# DESIGNED WITH THE TOUGHEST STANDARDS IN MIND BUILT TO PERFORM IN THE HARSHTEST CONDITIONS

## RUGER AMERICAN PISTOL™

Anything Else Would Be Un-American.™

Designed with the latest U.S. Military standards in mind, the **Ruger American Pistol** is built to perform in the harshest conditions. A true American innovation, this pistol was developed through a rigorous "Voice of the Customer" process—where numerous law enforcement and military trainers, firearms experts, distributors and retailers provided input, feedback and testing in the determination of the form, function and features of this firearm. The resultant new pistol is a revolutionary platform for Ruger, one that utilizes the combination of a recoil-reducing barrel cam (which is designed to better spread recoil energy over time) with a low mass slide, low center of gravity and a low bore axis to provide an unparalleled shooting experience.

# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$48.95 each.

# We READ Our Mail!

Long before I was a gunner, I was an aviator. When I saw your February 2017 *Blue Press* with the great pictures of Mr. Dillon and the P-40, it was clear to me that he had the "Right Stuff" in some things that really matter: guns, airplanes and business. Please accept my condolences. Mr. Dillon was a great man who will be missed by all. If there are more photos of his flying and airplane interest posted online, I would greatly appreciate a link. There just isn't anything flying that's higher on the food chain of civilian airplanes than a classic P-40 Warhawk. While not a reloader, I much enjoy your *Blue Press*.

Stephen Power – Vacaville, CA

I had heard about the great customer service Dillon provides to their customers and I experienced this great service myself today. I called to order a new powder funnel for my XL 650 machine because I ruined mine by polishing it incorrectly. Your man Gary said he would ship me a new one for free! I fully intended to pay because it was my fault the funnel was not working anymore. Blew me away! I can't thank Dillon enough for the excellent equipment you manufacture and the great service you provide to your customers.

Mike Waite – Camdenton, MO

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550C

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

## DON'T FORGET ONE OF THESE!

Universal Mounting Hardware Kit

N67-14355 \$5.49

# SHOT Sh

By Peter Caroline

This year's SHOT Show was a great two-for-one deal: all the latest new guns and gear PLUS a welcome presidential inauguration. Fortified with naproxen sodium and Good Feet arch supports, I embarked on my annual tour of 15 acres of firearms goodness.

My first stop was at the Hudson Manufacturing Company ([www.hudsonmfg.com](http://www.hudsonmfg.com)) booth, where they were displaying their new 9mm all-steel semiauto pistol. From the trigger rearward, this would remind you of the Colt Model 1903 Hammerless Pocket Pistol. The trigger itself has a Glockish safety insert and a tiny bit more than a tenth of an inch travel. The magazine has a 15-round capacity. It's one of those rare efforts that "just feels right" in the hand. Alas, like many new arrivals, it won't be available for a while.

Today, an original Wehrmacht Sturmgewehr 44 can set you back at least \$25K. Fortunately, Hill & Mac Gunworks ([www.hmgunworks.com](http://www.hmgunworks.com)) can fix you up with a brand new iteration...in the original 8mm Kurz or 5.56/.223, 7.62x39 or .300 BLK. MSRP is \$1,799.99. If you miss those days on the Eastern Front, here's a trip down Memory Lane.

I spotted another *Alte Kamerad* from The Big One at the ATI ([www.americantactical.us](http://www.americantactical.us)) booth. Their MP40 pistol in 9mm Luger has a 10" barrel and 30-round magazine. Semi-auto only, but it has the weight and appearance of the original "Burp Gun." The first 400 will even have their own wooden case.

When I first spotted the S-333 derringer at the Standard Manufacturing ([www.stdgun.com/s333](http://www.stdgun.com/s333)) it reminded me of a classic Mossberg Brownie in drag. Actually, it's a volley gun with a six-round capacity, firing two .25 ACP cartridges with each trigger pull. Available in black, green, pink or gold for about \$300.

Kel-Tec ([www.keltecweapons.com](http://www.keltecweapons.com)) always has new toys with which to tease us. This year's offering includes the new RDB Survival bullpup in 5.56x45...only 26.1" overall with a 16" barrel, five-pound weight, downward shell ejection and ambidextrous operation. Kel-tec also debuted the KSG-25 bullpup pump shotgun, with increased capacity, up to 24+1 rounds of 2.75" shells or 40+1 rounds of 1.5" shells.

# ow 2017

The Heizer PKO-45 ([www.heizerdefense.com](http://www.heizerdefense.com)) is an unusual little 25-oz. semiauto pistol that holds 5+1 rounds of .45 ACP, or 7+1 rounds in an extended magazine. The recoil spring-over-barrel design is reminiscent of the vintage Bayard and FN 1900 designs. Heizer also has a 9mm Luger version in the works.

Remember Caracal? ([www.caracalusa.com](http://www.caracalusa.com)) Now they are back, actually manufactured in U.S.A., with a line of 9mm pistol and MSRs. I checked out the Enhanced F (EF) 9mm pistol with their innovative Quick Sight system. This appears to be a very well put-together pistol with an MSRP of \$599.

Winchester Repeating Arms ([www.winchester-guns.com](http://www.winchester-guns.com)) had an impressive display of newly crafted Models 1866 and 1873. The prices will make you cry but damn, they're beautiful!

At last year's SHOT Show, Kimber ([www.kimberamerica.com](http://www.kimberamerica.com)) introduced their stainless six-shot K6 revolver in .357 Magnum. Very nice indeed. This year, they expanded the line to five variations with a choice of finishes, sights and grips, all very plush. For those who would prefer a less-than-lethal alternative, Kimber displayed their Pepperblaster®II, which propels two separate blasts of oleoresin capsicum at 112 mph up to 13 ft.

One can always count on the nice folks at North American Arms ([www.northamerican-arms.com](http://www.northamerican-arms.com)) for something intriguing in the realm of lethal jewelry. This year, I spotted a tiny (3-5/8" OAL) five-shot .22 Short revolver, gold-plated and highly polished, with white pearl grips. It weighs but four ounces, and would barely put a bulge in a well-fitted ball gown.

As usual, the Ruger ([www.ruger.com](http://www.ruger.com)) booth was all about NEW...new pistols, revolvers and

# BL 550 Dillon's Basic Loader

**\$274<sup>95</sup>**

**N67-15399**

Reloading Dies and Caliber  
Conversions sold separately  
(see the back of the order blank  
in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount N67-22051 \$49.95

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**N67-16627, \$84.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**N67-20302, \$25.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**N67-20251, \$92.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**N67-21353, \$31.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**N67-22120, \$31.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: N67-16629, \$19.95**

**Oversize Die: N67-16626, \$19.95**

**Plastic Funnel: N67-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (*Requires the use of an RL 450 powder die – see below.*)

**N67-20029, \$23.95**

**RL 450 Powder Die:**

**N67-20308, \$21.95**

# RL 550C

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for ONLY...

**\$459<sup>95\*</sup>**

**N67-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

## Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

|----------------------|------------------|-----------------|

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

## Hornady's O.A.L. Gauge and Bullet Comparator

### Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy.

Straight N67-14622 \$38.95  
Curved (for auto, lever and pump rifles) N67-14862 \$39.95

**Modified Case (required)**  
\$6.99 each

|                     |           |

| .270 Win.           | N67-14641 |
| .270 Win. Rem. Mag. | N67-14648 |
| .308 Win.           | N67-14652 |
| .30-06              | N67-14653 |
| .300 Win. Mag.      | N67-14655 |

(Caliper not included)

### Bullet Comparator

Correct bullet seating depth is critical to accuracy. In addition, minor variations in bullet seating depth will have an effect on both pressure and velocity.

Bullet Comparator N67-14670 \$16.95

# Dillon's Case Preparation Equipment

**CV-2001 N67-20493 \$189.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750 N67-19455 \$145.95**

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator N67-20675 \$75.95**

**CM-500 Case/Media Separator N67-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers: Case Cleaners are available in 220 volt!

**Euro CV-2001 N67-22047 \$214.95**  
**Euro CV-750 N67-19473 \$170.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

| 8 oz. bottle. | <b>N67-13804</b> | <b>\$8.95</b> |
| Case (20 pc.) | <b>N67-20255</b> | <b>135.95</b> |

## Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

## Super 1050/RL 1050 Short Trim Die Toolhead

**N67-62219**  
**\$224.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. *(NOTE: the Blue 1050 toolhead stand - Part Number N67-62200, \$49.95 - is not included.)*

# Dillon's New Rapid Trim 1500 Case Trimmer <sup>23</sup>

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **N67-62164** is **\$330.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **N67-13141**, are **\$19.95** each. Upper lock rings, **N67-13559**, are **\$4.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# Dillon's Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle

### Conceal-Carry Performance Series

CARRY the gun you shoot the most! The revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. The others are strong-side only.

## Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

## THE WILDERNESS TACTICAL PRODUCTS

### The Wilderness' Original Instructor

Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original. This belt is a favorite with law enforcement, military personnel, fire-

fighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

## Close & Ready Holster Caddy

Holster NOT Included

The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

N67-18046 \$29.95

## DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

N67-19371 \$29.99

# BLADE-TECH™

## "Revolution" Holster Series

Blade-Tech used its extensive knowledge of Kydex® holster-making to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

## Dillon's Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*

# ANNOUNCING: Mr. Bulletfeeder® by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

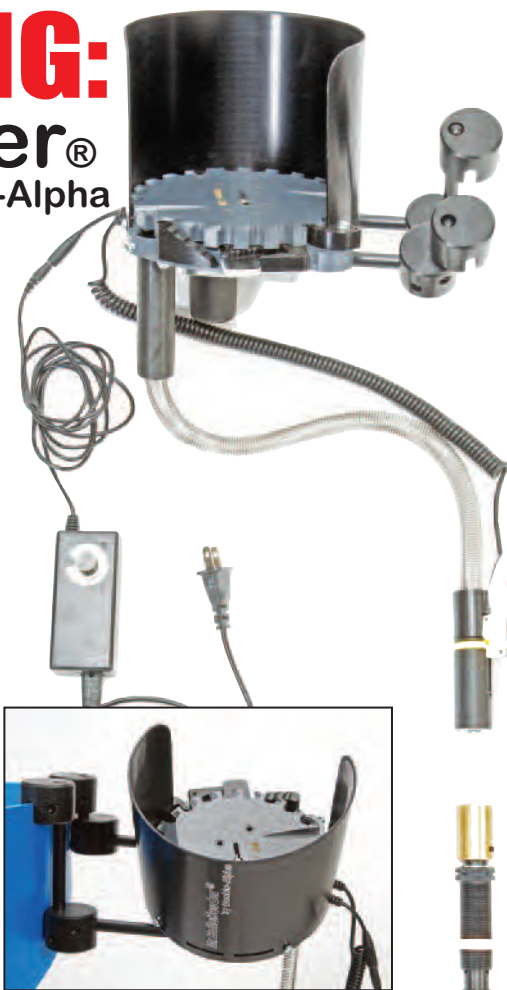

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the case-feeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

## Mr. Bulletfeeder® Replacement Parts & Spares

Having separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

The Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collar to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

Use a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

# Dillon's Pistol Die Sets

## Size Die

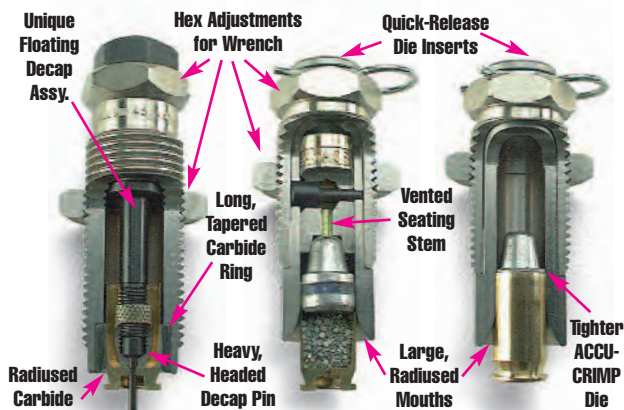

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

## Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

## Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

## Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

### Dillon Rifle Dies (Three-Die Sets)

|                    |           |         |
|--------------------|-----------|---------|
| .223 Remington     | N67-10839 | \$68.95 |
| .308 Winchester    | N67-15574 | 68.95   |

# The Inaugural 2017 Visi

## By Cameron Benz

I'd never shot a USPSA-type match. Previously, really all I'd shot had been steel matches and a few IDPA matches over the years. It may have continued that way, but then I got notice that Jeff Snope, a local three-gun competitor, was organizing an outlaw USPSA-esque night match to be held at Paul Bunyan Rifle and Sportsman's Club in Puyallup, Washington, on January 21, 2017. I signed up immediately. I needed more night-shooting experience and this was a way to get it. I also enjoy shooting with Jeff as well as his co-conspirator on this project, local USPSA Grandmaster, Scott Pries.

The 50-position roster for the match filled up in very short order. The day of the match, during registration, Vision X had a grill set up and had people cooking dogs and burgers. Due to this being a night match, headlamps, weapon lights and lasers were allowed.

Shooter's meeting was brief and started about 5:40 pm. Due to range rules, shooting needed to be complete by 9:55 pm.

Stage one was dubbed "Midnight Donkey Kong," presumably due to the number of stacked barrels involved. Barrels were stacked on their sides with two hollow buckets arranged to allow engagement two of the three obscured silhouettes straight on, but required offsetting oneself to one side or the other to get the center target. One stack was on the left side of the bay and the second was on the right side. Then it was a quick run to a knee knocker at the back of the bay to engage eight silhouettes at close range. It was a fast stage where the quickest shooters kept mov-

ing instead of planting and shuffling at the barrel walls. I was happy with my hits on this stage but not my time. Keeping moving on this stage was definitely a better plan than my "plant and shuffle laterally" at the barrel walls.

Stage two, named "Sub-Mariner," was illuminated in red, to mess with the red laser users. From the start box, shooters had to open an unlatched door, which would trigger a drop turn target on the right side at about seven yards. The door separated box A from shooting area B was a several-yard-long lane oriented with the depth of the bay, flanked on both sides with USPSA silhouettes (three left, two right) and terminating a handful of yards from a couple of more silhouettes as well as a half-dozen pepper poppers. It was a fun, fast stage and was, coincidentally, my first stage of the match.

My approach to the stage was to smash the door open with the muzzle of my Glock. Since there

was no penalty for missing the drop turn, I told myself I was going to skip it. It sounded like a good plan, but apparently my impulses had other ideas and I attempted it anyway, to no avail. I also totally forgot my attached weapon light was there once the buzzer went off and ended up shooting the entire stage in the dark. This would be the stage I did the worst on.

Stage three was "Pro Am Hero." This was a pro-am style stage illuminated with a black light to make the fluorescent orange, yellow, and green paints glow. There were 31 steel plates in total. Six pepper poppers, painted fluorescent green, on the left, corresponding to box A. A rack

**USPSA Grandmaster Scott Pries shoots stage 5 while Jeff Snope runs the shot timer.** Photo courtesy of Josh Reed.

# on X Night Match Classic

37

of six steel plates, painted fluorescent orange, corresponded to box B. And on the right were six small pepper poppers painted fluorescent yellow. In front of those (closer to the shooter) was a mix of plates and pepper poppers that could be shot from any of the three shooter's boxes, but the rear array had to be engaged from the color matched shooter's box. Par time was 28 seconds and we were limited to 10 rounds in each magazine plus one in the chamber to start. Approach was pretty much shoot everything you could and reload while moving between shooter's boxes. Very few managed to hit all the steel.

Stage four was named "You Ruined My Night Vision." Illumination was in green to mess with anyone running a green laser. Shooter's box was oriented left to right as were two of the walls. Starting from a centrally located barrel on the buzzer with pistol at low ready, shoot-

ers moved to wherever they wanted to start in the box. Most started on the left side where they found a solo leaning target right behind the wall to their right, then two USPSA silhouettes at about five yards straight out with a no-shoot connecting them in the middle. Roughly ten yards out there was an array of four small pepper poppers. Moving to the right along about three yards of wall, there was a roughly three yards gap between the walls. At this point, the stage opened to another silhouette hiding behind the wall at essentially point blank range. At about six yards straight out there was a pair of silhouettes. Going back to about nine yards and offset slightly to the right, there were four pepper poppers with a Texas star located immediately in front of one of them. Back

to the center of the stage at about 10 yards, there was another set of two silhouettes separated by a no shoot. Moving laterally past another four yards of wall, revealed two more silhouettes at about five yards at the far right of the stage.

Strategy for this stage was basically hit stuff quickly and cleanly. I believe there was an advantage to starting on the left hand of the stage as it opened the center short-range target to being hit on the approach, which wasn't an option for someone moving from the right hand of the stage. The pepper popper obscured by the Texas star didn't end up being as tough as I had expected. This

**Evan Tisler of the Rainier Arms Shooting Team makes his final checks before running stage 3.** Photo courtesy of Josh Reed.

was also my first experience with a Texas Star and it went better than I expected though it did require about four more shots than ideal.

Stage five was named "Back the Blue." This was a three-gun stage. On the left side of the bay at about 10 yards was a plate rack of six

plates, about 40 yards out in the center were five pepper poppers, and off on the right about 15 yards, were five silhouettes with two no shoots mixed in. Plate rack was to be engaged with a shotgun loaded with eight rounds, the pepper poppers were to be engaged with a pistol-caliber carbine (this one was actually in pistol configuration) loaded with nine rounds, and the silhouettes were to be engaged with the shooter's own pistol. All guns were on a table at the start. Stage started with shooter behind a "car," with flashing red and blue lights and placed on the far left side of the bay, with fingers interlaced behind his back. Also, we could have the weapon lights on the shotgun and the

**California Competition Works' Tandem Tactical Strippers** can be used to hold either shotshells or AR-15/M4/Mini 14 magazines, or a combination of both by installing or removing the aluminum spacers provided with each stripper. The Tandem Tactical Stripper holds a maximum of eight rounds of 12 Gauge (10 rounds of 20 Gauge) shotshells or two AR-15/M4/Mini 14 magazines. Each Tandem Tactical Stripper features a BLADETECH Tek-Lok™ Universal Belt Clip, four removable aluminum spacers, and the screws and Allen wrench required to install them.

Tandem Tactical Stripper

N67-00303

\$55.00

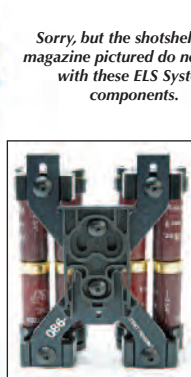

California Competition Works' Tactical Strippers are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum\* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84 attachment device (C. & D.) that will accommodate up to a 2-1/4" duty belt.

# CLASSIC FIREARMS: The French

By John Marshall

In World War I, or as it was known then, the “Great War,” American troops in France lacked a full-automatic weapon that was easily portable in combat. In 1917, the splendid Browning Automatic Rifle (BAR) had yet to be finalized for use. The French, however, had a “machine rifle,” the Model 1915 Chauchat, firing their 8mm Lebel cartridge. American military leadership therefore opted to take what was available. They purchased and distributed large quantities of the Chauchat. This gun was soon modified by the French to chamber the U.S. standard .30-06 round. The experiences our troops had with these guns resulted in the “Sho-sho” or “Shoo-shoo” being characterized as the worst automatic weapon ever fielded in combat. Here, we will explore the history of both the little-known firearm and its unsavory reputation.

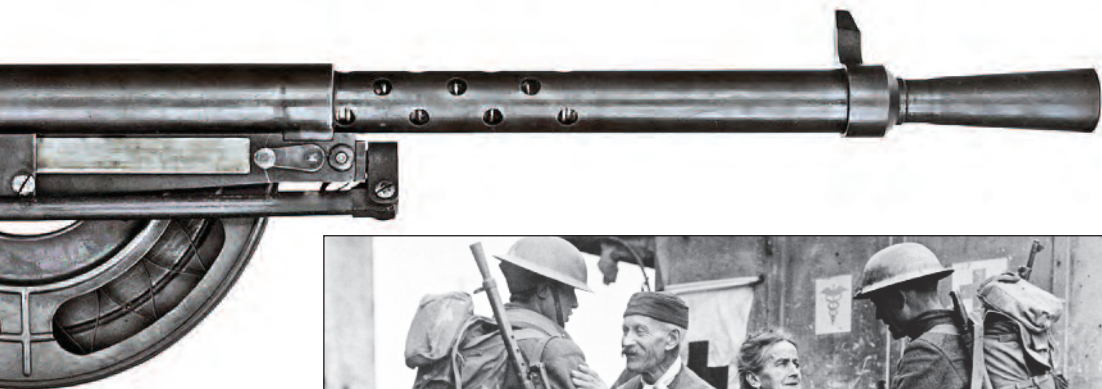

Interestingly, this machine rifle (or light machine gun) had its probable origins with John Browning, who in 1900 secured a patent for a long-recoil action. This was the basis for the Remington Model 8 semiautomatic sporting rifle. In this system, in firing, the barrel recoils quite a distance to the rear. This arrangement was evidently the inspiration for the creation of the Chauchat, named for its prime designer, French Colonel Louis Chauchat. It became the only full-automatic weapon ever actuated by long recoil. Its final official designation in French was “*Fusil Mitrailleur Mle. 1915 CSRG.*” The first three of the initials are for the last names of the three originators, Chauchat, Charles Sutter, and Paul Ribeyrolle. The last initial stood for its manufacturer. The Gladiator Cycle Company, located in *Le Pre-Saint-Gervais, Seine*, a northeastern suburb of Paris, had primarily manufactured bicycles, motorcycles and cars. Another French company, Sidarme, a steel-forging plant in *St-Chamond* (near *Saint-Etienne*) also produced the Chauchat later in WWI.

The Chauchat was a selective-fire weapon firing from an open bolt. The barrel, which was sleeved

and equipped with aluminum cooling fins, was enclosed (perhaps too tightly) by a tubular jacket with some cooling holes. A conical flash hider was installed at the front of this jacket. The jacket front also served as a recoil booster for the barrel, using powder gasses pushing against the muzzle. The barrel assembly reciprocated in the long jacket. An extension of this jacket also served to guide the bolt, the head of which rotates with two locking lugs at its front. Locking and unlocking rotation is initiated by cam tracks in the bolt body, acting on projections in the bolt head. There are two return springs, one for the barrel and one for the bolt. At the end of the barrel’s recoil, the bolt is held by the sear, but the barrel returns forward, while the bolt unlocks in the process. In full-auto mode, as long as the trigger is held to the rear, this process is repeated, allowing the bolt to go forward when the barrel stops, chambering and firing a round. The trigger system in the lower receiver is very complex. The gun is fed with an unusual 20-round single-stack semi-circular magazine. Its shape is necessitated by the severe taper and rim of the 8mm Lebel cartridges. The right side of this rather flimsy magazine is open, purposely designed that way to save weight and provide a visual check on the remaining cartridges. The gun is provided with a short wooden buttstock, a separate pistol grip, and a vertical fore grip just in front of the trigger guard. There was a lightweight folding bipod at the front of the lower receiver. A three-position rotating selector lever was located on the left of the receiver, just above the pistol grip. Pressed horizontally forward, the weapon was on safe. The vertical position allowed semiauto fire. Turned horizontally rearward, full-auto fire was chosen.

A total of 262,300 Chauchats were made between December 1915 and November 1918, of which most were chambered for the 8mm Lebel round. Roughly 19,000 were chambered in .30-06 for the Americans, and this version was called the Model 1918.

# Chaucat Machine Rifle

**World War I “doughboys” in France, equipped with a Chauchat machine rifle and a U.S. M1903 rifle, are greeted warmly by liberated French civilians.**

The Chauchats were quickly damned by the Americans as unreliable. Probably most of the malfunctions were the fault of the magazine, which admitted dirt, mud, debris and water, leading to feeding jams. The thin walls of the magazine were also very susceptible to deformation and denting, making cartridge feeding impossible. With normally weak magazine springs, gunners often loaded their magazines with only 16 to 18 rounds to prevent a common first-round failure to feed. Additionally, when the barrel assembly heated up in firing after four or five magazines, it expanded, jamming it against further motion inside its tight jacket until it cooled down. When the gun fired, the long-recoil action made for heavy recoil, and the end of the receiver was dangerous to the face of the firer unless his head was held forward and at an angle. Sights were almost always significantly misaligned in manufacture. The ejection port had no cover, and was a bad entryway for dirt, mud, water and debris. The action parts had loose tolerances, as they were usually made by semi-skilled subcontractors with little attention to precise dimensions and quality control. The parts often tended to disassemble themselves with even moderate firing, as the sideplate was secured by screws that vibrated loose easily. Seeking to clean their guns frequently, our doughboys probably broke or injured a lot of fragile parts in the action – and replacement parts were not interchangeable even if they were available or taken from cannibalized guns.

To add further insult to injury, those chambered for .30-06 had very tight and slapdash chamber

dimensions. As our service cartridge was not as tapered as the French 8mm Lebel, this made extraction even more difficult, particularly from even moderately hot barrels. The guns made for the American round accepted 16-round vertical single-stack magazines, a great improvement over the French versions, but because of randomly varying chambers, jams persisted. The flimsy bipod had a tendency to fold at the worst possible times. The gun was unbalanced and muzzle-heavy when using the close-mounted fore grip in walking fire. From the hip, the gun needed to be held very firmly for it to function properly, similarly to most recoil-operated pistols. The rate of fire was quite slow (about 240 rounds per minute) when the gun did work. The clumsy magazines were not easily changed out. The gun weighed a hefty 20 pounds, and although it was designed to be crew-served, it was almost always fielded by individual soldiers without assistance.

U.S. field manuals were issued in very limited numbers; so few soldiers really understood their

# SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

N67-21894 \$44.95

## Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

N67-17519 \$9.99

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

N67-19972 \$39.95

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms.

Made in the USA and comes with a lifetime warranty.

Berry's Mfg. Clear Ammo Can

N67-17518 \$9.99

## Dial Caliper

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

N67-13462 \$28.00

## High Tech Digital Caliper

**Accurate,  
Easy to Read!**

N67-17171 \$39.95

## Bullet Puller

Nobody's perfect. A bullet puller makes it easy to recover all your components.

Bullet Puller N67-17999 \$29.95  
Puller Cap N67-17948 4.95  
Collet Set N67-17947 5.99

PCC turned on, but not on the handgun. On the start buzzer, move right to the table and engage the plates, poppers, and silhouettes in whatever order the shooter chose.

My strategy, after watching some of the experienced three-gun guys, was to set the shotgun up to illuminate the plates and the poppers and the PCC to illuminate the poppers. I also placed my Glock 19 in such a way that the muzzle was already pointed at the silhouettes I needed to engage with it. My plan had been to engage with the shotgun first, return it to the table with the light pointed at the poppers, grab the PCC and engage the poppers, then move to my pistol and put down the silhouettes. What I failed to foresee was that there would be a lot of smoke after engaging the plates on the plate rack. This made seeing the pepper poppers very challenging. I could barely make out their outline in the smoke. When I touched the first shot off and heard the ring of steel, I was quite pleased as I may as well have been shooting at ghosts. The pistol portion went well with the exception of a just barely winged no shoot. The only no shoot I hit the entire match. This stage reminded me that I definitely need more time on a shotgun as I left a plate standing, sadly. I hadn't run a shotgun in years and it showed. The PCC portion went well enough for me however I was very annoyed with myself for clipping the no shoot on the pistol portion.

As far as my equipment goes, I found myself less than pleased with the tritium front sight, as

it was virtually unusable during this match. When I remembered to use the weapon light, it helped more than the tritium did as it helped give a sharp silhouette of the front sight. I had some concern that the KKM Precision compensator would leave me seeing spots by directing the muzzle flash up into my night vision but that proved to be a non issue even with the Winchester factory ammunition I chose to use in the match. Some of the other competitors commented that they saw the flash but I never noticed it. Outside of the sight issue, I have no equipment complaints.

Of the various matches I've shot – which is admittedly few – this has been the most fun. I was told that it being a night match was enough to send some USPSA shooters running for their safe spaces. Oddly, the fact that it was a night match was the part that appealed to me the most. Considering my lack of experience in this style of shooting, finishing 35th overall and sixth in my division wasn't a bad showing.

I'd like to say thank you to Jeff Snope for his efforts in putting the stages together; Vision X Lighting for all their efforts including providing food during registration; Rainier Arms for prizes and also for the pistol caliber carbine used in the three-gun stage; and lastly Winchester for providing the ammunition I used during this match. The 2017 Vision X Night Match Classic: the most fun you could have in the dark with your clothes on.

## The French Chauchat Machine Rifle

*Continued from Page 45*

strange French weapons. In short, the Chauchats were almost universally despised and cursed by the Americans. They were often ditched on the battlefield in favor of our Model 1903 and 1917 rifles and the Model 1911 .45 pistol. One Great War veteran I've read about claimed to have abandoned his "damned jammed Chauchat" and used his reliable .45 instead to survive a German attack. He was pleased that General Pershing had insisted on most of his men having handguns.

A bit late (September 1918 – just prior to the Armistice in November), the new Model 1918 Browning Automatic Rifles were issued to the Americans, and the Chauchats were quickly replaced. Unfortunately, the Browning guns did not get much distribution before the war ended.

From the Records of the Automatic Arms Section of the American Expeditionary Force on the status of automatic rifles in France as of September 8, 1918: "At the present time 18 U.S. divisions have been equipped with the Chauchat. No more divisions will receive this weapon in the future. At the present time there are nine U.S. divisions equipped with the caliber .30

Chauchat. However this gun has proved to be not at all satisfactory, the cartridges sticking in the chamber after the gun becomes slightly hot. For this reason the gun has been issued as an emergency weapon and will be withdrawn as soon as the Browning Automatic Rifles are available. At the present time 27 U.S. divisions have been equipped with the Chauchat Auto Rifle, and two divisions with the British are using the British .303 Lewis machine guns. All divisions over and above this number have been equipped with the Browning Automatic Rifle."

Today, the Chauchat machine rifles are little known, but as they were actually issued to our troops in WWI, they were an important part of our armament at that time. When they are encountered and recognized today, their reputation for unreliability is often mentioned – a curse that will probably never go away. The Browning Automatic Rifles that replaced them in our services accrued a sterling reputation, and were indispensable during World War II and Korea. Reliable, robust and accurate, they got the praise the Chauchats were never able to earn.

# Gun Control at Home

By **Thomas I. Mason**

What do Bloomberg and the gun-control crowd have up their sleeves?

Did Hillary conspire with the UN when she was Secretary of State to take your guns? These are a few of the questions that my co-author David Keene and I try to answer in our new book *Shall Not Be Infringed: The New Threats to Your Second Amendment*.

Keene is the former President of the NRA and one of the most experienced defenders of the Second Amendment in the US. I have represented the NRA and other firearms groups for the last 20 years at the United Nations.

The book is in two parts. In Part I, David reviews the current state of US gun-control politics – not promising in an era where Democrats and Hillary made gun control a major issue in the presidential campaign and Michael Bloomberg is sinking tens of millions of dollars into state and local gun-control initiatives. The strongest gun-control threat now is coming from the state/local level and ironically from the international arena.

In Part II, I examine the 20-year history of gun control at the UN which reached its peak (but hardly a conclusion) in 2013 with the adoption of a so called Arms Trade Treaty (ATT) which covers everything from pistols to aircraft carriers. It is also the Treaty in which Hillary Clinton gives away American's Second rights.

Before revealing the sordid story of the Treaty, let me review the history of gun control at the UN and spice it up with one of the personal experiences I include in the book. A most interesting incident was when the UN supported the arming of the rebels in Libya. An official from the UN Department for Disarmament Affairs asked if there any way gun manufacturers could make a firearm that would self-destruct in six months! The only answer I could give was, "I'll get back to you."

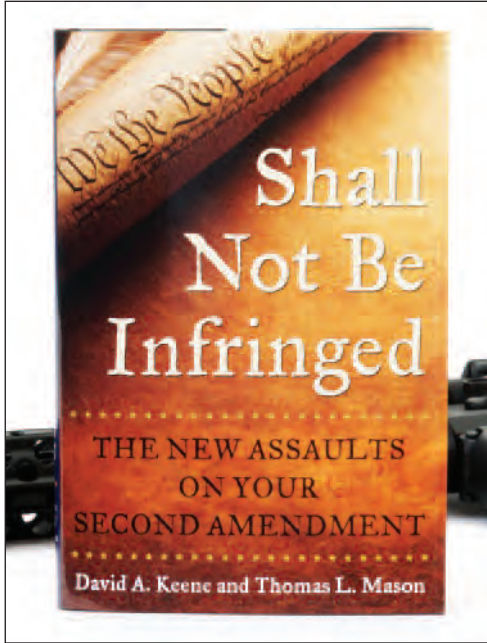

Gun control became an issue at the UN around 1995 with the supposed end of the Cold War and the threat of nuclear conflict. Left-wing groups and leftist governments needed a new issue and the

adoption of the Land Mine Treaty gave them a model. These factors, combined with tragic events like Dunblane and Columbine, drive the issue at the UN. Gun-control groups found in the organization a friendly forum and quickly became UN "Non-governmental organizations or NGOs." They were soon financed by the likes of George Soros. Contemporaneously, the NRA became involved at the UN and joined with firearms groups from other countries to form the World Forum on Shooting Activities or WFSA.

The UN is different from Congress or the state legislatures – to lobby or even speak at meetings you must be an official UN NGO. NRA got NGO status in 1996 and the WFSA was approved in 1997. The NRA maintains a strong presence at the UN and encourages participation of other gun groups through the WFSA. It has approximately 50 member associations and its headquarters is in Rome, Italy; firearms, ammunition and component manufacturers' trade associations are also members. In addition to representing the NRA at the UN, I am the WFSA Executive Secretary for the Americas. My European counterpart is Mauro Silvis from Italy.

The WFSA has its annual meeting at Germany's IWA trade exhibition (essentially the European SHOT Show) in March. The annual Board meeting rotates around the world and was held it in October 2016 in Arizona. We were fortunate enough to have Dillon Precision sponsor a dinner.

The Arms Trade Treaty (ATT) is the crown jewel of the international anti-gun movement and presents a danger to firearms owners throughout the world. The original concept was that governments would be prohibited from exporting arms to human-rights abusers. The US is not a party to the Treaty, but it went into effect in 2014. From the start it was evident that states would not allow it to limit their ability to sell arms if selling involved their national interests *real politic*. Countries that supported the Treaty are now ignoring it.

# and the United Nations

The only target left of the ATT is civilian firearms. The Treaty is chocked full of dangerous provisions, and the US is not a party but there may soon be an effort to prohibit the importation of firearms into the US by Treaty parties, based on the incredible theory that the lack of gun control in this country is a human-rights abuse!

This could all have been avoided if Hillary Clinton hadn't betrayed American gun owners. During early ATT negotiations the Bush administration's representative, Ambassador Don Mahley, got an exception to the Treaty for firearms held under "national constitutional protections," i.e., the Second Amendment. This language was in all the original ATT resolutions and was a top priority for the NRA. I represented the group during the negotiations and pleaded with the Clinton's State Department to keep the exception in administrations. Ambassador Mahley, demoted in the US delegation, warned me the US was abandoning his language. He was right – American gun owners were ignored. (Mahley died of pan-

creatic cancer in 2014.) It was later that we found out that we were not only ignored, but were deliberately betrayed because of who we were and what we represented.

One of the most fascinating revelations in *Shall Not Be Infringed...* is the chapter on Hillary Clinton's e-mails. It is well known that thousands of e-mails were released as part of the Benghazi investigation. Eleven e-mails between Clinton and her staff discussed the ATT. We now know that Clinton actually worked with the gun-control groups supporting the ATT. She specifically identified the NRA as the enemy to be defeated because of our concern about civilian firearms being included in the Treaty. We had assumed that she would at least listen to our case.

The election of Donald Trump is good news for gun owners, but don't kid yourselves that the threat is going away. If you want to know more, purchase a copy of *Shall Not Be Infringed...*

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**N67-50050, \$399.95**

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**N67-50075, \$869.95**

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

**N67-50125, \$77.95**

### EXTRA "BFR" TOOLHEADS

**N67-19831, \$179.95**

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**N67-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

**N67-50001, \$329.95**

### E.(1) PRIMING CONVERSION

Converts Swager to Priming System.

**N67-50003, \$76.95**

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

**N67-50002, \$329.95**

### F.(1) SWAGER CONVERSION

Converts Priming System to Swager.

**N67-50004, \$76.95**

.50 BMG Powder Measure

**N67-21896, \$114.95**

.50 BMG Seat/Crimp Die

**N67-21895, \$139.95**

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner **N67-10252 \$24.95**

## Dillon's Bench Wrench Fits 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

## GLOCK® Field Knife

N67-15483  
\$29.95

Become a master at using a Mildot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

N67-14762 \$29.95

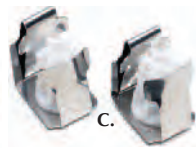

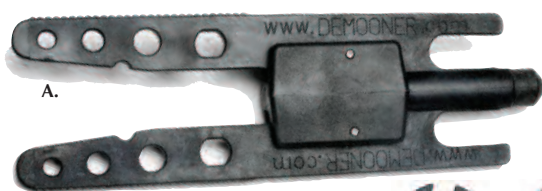

## TARGET SPORTS® TACTICAL

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

## California Competition Works<sup>57</sup> .22 LR Speedloader

**California Competition Works' 10-Round Speedloader for S&W Model 617 .22 LR Revolvers** is ideal for Steel Challenge or Ruger Rimfire Series competition. The speedloaders are machined from 6061 T6 aluminum, then black anodized. The Loading Block (inset photo) is CNC machined from polymer and holds 120 rounds of .22 LR ready for insertion into speedloaders.

# Arredondo Accessories' Extra-Capacity F

By Duane Thomas

When MagPul introduced their new polymer PMAGs for GLOCKS, this was an event of great importance to GLOCK enthusiasts. And God knows there are enough of us. There had been aftermarket GLOCK magazines before, but they were famously unreliable trash. To have MagPul, well known for producing reliable, durable, quality polymer magazines for AR-15s and other rifles do the same thing for the most popular self-defense handgun platform, bar none, was a big deal. The MagPul GLOCK PMAG costs half a factory GLOCK mag, and works. The first question out of the mouths of everyone to whom I mentioned these magazines was, "Will they take the various aftermarket extra-capacity floorplates?" The answer was no, the PMAG uses a very different floorplate-to-mag-tube interface system. Enter Arredondo Accessories. MagPul is famous for doing great polymer magazines; Arredondo is famous for doing great extra-capacity magazine floorplates (See Page 59).

Arredondo's extra-capacity floorplates are very distinctive; there is a consistent design philosophy at work here. The actual designs may differ in their particulars, but they will always be (a) simple, (b) secure and (c) durable.

A bit about that "simple" part. When I say that, I mean the designs will be elegant with no excess foo-foo about them. And while straightforward, the way the floorplate mounts to the mag tube will be designed so it absolutely will stay on the gun. Some aftermarket floorplate designs are famous for coming apart during use: You're firing the gun, suddenly the magazine "explodes" and all the ammo in the magazine just sheets out the bottom of the gun. That never happens with Arredondo floorplates. There are other extra-capacity magazine floorplates that are prettier, they're made out of aluminum in different colors (ooh!) and the Arredondo floorplates are made from no-BS black polymer. But there is nothing that works better.

The Arredondo GLOCK PMAG floorplate is intended to give a magazine meeting the overall-length rules for USPSA Limited division. This is

fine, since it also results in a magazine not too long for realistic concealed carry. This is a +5 magazine floorplate; it ups the capacity of a GLOCK 17 mag from 17 rounds of 9mm to 22.

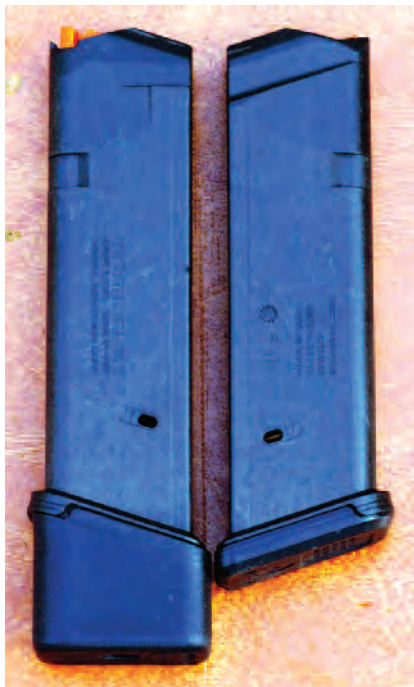

In general, when you fully load any magazine, you want to have approximately half a cartridge diameter of spring compression left over, so the magazine may be snapped easily into the gun with the slide forward. Also, if you have very little or no spring compression left over, the top cartridge in the magazine will wind up pressing so

hard on the underside of the slide, that retards slide momentum so much, you'll fire the chambered round and the top cartridge in the magazine will fail to feed.

I must admit to a bit of surprise when loading the Arredondo floorplate equipped PMAG to find, I'm not going to say "no" but very little spring compression left over. I was further surprised, however, to find that even with that little spring slack, snapping the magazine into the gun with the slide forward was easy. You don't even have to slap it in particularly hard. I can only theorize this is because the all-polymer PMAG tube "gives" and expands more than an all-steel tube (or even a standard GLOCK mag which incorporates a steel liner along most of its interior), allowing the mag stack to compress when the magazine is inserted into a slide-forward autopistol. Taking the

Arredondo/MagPul hybrid PMAG to the range, I found out it will indeed feed the top round out of the magazine after firing the chambered round. I further theorize the polymer feed lips have a greater lubricity factor versus steel, allowing rounds to feed more easily.

As you would expect from an Arredondo extra-capacity magazine floorplate, the mounting system for the GLOCK PMAG is elegantly simple and rock solid. Inside the mag tube, an L-shape sub-floorplate hooks onto the bottom of the mag spring. (A slightly longer than stock mag spring, to go with the slightly longer magazine once the Arredondo floorplate is installed, is of course supplied with every Arredondo PMAG floorplate.) This subfloorplate is tall enough that, when it's in

**The Arredondo PMAG floorplate extends the stock Magpul magazine to a length still not out of the question for concealed carry in a properly designed mag pouch.**

# Floorplates for MagPul GLOCK Magazines

its normal, inside-the-tube, fully down position, it absolutely prevents the floorplate from coming off the magazine. To remove the floorplate, take some sort of long, thin punch, insert it through the hole in the floorplate, depress the subfloorplate until it's below the end of the mag tube, at which point the floorplate can be pulled to the rear and off the magazine. Unlike the factory GLOCK mag, the floorplate on a PMAG pulls to the rear for removal, not toward the front.

The standard, out-of-the-box subfloorplate on a GLOCK PMAG features a raised button that inserts through the floorplate hole and comes up even with the "top" (or, depending on how you look at it, bottom) of the floorplate, with a hole in the center of the button to give purchase for a tool (punch, bullet tip, ink pen, whatever) when depressing the subfloorplate for disassembly. Again I was surprised to look at the Arredondo PMAG subfloorplate and see that's not the case here. While there is in fact a dimple to give a purchase point for a disassembly tool, the subfloorplate itself has no raised button; rather the dimple is recessed into a flat subfloorplate. This means when the subfloorplate is in place and the floorplate is slipped over it, you have to look down inside the hole to see the subfloorplate.

Honestly, at first I didn't like that. While the logical part of my brain realized it didn't matter, it didn't affect functionality at all; aesthetically I preferred the "even" appearing MagPul subfloorplate. The human eye likes symmetry. When I asked Ralph Arredondo why he didn't raise that portion of the subfloorplate into a button that would fit through the floorplate hole, his reply was, "It wasn't necessary." Fair enough. With more experience, I have to admit I actually like the way the Arredondo PMAG floorplate/subfloorplate assembly looks in this regard. But it did take some getting used to.

I have since integrated the PMAG/Arredondo magazine into my regular stock of GLOCK mags. I have shot it many times on the range during personal practice sessions. It just works. As you would expect from a MagPul PMAG. As you would expect from an Arredondo floorplate.

So there you have it. MagPul: great polymer magazines. GLOCK: the most popular self-defense/carry gun in America, if not on the planet. Arredondo Accessories: maker of elegantly simple, functional, durable, no-BS, they-just-flat-WORK aftermarket extra-capacity magazine floorplates. Put them all together, you've got something really special.

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mauser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag, .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, N67-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

| Description         | Stock #   | Each   | 6 ea.   | 12 ea.  |

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# Swab-its – A Swab for Every Job! <sup>65</sup>

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Cleaning  
System

The **Otis Technology, Inc. Breech-to-Muzzle Cleaning System** cleans rifles .22 to .50 cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal. The system includes three memory-flex rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

**N67-18174** **\$39.95**

## M-PRO7

**M-PRO7™ Gun Cleaner** is odorless, non-toxic and biodegradable. "Safely cleans rifles, handguns, shotguns..., black powder, corrosive priming deposits and much more."

|        |                  |                |

## FrogLube

**FrogLube** is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

| 4 Oz. Liquid | <b>N67-15444</b> | <b>17.59</b>   |

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

|                      |                  |               |

| Slide-Glide Lite     | <b>N67-15572</b> | <b>7.95</b>   |

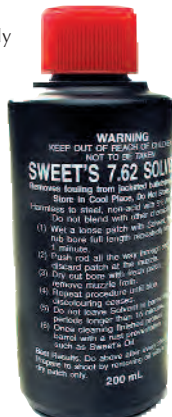

**Microlon UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

**N67-75125** **\$9.95**

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

**N67-13128**  
**\$12.95**

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

rifles, about 18 new introductions in all. What grabbed my attention the most were two short-barreled revolvers (what can I say? I love revolvers). The Redhawk in .357 Magnum holds eight rounds, fully adjustable rear sight, and the cylinder is recessed for full-moon clips (three included). Grips are a nice hardwood. Barrel length is 2.75". At 44 oz. empty, this is far more imposing than your everyday snubby. Want something lighter, in a larger caliber? Ruger introduces the GP100 in the classic .44 Special. Five-shot capacity, 3" barrel, Hogue® Monogrip®, fully adjustable rear sight and fiber optic front, this one weighs in at a mere 36 ounces. Our cup runneth over.

And now for something completely different. Apparently because it's important that your concealed carry piece be color-coordinated with your outfit, Taurus ([www.TaurusUSA.com](http://www.TaurusUSA.com)) has introduced the Spectrum™ .380 semi-automatic pistol. Soft-touch panels molded into the grip and slide are available in twenty different colors.

Great news for Colt ([www.colt.com](http://www.colt.com)) snake enthusiasts...the Cobra is back! Only it's now in stainless steel instead of a lightweight alloy. Six shots, .38 Special +P, with Hogue overmolded grips, unlike the laminated ones displayed at the Show. The trigger pull, both single- and double-action, is superb. Okay, it's more Detective Special than Cobra, but snake-name Colts sell faster. MSRP \$699.

For those of you addicted to large, shiny objects, Colt now offers the Special Combat Government® Model, in both .45 ACP and .38 Super. It is resplendent in mirror-polished hard chrome, and its checkered walnut grips should be immediately replaced with something far more expensive and ostentatious. Only \$2,099.

Were it not for great restaurants, Las Vegas would just be a noisier version of Hell. This year, we returned to Lawry's Prime Rib, adding an incomparable seafood salad to our phenomenal prime rib and Yorkshire pudding dinner. The next evening, for further protein overindulgence, we went to Fogo de Chao, a huge, crowded Brazilian churrascaria. The salad bar would be a culinary adventure all on its own. The caipirinhas are legendary, but for your own safety, do not have more than one.

## 5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

### 5.11 Tactical All Hazards Ammo Mule

Sometimes, you just need more ammo.

The All Hazards Ammo Mule

is lightweight, durable and weather resistant. It features a secure wraparound zipper with a molded pull and measures 10.12" wide x 3.88" deep x 8" high. It'll hold 10 5.56 AR mags or six 25-rd. boxes of shotgun shells.

N67-19661 \$27.99

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot.

## Scout Scope Mounts for AK, SKS Rifles

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle

N67-25374 \$79.99

Scout Scope Mount for SKS Rifle

N67-25373 78.99

## Winchester Twist Leg Bi-Pod

Winchester's Twist Leg Bi-Pod is compact, lightweight, easily attaches to your rifle's sling swivel stud, and features twist lock legs for unshakable prone and bench shooting. Legs adjust from 7.5" to 11.75" height.

N67-19671 \$29.95

# The Next Genera

**Story and Photos by Brian Dervin Dillon, Ph.D.**

Once upon a time, *everybody* was a first-time shooter. The first "gun" I ever shot was a .177 caliber, single-shot, top-break, 1938 Haenel pellet rifle. A Hitler Youth gun, my 79th Division dogface Dad sent it home as a trophy from the smoking ruins of *der Führer's* Germany through the GI mail in 1945. When I was six, the world's greatest thrill was when my Dad took this pellet gun down from the upstairs lockup, and we headed up the hill behind our house to go shootin.' We put old cans atop fence posts, and knocked them down from 20, then 30, and finally 50 feet away. The very first time I shot a tin can off a fencepost, back in

1959, I was hooked for life. Being able to step out my back door and be shooting cans only five minutes later was something I took it for granted. Little did I know how rare this would become in an increasingly urbanized and ever more

anti-gun America. A few years later, in the early 1960s, I began shooting .22 rifles, now with the Boy Scouts, at an indoor, National Guard Armory range. All of us Scouts were trained by military instructors. On weeknights we shot Model 1922 Springfields, first for the Merit Badge, then for the NRA Marksmanship ratings.

Thirty years later, I took my own six-year-old son out for his own first-time shoot. We went over gun safety the entire time it took us to drive to a desolate part of the California desert with both a safe backdrop and no human neighbors to distract us. The shooting bug bit my son as hard as it had bitten me. He earned his Rifle Shooting Merit Badge on his 11th birthday, the very first day, under constantly updated Boy Scout rules, he could do so. Then, he moved on to the NRA Light Rifle program, eventually earning the Dis-

tinguished Expert rating. Along the way he also became an Eagle Scout, with many Eagle Palms, and, in 2008, he was awarded the Silver Medal in the NRA's Outstanding Youth Achievement national competition, and a cash scholarship. What a concept! Getting money for college from shooting guns! My son could not have accomplished what he did on his own, nor could I have helped him without the assistance of dozens of other dedicated people and two very important organizations: the Boy Scouts of America, and the National Rifle Association.

Not too long ago most American towns had shooting clubs. Universities and even high

schools had rifle teams, which competed against each other just like their baseball teams did. But the guns, the ranges, and most importantly, the opportunities, have been taken away by increasingly vocal, intolerant, anti-gun factions dedicated to the limitation or elim-

**Scouts and dads from our Boy Scout Troop. Dads include veterans, Law Enforcement Officers, and two NRA Certified instructors (Dillon at left, Nuckolls at right).**

**The 11 scouts in the photo are of diverse ancestry. Nine of them became Eagle Scouts, and three went on to pursue careers in the U.S. Military.**

ination of personal freedoms they do not agree with. Today the Boy Scouts of America is one of only two youth organizations remaining in America (the other is the 4-H) that still encourages its members to participate in the shooting sports. Rifle and shotgun shooting remain two of the most popular of all Boy Scout elective Merit Badges. Just about every Boy Scout Camp has its own .22 rifle range, and many have a shotgun range as well.

But the very popularity of the BSA shooting program, coupled with its rarity, makes it a victim of its own success. For most urban Scouts the *only* opportunity they ever get to shoot are during the single week they spend at Boy Scout Summer Camp, enrolled in the Rifle or the Shotgun Merit badge courses. Demand for range time always greatly exceeds the number of shooting positions

# tion of Shooters

and guns available during the single hour allotted to each scout daily. I taught rifle shooting for seven successive summers at different Boy Scout camps in California, Oregon and Washington, where it was not unusual to have 10 Scouts trying to shoot for record while 20 or 30 more Scouts waited "on deck" for their turn. Even under the most favorable circumstances, such Scouts might get only four or five hours of trigger time per year.

Faced with this, around 15 years ago a good friend, Mr. Doug Nuckolls, and I decided to organize a shooting sports program within our own Boy Scout Troop. We wanted our scouts to be able to shoot as often as possible, and not have to compete with dozens of others for every precious minute of range time. We began by getting NRA certification as rifle and shotgun instructors and range safety officers. All BSA shooting instruction is conducted under NRA safety guidelines and supervision; all Boy Scout rifle and shotgun instructors, as well as Range Safety Officers, must be NRA certified. Then Doug and I visited our local Boy Scout Camp, on which friends of ours had built a .22 rifle range, and scheduled weekend shoots for our troop under our own supervision. We collected a miscellany of mismatched .22 rifles, raised money for ammunition, hearing protection, eye protection, and targets, and went shooting on a regular basis. This was "Plan A." It succeeded until a very wet winter washed out the narrow, solitary road leading to the BSA camp and rifle range, and forced us to look for another place to shoot.

Fortunately, my fellow shooting coordinator Nuckolls was good friends with the operator of a public range not too far away, and persuaded this very generous person to let us shoot for free on his range. This was "Plan B." We were given our own dedicated bay for .22 rifles, without the distraction of other customers bothering us while our Scouts were shooting. The *quid pro quo* was that all of us would arrive early, more than an hour before opening time, and pick up trash alongside the highway leading up to the range as a service project. We also, of course, always left the range in cleaner shape than we found it, and bought all of our ammunition from our new friend the range operator instead of elsewhere. But, once again, this range was rendered *hors de combat* when the only road leading to it was washed out. We had to look for a new home for our shooting program, now for a third location where we could safely shoot for free.

Adult Scout leaders spend a lot of time talking with other Scout leaders, comparing solutions to common problems. Nuckolls and I therefore became aware that a fair number of Boy Scout

Troops, mostly in Texas, were going on what they called "Shooting Campouts" on public land not tied to any established public, private, or BSA summer camp range. This sounded like a wonderful idea to us, so I called up Boy Scout National Headquarters in Irving Texas, and spoke with the top executive in charge of BSA shooting programs, to obtain more information. I was told that what we had already been doing with our troop for the preceding couple of years was 100-percent in compliance with Scout Policy, and that we could begin our own "Shooting Campouts" anywhere in California on public land wherever target shooting was permitted.

But when I submitted the paperwork for our first shooting campout (every Boy Scout outing must be preceded by a "tour permit" reviewed and approved by the local Scout office), I was called onto the carpet by a BSA employee. He told me that I could not take my troop on shooting campouts, because he had never heard of this being done before. When I politely noted that this was a common occurrence in Texas, I was told that it didn't matter what the Scouts did *there*, this would not be permitted *here* ("here" being the PRC – the *People's Republic of California*). I then informed this individual that I had already secured approval from the National Scout Office, which superseded his own authority, which ended the argument right then and there. And so began our troop's tradition of shooting campouts, now in its 12th year.

So, on to "Plan C," where I would get the scouts together for a 60-plus mile drive out of our California county, which prohibits target shooting, even on Federal land (and you thought that Federal was supposed to supersede State and County jurisdiction, didn't you?) to the nearest outpost of the "Free World." Only once inside the neighboring county could we legally shoot, and camp, on Federal land. We routinely drove up on Friday afternoon, set up the tents and the range that night, but left all of the guns and ammunition safely locked away. These would not appear until the following morning, after breakfast. Our secret location was a beautiful box canyon far from any neighbor, with safe backstops in three directions. Here we could camp all night, then shoot all day without interruption. We have done just that for more than a dozen years, always with a "Canyon Cleanup" (trash pickup project) before leaving.

Meanwhile, we decided to expand our shooting sports program, so I applied for "Friends of the NRA" grant money and was thrilled to be awarded not one, but two successive grants in short order. Then we went, hat in hand, to our preferred .22 target rifle manufacturer, Savage Arms, and

**80** explained what we were trying to do. We were doubly blessed when that enlightened company agreed to provide our shooting sports program with 20 matched single-shot target rifles at half the usual cost. With our new shootin' irons, and funds to support the ever-increasing cost of ammunition, we became known as "the shootin' troop."

Shooting within the Boy Scouts of America is completely voluntary – no scout who doesn't want to shoot is ever compelled to do so, nor does any Scout whose parents disapprove of shooting ever get onto the range. A prerequisite besides written parental consent is the safety class which every scout must attend before he is allowed to shoot with our troop. This class not only provides each young man with the fundamentals of gun safety, but gives the instructor (me) a chance to eyeball each one long

before they get anywhere near the range. If a kid cannot behave himself or pay attention in this safety class, then he is never given the opportunity of even getting close to a firearm. I always invite parents to these classes so that they can be reassured of our safe, responsible approach to the shooting sports.

Another secret of our success is limiting the number of scouts going on any one of our shoots to the number of our rifles. This way, everybody shoots 100 percent of the time, and nobody is "on deck" waiting to shoot. The No. 1 problem leading to disciplinary issues at BSA Summer Camp ranges is therefore eliminated. We have, of course, more scouts than guns, so we circulate a sign up sheet long before each scheduled shoot. First come, first served, in keeping with the Scout Motto: *Be Prepared*. If a name is not on the list, it is because that scout was not paying attention, or absent from the regular meetings. And since shooting is a privilege, not a right, any scout with disciplinary issues cannot go. We do not permit "troubled teens" to participate in our shooting program. All of our Scouts understand cause and effect: if they behave themselves, then they go shooting with their friends. If not, they must stay home.

Our shooting program became phenomenally successful, with dozens of scouts earning the merit badges on our shooting campouts, then moving on to the much harder NRA Light Rifle Marksmanship rating program. We began to invite other local Boy Scout Troops to shoot with us, having friendly competitions with troops that, of course, shot less than we did. Not surprisingly, we always won. We then brought back .22 target shooting as an annual camporee event. Shooting had been absent locally for the previous 30-plus years. So, we moved our annual camporee outside of our own "anti-shooting" county and onto a private ranch in a neighboring county where shooting was not only permitted, but welcomed. Our troop now hosted as many as up to 900 other scouts on our temporary camporee range, providing many with

**Our shooting sports program takes off. Through very generous donations from private individuals, a 50-percent discount from an enlightened firearms manufacturing company, and two separate grants from the NRA, we were able to purchase a matched set of 20 identical .22 target rifles for our Boy Scout shooting sports program, and enough ammunition to keep us shooting for years to come.**

the opportunity of shooting for the first time in their lives.

Always looking for ways to expand the program, and offer new challenges to our Scouts, we also cooked up the very first local "Shooting Triathlon" on one cold, late winter weekend in the Southern California mountains. We set up separate rifle

and shotgun ranges a measured mile apart after camping the night before in sub-freezing temperatures. Our Scouts were divided into two equal bodies, one at the rifle range, the other at shotgun. Each was given a master scorecard, to be guarded all day long, and then began their course of fire, of five rounds. As soon as their score was recorded, each Scout then had to jump on his bicycle, and pedal off to the other range, then shoot for record a mile away with the other kind of long gun, then back on the bike again, in rotation all day long. The highest cumulative score won, not always the best shot, because the most dogged scout, who could make the greater number of round trips between the two ranges, might out-perform a better shot who spent less time on his bicycle. Loads of fun for all!

After something like 15 consecutive years of existence, we have had more than 100 fine

young men participate in our troop's Shooting Sports Program, not counting visitors or guests from other troops. Most of our Scouts came into it the very minute they qualified (present BSA rules limit shooting to age 11 and older) and stayed with it all the way through their scouting career. And some keep coming back, as junior instructors, long after they have earned the rank of Eagle, and gone on to College or into the Military. We now have seven scouts who have earned the *Distinguished Expert* rating for smallbore rifle shooting (the youngest at 12 years of age), and four more Scouts with the *Expert* rating only need a few more qualifying targets to earn DE, that hardest of all Marksmanship recognitions.

Our Scouts compete against each other on the rifle and the shotgun range, but more importantly, they *cooperate* with each other, and *encourage* each other. The older Scouts help the younger ones, and together, everybody benefits. Within our Boy Scout shooting program, the success of one Scout is a success for all, both kids and parents. For we are a *team*, and our best shot every day is usually a different Scout. The kid who is all over the map today may just be the best shot on the range two years from now, and the tiny little Scout who flinches and closes his eyes with each shot his first time on the range may just have the Distinguished Expert Medal pinned on him five years later, when he is two feet taller, and shaving on a daily basis.

All Americans of a certain age know that one of the very *first* things that Adolf Hitler did after coming to power in Germany more than 80 years ago was to prohibit private ownership of firearms. But few know that just about the *second* thing he outlawed was the Boy Scouts. The International Boy Scout message of tolerance, brotherhood and cooperation was contrary to all of the evil tenets of Nazism. The Boy Scout oath promises to "*help other people at all times*," completely unacceptable to the Nazis, whose creed was to "*hate other people at all times*." Since their victim's guns had already been taken away, people of different cultures, races, or religions by the late 1930s were defenseless against them. Twenty years later, every time I shot my "liberated" Hitler Youth air rifle, my WWII combat veteran father reminded me of what it represented, and how different the freedoms that he had fought and bled for were from the repression of the "bad old days" in the Germany that had produced my first rifle.

And now, more than half a century later still, my own Boy Scouts learn much more than just how to punch little round holes in paper. They haul their carcasses out of bed at "Oh Dark Thirty" on a great many days over a great many years, and leave all of those pesky cell phones, electronic toys, and other unnecessary distractions behind in order to shoot safely and legally. Our motto is "100% Safe, 100% of the Time." But my Scouts also learn patience, persistence,

dedication, courtesy and politeness on the rifle range. They learn how to eliminate distractions that inhibit concentration, a lesson that can be applied to schoolwork, and even to their dealings with their own parents. They learn that disappointment does not mean defeat. They learn that there is no success without failure, and that they do not know everything, just because they have seen misrepresentations on T.V. or in the movies. One of their most important safety lessons is to separate firearms *fantasy* from firearms *reality*, best learned from the old, balding Chief RSO on the rifle range, because he has been shooting more than twice as long as any idiot actor mishandling a gun on T.V. has been alive. In terms of gun safety, *all* of my 11-year-old beginning shooters are safer and more mature than many of the adults I have tried to supervise as Chief RSO on a local, public range. Through our shooting program, our young Scouts learn that any goal in life worth working towards may not come easily, but requires many long hours of practice. Along the way many obstacles and frustrations must also be confronted and overcome. One of the most important lessons that my Scouts learn – as young as 11 years of age – is that all they have to do is give up once, and they are done. So we don't let them give up, ever. And, what my Scouts learn on the rifle range stays with them all their lives.

A very important lesson for adult shooters is provided by our Boy Scout shooting sports program. Unless every last adult shooter in an increasingly anti-gun America makes it his or her business to help the *next* generation of shooters find the places and the opportunities to practice safe shooting, we will become the *last* generation of shooters. We older people must help the younger generations financially (with ammo costs), we must encourage them, and most of all, we must share our time and what we have learned with them.

The alternatives are crystal clear. We can either help the next generation become safe shooters, help them learn marksmanship, smooth their way, and teach them self-respect, courtesy, cooperation, and dedication while they discover the joys of competitive marksmanship, or we can just turn our backs, and selfishly go on about our own shooting. If we do, we will find, not too far in the future, that the shooting sports as we know them have disappeared from our communities, our counties, and our states, one by one, just as they have already vanished from our High Schools, Colleges and Universities over the past few decades. None of us can afford to be selfish shooters in America in this day and age. If all of us do not work as hard as we can to provide the necessary opportunities for the *next* generation of safe shooters, then we will go the way of the Dodo, and become the *final* generation of American shooters, doomed to extinction.

**Traveler's Guide to the Firearm Laws of the Fifty States** – The myriad of firearm laws facing the gun owner of the early 21st Century can be intimidating when traveling.

**N67-30201 \$14.95**

**Practical Shooting: Beyond Fundamentals** – The keys to consistent, high-speed shooting are within you right now. This book will show you ways to bring them out.

**N67-10750 \$19.95**

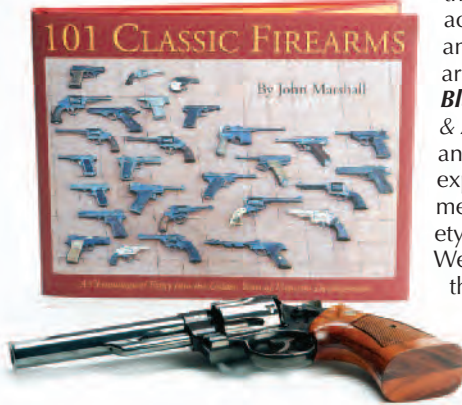

# 101 Classic Firearms by John Marshall 83

Dillon Precision announces the release of John Marshall's new book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, a compilation of the author's popular articles appearing in *The Blue Press* since 2007. **101 Classic Firearms** is sure to be a welcome and prized addition to the library of any serious firearms aficionado.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hard-cover with 224 pages packed

full of insights and history on some of the world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. He is also an endowment member of the National Rifle Association.

**Price: N67-40133 \$29.95, Autographed N67-97130 \$34.95**

**Competition Reloading with Brian Enos** guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting.

Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

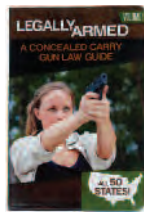

**N67-14341 \$19.95**

**Making Ammo: A Beginner's Guide to Handloading** by Kyle Lynch – Ammo shortage? Not anymore! Learn a new hobby that will save you money and ensure that you always have enough of the right ammunition for your shooting needs. This guide offers you an opportunity for first hand information from an experienced reloader as he takes you through the reloading process. Examples explain what works and what doesn't. If you are new to reloading or want to understand the fundamentals more fully, this guide provides simple step-by-step instructions.

**N67-43270 \$23.95**

**Legally Armed: A Concealed Carry Gun Law Guide** – Learn the basics of concealed carry and the laws associated with this astronomically growing group of self-reliant Americans. If you depend on a handgun for the protection of yourself or your family, arm yourself with knowledge, too. What's inside? What to consider before carrying a firearm • Protecting oneself: discharging a firearm in self-defense • What to do when interacting with Law Enforcement • Gun handling, practice and storage • State-by-state quick reference guide to carry laws where you live and travel.

**N67-43269 \$14.95**

**Armed & Smart: A Beginner's Guide to Concealed Carry** – If you are new to concealed carry and need a great resource for information, this is the book for you. This book covers all the basics a beginner needs to know.

Before you make the decision to exercise your Second Amendment right to bear arms through concealed carry, you should consider factors like what type of gun is best for carry, when to carry a firearm, how to carry concealed, and why you should carry a concealed firearm.

We carefully cover handgun safety and the proper steps for using and caring for your firearm. Other topics include cartridge selection, accessories available, practice techniques, and range etiquette.

**N67-43232 \$16.95**

**Armed & Smarter: Advanced Concealed Carry Weapons & Training** – Once you have mastered the basics for carrying your concealed firearm, you need a book to build on that foundation and hone your skills to those of an intermediate-level handgunner. After obtaining your concealed carry permit and securing a firm grasp of the responsibilities attendant to carrying a concealed firearm, it's time to focus on becoming an excellent marksman.

In *Armed & Smarter*, our authors prepare you, the shooter and gun owner, to handle and use your handgun responsibly. By the end of this book, you will understand the importance of strong habits and perfect practice.

**N67-43233 \$16.95**

# 84 Wise Company's "Grab & Go" Emergency Food Kits
