New-Reloader **XL 750** Package

You've made the decision that loading your own ammunition is right for you.

You're ready to pull the trigger, but uncertain of exactly what you need.

Dillon has taken the work out of this. We have assembled a New-Reloader Package, featuring our new XL 750 reloading machine, with the most popular machine options, along with the accessories you'll need to begin reloading immediately.

This package is available in 9mm, .223/5.56mm, or BOTH.

9mm 750 Package:

XL 750 in 9mm
9mm Die Set
Bench Wrench
Small Pistol Casefeeder
XL 650/750 Strong Mount
Bullet Tray Kit
Roller Handle
9mm Case Gage
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers

The Complete Reloading Manual for the 9mm Luger

Total: \$1431.35

.223/5.56mm 750 Package:

XL 750 in .223/5.56mm
.223/5.56 Die Set
Bench Wrench
Small Rifle Casefeeder
XL 650/750 Strong Mount
Bullet Tray Kit
Roller Handle
.223/5.56 Case Gage
Dillon Case Lube
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers

The Complete Reloading Manual for the .223 Rem.

Total: \$1463.30

Combo Package (.223 Conversion Pictured at Right) Includes the 9mm Package Above, Plus:

.223/5.56 Conversion Kit
.223/5.56 Die Set
XL 750 Quick Change
.223 Case Gage
Dillon Case Lube
Small Rifle Casefeed Plate

The Complete Reloading Manual for the .223 Rem.

Total w/9mm Pkg.: \$1804.50

As a token of our appreciation for new reloaders who purchase one of these packages – while supplies last – we're going to include one of these **Tactical Tailor Operator Caps** and our Dillon Precision morale patch. The Tactical Tailor cap is an incredible value: a high-quality product that's made in...wait for it...the USA, by a company that prides itself on hiring veterans. The hat in the photo is MY hat, [Note: same hat, new patch.] and I've lost track of how many times it's been washed – IN the washing machine! It STILL looks great! If you're the kind of person who not only wears hats, but also WEARS THEM OUT, you're going to love this hat.

ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

We READ Our Mail!

Re: "How to Choose a Gun Range." [September 2019]
Basically, I enjoyed the article; however, there is one issue that was noticeably absent, namely the use of "handloads" at your range. I don't know of an indoor range that allows the use of "handloads." I suspect the "reason" involves the insurance industry. How do we educate those who create the no-handloads rules? Great new format for **The Blue Press**.

Jim Wineman – jmw.homeinthesun@comcast.net
Jim, I shoot at a couple of indoor ranges where the only thing they ask me is whether or not my ammo is magnetic. Your range might want to decrease liability and increase profits by selling ammo they're sure won't damage their backstop.

I've been on your mailing list for quite a few years. I always enjoy the catalogs and have been dreaming about a progressive press. This last December – while I was at the range – someone delivered a brand-new-in-the-box Dillon XL 650! None of my friends or family will admit to doing it. I have no idea who it came from. But nonetheless, I am a Dillon owner and you sold a machine to someone. I'm loving this thing! I just recently added a casefeeder to it. Thanks for being patient with me and making a quality product!

Andy Boone – kj6iym@att.net
Thanks for making your **Blue Press** publication much larger. It looks fantastic. It is easier to read for old guys like me who still like our gun hobbies and toys.

Stefan Maurer – unfanger@msn.com
Just wanted to say that these old eyes love the new larger **Blue Press** magazine. Thank you. (Your presses are pretty good also, got three of them.)

Albert Murphy – alm.murphy@yahoo.com
Thanks for the most recent **Blue Press** that is magazine size. Keep up the articles and special write ups of different firearms. The article about choosing a gun range facility is spot on for me trying to pick a place that is convenient and safe. Many thanks for your hard work and keeping us informed and supplied with the right equipment.

Allen Moore 23739 – acmrn@yahoo.com
Been using Dillon RL 450/550 now for about 40 years. Love the new full-size format of **The Blue Press**. Lifetime Dillon user.

F. Wong – nraihmsa@aol.com
Just got your September 2019 magazine. The new large format is great and the ratio of ads to feature stories was perfect. Look forward to the next issue. Thanks.

Blue Press 9

Why the .45 ACP FAILED

The .45 ACP's primary home is the 1911 autopistol. While a custom 1911 .45 gives pride of ownership, there are less expensive, smaller, lighter, higher-capacity, and probably more reliable options available in today's world.

By Duane Thomas

The sad truth is the .45 ACP cartridge isn't nearly as popular as it was, even as recently as 10 years ago. The short answer to the question of "Why did the .45 ACP fail?" is easy: The 9mm Parabellum killed it. Or at least critically wounded it. These days, only the most hide-bound reactionaries still buy into that tired old ".45 hardball will stop a man 19 times out of 20 if you hit him in the chest" myth. Results from the street have shown there's no real difference in overall stopping performance between the popular service autopistol cartridges. Once we accept that 9mm and .45 work the same, it's awfully hard to justify choosing a more heavily recoiling gun carrying less ammo, when we could be choosing a more lightly recoiling gun with more ammo.

Also, let's not kid ourselves, there's the influence of the FBI. We gun nuts can sit and argue and nitpick the FBI's ammunition test protocols, but we cannot deny the power "It was approved by the FBI" has in law enforcement circles. When the FBI re-adopted the 9mm, after exhaustive and well-publicized ammunition tests, that was a huge boost to the 9mm's popularity in American law enforcement, and effectively ended its unsatisfactory affair with the .40 S&W. The military has been relying on 9mm as primary service standard for well over 30 years. The normal citizenry tends to follow

the lead of the police and military in cartridge choice. Unless, of course, their choice sucks. See: .40 S&W; which, while temporarily popular among law enforcement agencies, never made much inroad among the normal citizenry.

The overall length of the .45 ACP cartridge is such it requires a large-frame gun. Even .45 ACP "compacts" are just cut-down large-frame autos. While .45 compacts are smaller than true service-sized guns, the same gun chambered for 9mm, all else being equal, will be smaller and lighter. And probably hold more ammo. Attempts to design high-capacity .45 ACP autos, built around doublestack magazines, proved that stuffing even three-quarters as much .45 ammo into a magazine as can easily fit into a doublestack 9mm mag results in a magazine – and therefore a grip – too large for the average human hand.

Over the decades, our perception of what constitutes a service-sized handgun, and what constitutes a concealment gun, has changed. In decades past, the Colt Commander (*aka* the Lightweight Commander) was regarded as a primo concealed carry gun, "the choice of the true handgun martial artist." These days the GLOCK 17 is considered a full-sized police duty holster gun, and it's the same overall size as a Commander but holds twice as much ammo – and is actually lighter both

unloaded and fully-loaded. Similarly, a GLOCK 19 is the same overall size as a Colt Officer's ACP – but holds 16 rounds instead of seven. To many people, the larger size and greater weight of a .45, coupled with its heavier recoil and lesser capacity, no longer makes sense.

Mistakes have been made in ammunition design, contributing to the .45 ACP's waning popularity as a defense round. There's now a serious emphasis on designing bullets that expand reliably in ballistic gelatin. While that's great *per se*, it's led to most .45 hollowpoint loads today having a truncated cone bullet shape, because, compared to a more generously rounded, hardball-like ogive, with the same-size hollow cavity, with a TC profile the bullet walls are thinner. Unfortunately, the 1911 is notorious for not reliably feeding TC bullets. And the 1911 is the primary home of the .45 ACP. So ammunition companies decided to turn out .45 ACP combat loads that will predictably not reliably feed in the primary weapon type for which the cartridge is chambered.

As .45 ACP hollowpoints have become less feed reliable, their velocities have also increased, leading to recoil too heavy for most people to easily control. A few years ago I did a review of common .45 ACP self-defense-oriented hollowpoints. Okay, we all know the classic velocity spec for a 230-grain bullet in .45 ACP is 830 feet per second. Every 230-grain hollowpoint I tested had velocities in the high-800s to low-900s. That might not sound like a big difference, but it is. A 230-grain bullet at 900 fps generates a 207 power factor. To give you some idea of the recoil level we're talking about here, USPSA/IPSC considers Major power factor to be 165. That extra velocity does make those hollowpoints expand, though. But if we accept that stopping power is bullets hitting flesh, it doesn't matter how reliably the bullet expands if the guns chambering it have such heavy recoil most people can't fire them fast and accurately under stress.

As far as I'm concerned, when you drive a 230-grain bullet that hard, you lose the great advantage of the .45 ACP, that you can put out a big, heavy bullet at moderate velocity, and still have a gun that's readily controllable. Now, I'm not criticizing .45 ACP +P ammunition in this regard. This is specialty ammo, in my opinion more appropriate for hunting. We EXPECT that stuff to have heavy recoil.

So, at a time when the 9mm was coming on strong, the .45 ACP was being taken out of contention, with ammunition that would not feed reliably in 1911s, and recoil too heavy for most shooters.

As the .45 ACP's fortunes as a self-defense round have fallen, the same has occurred to its use in competition. Cameron Hopkins, former editor of *American Handgunner* magazine and current owner of Super Vel, is an unreconstructed .45 ACP 1911 fan. He comment-

ed to me, "I was shooting the Iron Sights Nationals in St. George, Utah in 2017; this was the largest IPSC match I've ever shot, it was a three-day match with well over 600 people signed-up for it. The morning of the second day, the RO was scoring my targets on a stage, he said to me, 'Wow, those are some really big bullet holes, what are you shooting?' I said, 'Just a 200-grain semi-wadcutter .45 ACP.' I was thinking, 'What's the big deal, we've all seen that before.' I asked him, 'How many people have you seen shooting a .45 out here at the match?' His answer: 'Including you? Two.'"

By the second day of a three-day match with over 600 shooters, we would expect at that point at least 200 people had shot that stage. Only two .45s? Are you kidding me?

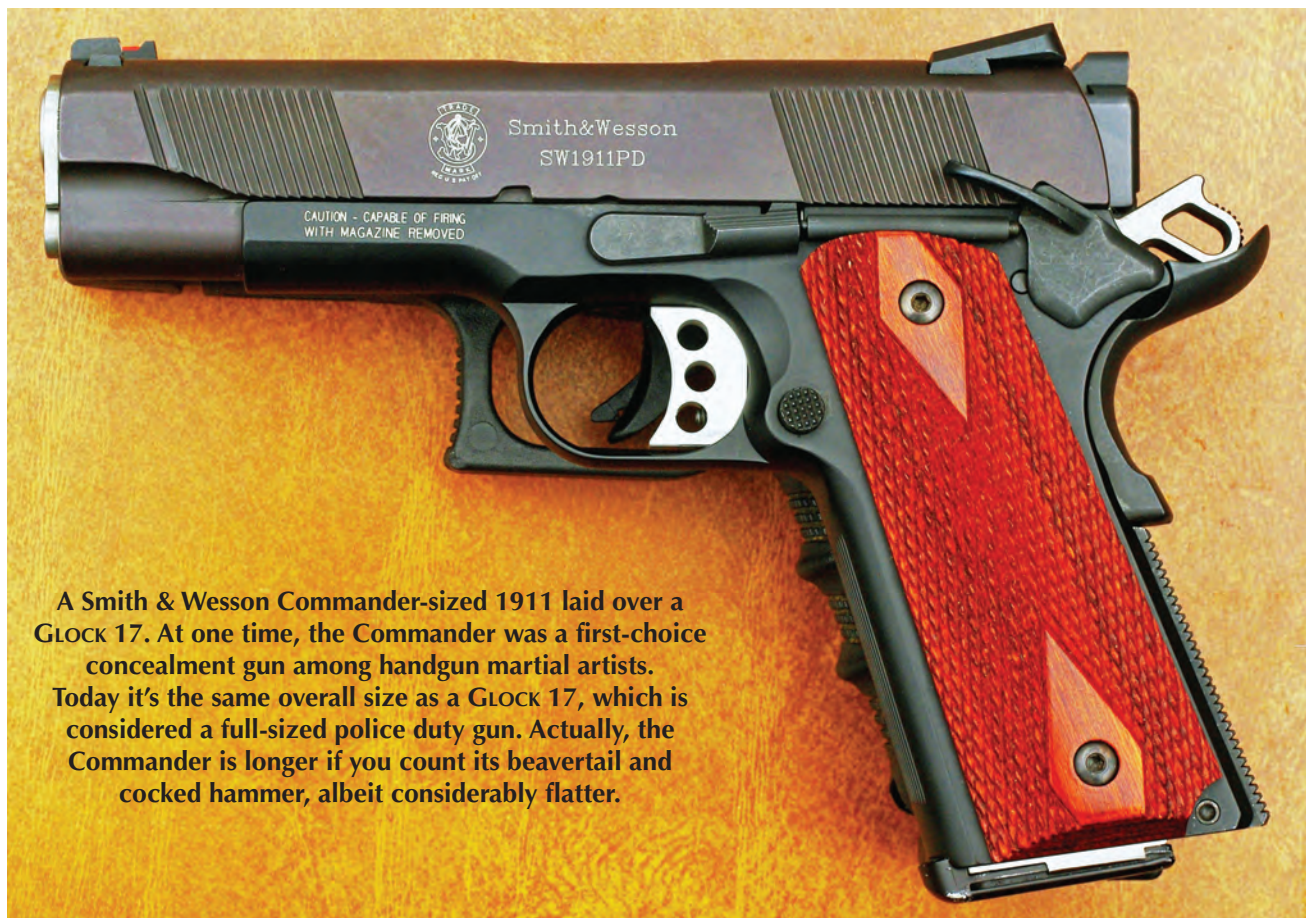

Hopkins also said, "Just the weekend before last, I was shooting the Magnus Cup, which drew 400-plus shooters from all over the world. They require chronographing of every competitor's ammo; they take eight rounds from each shooter, one of which is pulled to verify the bullet weight. The Range Officer seemed to be taking an inordinate amount of time fussing with my ammo and the bullet puller. Another RO came over to help him. They both messed with it and finally gave up. 'We can't fit this in the bullet puller so we'll have to trust you. What does your bullet weigh?' Their bullet puller couldn't accept the fat .45 ACP case! I looked him right in the eye and said, 'Why, that's a .45 caliber semi-wadcutter. Seven hundred and fifty grains.'"

When the people running the chrono at a major match can't even figure out how to get a round of .45 ACP into their bullet puller, you know the cartridge is, to put it kindly, no longer popular in combat pistol matches.

A few years ago, I was out at the Firearms Academy of Seattle, and on their main range there was a 55-gallon drum they were using as a brass bucket. I said to Marty Hayes, head man at FAS, "Hey, you mind if I go dumpster diving for some 9mm brass?" Marty replied, "You can have the entire thing if you want. All I ask is you give me the .45 ACP and .357 Magnum." Fortunately the drum was only about half full, but that's still a lot of weight. Picture the two of us lifting that heavy thing into the back of my car. It took me a LONG time to go through all those cases, but I did.

This gave me a really interesting look into exactly which cartridges were being fired on the main range at a well-known shooting school. In first place – and I mean nothing else was even close – was 9mm Parabellum. I scavenged an immense amount of 9mm brass out of that drum. I actually felt guilty I was only able to give Marty one small, partial box of .45 ACP cases. And since Marty is a .45 ACP 1911 guy, I'm pretty sure he'd fired those.

These days, when I go to the range and shoot .45 ACP, which I do on a fairly regular basis, I'm focused

A Smith & Wesson Commander-sized 1911 laid over a GLOCK 17. At one time, the Commander was a first-choice concealment gun among handgun martial artists. Today it's the same overall size as a GLOCK 17, which is considered a full-sized police duty gun. Actually, the Commander is longer if you count its beavertail and cocked hammer, albeit considerably flatter.

on retrieving every single empty case. Which is easy to do, actually, because I'm the only guy on the range shooting a .45. More 9mm brass I can always pick up, that stuff is everywhere. More .45 ACP brass, not so much. Now I know how those .38 Super shooters feel.

While the fortunes of the .45 ACP have waned, you would expect the same to be true of the 1911 autopistol to which it's so inextricably linked. And it is true. The 1911 is also not nearly as popular as it used to be. As recently as 10 years ago, it seemed like a new company was entering the 1911 market every week. Okay, a bit of an exaggeration. But I can't think of a single company over the last five years that's begun building 1911s. Among those already building them, design evolution is pretty dead. What design efforts are still being put into the 1911 tend to be focused on making it work as a 9mm.

Washington State, where I reside, has a long tradition of "combat" pistol match competition. (I have been told the Renton Fish & Game Club is one of the oldest IPSC clubs in America.) Thus there was a time the 1911 .45 auto was a very popular carry gun in Washington. Years ago, famous firearms instructor John Farnam, while teaching a class here, commented, "I haven't seen so many cocked and locked 1911 .45s in one place since the last time I went to Gunsite." These

days, among my circle of personal acquaintances, I can count the number of people carrying 1911s on one hand and have fingers left over.

SUMMARY

I've been of a mind to do this article for a while. In the March 2016 *Blue Press*, I had an article published titled "Why the .45 GAP Failed," an examination of mistakes made with the .45 GLOCK Action Pistol cartridge, and the guns chambered for it, that led it to flop on the marketplace. Shortly thereafter I got an email from a guy saying, "Well, a friend of mine is an ex-Navy SEAL and he carries a GLOCK 30 and he told me it's an awesome cartridge." My reply was, "The GLOCK 30 is chambered for .45 ACP. My article was on the .45 GAP. Completely different cartridge." However, this led me to joke, "I should do an article titled 'Why the .45 ACP Failed.' Now THAT would get people's attention." Thing is, no one to whom I said that – and I'm talking people high up in the power structure at gun companies, aftermarket parts companies, shooting sports and gun magazines – thought the article was a bad idea. And no one thought it was untrue.

The .45 ACP cartridge will be with us for a long time to come. It's one of history's great handgun cartridges, and still one of my personal favorites. However, its days of greatest popularity are behind it. A sad truth indeed. But a sad truth is a truth nonetheless. 

ERADICATES COPPER FOULING AT MAGNUM VELOCITIES.

INTRODUCING NEW IMR ENDURON 8133.

It's the slow-burning, copper-crushing magnum powder shooters have been waiting for. Engineered for Extreme Temperature Stability, Ideal Load Density and elevated confidence and success that comes from reloading with legendary IMR powders.

RL 550C[^]

STANDARD FEATURES:

- Made in the USA
- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for ONLY...
\$489^{95*}

P60-14261

Reloading dies sold separately.
*Prices vary on exotic-caliber machines.

Case Preparation Equipment

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works

Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **P60-13804 \$8.95**
Case (20 pc.) **P60-20255 135.95**

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle **P60-13733 \$11.95**

CM-500 Case/Media Separator[^] **P60-21045 \$47.95**

great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Don't Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass.

15-pound bag **P60-13287 \$23.95**

Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new!

10-pound bag **P60-13496 \$15.95**

Rapid Trim 1500 Case Trimmer[^]

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P60-62164** is **\$337.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P60-13141**, are **\$20.95** each. Upper lock rings, **P60-13559**, are **\$5.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Get 2

3 Gun), and run the stage in my head a few times, visualizing my sights on the target.

4. What's the one thing you wish you could change about the gun industry?

Gabby: I would love to see more companies sponsoring high school and college shooting events. They are the future and they need our support.

Becky: Perceptions about why people own guns and who uses them. That comes down to the need for better marketing on the part of the firearms industry. We see a lot of companies opting to showcase tattoos instead of people who truly work with firearms. Humanizing people who work with guns is a step in the right direction. It's a step toward sharing the truth about who the people are that use and build firearms and why.

5. Most useless thing you own?

Gabby: A cow bell.

Becky: I have a church pew that is mitered to fit in a corner. I hauled it home from a local "town cleanup" where people put anything and everything on the curb and you are free to take it before the trash guys haul it all away. My husband and boys threatened to burn it last year...I still have it. It's going to go on the porch of a cabin.

6. Favorite food?

Gabby: Wagyu steak.

Becky: Pizza! Wood-fired, vegetable, chicken, white sauce, deep dish, thin crust...all of the pizza. After pizza, I'll eat literally everything but pepperoni and tuna and things with mayonnaise.

7. Favorite place on Earth?

Gabby: Anywhere I am with my family. Aside from that I love and miss the beautiful Venezuelan beaches.

Becky: I love skiing, the beach and water...but I'd have to say mountains. Growing up in the midwest, I'm always in awe of the mountains and grandeur of this planet! I want to see it all.

8. Most annoying thing about you?

Gabby: I move things around the house, and then I forget where I put them. My husband says I hide

Gabby Franco @GabbyFrancots4

- Olympic Shooting Competitor
- "Top Shot" and "Top Shot All Stars" Contestant
- NRA Television Host and Commentator
- Sponsored by NSSF and Walther Arms
- Liberty Safe Brand Ambassador

1. First gun you ever fired?

Gabby: Walther GSP .22 long rifle.

Becky: My dad's hunting rifle...I think. I was maybe 4. It was loud, and made me respect guns!

2. What's your favorite gun?

Gabby: That is a hard question. I loved 2011 pistols, but my new favorite is the Walther Q5 Steel Frame I use in Carry Optics.

Becky: My 2011 built by Craig Nelson. It has an amazing trigger; the gun is just built well and a joy to shoot.

3. Do you have any rituals before you shoot?

Gabby: I do. I breathe deeply three times and open my eyes slightly wider than normal. And lastly, I say to myself, "I am READY!"

Becky: Not really. I try to stop when I'm in the hole, check my gun and mags, go over optics (if it's

Gabby Franco

Know

them so well, not even I can find them. LOL!

Becky: I don't do anything halfway and I do that without much sleep.

9. Craziest thing you've ever done?

Gabby: I was 22 years old when I moved to the US by myself. I left behind my family, college, and the opportunity to go to the Olympic Games in Athens 2004.

Becky: Hiked 24 miles in the Grand Canyon on 4th of July, while pregnant with my middle son, to see Havasu Falls. I puked, there were scorpions, we saw pretty things.... Next time, I want the helicopter or the donkey ride in.

10. Dream job?

Gabby: Traveling around the world as a motivational public speaker.

Becky: Cleaning workbenches in shops of gunsmiths I want to learn from. My dad gunsmithed for Krieger Barrels for 30-plus years, and I think you can learn a lot from watching people, seeing what tools they use, and soaking up whatever information they have.

11. Who has inspired you the most?

Gabby: My parents.

Becky: Artists and rebels. I have a soft spot for people brave enough to speak up when others found it easier to keep quiet. I'm not a "keep quiet to save my skin" kind of person. Patrick Henry is high on my list...I loved reciting his speech as a kid in school. And I had an Iranian painting teacher in art school who fled her country and religious persecution.

12. Who would play you in a movie?

Gabby: Halle Berry.

Becky: A character that people think is a ditz blonde. Meanwhile, she's learning all the things they're walking right past. She also would be able to read minds. I've been accused of reading minds, and told that my intuition for people is really good.

13. If you could have a conversation with anyone from the past, who would it be?

Gabby: Jesus Christ.

Becky: Ansel Adams. I'd like to know how he saw

Becky Yackley @BeckyYackley

- 2018 Ladies Metallic Sight World Champion – NRA Action Pistol
- 3-time Ladies Metallic Division Bianchi Cup National Champion
- 5 Bianchi Pistol National Records

light and what he saw that made him pay attention to it so.

14. Who's in your regular crew?

Gabby: My husband and my son.

Becky: My family: husband, Mark, sons: Tim (21), Sean (19) and Andrew (15). One of the things I love about competition shooting is that your "crew" can change from match to match. We have spent time with people from all over the country and world, and my international friends are some of the most amazing benefits to practical shooting.

15. Words to live by?

Gabby: There is no turning back, live life to the fullest!

Becky: "There will be sleeping enough in the grave." (See #8 above)

Becky Yackley

ODIN Ready Bag

ODIN Works introduces the new ODIN Ready Bag[®] (ORB)

featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease.

Whether you're going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

- Quick-release compression straps
- Four D-ring attachment points
- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: *Can remain in bag as a pocket or extend up through the zipper to fit longer barrels*
- Available in black or coyote brown
- Dimensions: 28" x 7" x 6"

HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack

is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips.

The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P43-10208 \$19.99

Rust IS coming after your guns

These 532 gram DESI®PAK desiccants absorb moisture better than silica gel. It's an industrial grade material that exceeds the requirements of Mil Spec MIL-D-3464E. Now available in smaller packages for other applications (ammo cans, long-term storage containers, etc.).

My Turn to Volunteer: ASI Match Director

By **Connie Bowlby**

When you show up at a match, do you notice all the volunteers running around like worker-bees building targets and setting up the stages? I knew it was happening but when I started shooting ASI (Action Shooting International) I was so focused on just getting through the match, I didn't notice much else. As I got more comfortable with my shooting, I started to notice more of what goes on behind the scenes. With more of my brain free to wonder about how a range and a match works, I have started helping with small tasks like registration in the Stat Shack at Renton Fish and Game for the ASI matches. I am also an ASI RO (Range Officer) and help with running some of the shooters through the stages in my squad. So, in November of last year, I was asked if I wanted to volunteer to be the Match Director at the March 2019 ASI match held at Renton Fish and Game. I was a little nervous, I'll admit, but I agreed to do it.

Of course, as March got closer I lost track of the fact that I had volunteered. I was down with the flu for a chunk of February. The Monday before the match I received the standard email sent out to volunteers asking us to start checking in for the upcoming match. I panicked. How was I gonna pull this off? After I panicked, I took a deep breath and realized that I wouldn't have to do this alone. Everyone I have ever met while shooting has been there because they love this sport and want to help. The ASI match at Renton Fish and Game usually has a great turn out and is one of my favorite matches to shoot. We registered 66 shooters that day and several of them were already making targets and setting up the bays when Andrew and I arrived. All I had to do was make sure that each bay and stage matched what I had selected.

The Match Director is there to make sure everything at a match gets done. This is best achieved by recruiting

volunteers for each task. Responsibilities include planning the match, choosing the stages, and assigning the volunteers to set-up before and teardown stages after the match. Registration, stats, and cash reconciliation is best assigned to someone with the computer skills to use the tablets and post the final match scores. This person would also handle the cash distribution, making sure the Range and ASI are both paid accordingly. The MD is still ultimately responsible for that distribution. The MD has the final say in any scoring disputes between a shooter and an RO. If there is a safety-related issue such as a round leaving the range or an accidental discharge of a firearm, the MD is notified by the RO and a decision is made about disqualification of the shooter involved. The details would then be recorded and included in the final match report to the range's Board of Directors.

Mike Meisner is an ASI RO and RO instructor. He is very active in volunteering his time and attends many of the matches. He graciously agreed to handle the NSO (new shooter orientation). ASI was designed for firearm owners with no competitive shooting experience. Safety and gun-handling skills are emphasized. That day we had several new shooters. In his NSO, Mike always explains the range rules and location of the safe areas. He gives a brief explanation about what to expect during the match including scoring and range commands. This allows each shooter to understand what is expected of them. He reinforces the Four Universal Gun Safety Rules and encourages the first-time ASI shooters to focus on the Range Officer's commands. Better to be slow and safe than too fast for their ability. Speed comes with solid fundamentals.

I was most uncomfortable with the public speaking portion of being a Match Director. I welcomed everyone to the match and briefly explained what to expect. Normally, we shoot about five stages at Ren-

ton Fish and Game, but after all the snow we were dealt in February, Bays 1-3 were still covered with a couple inches of ice and were unusable. I was forced to set up stages in Bays 4-7 and could only plan for a total of four stages. Of course, as I stood on the podium in front of everyone, I was nervous but it went just fine. There were a few announcements made about upcoming matches. I wished everyone a great match and then it was over. Whew! I think everyone had a good time and several people thanked me for my contribution. Feels good to give back.

A couple months later, Andrew was asked last minute to be the Match Director at (ISA) Interlake Sporting Association for the June ASI match. There is a small but very active group of volunteers who handle the ASI matches at ISA. However, for this match several of them were shooting other matches or otherwise unavailable. The Friday evening before the match Andrew and I went out to the range to see what needed to be done. Stanley Lewis is one of those members and he had already selected the stages for the match, and was starting to set up. I helped by stapling 40 cardboard targets and my hand. Ouch! I taped and painted the hard cover, made the non-threat targets and the headshot targets. Andrew and Stanley set up the target stands and the barrels, barricades and walls for each of the six stages, and carted them all to each bay. The next morning Andrew and a couple volunteers put all the

targets in place and made sure the stages were set up correctly before the match. Sometimes you have a plethora of volunteers and sometimes you have just a few. This made me grateful and a little humbled to understand first-hand what the volunteers are responsible for and how lucky we are to have each and every one of them.

We had 36 people register at ISA that day including one new shooter. Everyone had a great time and we had no safety-related issues. Another successful ASI match. At the Renton match I was asked a couple times that day if I knew what makes a successful Match Director. It was quickly pointed out to me that I was helping too much and not doing enough delegating and telling others what to do. That is the secret. A couple months later, I met the match director in Missoula, Montana when we traveled there for the GSSF (GLOCK Sport Shooting Foundation) match in June. He was a very nice man who explained to me the three "D"s of match directing: Decide, Delegate and then Disappear.

I hope you will look a little more closely at the next match you attend. We are so lucky to have a solid community around the shooting we do here in the Pacific Northwest. Maybe even try your hand at being the Match Director. It's important to help cultivate the next generation of shooters and continue this incredible sport for many years to come. Hope to see you out there.

Dillon Die Sets

Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Crimp Die (Pistol)

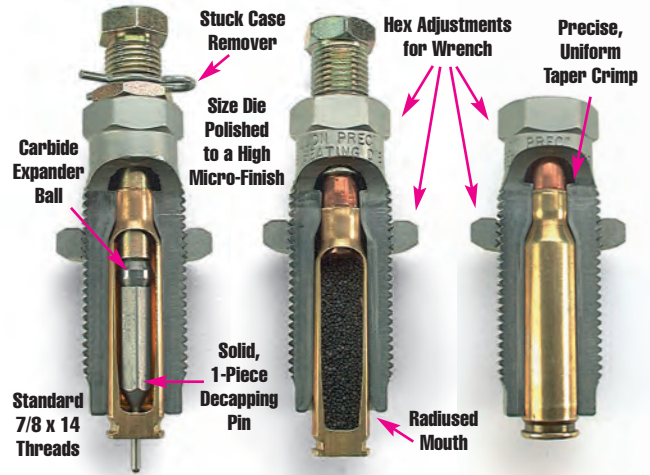

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

---------------	-----------	--------

Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

P60-21894 \$46.95

The **HELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **HELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **HELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

Ammo-Burr Cartridge Deburring Sets

SHAVIV is – and has been – the leader in precision hand-deburring solutions since 1960, and now brings its experience to the ammo-reloading market. The Ammo-Burr Inner/Outer Cartridge Deburring Sets feature ergonomic comfort-grip handles for fast and accurate hand deburring. The .47" diameter inner chamfering and deburring blade allows for chamfering and deburring cases from .17 to .45 caliber, and the outer-diameter chamfering blade will accommodate case mouth openings as large as 1.02".

Mr. Bulletfeeder[®]

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

BL 550[^]

Dillon's Basic Loader

\$289⁹⁵

P60-15399

Reloading Dies and Caliber Conversions sold separately
(See the back of the order blank in the center)

Pictured with optional accessories:
Strong Mount **P60-22051** \$52.45

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of

versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. The additional toolheads are \$26.95 each, or \$24.95 each if you

buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them. A powder measure adapter is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

AUTO PRIME SYSTEM[^] **P60-16627** **\$90.95**

PRIMER SYSTEM EARLY WARNING[^]

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. **P60-20302** **\$27.95**

AUTO POWDER SYSTEM[^]

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. **P60-20251** **\$96.95**

OPTIONAL MAGNUM RIFLE POWDER BAR **P60-21353** **\$33.95**

AUTO EJECT SYSTEM[^]

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. **P60-22120** **\$33.95**

BL 550 POWDER DIE[^]

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

Powder Die: **P60-16629** **\$20.95**

Oversize Die: **P60-16626** **20.95**

Plastic Funnel: **P60-16617** **6.95**

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (*Requires the use of an RL 450 powder die – see below.*) **P60-20029** **\$24.95**

RL 450 Powder Die **P60-20308** **23.95**

John Marshall on Classic Firearms:

The date was May 23, 1934. Clyde Barrow and his girlfriend Bonnie Parker were racing down a country road in Louisiana in a stolen 1933 Ford V8, hell-bent on their way to make yet another bank robbery. The pair was already responsible for numerous other robberies, and also for as many as 17 vicious murders in the process. A carefully assembled law enforcement team headed by legendary former Texas Ranger Frank Hamer had spent 102 days of sleuthing to figure out where the two were and where they were headed. Hamer had painstakingly studied Barrow's patterns of movement, and these patterns fit a tip he received that Bonnie and Clyde were on their way to a rural bank in Bienville Parish, Louisiana to make an unauthorized withdrawal. It was well known that the two were well armed and that Barrow had vowed he would never be taken alive. Figuring the probable route of their travel, Hamer had "persuaded" the father of one of Barrow's friends and known accomplices near that road to act as a decoy to stop the car so an ambush could take place. The police took up positions and waited for hours. Finally, at 9:15 that morning, the stolen car was seen careening down the road toward the ambush site, just as anticipated. The decoy waved his arms as the car approached, and Barrow, recognizing the man, slowed down and stopped near him. That was his fatal mistake.

The lawmen visibly deployed, and Bonnie and Clyde were cut off from escape. There were six men in the posse – four Texas officers and two Louisiana lawmen. All were armed to the teeth with rifles, shotguns and handguns. Two of them, Hamer and Sheriff's Deputy Prentiss Oakley, carried Remington Model 8 semiautomatic rifles. Barrow, in the driver's seat, looked around frantically for a way out. There was none. One of the officers called Barrow out, but there was no response. Deputy Oakley, well-known as a crack marksman, responded immediately, using his Model 8 chambered in .35 Remington to fire the first shot of the day through Barrow's left temple, killing him instantly. Over 130 shots were then fired into the car, and Bonnie Parker's life was snuffed out quickly.

When the smoke cleared, there was no doubt about the deadly outcome. The Swiss-cheesed car eventually wound up on display in a Las Vegas casino.

The future Remington Model 8 was designed and patented on October 16, 1900 by John Moses Browning, who sold the patent rights to Remington. He at that time also worked on what was to become the Browning Auto-5 shotgun. The rifle and the shotgun shared the same long-stroke recoil operating system. For the first five years after its introduction in 1906, the rifle was known only as the "Remington Autoloading Rifle." It became the Model 8 in 1911. This was the first semiautomatic rifle capable of reliably firing full-power cartridges on a par with the popular .30-30 Win-

chester. The innovative rifle had a 22" fully-jacketed reciprocating barrel. The fixed-in-place box magazine could be filled using stripper clips. Four then-new rounds were developed for the Model 8. The first was the .35 Remington, then the .30 Remington in 1907, and then finally the .32 and .25 Remington. The .35 Remington magazine had a capacity of 4 rounds, while the others could accommodate 5.

John Browning entered into an agreement with Fabrique Nationale (FN) in Belgium to make this rifle as the FN Model 1900. Sales were restricted to areas outside of the United States. This model was made from 1910 to 1929, with only mediocre sales. A total of 4,913 were produced and sold, mostly in Europe and Canada. They are found only rarely today in the U.S.

In operation, the bolt (with a rotating bolt head) and the barrel, locked together, recoil to the rear in firing while compressing a pair of recoil springs. Then the bolt is retained to the rear while the barrel moves forward by one of the springs as extraction and ejection take place. Then the bolt is released and returned forward by the second spring, in the process stripping

Remington Models 8 & 81 Semiautomatic Rifles

another round from the magazine and chambering it. The bolt has a hold-open mechanism that activates when the magazine is empty. The Model 8 can be taken down for transportation, as the barrel and receiver will easily separate without the need for tools.

Remington went full-bore with its promotional advertising for its new rifle, and professional artwork showed hunters confronting bears, wolves, and other intimidating animals with it. The idea was conveyed that here

making 81s in that chambering rare collector items. In 1940, it was also offered in .300 Savage chambering. There were five different grades provided. These were Standard (81A), Special (81B), Peerless (81D), Expert (81E) and Premier (81F). The FBI ordered a number of these Model 81s.

The Model 81 Police Specials were specially customized. These had higher capacity magazines holding 10, 15 or 20 rounds. Many had larger fore-ends and

some had special engraving for individual police departments. There were two main sources for these custom guns: Peace Officer's Equipment (POE) of St. Joseph, Missouri, and Hawkeye Protective Appliance Co. of Des Moines, Iowa. Remington made plans to make their own police guns in 1938, and probably counted on working with the POE Company. Only a few of these were made; the quantity is unknown. Collectors pay high prices for them when found; one is illustrated as the lower gun in the photo here.

Production figures show that about 26,000 Remington Autoloading Rifles were made from 1906 to 1911, 80,600 Model 8s from 1911 to 1936, and 55,581 Model 81s from 1936 to 1950, when production ceased. Total production of all models was 162,181.

Five years after the Model 81 was dropped from the Remington line, in 1955 Remington came out with the Model 740, a gas-operated semiautomatic rifle. It inherited the Woodsmaster name from the earlier rifles. Over the years, the 740 evolved to become the 742, 7400 and

then the 750. The 750 was discontinued in late 2016. The only centerfire semiauto rifles made by Remington now are the R-15 and R-25 AR-style models.

Model 8s and Model 81s are still found in the hunting fields today, and they have become popular collecting items that evoke nostalgia for the good old days and the good old guns that were made to last for a long, long time. They are landmark American rifles.

Remington Model 8
(above) and Model 81 Police Special.
Below is the bullet-riddled Ford in which
Bonnie and Clyde were ambushed.

was a powerful, fast-acting and reliable semiautomatic rifle that could be counted on in desperate situations. It worked. Sales were brisk, not only among civilians, but also by police organizations, who often had their rifles modified to take extended magazines.

In 1936, with improvements by Remington's C.C. Loomis, the Model 8 became the Model 81 Woodsmaster. In 1937, the .25 Remington caliber was dropped,

P60-50000

Now Available!

.408 CheyTac Conversion P60-50204 \$189.95
(Dies NOT Included)

Total price as pictured here with optional accessories: \$3069.75

.50 BMG Carbide Size Die	P60-50075	\$984.95
.50 BMG Case Trimmer	P60-50050	\$419.95
BFR Mounting Hardware Kit	P60-50140	\$9.95

50 BMG CASE TRIMMER ASSEMBLY [^]

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die. P60-50050 \$419.95

50 BMG CARBIDE SIZE DIE [^]

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications. P60-50075 \$984.95

50 BMG POWDER MEASURE ADAPTER [^]

For use with the RCBS .50 BMG powder measure. P60-50125 \$87.95

50 BMG PRIMER SEATING DIE [^]

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch. P60-50200 \$169.95

50 BMG PRIMER POCKET SWAGER [^]

Makes it easy to remove the military crimp. P60-50001 \$354.95

PRIMING CONVERSION [^]

Converts Swager to Priming System. P60-50003 \$89.95

50 BMG PRIMING SYSTEM [^]

Allows off-the-machine primer seating. P60-50002 \$354.95

AMMO BOXES ARE COVERED BY DILLON'S LIFETIME WARRANTY

Dillon AkroBins

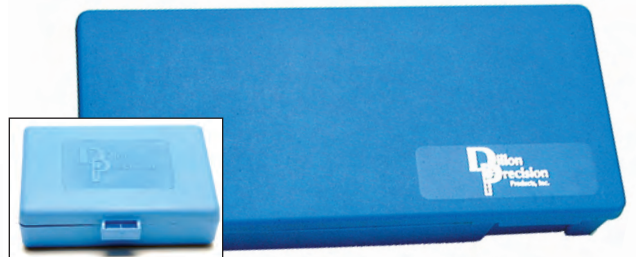

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.

MarColMar CETME-L

By Jonathan Kilburn

The CETME-L is an intriguing piece of firearms history. CETME (*Centro de Estudios Tecnicos de Materias Especiales*) was born from the design of the StG 45. The CETME – and later CETME-L – were designed by German inventors who transitioned to Spain following WWII. The original CETME design went through several iterations and caliber types. The first called for the same caliber as the StG 45 and moved on to the 7.62x51 CETME. This proprietary 7.62 round mirrored the dimensions of the 7.62 NATO but had a lighter powder charge.

7.62 CETME history is fascinating. The West Germans were interested in the caliber and lighter loads for better automatic fire control. This version, the CETME-A, was modified with the help of H&K shortly after being sent to the West Germans in 1956. Anyone who looks at the CETME will note distinct similarities to the G3. Indeed, the CETME's later models were the ancestor to the famous H&K G3 and PTR-91.

Why The CETME-L?

NATO forced Spain to adapt to the 7.62 NATO round found in CETME's third design. This version was called: CETME Modelo 58 Type 3 (CETME-C) and is the most common design. However, in the 70s there was a push for NATO forces to utilize the 5.56x45mm cartridge. What's unique about the CETME-L is that it isn't a scaled down version of the original CETME design, unlike their Armalite counterpart. This new 5.56 variant appears to be a unique rifle in its own right, while borrowing design elements from its predecessor.

In 1987 the CETME-L began to replace the CETME-C as the chief rifle of the Spanish military. During joint operations in Desert Storm, many Americans took note of the CETME-L, and Spanish soldiers took advantage of the well-made STANAG Magazines. Sadly, the CETME-L was a short-lived military rifle, as was replaced by the H&K G36E in 1999.

MarColMar and the CETME-L:

MarColMar picked up the de-milled CETME-Ls from Spain and brought them into the states several years ago. They utilized significant time figuring out what they could use, what needed to be remanufactured, and what could just be replaced. Outside of the receiver and barrels, the stock and plastic components did not age well. Plastic manufactured during the 80s didn't endure heat or impact well. It was a great material at the time but required replacement.

The new stocks retain some extraordinary details of the original. The butt pad looks near identical, the molding marks meet up near perfect, and sprue marks match up in placement. MarColMar also did their best to match the original color. While it's not perfect, it's pretty damn close. Additionally, they offer new color choices.

Along with remanufacturing using modern plastics, MarColMar included the option of a Picatinny rail on the top of the receiver. This is an enormous benefit for those who run optics. Users will inevitably have the original irons to rely on, but a Picatinny rail opens options.

Lastly, one drastic change MarColMar has made to the original design is the option of a heavy barrel. It's

MarColMar's CETME-L rifles still look as good as the day they were originally manufactured. These rifles aren't meant to be safe queens. In addition to the green Cerakote E Series finish pictured, MarColMar also offers the CETME-L in black, grey and FDE Cerakote. Barrels are hammer forged and nitrided, and feature 1 in 7" twist rifling.

The AR Alternative?

not for purists, but it's a nice pairing for those who – subjectively – desire something that looks and functions better than the original. Those unfamiliar with the CETME-L wouldn't detect the change as very little of the barrel is exposed.

Design Challenges to Consider:

The CETME-L has some strong drawbacks in its design. The bolt-catch is famously awkward and takes two hands to operate efficiently. Safety ergonomics are also standard to the original CETME design and take gigantic hands to operate. A little practice is all that's needed to become accustomed to the new positions. It's a challenge for those who are used to the AR or even AK-platform ergonomics.

MarColMar provides one STANAG magazine. I did try a few polymer magazines with little luck. Out of all the brands, Mission First Tactical did fit and cycle without incident. However, it's recommended to stick to aluminum or steel magazines in the CETME-L.

Use and Function:

I received both the heavy- and standard-barrel versions. There was little to no difference between the two in overall function beyond weight, which says a lot about the integration, and design by MarColMar. Each one cycled without incident with several ammunition types. The side charger, while heavy, moves freely and comfortably folded away.

Starting with some TulAmmo steel-cased ammunition I produced 3-inch groups at 100 yards with open irons. Honestly, steel-cased ammunition made no difference to me with a fluted chamber and functioned the same

as most other ammunition types. Delayed-roller systems are notorious for accuracy issues compared to direct gas impingement. That said, the purpose of all the CETME rifles was to be issued to a military force and didn't require superb accuracy. Spanish specifications required a 10cm grouping at 100 yards. Regardless, this CETME-L is more accurate than I am.

I redirected my focus on to American Eagle .223 75-grain FMJ and was surprised on the accuracy overall. At 100 yards, with open sights, I was managing sub 2-inch groupings. My best results on the standard barrel were 1.19 MOA and in the heavy barrel was 1.28 MOA. For comparison, the Century Arms C308 with a 1-8 scope came in at 2.48 MOA with Federal Premium Sierra MatchKing 168-grain bullets.

Conclusion:

MarColMar had a challenge to reproduce a pretty serious piece of military hardware. They also wanted to make sure they stayed true to the original design without any noticeable changes. Their attention to detail in remanufacturing the plastic components shows and their overall fit and finish is as close to perfection as anyone could achieve. While the CETME-L is made with surplus parts, the overall experience and remanufacturing also stands out compared to other alternatives like Century Arms C308. This CETME-L is one new "surplus" rifle that's too good to pass up.

Blue Press 47

Achy Breaky Hands: .45 vs. 9,

By D. K. Pridgen

Many will agree I'm a little slow out of the gate, but in my thirties I felt becoming old would never happen. We built a house around day jobs, raising a family while working long hours weekdays and weekends in the flowerbeds and over an acre of yard. No sprinkler system, happily dragging garden hoses into the wee hours. I remember dashing all over SHOT, never tiring. Post-home building, I had energy to build two IPSC (pre-USPSA) and later an IDPA club well into my forties.

In my fifties I reluctantly realized elder years were approaching but stubbornly ignored the idea. I just knew I had all the time in the world before THAT happened. I still grabbed every new boomer firearm to test against my "ageless toughness."

When I was 55, I accepted that bad guys traveled in 3+ groups, accepted the premise "today's 9mm ammo is as effective as the .45 ACP and with extra magazines there is lots more ammunition." I switched to a G19 for competition and carry and let my cherished .45 ACP 1911s I had competed with and carried gather dust in the safe.

I went to bed one night in my mid-fifties, woke up with a staggering number of aches and pains. Sitting on the edge of the bed cogitating, it hit me – unnoticed a decade had rocketed by and I was in my sixties!

To prove my sudden aging hadn't been detrimental, I dusted off my EDC 1911 for a range trip, which actually exacerbated my age fugue. Splits were nowhere near my heyday and if I pushed the times, because of reduced grip strength that accompanied aged hands, the target looked like it had encountered 12 gauge buckshot! Topping everything off, sadly I found the .45 ACP recoil made my hands ache!

None of this boded well for a caliber/platform I had trusted as an EDC – well, since forever! When push comes to shove, pulling the trigger as fast as I can, simultaneously needing the most accuracy should be the norm.

I knew conceptually a 9mm 1911 would have higher capacity and shoot softer than .45s, but had no 9mm 1911 for range

comparison. I had noticed the proliferation of 9mm 1911s in IDPA, precipitated by quicker splits and more beans in the pistol. (Likewise, several dead-serious trainers have moved from bigger bores to smaller ones in 1911s or other platforms.)

Then I attended a Wilson Combat writer's conference. They had plenty of pleasurable-to-shoot 9mm 1911s! An informal comparison of comparable .45 pistols to 9mm versions confirmed the obvious truth – the 9mm wins for comfort and speed.

For most aging shooters, reduced grip strength happens naturally, unless we devote a lot of time maintaining it. At the same time, aches and pains in joints begin to develop – something I can attest to – along with the excruciating pain of injections in them!

One evening Bill said 9mm 1911 sales had equaled that of the .45s for the first time! Bill felt this reflected the aging demographics of customers who started shooting .45 versions and wanted 9mms to continue their Wilson Combat tradition.

For another data point, I contacted Springfield Armory. My contact replied "Not sure on the percentages, but 9mm 1911 sales have increased exponentially in the last couple of years." Immediately, I requested two identically built, except caliber, Range Officer Elite Champions on the spot!

Before my totally subjective trials, here are the test pistols: They're burr-hammered Light Weight Commander genre hot rods, with fully supported ramps on 4-inch stainless bull-barrels and full-size frames. All wear the same corrosion resistant, self-lubricating Black-T surface treatment used on Custom Shop Professional models. Heights and lengths (5.5 and 7.6-inches) are identical but weights are 31.5 oz. (9mm) and 30 oz. (.45 ACP). (My G19 is 5.04 and 7.36-inches, weighing 23.6 ounces.)

SA slides and frames are forged steel

Springfield Armory
1911 Range Officer® Elite Champion™
9mm

but NOT the Article You Expect!

and aluminum alloy, respectively. Two magazines and a set of replacement fiber optic rods – orange and yellow – are in Springfield’s accompanying pistol case.

Pistols include Springfield’s long, nicely skeletonized, aluminum Gen 2 triggers, ambidextrous thumb safeties, and captive flat wire recoil system. Upswept, beavertail grip safeties have speed bumps for positive activation and recesses to ensure hammers have enough travel room.

Furnished sights are orange fiber optic front and rear with a one-hand slide manipulation (“tactical rack white dot rear”) ledge. Thin, effectively grooved/checkered G-10 grips and checkered mainspring housings make reaching the long Gen 2 trigger easier for medium sized hands and improve recoil control.

I chose the RO Elite Champions because of their full-size alloy frames. Alloy is a boon for all day carry, while the four-finger butt length combines with 9mm recoil for improved comfort and control, especially for less than optimal grip strength. The more fingers in use, the better control. I have no problem concealing a full-size frame.

Now to the evaluation of my 9mm/.45 ACP theory. Packing up a boatload of ammo a Galco Tuck-n-Go 2.0 holster and HMC Horizontal Magazine Carrier, I trundled to the range and began shooting.

I used an established protocol, evaluating my performance (9mm then .45) with two hands, dominant and support hands only. I was really not concerned with recoil difference *per se*, but with how well I could control each caliber, how quickly/accurately I could fire repeat shots with my cursed hands, and how these hands felt after extensive shooting of each caliber. (Remember, “subjective testing.” I’ve no real way to scientifically measure the feel of these 1911s in the hand when exploding off the runway.)

Quick report on pistols’ performances: Neither stumbled with any

carry load fed them using Wilson Combat, CMC and SA factory magazines randomly interspersed. (Factory models fit flush for a little more concealability, but hold one less round than the WCs and CMCs.) White dot and fiber-optic sights and Gen 2 triggers worked great. Galco’s excellent offerings were a boon, fitting both 1911s.

So here’s the deal. My expectation of the 9mm’s softer shooting reducing the handicap my hands introduced into my shooting was correct. Splits and accuracy improved with the 9mm over the .45 ACP.

I shot quite a few rounds and found myself unconsciously migrating to the smaller caliber Springfield. Thanks to the .45 ACP RO Elite, my hands suffered enough even the 9mm recoil began to hurt. I went home!

The next range trip I stuck with the 9mm RO Elite Champion – and shot and shot! My grip really did not tire and my hands remained as ache free as they ever do now days. Surprisingly, the 9mm RO was even more pleasurable to shoot than my G19. I suspect the geometry of pain locations in my hands made the difference.

My theory the 9mm could bring 1911s back for me proved valid. Today I still carry all the time, train but no longer compete. When I shoot or carry I want the comfort brought by the 9mm chambering and “toteability” from Springfield Armory’s RO Elite Champion alloy frame.

I believe aging 1911 concealed carriers/shooters can learn from competition shooters, switch to 9mm versions and comfortably keep 1911s in their lives. Active competitors might opt for a 9mm all-steel Springfield Range Officer to wring the very most from the 9mm comfort/control.

It’s a good idea to choose what your hands will let you – .45 ACP or 9mm – stuffed in a Springfield RO Elite Champion.

Taylor Freelance Magazine Extensions

AR-15/Tavor 9mm SMG +10 **P60-12377 \$39.95**

This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many "stock" mag springs. **NOTE:** *Colt SMG mags come from many different manufacturers. Colt offered at least two major types – one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.*

TF/Wolff Spring for above **P60-12213 \$10.00**

Some Colt/Tavor/UZI magazines ship with strong springs capable of powering +10 extensions. Others don't. This spring eliminates the problem.

CZ Scorpion +10 **P60-12378 \$49.95**

- Extra length/strength spring included
- Thumbscrew-and-gasket retention system allows for quick, easy disassembly.

GLOCK +20 *Pictured* **P60-12148 \$69.99**

Transforms Glock 31-round magazines into 51+1 round mags.

Legal for PCC competition!

- Extra length/strength spring included.

SIG MPX +10 **P60-12376 \$29.95**

- Works with stock mag spring.
- Angled floor stands the magazine straight up on a table for easier loading.

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and

properly aligned with the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon's 1" Bench Wrench

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you're setting up a "naked" machine, there's plenty of room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead. We've addressed this in two ways. We offer 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our 1" wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. All our lock rings fit any standard 7/8" x 14 dies.

Lyman Products

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

P60-11389 \$39.95

Lyman Scale Weight Check Sets enable you to check/calibrate your scale using known weights.

Kershaw[®]

TRUST YOURSELF. TRUST YOUR TOOLS. BE READY FOR EVERYTHING.

Kershaw Volt II opens one-handed and with an authoritative "twack" thanks to Kershaw's SpeedSafe[®] assisted opening system. A simple pull back on the flipper and the Volt II opens smoothly and easily.

Blade length: 3.25" Closed: 3.9" Open: 7.1"

P60-66698 \$55.95

Designed by RJ Martin, the Volt II has the same versatile blade and handle style as the original Volt, but with a hardworking 8Cr13MoV stainless steel blade and textured, black glass-filled nylon scales.

Blade length: 3.25" Closed: 3.9" Open: 7.1"

P60-66699 \$49.95

The Kershaw Method opens quickly, easily, and manually with Kershaw's KVT ball-bearing system and a built-in flipper. The handle is black - of course. The G10 handle features an unusual machined pattern reminiscent of an architectural truss.

Blade length: 3" Closed: 4.25" Open: 7.25"

P60-66700 \$39.99

Kershaw Pub looks like nothing you've ever seen. The blade is a modified sheep'sfoot with a straight edge and clipped rather than rounded tip.

Blade length: 1.6" Closed: 3.1" Open: 4.5"

P60-31323 \$24.95

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master - instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

P60-19495 \$9.95

The Original GLOCK[®] Field Knife

Field Knife, GLOCK, with scabbard, 1 ea.

Elite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

Made in USA With a Lifetime Warranty!

The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location. The result: **NO MORE BROKEN BOLTS!** The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.

HMB Bolt **P60-66680 \$99.00**

Young Manufacturing's **Upper Receiver Vise** holds any AR15 upper receiver regardless of the manufacturer. Since it supports the receiver from the inside, the outside dimensions are of no concern. Made from aircraft-grade 6061 T6 aluminum and anodized to MIL-A-8625 Type 3 Class 2.

YM Upper Receiver Vise **P60-66679 \$34.99**

This tool makes it simple to remove or install a new ejector and spring into the AR-15 bolt. Anyone who has tried to do this without a tool will be amazed at the reduction in the number of cuss words needed to perform the task. Comes with alignment and roll pin punch.

YM Bolt Assembly Tool **P60-66678 \$39.95**

Jerry Miculek AR-15 Compensator

Jerry Miculek's three-chamber AR-15 Compensator fits threaded-barrel rifles and may be "clocked" for left- or right-handed shooters. Used by many top 3-gun competitors.

Elzetta

Tactical Flashlight Mounts

ZFH1500 Flashlight Mount for AR15s

ZSM Tactical Shotgun Flashlight Mount

ZRX Tactical Flashlight Mount

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

Polymer Coated Bullets:

By Oleg Volk

Lead projectiles pre-date firearms by millennia. Long before gunpowder, they were cast with slings and arbalests. Lead is dense, relatively common and easy to shape into projectiles. Spherical bullets were either patched loosely with paper or cloth for smoothbores, or pounded tightly into rifles, but pure soft lead was employed in both cases. That worked adequately all the way up to the 1850s, at which point increased velocity combined with smaller bore diameters caused lead bullets to strip off rifling and fly haphazardly. Whitworth polygonal rifling was a stopgap solution; functional, but expensive. By the 1870s, paper patching was in vogue, inexpensive and reasonably effective. Bullet material got harder, including lead and antimony, but the continued trend towards military calibers as small as 6mm and velocities in excess of 2700 fps, that wasn't enough. 1880s saw metal jacketing that is still mainstream today. That process kept getting more refined, but it remains primarily a large-scale industrial method that's out of reach of most hobbyists. Handloaders continued to buy factory-made bullets or stuck with cast lead.

Cast lead is economical and useful for many things, but it's not ideal for many semiauto rifles, or for polygonal-rifled pistols. Lubricant in the bullet grooves burns off on firing, causing more smoke than we have come to expect from jacketed ammunition. And even factory-jacketed bullets usually have exposed lead at the base, which gets airborne in dust form upon firing. Electroplating bullets solves the problem of the exposed base, but doesn't work well above 1200 fps. Gas checks work to reduce fouling, but don't raise the

velocity limit much. If only some method existed to ensure proper engraving of rifling grooves on the bearing surface of the bullet, that didn't require a factory or caused target-obscuring smoke...oh, wait, such a method does exist! Enter polymer coating, a technology that's been around for at least two decades.

Hi-Tek is one of the most popular brands, available as a powder or premixed as a liquid. Take an ounce of coating material and mix it up with 35 lbs.

of cast bullets in a tumbler, wait for the material to adhere to lead as the solvent evaporates. The result is uniformly coated projectiles, potentially in a wide variety of colors. Simpler than plating or jacketing, this process works well on the small scale. It also works well on a large scale: Federal Cartridge has marketed polymer-coated ammunition for a while, first as blue Nyclad, then as red "flying lipstick" Syntech, currently available in the 115-grain to 150-grain range.

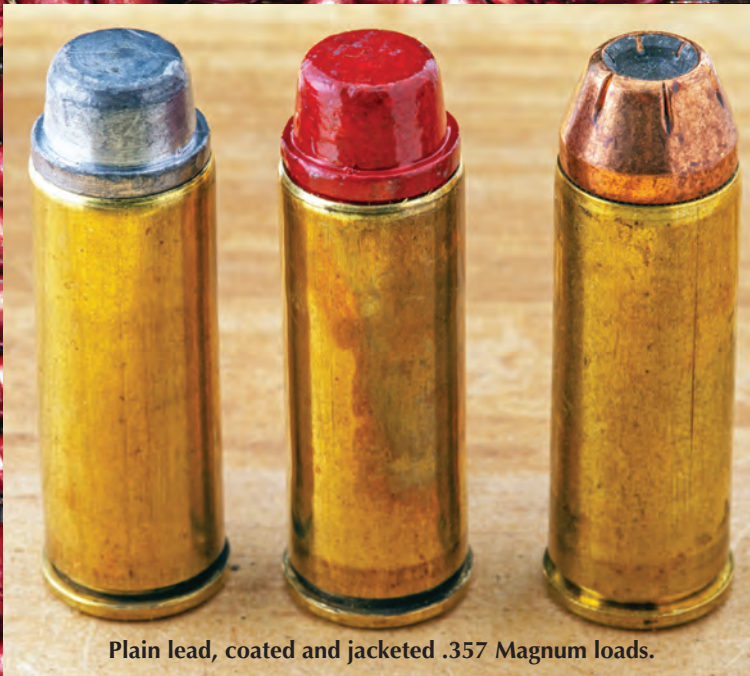

Slick bullet coating works better than plain lead on feed ramps, improving reliability. Polymer residue is easier to clean than copper or lead fouling. According to Stanley Hodgkin, a competitive shooter who runs Falcon Bullet Company, the

velocity limit for his pistol bullets is between 1400 fps and 1600 fps, depending on the gun. Steve Leady, the most appropriately surnamed hobby shooter who uses polymer-coated bullets for .300 Blackout rifles, says that he has been able to run hardcast coated lead up to 2500 fps with no loss of accuracy. Others have gone up to 2,700 – the hardness of the bullet makes all the difference at that point. Recovered projectiles show that the 1/500" thick coating remains bonded to the bullet surface

Competitive shooter Krystal Dunn holds up Federal "Flying Lipstick" 115gr Syntech 9mm cartridges.

Colorful Functionality

even where rifling grooves engraved on them. Since bullet nose and ogive do not get sized, the coating thickness can affect feeding.

However thin the coating is, it does alter the diameter of a cast or swaged bullet. Before loading into a case, each bullet must be sized to the correct diameter. Steve Leady found that a homemade rig worked quicker and better for his purpose, while Stanley Hodgin runs a high-volume automated sizing machine capable of processing around 4,000

per hour. Bullets with lubricating grooves work well with the coating process, decreasing friction without reducing bearing length or gas sealing.

The pretty color variety offers the option of color-coding loads: for example, green could be for carbine, red for pistol. Or blue could be for subsonic, yellow for supersonic. With Federal, a mainstream ammunition maker of stellar reputation, adopting this technology, I expect handloaders to discover it in increasing numbers.

Real Avid Gun Tools & Cleaning Gear

Smart Mats™ are cleaning mats on steroids. The no-slip backed Spadded mat features an oil-resistant surface. It allows you to properly clean your gun without ruining the kitchen table and is large enough to handle field-stripped guns. The ingenious magnetic parts tray ensures your pins, screws and springs are never lost again. This is real world gun cleaning taken to the next level.

- AR-15 Smart Mat **P60-29041** **\$19.99**
- 1911 Smart Mat **P60-29040** **14.99**
- Handgun Smart Mat **P60-29042** **14.99**

The Master Bench Block™ is most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

P60-29033 **\$29.99**

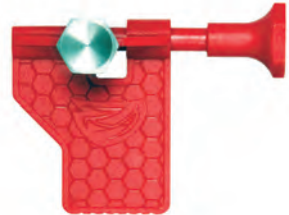

This advanced kit includes every standard and roll pin punch needed to build or work on an AR15.

P60-29032 **\$39.99**

The Lug-Lok™ Upper Vise block utilizes the strength of barrel lugs to safely secure AR15 upper receivers while you work, rendering clamp-style blocks obsolete.

P60-29035 **\$79.99**

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

P60-29034 **\$9.99**

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

P60-29039 **\$29.99**

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm.

Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

P60-29036 **\$9.99**

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

P60-29037 **\$9.99**

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

P60-29038 **\$12.99**

Swab-its A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Star Chamber Cleaning Foam Swabs™ are for AR-15, M4 and similar MSRs. 3-pack

P60-10056 \$13.99

The **Swab-its® Handgun Cleaning Kit** for 9mm/.357 caliber handguns contains four Bore-Sticks™, a three-in-one tool that replaces the cleaning rod, jag, and patch; a nine-piece Multi-Surface Gun-Tips® package for internal and external cleaning requirements; and a 0.4 ounce bottle of **BREAKTHROUGH®** Battle Born HP Pro lubricant and protectant. As with all Swab-its products, the Bore-Sticks and Gun-Tips are made of reusable, lint-free foam that is washable with degreasing soap and water or mineral spirits.

P60-11907 \$19.95

The **HYSKORE Degreezer** consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. The set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.

P60-10209 \$15.95

On gun dealers shelves since 1976, the **ADCO E-Z Brite Wonder Cloth** is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

P60-18613 \$7.99

D•WIPE Towels were specially designed for immediate clean up of most contaminants without water. The soft 5.5" x 8" towels are saturated with a unique cleansing formula and aloe vera, and will remove heavy metals from skin and other surfaces.

P60-19916 \$4.95

Original **D•LEAD Hand Soap** quickly cleans heavy metals as well as paint dust and firing range residue from the skin and fingernails. Removes lead, nickel, cadmium, arsenic, mercury, silver, zinc and most other heavy metals.

8 Oz. Bottle **P60-19915 \$2.95**

Slip 2000 Products

725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P60-19237 \$21.99

Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P60-19234 \$21.99

Slip 2000's Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P60-11652 \$25.99

Slip 2000's AR Cleaning System contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P60-11676 \$19.99

Slip 2000 Extreme Weapons Lubricant (EWL) was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P60-11644 \$18.99

Slip 2000 EWL30 has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P60-11645 \$18.99

Slip 2000 Copper Cutter is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P60-11646 \$11.99

Each Slip 2000 Gun Wipe packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P60-11674 \$14.99

MIL-COMM Extreme Performance Lubricants

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe

P60-15732 \$10.99

P60-15731 14.50

Revolver BLAST with TW25B is an all-synthetic lubricant/protectant specifically designed for revolvers.

4.2 Oz. Aerosol

P60-66677 \$11.95

Brian Enos' Far Superior Slide-Glide

is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard

P60-15571 \$7.95

Slide-Glide Lite

P60-15572 7.95

Microton UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

P60-75125 \$9.95

Sweet's 7.62

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The **Lyman X-Block** is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

RETURN TO RATON:

SMITH & WESSON .22/.32

**RUGER BLACKHAWK BISLEY
.475 LINEBAUGH**

COLT PYTHON

By Peter Caroline

It's a seven-hour drive from my friend Bill's home in Lakeside, Arizona to the NRA Whittington Center in Raton, New Mexico...IF you don't stop for lunch. This is always a point of contention between Bill and me. Bill loves to stop and smell the roses; my motto is, press on regardless... the miles to our destination are a necessary nuisance, to be overcome as expeditiously as possible.

This was my eighth Shootists Holiday, a pleasurable occasion for socializing with like-minded individuals and the enjoyment of guns, both one's own and other people's. The Whittington Center is a 33,000-acre firearms enthusiast's paradise. There are available, as I recall, 17 different ranges for a wide variety of shooting sports. We spend our days shooting, admiring, buying and swapping guns, and checking out the treasures in the Whittington Center's amazing museum. We reunite with old friends, and get to meet new friends. In addition, there are lots of good restaurants in the area, and later in the evenings, we gather at the motel for guitar picking, singing, adult beverages and cigars.

The morning after we arrived, Bill and I showed up at the pistol silhouette range for a brief meeting, orientation for the new folks and a morning benediction. We examined the items that would be raffled off at the banquet, and then we set up our equipment at our chosen spots on the firing line. Bill and I always set up our folding chairs at the 50-meter line for pig silhou-

ettes...we are old and lazy, and it's an easier walk to set up targets. As a rule, only pistol-caliber handguns and rifles are allowed on the range for shooting at the silhouettes, although a number of shooters bring vintage rifles for firing at a large yellow banana-shaped target up on the hillside backstop. On several occasions, firing was suspended and a cannon was wheeled out on the range. I'm not sure of the bore diameter...it fired a bowling ball, and used nearly a pound of black powder. It was a most impressive spectacle, and the bowling balls disappeared somewhere in the stratosphere.

Wandering up and down the firing line is a fascinating pastime. You get to see (and shoot) guns that you'd normally only read about. One gentleman, a newcomer to the event, said he had a handgun that I might be interested in checking out. He opened a fabric pistol case, to reveal a pristine Bren Ten 10mm pistol. Now, I'd seen one of these rarities before, but it was secured in a glass showcase in Col. Jeff Cooper's gunroom at Gunsite. I asked if I might handle it, and the owner replied, "Sure. Would you like to shoot it? I have ammo." Needless to say, I took him up on his offer. I fired five rounds at a gong target, and for a moment I could almost imagine myself wearing Sonny Crockett's white Gucci blazer.

Temptations abound. Bobby Tyler (tylergunworks.com) and Scott Kolar (skgrips.com) had set up a table in a shaded area behind the firing line. Bobby had, this

RESTORED COLT BISLEY

past year, restored, color casehardened and tuned a 1920s-vintage Smith & Wesson M&P .38 Special for me, and is currently working on a companion piece, a vintage .32 Regulation Police. He had on display a dazzling assortment of single-action revolvers, a color casehardened Browning Hi Power and CZ 75, an engraved Ruger Bearcat Shopkeeper, a restored Colt Bisley, an engraved Python snubby and an engraved and gold-inlaid Colt Model 1908 pocket .380, to mention but a few. A fully engraved Ruger Blackhawk in .475 Linebaugh caught my eye, but was totally out of my price range. Many of these handguns were wearing Scott Kolar's stellar grips. Grip materials include flame-grained maple, burl mesquite, French walnut, prehistoric mammoth tusk and a variety of exotic bone and horn materials. I have a set of his white buffalo bone grips on one of my 1911s, and they fit perfectly and are very handsome indeed!

By noontime, everyone is hungry. In years past, we had to run into town for lunch or bring our own goodies to the range. This year, we arranged to have a lunch wagon on site for our midday meals. Offerings included a superlative green chili cheeseburger and an incomparable pork belly sandwich.

Next year will be the 35th year of the Shootists organization, and it has been customary for the group to commission a special gun to commemorate each five-year anniversary. The 2020 Shootists 35-year anniversary handgun will be a custom tuned and

accurized Ruger Single-Seven Bisley single-action revolver, in .327 Federal Magnum caliber. A prototype was on display, complete with custom stag grips and a test target.

For the inveterate collector (or in my case, accumulator), there are nearly endless opportunities to empty one's wallet. I spotted a pair of Remington Model 12 .22 pump guns and an interestingly modified Hi-standard Field King pistol. On a nearby gun rack were an 11mm Mauser Model 71/84 and a .45/70 Winchester Hotchkiss rifle, both in quite decent condition. I had to drag myself away from a very nice Smith & Wesson .22/.32 Hand Ejector...I have a weakness for .22s, but there has to be a limit. In the end, sanity prevailed.

Man does not live on gunpowder alone. Raton and the surrounding area offer some very fine dining opportunities. In Raton, the Ice House restaurant features a memorable hamburger. About 30 miles to the west, in Cimarron, at the restaurant in the St. James Hotel, I enjoyed a blue-rare ribeye, followed by a really fine crème brulee for dessert. We also made our annual pilgrimage to Tequila's Mexican restaurant in Trinidad, Colorado. They had a new seafood special, Mariscos Molcajete, an impressive array of crab, shrimp, clams and other seafood, all served in a large stone bowl. It was sufficient for two people, but sooo good! They also have an excellent flan for dessert (yeah, I ate that, too). A year of Atkins and exercise, and I might be ready for next year's Holiday.

ASSORTED SK GRIPS

BOWLING BALL CANNON

The Taurus 380 UL Revolver

By J. B. Wood

As most gun-people will know, one of the basic features of the Taurus 380 UL is that it had its beginnings a long, long time ago, in the World War One era. In that time, there was plenty of ammo, but not enough of the new pistols. So, a bright engineer devised a way to use autopistol ammo in a revolver

It came to be known as the “half-moon clip,” and both Smith & Wesson and Colt made revolvers to use it. In more recent years, another smart designer said, in effect, “Why not a ‘full-moon clip?’” The advantage is obvious, a single-operation reload.

In the neat little Taurus revolver featured here, the UL stands for “Ultra-Light,” which with its alloy frame, it is. Unloaded weight is 16 ounces. The other numbers: 5.95 inches for over-all length, height 4.4 inches, and width 1.4 inches. Barrel length is 1.75 inches.

The dimensional and weight figures show that the 380 UL is perfect for concealed carry. As for the cartridge, even the big-bore guys admit that with modern loads, the .380 round edges toward full 9mm performance. Also, another factor; for those who are sensitive to heavy felt-recoil, it just isn't there.

Thanks to the wide, smooth-faced trigger and superb internal fitting, the DA-only pull is between 11 and 12

pounds, quick and easy. Also, there's no hammer spur to catch on your shirt or coat when you're getting it out. At the base of the bobbed hammer is the well-known Taurus safety. Popped out with the provided key, it stops every thing. Handy, if you have small children.

As mentioned earlier, the frame is aluminum alloy, and all other parts except the grip are steel. A matte-black version is also available. Sights are better than they need to be on a defensive gun, square-picture, the front one ramped. The black rear sight has a small screw on the right side for lateral adjustment.

When you're using one of those sub-compact autopistols, you have to tuck the little finger underneath the butt. Not with the 380 UL. The one-piece rubber grip not only has two generous finger-recesses at the front, but also a nice little one below. And, the soft rubber absorbs some more of the moderate felt-recoil.

I tried out the 380 UL at the range with several loads, from Black Hills, Winchester, and Super Vel. Firing was at 7 and 15 yards, standing, two-hand hold. All of the five-shot groups were well-centered, even the occasional flyer. At the longer distance, average was around 5 inches. Closer in, there was one nice little 3-inch group.

I noticed that on my test gun, the rear sight had been moved very slightly to the right. Obviously, some

The "Full-Moon" clip functions as a speedloader.

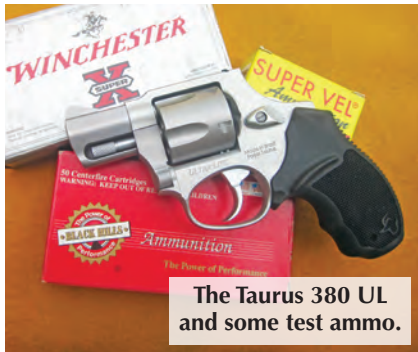

Double-Action-Only, no hammer spur to snag on the draw.

The rear sight has a lateral adjustment screw.

The one-piece rubber grip is excellent. Note the small-finger recess at the bottom.

The Taurus 380 UL and some test ammo.

The 380 UL, left side.

thoughtful person at Taurus had tried it out before it was sent to me. As for the "felt-recoil" question, it was about the same as with ordinary loads fired in a .32 auto pistol.

The matte-black version of the 380 UL, mentioned earlier, costs a little less than the one shown here. For this one, the "suggested retail" is \$513.79. When I saw the figure, I was amused; I could imagine some CPA-type figuring materials, manufacturing, a decent profit,

and coming up with that oddly precise amount. Out there in the market, of course, the 380 UL will be found at less than MSRP. And, for those who will find all of it's good features to be a personal advantage, it's a good price.

Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	P60-25374	\$79.99
Scout Scope Mount for SKS Rifle	P60-25373	78.99

Blue Press 75

By Kimmie Dillon

What do you get when you combine an attractive, Southern California girly-girl with a competitive shooter? You get Jennifer Irene, an alluring ball of energy who is also this month's **Blue Press** cover model.

Unlike many competitive shooters, Jennifer didn't grow up on the shooting range. In fact, quite the opposite. She's a Southern California girl who calls Redondo Beach her home. She spends her life near the beautiful blue Pacific, where the ocean kisses the dry sand at the water's edge. It's here that you'll often find her enjoying the calm waves and warm sand while working out to stay in top physical condition. Fitness is a lifetime priority to Jennifer and continues to be an important part of her profession as well.

Guns & Yoga

Jennifer Irene's

Fitness-Training Strategies for Competition Shooting

Initially, her career plans were to become an international banker. After all, she's fluent in three languages: English, Spanish and Chinese. But while in college, majoring in Business Finance, Jennifer was scouted by multiple prestigious modeling agencies. She realized this could be both a lucrative and strategic move where she could utilize her business acumen to market the product she knew best – herself! While entertainment was never a preplanned career choice for Jennifer, she has used her knowledge of business and finance to excel as a businesswoman and a successful entrepreneur in the entertainment world. As a result, early in her career Jennifer became a signed artist with Upscale Records in Newport Beach and received a record distribution deal with

Sony BMG Music Entertainment for her songs.

Jennifer considers herself a marketing and merchandising entrepreneur who markets herself while using social media to further bolster her brand. It's easy to say we're pretty proud to have this talented beauty on our cover of our October *Blue Press*! And besides the BP, she has also landed on the cover of 24 other magazines internationally, including *Maxim* and *FHM*. We're hopeful *The Blue Press* is now your favorite publication, right Jennifer? Additionally, she has been published in over 100 magazines worldwide, was the official spokesmodel for VP Racing Fuels for over five years, and held the title of Miss Taiwan USA in 2010. Jennifer has been featured on several reality TV shows that have aired

on large networks such as MTV and Bravo TV.

Today Jennifer continues her work in entertainment by working with celebrities behind the scenes for upcoming movies such as “John Wick 3” and several action films. This new chapter of her life is blossoming and rewarding for Jennifer. In 2014 Jennifer met Taran Butler of Taran Tactical Innovations (tarantacticalinnovations.com). It was then that she discovered a whole new fascinating world in the gun industry. For the first two or three years, Jennifer trained relentlessly as an apprentice under Taran for about 3-4 days a week. She continues to receive even more shooting practice by attending multiple shooting matches. Jennifer uses her shooting and people skills to assist Taran with training several A-list celebrities for their firearm roles in Hollywood films and TV shows. Some of the amazing actors she works with include Keanu Reeves and Halle Berry for “John Wick 2” and 3, Chris Pine, Josh Duhamel, Michael Rooker, Michael B. Jordan, The Kardashians, Jon Bernthal, Mark-Paul Gosselaar, Shemar Moore, Michelle Rodriguez, the American Ninja Warriors, Eric Dane and so many more amazing Hollywood icons.

Living her life like Yin and Yang, Jennifer is also a certified Hot Yoga, Pilates, and Spin instructor. As an athlete, she represents sponsors in the fitness community and leads many students through their journey within the fitness world. She shares how mentoring and inspiring others is very important to her. Jennifer explains how she sees many people generate high incomes with their careers yet fail to become high-net-worth individuals. So through her business and fitness experience, she helps to guide them and others to become successful in all aspects of their lives.

Here are some of Jennifer’s fitness strategies for becoming a stronger competitive shooter:

KD – As a certified yoga instructor, how does yoga benefit competitive shooters?

JJ – The best-kept secret is that yoga helps your shooting. Yoga is great for mental strength conditioning

among many other benefits including a stronger core, better flexibility which allows for a better range of motion, and better arm strength which allows you to be able to hold your gun up longer with more stability. Yoga teaches you to be very aware of your breathing which can have a dramatic impact on sight alignment, calming adrenaline, alleviating stress, and staying focused and in control. Yin yoga is a type of yoga that is excellent for healing injuries. It enables you to move deep into the connective tissues and ligaments to heal your body, which in turn can help with your performance on the range or at a competition.

KD – Some may say that yoga is only for females or those who like to meditate. I bet you can shoot this perception down?

JJ – In a distracted world, yoga keeps us focused and in a world filled with fear it gives us the courage to overcome our fear. While yoga isn’t for everyone, neither is shooting. You can use the benefits from one to help with the other. Don’t knock it until you try it. A lot of the A-list celebrities that we work with at Taran Tactical Innovations are yogis like Halle Berry, Joe Rogan, Cung Le, Demi Lovato, The Kardashians, Josh Duhamel and Chris Pine.

KD – If someone has never tried yoga before, is there a type of yoga that you recommend for them to start with?

JJ – From hatha to vinyasa to yin yoga and more, there are many different styles of yoga offered in the U.S. that it can be overwhelming to sort through the options especially if you’ve never done yoga before. I recommend just starting with any beginner class that your gym offers or if you don’t have a gym membership, look up some YouTube tutorials for yin yoga or vinyasa 1 yoga. I recommend starting off with a non-heated class for beginners. If you are looking for help with targeting certain injuries, such as hip or back injuries, you should try yin yoga. Yin yoga holds the postures for 1-10 min and allows you to move deep into the connective tissues and muscles to heal. Once

you get a little stronger and confident, try a heated vinyasa class. You'll definitely get a workout from it.

KD – Are there a few specific yoga postures that you recommend for shooters to focus on?

Jl – Google and check these postures out:

Pigeon pose – hips

Frog pose – hip opener

Half moon pose – opening up the shoulders, great for sciatica, and lateral flexibility, which we don't practice often in our daily lives.

Childs pose twist – opens up the back, the shoulders, the hips, and so much more.

Seal pose or sphinx pose – lower back

Cat cow pose – opening up and creating space in the vertebrae of the spine

And a good read for beginner yogis is *Light On Yoga: The Bible of Modern Yoga* by B.K.S Iyengar.

KD – I have to ask – are there days where you would rather hang out and not exercise and if yes, what inspires you to head to the gym anyway?

Jl – Some days you eat salads and go to the gym, some days you eat cupcakes and refuse to put on pants, it's called balance. Balance is the one thing that we can control and it's the one thing that we lose control of. So find balance in your routine and continue to live your best life. If you are having one of those days then maybe try to get in at least a 30-minute exercise from home. You won't regret it!

KD – And shifting to general fitness, what are a couple of exercises that you recommend to help them improve their shooting game?

Jl – There are obviously many strength-building exercises but these are a few to add to your regular program to reduce strain during your practice and competitions.

Aerobic exercises – condition the heart, lungs and circulatory system. Crucial for those competitions where you have to run from one stage to the next to shave off time. I recommend running or cycling. If you want to work your arms out too at the same time you

can incorporate wrist weights while running or do push ups and motorcycles while cycling.

Arm exercises – lateral raises and side lateral raises. This will help with your endurance and strength to hold up your gun and keep it stable. Grabbing a dumbbell or a weight plate and pushing it out and twisting the body to the right and or left. This will help strengthen and stabilize your core while strengthening the muscles you need for your draws.

The kicker – hold both arms out straight to your sides and rotate them for about 100 reps with or without weights. Now try it counterclockwise. Do the same thing with both arms out in front of you. Try not to shrug your shoulders. Tighten your core. This will build strength when holding your arms outstretched with your gun for long periods of time and will also increase your endurance.

Leg exercises – side lunges with weights. This will help with balance, control, and your transitions back and forth while running and gunning.

KD – Any other future goals or ambitions that you want to share?

Jl – I would love to own a fitness facility where we can do yoga, cycling, reformer Pilates, and boot camp all in one location. Maybe even incorporate a rehabilitation area for targeting specific injuries with specific specialists. A one-stop shop for fitness. Aside from continuing to perfect my brand as a shooter, I aspire to someday become a mommy and start a family.

KD – Thank you so much for letting us get to know you and for sharing some amazing fitness tips for shooting. Anything else you want to share with our readers?

Jl – Yes! GUNS AND YOGA. And thank you Taran Tactical for everything that you have done for me, for others, for Hollywood, and for the community. Woot woot!

Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

Econo-IFAK (at right in photo) **P60-43379 \$15.00**
 Micro Kit #2 (at left in photo) **P60-43378 30.00**

TRUST YOURSELF. TRUST YOUR TOOLS. BE READY FOR EVERYTHING.

From clearing brush to making kindling, the Camp 10 is the ideal outdoor and survival tool. Cut, slash, hack, split, scrape – just about any task you ask of it, the Camp 10 can handle. The full-tang Camp 10 is made of carbon tool steel for toughness and wear resistance. A basic black powdercoat protects the steel and makes maintenance easier. You'll like the secure, contoured grip of the Camp 10, too. The handle has a built-in hand guard and is drilled in both front and rear so you can attach a lanyard either place – or both – for carrying versatility.

Blade length: 10" Overall Length 16" Weight, with Sheath 1 lb. 8 oz.

P60-55012 \$80.99

Military knives have a lot of history and a lot of fans. Yet they tend to be bulky for everyday carrying and use. Kershaw and custom knifemaker Les George offer a solution by taking inspiration from a U.S. World War II knife design and turning it into the XCOM folder.

Blade length: 3.6" Closed: 4.4" Open: 8"

P60-55009 \$49.99

The Kershaw Faultline is the one you add to your truck box, toss in your go-bag, or slip into the pocket of your tactical pants. Everything about it says, "practical, reliable, and sturdy." Made of quality 8Cr13MoV stainless steel.

Blade length: 3" Closed: 4" Open: 7"

P60-55011 \$46.99

Designed by Dmitry Sinkevich, the Atmos features Sinkevich's characteristic clean and practical design – but enhanced with extra detailing. In addition to the chamfered carbon-fiber, it also has a custom oversized pivot, a backspacer with wide lanyard attachment, and a reversible, deep-carry pocketclip.

Blade length: 3" Closed: 4" Open: 6.9"

P60-55010 \$57.99

Key chains just got even handier with the new PT-2 key chain tool. It offers eight handy functions in a very compact space. The PT-2 (Pry Tool-2) comes in at less than an ounce as well and offers a bottle opener and cap lifter, a pry bar, two screwdriver tips, a wire scraper, and three sizes of hex drives.

Overall Length 3.25" Weight 0.8 oz.

P60-55013 \$11.99

Hornady Rechargeable Dehumidifier

Absorb humidity and prevent rust or mildew in gun safes or other enclosed areas. Moisture-control crystals change color when unit needs recharging. Recharge by plugging into 110V electrical outlet.

Product Features:

- Safeguards firearms and other valuables from mold and mildew.
- Eliminates humidity in enclosed spaces up to 333 cubic feet.
- Quick-connect bracket makes mounting unit easy in gun safes, closets or pantries.
- Removes humidity without electricity or batteries.
- Color-shifting moisture-control crystals signal when recharging is necessary.
- Simply plug in to dry out crystals and recharge unit for renewed effectiveness.
- Contains no harmful chemicals – child, pet and home safe.

P60-66702 \$19.99

Made in the USA (Tacoma, WA) by a company that prides itself on hiring veterans. (See Page 3 for more info.)

P60-00025 \$22.50

Dillon Precision Morale Patch P60-13762 \$4.95

SUPERHEROES!

The real ones are not in the movies.

There's a little real life superhero in all of us. Whether we have officially pledged to protect and defend...or if we are primarily concerned about the welfare of our loved ones...or if we just want to be prepared for any emergency. But, in order to be the best superheroes we can be, it's critical that we choose the very best tools that we can use, when needed, with ultimate effectiveness and confidence. We have some super solutions.

Les Baer Custom is the unchallenged leader in the design and production of custom 1911 pistols. More than a quarter-century ago we introduced state-of-the-art manufacturing methods, real hand assembly, and the use of top of the line accessories and other enhancements to ensure that our custom 1911s deliver the very highest standards of quality and performance. With multiple barrel lengths, frame sizes, several popular finishes and a choice of five calibers, there are more than forty Les Baer Custom 1911 models from which to choose, so you are sure to find one for virtually any purpose or preference.

No matter what kind of superhero you are.

Some of our most popular models include:

Baer 1911 Premier II[®], 5" or 6"

.45 ACP, 9mm, 10mm, .38 Super, .40 S&W

The flagship of the Baer Custom line, now available in four calibers, two barrel lengths, and multiple variations.

NEW! Baer 1911 GUNSITE Pistol, 5"

.45 ACP

In honor of America's premier shooting academy.

NEW! Baer 1911 KENAI Pistol, 5"

10mm

The only 1911 pistol that honors the Great State of Alaska.

Baer 1911 BOSS .45, 5"

.45 ACP

A high performance tribute to the 1970s muscle car that inspired it: The Boss 429 Mustang.

Baer 1911 Black Bear, 4 1/4"

9mm

Perfect compact carry size with shortened slide. 9mm chambering for increased capacity.
