ERADICATES COPPER FOULING AT MAGNUM VELOCITIES.

INTRODUCING NEW IMR ENDURON 8133.

It's the slow-burning, copper-crushing magnum powder shooters have been waiting for. Engineered for Extreme Temperature Stability, Ideal Load Density and elevated confidence and success that comes from reloading with legendary IMR powders.

Which Dillon is Right for YOU?

Page 28

Square Deal B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W Long to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 24

RL 550C

The World's Most Versatile Reloader, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

XL 750

Truly the state of the art, our XL 750 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 16

Super 1050

Our highest-production-rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

Page 12

RL 1100

Our newest reloader features an innovative eccentric bearing drive system that means smoother operation with less effort, along with an upgraded primer pocket swager. Loads up to .308 Win./7.62x51 cartridges.

ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

Dillon's Bill of Rights for Reloaders

All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

Editor's Note: The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered. We constantly strive to live up to his standards. Please let us know if we're not succeeding.

All the electrical and/or electronic components of Dillon equipment and all Dillon textiles are covered by a one-year warranty from date of purchase. Any modifications performed to Dillon machines, or the addition of any unapproved equipment, including automated or mechanical add-ons from other manufacturers, is expressly not recommended and will void the Dillon warranty.

DILLON

HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

CP 2000[^]

Dillon's First DEDICATED Case-Processing Machine!

- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Higher Throughput, Lower Cost Per Case
- Heavier Frame for Greater Rigidity
- Seven Threaded Stations for More Flexibility
- Upgraded Primer Pocket Swager
- Primer Pocket Swage Available in Two Stations
- User-Replaceable Swage Rod Tip
- Reinforced Toolhead Bolt & Washer
- Improved Shellplate Indexing System
- Processing Speed up to 2000 Cases Per Hour

Designed to complement our RL 1100 and Super 1050, the CP 2000 offers higher speed, greater versatility and added case processing capability...all at a much lower cost than dedicating a RELOADING machine to prep brass! If you're loading mass quantities of ammo, the CP 2000 will make your task MUCH easier.

Rapid Trim 1500 Case Trimmer[^]

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer P77-62164 is \$349.99. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, P77-13141, are \$20.99 each. Upper lock rings, P77-13559, are \$6.99 each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Case Preparation Equipment

Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator[▲] P77-20675 \$81.99
 CM-500 Case/Media Separator[▲] P77-21045 \$49.99

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works

great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!
 Rapid Polish 290
 8 oz. bottle. P77-13804 \$9.99
 Case (20 pc.) P77-20255 149.99

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle P77-13733 \$14.99
 Case (20 pc.) P77-20256 209.99
 10 bottles of polish/10 of lube[▲]
 Case (20 pc.) P77-21375 \$179.99

Don't Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass.
 15-pound bag P77-13287 \$23.99

Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new!
 10-pound bag P77-13496 \$15.99

SPRINGFIELD ARMORY'S HELLCAT

Words and Images by Doug Larson

It didn't take long before Springfield Armory (springfield-armory.com) introduced its new Hellcat which is a direct competitor to another major manufacturer's sub-compact 9mm handgun. The competitor's magazine has a capacity of 10, 12 or recently 15 rounds while the new Hellcat, until the 15-round capacity magazine was introduced, upped that by one to 11 or 13 rounds in a gun that is, for practical purposes, the same size. (It looks like Springfield will be forced to introduce a 16-round magazine.) The Hellcat must have been in development when the other company's gun was introduced. They say that great minds think alike, so I guess it's a happy coincidence for buyers that both guns were made available so close together in time.

In any case, the comparisons are going to be inevitable. Whether or not the extra round in the Hellcat is going to make a difference to buyers is a good question, but no one ever went into a gun fight not

wishing they had more ammunition available – just in case. The capacity issue aside, the Hellcat has some very desirable features.

The Hellcat is a striker fired, polymer frame semi-automatic that has a captive recoil spring assembly. An interesting feature though is that the recoil spring guide protrudes just a bit beyond the front of the slide and muzzle, and when the muzzle is pressed into an object – as might be the case in a close-quarter defensive encounter – the spring guide is designed to prevent the barrel and slide from coming out of battery which would cause the gun not to fire. That's another feature that will be important to some and not to others. It's interesting though.

The black slide and barrel are steel with a Melonite finish for corrosion and scratch resistance. It's a hard finish and matches the color of the black polymer frame very closely. Atop the slide, the front sight is inset with a tritium vial surrounded by a white ring

making it stand out in bright or dim light. At the rear is a U-shaped notch with a white outline. Both front and rear sights are drift adjustable and I am told confidentially that at least one aftermarket sight maker is working on replacement sights in case shooters want something different.

The slide has serrations at both the front and rear to provide a good grip when racking the slide. And if you depress the slide catch to return the slide to battery when locked back, you will find the catch is large enough to activate yet not so large that it is likely to be activated unintentionally.

The takedown lever is located just above the trigger on the left side of the gun and the trigger guard is plenty large enough for a gloved finger. The trigger guard is also undercut where it meets the front strap. That helps a little to obtain a higher grip to better control recoil. Also, at that same location, is the magazine release. It can be moved to the other side which is a nice feature that helps customize the gun for left- or right-handed shooters.

Springfield has installed a flat trigger with a safety lever. This is again a feature that some will love, some will hate and others just won't care about. The trigger is not great, but it's not terrible either. On the test gun, it broke on average at about six pounds seven ounces after significant take up, some creep and a spongy break. Powder River Precision (powderriver-precision.com) offers a replacement trigger kit, and I wouldn't be a bit surprised if others don't follow. I installed it on the test gun and it improved the trigger considerably, reducing the pull weight by around two pounds.

The gun is supplied with two all-steel magazines. One has an 11-round capacity and the other holds 13. The 11-round magazine has a baseplate with a rest for the little finger and the 13-round magazine has an extended base plate that also provides a place for the little finger to grip. Springfield supplies a flat baseplate in case the owner wants to really shorten the grip for the purpose of discreet carry.

All but the flat baseplate have a texturing around the sides and front that provide a slip-resistant surface

that matches the texturing around the grip. Springfield has also textured the grip just above a small ledge that serves as a thumb rest at the top of the grip. And a matching patch of texturing is located just above the junction of the front of the trigger guard and frame. I'm pretty sure the thought was to create a tactile spot for the tip of the finger to reside when it is not supposed to be on the trigger.

A short accessory rail with one cross slot is located on the Hellcat's dust cover. And the Hellcat can be had ready to accept a pistol-mounted optic, otherwise commonly referred to as a red dot. That's a nice touch. As I predicted many years ago in another article, red dots

on handguns have become a popular accessory.

Shooting the Springfield Armory Hellcat proved to be much more comfortable than anticipated. It's a small gun chambered in a self-defense duty round, so it is expected to generate some recoil. And it does, physics being what physics is. But the way the gun is designed and the way the grip feels in the hand, recoil, while noticeable, was not at all uncomfortable.

And accuracy was far better than is required of a self-defense handgun, especially one of this size. Because of the small size and short sight radius, accuracy testing was done at a distance of seven yards off a pistol rest on a bench. The average group size was around one inch with the best groups in the neighborhood of 0.6 inches. There were no malfunctions of any kind regardless of the type of ammunition fired and bullet shape.

The Hellcat is small enough to be carried discreetly in a

pocket and large enough for a belt holster. It's going to be an immensely popular self-defense carry gun.

A former Contributing and Field Editor for Guns & Ammo magazine, Doug Larson's articles have appeared in many top firearm publications. He has completed hundreds of hours of firearm and self-defense training provided by some of the finest world-class gun fighting instructors and schools. He has experience with handguns, rifles, shotguns, submachine guns, machine guns and other crew-served weapons.

The Hellcat is small enough to be carried discreetly in a pocket and large enough for a belt holster. It's going to be an immensely popular self-defense carry gun.

RL 1100[^]

FEATURED UPGRADES:

- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Heavier Frame for Greater Rigidity
- Upgraded Primer Pocket Swager
- User-Replaceable Swage Rod Tip
- Spring-Loaded Priming Station Locator
- Reinforced Toolhead Bolt & Washer
- Improved Shellplate Indexing System
- 1050 Caliber-Conversion Compatible
- Two-Year Warranty

All for ONLY...

\$1999^{99*}

*Prices vary on exotic-caliber machines.

STANDARD FEATURES:

- Made in the USA
- High Strength Ductile Iron Frame
- Swages Military Primer Pockets
- Automatic Indexing
- Variable-Speed Casefeeder
- Automatic Primer System
- Automatic Powder Measure
- Factory Adjusted Reloading Dies
- Loads up to .308 Winchester

Dillon Die Sets

Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

Bullet Seating Die (Pistol)

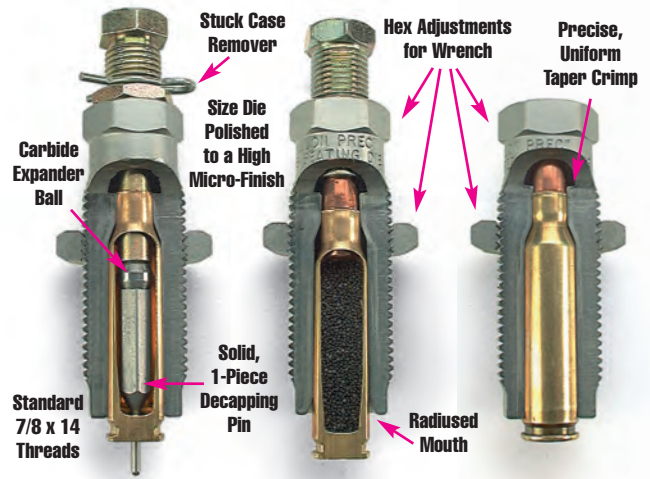

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Crimp Die (Pistol)

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 size dies with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Mr. Bulletfeeder[®]

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

Jessie Harrison @jessielharrison

1. First gun you ever fired?

Jessie: A Red Ryder BB Gun! But my first real gun was a Thompson Center Muzzleloader in .54 cal, loaded with a half charge. I would sit on my Dad's lap and shoot silhouettes at 50 yards.

Beth: Ruger Mark IV.

2. What's your favorite gun?

Jessie: A 1911 for competition purposes and a single-action revolver for style points.

Beth: My favorite gun is my Ruger AR-556 MPR. It's lightweight, comfortable and affordable!

3. Do you have any rituals before you shoot?

Jessie: I wouldn't say they are rituals, but more of a deeply engrained routine. I mentally visualize every single detail of what I need to execute before shooting a stage, give it a final walk through, check all my mags, adjust my ear muffs, give a good pony tail flip and I'm ready to go!

Beth: Yes, I always adjust my hat, ponytail, check my ear and eye protection, and acquire a last grip on my holstered pistol (in that order, exactly). Other than this, a mental thing that prepares me is

Get 2

prayer before I walk up to the start line and I say the word "bird" in my head right before the timer goes off. A few years ago my now-Ruger-teammate Tina Martin told me to find a word that made me calm to decrease nerves. As she said this, a bird flew overhead and it reminded me of freedom and the ability to "fly away" from my nerves. It has been my keyword for stress management ever since!

4. How many rounds a year do you shoot on average?

Jessie: Anywhere from 40-60k, depending on the matches for that year.

Beth: I would say that I shoot between 15-20k rounds a year depending on competitions and practice availability.

5. Most useless thing you own?

Jessie: A bear trap. It was a gift and I love it, LOL!

Beth: The most useless thing I own is my shotgun collection. I am underage and don't plan to drink, period. So, it's literally completely useless.

6. What else do you do for fun?

Jessie: I love hunting, horseback riding, exercising, being a beach or lake bum, cooking, and most anything outdoors.

Beth: I'm involved in politics and Second Amendment advocacy at a fairly high level. There are a few different organizations that I represent and work with, such as Turning Point USA as an Ambassador, The DC Project as the Social Media Director and Indiana State Director, emPOWERed 2A as the Indiana Chairwoman, and more. I travel to conferences, help with social-media content, and create content for the organizations as well as help recruit new members.

7. Favorite place on Earth?

Jessie Harrison

Know

Beth Walker @3gunbeth

me, but I loved watching things they acted in growing up!

13. If you could have a conversation with anyone from the past, who would it be?

Jessie: My Grandparents.

Beth: I would choose Samuel Adams. I'm distantly related to him and love his part in the Sons of Liberty and kickstarting our Nation's fight for independence.

14. Who's in your regular crew?

Jessie: KC Eusebio and Jackie & Justin English.

Beth: The Indiana Multigunners are my regular range crew. I have shot with them consistently for the past four years and they're the first people that I became friends with in the shooting community! They have also been some of my best coaches.

15. Words to live by?

Jessie: "You catch more flies with honey than you do with vinegar" and "Don't squat with your spurs on".

Beth: "Do not dare not to dare." – C.S. Lewis

BL 550[^]

Dillon's Basic Loader

\$299⁹⁹

P77-15399

Reloading Dies and Caliber Conversions sold separately

Pictured with optional accessories:
Strong Mount P77-22051 \$58.99

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of

versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 25) makes it quick, easy and inexpensive to change calibers. The additional toolheads are \$27.99 each, or \$25.99 each if you

buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them. A powder measure adapter is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

AUTO PRIME SYSTEM[^] P77-16627 \$94.99

PRIMER SYSTEM EARLY WARNING[^]

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. P77-20302 \$29.99

AUTO POWDER SYSTEM[^]

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

P77-20251 \$99.99

OPTIONAL MAGNUM RIFLE POWDER BAR

P77-21353 \$34.99

AUTO EJECT SYSTEM[^]

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader.

P77-22120 \$35.99

BL 550 POWDER DIE[^]

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

RL 450 Powder Die P77-20308 25.99

Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

Blue Press 31

Dillon Reloading Accessories

A Strong Mount increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come

with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 750/650	P77-22051	\$59.99
XL 750/650-only	P77-22052	57.99
"SDB"	P77-22223	72.99

Our Bullet Tray is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 750/650 when equipped with the RL 550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	P77-22214	\$47.99
1050 Tray Kit	P77-22215	47.99

The Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	P77-16306	\$44.99
--	------------------	----------------

Our Toolholders are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

- P77-20049 29.99**

Dillon's "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

P77-97126 \$169.99

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

P77-21044, \$71.99 each
Three or more, \$65.99 ea.

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

P77-17950 \$49.99

Dillon's 1" Bench Wrench fits our 1" Die Lock Rings which give you more space on the toolhead.

P77-10842, \$9.99 each
Two or more, \$8.99 ea.

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications.

Available alone or in combination with a spare parts kit for your machine.

WARNING: The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

P77-19972 \$39.99

Lyman Products

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

P77-11389 \$39.99

The Lyman Scale Weight Check Set enables you to check/calibrate your scale using known weights.

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with

the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon's 1" Bench Wrench

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you're setting up a "naked" machine, there's plenty of room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead. We've addressed this in two ways. We offer 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our 1" wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. All our lock rings fit any standard 7/8" x 14 dies.

AMMO BOXES ARE COVERED BY DILLON'S LIFETIME WARRANTY

Dillon AkroBins[^]

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Protecting 2nd Amendment Rights

By Alan M. Rice, Firearms Instructor & Spokesman, Gun Owners of America

Hopefully, by the time this article is published, the COVID-19 pandemic will have largely ended and Americans will have resumed their lives. As business owners sought ways to survive amid government-mandated shutdowns that designated some businesses as essential but said that others were non-essential, anti-gun despots used the pandemic as an excuse to restrict the right to keep and bear arms. In some cases, this was done by directly violating Constitutional protections; in other cases, by designating gun stores, ranges and manufacturers as non-essential.

Some have wondered, what does a virus have to do with the Second Amendment and why should gun stores, ranges and manufacturers be deemed essential businesses?

While it's true, that a person "cannot shoot the virus," a law-abiding person can use a firearm to defend against criminal attacks. When the virus was in full swing, many police departments said that responses to calls for service would be curtailed to prevent officers from contracting the virus. Then, just as the spread of the virus was beginning to slow down, riots and looting began in response to the death of George Floyd at the hands of a Minneapolis Police Officer. As the unrest spread, many citizens realized that they were on their own to defend against violent criminals. The fact that the police have no duty to provide protection services to citizens is long-settled US law. For over 150 years, police forces have not had a duty to protect the average person, and the U.S. Supreme Court ruled on this in 1855 (*South v. Maryland*, 59 U.S. 296 (1855)).

In the modern words of a U.S. Appeals Court decision: "But there is no constitutional right to be protected by the state against being murdered by criminals or madmen. It is monstrous if the state fails to protect its residents against such predators but it does not violate the due process clause of the Fourteenth Amendment or,

we suppose, any other provision of the Constitution." (*Bowers v. Devito*, 686 F.2d 616, 618 (7th Cir. 1982)).

This is "good law," i.e., this decision has not been overturned. This decision binds only Federal Courts in the Seventh Circuit. But other Courts may cite *Bowers*.

Not even the beneficiary of a court's "order of protection" or a "restraining order" requires a right to police protection. The U.S. Supreme Court so held in deciding *Town of Castle Rock v. Gonzales*, 545 U.S. 748 (2005). The police did not respond to Ms. Gonzales' repeated pleas – over several hours – that they find her three daughters, whom her estranged husband had not brought home. The children were murdered.

The bottom line: if we have no right to protection from the government, it follows that we are responsible for our own protection.

A firearm is the very best tool to defend against either a lone criminal or worse, a violent mob. To use a health pandemic as an excuse to shut down gun stores is essentially saying that citizens do not have the right to armed self-defense. (Of course, they absolutely do). And if armed self-defense is a protected right, then citizens need access to ranges to become familiar with their self-defense guns and to train with them. That way, in the

event that those newly acquired guns are needed for immediate defense against lethal danger, legally armed citizens can use their guns capably, with confidence and with a far lower risk of striking an innocent bystander.

When the attacks on our right to keep and bear arms began, GOA immediately jumped into action.

In March, GOA Senior Vice President Erich Pratt and Sam Paredes of Gun Owners of California jointly sent a letter to the Acting Secretary of Homeland Security and the Director of the Cybersecurity and Infrastructure Security Agency urging the Trump Administration to designate the firearms industry as essential, which they did within days of receiving the letter. Once the

During the Recent PANDEMIC Panic

firearms industry was designated as essential, GOA was able to use that against those states and cities attempting to use the pandemic to restrict the right to keep and bear arms.

Through our legal counsel, we sent cease and desist letters to governors, mayors and law enforcement officials in the states of New Mexico, North Carolina, Washington and Maryland. We contacted every County Sheriff in Pennsylvania to let them know that GOA was prepared to take legal action if they used COVID-19 as an excuse to stop issuing concealed carry licenses.

In Virginia, we sued the Governor because he used COVID-19 as an excuse to force gun ranges to close. We won our case, and Virginia ranges were subsequently reopened! In Maryland, GOA sent a letter to Governor Larry Hogan, urging him to reopen gun ranges. Just days after receiving GOA's letter, Governor Hogan issued an executive order that explicitly named shooting ranges as businesses that can open to the public.

In North Carolina, several counties and cities were using "stay-at-home" orders to shut down gun stores. GOA and our local partners at Grass Roots Gun Rights North Carolina took swift action and we threatened multiple lawsuits. After doing that, ALL of the offending counties and cities – about a half dozen localities in all – said that they are retreating from their original position and allowing firearms businesses to reopen.

If there was ever a doubt about whether or not we were on solid legal ground, the proof came in the opinion from the US District Court in, of all places, anti-gun Massachusetts. The court forced Governor Baker to allow gun stores and ranges to reopen. In addition to naming the Governor as a defendant, our suit against Massachusetts also named the Attorney General. This was proper because the Attorney General of Massachusetts is a statewide elected officer.

Anti-gun activists boldly attempted to use the COVID-19 pandemic to restrict rights and snuff out

freedom. In Louisiana, anti-gunners in New Orleans used the COVID-19 pandemic as an excuse to ban firearm sales. Josh Barnhill, our Louisiana state director, put out a grassroots alert, urging Representatives to introduce legislation preventing politicians from using ANY emergency to infringe upon the Second Amendment in any way.

Because of our alert – and the activism of our members in Louisiana – a Representative stepped forward and introduced legislation to strip Louisiana (or any locality in the state) of its supposed power to run roughshod over the Second Amendment during a declared emergency or disaster.

Both chambers passed this bill and Governor Edwards signed it. This is great news and is a good example of representatives listening to the voice of the people.

All of this is fantastic news – but it came not by accident, because it was obvious to these despotic local officials that GOA had the fortitude to actually go to court and seek relief. In other words, we were not bluffing, and the officials who abused their offices understood that and subsequently retreated.

As long as despotic officials attempt to tread on the Second Amendment, GOA will continue to lead in the defense of Second Amendment rights by pushing for laws like those which were recently enacted

in Louisiana and – if needed – by seeking relief in the courts. If you receive our alerts, please take the action requested it really does make a difference. If you are not receiving our alerts, please go to gunowners.org and sign up for our free alerts.

In addition to fighting in the halls of Congress and in state capitols across the country to protect the right to keep and bear arms, GOA is also fighting in the courts to restore rights that have been unconstitutionally taken. We will not accept any restrictions on this enumerated right. Blue Press readers who would like to support our work can join GOA at a special rate by going to: gunowners.org/BluePress.

“Some have wondered, what does a virus have to do with the 2nd Amendment and why should gun stores, ranges and manufacturers be deemed essential businesses?”

"Big Fifty" [^]

STANDARD FEATURES:

- Made in the USA
- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

John Marshall on Classic Firearms:

The first model to be produced, starting in 1962, was the Nylon 11. The one pictured here was manufactured in June 1962.

These bolt-action .22 rifles, manufactured by Remington from 1962 to 1964, have become almost forgotten curiosities. Their semiautomatic predecessor, the Nylon 66, was wildly successful by comparison. Not selling very well, comparatively few Nylon bolt actions were manufactured. Ironically, their current prices on the collector market have become unbelievably high when these rarities turn up every now and then. This is the story of these interesting but little known rifles that used the durable “Zytel 101” nylon plastic stock material of the famous Nylon 66.

Flushed with the success of the semiauto Nylon 66 rifle, Remington made the decision in late 1961 to introduce some bolt-action rifles utilizing the same stock material. The first model to be produced, starting in 1962, was the Nylon 11. The stock used the same popular “Mohawk Brown” coloring as was featured on most of the Nylon 66s. It simulated natural dark wood tones. This rifle used a standard 19.5” barrel, and was fed from a 6-round detachable metal magazine. This was identical to the one used on the earlier wood-stocked model 511, and was unmarked except for the Remington logo on its base plate. A distinctive “butter knife” bolt handle was utilized. The stock had a slanted-back nose, and had a contrasting black nosepiece, pistol grip cap and buttplate, all accompanied by white spacers. There was a white diamond inlay on both sides of the stock. Molded-in checkering on the forestock and pistol grip was standard. The racy front sight was identical to that used on the Nylon 66, and the open rear sight sat on an elevated base attached to the barrel with two screws. The barrel mated to the receiver with a transverse pin that could be drifted out fairly easily with a punch and hammer. The cock-on-opening bolt was quite strong, with two rear locking lugs. It had a red cocking indicator at the rear, and could be removed from the receiver by lifting the bolt up and back while pulling the trigger at the same time. The

receiver of the Nylon Model 11 and the similar Nylon Models 10 and 12 used a heavy-gauge stamped steel receiver similar to that used on the previous wood-stocked Models 510, 511 and 512. A side-mounted safety lever was provided. A code for the month and year of manufacture was stamped at the rear of the barrel, and can be deciphered easily with charts that can be found on the Internet. All of the bolt-action Nylon rifles were chambered for .22 Long Rifle, Long or Short rounds interchangeably, and the barrels were marked for all three cartridges. The total production for the Nylon 11 was 22,423 units through 1964.

The Nylon 10 rifle was the next model to be introduced in early 1962. It was a low-cost single-shot bolt action, with stock, receiver and barrel features quite similar to the preceding Nylon 11. Each cartridge had to be individually loaded into the chamber. The bolt on this beginner-oriented rifle engages the safety lever each time the bolt is brought back. It had a very limited production run of only 8,606 units, and it’s rarely encountered today.

The most elusive of the Nylon bolt actions is the Model 10SB. The “SB” suffix stood for “smooth bore” and it was simply a Nylon 10 with a smooth shotgun bore. It was designed to fire .22 shot cartridges. Its manufacture was interspersed with that of the regular Nylon 10. The barrel was marked “22 CAL. SMOOTH BORE.” It was one of the rarest of all the Nylon long guns. With only 2,064 of these mini-shotguns having been made, it has become, when occasionally offered for sale, amazingly expensive.

Also produced, beginning in early 1962, was the Nylon 12. It had a tubular feed, with the tube located under the barrel. The tube magazine held 15 Long Rifle rounds, 17 .22 Longs, or 22 .22 Shorts. This gave it the highest ammo capacity of any Nylon rifle. The Nylon 12 production quantity was 27,551, making it the most popular of the Nylon bolt actions.

The Remington Nylon Bolt-Action Rifles

The Nylon 10 was the next model to be introduced. This particular rifle was produced in August 1962.

Also produced in early 1962 was the Nylon 12, featuring a tubular-feed magazine. This one was made in February 1962.

Here is a final-year-of-production Nylon 11 with the rare 24" barrel option and a 10-round detachable magazine.

This is the Nylon 12 fitted with the 24" barrel.

In 1964, the final year of Nylon bolt-action production, an interesting modification was made to a number of these rifles. Some longer barrels were used, measuring 24" rather than the standard 19.5". Quantities were limited, and unknown for each rifle. Needless to say, a 24" barrel on a Nylon 10, 11 or 12 will merit a sizable price premium when rarely offered for sale.

As an item of information, all of the Nylon bolt actions (including the Nylon 10SB!) had receivers grooved for tip-off scope mounts. However, scoping these guns with low-mounted scopes was not possible until the rather high rear sight was removed to prevent interference. Typically, when this was done, the rear sight assembly and its mounting screws were mislaid and/or lost. As a result, these rear sights have become hard to find and rather expensive. All of the rifles were quite accurate, and to make them more so, many were fitted with scopes. Today it's not unusual to find more than a few that are missing the rear sight due to the carelessness of previous owners.

It's also worthwhile to note that none of the bolt-action Nylon guns were serial numbered. The marking of a serial number was not required by the U.S. government until 1968, and these guns all predate this constraint by four years or more.

With disappointing sales, the Nylon bolt actions were discontinued in 1964, as were the Nylon 76 lever-action "Trail Rider" rifles made in the same time frame. The full story of the Nylon bolt guns has been little known until recently, so perhaps this article will be of some interest to those who collect the trend-setting Remington Nylon series. The bolt-action examples are now relatively hard to find, and are usually hoarded by serious collectors who know the value of what they have. If you find one or more nice specimens for a "reasonable" price, it would be good to snap it up without any hesitation. All of these variations are still great performers and now have become money in the bank!

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

Conceal-Carry Performance Series
Revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

4-3/4" SA Colts/clones	P77-11560
4-5/8" Ruger Blackhawk	P77-15765
GLOCK 17/22	P77-62277
GLOCK 19/23	P77-62278

This holster/mag pouch combination was designed for the Single Action Shooting Society's "Wild Bunch" category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth

required by the sport – and no more

– so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

ODIN Ready Bag

ODIN Works introduces the new ODIN Ready Bag[®] (ORB)

featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease.

Whether you're going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

- Quick-release compression straps
- Four D-ring attachment points
- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: *Can remain in bag as a pocket or extend up through the zipper to fit longer barrels*
- Available in black or coyote brown
- Dimensions: 28" x 7" x 6"

P77-10098 \$19.99

Duane Thomas' Gen3 Glock 17 acquired its "battleworn" look the old-fashioned way: Being carried for years on-end and firing 38,000-plus rounds.

THE FAKWEAR FINISH (AND WHY IT SUCKS)

By Duane Thomas

I actually like the way a gun looks once it's acquired a lot of finish wear. Granted I'm the person who put it there. Years ago I wrote an article on this topic for *The Blue Press* titled "Wearing a Gun."

There was a time in my life my carry gun was a SIG P228. Though the SIG P220-series autopistols impressed people as being such high-tech guns, a lot of folks assumed the finish on the old carbon steel P220-series slides must have been some sort of super-wazoo, rust- and wear-resistant black oxide, it wasn't; it was just bead-blasted bluing, and quite vulnerable to rust and wear. The former I controlled with maintenance; the latter I lived with. I used to have a girlfriend, who carried a GLOCK 19 herself, who loved my worn-looking SIG P228. "Now THAT'S what a gun should look like."

As a gun goes into and comes out of a holster during the draw, the finish does wear, especially right at the front corners of the slide. I was once talking to a guy who'd let a friend modify his carry holster. Why on earth you'd let someone do that is beyond me, but he had, and his friend had "improved" the holster by putting a piece of sandpaper on the interior of the sweat shield. Again, I cannot fathom why anyone would do that, but he did. This, of course, had removed the finish from the left-rear of our G19 carri-

er's slide in short order. I said to him, "But that's okay, I actually like how guns look once they've got some honest wear on them. I mean, look at my GLOCK 17." I pulled it out – we were alone on the range, setting it up for a match, so I could do that, keeping the muzzle oriented downrange, of course.

He said, "YES. I love the fact the finish on the front edges of your slide is just GONE. That's how you know a gun is carried a lot, and shot a lot."

I said, "Well, now your gun has that sort of wear, too, at least in one area."

He said, "But I want to EARN that wear. Not get it all at once because someone screwed up my holster." I have to agree with his attitude.

Now there's a company offering for sale what they call their Battleworn finish. In other words, you can get a brand-new, full-coverage finish job that looks like a gun with a lot of finish wear on it. Apparently some people think that's really cool. I don't. I think it's basically dishonest. I call it the Fakewear finish. This is an example of wanting to look like a serious shooter without having put in the time and work necessary to get your gun to the proper worn-looking state. You want your gun to look "battleworn"? Carry it for years. Put tens of thousands of rounds through it. Draw it from a holster tens of thousands of times. It'll get there.

HYSKORE

Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rack will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rack also means that two or more racks can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

KCI USA Magazines

KCI USA Lifetime Warranty

KCI USA products are built to withstand a lifetime of hard use. KCI USA offers a lifetime warranty on manufacturers defects on all KCI USA products. This warranty covers all products manufactured by KCI USA.

Designed to fit AK-47-style rifles chambered in 7.62x39, these KCI USA magazines provide reliability and smooth feeding. Constructed of steel with an electroplated finish, these magazines will withstand the toughest corrosive environments. A high-tensile compression spring, anti-tilt follower and reinforced feed lips provide reliable feeding and long life. A ribbed exterior and a prominent dorsal spine provide a positive grip for precise manipulations.

**AK-47-Style
20-Rd. Mag.

30-Rd. Mag.
P77-29831 \$12.99**

**AK-47-Style
40-Rd. Mag.
P77-29830 \$14.99**

Like all KCI USA magazines, these standard capacity 30-round M1 Carbine magazines are constructed of steel with an electroplated finish. A high-tensile compression spring and a bolt-hold-open follower provide reliable feeding and long life. Removable steel baseplates allow for easy maintenance.

**.30 M1 Carbine
30-Rd. Mag.
P77-29833 \$19.99**

KCI USA invests in high-tech quality control. All-steel construction and a curved mag bodies provide reliable feeding of all 30 rounds. The KCI 30-round H&K magazine works with H&K MP5 pattern firearms including: the MP5k, SP89, SP5K Zenith, MKE, Omega, POF, HK Contract MP5 variants, SW5, BW5, CA94, D54, V94, clones, and AR builds. KCI USA uses their magazines – a lot. Located in Las Vegas, Nevada, they provide magazines to the biggest machine-gun rental ranges in the world.

SIG MPX & P365

Cowboy Logistics for the 21st Century

By Oleg Volk

When self-contained cartridges, first rimfire, then centerfire, gained popularity in the 1860s and 1870s, so did pistol-caliber carbines. Most of them were lever actions with tube magazines. Chambered for revolver cartridges like .44-40 Winchester, they carried twice as much ammunition as the revolvers, had better ballistics, and a significantly longer sight radius thanks to the barrel lengths up to 30". With the relatively mild recoil and minimized muzzle blast, such carbines could be shot more rapidly and accurately than handguns. At the same time, the handguns could stay on the person when rifles might be inaccessible, and the option to fire one-handed was important on horseback. Most of all, the commonality of ammunition

made financial and logistical sense: a person could buy one box to feed both the sidearm and the long gun. The theoretic range limitation of the revolver-compatible cartridges to 200 or 250 yards was of minor concern, since defense that far out was uncommon, and hunting options were more limited by the accuracy with iron sights.

Fast-forwarding a century and a half, we find 9mm Luger, a 1902-vintage cartridge, gain overwhelming popularity for handguns. The same cartridge had a mid-20th century heyday in submachine guns, and more recently gained considerable popularity in semi-auto carbines. The reasons for this resurgence mirror the factors that buoyed the 19th century lever actions: low recoil and mild muzzle blast, improved range and

SIG produces all components necessary for setting up a combat-ready MPX.

accuracy compared to handguns, lower ammunition costs compared to true rifles. The commonality of ammunition makes training logistics simpler: for example, my house pistol has a 20-round magazine, while my house carbine has a 30-round magazine – a single box of 9mm fills both to capacity for range time. In urban areas, it's much easier to find a pistol-rated indoor backstop than a range that holds up to rifle calibers. The limits of effective range, somewhere in the 125-yard range with iron sights, have been expanded to about 200 with the addition of compact optics. Typical self-defense distances are a fraction of that, but the improved control of a carbine permits faster and more accurate fire than possible with handguns. The 100-fps or so gain in muzzle velocity is also quite welcome.

Since open-bolt designs have been banned by BATFE, closed-bolt options are comprised of plain blowback (simple but heavy), retarded blowback (more complex, lighter) and gas-operated locked-breech (the most sophisticated and also the lightest). All work well, but the true locked-breech design delivers better performance with sound suppressors, avoiding premature uncorking of the pressurized bore at the breech end. Due to the small volume of gas available, the gas port has to be very close to the chamber, resulting in an occasionally visible flame at the ejection port. The difference from the blowback designs is that the still-burning powder from the gas system exits at a much lower pressure than similar flameouts coming from still-pressurized chambers of other designs.

Two of my favorite 9mm firearms happen to be made by SIG: the subcompact P365 and the MPX pistol/carbine. Having run them extensively for about three years with an increasing number of accessories, I have formed a balanced view of their worth as a matched pair. These two do not exemplify true cowboy logistics because they use different magazines. A logistical ideal set would be something like a GLOCK 17 and a 9mm AR carbine using the same magazines, but the overwhelmingly high functionality of this combo convinced me to tolerate this imperfection.

Legally, my MPX is a handgun. In Tennessee, that is a difference of legal significance, as only handguns may be carried. With open carry legal, the MPX fitted with a brace is a viable sidearm. For concealed carry, and also as a backup, the P365 is a better fit. Why these two? Easy, they seem to be the best in their respective classes for my use.

P365 is a conventionally designed striker-fired pistol that has greater capacity at 10 or 12 than most handguns of the same size had up to that point. While evolutionary in design, it has the necessary qualities: the utmost reliability, currently at well over 4,000 rounds of all sorts with zero malfunctions, low recoil for the size and weight, good trigger, night sights and barrel adding

up to absurdly great accuracy. While covering Sniper Adventure Challenge (<http://competition-dynamics.com/sniper-adventure-challenge-2019>) in Wyoming, I had time to engage one of the steel targets with my pistol. Thanks to the clear air at high elevation, I was able to hit the 12"x12" rhomboid about 65 per-

cent of the shots from prone at 130 yards! For a subcompact pistol, that's a very good result. Up close, realistic accuracy is helped considerably by the seamlessly integrated, grip-activated green laser.

The limitations of the pistol become evident once the targets get further out or start moving. I can engage a Texas Star with a handgun, but the rapidity of effective engagement is far inferior to what any carbine provides. Similarly,

130-yard hits under exceptional circumstances and with plenty of time taken for aiming a pistol become routine with the MPX. Between the red dot sight and the stability-improving brace, the 8-inch barreled MPX stretches the effective range of 9x19mm cartridge to its practical limits. While open-bolt World War II submachine guns were listed as effective to 220 yards, most of them could reach only half as far with certainty, while MPX delivers hits that far out as a matter of routine. As with other gas-operated pistol-caliber guns, MPX favors

Professional and new shooters alike enjoyed the low recoil, minimal report and high accuracy of this configuration.

"SIG Arms hit home runs with both designs: I have tried to make them fail for three years and instead ended up with full trust in their performance."

full-power ammunition for reliability – in my testing, it ran perfectly with 115-, 124- and 147-grain SIG brand defense and range ammunition. With heavy subsonics like Seismic 185-grain HP, the slight barrel length increase from 4" to 8" boosts the velocity just enough to improve terminal performance. MPX matches all standard AR15 controls, improving on it with ambi magazine and bolt-release buttons.

SIG SRD9 is matched to this firearm and reduces the muzzle blast to ear-safe levels. With 147-grain V Crown, it is quiet. 158-grain Fiocchi FMJ, while not ideal as a defensive cartridge, is even quieter. The report of the 185-grain Seismic is about as quiet as a suppressed 9mm semiauto shot can be expected. I would go with it for tasks under 100 yards, while Sig V Crown would be preferable for longer distance due to better accuracy. Seismic shoots about 4 MOA, while V Crown JHP gets closer to 2.5 MOA. Metal-reinforced polymer magazines made by Lancer are expensive but are well worth the price for reliability and durability. I have had no malfunctions with MPX and SAAMI or NATO spec ammunition. When run unsuppressed, the gun will short-stroke with underpowered reloads.

Short and well-balanced, MPX pistol/carbine make an ideal introductory centerfire trainer for new shoot-

ers. Romeo 4 red dot sight makes it even easier in use by making cross-eye dominance a non-issue. For older eyes with under-corrected astigmatism, unmagnified illuminated prism scopes like Vortex Spitfire, Primary Arms Cyclops or Swampfox Blade, give an even clearer image at the cost of co-witnessed backup iron sights. SIG iron sights are very good, and the full-length forend combined with aperture rear adds up to a very long sight radius relative the overall package. Keymod slots all over the forend permit the addition of a light, a laser, a hand stop, or even a coffee cup holder for the fans of creature comforts.

Few of us travel on horseback these days, but air-line travel comes close with the luggage weight and size limitations. P365 and MPX with the lower separated from the upper fit into a large pistol box inside a suitcase, reducing its visibility to thieves compared to regular long rifle cases. Only one type of ammunition has to be brought along, further reducing the weight and volume expenditure. If we travel by car, MPX's compact form and collapsible brace make it deployable without dismounting. SIG Arms hit home runs with both designs: I have tried to make them fail for three years and instead ended up with full trust in their performance.

P365 is a subcompact that shoots like a service pistol. Matched practice and carry ammunition make range time experience translate exactly into serious use.

The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location. The result: **NO MORE BROKEN BOLTS!** The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.

HMB Bolt P77-66680 \$99.99

Young Manufacturing's **Upper Receiver Vise** holds any AR15 upper receiver regardless of the manufacturer. Since it supports the receiver from the inside, the outside dimensions are of no concern. Made from aircraft-grade 6061 T6 aluminum and anodized to MIL-A-8625 Type 3 Class 2. YM Upper Receiver Vise

P77-66679 \$34.99

This tool makes it simple to remove or install a new ejector and spring into the AR-15 bolt. Anyone who has tried to do this without a tool will be amazed at the reduction in the number of cuss words needed to perform the task. Comes with alignment and roll pin punch.

Real Avid Gun Tools & Cleaning Gear

Smart Mats™ are cleaning mats on steroids. The no-slip backed Spadded mat features an oil-resistant surface. It allows you to properly clean your gun without ruining the kitchen table and is large enough to handle field-stripped guns. The ingenious magnetic parts tray ensures your pins, screws and springs are never lost again. This is real world gun cleaning taken to the next level.

AR-15 Smart Mat	P77-29041	\$24.99
1911 Smart Mat	P77-29040	19.99
Handgun Smart Mat	P77-29042	19.99

The Master Bench Block™ is the most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

P77-29033 \$34.99

This advanced kit includes every standard and roll pin punch needed to build or work on an AR15.

P77-29032 \$39.99

The Chamber Boss –AR15™ All-In-One AR15 Chamber Cleaning Kit. Every tool you need to easily eliminate baked-on carbon from the AR15 chamber.

P77-21778 \$29.99

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

P77-29034 \$9.99

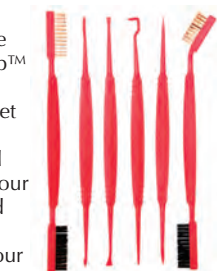

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

P77-29039 \$29.99

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm.

Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

P77-29036 \$9.99

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

P77-29037 \$9.99

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

P77-29038 \$12.99

Swab-its A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reuseable.

The HYSKORE Degreaser

consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. The set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreaser (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.

Slip 2000 Products

725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P77-19237 \$21.99

Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P77-19234 \$21.99

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P77-11652 \$25.99

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P77-11676 \$19.99

Slip 2000 **Extreme Weapons Lubricant (EWL)** was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P77-11644 \$18.99

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P77-11645 \$18.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P77-11646 \$11.99

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P77-11674 \$14.99

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The **Lyman X-Block** is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

P77-11390 \$15.99

On gun dealers shelves since 1976, the **ADCO E-Z Brite Wonder Cloth** is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

RUGER LCP II .22 LR

Reviewed by Peter Caroline

At the 2008 SHOT Show, I witnessed an historic event, although I didn't realize it at the time. With much fanfare, Ruger was introducing a .380 ACP pocket pistol, the LCP, and had gathered a large crowd, all awaiting their turn to handle and examine this new arrival. It was not a new caliber, *per se*. As a matter of fact, 2008 was the 100th anniversary of the .380 ACP cartridge, invented by John Moses Browning. The cartridge had enjoyed a long run of popularity early in the century both in Europe and here in the U.S., but by 2008, was considered barely adequate for self-protection. Ruger, however, went out on a limb with this new arrival, and their calculated gamble paid off big-time... their projected first-year production of the LCP was sold out on the first day of the Show!

I of course bought one of the first run, and fitted a LaserLyte red laser sight. The fixed sights were a mere suggestion, and it was a snappy little devil, but it followed the First Rule of Gunfighting: "Have a Gun," and it fit handily in a pocket, so there was never an excuse for not carrying. As a bonus, a Texas Governor shot a coyote with one while he was out walking his dog. There was ample press coverage of the incident and suddenly, virtually every gunmaker was offering its own version of a .380 pocket pistol, even Desert Eagle!

About eight years later, Ruger introduced an improved LCP entitled, predictably, the LCP II. The sights were vastly improved (i.e. visible) and the trigger incorporated a GLOCK-style safety blade. Trigger pull was reduced by one pound, and the slide was much easier to retract.

So, how does one improve on success? At the 2020 SHOT Show, Ruger went back to its 1949 roots and introduced a .22 LR version of the LCP, the LCP II .22. Why a .22? Besides being the most universally popular caliber, .22 LR provides a perfect training understudy for the popular .380 ACP versions of the LCP format. New shooters can practice the basics of handgun safety and marksmanship with a less intimidating, low-recoil version of the LCP format. On its own, the LCP II .22 LR is ideal for plinking, informal target practice, pest control and even as a deep concealment backup or last-ditch "Get Off Me" pistol. It weighs just a bit over 11 ounces, so it's never conspicuous regardless of how you're dressed.

The LCP II .22 has several important new features. First, it has a new manual safety. You push the lever for-

ward to fire, and a red oval is exposed. For many years, the chief barrier to semiauto acceptance by new shooters has been a genuine difficulty in retracting the slide. Ruger's new Lite Rack™ system incorporates a lighter recoil spring, refined cocking serrations and more pronounced cocking ears. The difference is quite noticeable, and welcome. The slide stays back after the last shot, and the pistol will not fire with the magazine removed. This latter feature may be a deal killer on a defensive handgun, but on a training pistol, it's a feature, not a bug.

I took the LCP II .22 along with me while accompanying a friend to a new shooting area that he had recommended. He had previously purchased his own LCP II .22, and was extolling its virtues as a target gun, and I was, to say the least, dubious. He set up a row of can

targets at 25 yards, which I thought was the height of optimism, and then promptly shot them all down, off-hand. I tried to duplicate the feat with my LCP II .22 and, to my surprise, succeeded. The sights are very clear and right on, and the trigger pull is about 4-1/2 pounds. This is by no means a target pistol, but it can hold its own in fun shooting and garden pest control.

The 10-round magazine has no witness holes, and loading it could be a chore, but fortunately Ruger provides a loading tool that makes it easy. Disassembly for cleaning is quite simple. First, remove the magazine, and check the chamber to make sure that it's empty. With the slide forward, pry loose the takedown pin with a small screwdriver, and remove the pin completely. You can then pull the slide forward and remove it.

Compress the recoil spring slightly, and remove it, and then remove the

barrel. That's it. It pays to clean the gun after each shooting session because .22 LR tends to leave more *schmutz* than most centerfire cartridges.

The Ruger LCP II .22 comes with the obligatory cable lock, loading tool and an ambidextrous pocket holster. MSRP is \$349, which would in normal times be discounted at your local gun shop. Given the current circumstances, however, with new gun buyers snatching up everything that goes "bang," you'll probably be lucky to find one at MSRP.

Bushnell TRS-25[^] Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot.

TRS-25 (Includes riser, not pictured.) P77-31318 \$119.99

Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	P77-25374	\$79.99
Scout Scope Mount for SKS Rifle	P77-25373	78.99

Versatility is the name of the game with .327 Federal revolvers like this Ruger GP100. There's a flavor for every taste.

Make Mine a... .32?

By Clayton K. Walker

It's funny what perspective will do for you. I can remember a time when I didn't do any handloading – didn't have a press to my name, didn't have a single die, didn't have to worry about buying new cabinets specifically to hold bullets and powder. And get a load of this – after my brass hit the ground I'd just walk away.

Now, while this chapter of my life wasn't all that long ago, it still feels like my first reloading press brought me straight out of the dark ages. I've had a lot of cool insights as I've fallen down the rabbit hole of this hobby, but one of the biggest surprises was how reloading completely changed my opinions of owning certain guns and calibers.

Before I bought my first press, I echoed the thoughts of many lay shooters: I wasn't going to buy any firearm if I didn't think I could find its cartridges on the shelf of the nearest gun shop. That's a sensible thought, right? Why shoot a gun you can't get ammo for? Alternately, maybe you can find the ammo, but the single box at your local store has been gathering dust and is marked into the stratosphere because the owner has no intention of ordering more.

For all intents and purposes, those concerns took the entire .32 caliber family off the table. The .32 S&W is practically obsolete, the .32 S&W Long and .32 H&R are special-order cartridges at best, and while the .327 Federal remains available, it's a niche, purpose-driven

round – which means it's generally expensive in comparison to similar calibers.

What pulled me into reloading some time ago was a gun that was too cool to pass up. I'd always wanted an I-Frame Smith to round out my collection, and when I found an awesome "pre-model" 30 at a good price, I simply couldn't pass it up. I learned in short order that the .32 S&W Long has a very, very well-deserved reputation for accuracy and ease of handling. Recoil is a non-factor, even when launched from such a small gun. However, groups produced by my little I-Frame were better than any I'd ever shot with a rimfire revolver of similar size.

From there, I ran enough .32 S&W (i.e., the ".32 short") through the revolver to form an opinion, because hey, why not? These diminutive rounds can be very accurate, though you'll need perfect follow-through. The reason is velocity: with most factory loads chugging along at a leisurely 700 feet per second, there's simply more time to pull the barrel away from where the sights are pointed. Supposing, however, you wanted to teach shooting essentials to someone who wasn't just recoil sensitive, but recoil intolerant, building a range session around the .32 S&W cartridge is an interesting option.

Shooting my I-Frame was simply so fun that I finally saw the writing on the wall: if I wanted to keep feeding the gun at the volume I wanted to shoot it, I'd need to

reload – full stop. After ordering a Dillon Square Deal B set up for .32 Long (and with some care packages from Graf's and Midway), I was up and running.

I already knew why the .32 Long had endeared itself to shooters, but I learned in short order why it's a perennial darling of reloaders. Consider this: I recently placed an order with Brazos Precision for some 78-grain bullets. Including shipping, 1,347 rounds set me back \$56. Considering that most .32 Long loads use about 2 to 3 grains of powder, it's not hard to get your cost-per-round to less than ten cents if you're re-using brass. That's centerfire shooting at very nearly rimfire prices, folks! Given the moderate pressures of almost every published .32 Long load in addition to being a straight-walled cartridge, case life is nearly infinite.

Now bitten by the .32 bug, I bought a Ruger GP100 in .327 Federal to see what the upper limit of the cartridge family had to offer. In brief, the .327 is a high performance handgun round that offers two benefits: more power than a .38 Special at moderate recoil levels, combined with dimensions that permit one more round in a typical revolver cylinder. The tradeoff: propelling a 100-grain bullet at about 1,500 fps, it roars and throws fire with authority. While just a quarter inch longer than the .32 Long, the .327 Federal is capable of generating approximately four times the amount of energy.

But snazzy as the .327 may be, I have to admit that most of the rounds I've put through my GP100 have been of the .32 H&R Magnum variety – a Goldilocks cartridge if there ever was one. The "littlest magnum" has more zip than the .32 Long and rings steel with a satisfying clang, but it doesn't feel like overkill for extended indoor range sessions. Like its predecessor, the .32 Magnum has lifelong devotees, and it wasn't at all difficult to find several accurate loads after only a few range excursions. Moderate-burning pistol powders, including Unique and HS-6, proved to be very fortuitous to have in my collection!

As my enthusiasm for the caliber family grew, it was only natural that I'd be lured in by the siren song of one of its most accurate and desirable launching platforms: Smith and Wesson's legendary K-32. My hopes quickly fell to pieces when I saw the astronomical prices they're fetching these days. (Hint: Be willing to drop more than \$3,500.) As Meat Loaf said, I would do anything for love, but I won't do that.

Don't feel too bad for me. Thanks to what I can only describe as a spate of uncharacteristically good luck, the stars aligned and allowed me to tick a "white whale" off my handgun list: the gorgeous and incredibly well built Manurhin MR-32. Differing only from the world-renowned MR-73 in terms of having smaller holes in its cylinder and barrel, it's quickly becoming the crown jewel in my revolver collection. Aided by dedicated target sights and a user-adjustable trigger (currently set at exactly two-and-a-half pounds in single action), the gun rewards application of the fundamentals with a steady string of bullseye hits.

Readers who are familiar with the MR-73 may remember that it was the sidearm of choice for the French GIGN, who often subjected each service revolver to a daily shooting regimen of about a hundred full-power .357 Magnum rounds. As such, the .32 Long cartridges I feed my MR32 can safely be considered "light duty" for the platform, if not outright R&R. Those who use phrases like "overbuilt" and

"overdesigned" as pejoratives will fail to find the magic here, but if you ask me, it's comforting to own a gun I'll likely never wear out. And that bluing – hot damn!

I should note that despite what may seem, I'm still a ways off from truly scaling the summit of what the .32 has to offer. The .32 Long continues to live on and set records

In ascending order, the .32 S&W, .32 S&W Long, .32 H&R Magnum, and .327 Federal Magnum.

thanks to a number of European-made target pistols (i.e., Morini, Pardini, Hämmerli, etc.) known for their remarkable accuracy. Henry has also added a handful of sweet lever action rifles in .327 Federal/.32 H&R Magnum, which would make for an awesome and flat-shooting platform for small game. Simply put, there's still a lot of cool things out there to play with, and my willpower is only so strong.

If you've never explored the cartridge family, there's no time like the present. You might have already guessed the .32 Long is my pick of the bunch – I love that it neatly splits the difference between rimfire and .38 Special recoil, allowing most every shooter to achieve the upper limits of their accuracy potential while still preserving that "real gun" feel. Regardless of whatever variety of .32 you pick as a personal favorite, as a reloader you'll doubtlessly find that each of the cartridges can make for spectacularly accurate, economical, and fun shooting.

New Products from

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. *This one happens to be filled with once-fired, processed (polished, sized, deprimed, primer pockets swaged) 9mm cartridge cases (sold separately below) prepared at Dillon Precision on our new CP 2000 Case-Processing Machine.* The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the **WHOLE** stack to find what you're looking for.

Overall Length 3.25" Weight 0.8 oz.

P77-55013 \$11.99

This "XL" Kershaw-Emerson now comes with D2 blade steel. D2, a high-carbon, high-chromium tool steel, is a knifemaker favorite and offers good edge retention and hardness, as well as being more corrosion resistant than other high-carbon steels.

Blade length: 3.9" Closed: 5" Open: 9"

P77-11689 \$74.99

The Kershaw Faultline is the one you add to your truck box, toss in your go-bag, or slip into the pocket of your tactical pants. Everything about it says, "practical, reliable, and sturdy." Made of quality 8Cr13MoV stainless steel.

Blade length: 3" Closed: 4" Open: 7"

P77-55011 \$46.99

Kershaw Volt II opens one-handed and with an authoritative "twack" thanks to Kershaw's SpeedSafe® assisted opening system. A simple pull back on the flipper and the Volt II opens smoothly and easily.

Blade length: 3.25" Closed: 3.9" Open: 7.1"

P77-66698 \$55.99

The Kershaw Method opens quickly, easily, and manually with Kershaw's KVT ball-bearing system and a built-in flipper. The handle is black – of course. The G10 handle features an unusual machined pattern reminiscent of an architectural truss.

Blade length: 3" Closed: 4.25" Open: 7.25"

P77-66700 \$39.99

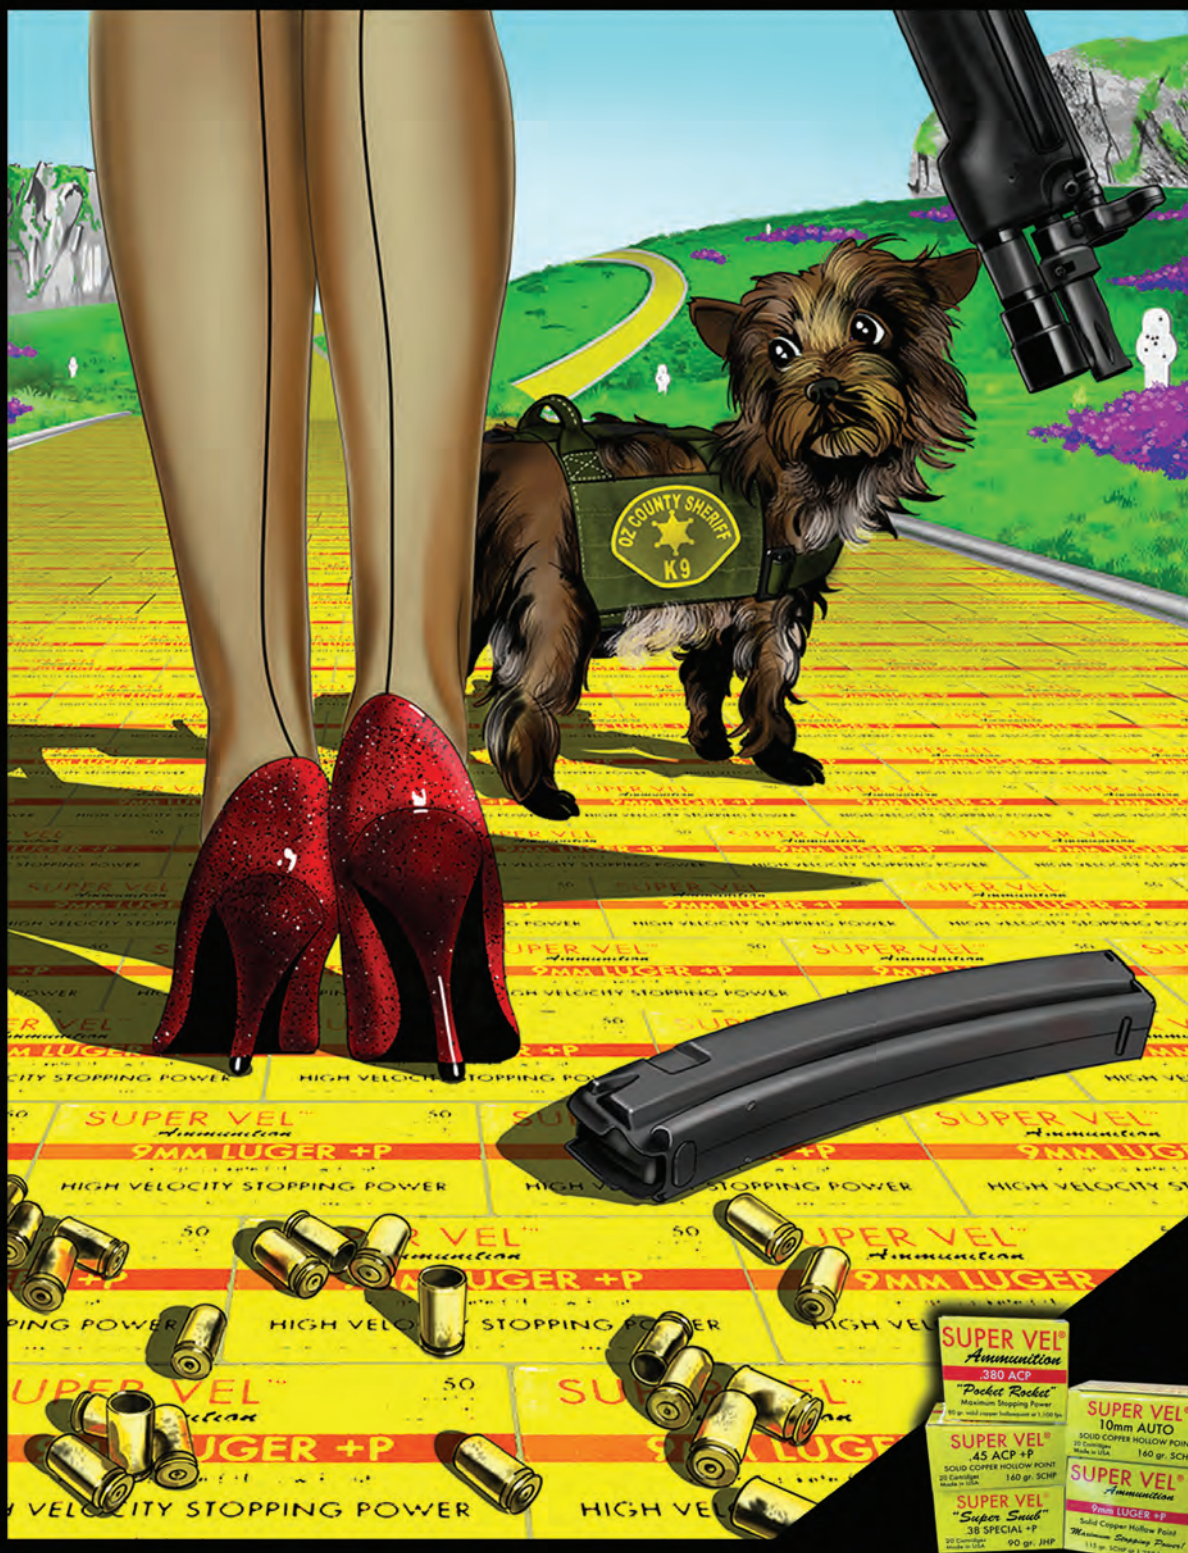

The Original GLOCK® Field Knife

Field Knife, Glock, with scabbard, 1 ea.
