# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$50.95 each.

# We READ Our Mail!

I'm a new reloading enthusiast, I bought a Dillon Precision Square Deal B from a buddy who was moving. I love this press...it's wonderful! Anyway, I had a part break and about a week and a half ago I called Dillon Precision for the first time ever. Bob answered the phone and was quickly able to understand what part was broken...no small thing...my words weren't much better than "that thingie at stage one...no not the bar that pokes out the primer from the brass." It was a little better than that, but you get the point. Bob is amazing, he really represents Dillon in a fantastic manner. He zeroed in on my issue and got me squared away. I got my part a couple days later. I've told everyone I talk to about reloading just how great he is and how great your company is. Bob...thanks man, I really appreciate you. You made things so easy for me; you just don't see customer service like that these days. You have won a customer for life, not just because my little old press is great, but in larger part due to Bob and his squaring me away the way he did. That really means something.

Paul Michael

I always enjoy reading *The Blue Press*, as I find the articles very interesting and the lists of products available quite complete. I'm writing to comment about an article in the March 2018 issue: "The Winchester Model 1873 Rifle." The article erroneously states that "Winchester 73" is the only movie ever named for a rifle. It is erroneous, because in 1952, Warner Brothers released a movie starring Gary Cooper whose title was "Springfield Rifle," that chronicled the development of the famed Springfield during the Civil War. This error immediately popped into my head while reading *The Blue Press*, as I recall, quite well, going to see both movies when I was a kid.

Lt. Col. (Ret.) Conrad Novack

The article stating that the "Winchester 73" movie was the only movie named after a rifle is close to correct, it shares that claim with one other, Gary Cooper's 1952 "Springfield Rifle."

Kevin Bjornson

Thanks for the correction, guys. I was unaware of that. All the best. - John Marshall

# 6 Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550C

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# The Springfield XD-E Pistol

By J.B. Wood

Some of the new polymer-frame striker-fired pistols are marvelous. Even so, there are some features that I miss. I like having a trigger with selective double and single action, and a re-strike capability. I like having an external hammer that can be thumb-cocked. It may be that some of this is caused by being around the gun scene for around 70 years.

Well, Springfield Armory has just fulfilled my wishes with the XD-E, new, hi-tech, and having all of the things I mentioned. It also has, of course, all of the modern stuff – like an automatic internal firing-pin block that is cancelled in the last fraction of trigger pull, and a rail up front for a light or laser.

While we're in that area, I'll note that there is a slight nod to those who still use that goofy old hold, with a support-hand finger in front of the trigger guard. There are three shallow cross-grooves there, but thanks are, no "hook" on the nicely rounded guard. On top of the slide, an indicator rises to tell you the chamber is loaded. Except for the slide latch, left-handers are taken

care of. Magazine release buttons on both sides, no need to switch anything. Also, manual safety levers on both sides, with minimal protrusion. Turned upward, the safety blocks the sear and disconnects the trigger bar. Pushed downward, it safely de-cocks the hammer.

There are two single-stack magazines, one 8-round, and one 9-round. There's also an extra flat floorplate, in case you want to replace the little finger rest on the 8-round and tuck a finger. I'd ignore it. On the 9-round, a spacer-sleeve gives room on the frontstrap for all fingers, even for a large hand. The shape of the grip-frame is perfect, no need for any "inserts."

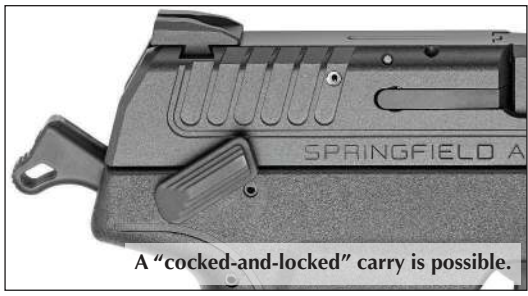

The square-picture sights are both dovetail-mounted, thus laterally adjustable. The rear sight has two white dots, and the front is red fiber-optic. Supplied are two replacement pieces, in red and green. The front sight is excellent in daytime, not so much in low light. For night carry, I'd want to put a drop of white on it. The otherwise good owner's manual has all of the usual lawyerly warn-

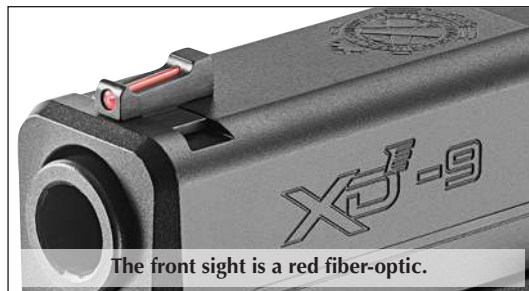

The Springfield XD-E, left & right sides.

The controls: from front to rear, takedown latch, slide stop, and safety lever. The magazine release is in the usual location.

A "cocked-and-locked" carry is possible.

The front sight is a red fiber-optic.

The XD-E field-stripped. Note the captive recoil spring unit.

ings, but no spec numbers. So, these are by me – allow some slight differences. Weight, 25.3 ounces. Length, 6.6 inches. Height, 5.4 inches. Width, a slim 1.4 inch, measured at the low-profile safety levers. Barrel length, 3.25 inches. A true lightweight compact 9mm.

While we're doing numbers, let's look at the nice, smooth-surfaced trigger. In single-action, measured at center, there's about one-eighth of an inch take up. Then, a nice, clean let-off that averaged 5.3 pounds on my Lyman electronic scale. According to my educated trigger finger, the double-action pull is around 10 pounds, very smooth, no stacking.

At the range, I tried out the XD-E with regular FMJ loads by Winchester, and more serious stuff from CorBon and Black Hills. It worked fine with all of them. The distances were 7 and 15 yards. Standing, two-hand hold, it printed well-centered groups of 3 to 4 inches. With the slim grip and light weight, I thought the felt-recoil might be brisk, but no. It was moderate.

As noted earlier, the manual safety can be applied with the hammer cocked. And, the inter-

nal firing-pin block is always "on-safe" until you pull the trigger. So, "cocked-and-locked" carry is perfectly safe. This mode has always made me nervous, though. I prefer the hammer down, first shot double-action.

The locking system is classic falling-barrel, with the squared-off chamber area rising into the large port in the slide. The matte finish on the steel parts is durable Melonite. Thanks to the dual concentric recoil springs, slide retraction is not difficult.

I will also give the designers of the XD-E high marks for a couple of things they did not do. There is no magazine-disconnect safety. Without the mag, you can still fire a chambered round. And, no stupid "flipper" safety in the trigger. For me, those have such an effect on trigger "feel" that they cause a decline in accuracy.

The XD-E is beautifully made in Croatia by HS Product Karlovac. Suggested retail price is \$519, but you can shop around and find it for less. For this quality, a bargain.

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (Page 15) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.45 each, or \$24.45 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (bottom right photo) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM

#### Includes:

- Primer Housing /Shield
- Primer Slides, Large/Small
- Pickup Tubes, Large/Small
- Pickup Tube Tips, Large/Small
- Magazine Tubes, Large/Small
- Mag. Orifices, Large/Small
- Operating Rod
- Primer Track Bearing
- Housing Screws
- Ret. Spring Retaining Pin

**042-16627, \$89.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**042-20302, \$26.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**042-20251, \$95.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**042-21353, \$32.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**042-22120, \$33.95**

### BL 550 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: 042-16629, \$19.95**

**Upsize Die: 042-16626, \$20.95**

**Plastic Funnel: 042-16617, \$6.49**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.)

**042-20029, \$23.95**

**RL 450 Powder Die:**

**042-20308, \$22.95**

# RL 550C

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for ONLY...

Dipped Ball-End Hex Wrenches	<b>O42-11483</b>	<b>18.95</b>
One-Inch Bench Wrench	<b>O42-10842</b>	<b>7.95</b>
Square-Deal-Only Wrench	<b>O42-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	<b>O42-22051</b>	<b>\$50.95</b>
XL 650-only	<b>O42-22052</b>	<b>47.95</b>
"SDB"	<b>O42-22223</b>	<b>66.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>O42-97126</b>	<b>\$154.95</b>
----------------------	------------------	-----------------

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	<b>O42-17950</b>	<b>\$47.95</b>
------------------------	------------------	----------------

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>O42-22214</b>	<b>\$44.95</b>
1050 Tray Kit	<b>O42-22215</b>	<b>44.95</b>

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Low Powder Sensor	<b>O42-16306</b>	<b>\$42.95</b>
-------------------	------------------	----------------

Quick-Charge Cover for use with powder measure.	<b>O42-11143</b>	<b>\$14.95</b>
---	------------------	----------------

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550!

<b>RL 450 Upgrade Components</b>

# Dillon's Case Preparation Equipment

**CV-2001 042-20493 \$189.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part.

Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750 042-19455 \$145.95**

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator 042-20675 \$76.95**

**CM-500 Case/Media Separator 042-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 042-22047 \$214.95**

**Euro CV-750 042-19473 \$170.95**

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners now have a **Five-Year Warranty** on the electric motor.

## Rapid Polish

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle.	<b>O42-13804</b>	<b>\$8.95</b>
Case (20 pc.)	<b>O42-20255</b>	<b>135.95</b>

## Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle	<b>O42-13733</b>	<b>\$11.95</b>
Case (20 pc.)	<b>O42-21375</b>	<b>168.00</b>

Half and Half	10 bottles of polish / 10 of lube
Case (20 pc.)	<b>O42-21375</b> <b>\$135.95</b>

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag    **O42-13287**    **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag    **O42-13496**    **\$15.95**

## Super 1050/RL 1050 Short Trim Die Toolhead

O42-62219  
\$229.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the Blue 1050 toolhead stand - Part Number O42-62200, \$49.95 - is not included.)

# Dillon's New Rapid Trim 1500 Case Trimmer

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **O42-62164** is **\$332.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **O42-13141**, are **\$20.95** each. Upper lock rings, **O42-13559**, are **\$5.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	<b>O42-62124</b>	<b>\$20.95</b>

# 26 Dillon's Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

# 32 Range Bag

Dillon's Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 64). The Main Compartment is 12.5" long x 7" wide x 10" high, the End

Pockets are 8.5" tall x 6.5" wide x 2" deep and the Front Pocket is 9" tall x 6" wide x 2" deep.

Range Bag, Black	<b>O42-19366</b>	<b>\$89.95</b>
Pistol Pouch, Black	<b>O42-17027</b>	<b>10.95</b>

## 'Border Shift' Ammo Bag

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

**I.D. Card Holder**  
**O42-14575 \$2.95**

**Black Ammo Bag** **O42-13755** **\$25.95**

## Dillon's Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*

**O42-18146** **\$65.00**

# Mr. Bulletfeeder<sup>®</sup> by Double-Alpha

**M**r. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

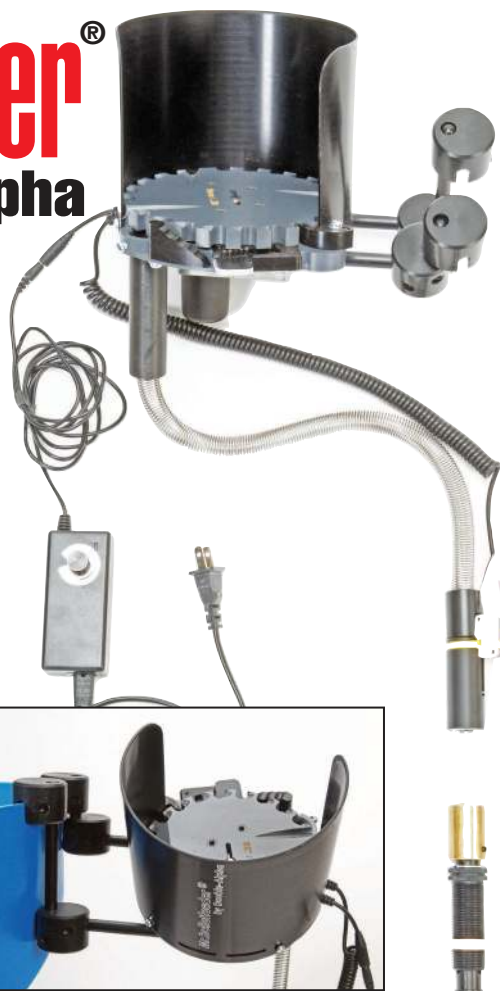

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

### Mr. Bulletfeeder (Comes Set Up in One Caliber)

## Mr. Bulletfeeder<sup>®</sup> Replacement Parts & Spares

**H**aving separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

**T**he Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collator to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

**L**ose a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

# Dillon's Pistol Die Sets

## Size Die

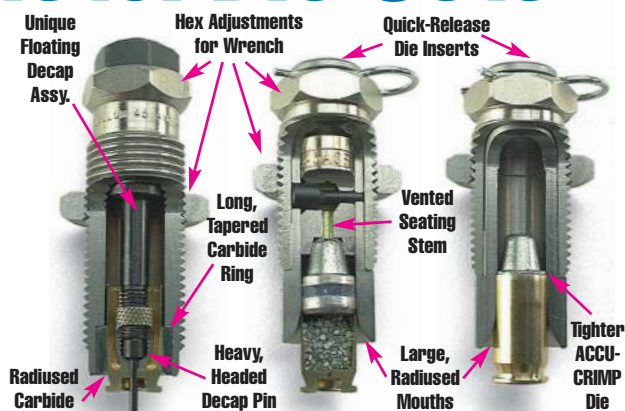

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

*NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)*

Package of 10	O42-21528	\$6.75
---------------	-----------	--------

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	O42-10839	\$70.95
.308 Winchester	O42-15574	70.95
.30-06 Springfield	O42-10840	70.95

# 36 THE NUMEROLOGY

By Oleg Volk

The push to restrict American gun ownership focuses a lot on the numbers. Reduce Americans to 10-round magazines, they claim, and no more mass murder – ever! Canadian gun-control pushers think the magic number is five. Chinese authorities, however, are pretty sure the real number should be zero.

Ten rounds has been the standard capacity for military rifles for a long time. The 1895 Lee-Enfield held 10, as did the Soviet SVT and German G43 rifles. Post-WWII SKS, FN49 and SVD rifles held 10 also. No one would claim that they aren't formidable weapons even today. So why stop at 10 if the goal is to diminish the capability of any rifleman?

The first military rifle designed for high-velocity smokeless ammunition, the 1886 Lebel, held eight rounds in the magazine. So did the first rifle with detachable box magazine, the 1888 Lee-Metford. As did the "finest battle implement ever designed," the US M1 Garand. Nobody can claim that these aren't suitable for bloody mayhem in the wrong hands, so could we claim that fewer than eight should be the limit?

Seven rounds? A number more typical of 120-year-old pistols, and the maximum permitted in New York State...for now.

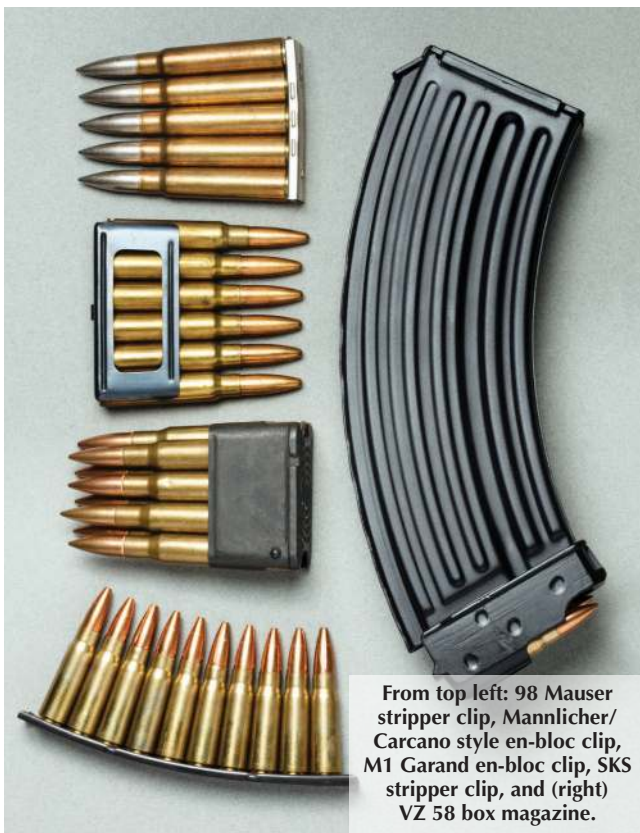

That brings us to six rounds. The Italian WWII Carcano (including the one used to shoot JFK), the superb Swiss Schmidt-Rubin, the U.S. Model 1917 Enfield and many Mannlicher bolt actions held six. Too many still?

Five, do I hear five? That would be the capacity of the K98 Mauser, 1903 Springfield, 1891 Mosin-Nagant, P1914 Enfield, MAS-36 and Arisaka – some of which remained front-line military weapons through the 1940s.

Four? No, that would give us certain Winchester and Remington sniper rifles in common military use since the Vietnam War. No anti-gun legislator would ever concede that "sniper rifles" are suitable for civilian ownership. The substantial similarity of a deer-hunting rifle to the military sniper rifle is purely coincidental, of course.

Maybe three would be the magic number? The French Berthier infantry rifle with a three-shot magazine was widely used through WWI. So the REAL number would probably be two. At which

point anti-gun propaganda would harp on the similarity to double-barreled dangerous-game guns and the few remaining gun owners would end up with single-shot, low-power guns grudgingly permitted after much red tape... until the next wave of confiscations. Speaking of which, it's a lot easier to go after people reduced to pre-1850s defensive technology. Not that the gun-banners would go after anyone in person – even a musket or a pike in steady hands scares them – but they would happily send troops armed with mod-

From top left: 98 Mauser stripper clip, Mannlicher/Carcano style en-bloc clip, M1 Garand en-bloc clip, SKS stripper clip, and (right) VZ 58 box magazine.

ern guns. That scenario played out in Nazi Germany, Soviet Russia, Communist China and more recently in Venezuela. Once the "arms gap" between the government and the people is great enough, minor concerns such as "civil rights" cease to matter to the rulers.

We, the gun owners, also pay attention to numbers – but often to the wrong kinds of numbers. Too often, we buy one more case of ammunition, one more rifle in a flatter-shooting caliber, a scope that goes to six power instead of four, and call it good. I've seen cases of ammunition sit unopened in preparation for "the day," but the owner never checked to make sure that particular lot would run in his rifle or confirm the point of impact. I've seen

# OF GUN CONTROL

friends spend money on body armor but not spend the time in the gym to enable functioning with the weight of the full kit on their shoulders. Imagine gearing up for battle only to die of a heart attack after a 50-yard run in the heat! In emergencies, untrained or unfit first responders just become additional casualties.

With Republicans currently in charge of our national government, some of us have relaxed. Yet the restrictions on permissible technology continue to mount at the state level. Stripper clips were the apex of military technology around 1900, and are now the most a person may retain in modern California. But the main push isn't even to restrict firearms and accessories, but to ban broad categories of people instead. The restrictions used to be by ethnic group (Blacks and Asians were disarmed by law in the 19th century), now they are by medical condition, by age, by state or county of residency, by juvenile misdemeanor record, and by whatever disqualifications our foes might dream up in the future. Further advantage – to them – is that every gun owner convicted of a firearm-related felony is forever removed from the roster of opposition voters. Break some obscure, illogical regulation in Massachusetts or Hawaii by accident while on vacation, and lose your right to own a gun – and your ability to vote – for a lifetime!

The purchases of guns and ammunition are sincere votes against gun control – with money, personal time and effort. But those votes are only a low-effort proxy for other contests: popularizing the particular ways of life, dominance in social institutions and legislatures. On those scales, the difference between a 10-round box and a 75-round drum magazine is minimal compared to the more boring – but necessary – efforts of educating friends and neighbors, lobbying in favor of reduced regulations, and learning general skills like first aid. The most costly component of all that is time. But the alternative is having your own kids, neighbors or colleagues turn on you for lack of understanding the cause – preserving our individual right to keep and bear arms – because of the influence of pervasive media propaganda.

Gear doesn't replace skills, but neither do skills replace equipment. Get your spare magazines while they are cheap and available. Wear out a few in training. Get ammunition in bulk and shoot up half of it learning your primary weapons. Get a laser trainer or an airsoft gun to introduce non-shooters gently to the skills and to the mindset. Just don't get fixated on the numbers. Ultimately, it's less about the magazine capacity and more about the number of allies we can count on. With every mind we win over, the spectre of direct conflict recedes further – one more ally for us is one fewer for them.

¶

“WITH EVERY MIND  
WE WIN OVER,  
THE SPECTRE OF  
DIRECT CONFLICT  
RECEDES FURTHER –  
ONE MORE ALLY  
FOR US IS ONE  
FEWER FOR THEM.”

# RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

## RCBS Trim Pro 2 Case Trimmer

## Lyman Scale Weight Check Set

**RCBS Trim Pro-2™ Case Trimmer** O42-43231 \$139.95  
 The RCBS Trim Pro-2 manual case trimmer now features a spring-loaded "universal" shell holder that will accommodate case head diameters from .250" to .625". Comes with pilot calibers: .22, .24, .25, .27, .28, .30, .35, .44 and .45.

Lyman Scale Weight Check Sets enable you to check/calibrate your scale using known weights.  
 A. Weight Set .5 - 60.5 Gr. O42-15958 \$36.95  
 B. Weight Set .5 - 210.5 Gr. O42-15959 48.95

## Ammo-Burr Cartridge Deburring Sets

SHAVIV is – and has been – the leader in precision hand-deburring solutions since 1960, and now brings its experience to the ammo-reloading market.

The Ammo-Burr Inner/Outer Cartridge Deburring Sets feature ergonomic comfort-grip handles for fast and accurate hand deburring. The .47" diameter inner chamfering

and deburring blade allows for chamfering and deburring cases from .17 to .45 caliber, and the outer-diameter chamfering blade will accommodate case mouth openings as large as 1.02".

A. Inner Chamfering Starter Set O42-62270 \$39.95  
 B. Outer Chamfering Starter Set O42-62269 \$59.95 A.

Open 7-6 MST, M-F; 8-3 Sat. • VISA, MasterCard, Discover, C.O.D. • Shipping and HazMat Not Included

# CLASSIC FIREARMS: The Winchester

By John Marshall

This weapon was considered so deadly, unfair and frightful that for a while the World War I German high command threatened to summarily execute any Allied soldier who was captured wielding one. The Winchester Model 1897 pump-action 12-gauge trench shotgun could fire six double-aught buckshot shells (fifty-four .33 caliber balls in all) in about five seconds. This shotgun had no trigger disconnect mechanism, so it could be “slam fired” until its magazine was empty by holding the trigger back while rapidly and repeatedly shucking the action. It was easily one of the most devastating small arms available then or since. Add to this the fact that a bayonet could be mounted on it, and you had the perfect tool for mayhem in the trenches. The firestorm that these rapidly fired shot shells could unleash spelled death in capital letters for any enemy encountered at short distance. This trench gun proved to be so effective that it was used throughout both World Wars I and II, the Korean War and even in Vietnam!

The Model 1897 was an improved Model 1893 pump shotgun, and both of these were designed by the immortal John Moses Browning. The ‘97 was specifically designed for the somewhat longer than before 12 gauge 2-3/4” shell using smokeless powder. The top of the frame was covered so that the ejection of the fired shell was to the side. This gave more strength to the frame. The action was set up so that it could not be opened until a small forward movement of the slide handle released the slide lock. In firing, the recoil of the shotgun gave that motion to the slide handle automatically. A moveable cartridge guide was located on the right side of the carrier block to prevent inadvertently losing a shell when the shotgun was turned sideways when loading. Also, the stock was made longer than that on the Model 1893 and had less drop at

the heel. It’s noteworthy that Winchester Model 1897s were produced from 1897 until 1957, when they were superseded at Winchester by the internal-hammered Model 12. In spite of being “obsolete,” sporting versions of the old ‘97 are still popular and many remain in active use today.

Shorter 20-inch-barreled “riot” versions were used by our armed forces in limited numbers as early as 1900 to combat Philippine insurgents and then Mexican bandits on our border. After suitably modifying these basic riot guns with perforated-steel heat shields, sling swivels and bayonet mounts (calling these concoctions “trench guns”), thousands were ordered by the U.S. for the Great War in 1917. Already making bayonets for our Model 1917 Enfield rifles, Winchester created a special bayonet mount for the trench guns that would specifically take these blades. A bayonet, bayonet scabbard and sling were provided with each gun. A canvas sling pouch holding 32 all-brass shells was another useful accessory. The magazine tube on the Model 1897 held five shells, and with one in the chamber, six rounds would be available for instant use.

The Germans began to protest the use of this “trench sweeper” shotgun during WWI. In September of 1918, the German government lodged a diplomatic protest against the American use of shotguns, alleging that the shotgun was prohibited by the law of war. Part of the protest read, “it is especially forbidden to employ arms, projections or materials calculated to cause unnecessary suffering” as defined in the 1907 Hague Convention on Land Warfare. The U.S. thought differently. The Judge Advocate General of the Army and the U.S. Secretary of State reviewed the law and formally rejected the German protest.

The U.S. response angered the Germans, who believed that they were treated unjustly. But by

# Winchester Model 1897 Trench Gun

“This trench gun proved to be so effective that it was used throughout both World Wars I and II, the Korean War and even in Vietnam.”

then in mid-1918, our trench guns were widely distributed and allocated 50 per division. Most of these went to scouting units who often made initial contact with the enemy. In reaction, the Germans threatened to execute U.S. soldiers who were captured with these guns. General John Pershing, the U.S. commander in WWI, counter-threatened that we would do the same with German soldiers who were captured with saw-backed bayonets or flame throwers. Both sides then quickly backed off of their threats, and the issue became moot. Shotguns continue to be used in combat regularly until the present day – they are well accepted.

When World War II began, the U.S. quickly snapped up their remaining Model 1897s for use in the war, and ordered Winchester to manufacture many thousands more. These were in three configurations – trench, riot and training guns. While the WWI trench versions used a heat shield with six rows of ventilation holes, the WWII-era heat shields were specified to have four rows. Some Early WWII '97s were equipped with older-style 6-row shields. The gun illustrated here was produced by Winchester in early 1942, and has one of those 6-row shields. The WWII stocks were also slightly changed, and unlike their predecessors, these newer guns were all of takedown configuration to provide easier packing and shipping.

In WWII, each Marine regiment was allocated 100 Model '97s, and the Army continued to use them in varying roles. The Marines in the Pacific found both the old and new trench guns to be reliable, but had a real problem with commercial paper shells deteriorating in the humid climates. When the old-style brass shells were issued again, that problem was solved.

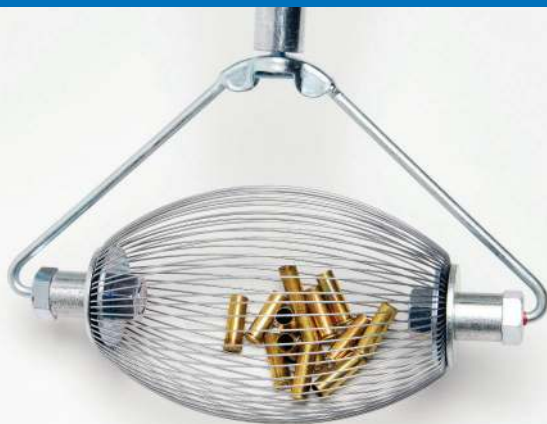

When WWII ended, more than 30,000 of these guns stayed in inventory, and when the Korean War broke out, they were pulled from storage and used

yet again. They saw continued use in the Vietnam War, but new Model 1917-pattern bayonets (with plastic rather than wood grips) had to be produced to satisfactorily meet the demand.

Today, genuine Model 1897 trench guns of all vintages are incredibly valuable on the collector market. Be aware that many faked “put together” guns exist, and if authenticity is an issue, one should consult with a seasoned U.S. martial arms collector or refer to Bruce Canfield’s excellent book *Complete Guide to US Combat Shotguns*. It’s worth noting that none of these guns were originally issued with a Parkerized finish; all were blued from the factory. All number-stamped parts should match with the serial number. All '97 trench guns of whatever vintage had cylinder-bore barrels, and the originals were marked as such. With WWII guns, an inspection stamp in the stock reading “WB” (Lt. Col. Waldemar Broberg) or “GHD” (Brig. Gen. Guy H. Drewry) should be present. Factory-stamped U.S. markings in the metal should be there on early WWII guns, along with a “flaming bomb” stamp. Later ones may have only the “U.S.” stamp. WWI guns often had hand-stamped marks or none. Many of the First War guns were given to the South Vietnamese military in the 1960s and never repatriated, making them especially scarce.

To partially fill the demand by collectors for the genuine wartime weapons, a replica '97 trench gun has been made by Norinco in China that usually sells for a few hundred dollars. However, reports are that the fit and finish of the replicas are not in keeping with the quality of the originals. Surviving genuine Winchester '97 trench guns are in such demand that correct and complete examples are now going for well into multiple thousands of dollars. They are scarce U.S. military arms today, and are classic and important remnants of our 20th Century conflicts around the globe.

# SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

O42-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

O42-19972 \$39.95

## Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter O42-17519 \$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mm.

Made in the USA and comes with a lifetime warranty.

Berry's Mfg. Clear Ammo Can O42-17518 \$9.99

## Dial Caliper

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

O42-13462 \$28.00

## High Tech Digital Caliper

**Accurate,  
Easy to Read!**

O42-17171 \$39.95

## Bullet Puller

Nobody's perfect. A bullet puller makes it easy to recover all your components.

Bullet Puller O42-17999 \$29.95  
 Puller Cap O42-17948 4.95  
 Collet Set O42-17947 5.99

# MORE LEFT-WING GUN MYTHS: <sup>47</sup>

## Terrified of guns and beyond ignorant, they just make stuff up

By Alan Korwin

With National Right to Carry on the drawing boards, and maybe even enacted, implemented, still stalled or back to square one by the time you see this, We the People are seeing every monumental lie and distortion imaginable about this fine, constitutional concept. No, beyond imagination.

The righteous idea that We the People are free to bear arms should, in theory, attract support from anyone elected who takes a solemn oath to defend the U.S. Constitution. That our representatives fight tooth and nail to deny us these rights, spelled out for them to see in the Bill of Rights (and more than two centuries of history) is little short of astonishing, and borders on treasonous. But here we are, with our cross to bear.

And there they are hauling out every tired and worn excuse they used when each of the 50 states wrestled with and got personal concealed-carry permits passed in some form. You remember the arguments, all of which were phony. Not “fake news” – today’s trendy way to belittle the nonsense licensed broadcasters afflict us with. Pure fakery – myths and phony nonsense, projections of fear that don’t relate to reality. Even if you call them on it, they simply go into denial. Do not expect retractions or corrections. Do expect the next big bag of bull in the bundle.

### THE BLOOD-IN-THE-STREETS (BITS) MYTH

This might be the granddaddy of them all, and lies at the terror-filled heart of gun haters and the fearful. It is played upon and manipulated by evil power brokers in both political parties. Politicians know they can use it to play on emotions while relying on armed troops to keep them in control and remain relatively safe.

Beginning in 1987 when Florida became the first state to introduce a statewide Carry a Concealed Weapon (CCW) program, Democrat presidents, Hillary types and her lemmings have spread desperate fears of the BITS myth. We’d have dangerously armed people shooting slow sales clerks, and each other, at stoplights, or for no reason at all! They’ll turn simple arguments into blood baths in the streets, simply because they can! America would become Dodge City (which was never the Dodge City portrayed in wild-west movies).

It’s a textbook example of paranoid delusion – the psychological projection of internally imagined monsters onto people nearby, despite any reflection of reality. There was never – never – any blood in the streets from people who signed up for FBI-approved discreet-carry licenses. Right up through Illinois, the 50th and final state to get at least some form of lawful-carry license, BITS was proven false by the evidence in every single case. No exceptions. Even the gold standard, FTC Freedom To Carry without any government-required license – Constitutional Carry which got that name in Arizona in 1994 – failed to manifest any bloodshed insanity. BITS is clearly mythological.

Yet the paranoid kept foisting their delusions on us. The “news” media kept sounding false alarms in defiance of every ethical guideline they supposedly honor. No corrections or retractions have been made, despite incontrovertible hard evidence. This is the rubbish the left used to interfere with progress. They not only denied it in the face of overwhelming proof, they’re using it again. Their quiver is empty.

### GUNS STOP CRIME

And then crime measurably dropped, state after state – with millions of Americans now armed against crime – and the left with their sycophantic media allies in lockstep alliance, are stupefied and mystified how this can be so. The abuse the rational must endure at the hands of the inane...the lunatics are running the asylum! People are armed against crime, crime drops, the leftists can’t figure it out.

Speculation has it that many of Hillary’s type of flighty anti-gun followers are of such weak mental composure that if they had access to the raw power of arms their mental state could not withstand the inherent pressure, and they would snap. Instead of stopping crime, as an armed public helps do, leftists would contribute to it directly.

### THE MENTAL-DEFECT ANGLE

On the other hand, people who are inclined to own firearms understand the responsibility gun ownership represents, and handle it like mature adults. People who avoid it and are afraid of it, act out and want you disarmed (typically by father figures – with guns). They paradoxically fabricate

Australia confiscated huge numbers of guns from the public and had them destroyed.

“No One Expects  
the Spanish  
Acquisition”

# Star Model BM 9mm

By Peter Caroline

I spend entirely too much time pursuing what my friend Bill Berlat irreverently refers to as “catfish anchors”...oddball guns, guns with a history, guns used by good guys and bad guys, soldiers and civilians, cops and crooks, winners and losers. This past year, at the NRA Whittington Center, I picked up two WWI veterans, a Model 1914 Mauser 7.65mm pocket pistol and a Hungarian Model 1912 Frommer Stop, also chambered in 7.65. A couple of years ago, I acquired an Israeli police surplus *Fabrique Nationale* 9mm High Power, with the police officer’s name, in Hebrew, inscribed on the bottom of the magazine. More recently, I picked up a Spanish Star Super in 9mm Largo, so my Astra Model 400 wouldn’t feel lonely. Years before, I had owned an Austrian Steyr Model 1912, in 9mm Steyr caliber, that was involved in a murder investigation, but that’s another story. Back in those days, there were boatloads of fascinating old guns being brought in by

Interarmco and other importers, but GCA 1968 restricted that flow.

Several weeks ago, I was sorting through the day’s email offerings, and I spotted another fascinating “catfish anchor.” AIM Surplus ([aimsurplus.com](http://aimsurplus.com)) had a batch of Star Model BM 9mm pistols, purportedly “in excellent condition with very minor finish wear, if any.” These all came with the original factory box and one 8-round magazine. The Star Model BM was carried by Spain’s *Guardia Civil*, a militarized national police force, from the 1970s to the ‘90s. It follows Browning’s 1911 design, in that it has a swinging barrel link, but does not incorporate a grip safety. It also features an external extractor and a pivoting trigger. AIM Surplus’s asking price was \$259.95, which seemed reasonable, depending on condition. Of course, I ordered one.

When the pistol arrived, it was indeed in the factory box, which was in less-than-wonderful condition. Included was a factory manual, in Spanish, and a cleaning rod. The pistol inside, amazing-

ly enough, looked almost brand-new, with no holster wear. The serial number (there were actually three different serial numbers on the gun) matched the serial number on the box. A "78" on the right-hand side of the trigger guard indicates the year of manufacture. The gun weighs 34.3 ounces, unloaded, and is the same height as a Commander-sized 1911 and half an inch shorter in length. The thumb safety is unusual in that it can be applied in both the usual full-cock position and also with the hammer fully down, but not with the hammer in half-cocked position. Moving the thumb safety to Off results in a "Clack" nearly as loud as a .22 Short. It certainly announces your intentions. The magazine holds 8 rounds of 9mm Luger, and has a spring-loaded button in the baseplate for disassembly.

The trigger on this pistol is surprisingly good. There is a 1/8" initial movement, followed by a 4-1/4-lb. pull. For whatever reason, however, the designers incorporated a magazine disconnect safety. The good news is, this dubious feature is easily discarded. Simply remove the right-hand grip and, using a thin screwdriver, pop out the vertically mounted safety bar. Once this is accomplished, the gun has a delightful 3-1/2-lb. trigger pull. The sights are

very simple...black, drift-adjustable square-notch rear, square black front. The rear sight may have to be opened up a bit for more definition.

At the range, my suspicions about the sights were confirmed. The front sight completely filled the rear sight notch, and at 10 yards the groups were right on for windage and about 4" high. Off-hand 5-round groups ran about 1-1/2" – 2", thanks to that 3-1/4-lb. trigger. The Star Model BM is a pleasure to shoot. It has a nice heft to it, and the only plastics involved are the fully checkered black plastic grips. Recoil is negligible, even with CorBon 125-gr. +P JHPs, and the gun happily consumed a mixed bag of ammo odds and ends.

Purchasing used guns unseen can be a chancy business. I recall, back in the 1970s or '80s, ordering a bunch of Mauser C96 broomhandles that had just been brought in from China. They were a sad lot, requiring much refinishing and internal tinkering in order to function. Other guns I ordered were typical law enforcement surplus, with lots of carry wear, but internally almost new. Military guns were either battle-worn or arms room stored. But all were an education in firearms design...and endless conjecture about their owners and history.

**"...the only plastics involved are the fully checkered black plastic grips"**

## More Left-Wing Gun Myths *Continued From Page 47*

these mythologies to keep themselves safely ensconced in fantasy worlds, and want to force you there with them. This deserves serious study.

The BITS myth is so clearly defined and so easily observed now in all 50 states, it adds support to hoplophobia diagnoses, the morbid fear of guns, which the medical community wrestles with and would largely prefer to reject. Sufferers deny their symptoms but display them, refuse treatment or analysis, and it is well past time to stop sweeping this under the rug. They are enhancing crime, deterring self defense, harming the nation and denying civil rights – which they claim to support. National carry-rights restoration depends on stopping them. Control the control freaks, free the rest of us, help stop crime. American self-reliance depends on it.

### THE IF-YOU-LIKE-YOUR-GUNS-YOU-CAN-KEEP-YOUR-GUNS MYTH

Every Democrat who has graced a debate stage, and the ones left standing when the smoke cleared, assured Americans they had no intention of taking away anyone's guns. But – they did support every firearm restriction proposed so far. The shoe dropped when they supported – here it comes again – so-called "common-sense" gun laws, like the ones Australia enacted. They must figure we can't tell a myth from a missile launch.

Australia confiscated huge numbers of guns from the public and had them destroyed. It's public record. The photos circulated worldwide. With that, Obamabots and the deep state are openly promoting gun confiscation, the gloves are off. The idea that they are in favor of letting Americans keep their guns makes as much sense as believing in the Roman god of wine (sic) and debauchery.

Democrats in various states have also moved to subarming people if they can't disarm them yet. This is the process of decreasing what you can have, so your guns are smaller, with less capacity, accuracy, speed and leaves you at greater risk when facing an adversary, whether in a constitutional balance of power or in simple criminal confrontations (which might be the same). New York subarmed its residents to seven-round magazines. Intelligent people know, in confrontations, less ammo is more dangerous – unless you believe in myths, where fewer guns and less ammo makes you safer. Even anti-gun politicians know that's phony – when it comes to their bodyguards.

Alan Korwin's website [GunLaws.com](http://GunLaws.com) features plain-English books describing your gun laws, and more common sense like you just read. Winner of the 2017 Defender of Liberty Award and the author of 14 books, he invites you to write to him, and stay safe.

# 50 "Big Fifty Reloader"

## STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2" -12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for **ONLY...**  
**\$1119<sup>95</sup>**  
**O42-50000**

**Now Available!**  
**.408 CheyTac Conversion**  
**O42-50204 \$149.95**  
*(Dies NOT Included)*

Total price as pictured here with optional accessories: \$2789.75

.50 BMG Carbide Size Die	O42-50075	\$969.95
.50 BMG Case Trimmer	O42-50050	\$399.95
BFR Mounting Post (50.5" High)	O42-50150	\$289.95
BFR Mounting Hardware Kit	O42-50140	\$9.95

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2" -12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**O42-50050, \$399.95**

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2" -12 UNF thread, and is manufactured to low chamber tolerance specifications.

**O42-50075, \$969.95**

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

**O42-50125, \$77.95**

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**O42-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

**O42-50001, \$334.95**

### E.(1) PRIMING CONVERSION

Converts Swager to Priming System.

**O42-50003, \$79.95**

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

**O42-50002, \$334.95**

### F.(1) SWAGER CONVERSION

Converts Priming System to Swager.

**O42-50004, \$79.95**

### EXTRA "BFR" TOOLHEADS

**O42-19831, \$189.95**

### RCBS .50 BMG LOADING ACCESSORIES

.50 BMG Powder Measure **O42-21896, \$114.95**

.50 BMG Seat/Crimp Die **O42-21895, \$139.95**

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner **O42-10252 \$24.95**

## Dillon's Bench Wrench Fits 1" Die Lock Rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to

re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	O42-14067	\$1.60
5-Pack of Die Lock Rings	O42-10669	4.95
1" Dillon Bench Wrench	O42-10842	7.95
<i>(Buy two or more 1" Bench Wrenches for \$7.10 each)</i>		
Wrench/Lock Ring 5-Pack	O42-10668	9.95

# Grace USA Gun Care Tool Set

This custom designed 12" x 9" x 1-1/2" case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

Grace USA Gun Care Tool Set **O42-10680** **\$99.95**

## More Great Tools From Grace USA!

The **9-Piece Ball-End Allen Head Screwdriver Set** includes the following sizes: 1/16", 5/64", 3/32", 7/64", 1/8", 9/64", 5/32", 3/16", and 3.5 mm. Each is constructed of US 8650 Chromium-Vanadium steel alloy and is proudly Made in USA!

Ball-End Allen Set **O42-15063** **\$49.95**

The **7-Piece Steel Roll Pin Punch Set** includes the following sizes: 1/16", 5/64", 3/32", 1/8", 5/32", 3/16", and 7/32". Each is proudly Made in USA!

## Comtech's STINGER

**T**HE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes unnoticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

O42-19495 \$9.95

## Arredondo Accessories' Multi-Gun Chamber Flags

Made of tough nylon with a melting point of 480 degrees. Kit includes one shotgun chamber flag and one for your AR-15.

O42-15485 \$11.95

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

# 60 HOGUE®

## Laser Enhanced (LE) Grips

Want immediate gains in your confidence when handling your 1911? Follow the red dot! Hogue's new laser-enhanced grip for your classic 1911 will dramatically improve your accuracy and speed in any defensive or competitive scenario. Designed, engineered and hand-made in America, proudly wearing the Hogue name, your new LE Grip will make almost every kind of shooter – including you – better and faster. Period. Also available for J-Frame Smith & Wesson revolvers.

LE 1911 Grip, Black **O42-43243 \$189.95**  
 LE J-Frame S&W Grip, Blk. **O42-43244 189.95**

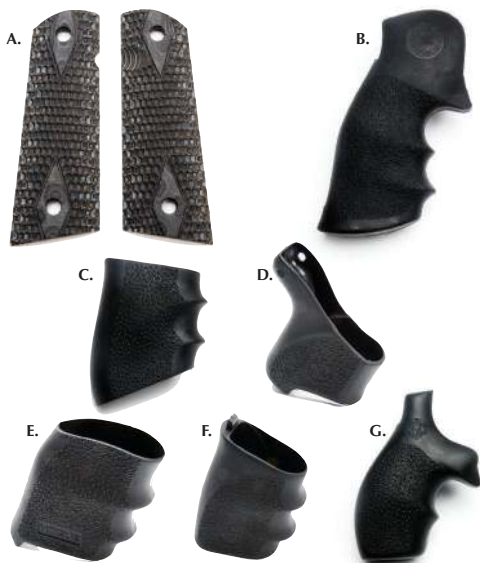

**Hogue Rubber OverMolded® AK-47/74 Handguard Kits**  
 (K.) Standard Russian/Chinese Rifles **O42-14556 \$49.95**  
 Yugo-Version Rifles w/Longer Guard **O42-14558 49.95**

The ERGO Grip Delta Grip™ is the first truly ergonomic grip for J-Frame revolvers. Designed for the most important part of the gun, the shooter, the Delta Grip was engineered to fit the natural point of aim and mechanics of the human hand, wrist and arm. The result is a grip with a superior natural point of aim, comfort and control. Fits round butt J-Frames. Will not fit on Smith and Wesson Bodyguard 38 Model (sku 103037 and 103038).

**O42-19684 \$19.95**

## CASPER THE FRIENDLY

Casper the Friendly Ghost Gun was built up on a Brownells slide and Polymer80 frame. The optic used was a Trijicon RMR.

By Duane Thomas

Recently I used one of Brownells new aftermarket GLOCK slides to resurrect from the dead a GLOCK 19 with a broken slide rail. I knew Brownells ([brownells.com](http://brownells.com)) also marketed slides set up to work with the Trijicon ([trijicon.com](http://trijicon.com)) RMR red-dot sight. Having had such a positive experience with their GLOCK 19 slide, also wanting to begin experimenting with carry optics, and being in possession of a Trijicon RMR, obviously I needed to call up Brownells and get one of their RMR-cut GLOCK 17 slides and a Polymer80 ([polymer80.com](http://polymer80.com)) frame.

The Polymer80 frame has become hugely popular. The idea being a frame that's only been 80% completed requires no serial number, thus can be purchased without the hassle of filling out paperwork and/or possessing an FFL. So the Polymer80 frame is deliberately left unfinished, but the areas needing completion can be whittled into functionality using only a Dremel tool. Sounds like a recipe for disaster, frankly, and, if I can believe the Internet, a lot of people trying to assemble functional firearms on Polymer80 GLOCK frames have found it a very frustrating experience from a reliability standpoint.

The Polymer80 frame comes with a jig to locate frame holes to be drilled, and there are areas of the "kit" frame that need to be removed entirely. After watching multiple YouTube videos on the process, honestly it didn't seem that complicated to me. I have to say, I do wonder why the YouTubers all find

it so important the top of the frame, after Dremeling, be absolutely smooth, even going so far as to sand those areas down with fine grit sandpaper. Maybe having everything look all nice and purdy gives pride of ownership, but from a functionality standpoint those areas don't actually TOUCH anything, they don't rub against the slide at all. So who cares if they're perfectly smooth? That has absolutely nothing to do with the gun cycling.

To start with, no, the first time I ever assembled the gun, it did not hand-cycle at all well. But it was obvious where the problems were occurring (more about which shortly), and I massaged things until the Brownells carry optics slide/Polymer80 frame hybrid dry-cycled as nicely as any factory GLOCK I've ever handled, and better than some. Of course, the real test would be firing it with live ammo.

Discussing this project with my friend Rita, I said, "I really need to come up with a shorter way of referring to this gun. I've been calling it my 'Brownells carry optics slide-slash-Polymer80 frame hybrid.' And that's just way too many syllables. I think I'm going to call it the BP80. Get it: Brownells/Polymer80."

She replied, "I think you need to come up with a real NAME for it. Like a person name."

I said, "Okay, the mainstream media likes calling guns built up on 80% frames, that don't have serial numbers, 'ghost guns.' How about I call it Casper? Casper the Friendly Ghost Gun."

"Perfect."

# FRIENDLY GHOST GUN

Casper the Friendly Ghost Gun was accuracy and reliability tested with 11 different loads, including the Black Hills 115-gr. JHP +P and 124-gr. JHP; Hornady 124-gr. XTP +P and 147-gr. XTP; Super Vel 90-gr. JHP +P and 115-gr. JHP +P; Wilson 115-gr. TAC-XP +P, 124-gr. XTP +P and 147-gr. XTP Subsonic; Winchester 124-gr. SXT +P; and my practice/match load consisting of the Rainier 151-gr. RN over VihtaVuori N310 powder.

Accuracy was tested with 5-shot groups from the bench at 50 feet, the maximum distance possible at the Shelton Rifle & Pistol Club indoor range. Unfortunately, the Trijicon suppressor sights shot 5" to 7" high depending on the load; all groups for record were fired using the red dot. Sorting out the backup iron sights on this gun will be an ongoing project. The good news: zeroing the dot was quickly and easily accomplished. Of the 11 loads tested, five went into 2" or less. In first place, the Super Vel 115-gr. JHP +P gave a tight 1.2" group. The Black Hills 124-gr. JHP was at 1.4". The Wilson 147-gr. XTP Subsonic came in at 1.9", and both the Wilson 115-gr. TAC-XP +P and Wilson 124-gr. XTP +P were at 2" even. Which, considering this gun was simply running an old Lone Wolf drop-in barrel I happened to have laying around, is pretty darn impressive.

Reliability-wise, the gun worked perfectly with everything. It fed, fired, extracted, ejected, fed again, locked its slide to the rear when empty, and dropped its magazine when I punched the mag button. All the things an autopistol should do.

While all that "I built up a gun on a Polymer80 frame, and took it to the range, and it worked perfectly right off the bat" stuff sounds great, I will say that putting together a gun using the Polymer80 frame is not a job for a person who doesn't, on a basic level, understand how GLOCK work, who cannot diagnose problem areas and rectify them even before that first range session. Anyone who thinks they're just going to throw a bunch of random parts onto a frame and wind up with something that works will be sorely disappointed.

For instance, while on a factory GLOCK the front frame rails and the locking block are different parts, on the Polymer80 they're one unit, an insert that fits into the frame. Fair enough, but I found it necessary to remove material from the top of both front frame rails, then polish their tops to boot, before the slide would move smoothly back-and-

forth on the frame. Also the locking block portion of the insert was literally too wide to fit down into the corresponding hollow in the frame, it needed to be thinned on both sides.

The rear frame rails are part of a squared-off-Omega-symbol-shaped piece of sheet metal that fits down into frame around the trigger module. As-issued the sides of this part angled out from each other – they should have been parallel – also the part was overall too wide to fit well into place. Lightly compressing it with a vice, which did slightly over-bend it, then unbending it with my fingers til the "walls" of the part were parallel, was necessary to make it slide easily into place. Even then, the slide rails angled upward, instead of being horizontal, came up too high, and the tabs *per se* were way too wide. I lightly tapped

back-and-forth along the length of both rear frame rails with a wide brass punch until they were horizontal, which simultaneously lowered them, then trimmed off side-to-side excess with a Dremel, then rounded off and polished the sides.

The firing pin slot in the Brownells slide was a bit tight to allow smooth back-and-forth movement of the firing pin lug. Fortunately, polishing, and therefore necessarily

somewhat thinning, that lug is part of doing a trigger job on a GLOCK. Just be careful, when you do that, you don't cut through the nickel coating and into the underlying steel. No matter how smooth you polish steel, it will never be as slick as nickel; if you cut through the nickel, your trigger pulls will get much heavier, not lighter. Essentially, the part is ruined. This is job for exacting hand work, using multiple stones of progressively finer grit, then a final polish with a felt wheel and Flitz.

Not a functional issue, but out-of-the-box the Polymer80 frame has a "double undercut" trigger guard, complete with hooks and swoops and angles all over it, that has to be the goofiest looking thing I've ever seen. Some judicious attention with a belt sander turned that into something that actually, given my own aesthetic sense, looks really good.

Once I worked over the locking block, all four frame rails, and fit the firing pin to the slide, the gun then "instantly" worked perfectly when I took it to the range. Casper the Friendly Ghost Gun is up and running! And it's the friendliest gun you know.

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mauser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag, .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, O42-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are ideal for Reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em - you just can't beat 'em! Buy several and get your "stuff" together.

# Swab-its – A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60+), Lite is a thinner viscosity for lower temperatures (F30+).  
Slide-Glide Standard O42-15571 \$7.95  
Slide-Glide Lite O42-15572 7.95

**Microton UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

O42-75125 \$9.95

## Sweet's Australian 7.62 Solvent

Sweet's 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

----------------------	------------------	---------------

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

# 70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

**E**lite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature spe-

cial grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

All ETS magazines are translucent and resistant to extreme impact, harsh chemicals, extreme heat and cold, and UV. They won't become brittle over time.

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 as pictured w/o riser **O42-11643 \$89.95**  
TRS-25 with riser **O42-31318 \$119.95**

## Scout Scope Mounts for AK, SKS Rifles

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **O42-25374 \$79.99**  
Scout Scope Mount for SKS Rifle **O42-25373 78.99**

# WHAT DO YOU CALL...?

By **Brian Dervin Dillon, Ph.D.**

Most people of my generation know the old joke: “What do you call a rifle shooter that is too old and too blind to shoot anymore? A Shotgunner!”

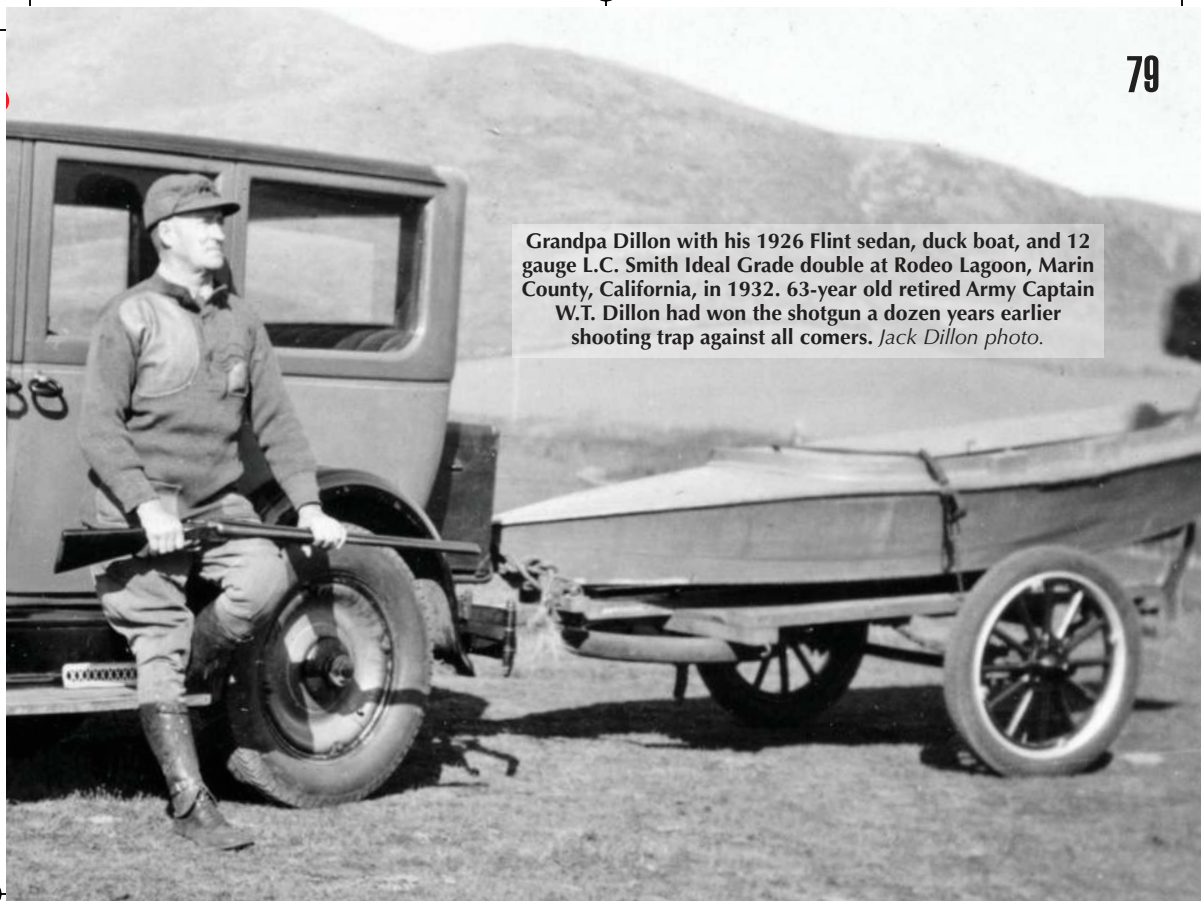

Being a very good shotgunner does not automatically confer marksman status on you once you switch to rifle, and vice-versa. And neither skill really helps much in your pistol shooting, either. This is because the grip, stance, sight picture and, most of all, the mindset necessary for shooting each of the three different kinds of firearms is completely different. I am one of the few people in this country that has put plenty of big tropical birds (turkeys, guans, tinamou, chachalacas, curassow, etc.) on the table, taking them with a .22 rifle, long ago and far away, and not in this jurisdiction. I have also occasionally hit doves in flight with a .22 pistol (a Ruger Single-Six with 9-3/4-inch barrel), but only when they rise up out of irrigation ditches, and fly “straight and narrow” directly away from me. And these are taken with 40-grain round-nose bullets, not .22RF bird-shot: I reserve that latter round for vampire bat abatement inside Central American caves too narrow for swinging badminton rackets, the preferred anti-vampire weapon.

So I seldom pass up an opportunity to tell overweight millionaires with \$27,000 Perazzi shotguns that using scatterguns on our poor,

defenseless, feathered friends is cheating – wasted words, since most such wealthy shotgunners only “hunt” clay pigeons on luxurious ranges they can drive to. Nevertheless, there comes a time in the life of every aging rifle and pistol shooter when, along with hair loss and an expanding waistline, shotguns get included more and more often in the daily firearms diet. I seem to have almost as many shotguns in my gun safe as rifles – all but a few of them in that most useful bore size, 12 gauge. And, in pride of place amongst all of my pumps, semiautos, singles and doubles is my grandfather’s L.C. Smith Ideal Grade that he won in a trapshooting competition at Camp Lewis, Washington, in 1920.

Grandpa Dillon’s L.C. Smith was made in 1920. Its beautiful featherweight receiver is case-hardened and has light engraving. It has multiple ivory bead sights, and very fine wood was selected for its stock and forepiece: it was one of just over 18,000 Ideal grade 12 gauge doubles made between 1912 and 1950. Many shooters consider L.C. Smith shotguns, affectionately nicknamed Elsie’s, to be the best hammerless sidelock guns ever made in America. My grandfather liked his so much, he bought a second one, a used, Field Grade 12 gauge double, made in 1919, to give to his second son, John A. (Jack) Dillon (1915-2001).

The L.C. Smith Company was the 1877 brain-child of Lyman Cornelius Smith (1850-1910), a

Grandpa Dillon with his 1926 Flint sedan, duck boat, and 12 gauge L.C. Smith Ideal Grade double at Rodeo Lagoon, Marin County, California, in 1932. 63-year old retired Army Captain W.T. Dillon had won the shotgun a dozen years earlier shooting trap against all comers. Jack Dillon photo.

financier who worked with various designers over a nine-year period before producing his first hammerless shotgun in 1886. Smith abandoned gun-making in 1889 to venture into the manufacture of typewriters; eventually, this new concern would be called Smith-Corona. Meanwhile, the L.C. Smith shotgun company was taken over by Hunter Arms, which continued the line until 1945, when it was assumed by Marlin Firearms. The best source of information about these wonderful old hammerless doubles is the L.C. Smith Collectors Association, which assigns dates of manufacture by serial number, and has a question-and-answer Internet forum.

The other half of Grandpa Dillon's 1920 trap-shooting first prize award was a high-dollar Hamilton Model 950 gold pocket watch, inscribed:

"Presented by H.R. Everding, Portland Oregon, to Tacoma Gun Club, 1920,  
Won by Capt. W. T. Dillon"

Grandpa Dillon (1869-1938) had been sent to Camp Lewis after his Great War combat service, followed by a six-month postwar stint running elements of the St. Nazaire outshipment port. After returning to the United States, Captain Dillon was presented to both Houses of Congress in September 1919. He was briefly reunited with his family at the San Francisco Presidio, then was sent north to his new assignment. Within only a couple of

weeks he had bounced between "both Washingtons," D.C. and State.

All of Blackjack Pershing's battlefield commissions were overturned by his political enemies back home in the 'States, who were still jealous of Pershing's meteoric advancement, success, and international popularity. So, Grandpa Dillon, who had been a 1st Sergeant on the Mexican Border in 1916, then a Lieutenant Colonel in France in 1918, was bumped back down to his permanent "Stateside" rank of Captain in 1919. Pershing softened the blow by giving Captain Dillon command of one of the top units in the now rapidly shrinking U.S. Army, the 59th Coast Artillery Company. Employing 8-inch Hotchkiss field guns, the 59th was one of the very first American artillery units to be completely mechanized, with giant Holt tractors as prime movers. But that is another story, for a future *Blue Press* issue.

Camp Lewis, named after famed explorer Meriwether Lewis, had been created only after our declaration of war in April 1917. The post was built in southern Pierce County, near the city of Tacoma. In November 1917, there were 45,000 doughboys training for shipment to France at Camp Lewis. Then, after the Armistice, the base became a separation center, with 300 to 500 Doughboys per day discharged back to civilian life. By the time Captain Dillon arrived in October 1919, its population had dwindled away to only a few thousand troops.

**Captain W.T. Dillon's L.C. Smith 12 gauge Ideal Grade double, with ivory bead sights, custom hand guard, monogrammed case and lace-up recoil pad, original cleaning rods and barrel proof tag. My grandfather won this beautifully made shotgun, along with a gold watch, in a 1920 trapshooting competition as a member of the Tacoma Gun Club while stationed at Camp Lewis, Washington. *Dillon photo.***

Camp Lewis eventually became the home of the 3rd Infantry Division, and also a few independent units like Dillon's own 59th Coast Artillery Company. In the U.S. Military vernacular, "Camps" are temporary establishments, usually created during times of national emergency, while "Forts" are permanent bases. Most "Forts" began life as "camps," but very few of the dozens of WWI and later WWII camps survived postwar cost-cutting. Most were "downsized" out of existence by the typically American aversion to all things military, which characterized the national attitude during the 1920s and again in the late 1940s. Camp Lewis, however, survived. It was formally re-designated Fort Lewis in 1927, during the tenth year of its existence. Camp/Fort Lewis always had a close and amicable relationship with its nearest civilian neighbors at Tacoma; in fact, Tacoma civic leaders had been instrumental in getting the camp built in 1917, by petitioning the Washington D.C. decision-makers and by donating the land for the military base free of charge.

By 1920, Captain William T. Dillon had fought his last war of many, on no fewer than four different continents (Africa, Asia, America and Europe) over twenty-two consecutive years of service. He had been badly gassed on the Western Front, and his final years of active duty were increasingly punctuated by temporary residence within the gas wards of a succession of military hospitals. There, like so many of his fellow World War I vets, he spent many days "coughing his lungs out," as the cruel but accurate contemporary saying went. No longer a Spring chicken, he was now 50 years old, still trim and fit, but suddenly bald. He told his four sons that his WWI "tin hat" had rubbed all of his hair off. And, for the very first time in a long lifetime of superlative accuracy with rifle, pistol, and long-range artillery, he was beginning to have vision problems. He finally surrendered to the inevitable, and got prescription glasses, which he

never wore while either leading troops, or within sight of military superiors. Captain Dillon, who had always been an avid duck hunter, now, at Camp Lewis, took up that "rich man's hobby," trapshooting, in his spare time. The Tacoma Gun Club, through its close relationship with Camp Lewis, made Grandpa Dillon's new pastime convenient.

The Pacific Northwest in 1920 was a hotbed of trapshooting, largely through the efforts of one energetic and persuasive man: Henry Everding, of Portland, Oregon. "Hy" Everding was a prominent businessman, sportsman, award-winning trapshooter, and shooting sports booster. He was the son of Henry Everding, who had come to Portland in 1864, and began a grain, feed and produce business that soon expanded into the buying and selling of other commodities. Everding's uncle Richard was the partner of Sylvester Farrell, another early Portland entrepreneur: the firm of Everding and Farrell became a dominant force in the Salmon canning and packing industry on the Columbia River, on Puget Sound, and in Alaska.

Hy Everding is considered by most Americans to have been the "Father of Trapshooting" in the Pacific Northwest. He divided his time between Los Angeles, California, and Portland, entering and winning a great many shotgun competitions up and down the Pacific Coast, mainly 50- and 100-bird shoots. By 1915 he was the President of the Portland Gun Club, a member of the Oregon Sportsmen's League, a director of the Oregon State Trapshooters Association, and also a director of the Sportsmen's Association of the Northwest. The following year, 1916, the "big shoot" was held at "Everding Park," the home range of the Portland Gun Club, and the creation and namesake of Hy Everding's wealthy family.

In 1915, the *Morning Oregonian* claimed that the "Portland Gun Club...[has] the best facilities and location of any club west of the Rocky Mountains...." Two years later, Everding Park was

described in a 1917 *Arms and the Man* (the Official NRA publication that eventually became the *American Rifleman*) article:

"The Portland (Ore.) Gun Club has expended \$2,000 in improving Everding Park until now it is one of the finest trap-shooting parks in the world [with] concrete trap houses, concrete stands for the shooters, cement walks, flower beds, [and] permanent benches have been put in."

That same year, at San Jose, in the Pacific Coast Introductory Match, Hy Everding took first place, breaking 98 of a hundred clays at 18 yards. Everding and his associates sponsored women's shoots, midnight shoots illuminated by the full moon, or by electric spotlights, and many other kinds of competitions. Interest in trapshooting exploded after World War I, and the U.S. team swept the 1920 Olympics. Then, in 1921, the shooting sport sweeping the nation culminated in an indoor trapshooting exhibition at Madison Square Garden, in New York City.

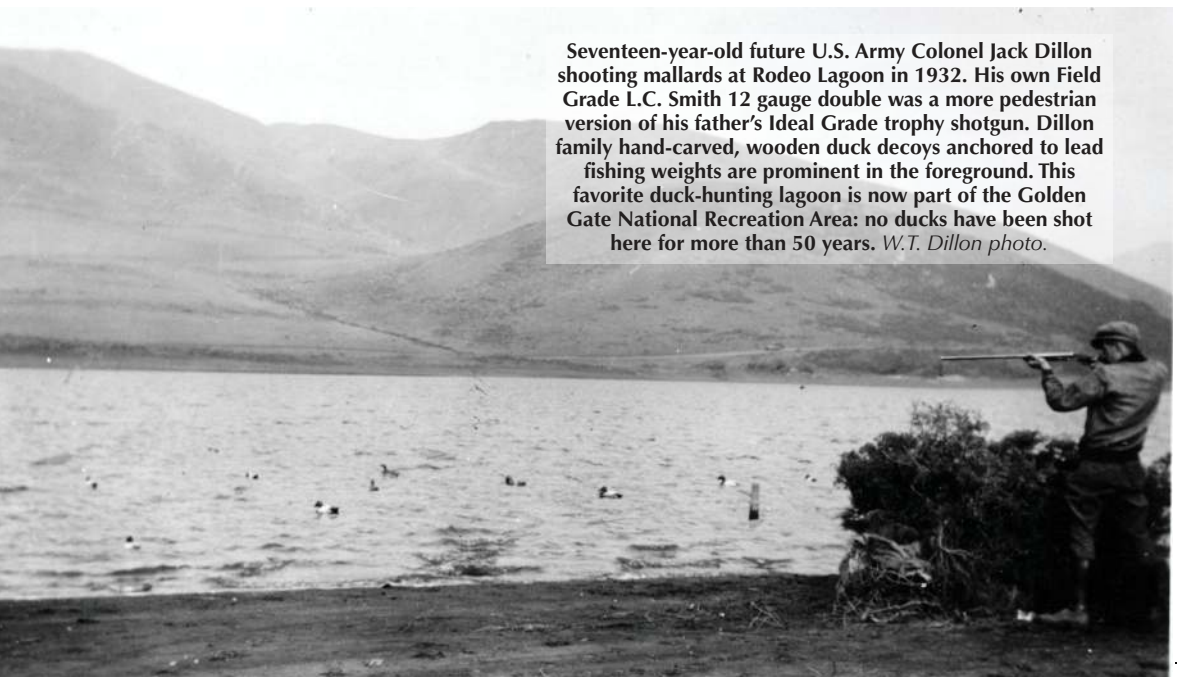

One of the very best shots in the country was Vancouver, Washington's 1920 Antwerp Olympics Silver Medalist Frank Troeh, who also took the national honors that year. Troeh (1882-1968) was an absolutely phenomenal shot, who won his first trapshooting competition in 1912, and continued competing until 1959. The year before Grandpa Dillon's big 1920 win, civilian shotgunner Frank Troeh was the 1919 champ and gold watch winner. Troeh was the best shot in four Northwestern states, and the Northwest Tournament Champ, shooting with an "\$11.25 dollar second-hand shotgun." We don't know for certain, but think that Troeh was off in Europe, trouncing foreign shotgunners when Captain Dillon scored his 1920 victory against all other civilian and military trap-

shooters at Camp Lewis; otherwise, the laurels would most likely have gone to the much younger Vancouver shooter who seldom, if ever, missed.

Captain Dillon's service as the commander of the 59th Coast Artillery Company at Camp Lewis was his final time commanding troops. He returned to the Bay Area in 1921 to serve in various capacities at the San Francisco Presidio. He then became the "caretaker commander" of his old base, Fort Baker, across the still bridgeless Golden Gate, when the post was "mothballed" in the mid-1920s. Also put under his care was the even smaller and more isolated Fort Barry, "over the hill" from Fort Baker. Captain Dillon's "tailgate" assignment was not without its benefits, for, as the guardian and protector of Baker and Barry, my grandfather had unlimited access to one of the best duck-hunting locations in Northern California.

Rodeo Lagoon was completely surrounded by the military reservation Captain W.T. Dillon was responsible for. On his regular inspection tours, he not only evaluated the condition of the roads, buildings, and other man-made facilities of the now-vacant Marin forts, but also the Rodeo Lagoon duck population. So, during the 1920s and into the '30s, many a Fort Barry, California, mallard fell to the fine L.C. Smith Double that Grandpa Dillon won breaking clays a lucky 777 miles north, at Camp Lewis, Washington. They also fell to its poor relation, the L.C. Smith field grade gun, in the hands of the next Dillon generation, my Uncle Jack, as well. Both of these American-made shotguns, now approaching a hundred years of age, still remain in the family. And, of course, a third Dillon generation still shoots them, occasionally joined by a fourth.

**Seventeen-year-old future U.S. Army Colonel Jack Dillon shooting mallards at Rodeo Lagoon in 1932. His own Field Grade L.C. Smith 12 gauge double was a more pedestrian version of his father's Ideal Grade trophy shotgun. Dillon family hand-carved, wooden duck decoys anchored to lead fishing weights are prominent in the foreground. This favorite duck-hunting lagoon is now part of the Golden Gate National Recreation Area: no ducks have been shot here for more than 50 years. W.T. Dillon photo.**

# 101 Classic Firearms by John Marshall <sup>83</sup>

John Marshall's book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, is a compilation of the author's popular articles appearing in *The Blue Press* since 2007. **101 Classic Firearms** is sure to be a prized addition to the library of any serious firearms enthusiast.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on some of the world's

**042-40133 \$29.95**

most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. John is also an endorsement member of the National Rifle Association.

## Elftmann Tactical SE Drop-In Trigger

The ELF-SE Drop-In Trigger for mil-spec AR-15s features an extremely short takeup; a clean, crisp break; and a very short, positive reset with a non-adjustable 3.5-lb. pull weight. The total physical weight of the entire trigger unit is 2.3 oz.

**042-10007 \$169.00**

## OPSol Mini-Clip™

Allows the use of 12 Ga. 1.75" Birdshot, Buckshot and Slug shells. Fits 12 Ga. Mossberg 500, 590, 590A1 and Maverick 88 models

The OPSol Mini-Clip™ was designed to give "well seasoned" and "recoil sensitive" shooters the capability of shooting the trusty Mossberg 12 Ga. platform without the usual recoil response. By using The OPSol Mini-Clip™ in conjunction with 1.75" shotgun shells, shooters stay in the game without all of the pain. The Mini-Clip enables owners of Mossberg 12 Ga. shotguns to use Aguila Minishells reliably for training, practice, recreational or home-defense applications.

**042-10471 \$14.99**

## New Designs From Kershaw Knives

**Kershaw Knives** and **Emerson Knives** have joined forces on a series of knives that combine the precision engineering of Kershaw with Emerson's uncompromising functional design.

The CQC-6K features a modified clip-point blade for versatile cutting ability. The blade has two finishes: a satin finish on the upper and a stonewashed finish on the grind. The handle's front scale of textured G-10 offers a secure grip and the handle's stainless steel back has a solid frame lock.

The CQC-6K is a manual opener using either the thumb disk or the patented Emerson "wave shaped feature." This opening feature enables the knife to be opened as it is removed from the pocket. The pocketclip is reversible for left- or right-handed carry.

Blade length: 3.25" Closed: 4.5" Open: 7.75"

**042-31320 \$54.99**

Designed by Belarusian custom knifemaker Dmitry Sinkevich, the new **Kershaw Pub** looks like nothing you've ever seen.

Closed, you'd never know there was a handy blade inside – although you would definitely see the equally handy bottle opener. And if you were exceptionally sharp-eyed, you might notice the slotted screwdriver tip right next to the bottle opener.

To reveal the blade, just push down on what looks like the key ring attachment. You'll see the blade move out of the compact handle. Keep pushing and the blade will swing all the way out, ready for use. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip. The handle has an anodized aluminum front scale in bright blue and a steel back.

Blade length: 1.6" Closed: 3.1" Open: 4.5"

**042-31323 \$24.95**
