# Which Dillon is Right for YOU?

Page 28

## Square Deal B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W Long to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 24

## RL 550C

The World's Most Versatile Reloader, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 750

Truly the state of the art, our XL 750 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular automatic pistol and rifle calibers.

Page 16

## Super 1050

Our highest-production-rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

Page 12

## RL 1100

Our newest reloader features an innovative eccentric bearing drive system that means smoother operation with less effort, along with an upgraded primer pocket swager. Loads up to .308 Win./7.62x51 cartridges.

**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

# Dillon's Bill of Rights for Reloaders

**All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:**

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

**Editor's Note:** The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered. We constantly strive to live up to his standards. Please let us know if we're not succeeding.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# CP 2000<sup>^</sup>

## Dillon's First DEDICATED Case-Processing Machine!

- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Higher Throughput, Lower Cost Per Case
- Heavier Frame for Greater Rigidity
- Seven Threaded Stations for More Flexibility
- Upgraded Primer Pocket Swager
- Primer Pocket Swage Available in Two Stations
- User-Replaceable Swage Rod Tip
- Reinforced Toolhead Bolt & Washer
- Improved Shellplate Indexing System
- Processing Speed up to 2000 Cases Per Hour

Designed to complement our RL 1100 and Super 1050, the CP 2000 offers higher speed, greater versatility and added case processing capability...all at a much lower cost than dedicating a RELOADING machine to prep brass! If you're loading mass quantities of ammo, the CP 2000 will make your task MUCH easier.

# Rapid Trim 1500 Case Trimmer<sup>^</sup>

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P76-62164** is **\$349.99**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P76-13141**, are **\$20.99** each. Upper lock rings, **P76-13559**, are **\$6.99** each.

## MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# Case Preparation Equipment

## Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator<sup>▲</sup> P76-20675 \$81.99  
 CM-500 Case/Media Separator<sup>▲</sup> P76-21045 \$49.99

### CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

### Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works

great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

### Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

CV 2001<sup>▲</sup>, US 110v P76-20493 \$199.99  
 CV-750<sup>▲</sup>, US 110v P76-19455 149.99

 Euro 220v CV-750<sup>▲</sup> P76-19473 174.99

**Rapid Polish 290** is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*  
 Rapid Polish 290  
 8 oz. bottle. P76-13804 \$9.99  
 Case (20 pc.) P76-20255 149.99

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle P76-13733 \$14.99  
 Case (20 pc.) P76-20256 209.99  
 10 bottles of polish/10 of lube<sup>▲</sup>  
 Case (20 pc.) P76-21375 \$179.99

## Don't Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass.  
 15-pound bag P76-13287 \$23.99

Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new!  
 10-pound bag P76-13496 \$15.99

# Henry's

## By Oleg Volk

When Benjamin Tyler Henry designed his famous 1860 lever action, he probably didn't think that variations on his theme would still be played to ever-growing appreciative audiences a whopping 160 years later. The newest Henry Big Boy X Model, while in every way a modern rifle, has some incidental similarities with America's great-great-grand-rifle.

Both rifles are nominally .44 caliber, though the 1860 model chambered a rimfire cartridge with a .446 heeled bullet and the 2020 model shoots the celebrated .44 Magnum. With similar bullet weight, the Magnum rifle delivers three times the energy at the muzzle! Both rifles have iron sights, but the older gun has the rear ladder graduated to 500 yards in a fit of wild optimism, while the modern gun relies on the longer point-blank range with fixed rear sight...and a provision to mount optics for long-range accuracy. The rear sight can be adjusted for windage and elevation, but that requires tools and cannot be done for every new target as with the ladder sight. Both use tube magazines, but the X Model's magazine is enclosed against dirt and

doesn't suffer from the follower interfering with the support hand. Both magazines can be loaded through the front, but the X Model adds a sidegate to allow topping off of the tube and loading on the move too.

A low-power variable scope (Weaver 1-3x) provides speed up close and precision further out.

Done in all black, with synthetic furniture, the X rifle isn't flashy but purposeful. The magazine holds seven rounds, and carrying with the hammer down on a loaded chamber is perfectly safe. The barrel comes threaded 5/8"x24 for a sound suppressor or other muzzle devices. The stock and the forend sport molded-in sling swivels, and the cushioned buttplate is amazingly effective at dampening recoil. The forend features a Picatinny rail for a light, laser or a bipod, as well as two M-Lok slots on the sides. I placed a Viridian X5L light/laser combo ([viridian-weapontech.com](http://viridian-weapontech.com)) on mine, mounted up a 1-3x Weaver ([weaveroptics.com](http://weaveroptics.com)) scope in a single-piece Talley ([talleymanufacturing.com](http://talleymanufacturing.com)) mount, and added a Kaw Valley Pre-

cision linear compensator on the muzzle. While I own a very lightweight Bowers Vers 458 sound suppressor, I am still waiting for the tax stamp and can only shoot it suppressed with my SOT present.

# Big Boy X Model .44 Mag.

Low felt recoil makes this rifle suitable for all shooters.

With 200-grain .44 Special ammunition, the rifle feels like a .22 LR. The report and the push are just that minimal. Depending on the brand, defensive .44 Special bullets still exit at 1100 to 1350 fps – if you want subsonics for use with the suppressor, cowboy loads are the way to go. With .44 Magnum ammunition, recoil is present but it remains minimal. The report is there as well, but mainly the bullet flight noise. Bowers Vers 458 ([bowersgroup.com](http://bowersgroup.com)) has enough volume to make the report ear safe outdoors, where the supersonic shockwave doesn't get reflected. I expected the large suppressor to make the rifle front-heavy, but at 23 ounces it did not. The suppressor did obscure the sights, but fiberoptic inserts make it possible to use them with both eyes open and hit a person-sized target out to 50 yards at least. Mounting the scope raised the line of sight above the suppressor circumference. In addition to attenuating the report, a sound suppressor converts about 40 percent of the peak recoil into heat, reducing the kick from mild to symbolic even with the hottest loads. The rifle doesn't heat up much but the suppressor does after about 25 shots. For now, I'm using

the smallest of the Kaw Valley Precision ([kawvalleyprecision.com](http://kawvalleyprecision.com)) linear compensators to avoid blocking the magazine tube from the front: turns out it's effective enough at channeling the report away from the shooter.

Kaw Valley Precision's linear compensator channels muzzle blast away from the shooter. The Viridian X5L light/laser is an ideal accessory.

Like .357 Magnum, .44 Magnum gains quite a bit with the 17.4-inch barrel. Steinel 225-grain deer loads designed for handguns went from 1200 fps out of 6-inch revolver to nearly 2200 fps. Hornady FTX of the same weight, a little less optimized for shorter barrels, jumped from 1400 fps to 1870 fps! Federal Vital Shock 280-grain JHP rated at 1170 fps from pistols flew at 1450 fps. Prvi Partisan 240-grain JSP is a hot load exceeding 1540 fps from a revolver, and it reached 1700 fps from the 17.4" barrel. My own handloads made with H110 and 240-grain Hornady XTP and Sierra JHC bullets clocked 1750 fps. With my Henry X Model, even with the hottest .44 Magnum, the kick was minimal even by my recoil-averse

standard. All X series rifles – .44 Magnum, .45 Colt and .357 Magnum – weigh about the same at 7.3 lbs. With .38 Special, recoil and report should be imperceptible.

# Dillon Die Sets

## Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

## Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

## Crimp Die (Pistol)

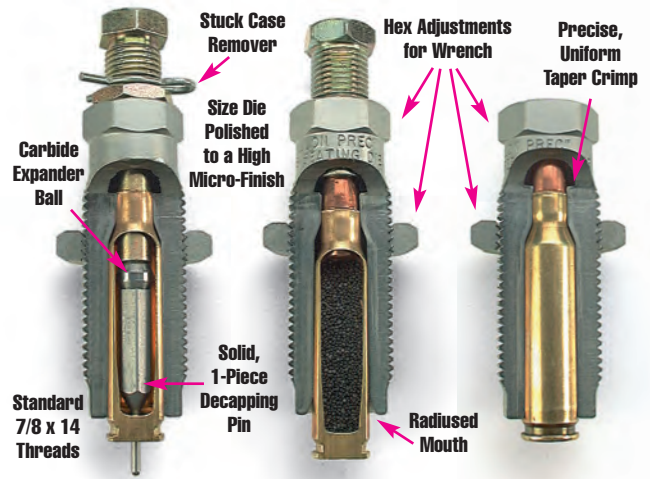

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

## Dillon Carbide Pistol Dies (Three-Die Sets)

## Spare Decapping Pins

Package of 10	P76-21528	\$7.99
---------------	-----------	--------

## Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

## Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

## Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

# Mr. Bulletfeeder<sup>®</sup>

## by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

# NEW! Be a Certified Reloader!

Learn "How-to" make SAFE hand loaded ammunition specifically for YOUR Needs!

This course is far more in depth than any other reloading course on the market. Renowned cartridge designer, gunsmith, and AGI instructor Fred Zeglin addresses reloading from its most basic fundamentals to advanced techniques. *This allows the new reloader to begin the process almost immediately with confidence and safety.*

Popular tools offered by numerous manufacturers of reloading gear are demonstrated and explained in detail. What makes a safe, accurate reload and simple tricks that will save you hours of trial and error at the reloading bench and range. Also covers bullet casting techniques and advanced precision reloading for long range shooting.

Most people learn reloading strictly from a mechanical 'monkey see, monkey do' view point. In other words, nobody ever completely explains to them WHY operations are performed a certain way or WHAT value they have. **In this course Fred teaches you, from a gunsmith's perspective, the "how's" and "why's" of reloading.**

*This information will make you a well informed reloader and, if you're a gunsmith, will help aid in diagnosing problems with your clients' reloads and guns.*

Any reloader whether novice, intermediate, or experienced will benefit from the clear explanations. The concepts of internal and external ballistics are dealt with in a way to aid the reloader in making smart choices; both in purchasing tools and in producing safe, quality ammunition with them.

# Get 2

memory down, I like to be intentional about every shot.

## 4. How many rounds a year do you shoot on average?

**Will:** On a good year, I would say 8,000-10,000 rounds.

**Jeremy:** Easily 6000-8000.

## 5. Most useless thing you own?

**Will:** A yoga mat.

**Jeremy:** That's tough, I'm pretty good about shedding stuff I don't have a use for. Maybe the weight set I always say I'm going to use to get swoll this year?

## 6. What else do you do for fun?

**Will:** Honestly, anything that gets the heart racing and blood flowing. I am basically an adrenaline junkie.

**Jeremy:** I love to play first person shooter video games. I've always loved the fast twitch, fast focus, problem solving that comes with them. I was able to really develop my skills on focusing and adapting quickly early on with these types of games.

## 7. Favorite place on Earth?

**Will:** My favorite place would be Kauai, Hawaii.

**Jeremy:** Pololu Valley, Hawaii. It literally looks like you just walked into Jurassic Park.

## 8. Most annoying thing about you?

**Will:** I am a creature of habit and stuck in my ways.

**Jeremy:** I don't often have patience for small talk or wasting time, so it's easier for me to cut

## Will Renke @willrenke

### 1. First gun you ever fired?

**Will:** A Savage/Fox .410 side by side.

**Jeremy:** Ruger Mark III from my dad who taught me how to shoot and respect firearms.

### 2. What's your favorite gun?

**Will:** My favorite gun would have to be the MP5.

**Jeremy:** Heckler and Koch MP5. The living legend, this gun was the very first firearm that I saw in films and games that I knew I had to own.

### 3. Do you have any rituals before you shoot?

**Will:** The biggest part of my ritual before going into a match would be gear placement and air reloading.

**Jeremy:** I go through my firearms that I am shooting for that day, checking for any potential issues. Depending on what I am doing, I like to load my mags at the range. Prior to shooting, I dry fire a few times to make sure I am pressing without pulling. I also go from ready to aiming multiple times to get my cheek weld muscle

# Will Renke

# Know

**Jeremy Tremp** @jeremytremp.guns

to the chase with candor. Sometimes gets me in trouble!

## 9. Craziest thing you've ever done?

**Will:** I tried to clear a triple on a CR125, and I came extremely short. Breaking a lot of bones was the outcome.

**Jeremy:** Parkour for sure, I used to captain a team called Motion Militia from 2009-2012.

## 10. Dream job?

**Will:** Exactly what I do now, because it enables me to have the freedom to work on my own schedule and be creative in my own space.

**Jeremy:** What I do now! Firearms marketing is the coolest thing I could do. I get to work with some of the coolest, most prestigious manufactures on earth.

## 11. Who has inspired you the most?

**Will:** My grandpa (Pop). Always teaching me to never be the "should-of, would-of, could-of" type of guy.

**Jeremy:** I get inspired by others who are kicking ass in their field. I love to see others do well, it shows me that I cannot rest on my laurels or get stagnant, I must continue to learn, improve and help others do the same. Seeing the fruits of that is extremely rewarding. If I had to pick a person it would be my Dad, his perseverance through adversity is second to none.

## 12. Who would play you in a movie?

**Will:** Dwayne "The Rock" Johnson.

**Jeremy:** Adam Levine, I've been told I look like him? Guess that's not a bad thing! He's got some pipes, too.

## 13. If you could have a conversation with anyone from the past, who would it be?

**Will:** Probably JFK because he was a young playboy who became the president. He had so much on him, and to live that life would have been crazy. I think it would be really intriguing to learn about his story.

**Jeremy:** Nikola Tesla. The dude had to have known some hush-hush stuff.

## 14. Who's in your regular crew?

**Will:** The crew is very tight knit and mainly includes my business partner Ben Stacy.

**Jeremy:** Scott Conditt, my creative brother in crime, and Jared Tremp, my literal brother who keeps us in line at Offensive Marketing Group.

## 15. Words to live by?

**Will:** "Love many, trust few, but always paddle your own canoe."

**Jeremy:** Do what you say and say what you mean.

# BL 550<sup>^</sup>

## Dillon's Basic Loader

**\$299<sup>99</sup>**

**P76-15399**

Reloading Dies and Caliber Conversions sold separately

Pictured with optional accessories:  
Strong Mount P76-22051 \$58.99

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of

versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 25) makes it quick, easy and inexpensive to change calibers. The additional toolheads are \$27.99 each, or \$25.99 each if you

buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them. A powder measure adapter is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

**AUTO PRIME SYSTEM<sup>^</sup>** P76-16627 \$94.99

**PRIMER SYSTEM EARLY WARNING<sup>^</sup>**

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. P76-20302 \$29.99

**AUTO POWDER SYSTEM<sup>^</sup>**

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

P76-20251 \$99.99

**OPTIONAL MAGNUM RIFLE POWDER BAR**

P76-21353 \$34.99

**AUTO EJECT SYSTEM<sup>^</sup>**

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader.

P76-22120 \$35.99

**BL 550 POWDER DIE<sup>^</sup>**

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

**Powder Die:** P76-16629 \$21.99

**Oversize Die:** P76-16626 21.99

**Plastic Funnel:** P76-16617 7.99

**POWDER MEASURE ADAPTER**

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.)

P76-20029 \$26.99

**RL 450 Powder Die** P76-20308 25.99

## Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

Dimensions: 66" x 27.75"

# Dillon Reloading Accessories

**A Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come

with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

**Dillon's "Belted Magnum" Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

**P76-97126 \$169.99**

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

**P76-21044, \$71.99 each**  
**Three or more, \$65.99 ea.**

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

**P76-17950 \$49.99**

**Dillon's 1" Bench Wrench** fits our 1" Die Lock Rings which give you more space on the toolhead.

**P76-10842, \$9.99 each**  
**Two or more, \$8.99 ea.**

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications.

Available alone or in combination with a spare parts kit for your machine.

- Maintenance Kit Only **P76-22211 \$31.99**
- w/SDB Spare Parts Kit **P76-97015 39.99**
- w/550 Spare Parts Kit **P76-97016 37.99**
- w/750 Spare Parts Kit **P76-97500 58.99**
- w/1050 Spare Parts Kit **P76-97018 53.99**

## "D-TERMINATOR" Electronic Scale

- 1500 grain/100 gram capacity
- Accurate to 0.1 grain/0.01 gram
- Uses four AA batteries (included)
- Comes with its own AC adapter
- 100g scale check weight included

*NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.*

**\$139.99**  
**P76-10483**

## "ELIMINATOR" Balance-Beam Scale

**\$89.99**  
**P76-13480**

The **RF 100 Automatic Primer Filler** eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run! In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you! The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$59.99 each.

- Large Primer Filler **P76-97077 \$379.99**
- Small Primer Filler **P76-97111 379.99**
- Large (Euro. 220v) **P76-97112 389.99**
- Small (Euro. 220v) **P76-97113 389.99**
- Small Conversion **P76-17903 59.99**
- Large Conversion **P76-17902 59.99**
- Nylon Dust Cover **P76-11143 14.99**

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

**P76-19972 \$39.99**

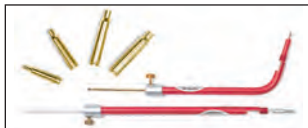

## Berry's Mfg. Bullet Puller<sup>^</sup>

Nobody's perfect. A bullet puller makes it easy to recover all your components.

Bullet Puller<sup>^</sup> **P76-17999 \$29.99**  
 Puller Cap<sup>^</sup> **P76-17948 4.99**  
 Collet Set **P76-17947 5.99**  
 Inset: Quinetics Uni-Chuck "Shim-Fit" **P76-30041 11.99**

## Hornady O.A.L. Gauge and Bullet Comparator

**Overall Length Gauge<sup>^</sup>**  
 The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy.

Straight **P76-14622 \$38.99**  
 Curved (for auto, lever and pump rifles) **P76-14862 \$39.99**

**Modified Case<sup>^</sup> (required)**  
**\$6.99 each**

.223 Rem. **P76-14627**  
 .22-250 **P76-14628**  
 .243 Win. **P76-14631**  
 .270 Win. **P76-14641**  
 7mm Rem. Mag. **P76-14648**  
 .308 Win. **P76-14652**  
 .30-06 **P76-14653**  
 .300 Win. Mag. **P76-14655**

**Bullet Comparator**  
 Correct bullet seating depth is critical to accuracy. In addition, minor variations in bullet seating depth will have an effect on both pressure and velocity.

Bullet Comparator **P76-14670 \$16.99**

**Comparator Insert (required)**  
**\$8.99 each**

.22 caliber **P76-14672**

# RCBS Trim Pro 2 Manual Case Trimmer

The RCBS Trim Pro-2 manual case trimmer features a spring-loaded "universal" shell holder that will accommodate case head diameters from .250" to .625". Comes with pilot calibers: .22, .24, .25, .27, .28, .30, .35, .44 and .45.

RCBS Trim Pro-2<sup>TM</sup> Case Trimmer P76-43231 \$139.99

# Lyman Products

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

P76-11389 \$39.99

The Lyman Scale Weight Check Set enables you to check/calibrate your scale using known weights. Weight Set .5 - 210.5 Gr.

P76-15959 \$49.99

## CED Ultimate Pro Powder Trickler

- Adjustable height
- Weighted base
- Extension arm

\$21.99  
P76-10940

## Lyman Powder Pal Funnel Pan

P76-18399 \$7.99

**WARNING:** These products contain lead, which is known to cause birth defects, other reproductive harm and cancer. Handling components, ammunition, cleaning firearms or discharging firearms in poorly ventilated areas may result in lead exposure. Have adequate ventilation at all times and wash your hands thoroughly after exposure.

## Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with

the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

## Dillon's 1" Bench Wrench

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you're setting up a "naked" machine, there's plenty of room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead. We've addressed this in two ways. We offer 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our 1" wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. All our lock rings fit any standard 7/8" x 14 dies.

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

"SL 900" Bin	P76-17125	10.50	56.94	106.92

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# Precision Rifle Loading on a Dillon 550

## Part 2: Loading

By John Kleespies

Throughout my 15 years of reloading, I've been told over and over again that the crafting of precision rifle ammunition falls under the sole domain of the single-stage press. Precision reloaders 'round the world know, however, that single stages are time-consuming monsters. I've always questioned the "fact" that precision rifle couldn't be accomplished with my Dillon RL 550 progressive, so I finally committed to putting this old wives' tale to the test.

Dillon progressives can be run in fully progressive mode to mass produce bottlenecked rifle cartridges, of course, but mass production wasn't my focus with this experiment. The reality of the matter is that if brass runs uninterrupted from the "empties" to "loaded" trays, then the hand loader is skipping a magic part of the precision-loading process: case prep. Hence, throughout my long hours standing in front of the single stage, I've theorized about a progressive process that could deliver a case prepped, accurate product.

To assess the feasibility of my Dillon for precision rifle, then, I utilized a method of loading that I will refer to as the "Hybrid" method. This mode of production results in rifle rounds intended to meet or exceed the quality control standards of rounds crafted with the sort of volume powder dispenser intended to accompany single-stage presses. I will also theorize on a second type of precision loading which I will refer to as the "Hybrid-Trickle" method. Because the Hybrid-Trickle method will sustain the same measurement data that I derived via the standard Hybrid method, I only pulled data on the Hybrid method for this article.

My Hybrid and single-stage data gathering used statistically relevant 30-round batches of ammunition loaded with the same full-length carbide dies, .308 Winchester Lapua brass, CCI primers, Alliant RE-15 powder, and 175-grain Sierra MatchKings. For the single stage, I loaded on the ubiquitous RCBS RockChucker II press, whose longevity, durability, and repeatability have arguably made it the most popularly used single-stage press in the world.

I wanted to limit my testing to finished-product

measurements only, so I analyzed three specific areas on the finished rounds. In order of the loading process, I ran a "feel test" on the primer seating depth consistency of the Dillon automatic priming system versus my RCBS automatic bench priming tool: those results are easy to report, as both methods provided identically perfect primer seating depths. I also performed a thorough powder-dispenser test that I explored in detail within my previous article entitled "Precision Rifle Loading on a Dillon 550, Part 1: Powder Measurement," and so those results will be left to that article. Finally, I measured the consistency of bullet seating depth between the two types of presses, the

results of which I will save for later in this article.

As always, the operator begins with clean brass that is lubed for sizing. The brass is then run through station #1 for sizing and primer decapping...and then removed from the progressive machine prior to priming. This is where "the Hybrid part" comes into play, in that the RL 550B is essentially treated like a single-stage press during this beginning part of the loading process.

If the marksman intends to fire-form and neck-size his brass after the initial reloading, then it may be wise to invest in additional toolheads to house only decapping dies: in other words, full-length sizer on one toolhead, neck sizer on a separate toolhead, and then the powder

and seating dies grouped together onto their very own toolhead. This will avoid any confusion about which sizer was left on the machine after the last loading session. Personally, I keep my sizing dies separated for yet another reason that I will explore later.

With the brass sized, then, the Hybrid method allowed me to prep the cases for precision rifle in the same manner as I would during single-stage press loading. To start, flash hole uniforming occurred, and while no crimps existed in this Lapua brass, swaging of the primer pockets can take place here if necessary.

In the case of previously fired brass, bottleneck case length should always be checked and trimmed if needed. Some choose to set up a separate toolhead with a Dillon universal depriming die and the RT 1500 trimmer.

**Dillon offers a fixed powder die and plastic powder funnel for those who wish to weigh every powder charge.**

I also cleaned the sized and decapped brass a second time: thereby messy lube was removed, and the primer pockets received a proper scrubbing of carbon and any possible debris left over from the uniforming process. After trimming would also be the time to weigh and sort the brass – and bullets – if the precision loader wants to go all out.

Once cases are prepped to satisfaction, the brass can be run through the Dillon 550 in a typically progressive fashion...as long as the operator is careful to not re-run his previously sized – and now unlubed – brass through the full-length sizing die still installed on the toolhead. That would be bad. Very bad! This is another reason why I choose to keep my sizing die separated from the other stations.

Using this Hybrid method with my RL 550, I was able to produce some very nicely measured rounds – see the accompanying chart, which compares the Overall Length (OAL) of my progressively produced Hybrid ammunition to rounds loaded on the RockChucker II. Measurements were taken off the ogive using a bullet comparator and digital calipers set to zero at 2.80" OAL. While both presses performed admirably at maintaining a consistent seating depth, the Dillon RL 550's extreme spread of -.004" to .002" and standard deviation of a mere .002 pretty much destroyed the single-stage press' spread of -.005" to .011" and standard deviation of .005.

Combining these seating depth numbers with the Dillon's efficiency of production, there's no doubt as to which press I'll use in the future. Yet, there's still one more "next level" option in the Hybrid arsenal that demands exploring: the Hybrid-Trickle method.

This mode is really not much different from the standard Hybrid method...but it will be slower. All

the steps from the Hybrid method are repeated on the Dillon progressive machine with the exception of how the powder station is employed.

A precision shooter who wishes to handload the most accurate rounds possible will likely be willing to invest his time in trickling powder to ensure perfect charge weights. This being the case, the powder dispenser can be removed from the press while leaving the die and internal funnel installed. When the press is in the raised position, precisely measured powder can be poured into the awaiting brass through the Dillon Automatic Powder Measure's dispenser funnel. For this, Dillon offers a fixed powder die (#16629) and plastic powder funnel (#16617).

In this manner, the progressive operator can craft precision loads that take advantage of the Dillon's remarkably consistent seating depth while also enjoying perfectly weighed charges: a combination that represents the Holy Grail of precision handloading.

This method, while slower than the standard Hybrid method, will still provide a major bump in speed over single-stage loading by incorporating the efficiency of an automated primer system with the assembly line placement of brass through all but the first station.

I've been blindly handloading for my precision rifle with the single stage for way too many years, missing out on the Dillon's

exceptional seating depth capabilities and superior powder measure...all due to an old wives' tale that I could have disproven long ago. Furthermore, the Hybrid-Trickle method has the potential to shift my precision reloading to a level that – apparently! – I've never taken it to before.

I can hardly wait to fireform these loads and then put the Hybrid-Trickle method through its paces with neck-sized brass!

# "Big Fifty" <sup>^</sup>

## STANDARD FEATURES:

- Made in the USA
- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...

# John Marshall on Classic Firearms:

On August 18, 1863, 30-year-old Christopher M. Spencer grabbed a unique repeating firearm and a supply of cartridges and walked into the White House. Although the U.S. Civil War was raging and the country was still burying its dead from the epic battle of Gettysburg, Spencer strode past sentries and walked right into Abraham Lincoln's oval office to keep his scheduled appointment. I'm guessing that even with an ongoing war, presidential security was not quite as stringent as it has become in modern times!

Spencer had invented the gun he was carrying, which was already in limited initial production (it had first been used in battle at Gettysburg). However, the Union Army's Bureau of Ordnance had repeatedly rejected its official adoption. Spencer was not to be deterred, and was determined to go right to the top in order to provide the Army with an effective multi-shot weapon in that age of muzzle-loading single-shot rifles. He had heard that Lincoln had some doubts about his gun, garnered from a previous test fir-

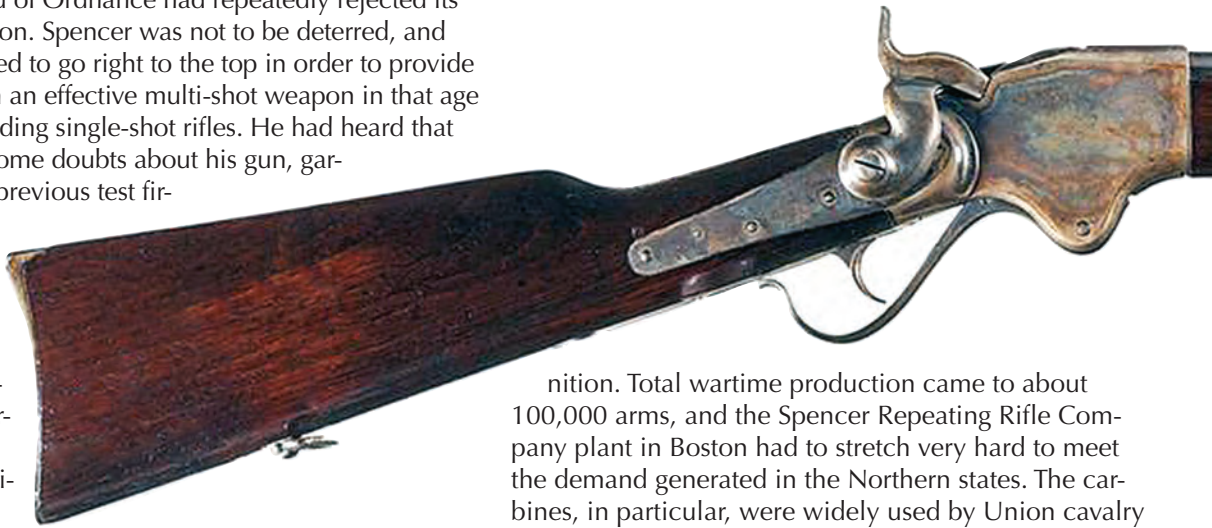

ing of an apparently defective example in July, and he wanted to dispel any unwarranted concerns the President might have had.

Intrigued by the brashness and enthusiasm of the young inventor, Lincoln invited Spencer to sit down and talk. This they did, and Lincoln was shown the new lever-action firearm hands-on. Spencer even fieldstripped it to show the President its parts and how it operated. Following the discussion, the President agreed to a firing demonstration. He immediately arranged to have one convened the next day on the weed-filled area behind the White House, not far from the Washington Monument, which was then still under construction.

The next afternoon, Spencer returned with his new repeating weapon. Lincoln greeted him, along with Secretary of War Edwin Stanton and a small number of other officials. The group walked over to the "test site" where a wooden board had been set up as a target, painted with a crude bullseye. From 40 yards away, Lincoln addressed the target, Spencer's loaded gun in his hands. He fired seven consecutive shots in quick succession, hitting the bullseye on the second shot. To say that the President was impressed would be putting

it mildly. He enthusiastically commented on the gun's accuracy and efficiency. To commemorate the occasion, Lincoln presented Spencer with a portion of the board when they walked back to the White House. He then arranged another test firing the next day with John Hay, one of his two personal secretaries. Hay found the gun quite satisfactory, calling it "...a wonderful gun, loading with absolutely contemptible simplicity and ease with seven balls and firing the whole readily and deliberately in less than half a minute."

The rest of this story is that the Union subsequently made an initial order for 13,171 Spencer rifles and carbines, together with about 58 million rounds of ammu-

munition. Total wartime production came to about 100,000 arms, and the Spencer Repeating Rifle Company plant in Boston had to stretch very hard to meet the demand generated in the Northern states. The carbines, in particular, were widely used by Union cavalry units, with General George Custer being an enthusiastic supporter. General Ulysses S. Grant was of the opinion that the Spencer guns were "...the best breech-loading arms available."

While both rifles and carbines were made, the stubby carbines met with almost universal praise in their role as cavalry weapons. They were robust, rugged and not easily damaged. The feeding mechanism was a spring-loaded tube in the stock, where it was protected against vigorous usage in combat. The receiver was relatively flat, making it ideal for close carry while on a horse. The arm could be quickly replenished with seven rounds when used with any of the (usually) 10 handy pre-loaded tin tubes carried in a slung leather carrying case – the Blakeslee cartridge box. This was the invention of Erastus Blakeslee, a member of the 1st Connecticut Volunteer Cavalry, who obtained a patent on the concept.

Officially called the Spencer Repeating Rifle, the rifles and carbines most used during the Civil War were designated as the Models of 1860, the year the design was finalized by Spencer. All were chambered for the

# The Civil War Model 1860 Spencer Carbine

56-56 Spencer rimfire cartridge that had a case made of copper. This designation was unusual, in that the two numerals referred to the diameter of the case ahead of the rim and the diameter at the mouth of the case. The actual diameter of the 350-grain bullet varied from .54 to .555 caliber, depending on the manufacturer. Each cartridge was loaded with 45 grains of black powder, providing a muzzle velocity of about 1200 feet per second. The gun was loaded by removing an inner tube containing a coiled spring and a follower from the tubular magazine in the stock, then filling the magazine with seven rounds either individually or more quickly from a Blakeslee tube. The spring tube was next re-

ring and bar were located on the grip area of the left side. First issued in late 1863, the firepower of this new gun had a decidedly negative effect on the morale of opposing Confederate soldiers.

One of the great advantages of the Spencer rifles and carbines was that they utilized metallic self-contained cartridges, which were virtually waterproof. Sharps single-shot rifles of that time, although they were breech-loaders, used paper and linen cartridge components that could be soaked with water or destroyed by the shock of transportation in bouncing supply wagons. This made them useless in short order. Another advantage with the Spencers was that the Confederates could

not use captured Spencers for very long, as ammunition for them was simply not available in the South.

When all was said and done and the government contracts

General Ulysses S. Grant was of the opinion that the Spencer guns were "...the best breech-loading arms available."

inserted in the magazine behind the cartridges, pushed in to accept them, and locked in place by turning a flat projection at the end of the spring tube into a recess in the buttplate.

Pulling the underlever of the gun down rotated the breechblock back and down, clearing the way for a cartridge to be pressed forward by the magazine spring. Pulling the lever back up rotated the breechblock behind the cartridge, pushing it into the chamber. As the breechblock came into its forward position, a section of it was pushed up to lock everything in place solidly. It was a simple and effective design. Like most firearms of that era, the hammer had to be manually cocked. When the trigger was pulled, the hammer fell, hitting the firing pin, which ignited the primer compound in the rim of the cartridge, firing the gun. Operating the lever downward ejected the spent cartridge case, and the process was repeated to continue firing.

The carbine used by the Union cavalry had a 22-inch barrel compared to 30 inches for the rifle. It measured 39 inches long overall, ideal for horseback carry and quick deployment when dismounting. It weighed in at 8-1/4 pounds. A brass blade front sight was utilized, and the barrel-mounted folding rear sight was graduated for firing out to 800 yards. Sling swivels were attached to the buttstock and barrel band, and a sling

were completed at the end of 1865, 64,685 carbines had been delivered by the Spencer factory. Each carbine was also provided with a cleaning brush and thong, and a screwdriver for disassembly of the arm. Individual purchases swelled these impressive numbers even more. Arms factories in the South could never hope to match or even approach such feats.

Reports from the field on the use of Spencer carbines by Union cavalry units were quite impressive. During the Wilderness campaign, an action was fought at Parker's Store in a heavily wooded area. The 500 members of the Fifth New York Cavalry dismounted from their horses and formed a skirmish line when they were set upon by a full division of Confederate infantry. A raging battle ensued, and for three solid hours, the cavalymen held off repeated Southern attacks until they began to run out of ammunition for their Spencer carbines. They were then forced to pull back, but inflicted such mayhem on their foes that the Confederates in that battle believed that they had been fighting a full brigade!

On April 2, 1865, over 1,500 Union cavalymen, armed mostly with Spencers, attacked the entrenched Confederate defensive positions at Selma, Alabama. They first had to cover 600 yards of open fields, and then faced a barrier of sharpened cedar posts, more open space, a 5-foot-deep ditch, and a 15-foot embank-

# ODIN Ready Bag

ODIN Works introduces the new ODIN Ready Bag<sup>®</sup> (ORB)

featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease.

Whether you're going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

- Quick-release compression straps
- Four D-ring attachment points
- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: *Can remain in bag as a pocket or extend up through the zipper to fit longer barrels*
- Available in black or coyote brown
- Dimensions: 28" x 7" x 6"

# Henry's Big Boy X Model .44 Mag. Continued from Page 11

Augmented with a side loading port and fiberoptic sights, the Henry X Model works well as a defensive arm, too.

Accuracy? We have accuracy. I am not a great bench shooter, but 2 MOA seems to be about the ballpark for all loads I've tested. With 100-yard zero and the scope zoomed in to 3x, I was consistently able to hit a 3-inch spinner at 110 yards, the longest distance possible on my home range. With the scope set to 1x, I did rapid fire alternating between two steel silhouettes: the lead splashes all overlapped on one target despite the rough and rapid aiming. The rifle points very consistently, and the bolt travel is short enough

that the cheek weld can be kept between shots. In all but the brightest sunlight, the green laser permits a secondary aiming method out to the limits of my range. With the beam emitted below rather than above the barrel, the bullet hits high up to the zero distance (in my case 30 yards) and then drops below the point of aim. The drop isn't too drastic, so a body hit can be achieved with the laser illuminating the head.

For leisurely range loading, pulling the magazine follower is convenient. The same is true of unloading the magazine without cycling each cartridge through the action. For combat use, the sidegate is obviously superior. During gel testing, just popping individual cartridges into the ejection port seemed expedient. And speaking of gel results: pick your ammunition carefully. Some loads work equally well in revolvers and rifles, others perform differently.

Federal Vital-Shock, a hunting load using 280-grain Swift A-frame bullet, created a 0.65" wide hole that went from one gel block to the next for a total of 26 inches. The projectile stayed completely intact, just what you'd want for deer or boar. Federal .44 Special 200-grain hollow point semi-wadcutter sounded like a sneeze and expanded to 0.57" with 16 inches of pen-

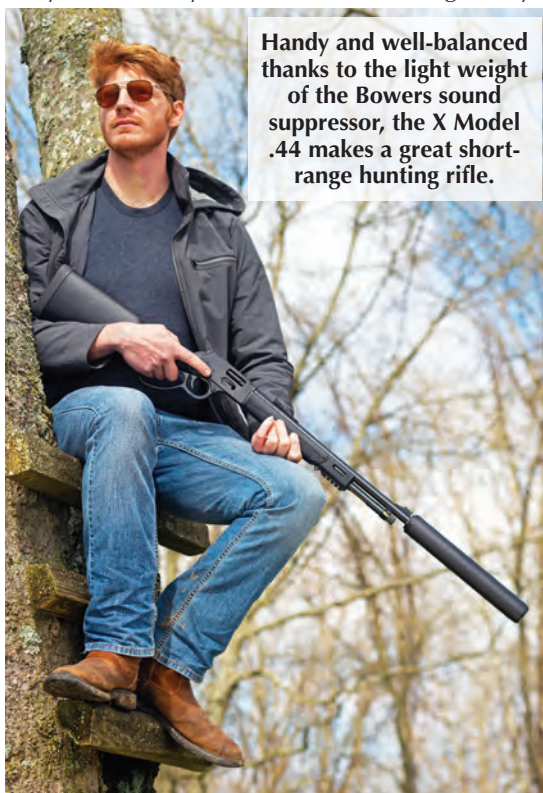

etration: not impressive but adequate. Hornady FTX 225 grain, though obviously meant for carbines with the red ballistic tip, fragmented violently. The largest piece of about 60 grains was found at 16-inch mark. Steinel 225-grain copper hollow point opened up and shed the petals. All six of the 14-15-grain petals were found 13 to 15 inches into the block, while the 140-grain cylindrical stem of the bullet punched through 32 inches of gel! My handloads both fragmented violently,

filling a 15-degree cone of gel with lead fragments out to 24 inches of depth: great for antipersonnel use, less than ideal for meat hunting.

.44 Magnum bullets fired from rifles slow down to their revolver speeds at around 100 yards. For deer hunting, the Steinel bullet would work very well from about 25 yards out to nearly 150, expanding past 1.1 inches. The Vital-Shock would expand slightly less farther out, penetrating slightly deeper at intermediate distances. Hornady FTX would likewise perform better at intermediate ranges. Both Federal and Steinel also make 300-grain hardcast loads for those who just want a caliber-size hole though the largest hog ever raised...lengthwise if necessary!

The Henry X Model brought modernity to lever actions. It boasts superior ergonomics and durability, combined with smooth handling and comfortable shooting. I have not encountered any sharp edges, my shoulder had no bruising from firing 80 or so rounds in a row, and my targets showed consistently tight groups. I would call that a win.

Henry Repeating Arms  
59 East 1st Street • Bayonne, NJ 07002  
[henryusa.com](http://henryusa.com) • 201-858-4400

Handy and well-balanced thanks to the light weight of the Bowers sound suppressor, the X Model .44 makes a great short-range hunting rifle.

# HYSKORE

## Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rack will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rack also means that two or more racks can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P76-10208 \$19.99

## Hornady Security Dehumidifiers

## DESI®PAK Desiccants

Absorb humidity and prevent rust or mildew in gun safes or other enclosed areas.

Moisture-control crystals change color when unit needs recharging. Recharge by plugging into 110V electrical outlet.

P76-66702 \$19.99

Protect your valuables against rust and corrosion.

When the moisture control crystals turn pink, recharge unit by placing it in the oven. Unlimited recharges ensure a lifetime of use.

P76-66701 \$19.99

These 532 gram DESI®PAK desiccants absorb moisture better than silica gel. It's an industrial grade material that exceeds the requirements of Mil Spec MIL-D-3464E. Now available in smaller packages for other applications (ammo cans, long-term storage containers, etc.).

ment. The Confederates poured artillery and rifle fire on the Yankees. The Union soldiers bore on, firing their Spencers rapidly. Up they went over all the obstacles, capturing the Southern positions while suffering about 300 casualties in the process. After Selma, they bore on to Macon, Georgia to discover that the war was over. It's believed that without their Spencers, that herculean task at Selma would never had been possible.

Late in the Civil War, a few changes were made to Spencer carbines being delivered to the Army, resulting in a name change from Model 1860 to Model 1865. New carbines were chambered for an updated standard rimfire cartridge, the 56-50. This ammo could chamber in the older carbines, but the older rounds would not work in the newer guns. These slightly modified arms were stamped "Model 1865" on the receiver, and the barrel length became shorter at 20 inches. In March 1865, new carbines were equipped with the Stabler magazine cut-off device, invented by Edward Stabler of Sandy Springs, Maryland. With it, the carbine could be fired as a single-shot, holding the cartridges in the magazine in reserve. After the war, Springfield Armory retrofitted about 12,000 Model 1860s to Model 1865 specifications.

In June of 1864, the Burnside Rifle Company was authorized to manufacture Spencer firearms to augment those made at Spencer's factory. Although Model 1860s were ordered, deliveries did not begin until April 1865, and 30,496 Burnside-manufactured Model 1865s were produced.

The M1865 Spencers remained in use into the mid-1870s. Unfortunately, Custer's 7th Cavalry did not get any, and were armed instead with single-shot Model 1873 trapdoor Springfield carbines. Well, you know what happened at the Battle of the Little Big Horn. Christopher Spencer himself died January 14, 1922 at age 88. His contribution to firearms technology during the Civil War was incredibly important and often pivotal.

Today, Spencer rifles (and especially carbines), are highly sought-after collector items and priced accordingly. They are some of the really classic firearms of the Civil War period. I used to own a Spencer carbine many years ago, but since I was then a neophyte in collecting, I regrettably let it go to an older gentleman who was salivating for it. Hindsight is always perfect, as they say!

Eric Grauffel wearing Dillon's TechwearUSA AirFlex Shooting Jersey.

## Dillon Teams Up With TechwearUSA

In response to everyone who has been asking us for Dillon Precision shooting jerseys, we've teamed up with **TechwearUSA** – Your Official Provider of Custom USPSA Gear!

The TechwearUSA AirFlex (\$70) is the ultimate performance layer and their lightest weight jersey. The TechwearUSA Premier Polo (\$95) is made of proprietary Techstatic fabric and is the ultimate competition polo. From its classic cut, added length to make sure it stays tucked in, fold-over collar, zipper front and side panels made from extra breathable mesh, every detail of this garment has been thought through to help you look, feel and perform at your best.

# Triumph Over Tragedy

## Maggie Reese Voigt

By **Kimie Dillon**

This month's **Blue Press** cover model has it all: fierce shooting talent, natural beauty and an engaging personality. Maggie Reese Voigt can easily be considered a "Professional Shooter Extraordinaire." Some of Maggie's many titles include:

- 2019 USSL Grand Champion – Lady Open;
- 2018 UML World Multi-Gun Championships – Overall Lady Champion;
- 2017 IPSC World Rifle Shoot – Gold – Open Ladies Team;
- 2016 US-IPSC Handgun Champion – Ladies Single Stack;
- 4-time National Ladies Champion USPSA Multi-Gun (2017, 2015, 2010, 2009);
- 2-time National Team Member IPSC World Handgun (2014 Bronze Ladies Production, 2011 Silver Ladies Production); and
- Multi-time Ladies Champion at Superstition Mountain Mystery 3 Gun, MGM IronMan 3 Gun and Rocky Mountain 3 Gun.

**IMPRESSIVE!**

**KD** – Growing up, did you have an interest in shooting? If not, what were your interests and hobbies?

**MR** – No, I didn't shoot my first gun until I was 18 years old! I never played sports so I was not what you would consider athletic or competitive. I was very shy and quiet. I loved to read.

**KD** – Tell us how you became involved in shooting? What made you initially attracted to shooting vs. other sports?

**MR** – It was really just happenstance. My dad talked me into joining him at the range one day and I instantly fell in love with

shooting. It inspired something inside of me that I had never felt before. A competitiveness, a desire to prove myself. People often say that shooting a gun can be empowering and I guess that was true for me too.

**KD** – How did you and Michael Voigt meet? Tell us a bit about you as a couple.

**MR** – Mike and I met on the range at a local USPSA match. I had been shooting for some years at that point but mostly bowling pin style or man versus man steel matches. I was very new to the nationally organized shooting sports. When I first met Mike I didn't know who he was or even that he was president of USPSA! But a couple of months later we ended up being squadded together at USPSA's Area 2 Regional Championship and we really clicked over the weekend. We exchanged phone numbers and as they say the rest is history....

**KD** – What year did you get married?

**MR** – We married in 2016 but we had been together since 2007.

**KD** – What was your life like for two married, top-level competitive shooters? Did you get to primarily travel together? Or were you constantly going in different directions with sponsor and schedule obligations, etc.?

**MR** – In the early years of our relationship we almost always traveled together. It was amazing! While Mike was already a well-known World Champion at that point, everything was new to me. So not only was I experiencing so many incredible moments on the competition circuit, but I got to share it with my amazing partner who helped guide me through everything. Later on our careers did take us a little bit in different directions but we still hit all the major matches together. We got to travel to so many amazing places and I have such incredible memories to look back on. Mike passed away in 2018 but he is still very much a part of everything I do. I am constantly inspired by him and the lasting legacy that he left in the shooting community. Mike is my inspiration everyday to keep going and train harder, get that next "W" and be the best ambassador for the sport I can be.

Maggie and Mike Voigt at the 2014 IPSC Handgun World Shoot in Frostproof, Florida. Kippi Leatham photo.

*In 2018, the world lost one of the best 3-Gun shooters in history. Mike Voigt was a long-time USPSA President and was one of the nicest guys you could ever meet. In his early days, Mike, Arnt Magne Myhre*

*and Rob Leatham all competed together in the Chevrolet Sportsman's Team Challenge shooting tournaments. Our own beloved Mike Dillon believed in them and sponsored them. Maggie is dedicated to preserving his legacy and the incredible accomplishments he made in his career.*

• • •

**KD** – How many matches do you compete in annually?

**MR** – Well of course this year has been a little bit different, but I usually shoot around 12 majors a year. I try to fill in my "off-weekends" with local matches or practice range sessions. As time goes by it's getting more and more challenging to fit in everything I want to do! There are so many good matches to choose from and sometimes they fall on the same weekend. But I definitely have my favorites that I go back to year after year.

**KD** – Can you please give our readers insight about what it is like to be a professional shooter? What are the ups and downs?

Approximately how much do you travel in a year?

**MR** – To start, being a professional shooter requires a tremendous amount of determination and self-motivation. Nobody tells me that I need to go to the range and practice. Nobody tells me that I need to keep training. It's my own drive to get out to the range when it's too hot, too cold, raining, when I'm tired, or don't feel well. It's about always pushing through and finding new ways to motivate myself. And it comes down to my own personal desire to con-

stantly see my performance improve that keeps me going. In competition there are moments that are so incredibly frustrating and disappointing. But there are also incredible highs and rewards that make it all worthwhile. For me the real blessing of this job is getting to travel all around the world and make friends from so many different places. I am constantly on the road traveling from one hotel to the next, wandering through airports, and driving late at night to get to the next stop, but I wouldn't change anything. I am always searching for the next win and I truly love getting to share all of these experiences with my shooting family.

**KD** – You are known to be a competitive shooter who encourages and helps others in shooting sports. What advice do you give to new shooters who want to enter a competition?

**MR** – Half the battle is showing up! Just get out there and don't worry about having all the right equipment or knowing everything to start. Trust me, you will meet amazing people who will welcome you in, give you advice, and help you out in anyway they can. Just find that local match and head on down, everything else will fall into place!

**KD** – What is the next match you are training for?

**MR** – Because of COVID-19 we will definitely have a condensed competition season but man-oh-man am I looking forward to it! I am ready to hit the summer months running and gunning! I'll be shooting pistols, shotguns, rifles, and pistol-caliber carbines. There is going to be a match every weekend!

**KD** – Shooting competitively takes strength and endurance. How does following a physical routine help you during a competitive match? What do you incorporate into your lifestyle to stay so physically fit?

**MR** – One of my favorite activities every day is to take my dog Penny out for a jog around the neighborhood or hike on a trail. I push myself the entire time by mentally telling myself I'm at a competition and there is one more target up ahead!

**KD** – Through your many years of shooting, what is your tried-and-true drill to prepare for your competitions?

**MR** – I always start out every range session with a slow-fire group to make sure my gun is sighted in. Then I shoot a magazine of one-shot drills, a magazine of two-shot drills (if I'm getting ready for USPSA or 3 Gun), a magazine of transitions from target to target, and (if shooting a pistol) a magazine of strong-hand shooting plus a magazine of weak-hand shooting. If I have more time at the range then I will get more creative.

**KD** – Maggie, we appreciate your expert advice. Please share with our BP readers your favorite competition technique for success in 3-Gun matches.

**MR** – 3 Gun is so gear intensive! You have really got to know your equipment and have a system of organi-

zation to get yourself ready for the next stage quickly. If you are off in the corner fidgeting with stuff or looking for a lost magazine then you are taking away from time that you need to prepare for the actual stage. Get your gear organized and have equipment you can trust in so that you can focus your attention on shooting!

**KD** – Additionally, for table starts, what tips can you give for a smooth pickup that allows you to watch the sight come into the target?

**MR** – This is where dryfire is your friend! Table starts, reloads, holster draws, any type of gear manipulation, are all great things to practice at home where you can figure out your unique technique without the pressure of firing the gun afterwards.

But when it comes to your question specifically, getting your grip established early on will help you acquire your sights, no different than when drawing from the holster.

**KD** – How important is the walk-through before you shoot?

**MR** – Extremely important! Being able to perfectly execute a stage plan on demand is 100 percent what competition shooting is all about! The biggest mistake I see new shooters make is not taking the time to properly develop a stage plan. Then during their actual run, they miss targets, over-run positions, and have to jump back for pick-ups. (Don't worry, I've done it too!) If you have a five-minute walk-through, spend that entire five minutes walking through the stage! Get your plan down so you can focus on the shooting.

**KD** – What mental routine do you have before you step into the shooter's box?

**MR** – The biggest thing I have learned is to stay positive and think about what I want to accomplish when I step into the shooter box. Eliminate all negativity. If I sit there and obsess over a target or a difficult shot it will distract from everything I am confident about in the stage and leave me a nervous wreck!

**KD** – Let’s talk about ammo. How critical is your load for a shoot?

**MR** – When I first started competing I just shot whatever ammo I could find at a big box store. Now don’t get me wrong, that can work just fine. But as I advanced in my career (and certainly under the guidance of Mike) I realized that to take things to the next level I really needed to develop loads that were specific to each gun I shot. For example, when I am shooting my Ruger SR 1911 in Single Stack division for USPSA, I have found that I really prefer how a 147 or even 124 bullet weight recoils versus the 115 loads I was buying over the counter. Finding a load that was comfortable for me to shoot has made my range sessions much more enjoyable and productive.

**KD** – You have traditionally used Dillon Precision presses for your ammunition. Why Dillon?

**MR** – I have always looked for quality and reliability in my equipment. And bluntly, absolutely nothing else I do on the range matters if I don’t have ammunition that I trust will go bang every time.

**KD** – Big question, Maggie. Drumroll: What is your favorite Dillon reloader and why?

**MR** – I use a Dillon Super 1050! I am someone who wants all the bells and whistles! I try to shoot about 500 rounds per range session so the 1050 helps me get that ammo cranked out quickly so I can spend more time on the range practicing.

**KD** – When you are not shooting and reloading, what are your interests?

**MR** – Anything outdoors! Going any place that I can take Penny with me! I love hiking and camping and hanging out around campfires with friends.

**KD** – Tell us about Penny and how you found her.

**MR** – Mike and I had a miniature Australian Shepherd named Murphy who traveled with us to all the 3 Gun matches. He was my best little buddy but sadly passed away. I needed a new traveling companion so I

started looking around at the local shelters. When I saw Penny’s picture online I knew I had to go visit her in person. I sat with her for several hours at the shelter and she just had the best personality. After I adopted her we immediately hit the road together. In fact, I had only had Penny for two days when we visited Dillon HQ and took this photo! She has been the perfect companion since day one.

**KD** – Let’s talk about your future. What are you looking to accomplish?

**MR** – I know that to stay competitive in the sport you have to be constantly improving. Every tenth of a second matters on a stage. So I am really looking forward to a more consistent training and competition schedule for the remainder of the year. I am also really, really looking forward to seeing my shooting family.

**KD** – And we thank YOU, Maggie, for being a part of our Dillon Precision family.

Maggie’s Brand Partners: Ruger, Bushnell, Safariland, Hornady, Surefire, Hoppe’s 9

Our day with Maggie was a full one. The morning sun lit up the Sonoran Desert for the start our **Blue Press** photo shoot. We captured multiple images of Maggie along with her sidekick, Penny. Both ladies were naturals in front of the camera! We then went to Dillon Precision HQ where we filmed various videos on the RL 750 and XL 1100. Btw, you can check all of the finished Dillon Precision videos on our YouTube page. Our busy day was then rounded out with a trip to the range. Special thanks to C2 Tactical ([c2tactical.com](http://c2tactical.com)) in Scottsdale, Arizona for hosting Maggie and our crew. You guys are awesome! And thank you, Maggie, for being such a gracious friend for us all to hang out with! Thanks also to Peter Vander Stoep @[photographyaz](https://www.instagram.com/photographyaz) (still photography); Jessica Mariscal [insta@glamdoll.az](https://www.instagram.com/insta@glamdoll.az) (makeup/hair artist). And thanks to our DP gang that helped make this day possible: Gary, Chris, Doug, Cat, Jason, Nicko, Mark, Melanie and Jared.

# The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location. The result: **NO MORE BROKEN BOLTS!** The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas by. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.

HMB Bolt **P76-66680 \$99.99**

Young Manufacturing's **Upper Receiver Vise** holds any AR15 upper receiver regardless of the manufacturer. Since it supports the receiver from the inside, the outside dimensions are of no concern. Made from aircraft-grade 6061 T6 aluminum and anodized to MIL-A-8625 Type 3 Class 2. YM Upper Receiver Vise

**P76-66679 \$34.99**

This tool makes it simple to remove or install a new ejector and spring into the AR-15 bolt. Anyone who has tried to do this without a tool will be amazed at the reduction in the number of cuss words needed to perform the task. Comes with alignment and roll pin punch.

YM Bolt Assembly Tool **P76-66678 \$39.99**

# ARE You Cleaning Your AR?

## Taylor Freelance Magazine Extensions

- AR-15/Tavor 9mm SMG +10 **P76-12377 \$39.99**  
 This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many "stock" mag springs. *NOTE: Colt SMG mags come from many different manufacturers. Colt offered at least two major types – one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.*
- TF/Wolff Spring for above **P76-12213 \$10.00**  
 Some Colt/Tavor/UZI magazines ship with strong springs capable of powering +10 extensions. Others don't. This spring eliminates the problem.
- CZ Skorpion +10 **P76-12378 \$49.99**  
 • Extra length/strength spring included  
 • Thumbscrew-and-gasket retention system allows for quick, easy disassembly.
- GLOCK +20 *Pictured* **P76-12148 \$69.99**  
 Transforms Glock 31-round magazines into 51+1 round mags.  
**Legal for PCC competition!**  
 • Extra length/strength spring included.
- SIG MPX +10 **P76-12376 \$29.99**  
 • Works with stock mag spring.  
 • Angled floor stands the mag'd magazine straight up on a table for easier loading.

## Tuff Products Mag Pouches

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system. Available in black or coyote brown.

- Black 8-Magazine Single-Stack (1911) **P76-19854 \$39.99**  
 Brown 8-Magazine Single-Stack (1911) **P76-19855 \$39.99**

| Handgun Smart Mat | <b>P76-29042</b> | <b>19.99</b>   |

The Master Bench Block™ is the most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

**P76-29033 \$34.99**

This advanced kit includes every standard and roll pin punch needed to build or work on an AR15.

**P76-29032 \$39.99**

The Chamber Boss –AR15™ All-In-One AR15 Chamber Cleaning Kit. Every tool you need to easily eliminate baked-on carbon from the AR15 chamber.

**P76-21778 \$29.99**

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

**P76-29034 \$9.99**

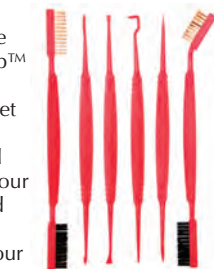

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

**P76-29039 \$29.99**

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm.

Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

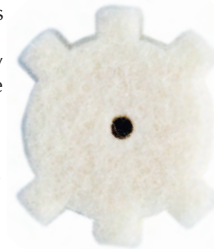

**P76-29036 \$9.99**

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

**P76-29037 \$9.99**

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

**P76-29038 \$12.99**

# Swab-its A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reuseable.

.22/5.56mm (6 ea.)	<b>P76-15310</b>	<b>\$4.98</b>

**Gun-tips® Extended Reach Firearm Cleaning Swabs** by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

**P76-12583 \$9.99**

Dillon's "Plan B" Very-Bad-Day Planner Holster<sup>▲</sup> holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Holster **P76-10252 \$29.99**

## The HYSKORE Degreezer

consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. The set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.

**P76-10209 \$15.99**

# Slip 2000 Products

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P76-19237 \$21.99

## Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P76-19234 \$21.99

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P76-11652 \$25.99

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P76-11676 \$19.99

Slip 2000 **Extreme Weapons Lubricant (EWL)** was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P76-11644 \$18.99

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P76-11645 \$18.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P76-11646 \$11.99

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P76-11674 \$14.99

**TW25B** is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe  
1.5 Ounces

P76-15732 \$12.99  
P76-15731 17.99

**66 Blue Press**

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard P76-15571 \$7.99  
Slide-Glide Lite P76-15572 7.99

## Sweet's 7.62

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

P76-13128 \$12.99

# Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The **Lyman X-Block** is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

P76-11390 \$15.99

On gun dealers shelves since 1976, the **ADCO E-Z Brite Wonder Cloth** is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

P76-18613 \$7.99

# The Gentle Art of Persuasion

## How to Get More Women Involved in Shooting Sports

By **Maureen P. Sangiorgio** – NRA-Certified  
Firearm Instructor/Range Safety Officer

When meeting someone for the first time, if I've heard this once, I've heard it a thousand times... "Oh, you're a firearm instructor? I wish I could get my wife interested. She came to the range with me one time, and never went back." So then I ask the usual questions to try to get more information as to what happened, and I almost always hear the same scenario playing out over and over again. Dude brings his wife/girlfriend to the range, hands her his high-power firearm, and wonders why she shoots it once and runs screaming back to the car! If this sounds familiar, read on to discover some tips on how to get your woman to the range . . . and keep her there.

**Check your ego at the door.** Ok we all know you can shoot the high-caliber firearms, and that's great. But this is not about you – it's about getting your skittish loved one to the range. I suggest you start her out on a large (at least a 4" barrel), heavy .22 caliber handgun. If you don't have any, find a local indoor range

where you can rent a bunch of .22s for her to shoot. The first handgun I purchased was a Ruger Mark III Hunter .22, and I start all my beginner students on it. The heavier the gun, the less recoil. The less recoil, the more accurate she's going to shoot, and the quicker she will feel good about herself and her shooting skills.

**Pick a close target.** The closer the target, the better the chance she will not only hit it, but have a good grouping. I notice many of my beginner female students seem to prefer handguns to rifles and shotguns, so let's start with them. As most encounters happen at about three yards, I recommend starting there, then moving that target farther away as the grouping gets smaller. Many self-defense experts will agree that seven yards is the standard for maximum distance you can legally defend yourself with deadly force (aiming at center mass). For beginner rifle and shotgun shooters, most experts recommend starting at 25 yards.

**Hire a female instructor.** Sorry, guys, but there's no pretty way to say this. I would say 90-percent of my students are beginner female shooters, and almost

every single one of them told me that the main reason they hired me to teach them how to shoot is because I'm female. When I look at my feedback sheets, I read comments like, "I did not feel intimidated" and "She was very encouraging," so maybe that's it. I know I joke around a little more than the guys, so maybe that makes the female students feel more at ease. The reasons honestly don't matter, if you ask me. If that's what it takes to get your woman to the range, then so be it. It's a win-win for all involved! Your loved one becomes comfortable shooting, the instructor makes a few bucks, and you now have a shooting partner, one more activity you can both enjoy together.

**Suggest women's shooting leagues.** There are several of them in the country, with local chapters in just about every area in the U.S. After I inherited my Dad's guns, I joined A Girl & A Gun league ([AGirlandAGun.org](http://AGirlandAGun.org)), but there's also:

- The Well Armed Woman ([thewellarmedwoman.com](http://thewellarmedwoman.com))
- DIVA Women Outdoors Worldwide ([divavow.org](http://divavow.org))
- NRA-Women on Target ([wot.nra.org](http://wot.nra.org))
- Shoot Like a Girl ([shoot-likeagirl.com](http://shoot-likeagirl.com))
- The American Woman Shooter ([theamericanwomanshooter.site](http://theamericanwomanshooter.site))

There's a lot of female bonding at these events, and many friendships often grow out of them.

**Emphasize safety.** I recently attended a female pro shooter's seminar at a local indoor range. She focused on mental aptitude for competitive shooting, but she also

brought up an interesting point. She told us there is a theory that the reason why some women are more fearful of shooting than men is based on evolution. According to the theory, biologically, of the two sexes, only women can become pregnant, and if we were careless, heaven knows what would happen to the human race! That theory struck a chord with me, and helped to explain what I have noticed with many of my beginner female students. They are interested in shooting, but they are very cautious. Compare that to my beginner male students who want to shoot a high-caliber firearm very quickly! So it makes sense that if you emphasize safety, it should put her concerns of becoming injured at ease. Here are the basic safety tips you should review often until you see her practicing them EVERY TIME at the range, or when you two are out hunting:

ALWAYS keep the gun pointed in a safe direction  
ALWAYS keep your finger off the trigger until ready to shoot

ALWAYS keep the gun unloaded until ready to fire

**Accentuate the positives.** Surveys have shown, and I have noticed this not only within myself, but with my female students, that one of the main reasons women like to shoot is that it is very empowering. It really boosts confidence and self-esteem. When I begin the safety portion of my class, I tell my students that whenever they pick up a firearm, they have the power of life and death in their hands. In addition, as your loved one moves up in caliber, she will be stepping out of her comfort zone. That experience can pour over into other areas of her life. Life can be very difficult at times, but when you are up against a challenge, and your thoughts go back to that high-caliber firearm that you had the courage to shoot for the first time, it gives you strength and confidence to face that challenge.

**Get a grip.** The final tip I'd like to share is to work on her grip. Most females have smaller hands than men, and their grip is not as strong. But with the proper exercises, she can improve her grip and forearm strength to help her shoot better, and move up in caliber.

Practice these exercises, working out together:

*Purchase a gripper.* Work up to three sets of 10 reps each day, increasing the number of reps until you run out of strength. Besides a gripper, you can also purchase Fat Gripz, Captains of Crush

Grippers, hand bands, or simply squeeze a tennis or racquetball.

*Practice reverse curls.* Stand while holding a barbell at shoulder width with your elbows close to your torso, placing your feet shoulder-width apart. The palm of your hands should be inward, facing your body. Keep your upper arms stationary, and bring up the barbell, curling and contracting the biceps, and exhale. Your first set should be 10 reps, then increase weight and reps as strength increases.

*Work that forearm.* Sit at a table, and place your arm on the table so your forearm is near the edge. Your hand should be hanging off the table. Place a small weight in your hand, and roll your hand up and down several times, keeping your forearm on the table. Increase in weight and reps.

Surveys have shown that one of the main reasons women like to shoot is that it is very empowering. It really boosts confidence and self-esteem.

**The New  
Super Vel.  
Hotter.

# C-More Systems

RTS2R

Railway

Built for speed, these High Performance Red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

# Bushnell TRS-25<sup>^</sup> Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot.

TRS-25 (Includes riser, not pictured.) P76-31318 \$119.99

## Scout Scope Mounts

*Sorry, the optic pictured here is NOT included with the Scout Scope Mount.*

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	P76-25374	\$79.99
Scout Scope Mount for SKS Rifle	P76-25373	78.99

# BLUE DETECTIVE

*In this issue:*

**"The Gun Nut's Dilemma"**

**by Duane Thomas**

**Illustrated  
by Val Mayerik**

**“The meet with Mackie was set for an hour from now.  
I knew he would have some muscle there, too.  
I had to pick a gun to carry with me – my concealed,  
razor-sharp sickle – and blood might be the harvest.”**

\* \* \*

Recently I was talking to *Blue Press* editor Mark Pixler, and saying, “I need to pick what’s going to be my carry/match gun for the next few years. And I have just an embarrassment of choices. The problem is all of them, each in its own way, would be an excellent way to go.” Mark replied, “That’s the gun nut’s dilemma. Most people only have one gun. Needing to pick which one to carry, and use, out of all the great guns they own is not a problem most people have.”

I look over my options in carry/match gun-land. Always a strong contender is my trusty old GLOCK 34. This is the firearm I’ve shot the most, coming up hard on 50,000 rounds. It’s also the gun I’ve carried the most. Some people might say something as big as a semi-longslide “Practical Tactical” GLOCK 34 is an eccentric choice in a carry gun. *Mea culpa*. The GLOCK 34 was designed to fit into the IPSC Standard division/IDPA box, which means it’s basically a GLOCK 9mm intended to be the same overall size as a 1911 Government Model. Now that’s a DARN interesting concept. If I can carry and conceal a full-sized 1911, which I did for years, I can carry and conceal a GLOCK 34. The main differences, of course, being the G34 is one helluva lot lighter and holds twice as much ammo.

If the GLOCK 34 is GLOCK’s Government Model, the GLOCK 17 is GLOCK’s Commander. I have four, one Gen1, two Gen3s, one Gen4. The older of the two Gen3s is the gun I’ve shot second-most, I’m currently sitting around the 38,000 rounds mark. The other Gen3 is a baby, with only a few thousand rounds through it; the Gen1 is such a recent purchase it has even fewer than that. The Gen4 I had fitted with a Leupold Delta Point Pro I acquired through Brownells ([brownells.com](http://brownells.com)) that was milled into the slide by ATEI ([ateiguns.com](http://ateiguns.com)). One of the best things about red dot optics, in my opinion, they make really awesome night sights. The Delta Pointed Gen4 G17 is the gun I keep loaded on my nightstand.

Continuing on in the red dot vein, we have my very own Polymer80 build, also acquired through Brownells, which has been fitted with a Trijicon RMR. (See my article, “Casper the Friendly Ghost Gun” in the April 2018 *Blue Press*.) Recently I gave this gun’s grip a home stipple job that actually turned out really well. Amazing, considering this was literally the first time I’d ever given a gun grip a full stipple job.

I have a couple of GLOCK 19s, one Gen3, one Gen5. The latter in particular is a sweet gun. I know a lot of people think the GLOCK 19 is the ultimate handgun. They tend to view the GLOCK 19 as a collection of theoretically desirable traits: It’s the right size, the right weight, the right capacity. Unfortunately I have not, historically, experienced the same durability and reliability results with the GLOCK 19 as I have with the larger GLOCK 9mms. With Gen5, it’s like GLOCK went through the Model 19 and upgraded and reinforced every part that’s normally worn-out or broken. I think the current Gen5 GLOCK 19s are the best GLOCK 19s ever.

Let’s not forget 1911s. There was a time I carried and competed with a 1911 .45. I actually managed to win a Washington State IDPA Championship in Custom Defensive Pistol division with my carry gun. These days, my favorite 1911 .45 is an engraved Wilson Combat ([wilsoncombat.com](http://wilsoncombat.com)) 30th Anniversary Model, basically a two-tone Classic 130 Master Grade with an engraved slide. I’ve installed a pair of ivory grips on it. This thing is PRETTY. Even today, I do still carry a 1911 .45 on occasion, and when I do, it’s this one.

Then of course there’s my Wilson EDC X9. The same overall size and capacity as a GLOCK 19 but with 1911 trigger pulls. What’s not to love?

In singlestack 9mm 1911-land, I have my Cylinder & Slide Shop ([cylinder-slide.com](http://cylinder-slide.com)) custom Officer’s Model. Actually, I call it my Officer’s Parabellum. Built-up on a Caspian ([caspianarms.com](http://caspianarms.com)) slide and frame, with a BarSto ([barsto.com](http://barsto.com)) 9mm barrel, you would not BELIEVE the arguments I had with C&S to get them to (1) make it a 9mm, they thought it should be a .45, (2) make it all-steel, including the frame. If it were going to be a 9mm, they thought it should have an aluminum frame. I get an inordinate amount of amusement from the fact that, today, there are a fair number of compact, singlestack 9mm 1911s on the market. There were none when I had my Officer’s Parabellum built. I guess I was just ahead of my time.

Double-action autos are not unrepresented in the Thomas gun safe. I still have my old SIG P228. Those of you reading my articles back in the day will have seen it many times before. This is literally the earliest carry gun of mine I still have. A few years ago, Bruce Gray ([grayguns.com](http://grayguns.com)) did a trigger job on this gun, materially improving it in the process. Since SIG discontinued the

P228, by the way, that, combined with the P228's reputation as a federal law-enforcement piece, has led to it becoming something of a cult gun demanding nose-bleed prices when you can find one for sale. Mine is not. I will never get rid of this gun. We've just been through too much together.

My most-recent acquisition has been a full-house custom Beretta 92FS from Langdon Tactical Technology

([langdontactical.com](http://langdontactical.com)). This gun is beautiful, accurate, elegant, with a totally ignition-reliable 6-1/2 pound double action and 3-1/2 pound single action. Those trigger pulls practically sparkle.

Decisions, decisions. So many GOOD things. How I am supposed to pick just one? Truly I exist on the horns of the gun nut's dilemma.

Duane's website is [self-defense-handguns.com](http://self-defense-handguns.com)

\* \* \*

**“My decision made, I put the other guns back in my office gun safe, strap on a holster, mag pouch, spare magazines. Then I walk back to the desk, check the gun is fully loaded and slip my Beretta 92FS into the rig on my right hip. I ride the tired old elevator downstairs, cross the dingy lobby, step outside into the rain. The sky spits on me. I turn up my coat collar, pull my fedora more securely into place, and walk off into the night, toward Mackie, all his muscle, and my red harvest.”**

## PROFESSIONAL PARTS FOR PROFESSIONAL RESULTS

### Our Trigger Pull Sets are made to last!

Our premium parts are CNC wire EDM cut from billet alloy steel stock and finish machined on CNC machining centers.

# New Products from

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. *This one happens to be filled with once-fired, processed (polished, sized, deprimed, primer pockets swaged) 9mm cartridge cases (sold separately below) prepared at Dillon Precision on our new CP 2000 Case-Processing Machine.* The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

**Stackable Utility Box P76-40194 \$13.99**  
**1000-pkg. 9mm Brass P76-55018 \$59.99**

Berry's Powder Funnel Set provides a wide range of flexibility when it comes to reloading. The two-funnel set comes with inserts that allow loading calibers from .17 to .50 caliber. Constructed of tough translucent polycarbonate material, they are covered by a lifetime warranty and made in the USA.

**Powder Funnel Set P76-40191 \$6.99**

Berry's Pistol Cases are as tough as they look. Available in a desert tan color, they're injection molded out of high-impact polypropylene and contain high-density crate foam to provide a soft, protected bed for your firearm investment. They're TSA approved when appropriate locks are added. Available as a single-pistol or double-pistol case, they carry a lifetime warranty and are made in the USA.

**Single-Pistol Case P76-40192 \$9.99**  
**Double-Pistol Case P76-40193 15.99**

## AMMOBRASS, LLC

The AmmoBrass Swage Setter is for use with any swaging devices such as Dillon's Super Swage 600, Dillon 1050/1100 presses, and almost any other swaging device to assist you in properly setting your swage rod and swage back-up die.

## TRUST YOURSELF. TRUST YOUR TOOLS. BE READY FOR EVERYTHING.

From clearing brush to making kindling, the Camp 10 is the ideal outdoor and survival tool. Cut, slash, hack, split, scrape – just about any task you ask of it, the Camp 10 can handle. The full-tang Camp 10 is made of carbon tool steel for toughness and wear resistance. A basic black powdercoat protects the steel and makes maintenance

easier. You'll like the secure, contoured grip of the Camp 10, too. The handle has a built-in hand guard and is drilled in both front and rear so you can attach a lanyard either place – or both – for carrying versatility.

Blade length: 10" Overall Length 16" Weight, with Sheath 1 lb. 8 oz.  
**P76-55012 \$80.99**

This "XL" Kershaw-Emerson now comes with D2 blade steel. D2, a high-carbon, high-chromium tool steel, is a knifemaker favorite and offers good edge retention and hardness, as well as being more corrosion resistant than other high-carbon steels. The CQC-4KXL D2 is a manual opener using either the thumb disk or the patented Emerson Wave Shaped Feature®.

Blade length: 3.9" Closed: 5" Open: 9"  
**P76-11689 \$74.99**

Key chains just got even handier with the new Kershaw PT-2 key chain tool. It offers eight handy functions in a very compact space. The PT-2 (Pry Tool-2) comes in at less than an ounce as well and offers a bottle opener and cap lifter, a pry bar, two screwdriver tips, a wire scraper, and three sizes of hex drives.

Overall Length 3.25" Weight 0.8 oz.  
**P76-55013 \$11.99**

Military knives have a lot of history and a lot of fans. Yet they tend to be bulky for everyday carrying and use. Kershaw and custom knifemaker Les George offer a solution by taking inspiration from a U.S. World War II knife design and turning it into the XCOM folder.

Blade length: 3.6" Closed: 4.4" Open: 8"  
**P76-55009 \$49.99**

The Kershaw Faultline is the one you add to your truck box, toss in your go-bag, or slip into the pocket of your tactical pants. Everything about it says, "practical, reliable, and sturdy." Made of quality 8Cr13MoV stainless steel.

Blade length: 3" Closed: 4" Open: 7"  
**P76-55011 \$46.99**

Kershaw Volt II opens one-handed and with an authoritative "twack" thanks to Kershaw's SpeedSafe® assisted opening system. A simple pull back on the flipper and the Volt II opens smoothly and easily.

Blade length: 3.25" Closed: 3.9" Open: 7.1"  
**P76-66698 \$55.99**

The Kershaw Method opens quickly, easily, and manually with Kershaw's KVT ball-bearing system and a built-in flipper. The handle is black – of course. The G10 handle features an unusual machined pattern reminiscent of an architectural truss.

Blade length: 3" Closed: 4.25" Open: 7.25"  
**P76-66700 \$39.99**
