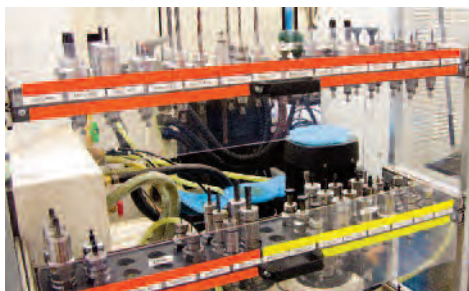

Ruger's aluminum-framed 1911 features a titanium feed ramp to resist damage from feeding hollowpoint ammo.

One of Ruger's customer service technicians examining and working on customer guns sent in for service.

CNC machinery on one production line, machining raw material into nearly complete major parts such as slides, barrels and frames.

Here is a small sampling of the tools needed to create a part. All are color-coded for their intended purpose.

Here you see the various stages of a frame being made for a Mark III stainless .22 pistol. At each stage, the dimensions are extremely critical; automated machines are exactly controlled by computers.

These are aluminum 1911 frames in various stages of completion at a drilling station.

Here is raw bar stock waiting to be transformed into 1911 barrels and barrel bushings.

Here we have nearly completed 1911 barrel and barrel bushing sets.

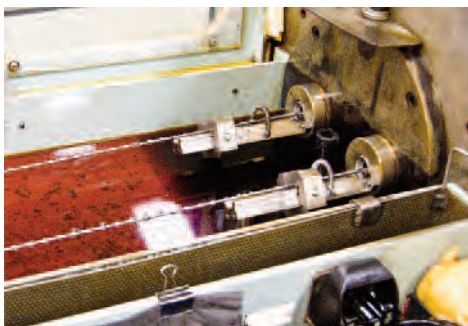

This station has more pipes than an oil refinery!  
It's a gas chamber heat-treating station. Different combinations of gasses are piped in to ensure specific heat treating parameters inside.

Shown on top of a cart of stainless steel bar stock is a nearly finished 1911 slide made from one of those bars.

This is a semi-finished stainless 1911 barrel and barrel bushing set. These parts are manufactured together, and remain as a mated pair until final assembly.

This station is a broaching machine for rifling pistol barrels.

This is one of a number of furnaces that heat-treat various components. In this case, it's accommodating pistol slides.

Here you see an employee removing a cluster of barrels from a furnace, where they have been heat-treated for a specific amount of time. They are then quickly quenched in a special liquid solution.

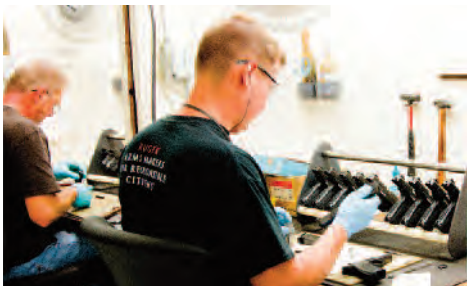

In spite of the fact that most of the manufacturing is done with automated machines, some handwork may be necessary. Here an employee is stoning the retraction grooves on a pistol slide. This gives a cosmetically more attractive product.

Additional handwork is required for final polishing. Here is where stainless Mark III frames get their luster.

This lady is doing the final assembly work on SR45 pistols.

These men are performing final fieldstripping, cleaning, lubrication and assembly after these pistols have been proofed and test fired.

Brandon Trevino stands next to a group of packaged guns, palletized and ready for shipment to the individual distributors. A good day's work!

This is the company's motto, proudly emblazoned on the shirts worn by many of the employees in Prescott.

*(Continued from Page 79)*

It was quite evident to us that Ruger's staff of workers enjoy what they do, are very passionate about the quality of their work, and are eager to please the buying public with their efforts.

Mark and I were reluctant to leave the plant, because we kept discovering new methods, processes and products that were quite fascinating. Checking out of the plant was the inverse of checking in, for once again all visitors (and employees as well) had to go through a metal detector. We had lunch with Brandon, thanked him sincerely for the tour, and then made the trek back to Phoenix. I hope these pictures will give you some flavor of what's inside that big Ruger factory next to the Prescott Airport!

# Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics. The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll. The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

## Black Scorpion Outdoor Gear Mag Holders

The Storm Competition Mag Pouch (above, left) is lightweight, strong and durable. Designed for the competitive edge expected by the best, it features nylon construction, carbon fiber finish, and is IPSC & USPSA compliant. Features fully adjustable 360 degree rotation with an access hole for easy setup and adjustment.

The Magnetic Mag Pouch (above, right) is designed for easy access and quick release of your magazine. It has an incredibly strong magnet (holds up to 10 pounds) with a rubber coating on top to protect your magazine from scratches.

SPEED  
 BREAK  
 MEET  
 NEAT  
 BREAK

Clean your handgun at speeds in excess of 1100 fps with new Copper Fouling Eraser (CFE™) Pistol powder. Because the simplest way to wipe out fouling is to not let it build up in the first place.
