NOW STANDS FOR  
EVERYDAY CHOICES

The **Ruger® EC9s™** comes with no gimmicks, rebates or mail-in offers for gift cards... just the rugged, reliability of the striker-fired LC9s®, now with integral sights and a no-hassle price point that won't break the bank.

The **Ruger® Security-9®** is an affordable, rugged, mid-sized pistol that provides everyday security in the perfect caliber, size and price point.

**WHY CHOOSE BETWEEN THEM  
WHEN YOU CAN HAVE BOTH?**

## Dillon's RF 100 Automatic Primer Filler

*Eliminates the need  
for primer pick-up tubes!  
Fills the primer tube  
while you reload!  
Clear polycarbonate shield  
and protective housing*

Dillon's RF 100 Automatic Primer Filler<sup>^</sup> eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$50.95 each.

**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that take effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

# We READ Our Mail!

I just read your article on Lena Miculek; it's one of the best articles in a long time. I watch her and her family shooting on their "Shoot Out Lane" show. I watch all the time, the whole family is great and fun to watch. Keep articles like this coming. Thanks!

Walter Metz - bjmetz@comcast.net

Thanks Walter! It really was a great article, other than my misspelling of Lena's last name on page 79 when I did the layout.

Regarding *The Blue Press*, September 2018: Even as a disabled senior, I've had the pleasure to squad with Lena, Jerry, and Kay Miculek three times at 3 Gun national meets (I was lucky to get in). All are very approachable, super skilled, and willing to share knowledge, but Lena really stands out as a tactician and businesswoman. She really is how you described her. Good article.

Leslie Watkins - fasterthan911@hotmail.com

P.S. - You spelled her name wrong on page 79.

Hi, Leslie! Yeah, nothing like making an error in 24-point display type to get everyone's attention. I've already apologized to Lena, by the way.

In the September *Blue Press*, Connie Bowlby's article about GSSF has an error in that it states GSSF moves you to master after four wins. It's actually three wins (as top amateur in any division), and then you're a master.

Jon Lewis - jlewis@lewis.org

After eight years and 80,000+ rounds, my 550 was getting a bit cranky. Called Tech Support and they were able to diagnose the problem over the phone. A couple of days later replacement parts arrived, no charge. I'd buy a rock from your company, as I know it would be backed by your warranty. What a way to support your products and what a legacy to Mike. Thanks for doing business in such an ethical manner!

Jim O'Reilly - Prescott Valley, AZ

Thanks, Jim! What caliber rock are you interested in buying? I have one with a polymer frame that I'd let go pretty cheap right now.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# 10 Laws We Need, and Why Your Vote Matters! 11

By Alan Korwin  
**National Carry Matters**

How long do you think we're going to have to wait for H.R. 38 to pass? H.R. what? You know – the National Reciprocity Act, where your right to carry a firearm doesn't end at your state line. It's the law designed to remove legal obstacles that deny your firearm-carry rights. Unlike marriage and driver licenses, your carry license, or even your Constitutional Carry rights, become null and void when you step over an invisible line into the state next to yours.

That good law was introduced on January 3, 2017 – after Mr. Trump was elected but before he even took office. Your vote helped put him in there. Not only did you help put him there by a good margin – 60 percent to 40 percent in the Electoral College (30 states to 20, which infuriates the people who hate the guy and love the socialist-leaning woman he locked out) – it gave him majorities in both houses of Congress. When they say your vote matters, well there it is on a platter.

But though “we” (i.e. gun owners) have both houses and the White House, somehow we still can't get National Carry passed. It went to the House of Representatives on January 12, to the Judiciary Committee, and it's still there. Your “staunch pro-gun-rights” elected officials have not moved it forward. The Senate is another roadblock. What they did do, very sneaky, is extract the part where a ton of money goes to federal agencies so more names can flow into the NICS Index, the list of who can't have a gun, and passed that, so-called Fix NICS. National Carry was left out. You voted for these people.

Funny thing is, democrats who want to take over Congress again, like they used to have under the previous guy, they've been instructed by their leadership to lay off the gun issue. It's too hot a potato. It could hurt them, infuriate the public (us) and make them lose. If that's true, why don't republicans push for more and better gun laws, encourage us, do the right thing, and while they retain power at least now, restore our rights nationwide? Why indeed.

This is where you come in. It turns out H.R. 38 is practically the least of it. We got that bill started, we all know why it's important and we want it, yet our people snookered us. They hung the bait – reciprocity – then canned that and funded the gun-ban list. If you don't know who represented you, now is as good a time as any to figure that out, and personally let them know you want the pro-rights part to move.

Establish a relationship with that office; you're going to need it. And they're going to need you, because the elections will change who's around, and if your rights are important (I know, you say they are, but will you prove it by acting?) you'll need to know who's running, and be registered to vote. Even kids are registering. They could swing things against you.

### It's Not Just About National Carry

We need important new laws that aren't even introduced yet. I've been writing a lot about infringement laws, a fresh concept. These have to start at your state level and several have started the ball rolling. The U.S. Constitution, as you know, says our right to arms “shall not be infringed.” But since the Constitution has a fatal flaw – no punishments for violating its terms – we need to introduce penalties. “Shall not be infringed” means infringement is illegal. **It is**

**banned.** Officials who infringe on you or your guns violate the Constitution under which they operate and they need to be held accountable. We intend to make it so.

Your state must join with others and define infringement in simple terms, so it is enforceable. This has been alluded to in *The Blue Press* and you'll be hearing more about it. “Banning arms or related accessories the public already legally owns is infringement.” That's straightforward, accurate and could not be clearer. The bill itself would be more detailed of course, and I'll have the technical language posted at [GunLaws.com](http://GunLaws.com) soon. The rubber meets the road with the next part of such a statute. “Taking or attempting to take an infringed item is aggravated infringement,

a felony.” Now the statute has teeth, officials are restricted and put on notice.

### Next Steps

The American Protection of Arms Act (the “aggravated infringement bill”) is just the beginning of a broad gun-rights offensive this nation needs to push back against the astounding level of anti-rights gun prejudice we're witnessing from politically active socialists and others.

Leftist gun bigots, a hopelessly biased “news” media, and now a totally misinformed public that has come to believe the many myths they've been bombarded with for years, are seeking office and promoting legislation that will send us to the dark ages. They would ignorantly arm the authorities even more heavily than they are, incrementally disarm the public, and pay inadequate attention to criminals and crazies who are the real problem.

We need to elect people who understand and will help enact defensive display laws so you're not charged if you need to show or reference your

firearm to deter crime. Your state needs frivolous-lawsuit protections so criminals and their kin can't bring you up on civil charges after you legitimately shoot people trying to harm you. We must repeal gun bans that discriminate against decent people who simply possess their constitutionally protected firearms when they travel in their neighborhoods taking care of business. The list of laws we need is long, and we'll examine and justify them one after another.

But remember this – if you don't get active politically, and help elect good people, our chances of passing good laws, and stopping horrible ones, will be a daydream our children and future generations will look back on and hold us accountable for in disgrace.

Alan Korwin's website features plain-English books on state and federal gun laws for the public, and more common sense like you just read. He invites you to write to him or see his work, at [GunLaws.com](http://GunLaws.com), where you can get books and DVDs that help keep you safe.

“Since the Constitution has a fatal flaw — no punishments for violating its terms — we need to introduce penalties.”

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM<sup>^</sup>

- Includes:**
- Primer Housing /Shield
  - Primer Slides, Large/Small
  - Pickup Tubes, Large/Small
  - Pickup Tube Tips, Large/Small
  - Magazine Tubes, Large/Small
  - Mag. Orifices, Large/Small
  - Operating Rod
  - Primer Track Bearing
  - Housing Screws
  - Ret. Spring Retaining Pin

**O86-16627, \$89.95**

### PRIMER SYSTEM EARLY WARNING<sup>^</sup>

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**O86-20302, \$26.95**

### AUTO POWDER SYSTEM<sup>^</sup>

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**O86-20251, \$95.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**O86-21353, \$32.95**

### AUTO EJECT SYSTEM<sup>^</sup>

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**O86-22120, \$33.95**

### BL 550 POWDER DIE<sup>^</sup>

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

- Powder Die: O86-16629, \$19.95**
- Oversize Die: O86-16626, \$20.95**
- Plastic Funnel: O86-16617, \$6.49**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.)

**O86-20029, \$23.95**  
**RL 450 Powder Die: O86-20308, \$22.95**

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (Page 15) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.45 each, or \$24.45 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (bottom right photo) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# RL 550C<sup>^</sup>

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for ONLY...  
**\$479<sup>95\*</sup>**

## RL 550C ACCESSORIES

**A. RL 550 CALIBER CONVERSION KITS<sup>^</sup>**  
Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**O86-RL550 CONVERSION \$47.95**  
(Exotic calibers, \$57.95<sup>^</sup>)

### B. AUTO POWDER MEASURE SYSTEMS<sup>^</sup>

Additional powder measures stay on the toolhead. Never change powder measurements again!  
RL 550 Powder Measure  
**O86-20782, \$84.95 ea.**  
Magnum Rifle Powder Bar  
**O86-21353, \$32.95 each**  
X-Small Powder Bar  
**O86-20780, \$32.95 each**

### C. DELUXE QUICK CHANGE ASSEMBLY<sup>^</sup>

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **O86-22058, \$112.95**  
Loading dies sold separately on Pages 34, 35 & 52.

### D. POWDER DIES<sup>^</sup>

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**O86-20064, \$12.95 each**  
**Three or more, \$11.95 ea.**

**X-Large Powder Die, O86-21253, \$19.95 each**

### E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**O86-13909, \$26.45 each**  
**Three or more, \$24.45 ea.**

**F. TOOLHEAD STANDS**  
The ultimate in convenience for keeping your reloading bench clean and uncluttered.  
**O86-22055, \$22.95 each**  
**Three or more, \$20.95 ea.**

**G. 1" BENCH WRENCH**  
**O86-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

### K. 550 SPARE PARTS KIT<sup>^</sup>

- 1 Seating Punch, Small
- 1 #10 Tinnerman Insert
- 1 Primer Cup, Large
- 1 Primer Cup, Small
- 1 Bellcrank Cube
- 1 3/8" Index Ball
- 1 550 Brass Tip Set Screw
- 1 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 1 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)
- 1 Seating Punch, Large
- 1 550 Index Ball Spring
- 2 Pickup Tube, Small, Yellow Tips
- 2 Magazine Orifices, Large
- 1 Toolhead Pin

**K.**  
2 Pickup Tube, Large, Green Tips  
2 Magazine Orifices, Small  
1 550 Primer Cup Spring  
2 Retaining Clips  
2 Dispensing Tip, Large  
2 Dispensing Tip, Small  
1 Failsafe Bushing Rev. B  
**O86-20048, \$19.95**

### L. MACHINE MAINTENANCE KIT<sup>^</sup>

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

**Maint. Kit & Spare Parts Kit O86-97016, \$33.95**

**M. LOW POWDER SENSOR<sup>^</sup>**  
Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

**O86-16306, \$42.95**

### N. EQUIPMENT DUST COVERS<sup>^</sup>

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550 Cover, **O86-13795, \$23.95**  
(O.) Master lock, **O86-13083, \$3.95**

Quick-Change Cover<sup>^</sup> (for use with powder measure)  
**O86-11143, \$14.95**

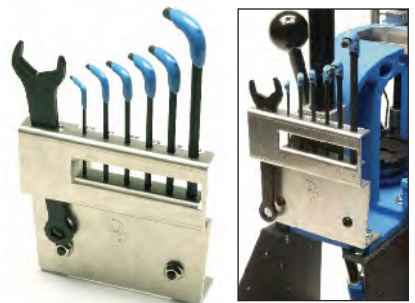

**P. UNIVERSAL MOUNTING HARDWARE KIT**  
Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.  
**O86-14355, \$5.49**

# Dillon Reloading Accessories

**Dillon's Reloading Accessory Package Deals** include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

SDB (Balance Beam Scale)	<b>O86-14482</b>	<b>\$192.95</b>
SDB (Electronic Scale)	<b>O86-14483</b>	<b>251.95</b>
RL 550 (Balance Beam Scale)	<b>O86-21143</b>	<b>191.95</b>
RL 550 (Electronic Scale)	<b>O86-22117</b>	<b>250.95</b>
XL 650 (Balance Beam Scale)	<b>O86-21430</b>	<b>207.95</b>
XL 650 (Electronic Scale)	<b>O86-22118</b>	<b>266.95</b>

**Dillon's Strong Mounts** increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	<b>O86-22051</b>	<b>\$50.95</b>
XL 650-only	<b>O86-22052</b>	<b>47.95</b>
"SDB"	<b>O86-22223</b>	<b>66.95</b>

**Dillon's "Belted Magnum" Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>O86-97126</b>	<b>\$154.95</b>
----------------------	------------------	-----------------

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>O86-22214</b>	<b>\$44.95</b>
1050 Tray Kit	<b>O86-22215</b>	<b>44.95</b>

**Dillon's Low Powder Sensor** provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Low Powder Sensor	<b>O86-16306</b>	<b>\$42.95</b>
-------------------	------------------	----------------

**Dillon's Toolholders** are available for your RL 550, XL 650, SL 900, and Square Deal B, and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650 with Wrench Set	<b>O86-11555</b>	<b>\$30.95</b>

# Dillon's Case Preparation Equipment

**CV-2001<sup>^</sup> 086-20493 \$189.95**

### CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

### Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750<sup>^</sup> 086-19455 \$145.95**

### Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator<sup>^</sup> 086-20675 \$76.95**  
**CM-500 Case/Media Separator<sup>^</sup> 086-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

### Attention European Customers: Case Cleaners are available in 220 volt!

- Euro CV-2001 086-22047 \$214.95
- Euro CV-750 086-19473 \$170.95

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

## Rapid Polish<sup>^</sup>

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

- 8 oz. bottle. **086-13804 \$8.95**
- Case (20 pc.) **086-20255 135.95**

## Case Lube<sup>^</sup>

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

*D.C.L. Dillon Case Lubricant*

## Super 1050/RL 1050 Short Trim Die Toolhead ^

**086-62219**  
**\$229.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the Blue 1050 toolhead stand - Part Number 086-62200, \$49.95 - is not included.)

## Rapid Trim 1500 Case Trimmer ^ 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **086-62164** is **\$332.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **086-13141**, are **\$20.95** each. Upper lock rings, **086-13559**, are **\$5.99** each.

## Lyman Precision Funnel Set

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. No more powder clinging to surfaces, which can happen with lightweight plastic funnels. The solid construction and quality of Lyman's Precision Funnel Set will be apparent in its first use. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

**086-11389 \$39.95**

## Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The Lyman X-Block is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

**086-11390 \$15.95**

## MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600 ^

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

**086-20095**

# 26 Dillon's Concealed Carry Tote<sup>^</sup>

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

# Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

- 1911 Holster **O86-19947 \$139.95**
- Mag Pouch **O86-19946 44.95**

# 5.11 Tactical<sup>®</sup> ALWAYS BE READY<sup>27</sup>

Double Duty TDU<sup>®</sup>

Trainer

Operator

The Double Duty TDU<sup>®</sup> belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

# BLADETECH Ultimate Carry Belt by Nexbelt

The Blade-Tech Ultimate Carry Belt by Nexbelt is specifically designed for those who carry a firearm daily for personal defense. The PreciseFit ratchet system allows you to quickly tighten or loosen the belt in 1/4" increments up to 6" for the perfect fit – no matter how you carry. Rest assured, this will be the most comfortable and fastest adjusting belt you will ever own. The Ultimate

Carry Belt has a water-resistant backing that helps prevent moisture from penetrating the outer surface and allows for extra strength and durability. **One size – adjusts to fit all.**

# Mr. Bulletfeeder<sup>®</sup> by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

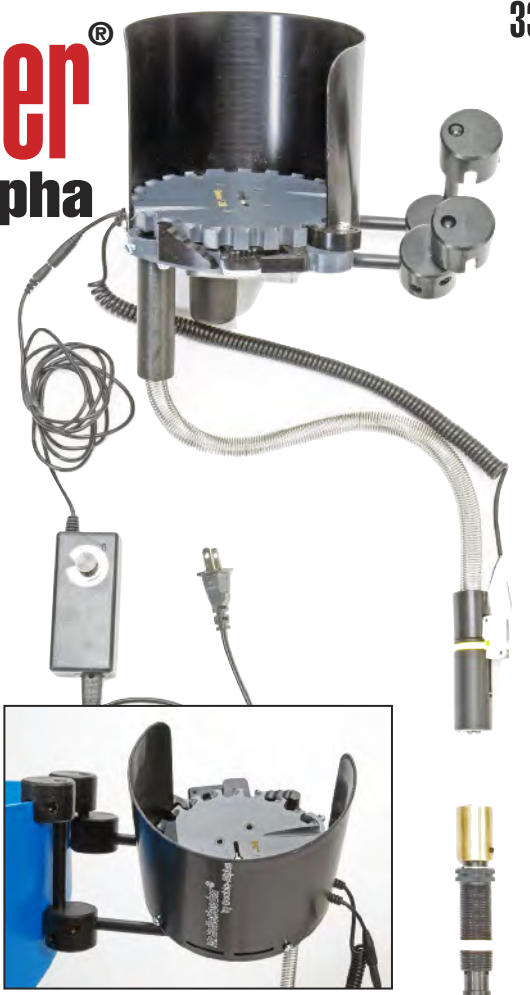

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

## Mr. Bulletfeeder<sup>®</sup> Replacement Parts & Spares

Having separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

The Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collator to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

Use a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

**⚠️ WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# Dillon's Rifle Die Sets

## Size Die

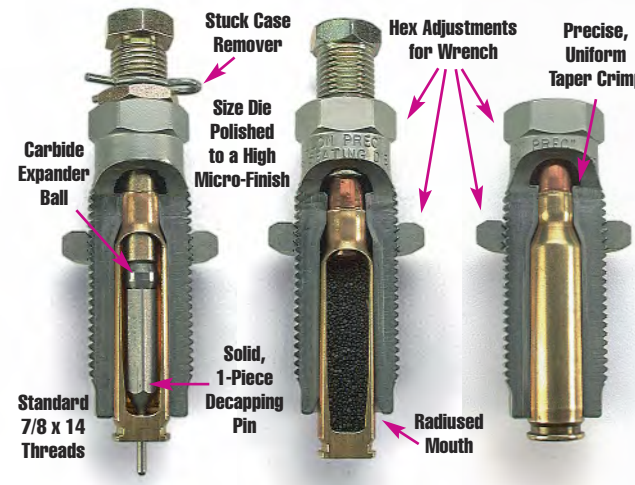

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# Dillon's Pistol Die Sets

## Size Die

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

**Sizing/Depriming Die**  
Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

**Bullet Seating Die**  
Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

**Crimp Die**  
We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE:** All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

# American Rimfire .22 WMR Compact Rifle

### By John Marshall

For many years, I've been a fan of the .22 Winchester Magnum Rimfire cartridge. It's been around since 1959; designed to one-up the ubiquitous .22 Long Rifle round in both power and range. This makes it suitable for small game, varmints, plinking and target shooting out to more than 100 yards. In fact, a 40-grain bullet from the WMR has more kinetic energy at 100 yards than the .22 LR has at the muzzle. It shoots farther, flatter and more powerfully at all ranges. Adjusting a rifle for maximum point blank range with a 3-inch target, the WMR has an effective range of nearly 125 yards, maintaining a center hold. A warning: The case is longer and wider than the .22 LR. Therefore, .22 LR ammo is quite dangerous to fire in a WMR chamber, with case splits and release of high-pressure propellant gas into the action being quite probable. Don't even think about it.

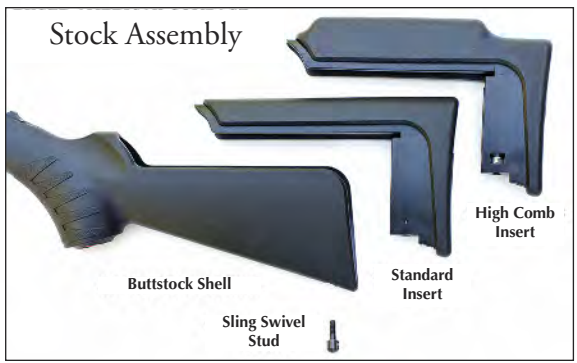

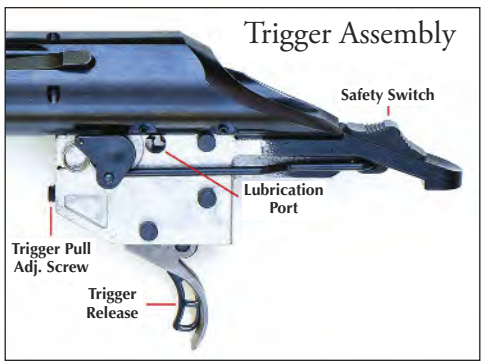

Over my lifetime, I have acquired a number of firearms chambered for this great round, including a Smith & Wesson Model 48 double action revolver, an old model Ruger Super Single Six single-action revolver, and a Winchester 94/22 lever-action rifle. I never scoped that 94/22, although I could have. In keeping with its "old west" profile, I preferred to retain that nostalgic look by leaving it unadorned with a scope. Accordingly, I hunted for a handy, lightweight, reliable and accurate bolt-action .22 WMR rifle that I could scope for maximum effect. I had once test-fired a no-name foreign-made rifle that would not feed reliably due to shoddy workmanship, and I realized that I really needed good old American craftsmanship to bring everything together into an ideal combination of desirable features.

Eureka! At a recent gun show, a local firearms dealer was selling brand-new Ruger American rifles, and among them was a compact .22 WMR piece. Upon examination, it really impressed me

with its features and its out-the-door price, which amounted to a shade over \$300. Bingo. I took it home.

Here are the things that impressed me about the rifle, which weighs a scant 5.38 pounds, measures 35.5" overall, and is equipped with an 18" hammer-forged barrel. Immediately noticeable was the detachable rotary flush-mounted magazine, the same JMX-1 used in the old 10/22 Magnum semiauto and subsequently in the now-discontinued 77/22 bolt action. It has a capacity of 9 rounds and is known for absolute reliability in feeding. It's drop-detached by a paddle release in the stock. Reading the instructions, I noted that the trigger is easily adjustable from 3 to 5 pounds. When the stock is removed from the barreled action (two hex-head screws are removed), it exposes the trigger group. The hex-head trigger weight adjustment screw is located at the front end of this assembly, and has about 6 full turns of latitude. I adjusted mine for a letoff of 3.5 pounds as measured on my RCBS trigger scale.

The "Ruger Marksman" trigger has a release lever imbedded in it that prevents and blocks movement of the sear until it is fully depressed into the trigger prior to letoff. It works easily, and the subsequent trigger pull is crisp with minimal overtravel. Hence, you have an action that is very safe against discharge unless the trigger is fully and deliberately depressed. The sliding safety switch is integral with the trigger group and is mounted centrally behind the receiver for easy access by either right or left handers. It works smoothly and positively, having just two positions, forward for fire and back for safe. Manipulation of the bolt in loading or unloading is possible while the switch is in the "safe" position. The trigger group has a handy port for lubrication of the assembly when needed. Just above the trigger group in the left side of the receiver is a separate

bolt release, allowing easy removal of the bolt without having to squeeze the trigger (which doubles as a bolt release in many other designs). This is a definite good safety feature.

The bolt used on the Ruger American Rimfire series is rather straightforward, with a substantial bolt handle root precisely engaging a cutout section in the receiver to provide secure lockup. The bolt lift is only 60 degrees to give lots of clearance for a scope, and cocks on opening. There is a hook at the front of the bolt on a circular flat spring. This holds the cartridge case in position and doubles to spring-load the extractor on the other side. There is a fixed ejector in the receiver.

While I had the stock removed from the action, I noted the precise "Power Bedding" system. The stock incorporates a steel bedding block that accurately mates with two angled steel lugs on the bottom of the receiver. This is "steel on steel" exactness – no possibility of change in the bedding. When the barreled action is cinched down into the stock with its two screws tightened alternately for evenness, the receiver is securely mated to the stock. The barrel itself, press-fit and pinned into the receiver, is full-length free-floated for maximum accuracy. It also is target-crowned and equipped with a U-cut fully adjustable folding rear sight and a green Williams fiber-optic front sight. It's very noticeably visible when the open sights are used. If you are thinking about eventually applying a sound suppressor or flash attenuator to this rifle, Ruger is way ahead of you. The muzzle on this model is already threaded for these purposes. A muzzle cap is provided to protect the threads when nothing is attached.

Do you prefer tip-off scope grooves or Weaver bases to mount your scope? Well, Ruger has you covered there. The receiver is both grooved **and** drilled and tapped to accommodate Weaver number 12 scope bases! You decide which system meets your needs. As for me, I chose some high tip-off mounts to clear the rear sight, and installed a suitable 3-9X scope. The higher mounts also give a bit longer point-blank range, with the line of sight and bullet trajectory meeting farther away down range.

Some folks like to use the open iron sights, while others will opt to mount a scope. The only problem is that just one stock comb height will not be suitable for both approaches. Ruger thought this one through, and provided a black synthetic composition stock that will take interchangeable stock inserts, one having a higher comb than the other for scope use. Both inserts are provided with the rifle. If you prefer a longer length of pull than the factory 12.5", longer inserts are available from Ruger for about \$20. All of these inserts can be easily switched out by the simple expedient of unscrewing the rear quick-detachable sling swivel stud. It anchors any insert solidly in the stock. The insert already in the stock can then be tapped out with a wooden dowel and a small hammer, allowing a different one to be slapped in and secured with the re-insertion and tightening of the sling swivel stud.

The stock on this rifle, by the way, is well textured in the gripping areas, and rain and/or sweat should not play any role in one's ability to maintain a firm grip on it. I also appreciate that stan-

standard quick-detachable sling swivel studs are provided on this rifle. In the past, Ruger had used some rather cheesy 1" stirrup-style sling mounts on some of its rimfire rifles.

After examining and prepping the rifle to suit my preferences, a trip to the range was next in order. I had on hand some CCI .22 WMR "Maxi Mag" Gold Dot HP (40-grain hollow point jacketed bullet at a listed 1875 feet per second) ammo and packed it with the rifle to a nearby indoor rifle and handgun range. This range allows for only a maximum distance of 25 yards for shooting, but I figured it would give me a good indication of the rifle's accuracy potential. I set up some bullseye targets at 25 yards, and went to work. A bench rest was not available, so I improvised by resting the rifle in the nest of my Dillon range bag. A few twists of the elevation and windage knobs on the scope brought the point of impact to the center of a bull. Now my eyes are getting old, no longer giving me the unaided eagle eyes of my youth, and the improvised rest for the rifle did not prevent some user-induced wobble. Still, the results were quite good. A final 3-shot group measured 1/2 inch in the X-ring of the target. I had no doubt that a benchrest setup would probably halve the group, and others have reported

1/2 inch groups at a longer 50 yards. That equates to one minute of angle, the traditional standard for rifle accuracy.

Daniel Boone once bragged that his rifle could flick a flea off a dog's posterior if he did his part, and I have no doubt that this rifle is in the same "flea flicker" league. Like most rimfire rifles, accuracy is partly determined by the specific ammunition used, so I suspect that even better groups could be secured with some experimenting with different ammo. I would hate to be a ground hog within 100 yards of this rifle once that "sweet spot" combo of load and rifle was suitably matched.

I decided to order an extra magazine for quick reloads in the field. The internet makes such things quite easy to do, as this is a standard Ruger product and is readily available.

It's quite evident to me that the folks at Ruger put a lot of thought and effort into nearly all aspects of this rifle. While I would have preferred a soft rubber buttplate for stability, I do understand that putting one on each of the stock inserts would unnecessarily increase the costs of manufacture. At the current reasonable retail price of this rifle, I think it's a bargain. It gets my enthusiastic stamp of approval!

# TAYLOR'S & COMPANY HALF-PINT SHARPS .44-40 WINCHESTER

By Oleg Volk

The Sharps falling block action dates back to around 1850. Like most of its percussion contemporaries, it used combustible paper cartridges. Unlike most of them, it loaded from the breech for greater rate of fire, also giving its user the ability to load while prone or on horseback. Compared to its most obvious competitor, the Dreyse bolt action, the Sharps provided considerably better obturation in a more compact action. On the down side, it was still a percussion rifle with caps handled separately from the cartridge carrying spherically conical ball and powder. The massive strength of the falling block allowed very powerful loads exceeding 120 grains of black powder, and excellent accuracy made the Sharps not only a worthy competitor to the muzzle loading Whitworth for sniping purposes, but eventually a popular big game getter. With power, accuracy and range combining neatly in one design, quite a few Sharps rifles were bought or later retrofitted with vernier tang peep sights. In the age of 200-yard military rifles, sharpshooters fielding Sharps rifles were a danger to individual soldiers out to 500 yards, and to buffalo even farther out.

As centerfire metallic cartridges became more common after the late 1860s, Sharps long rifles and carbines alike proliferated in calibers ranging from the massive .50-90 and .45-120 to the more

modest – at least by the standards of the day – .45-70 Government. Despite the terrific compactness and handiness of the falling-block action, eventually Sharps lost ground to magazine-fed repeater actions. The only repeating development ever to come from the falling block, ever so peripherally, was the 1904 Danish Madsen light machine gun. The large cartridges typical of Sharps rifles became the other factor working against their popularity. By the end of the 19th century, .45-70 or larger gave way to smaller, higher velocity calibers that were easier on the shoulders and budgets alike. So the canonical big bore remained present but uncommon for nearly a century. Cowboy Action Shooting and the movie “Quigley Down Under” gave the Sharps design, now mostly produced by Italian companies like Chiappa, a new chance at popularity.

With more young and female shooters entering the ranks of recreational rifle enthusiasts, it's no surprise that the Half-Pint Sharps, reduced about 20 percent linearly and nearly 40 percent by weight, gained considerable popularity. As is usual with Taylor's imports, this rifle has good wood-to-metal fit, and a very nice casehardened finish on the receiver. Chambered in .44-40 Winchester, a late 19th century ballistic analog of the more modern 10mm Auto, the Taylors Half-Pint brought the quaint but efficient manual of arms, along with

the accuracy, to a wider audience. A slightly bottlenecked cartridge capable of 1250 fps with a 200-grain flat point lead bullet, .44-40 is loaded for cowboy action shooting by Black Hills to around 800 fps. In that form, .44-40 produces no perceptible recoil and only a mild report. The slight bottlenecking of the case aids extraction, but does slow down the reloading of cases a little.

Loading the Sharps carbine is simple: set the hammer at half cock, pull the lever down to drop the breechblock, then load the cartridge straight into the chamber. The process is complicated slightly by the weight of the opened lever pulling the action slightly closed at times, or forcing the extractor back and retracting the loaded cartridge partway out of the chamber. Both have the effect of preventing the bolt from sliding up to close the action. Using the support hand to hold the lever all the way forward removes this annoyance.

In keeping with the long-range reputation of the bigger Sharps guns, this Mini came equipped with a folding Creedmoor tang sight adjustable for elevation. The front of the two double triggers provided emergency short-range release, but the 13-pound pull weight made it impractical for accurate shooting at distance. The similarly heavy curved rear trigger may be pulled first, setting the front to much more reasonable 2-1/4 lbs. In test

firing, we found that the peep sight opening was small enough to cause some diffraction, and also a considerable reduction in the availability of light – not surprising, as Taylor's rates this sight “for daylight use.” The same aperture effect helps focus the front sight nicely. Unfortunately, even the small aperture closer to the eye did not make this sight as accurate as we had hoped: several good marksmen ended up with 3- to 4-inch groups at 100 yards, with tight clusters of hits and outliers indicating that the limitation wasn't in the mechanical accuracy of the gun itself. The rifle was perfectly good for hitting medium game or bad hominids past a hundred yards, but the whole configuration of it implied far better accuracy. We also found elevation adjustments frustrating: the frame of the tang sight had unlabeled hashmarks, and adjustments were done by unscrewing the aperture slightly to permit vertical travel. Most of the time, the sight would slide too much upon release, with no way to determine its original position.

Wishing to test this theory, I mounted a 4x reproduction of the 19th century Malcolm scope made by Hi-Lux onto the Half-Pint. A thin externally adjusted tube; this scope was an externally faithful copy of the late US Civil War scopes possessed of better optical clarity thanks to modern production techniques. Zeroed at 25 yards, the scoped rifle printed cloverleaves consistently. With the scope, 100-yard groups tightened up to 1.5 MOA, quite good for essentially a pistol round. With the scant 1.4-inch scope height over the bore line, 100 yards is the longest practical point blank range with an 80-yard zero, assuming the enemy is a five-inch tall pop can. With the Malcolm scope having a relatively small, clear aperture, it provided good focus down to 15 yards or so, while still gathering enough light to work on indoor ranges. The long eye relief came in handy, as even the Half-Pint retains a longish 14-inch length of pull. While the Malcolm scope uses only the historically accurate crosshairs,

drop compensation may be done on the basis of target size, as in “hold on the head to hit center mass” or “two crows above the actual one.”

Light at six pounds and well balanced, the Half-Pint became a real crowd pleaser at every range outing. Scoped and fired with full-power ammunition providing 150-yard

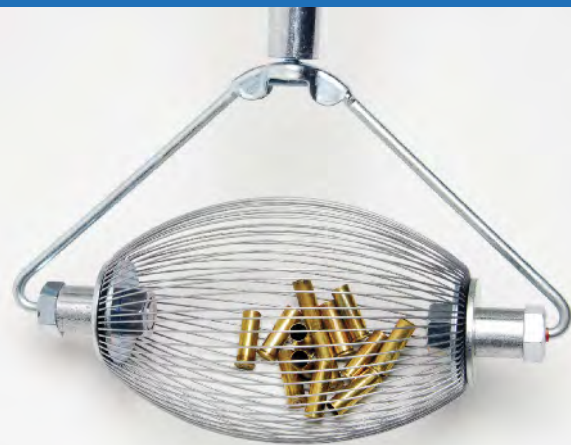

**“With more young and female shooters entering the ranks of recreational rifle enthusiasts, it's no surprise that the Half-Pint Sharps, reduced about 20 percent linearly and nearly 40 percent by weight, gained considerable popularity.”**

point blank range on small game, it is a competent performer out to 200-plus yards and, with accurate rangefinding, even further than that. Its velocity doesn't drop below 800 fps – the muzzle velocity of the cowboy-action load – until the 300-yard mark. Winchester/Olin produces a 1200 fps 200-grain power point load that's well capable of taking down deer at reasonable ranges. For those who also favor old-Western-style .44-40 six-shooters, the Half-Pint Sharps can be a stylish and functional medium-range companion to the more rapid-fire sidearms.

# SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

O86-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

O86-19972 \$39.95

## Berry's Manufacturing Pan Sifter

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter O86-17519 \$9.99

## Outers 51-Piece Screwdriver Kit

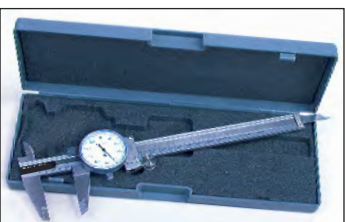

Includes a form-fitted case, a magnetic-tip driver, 15 flat head, 10 inch hex, 9 metric hex, 4 Phillips, 9 Torx, 2 extra long Phillips bits and 1 hex-to-square adapter.

O86-10281 \$19.95

## Dial Caliper<sup>^</sup>

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

O86-13462 \$28.00

## High Tech Digital Caliper<sup>^</sup>

Accurate, Easy to Read!

O86-17171 \$39.95

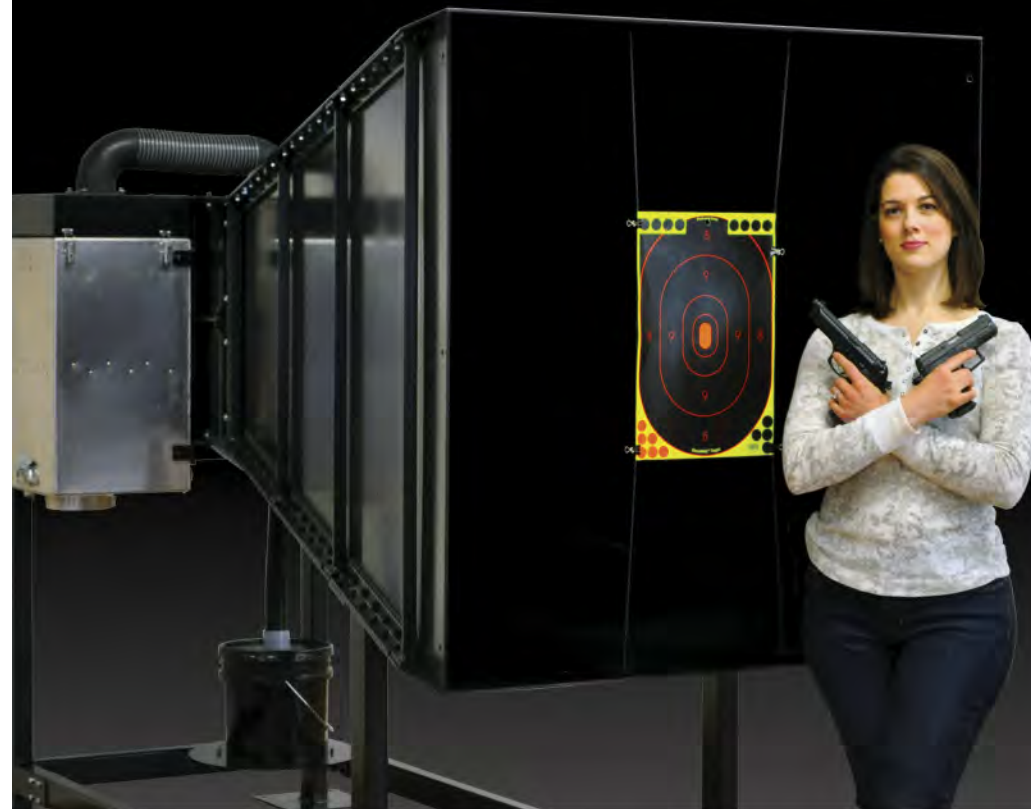

Nobody's perfect. A bullet puller makes it easy to recover all your components.

- Bullet Puller<sup>^</sup> O86-17999 \$29.95
- Puller Cap<sup>^</sup> O86-17948 4.95
- Collet Set O86-17947 5.99

# RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

# 48 FROM FACTORY TO WILDCAT

## The “Why” and the “How” of Precision Reloading

By John Bibby

One of the reasons precision shooters almost always end up becoming reloaders is that it allows them to fine-tune a load to their particular gun. This continues with the ability to fine-tune the seating depth to compensate for the chamber throat erosion.

With 6.5 Creedmoor, the factory loads report velocities between 2625 and 2915 fps with a 120-grain bullet. Simply switching to reloading will allow you to increase the range to 2825-3010 fps. Maximum velocity often is not where you find the greatest accuracy; however, a larger velocity scale helps to find the lower and the higher velocity accuracy nodes in your load-testing ladders.

For example: Using 120-grain projectiles and loads listed for RL-17 powder, the maximum velocity is roughly 3010 fps. In many guns, the high velocity accuracy node happens at roughly 2880-2910 fps. The groups are not that tight below this velocity. When the velocity is in this range, the group tightens by about 30 percent. The groups tend to open up by a similar amount as you move higher up the velocity ladder.

For many, a similar accuracy node also happens in the 2675-2750 fps range. For those willing to deal with the additional drop and wind drift, this lower velocity node generates less recoil and much greater barrel life. The faster velocity node advantage is stretching out the effective distance.

Adjusting the seating depth to adjust how far from the lands the bullet sits can further finesse the accuracy node. The bullet-depth technique is much more useful in a bolt-action rifle, as it is not limited by the magazine length. All semiauto guns will be much more limited on combined overall length due to magazine limits and reliability of feeding. In bolt-action guns, this also allows you to somewhat compensate for erosion of the lands by gradually increasing the length to keep the same distance from the lands.

In reloading for your specific gun, testing will determine where you find your accuracy nodes, but commonly used recipes give a guideline and a predictive method for expectations. Empirical testing also allows you to determine if a slightly lesser recoiling and slightly less barrel burning recipe is better for your application.

Another great advantage to reloading is you can change the projectile used. Some guns will not ever give acceptable accuracy with a certain brand of bullet. A certain barrel will not like one bullet in a weight range, but will love another. This usually has to do with bullet length, bearing surface or the profile of the nose of the bullet. Without getting into the science of why, it's much simpler to load bullets from different manufacturers and see what the results are in your gun.

This can also happen with a bullet weight. If your gun or barrel just doesn't like 120-grain bullets, then try various 140-grain projectiles and see what your results are. Maximum velocities will be lower with this weight of bullet (factory loads are from 2540-2720 fps), but you will have a better ballistic coefficient. The improved aerodynamics will help to offset the lower velocity both in long-range drop compensation and in fighting wind drift.

For those who truly need the absolute fastest velocities, the caliber itself may need to change. If the shooter isn't able to get the desired combination of accuracy and velocity with 6.5 Creedmoor, there's always the jump up to 6.5x284. Significantly more powder pushes the bullet and, using slower-burning powders, the shooter can make use of longer barrels. While in 6.5 Creedmoor, most loads don't gain velocity beyond 24" barrels, with the 6.5x284 improvement can be seen up to 30".

The larger 6.5 cartridge, in the hands of reloaders, is fully capable of sending a 140-grain bullet at 2920-3025 fps. In my personal bolt-action rifle, my accuracy node dials in at about 2950 fps with a 140-grain Berger VLD Target. This is at about 1.0 grain below a maximum load.

I'm currently working up a load for the Hornady 147-grain ELD Match. Preliminary data shows that my accuracy nodes will be at a slightly lower velocity, but the loading depths will not need to be nearly as precise as the Berger VLD and the better ballistic coefficient balances out for the lost velocity. In theory, this will provide more consistent accuracy as loading precision is not as hyper important.

Once you've been bitten by the accuracy bug, you're no longer concerned with the cost savings of reloading. It really is a function of making super

**“Once you've been bitten by the accuracy bug, you're no longer concerned with the cost savings of reloading. It really is a function of making super accurate rounds that factory ammo just can't replicate.”**

John's rifle is a Savage 12 F Class chambered in 6.5x284 Norma equipped with a Leupold VX-6 7-42x56mm scope.

accurate rounds that factory ammo just can't replicate. There is the side benefit (if reloading time is not included in the cost) that an equal amount of dollars allows much more ammunition for practice and practice is where repeated accuracy is built.

Some shooters will not find what they want even with the 6.5x284. This is where wildcats come in. The 6.5x284 is a wildcat that gained factory support after beginning life as a necked-down .284 Winchester. Ironically, with the advent of much better 7mm (.284 diameter) bullets many people are heading back to the .284 Winchester parent cartridge and its derivatives.

With reloading, the shooter has unlimited options as to how to perform the desired task. If 6.5x284 is not quite where the shooter needs to be, the chamber can be modified to further increase case capacity. Some F-class competitors have done exactly that by “Ackleyizing” the 6.5x284. Others have chosen to push a lighter 6mm bullet to hyper velocities. Others have chosen to use the original parent .284 cartridge with “Ackley” style improvements. Some have even taken the 6.5 bullet into a completely different case, like a necked-down .300 Winchester Magnum or .300 Weatherby Magnum, in search of greater velocity.

Each of these decisions has advantages and disadvantages. Moving from the 6.5 Creedmoor to the 6.5x284 provides the shooter gains in velocity

and the option of much heavier/ballistically more efficient bullets. This comes at the cost of 50-75 percent shorter barrel life. New Creedmoor brass runs \$0.45 to \$0.75 and there are some outlets for once-fired brass. For 6.5x284 brass, prices range from \$0.90 to \$1.40 with no once-fired brass available. There's also a significant decrease in the number of reloads when you step up to the larger case. Most people claim 8-12 loads on the Creedmoor. I've not heard of anyone claiming more than 10 with the 6.5x284 and most stop using the brass in competition after four to six uses.

The options open to someone willing to pursue the ultimate in velocity or accuracy are really only limited by physics, imagination and the depth of your checking account. Typically, shooters travel the path from bulk ball to factory match in common calibers to specialized precision calibers to wildcats as their skill level exceeds the performance of the current gun fodder.

**About the author:** John Bibby, a lifelong gun enthusiast, has always pushed the envelope. He started shooting at age 5, shooting his first Uber Thumper, a .375 H&H, by age 9. Since then, he has caught the accuracy bug hard, leading to increasingly deep and detailed interest in precision reloading. He shoots a 24" barrel AR for wind-reading practice, and a 30" barrel F-class 6.5x284 for more reliable long-range results. John also shoots 3-gun matches.

# 50 "Big Fifty Reloader"

## STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY<sup>^</sup>

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

086-50050, \$399.95

### B. 50 BMG CARBIDE SIZE DIE<sup>^</sup>

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

086-50075, \$969.95

### C. 50 BMG POWDER MEASURE ADAPTER<sup>^</sup>

For use with the RCBS .50 BMG powder measure.

086-50125, \$77.95

### D. 50 BMG PRIMER SEATING DIE<sup>^</sup>

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

086-50200, \$149.95

### E. 50 BMG PRIMER POCKET SWAGER<sup>^</sup>

Makes it easy to remove the military crimp.

086-50001, \$334.95

### E. (1) PRIMING CONVERSION<sup>^</sup>

Converts Swager to Priming System.

086-50003, \$79.95

### F. 50 BMG PRIMING SYSTEM<sup>^</sup>

Allows off-the-machine primer seating.

086-50002, \$334.95

### F. (1) SWAGER CONVERSION<sup>^</sup>

Converts Priming System to Swager.

086-50004, \$79.95

EXTRA "BFR" TOOLHEADS 086-19831, \$189.95

### RCBS .50 BMG LOADING ACCESSORIES<sup>^</sup>

.50 BMG Powder Measure	086-21896, \$114.95
.50 BMG Seat/Crimp Die	086-21895, \$139.95

Dillon's "Plan B" Day Planner Holster<sup>^</sup> holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner 086-10252 \$24.95

The 7-Piece Steel Roll Pin Punch Set includes the following sizes: 1/16", 5/64", 3/32", 1/8", 5/32", 3/16", and 7/32". Each is proudly Made in USA!

Roll Pin Punch Set O86-15065 \$39.95

## Dillon's Bench Wrench Fits 1" Die Lock Rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to

re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring O86-14067 \$1.60  
 5-Pack of Die Lock Rings O86-10669 4.95  
 1" Dillon Bench Wrench O86-10842 7.95

A Pair of Target Spikes O86-11393 \$26.99

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

ZFH1500 AR15 Flashlight Mount O86-12020 \$29.95  
 ZSM Tactical Shotgun Mount O86-18050 39.95  
 ZRX Tactical Flashlight Mount O86-15487 35.00

**GLOCK Action Enhancement Trigger**  
**O86-77791 \$99.95**

you see a trefoil-shaped anvil staring at you instead of a smooth primer cup.

Finally, primer-wise, take this opportunity to make sure it's been fully seated. If it hasn't, when the firing pin hits the primer, the fact it doesn't have its anvil hard up against the bottom of the primer pocket – instead there's a gap between the two – means the firing pin will actually push the primer forward when it hits it. This absorbs enough impact energy you can have a failure to fire. After dropping the round into the case gage, take a moment to run a finger over the primer, you want to feel it seated actually a bit below the surrounding brass.

You need to understand, in 9mm, there's such a huge variance in the width of case rims, frequently you'll have a round fail to seat fully in the gage, not because there's anything wrong with the over-

all external dimensions of the case body *per se* but simply because the rim is too wide. This doesn't mean the round has failed the gage.

When a loaded round of 9mm goes easily into the gage, but the rim is still butted up against the top of the gage and not entering the hole, that's still a good round. [Editor's note: You can verify this by reversing the round and inserting the rim into the gage. If it fails to enter the gage, the round is still fine.]

The final thing a gage can catch for you is split casings. Fire a casing enough times, expand it through pressure, then work the brass by sizing it back down, eventually it's going to weaken enough it splits longitudinally when seating a bullet during the reloading

process. This results in an oversized "fat" cartridge that won't fit into the chamber, leading to a failure to feed during live fire. When inserting a round with a split casing into a case gage, a very distinctive sort of tactile feedback, and a very distinctive sound, occurs. You can feel it, and you can hear it. The results are kind of hard to describe, but I would say it both feels and sounds "crunchy." Once you've known it, you'll never mistake it for anything else.

You can always tell the inexperienced versus the experienced handloader. The former is the person constantly shucking oversized rounds out of their gun during a match or practice session, as they experience feedway stoppage after feedway stoppage because many of their rounds won't fit into the gun's chamber. These are the people who'll say to you, "I don't see WHY I'd need a case gage." Experienced handloaders are the people to whom that never happens, their guns just run flawlessly, because they own a case gage for every cartridge they load.

Duane's website is [Self-Defense-Handguns.com](http://Self-Defense-Handguns.com). 

the unsupported area of the feed ramp during firing. Standard sizing dies only resize about the top 2/3 of a casing, because we don't want to be working the bottom 1/3, i.e. the area where the web meets the interior case wall; that can stress the brass so much, in a critical area, we could wind up with a case head separation during firing. As anyone who's ever experienced one can tell you, case head separations suck, because you wind up with a circular piece of brass fire-formed to the interior of your gun's chamber that's quite difficult to get out. This is a procedure requiring time, and tools. So, since dies only resize the top 2/3 of casings, it's quite possible to load ammo that has the un-resized bottom of the casing still so "pregnant" it won't fit into the chamber, leading to a failure to feed during live fire.

This phenomenon has, historically, been so associated with casings fired in GLOCKS you'll actually hear it called "GLOCK bulge." The myth is that GLOCKS have "unsupported chambers" to assist in feed reliability. While there may be some truth to this in .40 S&W, it's absolutely untrue in 9mm. Honestly, I think this idea has a lot more to do with 9mm GLOCKS' popularity than their chambers being particularly, in the overall scheme of things, unsupported. 9mm GLOCKS actually have fairly tight chambers. You want to talk guns that have absolutely HUGE chambers: the SIG P220-series in 9mm. You can always tell when you've picked up 9mm brass that was fired in a SIG P225/P226/P228/P229, because it requires WAY more effort on the handle to resize, and "pregnant" rounds, even after all that work on the handle, are quite common.

While some people will say, "You don't need a case gage, just pull the barrel out of your gun and use its chamber to check ammo" the truth is it's a lot easier, and probably cleaner, to use this little piece of stainless steel than having to pull a dirty, oily barrel out of a gun and use it, then reassemble the gun afterward, every time you want to check your handloads.

When you drop a round into the case gage, this gives you a golden opportunity to check the primer. To start with, you can make sure there's actually a primer there. I don't care who you are, and how experienced, the bottom line is we all, occasionally, put together a round without a primer. This is a bad thing, and the case gage allows you to catch that before your gun goes click instead of bang.

Also you can catch those occasional instances where you've accidentally loaded a primer into the primer tube upside-down; when you drop a round into the case gage then visually check it,

**"When you drop a round into the case gage, this gives you a golden opportunity to check the primer. To start with, you can make sure there's actually a primer there."**

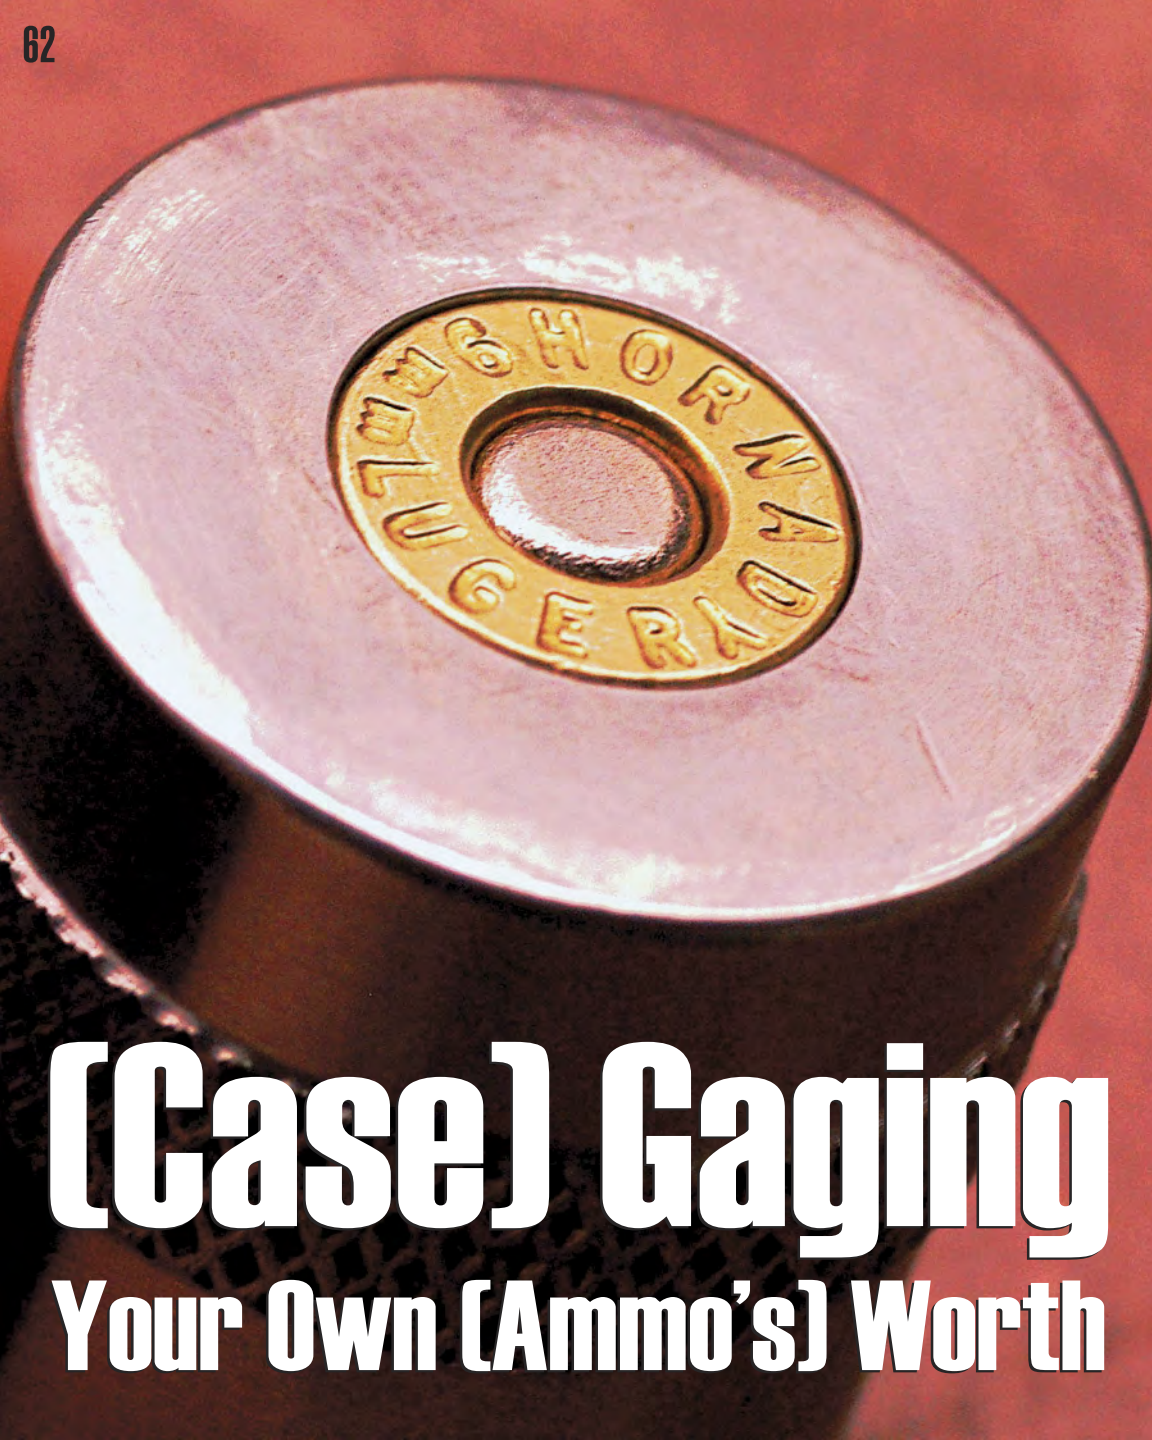

# (Case) Gaging Your Own (Ammo's) Worth

By Duane Thomas

If I had to point to one reloading accessory inexperienced handloaders sneer at, and say, "I don't see WHY I need one of those," but experienced handloaders understand is absolutely invaluable, it would be the case gage. (Why it's spelled "gage" instead of "gauge" is beyond me, it just is.) A case gage is a cylinder-shaped piece of stainless steel that's had drilled into it, longitudi-

nally, a hole equivalent to a very tight match chamber for a particular cartridge. After handloading, you use the case gage to check a cartridge's external physical dimensions. If it'll fit into the case gage, it'll fit into a gun's chamber.

One primary thing a case gage can catch, before that cartridge makes its way into your gun and stops it working, is the slight "pregnant" swelling of an autopistol casing that was right over

# 64 Dillon Ammunition Boxes<sup>^</sup>

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mouser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag, .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, O86-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.

- 7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em - you just can't beat 'em! Buy several and get your "stuff" together.

"SL 900" Bin	O86-17125	10.50	56.94	106.92

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools - the list is endless.

# Swab-its - A Swab for Every Job!<sup>65</sup>

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (thinking fast), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!" The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/.56mm (6 ea.)	O86-15310	\$4.98

<b>Multi Pack:</b> (6) .22/.56, (6) .30/7.62, (6) .357/9mm, (5) .40/10mm, (5) .45	O86-43312	26.99

Gun-tips® 3" Precision Tip foam swabs are reusable. 24-count value pack. O86-15345 \$9.99

## Gun-tips®

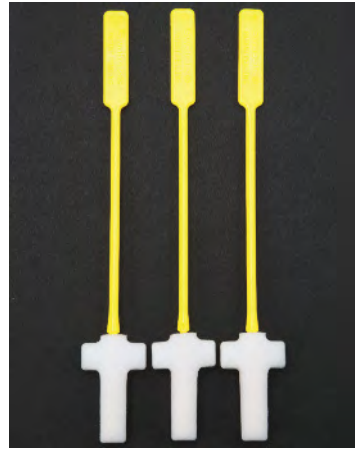

Gun-tips® Extended Reach Firearm Cleaning swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package. O86-12583 \$9.99

## Bore-Whips™

Bore-Whips™ .17 and .22 caliber (pictured) by Swab-its® are ideal for air rifles, rimfires or any other .17 or .22 caliber firearm that's difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator. .17 Cal. O86-12689 \$9.99. .22 Cal. (Pictured) O86-12690 9.99

## Star Chamber

Star Chamber Cleaning Foam Swabs™ are for AR-15, M4 and similar MSRs. 3-pack O86-10056 \$13.99

## Ram Rodz Barrel and Breech Cleaners

The RamRodz® Range Kit comes with 400 Breech Cleaners, 100 .22-Caliber swabs, 60 .38-Caliber swabs, 50 .40-Caliber swabs, 40 .45-Caliber swabs and 30 .50-Caliber swabs. O86-43293 \$34.95

Ram Rodz Barrel & Breech Cleaners	Stock #	Price

**725 Gun Cleaner Degreaser** should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks!

**NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. O86-19237 \$19.95

**Slip 2000 Carbon Killer** provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

**NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. O86-19234 \$19.95

**Slip 2000 Extreme Weapons Lubricant (EWL)** was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. O86-11644 \$16.95

**Slip 2000 EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. O86-11645 \$19.95

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

O86-11652 \$22.95

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

O86-11676 \$18.95

**Slip 2000 Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing!

**NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. O86-11646 \$10.95

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack O86-11674 \$11.95

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe! E-Z Brite Cloth O86-18613 \$7.99

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60+), Lite is a thinner viscosity for lower temperatures (F30+). Slide-Glide Standard O86-15571 \$7.95. Slide-Glide Lite O86-15572 7.95

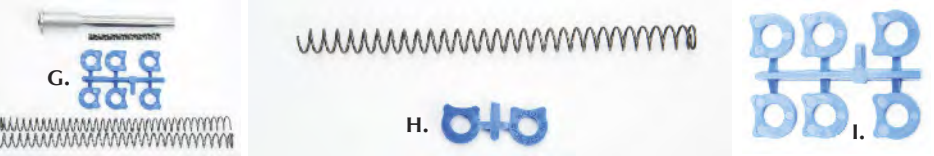

Microton UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams. O86-75125 \$9.95

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's. O86-13128 \$12.95

70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

**E**lite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

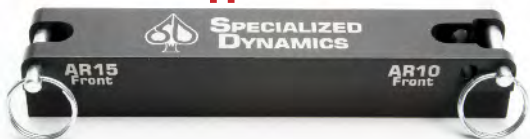

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for Glock magazines, feature

special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

# 74 "The Perfect Small Parts Cleaning Accessory"

The HYSKORE Degreezer consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. As anyone who has cleaned a gun is aware, cleaning small parts is a major challenge. Given the available technology and fixtures, the standard procedure is to use some kind of cup or similar vessel, pour in a quantity of cleaning solvent, and then pick up the parts one by one and brush them clean. The Degreezer changes all of that. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. As a bonus, the set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline. The Degreezer will quickly become an indispensable fixture on your workbench.

086-10209 \$15.95

# HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

086-10208 \$19.99

# 5.11 Tactical All Hazards Ammo Mule

Sometimes, you just need more ammo. The All Hazards Ammo Mule is light-weight, durable and weather resistant. It features a secure wraparound zipper with a molded pull and measures 10.12" wide x 3.88" deep x 8" high. It'll hold 10 5.56 AR mags or six 25-rd. boxes of shotgun shells.

086-19661 \$27.99

# OPSol Mini-Clip™

Allows the use of 12 Ga. 1.75" Birdshot, Buckshot and Slug shells. Fits 12 Ga. Mossberg 500, 590, 590A1 and Maverick 88 models

The OPSol Mini-Clip™ was designed to give "well seasoned" and "recoil sensitive" shooters the capability of shooting the trusty Mossberg 12 Ga. platform without the usual recoil response. By using The OPSol Mini-Clip™ in conjunction with 1.75" shotgun shells, shooters stay in the game without all of the pain. The Mini-Clip enables owners of Mossberg 12 Ga. shotguns to use Aguila Minishells reliably for training, practice, recreational or home-defense applications.

# SPECIAL PURCHASE! SureFire Flash Hider/Suppressor Adapter

The SureFire FH556-212A is a high-performance flash hider for the Colt Commando, C8 SFW, M4, M16, HK416, and 5.56mm (.223 cal.) semi-auto, bolt-action, or assault rifles with Mil-Spec 1/2-28 muzzle threads. It also serves as a precision, rock-solid adapter mount that enables rapid no-tools attachment of SureFire FA556K, FA556-212, FA556MG, or MINI suppressors to the rifles listed above and other rifles with the same muzzle thread/configuration.

086-10884 \$39.99

# HIPERTOUCH® ADAPT. CONTROL. COMMAND.™

The HIPERTOUCH® 24C is the competition version of high precision fire-control drop-ins for installation in AR-15® and AR-10® type rifles.

086-11816 \$235.00

The HIPERTOUCH® 24 3Gun, or 24 3G, is similar to the 24C, but with a curved trigger bow instead of straight, for installation in AR-15® and AR-10® type rifles.

086-11819 \$225.00

# Elftmann Tactical SE Drop-In Trigger

The ELF-SE Drop-In Trigger for mil-spec AR-15s features an extremely short takeup; a clean, crisp break; and a very short, positive reset with a non-adjustable 3.5-lb. pull weight. The total physical weight of the entire trigger unit is 2.3 oz.

086-10007 \$169.00

# C-MORE SYSTEMS

RTS2R

Railway

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 as pictured w/o riser O86-11643 \$89.95 TRS-25 with riser O86-31318 \$119.95

## Scout Scope Mounts for AK, SKS Rifles

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero. Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed. Scout Scope Mount for AK Rifle O86-25374 \$79.99 Scout Scope Mount for SKS Rifle O86-25373 78.99

# Shootists Holiday 2018

Nepalese Martini

By Peter Caroline

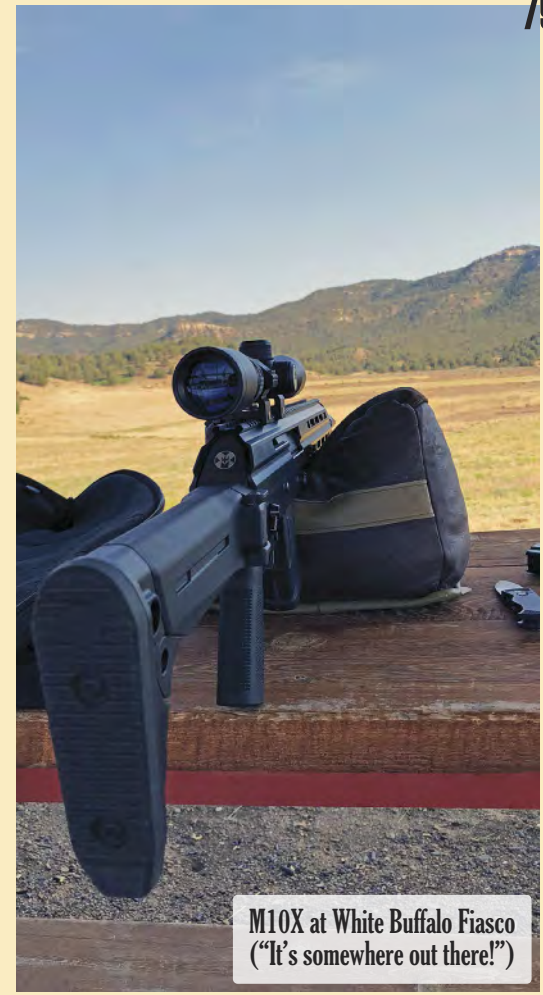

There is a mysterious magnetic phenomenon that occurs once a year in Raton, New Mexico. It attracts virtually every interesting firearm in the country, and is called, for lack of a better name, Shootists Holiday. Otherwise rational individuals spend days driving from all parts of the country to be part of it. My annual pilgrimage follows the same pattern...I drive up to Lakeside, Arizona, to meet up with my old friend Bill, who is my purchasing monitor, i.e., every time I consider purchasing a fascinating old relic, I wait for Bill's opinion. If he refers to it as a POS or a catfish anchor, I buy it. Never fails.

This year, we took Bill's new-for-him Ridgeline up to Raton. Our driving styles differ. I regard a predetermined ETA as holy writ; Bill likes to wander and explore ("Look, a squirrel!"). Despite a lunch stop at the Cracker Barrel in Albuquerque, we still managed to arrive at the Melody Lane motel in Raton only 16 minutes past my goal.

The next day, we held our morning meeting at the Pistol Silhouette Range at the NRA Whittington Center. There were some new rules in place: because of the dry conditions and the ongoing 36,000-acre Ute Park fire west of Cimarron, we were somewhat restricted as to what and where we could shoot, and smoking was verboten, except inside our own vehicles. As I walked up and down the firing line, I was treated to a striking panoply of arms. One recently retired law enforcement officer displayed a mirror-polished stainless Ruger GP100 .44 Special revolver and a beautifully engraved, pearl-handled Smith & Wesson New Departure Safety Hammerless revolver in a velvet-lined case. He also had a rare Walther PP Sport .22, with a long barrel, adjustable sights and an extended grip. We actually got to fire that one...very picky about ammo, but we finally found some that it liked.

There were fancy, engraved guns galore. At Bobby Tyler's table, I spotted a lovely old Colt Pocket Hammerless that had the full refinish and overall engraving treatment, plus a modern Thompson gun, drum magazine included, that had been upgraded with Tyler's own color case-hardened finish. Most impressive! Further up the line was a unique ivory-gripped multi-caliber single-action revolver...six detachable barrels and six cylinders to match, all in a handy carry case. The same craftsman was also displaying an ivory-handled, color casehardened Bisley, with a beautifully etched wolf portrait scrimshawed on the ivory buttplate.

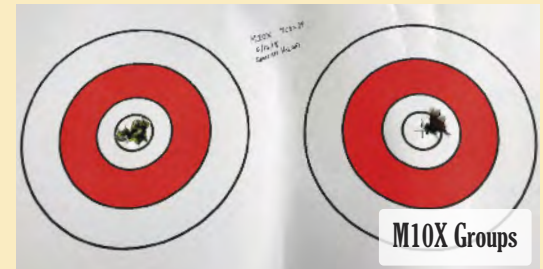

Taking a break from this surfeit of unobtainium, Bill and I drove over to the Sighting-in Range, to make sure that our rifles had maintained their zero on the ride up. I had a recently acquired Browning BL-22 "Boys Rifle" with a 16-1/4" barrel and a Bushnell Banner 4x scope. It shot to point of aim with no adjustment. My Ruger Precision Rimfire Rifle, with Konus 3-10X scope and KDM Hugin

M10X at White Buffalo Fiasco ("It's somewhere out there!")

M10X Sight-in

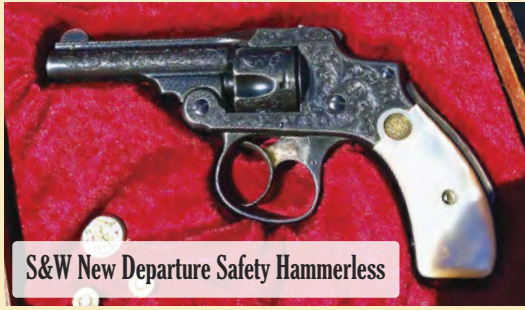

M10X Groups

Polished stainless Ruger GP100 .44

S&W New Departure Safety Hammerless

Walther PP Target Model

Colt Pocket Hammerless

Wolf Scrimshaw

.22 LR suppressor, needed only a slight adjustment. The big surprise was the M+M Inc. M10X. This semiautomatic carbine, which was reviewed in *The Blue Press* earlier this year by Oleg Volk, is chambered in 7.62x39mm. At first glance, it looks like an AK-47, albeit one built for civilized human beings, but it also incorporates features of the FAL and AR. With a 3-9x Barska scope, unlike most of its 7.62x39 semiauto brethren, it shoots tiny little 5-shot groups with great regularity.

Ogling other people's treasures and shooting my own and other people's guns is great fun, but finding and acquiring new toys is even more delightful, so Bill and I found our way to the NRA gift shop. While he bought mass quantities of chocolate and kept the gift shop staff entertained, I checked out the 3-ring binder that listed the Secret Attic's current stash of used inventory. Skimming through the preponderance of GLOCKS and other polycarbonate detritus, I found one fascinating gem...something described as a 1912 Steyr. Many years earlier, I had owned a 1912 Steyr. It was a semiautomatic pistol, chambered for a long-forgotten 9mm cartridge, and fed from a stripper clip into a built-in magazine. The 1912 Steyr listed in the 3-ring binder was listed as a .308, a modern rifle cartridge. Could this be a mistake? I requested a peek at this puzzle, and it was brought downstairs for my inspection. It was indeed a rifle, a basic early K98k Mauser pattern, built for the Chilean military by Steyr in Austria, and rebarreled in .308 in 1961. It bore the Chilean crest and "MODELO 1912-61 NATO on the receiver ring. The wood was sound, albeit heavily dinged, and the bore was mirror bright. Trigger pull was typical military two-stage 6-1/2 pounds. Bill said, "That's not a catfish anchor, it's a shark anchor!" So I had no choice but to buy it.

Situated next to the gift shop is the Whittington Center's NRA Museum, featuring a mind-numbing array of historic and custom guns, both American and imported. You would have to spend at least a day to fully take in all these exhibits. Next year, maybe I will.

Over the next several days, I shot a number of other people's guns. The most entertaining, how-

Multi-caliber Single Action

ever, was an 1880s Nepalese "Gahendra" Martini Henry military rifle in .450/.577 caliber. This was the "long-lever" version. Someone stated, quite accurately, that anyone who fired this gun and didn't end up laughing had no soul. Absolutely right on; the loud boom and long, slow recoil were a rare delight. Did anyone hit anything? Who knows?

One of the highlights of the Whittington Center experience is the high power rifle silhouette range, which features the fabled White Buffalo. This is a 6'x10' white painted steel target with a 16" black aiming point. The target is located 1,123 yards from the firing point...nearly 2/3 of a mile. It might as well have been on the freakin' moon. Bill shot at it with his iron-sighted .30-30. I shot at it with my M10X. Nothing, nichts, nada, nichevo. We were about to give up when one of our fellow Shootists showed up with his 9-year old son and an impressively scoped 6.5 Creedmoor rifle. They both shot...one shot each, and both shots were rewarded with a distant "clang." They let us try the rifle, and both Bill and I both hit with our first shot. Apparently, we had previously been shooting at the wrong target. Dumb and dumber. But we have good table manners, so they let us hang with the cool kids.

As usual, we ate well. Tequila's Mexican restaurant is just up the road a piece in Trinidad, Colorado, and features the best Mexican food I've ever enjoyed. Despite the earlier danger from the Ute Park fire, Cimarron emerged unscathed, and at the St. James Hotel, I was treated to the absolute best ribeye in the western hemisphere, black on the outside, blue rare on the inside, and marvelously tender. Raton's old Ice House restaurant is once again open for business, and they serve a half-pound hamburger to die for. Like MacArthur, I shall return.

**Kershaw Knives** and **Emerson Knives** have joined forces on a series of knives that combine the precision engineering of Kershaw with Emerson's uncompromising functional design. The CQC-6K features a modified clip-point blade for versatile cutting ability. The blade has two finishes: a satin finish on the upper and a stonewashed finish on the grind. The handle's front scale of textured G-10 offers a secure grip and the handle's stainless steel back has a solid frame lock.

The CQC-6K is a manual opener using either the thumb disk or the patented Emerson "wave shaped feature." This opening feature enables the knife to be opened as it is removed from the pocket. The pocketclip is reversible for left- or right-handed carry.  
 Blade length: 3.25" Closed: 4.5" Open: 7.75"  
**O86-31320 \$54.99**

Designed by Belarusian custom knifemaker Dmitry Sinkevich, the new **Kershaw Pub** looks like nothing you've ever seen. Closed, you'd never know there was a handy blade inside – although you would definitely see the equally handy bottle opener. And if you were exceptionally sharp-eyed, you might notice the slotted screwdriver tip right next to the bottle opener. To reveal the blade, just push down on what looks like the key ring attachment. You'll see the blade move out of the compact handle. Keep pushing and the blade will swing all the way out, ready for use. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip. The handle has an anodized aluminum front scale in bright blue and a steel back.  
 Blade length: 1.6" Closed: 3.1" Open: 4.5"

# Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

086-19208 \$119.95

## M2 Chronograph Accessories

- Infrared Chronograph Upgrade Kit **086-12116 \$89.00**
- Rechargeable Batt. Pack for Above **086-12117 48.00**
- Nylon Carrying Case **086-18145 35.95**
- Tripod **086-18126 42.95**
- 2-Ft. Skyscreen Mounting Bracket **086-18120 14.95**
- Replacement Skyscreens **086-18124 21.95**
- Replacement M2 Sensor **086-18877 36.95**

The M2 Chronograph comes with sensors, screens and one two-foot mounting bracket. A nylon carrying case and tripod are available options. The CED7000 Shot Timer is a breakthrough in technology. No other timer to date offers this combination of advanced features, compact size and light weight. This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

## Adjustable Target Pistol Sight

This Adjustable Target Pistol Sight is precision machined and fits in a standard 1911 "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your pistol already has a Bomar cut) but the results are worth it.

**086-18210 \$53.95**

## Evolution Gun Works 1911 Magwell
