er XL 650 Package

You've made the decision that loading your own ammunition is right for you. You're ready to pull the trigger, but uncertain of exactly what you need. Dillon has taken the work out of this. We have assembled a New-Reloader Package, featuring our most popular reloader, the XL 650, with the most popular machine options, along with the accessories you'll need to begin reloading immediately. This package is available in 9mm, .223/5.56mm, or BOTH.

9mm 650 Package:

XL 650 in 9mm
9mm Die Set
Bench Wrench
Small Pistol Casefeeder
650 Strong Mount
Bullet Tray Kit
Roller Handle
9mm Case Gage
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers
The Complete Reloading Manual for the 9mm Luger
Total: \$1331.35

.223/5.56mm 650 Package:

XL 650 in .223/5.56mm
.223/5.56 Die Set
Bench Wrench
Small Rifle Casefeeder
650 Strong Mount
Bullet Tray Kit
Roller Handle
.223/5.56 Case Gage
Dillon Case Lube
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers
The Complete Reloading Manual for the .223 Rem.
Total: \$1363.30

Combo Package (.223/5.56 Conversion Pictured at Right) Includes the 9mm Package Above, Plus:

.223/5.56 Conversion Kit
.223/5.56 Die Set
XL 650 Quick Change
.223 Case Gage
Dillon Case Lube
Small Rifle Casefeed Plate
The Complete Reloading Manual for the .223 Rem.
Total w/9mm Pkg.: \$1704.50

As a token of our appreciation for new reloaders who purchase one of these packages – while supplies last – we're going to include one of these **Tactical Tailor** Operator Caps and our Dillon Precision morale patch. The Tactical Tailor cap is an incredible value: a high-quality product that's made in...wait for it...the USA, by a company that prides itself on hiring veterans. The hat in the photo is MY hat, and I've lost track of how many times it's been washed – IN the washing machine! It STILL looks great! If you're the kind of person who not only wears hats, but also WEARS THEM OUT, you're going to love this hat.

ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

We READ Our Mail!

After a 17ish-year break from shooting IPSC and reloading, I got ready to jump back in and dusted off the 550. It had been in its box for 17 years and when I mounted it up, pulling the handle moved the table instead of raising the ram. After working it a bit I felt that galled-bushing feel and started to disassemble the press. A call to Dillon with a list of replacement parts had the tech suggest I send the press in for a tune up for about \$60 or so. About 10 days later I call to get an update.

Me: "No hurry, but how's my press doin'?"

Dillon: (Papers rustling) "We sent it out yesterday."

Me: "Oh, what did you have to do?"

Dillon: (Papers rustling) "We ended up replacing the entire bottom end."

Me: "Ok, (gulp) how can I pay for it?"

Dillon: "Don't worry. It's covered under warranty."

Me: "But it's almost 20 years old!?"

Dillon: "That's our 'No B.S.' Warranty."

No Kidding.

Joseph Santora - billyb2u@aol.com

Dear Dillon family and staff, I bought my RL 450 back around 1983 and in all the time since it has given me totally reliable service loading everything from .38 Special to .460 S&W. I couldn't begin to add up the number of rounds this press has built. I've replaced a couple small plastic primer tube pieces and springs but that's about it. Keep them clean and lubed, they'll last forever. Never had to call and test your famed customer service. I considered upgrading to 550 level a few times, but I do enjoy my time at the bench. I shoot 250-400 rounds a week on average and I'm not in that big a hurry to finish. Thanks again for building such great products and **The Blue Press!**

Sal S - Clermont, FL

I stopped by your booth at the NRA Harrisburg, PA Sportsman Show with a "FL 2000 brass cleaner leaking media" problem. It was no problem to your staff. They took my information and within a few days I had a new gasket, lid support and lid nut sent to me. They even refused to bill me for the parts and their shipping cost. My unit will continue cleaning brass and shotgun shells into the distant future. Thank you all for making - and standing behind - such fantastic precision reloading gear.

The Canik TP9 Elite Combat

By Oleg Volk

The Canik (canikusa.com) handgun series started as inexpensive clones of Walther P99. Century Arms (centuryarms.com) now imports six variants of TP9, from basic everyday carry configuration to a full-fledged race gun. The quality of Caniks has always been decent, while the design shows a certain lack of appreciation for real-world uses, not surprising given the limited private gun ownership in Turkey. One model with a single-action striker had a prominent decocker that would produce a dead trigger with no way to re-cock short of racking the slide. Another case with a light, crisp trigger with the geometry and materials so ill-picked that it couldn't be reliably fired with conventional two-handed grip. The TP9 Elite Combat (msrp \$849.99) is the most recent offering, manufactured in Turkey but designed in part by Salient Arms International (salientarmsinternational.com). The US contribution to the design shows in the much better thought out pistol than some of the previous efforts. A striker-fired Browning tilt-barrel design, it looks mainstream but offers several useful features.

The TP9 EC uses a Cerakoted polymer frame with metal rails and locking block. The Nitrided fluted 4.55 inch barrel designed by Salient is threaded 13.5x1 left hand, and features a knurled thread protector with flats for the included wrench. Similar to the early efforts of South Korean carmakers, Canik makes up for the less-known brand with extra features and accessories included at no extra charge. The case contains a flush-fitting

15-round metal magazine and a spare with a +3 extended floorplate, four micro red dot mounting plates covering just about every MRDS on the market, a magazine loader, an adjustable-cant plastic holster with an unorthodox retention device, a larger backstrap, a trigger lock, cleaning jag and bore brush, and a disassembly instruction card. For serious use, something other than the included holster would be recommended, as the retention method used – pressing the latch towards the muzzle with the index finger – isn't very quick or comfortable.

The first impression is very favorable. The pistol fits the hand well, with just texture for retention without being abrasive. All controls are accessible while retaining a low profile. Salient-designed dovetailed fiber-optic front and non-glare square notch rear sights give a good sight picture. The rear sight is retained with two setscrews, but requires a pusher tool for adjustment. From the box, the pistol shot substantially high and somewhat to the right of center. For longer range, the rear can be removed completely and replaced with a red dot. The TP9 SE supports most of the pistol optics, and replacement of the rear sight with a micro red dot takes only a minute.

The new trigger was the unexpected but most welcome surprise. Previous designs felt good but could lock up if the finger was placed too high, or if side pressure was exerted, or if the crease rather than the pad of the finger contacted the safety tab. This trigger fixes all problems, and provides the best experiences of all Canik series. The trigger

face and the wide red-anodized safety tab are metal. The tab is hinged very high, close to the frame. Once the take-up is met, the finger comfortably presses across the entire 3/8-inch width of the flat trigger face, making for a very controllable pull. The weight is the same as other models, around 4.5 lbs., but it feels more crisp and repeatable, with around 1/16-inch reset conducive to controlled rapid fire. A red striker indicator protrudes from the back of the receiver when cocked, permitting also tactile verification in the dark.

A flared magazine well is another Salient upgrade, providing a wider funnel for quick reloads, and a bit of a pommel to aid retention. The magazine-release button is placed, textured and tensioned just right, and may be reversed for left-handed shooters. The magazine is the standard 15-shot, drop-free metal design. A loader is included, but loading by hand proved quick and easy.

The ambidextrous slide stop lever is easily reached with either thumb or forefinger, and features a nicely textured shelf. While it excels in its purpose, this lever almost always ends up held down by the thumb of the strong hand during firing, preventing slide lock on the last shot when the standard thumbs forward hold is used.

The disassembly process is simple but unusual: verify clear, pull the trigger to decock, pull the slide forward one inch and lift it straight up. The recoil spring is captured onto the guide rod. Reassembly is the reverse of the fieldstripping process.

Shooting the Canik TP9 CE is very pleasant. Minimal recoil, moderate muzzle flip, and a good trigger all add up to a feeling of confidence, further improved by 100-percent reliability with all kinds of ammunition,

from 50-gr. hypervelocity Liberty HP to 185-gr. Seismic subsonics, and everything in-between as well. The pistol feels equally good during single strong or weak hand shooting as well.

To test accuracy, I rested the gun in a two-handed hold over a sandbag. At 15 yards, groups centered between 2 and 7 inches above the point of aim, with the heaviest bullets printing higher.

The group shape, with minimal elongation but with one or two fliers out of every 10 suggests to me that the shooter skill was inadequate with the combination of sights and trigger. The groups shot from a rest were considerably higher than those fired freehand, meaning that the motion of the pistol in recoil affected the point of impact. The pistol also twisted noticeably to the right when fired for accuracy, but that was not observed when firing

it combat-style standing. The seems capable of better accuracy than my test results, so I re-shot with a Vortex Viper 6 MOA mini red dot: the group shrank slightly, but the real improvement was doubling the speed of target acquisition. I noticed that the pistol pointed very high after coming out of recoil: installing the smaller backstrap corrected

that, providing a more natural point of aim. The wandering of the red dot during the trigger pull betrayed the real source of inaccuracy, the combat-weight trigger. Switching it out for a 3.5-pound variant would have made the TP9 into more of a target pistol, but the risk of accidental discharge with gloved hands would increase.

At 15 yards, I could make rapid hits on a 3x4 inch cactus leaf. At 50 yards, a half-size silhouette caught the entire magazine with no misses. TP9 ES accuracy is plenty good for a fighting pistol. The gun is

very comfortable to shoot and can be used for all-day training without fatigue.

The Canik TP9 Elite Combat as it arrives – with LOTS of accessories.

“This trigger fixes all problems, and provides the best experiences of all Canik series. The trigger face and the wide red-anodized safety tab are metal.”

Plastic Funnel: P32-16617, \$6.95

POWDER MEASURE ADAPTER

If you load rifle cartridges
with long-grain extruded
powder, you can now use any
manufacturer's powder measure
with 7/8" x 14 threads on your
RL 450, AT 500, BL 550 or RL
550. (Requires the use of an RL
450 powder die – see below.)

P32-20029, \$24.95

RL 450 Powder Die:

P32-20308, \$23.95

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.95 each, or \$24.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

XL 650-only	P32-22052	49.45
"SDB"	P32-22223	68.45

Dillon's "Belted Magnum" Powder System[^]

System[^] features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	P32-97126	\$158.95
----------------------	------------------	-----------------

Dillon's Roller Handle[^]

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	P32-17950	\$48.95
------------------------	------------------	----------------

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	P32-22214	\$45.95
1050 Tray Kit	P32-22215	45.95

Dillon's Low Powder Sensor[^]

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Dillon's Case Preparation Equipment

CV-2001[^] P32-20493 \$191.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

CV-750[^] P32-19455 \$146.95

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

CM-2000 Case/Media Separator[^] P32-20675 \$78.95

CM-500 Case/Media Separator[^] P32-21045 \$47.95

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers: Case Cleaners are available in 220 volt!

Euro CV-2001 P32-22047 \$216.95

Euro CV-750 P32-19473 \$171.95

Rapid Polish[^]

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle.	P32-13804	\$8.95
Case (20 pc.)	P32-20255	135.95

Case Lube[^]

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

22 Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!
Fills the primer tube while you reload!
Clear polycarbonate shield and protective housing

Dillon's RF 100 Automatic Primer Filler[^] eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$52.95 each.

Super 1050/RL 1050 Short Trim Die Toolhead[^]

P32-62219
\$230.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. **(NOTE: the Blue 1050 toolhead stand – Part Number P32-62200, \$49.95 – is not included.)**

Rapid Trim 1500 Case Trimmer[^] 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P32-62164** is **\$337.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P32-13141**, are **\$20.95** each. Upper lock rings, **P32-13559**, are **\$5.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600[^]

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Dillon's Concealed Carry Tote[^]

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for

quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

Mernickle

Conceal-Carry Performance Series

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

Mag Pouch	P32-19946	44.95

“Plan B”[^]

Very-Bad-Day Planner Holster

Dillon’s “Plan B” Very-Bad-Day Planner Holster[^] holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won’t draw undue attention. It looks like a typical day planner, but inside there’s a holster that’s adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

“Plan B” Holster **P32-10252 \$24.95**

5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

Mr. Bulletfeeder[®]

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

Mr. Bulletfeeder[®] Replacement Parts & Spares

Having separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

The Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collar to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

Lose a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

Dillon's Pistol Die Sets

Size Die

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)[^]

.223 Remington	P32-10839	\$80.95
.308 Winchester	P32-15574	80.95

Red Flag Laws Aren't Laws:

By Alan Korwin

Before beginning, a note about our nation's now openly sworn enemy of gun rights, the party of democrats, who have lined up a massive palette of infringements. Some have already been pushed (illegally, if the Constitution still matters) through the House of Representatives, which they control.

Democrats are using their new power to seek national red-flag laws.

State-by-state versions aren't sufficient.

Democrats could not have picked a more terrifyingly appropriate name, or one with more historical significance. Our own politicians! When Mao Ze Dung, the brutal Marxist dictator who ruled communist China after that 5,000-year-old religious dynasty fell at last, he implemented red-flag laws. Laws designed to turn neighbor against neighbor, to make fellow countrymen enemies of each other. The internal terror this spread is hard to imagine, but let's try.

Under a regime of red-flag laws, anyone can secretly turn you in to the authorities, for anything. You have no protection from that, no recourse, and no way to duck. Due process is effectively eliminated. Later, you can go hire expensive lawyers and sue city hall.

The current proposal, Senate Bill 7, debated on March 26, is loaded with deception. You'll hear only family members can turn you in, but that includes former lovers, roommates...and police. Because anyone can tip off police, who can then act on their own, the family "limitation" is complete subterfuge, meaningless. That's how legislators drafted this.

You'll hear it requires a court order, but that includes any order signed by a magistrate, "a civil officer or lay judge...especially one who conducts a court that deals with minor offenses and holds preliminary hearings..." The hearings can be *ex parte* – you don't have to be there – and can be conducted by telephone. Compelling evidence includes, "relevant information from household members."

"I'm sure he's dangerous your honor, I know he has guns!"

Since the federal government can't run local police ops – that's still beyond the pale – this is accomplished through financial coercion, a quasi-legal but common scheme. Any state that doesn't enact red-flag rules according to strict federal guidelines will be denied grant money to run red-flag programs. Fortunately, no state has a program matching the feds' new guidelines. From the looks of it, no state can, so we catch an unexpected break.

Bottom line, this regimen would mean keep your head down and hope no one notices you. Don't say a bad word to or about your neighbors. Only whisper to the ones you trust. If any of them, or anyone with a grudge, reports you to authorities, even anonymously,

armed police teams can arrive unannounced, wake you from sleep, and haul you away. Sure, it's a worst-case scenario. Tell that to Roger Stone.

Though it looks sanitized and proper, the police can ransack your home "with legal authority" to confiscate any firearms and ammunition you may own (the purpose of the law – disarm the danger-

“Under a regime of red-flag laws, anyone can secretly turn you in to the authorities for anything.... Due process is effectively eliminated.”

They're Tyranny on Paper!

ous). Officials can't trust that these on-the-brink murderers turned in all their guns.

Nothing really prevents officials from taking other things they may find, and you can complain later. If you dare. And can prove it. And nothing may happen, except you'll be painting a target on yourself. A warrant with things specified? Are you kidding? The bill doesn't go there. Punishment for false accusations? There isn't any. Medical help because...they're psychos? Nope.

Legitimate mechanisms already exist to deal with truly dangerous individuals, "but that's so cumbersome" comes the fearful cry. It should be, so blatant tactics only apply when clear and present dangers exist. If you follow "news stories," you know people have reported unexploded nut cases to police, who did nothing, before the crazies went nuts. That's a problem.

Making it easy to red-flag citizens is simply wrong, guilt by casual suspicion of anyone nearby.

"I think he's a commie!" or whatever the flavor of the day is. "He's got guns!" Lefties think that defines dangerous. Is that what you want America to become? It is what the democrat-socialist's leadership thinks, and unfortunately, some of the so-called opposition is not opposed. They know not what they do. They're killing America.

You can't just take guns from really dangerous people on somebody's say-so. It makes them really angry. Leave them with their knives, matches, car keys...and hidden guns? Those folks can't be walking around in public, without mandatory medical attention. Red-flag laws are tools of oppression that have nothing to do with safety.

Award-winning author Alan Korwin has written 14 books, ten of them on gun law, and has advocated for gun rights for nearly three decades. See his work or reach him at GunLaws.com.

The Original M1 Buddy®

The Original M1 Buddy Service Rifle Cleaning Port fits all models of M1 Garand and M1A rifles. Unlike other service rifle cleaning ports on the market today, the M1 Buddy allows you to use either the ratcheting GI Chamber Brush or GI Combo Tool while the cleaning port is in place! No need to worry about those fingers anymore! The Original M1 Buddy is covered by a lifetime warranty and will be replaced free of charge if it fails under normal use.

The Original M1 Buddy

“That damned Yankee rifle that you can load on Sunday and shoot all week.”

By John Marshall

It was “...that damned Yankee rifle that you can load on Sunday and shoot all week” – a statement arguably first made by Confederate Colonel John Mosby during the American Civil War. There was nothing like it on either side of that conflict. In that age of predominant muzzleloaders, the newly unveiled repeating firepower it brought to some battles would frequently be cited as a decisive factor. Some of those same .44 rimfire 1860 Henrys were effectively used by Native American warriors at the 1876 Little Bighorn battle with Custer’s 7th U.S. Cavalry. The Henry’s slick toggle repeating action would later be mimicked in the Models 1866, 1873 and 1876 Winchesters – the guns that “won the West.” This is the story of that landmark rifle.

By way of background, Walter Hunt, then living in New York, patented in 1848 what he called his “Volition Repeating Rifle.” A very active inventor, Hunt had also invented the safety pin and a sewing machine. The Volition rifle had an under-barrel tubular magazine and a lever that operated the firearm. The lockup of the breech bolt was called “knee action,” or “toggle action” in which two connected links can be extended or collapsed.

The Hunt rifle fired “Rocket Balls,” a type of caseless ammo in which the powder charge was contained in the hollow bullet. In 1849 Lewis Jennings bought the Hunt patents and produced a short-lived rifle that was made by Robbins & Lawrence, located in Windsor, Vermont.

Horace Smith and Daniel Wesson (you’ve heard of them) purchased the Jennings patent from Robbins and Lawrence, and also hired a very talented man who was working at Robbins and Lawrence as their shop foreman. This was Benjamin Tyler Henry. He was born in Claremont, New Hampshire in 1821, was initially apprenticed

to a gunsmith as a youth, and had steadily worked his way up the ranks to become a capable foreman. This team formed the Volcanic Repeating Arms Company in 1855.

Smith devised a primer for the caseless cartridge, and then came up with a copper case to contain the primer compound in its rim and to hold the powder and bullet. This was the world’s first metallic rimfire cartridge. The Volcanic rifle ultimately proved to be a flop. Smith and Wesson both left the company, which had moved to New Haven, Connecticut and become bankrupt. Volcanic’s major stockholder was wealthy shirt maker Oliver Winchester. He purchased the firm’s assets from the other stockholders and formed the New Haven Arms Company in 1857. Benjamin Henry perfected Smith’s cartridge and came up with what became the somewhat larger .44 Henry round, which was loaded with 26 to 28 grains of black powder under a 200- or 216-grain lead bullet. He also redesigned the rifle, retaining the knee/toggle action and the tubular magazine. The new lever-action Henry rifle was patented in 1860. To introduce the weapon properly, a number of Henry rifles were gifted to government officials, including Secretary of War Edwin Stanton and President Abraham Lincoln.

New Haven’s groundbreaking repeater utilized a bronze frame and a tubular magazine with a capacity of 16 .44 Henry rimfire cartridges. An estimated 200-400 Henry rifles were made with iron frames in early production. It weighed in at 9-1/4 pounds empty, was nearly 45 inches in length, and its octagonal barrel measured 24 inches. Its rate of fire was about 28 rounds per minute, and it had an effective range of about 100 yards. With the .44 Henry rimfire round, it had a muzzle velocity of 1,125 fps and muzzle energy of 568 foot-pounds. It had no safety provision. If the hammer was cocked or rested down on a loaded car-

Illinois equipped with
Henry rifles.

tridge, jarring or a blow on the hammer could set it off. The rifle had a double firing pin to help ensure ignition of the priming compound in the cartridge's rim. Loading it was a bit awkward. Using a projection with a round thumb pad on the magazine follower, the user pressed it forward through a long slot in the magazine. This compressed the follower and magazine spring into a separate forward section of the magazine. This part of the magazine could then be pivoted to the right side, trapping the follower and spring inside and opening the mouth of the magazine for loading. The cartridges were dropped, base first, one by one into the magazine. Then the forward section was pivoted back in place to align it over the main body of the magazine. This allowed the follower and spring to press back into the magazine and exert pressure on the stack of cartridges. Operating the lever down and back loaded one cartridge into the chamber and cocked the hammer, readying the piece for firing. Subsequent use of the lever ejected the spent cartridge case and loaded a fresh round until repeated activation exhausted all the cartridges in the magazine or the user chose to stop firing.

Although the Henry rifle was never adopted officially as a standard firearm by the Union, from 1862 forward, it was available for purchase. 1,731 were procured by the government. The Commonwealth of Kentucky acquired another 50. Somewhere between 6,000 and 7,000 rifles were also bought with private funds by Union military units and individuals. It's a matter of record that many infantry soldiers used their reenlistment bonuses in 1864 to buy them; believing having such rifles could save their lives on the battlefield. Some captured rifles were also used here and there by the Confederacy, although ammunition supply was difficult. Confederate President Jefferson Davis's bodyguards were known to have a few.

Henry rifles provided a devastating benefit wherever used. The increased firepower gave their users at least a 10 to 1 advantage over opponents using one-shot muzzleloaders. In 1865, Henry rifles were effectively used by one company of the 7th Illinois, where its 52 men defending a fort demolished the attack of a full Confederate battalion. Union Major William Ludlow wrote a description of the Battle of Alatoona Pass thusly: "What saved us that day was the fact that we had a number of Henry rifles. This company of 16-shooters sprang to the parapet and poured out such a multiplied, rapid and deadly fire, that no men could stand in front of it and no serious effort was made thereafter to take the fort by assault."

Union Private Prosper Bowe was in the fighting near Atlanta, Georgia. He wrote to his sister on July 28, 1864, where he described a battle that occurred on July 22. His unit was ordered to the rear with Henrys to protect a supply train. As soon as he and his comrades got into position, the Confederates came out of the woods across an open field. Bowe wrote: "Not a man faltered and when the order was given to open on them we started our sixteen shooters to work. The first column in front of us nearly all fell with the first two or three volleys but they stood their ground well. They were bound to get our trains but we had something to say about that. We will fight for our supplies if nothing else but as luck would have it the Rebs fell back just as we had got out of ammunition. I stood and fired ninety rounds without stopping. My gun barrel was so hot that I could not touch it. Spit on it and it would sizz. There was seven hundred rebels buried in front of our regiment and the ground was covered with wounded."

The Henry rifle proved the merit of repeating firepower vs. single-shot muzzle loaders convinc-

Lyman Precision Funnel Set

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. No more powder clinging to surfaces, which can happen with lightweight plastic funnels. The solid construction and quality of Lyman's Precision Funnel Set will be apparent in its first use. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

P32-11389 \$39.95

Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The Lyman X-Block is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

48 The Dillon RL 550C

By Julie Golob

You could say I grew up around a reloading machine.

Reloading our own ammo was the only way my father and I could afford to shoot as a dad and daughter team in practical shooting sports. When I became an adult I loaded a ton of competition ammo on a Square Deal "B" and eventually a fully outfitted XL 650. Both of these are impressive machines and both continue to run just as well today as they did when I first started reloading with them. These days I'm very fortunate to use Federal Ammunition for my competition and training needs. Still, there are those times when I hanker to produce a specialty load.

There are times I want to develop a test load for targets, but most often I'm interested in options suitable for handgun hunting. As a deer and predator hunter I don't always need or want full-power loads in .44 Magnum, .460 S&W, or the modern level of .45 Colt loads. Finding factory ammo in the "mid-range" with bullets appropriate for hunting can be a challenge. That's when I began to do research for the next reloading press for our bench.

I wanted a machine that could meet several specific requirements. First and foremost, it needed to produce extremely accurate ammunition. I wanted 4" or better handgun ammo at 100 yards kind of accurate. After that, the machine had to produce a reasonable number of cartridges in a relatively short time. Of course, that's a given when discussing Dillon machines, but not all progressive loaders are the same. A final requirement was for it to be quick and easy to change calibers to account for my many Smith & Wesson revolver options.

Even beyond these requirements, I wanted a reloading machine that would not only be reliable, but would also be easy to troubleshoot and fix when necessary. Many machines on the market, and most (or all) of the machines made by Dillon can accomplish some of these requirements, but I wanted a machine that could meet all of them. Enter the Dillon RL 550C!

I'm not knocking my beloved XL 650. It was an enormous upgrade from my first press, a Square Deal "B." The 650 produces accurate ammunition and quickly! That said, caliber changes (especially with my case-feeder) are not as quick as I would like. The machine itself, though incredible, is better suited to high volume, continuous use. My current cartridge needs are more modest, and since I won't be loading throughout the year, a simpler option than the 650 was in order.

The 550C seemed to offer everything I was looking for and it has proven itself to be a real winner. Accurate ammo? No problem, as with all Dillon presses. Fast production? Though obviously not as fast as the 650, the 550C is no slouch. If I only have a half hour after the kids go to sleep, I can make anywhere from 100 to 250 rounds. Those numbers are based on careful reloading practices and not on trying to be as fast as possible. Someone very familiar with the machine can likely produce quite a bit more.

Loading accurate rounds at a comfortable production rate is critical, but where the 550C truly shines is in caliber conversions. When changing calibers that use the same primer size, it's fast! With a pre-adjusted set of dies correctly locked into a spare toolhead, I can be up and running in

about three minutes. A separate powder measure for each caliber I load already correctly setup on the powder die helps too. After that, it's just a matter of swapping shellplates and adding the correct powder. If I find I need to change primer sizes, that adds another three minutes or so to the process.

Finally, there's the ease of maintenance and troubleshooting factor to take into account with the 550C. Though it's a progressive press, the manual-indexing aspect allows you to effectively use it like a single-stage or turret press. Because the indexing is separate from the ram function, if you make a mistake, you can correct it very easily. If a spent primer decides to go exploring, you can easily access all parts of the machine to clear it out. Without the need to index the shellplate, after you pull the locator pin and remove the case from the powder station, you're free to raise and lower the ram as needed. You can then sweep out any debris or gain access to any part.

Accessories definitely make the reloading process easier and more enjoyable. A primer flip tray is a must-have. It keeps me from touching primers with my fingers. I know plenty of people who do handle primers. Their rounds still work fine, but I prefer not to run the risk of getting dirt or oils into the cup. Extra toolheads for other calibers are a no brainer. I also prefer a separate, dedicated powder measure for each load. It makes it easy to verify, set and forget.

The roller handle, a feature I shunned for many years, really does make a difference. I'll be so bold to say that Dillon should make this a standard feature and do away with the ball handle altogether. Not only is it easier to use and more comfortable to pull and push, it seems to improve my feel when seating primers.

The Strong Mount puts my press at just the right height on my bench. I've also attached the bullet tray, another feature I studiously avoided for many years. I don't often use it as designed though. It's a great place to rest my box of bullets. It's also great for holding any parts I want to swap out, like those easily lost locator pins! Knock on wood, I haven't lost one yet!

Speaking of swapping parts, the built-in tool holder certainly makes things convenient. It may not be a true necessity, but I'm at the point in my reloading career that efficiency and convenience are worth a fair bit.

In the few months that I've had a 550C, it has more than lived up to my expectations and its reputation. I'm currently working on a load for my .44 Magnums and Specials. The ease of changing calibers has made my reloading time more enjoyable than ever before. It's a press that's purpose built for fast ammo production and ease of use. 

**The 550C
seemed to offer
everything I was
looking for and
it has proven
itself to be a
real winner.**

50 "Big Fifty Reloader"™

STANDARD FEATURES:

- Made in the USA
- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

Dillon's Bench Wrench Fits 1" Die Lock Rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We offer 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our 1" wrench is a 7/16" box-end for adjusting the

Powder Bar of any Dillon Powder Measure. All of our die lock rings fit any standard 7/8" x 14 dies.

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master - instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

P32-19495 \$9.95

Elzetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

P32-21894 \$46.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

P32-19972 \$39.95

Dial Caliper[^]

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

How I Decided to Keep Calm and Carry Concealed

By **Connie Bowlby**

There are many things to consider when deciding to take deadly force with you each day as you go out into the world. For most of my life, I never really thought about what could happen out there. I grew up in Pontiac, Michigan. Like many cities, Pontiac was a decent place, with some areas we knew to stay clear of. As I look back now, the house we lived in would have been so easy to get into. We really had no way to protect ourselves if someone decided we had something they wanted.

Living in Seattle for 11 years now, many things have changed since I first fell in love with this beautiful city. The homeless population has grown, I've had two attempted break-ins, and have found needles and [human] feces in my yard. Recently, a few incidents have been on the news that also make me think more about my safety as a woman. A woman was assaulted in the bathroom at a car dealership by a homeless man who admitted he targeted her for the assault. Another woman was attacked in the bathroom at a popular local park while training for an athletic event early one morning. I'm grateful in these two cases both men were caught.

I can't say how these women feel now after they were attacked, or if they'll choose to do something different going forward. I can only speak for myself in saying I don't ever want to look back and ask myself, "Why didn't I have my weapon?" I learned in a self-defense class that most women who have been attacked can identify a point where something didn't feel right, but they brushed it off. I don't know if or when I may be

targeted. I may walk into a situation that's already happening with no way to escape as it unfolds.

I believe these situations are rare and maybe even unlikely. But they do happen, and I now choose to live in a way that allows me the best chance of surviving an unexpected event. This past summer, close friends of mine who live on the east side had a man break into their crawl space and do a few thousand dollars worth of damage under the house while looking for things to steal. My friend has a CPL (concealed pistol license) and waited near the garage with his weapon drawn, not knowing if the man would try to get into the house. The police arrived and eventually the Canine Unit had to send a dog in to drag the man out. My friend was told later by police that he did everything right. He didn't go after the guy and escalate the situation. He identified himself quickly to law enforcement and kept his hands visible and weapon pointed in a safe direction. He was instructed by police to take his weapon inside and get his wife out of the house. I asked him after the incident if he felt that all his practice with ASI (Action Shooting International, asi-usa.org) helped him in this situation. He said yes, it absolutely helped. Because of that practice, he didn't have to think about the gun in his hand. He could focus on other important things. Such as, his wife's safety, having her call 9-1-1, and keeping track of the intruders whereabouts before authorities arrived.

Even though it was fear that led me to the decision to carry, I end up living with less fear on a daily basis and feel more confident with my plan in place. Although my self-defense instructor and I

disagreed about the need for a firearm, I found it very helpful and empowering to practice the physical aspects of self-defense training. To have someone holding me or coming at me and having to think and maneuver my body to get away from that person was very challenging and scary. One of the most common responses to an attack is panic and freezing. The brain doesn't want to believe it's happening. But if it does happen, I think it's better to be ready to act. Practicing the physical skills learned in a class for just five minutes each day greatly increases a woman's chance of acting to stop an attack versus freezing and becoming a victim.

A weapon is not the only answer to the question. I chose to explore more options since there will be times when I am not able to carry my weapon. When I do carry, I know the time and the repetitions I have put in at the range will help me handle my weapon safely and quickly even when adrenaline is pumping. Experiencing two attempted break-ins has directly reinforced my belief that consistent and repeated training is paramount. Nothing can prepare you for that adrenaline rush.

Entry-level competition is a great way to get that practice. The stages at an ASI match run through real-life scenarios forcing me to manage several things at once, including the adrenaline spike when the timer goes off. For me it's a great place to determine if my practice is working. Can I handle each stage safely and quickly, without fumbling? If I do fumble or have a malfunction, do I clear it quickly and get back on target? I am also planning to take additional training that is more defense-oriented. Even though I feel comfortable handling my weapon, I still wonder if I would hesitate in a tense situation. I want to make very sure that I remove any possibility of hesitation by replacing the question with more training.

I think it's very important when handling and wearing a weapon that I establish a routine and do the same thing each time. This creates muscle memory. The situation presenting itself will be the focus and not the gun in my hand that I haven't picked up in six months. This is exactly what happened to me in the first attempted break-in. That night, I couldn't remember how my shotgun worked. I never want to feel that helpless again.

Also important is knowing the laws in your state or other states when you travel. I took a trip to Cannon Beach, Oregon and called the Clatsop County Sheriffs office to make sure I knew how to

legally transport my firearm into Oregon. This made me more comfortable knowing I was not breaking any laws. Taking a class that deals with what will happen if you ever have to use your gun in a self-defense incident is a very good idea. There are also companies that provide legal defense membership plans for concealed weapon holders. They provide legal expenses if you find yourself in a self-defense lawsuit. They have attorneys who understand the gun laws in all states. This may be something you want to consider.

I'm surprised by how often I think about not having my weapon when I'm in California. Unless I'm traveling for a specific shooting match, I can't take my guns with me to California. I have 4th and 5th generation GLOCKS and none of them are on the list of approved guns in the state of California. We spend a chunk of time there and I do feel less safe at times.

Another important thing to consider is how you are going to carry your firearm. I was very uncomfortable with the idea of having a gun in my purse and my purse being taken from me. I decided early on I would carry on my body. I'm a petite woman and have found it difficult to find a holster that fits well, is comfortable, and doesn't print on me. I recommend you find a retailer that will let you try the holster and return it if it doesn't work for you. I had to make some changes with how I dress as well to help with concealment. Looser fitting tops or adding a jacket or vest helps with concealment. I had to get used to wearing a belt again after many years of not wearing one. After several holster attempts, I decided on three options that work best for me. I have a Crossbreed (crossbreedholsters.com) Mini-Tuck® IWB holster for the 4 o'clock position, a Sticky Holster (stickyholsters.com) for running and a G-Code INCOG (tacticalholsters.com) appendix IWB (Inside the Waist Band) holster. I have never found what I would call a perfect holster, but I have been pretty happy with these three. I mostly wear the appendix holster. The MiniTuck is a bit better for low-rise jeans and the Sticky Holster works well with most types of pants but is great with yoga pants. It took a lot of practice to get good at drawing from three different types of holsters in different positions. I would rather wear my competition holster and magazine pouches, but that would probably not be a good idea in downtown Seattle. If you decide to carry, stay calm and put in the time to do it safely.

AMMO BOXES ARE COVERED BY DILLON'S LIFETIME WARRANTY

Dillon AkroBins[^]

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes[^]

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Swab-its – A Swab for Every Job! ⁶⁵

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	P32-15310	\$4.98
.243/6mm (6 ea.)	P32-15311	4.98

.40/10mm (5 ea.)	P32-15314	4.98
.45 Caliber (5 ea.)	P32-15315	4.98
12 Gauge (3 ea.)	P32-15325	8.98
Multi Pack: (6) .22/5.56, (6) .30/7.62, (6) .357/9mm, (5) .40/10mm, (5) .45	P32-43312	26.99

Gun-tips®

Gun-tips® Extended Reach Firearm Cleaning swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

P32-12583 \$9.99

Bore-Whips™

Bore-Whips™ .17 and .22 caliber (pictured) by Swab-its® are ideal for air rifles, rimfires or any other .17 or .22 caliber firearm that’s difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator.

.17 Cal. **P32-12689 \$9.99**
 .22 Cal. (Pictured) **P32-12690 9.99**

Star Chamber

Star Chamber Cleaning Foam Swabs™ are for AR-15, M4 and similar MSRs. 3-pack **P32-10056 \$13.99**

Handgun Cleaning Kit

The Swab-its® Handgun Cleaning Kit for 9mm/.357 caliber handguns contains four Bore-Sticks™, a three-in-one tool that replaces the cleaning rod, jag, and patch; a nine-piece Multi-Surface Gun-Tips® package for internal and external cleaning requirements; and a 0.4 ounce bottle of BREAKTHROUGH® Battle Born HP Pro lubricant and protectant. As with all Swab-its products, the Bore-Sticks and Gun-Tips are made of reusable, lint-free foam that is washable with degreasing soap and water or mineral spirits.

P32-11907 \$19.95

MSR Cleaning Kit

The Swab-its® Modern Sporting Rifle Cleaning Kit contains 6 .223/5.56 Bore-tips® for bore maintenance; a nine-piece Multi-Surface Gun-Tips® package for internal and external cleaning requirements; three Star Chamber Cleaning Foam Swabs™; and a 0.4 ounce bottle of BREAKTHROUGH® Battle Born HP Pro lubricant and protectant. As with all Swab-its products, the Bore-Sticks, Gun-Tips and Star Chamber Swabs are made of reusable, lint-free foam that is washable with degreasing soap and water or mineral spirits.

P32-11908 \$24.95

66 New Products from Slip 2000

725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks!

NOTE: To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P32-19237 \$21.99

Slip 2000 Carbon Killer provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

NOTE: Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P32-19234 \$21.99

Slip 2000's Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P32-11652 \$25.99

Slip 2000's AR Cleaning System contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P32-11676 \$19.99

Slip 2000 Extreme Weapons Lubricant (EWL)

was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P32-11644 \$18.99

Slip 2000 EWL30

has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P32-11645 \$18.99

Slip 2000 Copper Cutter

is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing!

NOTE: It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P32-11646 \$11.99

Each Slip 2000 Gun Wipe

packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube.

Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P32-11674 \$14.99

Lyman Pick & Brush Set

Lyman's Pick and Brush Set is an indispensable item for your cleaning supplies and range bag.

P32-40160 \$3.99

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe P32-15732 \$10.99
1.5 Ounces P32-15731 14.50

Revolver BLAST with TW25B is an all-synthetic lubricant/protectant specifically designed for revolvers.

4.2 Oz. Aerosol P32-66677 \$11.95

E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth P32-18613 \$7.99

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).
 Slide-Glide Standard **P32-15571 \$7.95**
 Slide-Glide Lite **P32-15572 7.95**

Microlon UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

P32-75125 \$9.95

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

P32-13128 \$12.95

70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

Elite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature

special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

Made in USA With a Lifetime Warranty!

ingly. About 14,000 were eventually manufactured through 1866. France and the Ottoman Empire purchased many following the Civil War. Henrys were later widely used in the Indian Wars on both sides. Oliver Winchester transformed the New Haven Arms Company into the Winchester Repeating Arms Company. The Henry was improved to give it a side loading gate, and the famous Winchester Model 1866 "Yellow Boy" rifle went out on the West to become a fixture on the frontier, as did the succeeding Models 1873 and 1876 that used the same toggle action.

In 1864, Benjamin Tyler Henry grew angry over what he believed was inadequate compensation and attempted to have the Connecticut legislature

award ownership of New Haven Arms to him. This was unsuccessful, and he subsequently left Winchester Repeating Arms Company over the dispute. He worked as an individual gunsmith until he died in 1898. In honor of his significant contributions, Winchester began to headstamp their rimfire cartridges with an "H" and this practice continued well into the 20th Century.

Today, original Henry rifles in almost any condition are expensive for collectors to acquire, as they unarguably constitute the cornerstone of lever-action rifle development. Today, replicas are available for shooting with more modern calibers, and these incorporate safety features not present on the originals.

The SnapSafe® Modular Vaults LOCKBOX is a pry-resistant 16 gauge steel container that provides secure storage for handguns and other valuables. Meets TSA airline firearm guidelines.

Gen ST Non-Rotating Trigger/Hammer Pins .154 Diameter. P32-33392 \$38.00

Designed by Belarusian custom knifemaker Dmitry Sinkevich, the new **Kershaw Pub** looks like nothing you've ever seen. Closed, you'd never know there was a handy blade inside – although you would definitely see the equally

handy bottle opener. And if you were exceptionally sharp-eyed, you might notice the slotted screwdriver tip right next to the bottle opener. To reveal the blade, just push down on what looks like the key ring attachment. You'll see the blade move out of the compact handle. Keep pushing and the blade will swing all the way out, ready for use. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip. The handle has an anodized aluminum front scale in bright blue and a steel back.

Blade length: 1.6" Closed: 3.1" Open: 4.5"

74 "The Perfect Small Parts Cleaning Accessory"

P32-10209 \$15.95

The HYSKORE Degreezer consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. As anyone who has cleaned a gun is aware, cleaning small parts is a major challenge. Given the available technology and fixtures, the standard procedure is to use some kind of cup or similar vessel, pour in a quantity of cleaning solvent, and then pick up the parts one by one and brush them clean. The Degreezer changes all of that. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. As a bonus, the set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline. The Degreezer will quickly become an indispensable fixture on your workbench.

HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P32-10208 \$19.99

The Pachmayr Pac-Mag™ Holds up to 30 pounds and the three-magnet design gives the Pac-Mag more strength than any other gun magnet on the market. Secure almost any gun – pistol, rifle or shotgun – practically anywhere!

The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 (Includes riser, not pictured.) **P32-31318 \$119.95**

Scout Scope Mounts for AK, SKS Rifles

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **P32-25374 \$79.99**

Hi-Point's "Redball package" includes a Hi-Point 9mm or .45 ACP carbine with two Redball 20-round mags.

By Duane Thomas

In this article we're going to discuss the .45 ACP pistol caliber carbine from Hi-Point (hi-point-firearms.com). But first, let's discuss Hi-Points a bit in general.

Hi-Point is known mostly for their line of low-cost autopistols. There seems to be a certain sort of person who thinks that sneering at Hi-Points marks them as among the elite. Such folks generally have one thing in common: They've never actually fired a Hi-Point. Regarding Hi-Point's pistols, I will say that, in my experience, they tend to be totally reliable with hardball. If I were a person who could honestly only afford \$160 for a handgun for self-defense, I would be very, very glad these things exist.

Having said that, no one who knows what they're talking about is going to suggest you buy a Hi-Point PISTOL if you really can afford to spend \$400 on a used Glock instead. The Hi-Point CARBINES, however, are a completely different animal. There are people in the world – I mean serious, skilled, knowledgeable people who know out of which end of the gun the bullet comes – who take the Hi-Point carbines seriously.

You will occasionally read on the Internet some self-anointed gun guru explaining, "Hi-Point carbines are basically just the pistols with a longer barrel and a stock." False. They're a very different design. For one thing, instead of a zinc alloy slide, they have an upper receiver cover and bolt both made of steel. Available calibers are .380 ACP, 9mm Parabellum, .40 S&W, 10mm Auto, and .45 ACP. I chose my article sample in .45 ACP.

I've always enjoyed the physical appearance of the Hi-Point pistol caliber carbines. There have been changes over the years, but they've always been designed to look bad-ass, high-powered and intimidating. A current-production Hi-Point carbine looks like a World War II German FG42 machine gun that got left in the dryer too long. In that sense, they're kind of a sheep in wolf's cloth-

ing, since they're pistol-caliber carbines, not rifles. When firing the Hi-Point .45 ACP for this article, I actually got to interact with two people who had self-images as gun experts, who thought I was shooting a centerfire rifle. I know...I was amazed, too. The truth is, Hi-Point doesn't actually make a centerfire rifle; everything they make, whether handgun or carbine, takes pistol cartridges.

Hi-Point carbines come with a spring-loaded butt-pad, because, y'know, we have to protect ourselves from the thunderous recoil that comes from firing a pistol cartridge in a 7-pound carbine. Given my aesthetic sense, those springs and spacers look dorky as hell, and they actually make length-of-pull a bit much for me. Fortunately, removing the butt-pad, springs and spacers, then putting everything back together again minus the springs/spacers (a trick I learned from *Blue Press* editor, Mark Pixler, who's done this on his own Hi-Point .45 ACP carbine), gives a stock that not only looks a lot better, it shortens length-of-pull to the point that, for me, it's perfect.

The operating system on Hi-Point carbines uses a telescoping bolt, like the Uzi. This does not mean, as it sounds, the bolt collapses then re-extends during the firing cycle, it means that part of the bolt extends past the chamber when the gun's in battery. This allows a bolt heavy enough for a blowback gun, where the action is held closed during firing simply through the inertia of the bolt, and the force of the recoil spring, while also allowing a dramatically shorter firearm.

Barrel length on the Hi-Point .45 ACP pistol caliber carbine is 17.5 inches. Compared to an AR-15 with 16.5 inch barrel, with the collapsible stock on the AR adjusted to the same length-of-pull as the Hi-Point with the springs/spacers removed, the Hi-Point is 3-1/2 inches shorter. Were the barrels the same length, it would be 4-1/2 inches. That is a huge difference. Now, admittedly most of that comes from the fact that pistol cartridges are enough shorter than centerfire rifle

05TS .45 ACP Carbine

cartridges we can have a mag well in the pistol grip, instead of needing to add a mag well in front of, or behind, the trigger guard as with a true rifle; still some of it comes from the telescoping bolt.

The great shortcoming of Hi-Point carbines as defense guns has traditionally been their skimpy magazine capacity. The two most popular Hi-Point carbines have always been the 9mm and .45 ACP. In 9mm, it's a 10-round mag; in .45 it's nine. Fortunately, Redball Sports (redballsports.net) makes 20-round extension mags to fit the Hi-Point 9mm and .45 ACP carbines. (A magazine for the 10mm is currently in development.) This takes the Hi-Point pistol caliber carbines up to a whole different level of being serious weapons.

As you can see from the accompanying photo, the 9mm magazine has a dogleg to it, and kind of looks like a boomerang, due to the 9mm's tapered casing; the .45 ACP mag is straight. Thus, if you see someone shooting a Hi-Point carbine with a Redball mag, you don't even have to look at the caliber markings on the side of the gun to know for what cartridge it's chambered: If the magazine is straight, it's .45 ACP. The 9mm mag is a singlestack, the .45 mag is doublestack on its bottom half, then narrows down to singlestack for the top portion; amazing that it works, but it does.

Hi-Point and Redball, though they're not the same company, have a very cordial, mutually beneficial relationship, so much so Hi-Point actually offers what they call their "Redball package," i.e. you can buy the gun straight from them, in

either 9mm or .45, with two 20-round Redball mags included. Added cost: 20 bucks. Folks, you couldn't buy the gun and magazines separately for so little.

Also against the Hi-Point carbine, its rail system is not the greatest. One way we get that impressive affordability – base price for a Hi-

Point stripper-model carbine is less than \$300 – is that the rails are made of soft, bendable plastic. But we can fix that, too. Enter LongShot Manufacturing (longshotmanufacturing.com). This is a second-generation, family-owned-business specializing in precision machining. They make aftermarket parts for a variety of firearms, AR-15s, HK grenade launchers and whatnot, but they really are known for their line of high-quality upgrades for Hi-Point carbines. Currently they offer around 700 line items for sale, 300 of which are for Hi-Points.

Now, a lot of that comes from the fact that every part they sell has a different line number

depending on the caliber of the customer's gun. Thus if you call up and ask for an oversized magazine release button for a .380 carbine, it will have a different line number than the mag button for the 9mm, .40 S&W, 10mm and .45, even though it's the exact same part. This makes it easy for the person answering the phone; they don't have to know which parts differ between guns by caliber, and which don't. Still, there's no doubt that no other company makes as many aftermarket parts for Hi-Points as LongShot.

Redball Sports makes 20-round extension magazines for Hi-Point 9mm (left) and .45 ACP carbines.

The author's article-sample gun has been the recipient of some upgraded parts from LongShot, runs Redball 20-round extension mags, and wears a C-More Tactical Railway.

This is a small assortment of the aftermarket Hi-Point parts made by LongShot Manufacturing.
Photo by Jerry Arpaio of LongShot Mfg.

I found, when testing the Hi-Point .45 ACP carbine from the bench during my first range session, accuracy started out great, then noticeably degraded the more I shot the gun. This is a known phenomenon with Hi-Point carbines; the top rail actually begins flexing as it heats up. LongShot makes aluminum top rails of various lengths. I went for the 15.4" version that goes all the way from front-to-rear of the raised bridge along the top of the carbine – the standard rail only goes about halfway. Big improvement. If there were only one upgrade to the carbine I could make, it would be this one.

The stock bolt handle is not the most comfortable thing in the world to manipulate; it has some reasonably sharp edges, and its retaining screw is a hex-head that sticks out past the top edge of the handle. LongShot sells replacement bolt handles of various configurations. My favorite, and what's currently on the carbine, is what LongShot owner Jerry Arpaio calls "the Barrel" and I call "the Beehive." It's a round knob with a series of raised ridges around its circumference that give extra purchase without being uncomfortable, and it's exactly the right size, not too small, not too large, just right. The replacement bolt handle fits down into the Beehive, instead of sticking out past it, and, unlike the hex-head screw, lacks sharp edges.

I also replaced the rail on the bottom of the forend; the factory rail was short enough that, when gripping the carbine, I'd wind up with half my hand on the rail, half off behind it. The LongShot rail I chose is enough longer I can get my entire hand on it.

The rail between the front of the forend and the front sight, under the barrel, on the stock carbine is so soft it actually bends downward in a semi-cir-

cle. LongShot sells a ventilated barrel shroud that, at first, I thought existed just to look cool. I was like, "Seriously? Are we trying to make this thing look even more like a machinegun?" The shroud actually serves as an attachment point for rails, like the LongShot rail I affixed to its bottom, replacing the soft, bendable stock unit with sturdy, straight, well-machined aluminum, held in place with M-LOK. And okay, let's admit it, the shroud does look very cool.

The rear sight on the stock carbine is a somewhat elongated affair. Sadly, given the size and shape of my head, I'm not able to get my head far enough down on the stock to align my right eye with the sights. I replaced the rear sight with a C-More Tactical Railway (c-more.com), which integrates a red dot sight with an AR-15A2 fully adjustable rear sight.

The front sight on this carbine is so short it has insufficient adjustment range to zero the gun. Also, the front sight is held in place only with two setscrews, and is known to rotate out of alignment with any sort of lateral blow. I replaced it with a LongShot front sight that has a far greater range of adjustment, not only is it made from machined aluminum, it's held in place with a clamp and three screws, a much sturdier, more impact-resistant system.

The safety lever on a Hi-Point carbine is a piece of bent sheet metal, located on the left side of the gun, on the receiver above the pistol grip, and operates much like a 1911, up is Safe, down is Fire. It rotates in a curved slot cut into the receiver, and is set-up for a right-handed shooter. Sorry, lefties. Unfortunately it's quite small and flat to the side of the gun. I actually find it usable during fast

work, as long as I start out with my thumb on top of the lever, poised to sweep it down, though it's certainly far from ideal. One day, someone will make an extended, wider thumb safety for Hi-Point carbines, patterned on a 1911 speed safety, and when they do, I'll have one.

Trigger pulls on Hi-Points are kind of strange. They're heavy and the trigger stroke is long, but very smooth. It feels like firing a gun with a light double-action system. Reset is long and undetectable; there is no tactile or audible click. Like the safety lever, I would class these trigger pulls as "usable though less-than-ideal."

The bolt does lock back when the gun is empty, and you can manually lock the action open by pulling the bolt handle to the rear and pushing the smaller-than-the-rest-of-the-bolt-handle circular portion, the part that's next to the receiver, into a correspondingly-shaped cutout at the rear of the bolt handle track.

Accuracy testing consisted of firing 5-shot groups from the bench at 50 feet, the longest distance possible on the indoor range where I

used to do most of my shooting. During my first range session, I had not yet installed the LongShot parts, I was running the stock front sight, so the gun was hitting way high, I'm talking seven inches high at 50 feet, even with the front sight adjusted all the way up, and the C-More rear sight all the way down. I actually wound up pinging the target carrier several times, with different loads. In short order I switched over to firing all groups using the dot. I've recently upgraded to a true 25-yard range, however to be in accordance with my first test session, during my second range session with this gun, I also did all bench work at 50 feet.

During my second range session with the Hi-Point .45 ACP pistol caliber carbine, I had the LongShot parts installed, including the top rail, and it was nice to see accuracy stay the same no matter how much I shot the gun. Best accuracy came from the Federal 230-grain HST with a tiny 0.6" group. My handloads, built with 185-grain Hollow Base Round Nose bullets from Berry's (berrysmfg.com) and Vihta Vuori N320 powder from Brownells (brownells.com) gave me a 0.9" group, but low, before I got the C-More dialed-in, and another group, barely larger at 1.0" and much better regulated after some twistin' and turnin' of

the C-More's adjustment screws. I am not ashamed to stand right up and say, "Yes, those are my handloads, I Square Dealed them into existence." By no means contemptible was the 1.1" group with 1971-era Federal Match hardball.

I had installed the LongShot front sight, and set its height b'guess and b'gosh. My very first group during the second range session disclosed that with irons (or rather, aluminum front/steel rear), it hit perfect for windage, and one inch high for elevation. I decided not to mess with it.

I reported to the range with eight different lowpoint loads, and the Hi-Point would not feed any of them reliably. On the other hand, I never had a single malfunction with hardball, whether it was Black Hills blue box, Federal Match, or my own handloads, whether I was slow firing from the bench or emptying a 20-round magazine at warp speed. Until proven otherwise, I will consider this a hardball gun. I mourn the fact the Hi-Point is not reliable with Federal HST, because as we have seen, the gun loves it from an accuracy standpoint.

By the way, while I was writing this article, my friend, gunsmith Rod Soderquist, happened to take his own Hi-Point .45 ACP carbine out hog hunting. He told me, "I had a Super Vel in the chamber and the magazine was full of hardball. The pig was about 40

yards away, it wasn't a huge animal, maybe 50 pounds, and it was running left to right. I tracked it with the gun, fired the shot and hit it right behind the shoulder. It stopped running, turned in a circle, fell down and died right there." So, in case you've ever wondered if a Hi-Point .45 ACP carbine firing Super Vel 185-grain JHP +P can drop a feral pig...why, yes, it can, actually.

SUMMARY

So, what does it feel like to fire this gun? It's a long gun firing a pistol cartridge, and it's heavy by pistol-caliber-carbine standards. When I pull the trigger on this thing, the dot in the C-More barely moves. Hi-Point pistol caliber carbines are very affordable, hardball-reliable, more accurate than we have any right to expect from guns costing so little, ridiculously pleasant to shoot, and, when running Redball magazines, one of these things can dump 20 rounds of .45 ball as fast as you can pull the trigger. That's why serious shooters take them seriously.

The Hi-Point .45 ACP carbine proved quite accurate with a variety of loads, including ammo that Thomas "Square Dealed" into existence.

84 Wise Company's "Grab & Go" Emergency Food Kits

Wise Company's **18 Wise Favorites 72-Hour Kit** includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.

Wise Company's **60 Serving Gourmet Entrée Only "Grab and Go" Food Kit** includes two servings per day (entrées only) for one adult for one month or four adults for one week. **Product within this Bucket is:** Savory Stroganoff (8 servings), Chili Macaroni (8 servings), Pasta Alfredo (8 servings), Creamy Pasta and Vegetable Rotini (8 servings), Cheesy Lasagna (4 servings), Teriyaki and Rice (8 servings), Creamy Ala King and Rice (8 servings), and Creamy Tomato Basil Soup (8 servings).

Wise Company's **60 Serving Gourmet Freeze Dried Meat "Grab & Go" Food Kit** includes 60 servings of assorted gourmet-seasoned freeze dried meat and a 20-serving bonus of long-term emergency rice, for a total of 80 servings. **Product within this Bucket is:** Roasted Chicken (12 servings), Teriyaki Style Chicken (8 servings), Cheesy Beef (8 servings), Southwest Style Chicken (12 servings), Savory Roasted Ground Beef (12 servings), Stroganoff Style Beef (8 servings), and Long-Term Instant Rice (20 servings).

Wise Company's **120 Serving Breakfast Only "Grab & Go" Food Kit** includes 120 servings of breakfast assortment (no entrées). **Product within this Bucket is:** Apple Cinnamon Cereal (40 Servings), Crunchy Granola (40 Servings), and Brown Sugar and Maple Multi-Grain (40 Servings).

Wise Company's **120 Serving Freeze Dried Vegetable and Sauce "Grab & Go" Food Kit** includes 120 servings of vegetable and sauce assortment. **Product within this Bucket is:** Corn (24 servings), Peas (16 servings), Broccoli (24 servings), Green Beans (24 servings), Butter Sauce (8 servings), Cream Sauce (8 servings), Cheese Sauce (8 servings), and Mushroom Sauce (8 Servings).

Wise Company's **120 Serving Freeze Dried Fruit and Snack "Grab & Go" Food Kit** includes 120 servings of fruit and snack assortment. **Product within this Bucket is:** Bananas (16 servings), Strawberries (16 servings), Peaches (16 servings), Apples (16 servings), Caramel Sauce (16 servings), Yogurt (16 servings), and Pudding (16 Servings).

Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.
