Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

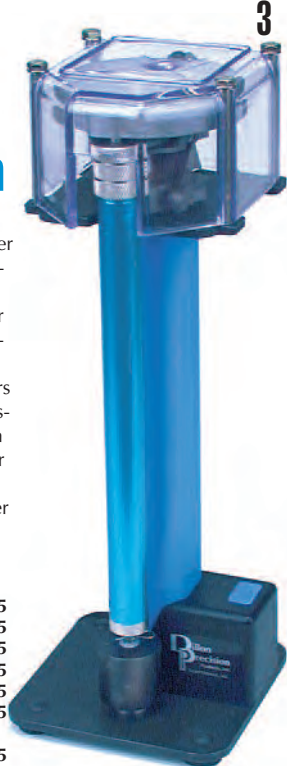

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I believe Alan Korwin, "The Guns at the End of Immigration Reform," Nov. 2013 *Blue Press*, is a wild-eyed dreamer! Once these 40 million illegals are given "legal status" and are then given the choice of food stamps, etc., or the right to own and bear arms, there's no doubt in my mind you're going to have 40 million more liberal Democrat voters! And we know which way that's going to go! Get real Alan!

Allen Poland - aibling328@yahoo.com

Having a total of 23 years in law enforcement either as a policeman or prosecutor, plus 34 years as a licensed lawyer, I disagree with Mr. Korwin's basic premises. Illegal immigrants who have been granted legal status will probably desire to own guns in the same proportions of the population as other groups.

James Patterson - JPatterson2@da.state.nm.us

I was happy to see that I'm not the only person that recognizes that illegals in the United States number between 20 and 30 million. The government and the media keep publishing the current lowball estimate of 11 million. I've been writing complaints and questions about the lowball estimate to my congressional reps for years, but they choose to ignore and keep reality under wraps in order to push immigration reform (AMNESTY) to hopefully gain that big voting block of low info/education voters.

Edwin Nita - Enita37@aol.com

It seems to be routinely overlooked by most in the media, but today's Democrats can trace their party all the way back through "separate but equal," Jim Crow laws, the KKK, and to the Constitutional Convention and the practice of counting a slave as 3/5 of a person for the purpose of assigning seats in the House of Representatives. So the idea of new immigrants becoming 3/5 citizens - without Second Amendment rights - would not be new ground to the party.

Charles Brumbelow - mrb37211@yahoo.com

Re: Alan Korwin's article...I'd like also to point out that little-known period in Mexican history when the common people did pick up arms to battle the repressive Calles Government in the 1920s. The general Catholic population was cruelly discriminated against by President Calles, and, although violence was never "authorized" by the Dioceses involved, or the Vatican, armed resistance still took place. For more information on this era, look up any of the several books under: "Viva Christo Rey", "For Greater Glory", La Christiada", or "Mexican Martyrdom." The Church's teachings are vastly different than the current Socialist dogma being preached by the Government.

CLASSIC FIREARMS: The

By John Marshall

Do you subscribe to the idea that any gun is better than no gun at all? And the truism that a .22 in the hand beats a .45 left at home? Then you probably know that the little two-shot .22 caliber derringers produced by the High Standard Manufacturing Company in Connecticut once filled an extremely valuable niche. They were some of the most concealable handguns ever made. Measuring a very flat 0.9" across the grips (widest point) and weighing in at 11 ounces fully loaded, these little weapons could go almost anywhere visually undetected. In the '60s, '70s and '80s they were enormously popular for concealed carry. Police officers and civilians bought thousands of them as emergency backup weapons. There's been nothing like them since their manufacture ceased in 1984. Although small, at close range they had enough power and accuracy to cause death or extreme discouragement. They were classics in every sense of the word.

The first of the breed, the Model D-100, was introduced in 1962 in caliber .22 Long Rifle. It had two over-under enbloc barrels. A pull-up stirrup tipped the 3.5" barrels down for extraction, ejection and loading. The gun was double action only, and pulling the open-access trigger twice alternated strikes on each barrel in turn. Barrels could not be selected. The trigger simply sent the striker to the chamber after the one just fired. Lifting the stirrup to its upper limit tipped the barrels down and activated an extractor that worked on both cases at once. Doing this slowly simply lifted the empty cases, but if done smartly, it would throw them clear. Once reloaded, closing the barrels back retracted the extractor automatically and locked the barrels in place. The action was hammerless, although an internal hammer with an up-and-down pivoting striker was utilized. The fixed sights were integral with the barrel and crude, but usable at short distances and quite snag-free. The .22 Magnum chambering was introduced as the Model D-M101 shortly after the initial run of .22 Long Rifle guns.

There were three distinctly marked versions of these little derringers. Type 1 models were marked "HI-STANDARD/DERRINGER" and have the company's "eagle" logo on the left of the barrel. They were marked either "D-100" for the .22 LR version, or "D-M101" for the .22 Magnum.

These Type 1 examples were made from 1962 to about 1967.

Type 2 models were marked "HI-STANDARD/DERRINGER" on the left side of the barrel, along with the company's "trigger" logo. The first of this type used the "D-100" designation for the .22 LR versions, and then about 1969, these were marked "D-101." Either designation will be found on the left side of the barrel. The .22 Magnum versions were marked "DM-101" in the same spot. These Type 2 versions were made from 1967 to 1970. The gun illustrated for this article is a Type 2 D-101 made in January 1970.

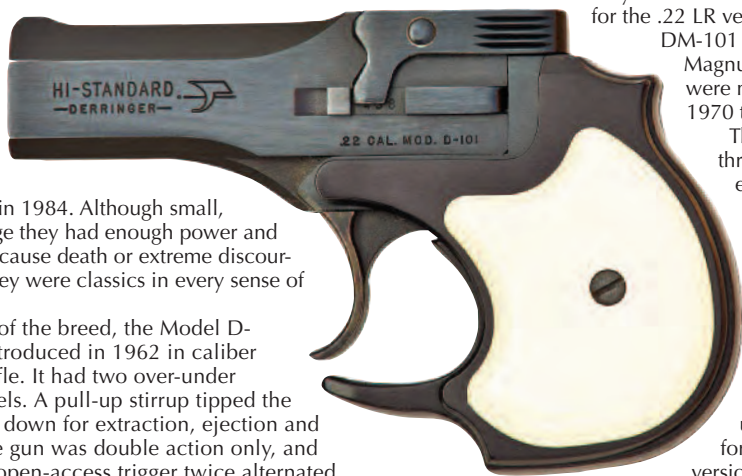

Type 3 models were simply marked "DERRINGER" without "HI-STANDARD" or any logo.

They were marked D-101 for the .22 LR version or DM-101 for the .22 Magnum. These were made from 1970 to 1984.

There were three different engineering designs utilized over the years. The D-100 design was the first, and used only for the .22 LR versions. The

DM-100 design was at first utilized only for the .22 Magnum pistols. Differing parts were the barrel, frame, actuator assembly, hammer and striker. The D-101 was a combination of the previous two designs, and shared most parts between the two. Only the barrel and actuator assemblies were different depending upon caliber.

Serial numbers were intermixed with other High Standard handguns until serial number 2,500,404. In July 1975, serials were prefixed with a "D" and began at D01001. These serials continued through D12,047 when manufacture was transferred from Hamden, Connecticut to East Hartford, Connecticut. Serials then ran from D13,000 to D96,098 at the end of production in July 1984. Towards the end of production, some serials were suffixed with a "V." This simply meant that the gun did not meet cosmetic standards, but was guaranteed to be mechanically sound. Most were shipped in 1984 regardless of the manufacture date. The "V" suffix guns were sold at reduced prices.

Hi-Standard Derringers

All of the standard derringers were provided with a metal, plastic and fabric snap-open case, guarantee card and instructions. There were a number of special variations offered over the years. These included silver and gold-plated models with presentation boxes. There were some cased sets with consecutive numbers and models with black or walnut grips in place of the standard imitation ivory. Just as a point of information, the company has always been referred to as "High Standard" while the guns were marked "Hi-Standard."

Various manufacturers have made wallet-style holsters for these very thin and compact guns. Some owners found that they could remove the grips to make the fitted gun even thinner. Be aware that if these "wallets" have a finger hole in them to allow firing while in the holster and are combined with the gun, they fall under the National Firearms Act of 1934. These must be registered and a tax paid to legally possess the combination. A wallet holster without the finger hole is considered just a holster and the combination of gun and holster is legal with no paperwork.

The .22 Magnum versions of the little derringer had a tendency to shoot loose with extended fir-

ing. If one is acquired, it should be checked for tightness. It should then be carried as often as wished, but shot little. The .22 LR versions proved very well suited to that chambering and remained tight even with heavy use. The factory suggested in its instruction sheet that a qualified gunsmith disassemble the gun only if necessary.

In my experience, the .22LR version is particularly comfortable to shoot. To make it easier to hold, point and shoot, some folks use their middle finger on the trigger, holding their index finger alongside the barrel. I've found the diminutive gun to be accurate out to about 15 yards by "staging" the trigger to the let-off point, then carefully sighting, and squeezing off the last fraction of an inch of pull. I've used mine as a back-up gun carried in a clip-on inside-the-pants holster. It's quite comfortable, virtually invisible, and no burden to pack. In the late 1960s the standard model sold for around \$34, but today's value for one in excellent condition with the case and papers will usually run between \$250 and \$300. The little High Standard derringers were unique, interesting, and filled a definite niche for their owners. They are classics today, and sought after on the used-gun market. P

New from North American Arms, Inc. The NAA Sidewinder!

LR conversion
cylinder assembly
shown with star
extractor

North American Arms is pleased to announce the "Sidewinder" mini-revolver. This important new product features a "swing-out" style cylinder assembly similar to most other modern revolvers. This allows easier loading and unloading. This revolver is offered in standard .22 Mag with an optional .22LR conversion cylinder assembly.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K67-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K67-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (Page 15) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (bottom right photo) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

AUTO PRIME SYSTEM

Includes:

Primer Housing / Shield
Primer Slides, Large/Small
Pickup Tubes, Large/Small
Pickup Tube Tips, Large/Small
Magazine Tubes, Large/Small
Mag. Orifices, Large/Small
Operating Rod
Primer Track Bearing
Housing Screws
Ret. Spring Retaining Pin

K67-16627, \$82.95

PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

K67-20302, \$25.95

AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

K67-20251, \$87.95

OPTIONAL MAGNUM RIFLE POWDER BAR

K67-21353, \$29.95

AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

K67-22120, \$30.95

AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

Powder Die: K67-16629, \$19.95

Overize Die: K67-16626, \$19.95

Plastic Funnel: K67-16617, \$5.95

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (Requires the use of an RL 450 powder die – see below.)

K67-20029, \$22.95

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K67-22080** is **\$254.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below.) Replacement carbide cutting blades, **K67-13141**, are **\$19.95** each. Upper lock rings, **K67-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

Dillon's Case Preparation Equipment

CV-2001
K67-20493
\$187.95

CV-750 K67-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K67-20675 \$72.95

CM-500 Case/Media Separator K67-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K67-22047 \$212.95

Euro CV-750 K67-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls of the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K67-13804** **\$8.95**
Case (20 pc.) **K67-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **K67-13733** **\$8.95**
Case (20 pc.) **K67-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **K67-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag **K67-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag **K67-13496** **\$15.95**

THE TACTICAL RELOAD

THE CREATOR OF THE TACTICAL RELOAD

Figure 1 – The correct Tactical Reload entails the following and is the result of extensive range and “in the field” testing. (Shown from Weaver Ready position.)

Figure 2 – The firer removes his non-firing hand from the gun, moves to his spare magazine and grasps it, with the index finger placed along the front edge of the magazine.

The magazine is withdrawn from its carrier and brought rapidly to the vicinity of the gun’s magazine well.

Figure 5 – The magazine is then placed high between the ring and little finger of the firing hand to avoid obstructing the mouth of the magazine well.

Figure 6 – The forefinger of the non-firing hand is then replaced on the front of the full magazine, which is then “rolled” into the well from rear to front and firmly seated with the base of the non-firing palm.

By Chuck Taylor

On page 64 and 65 of the October issue of *The Blue Press*, I noted an article titled, “Shooting Tip: Tactical Reloading Techniques,” by Duane Thomas. In it, there is reference to what the author calls the “Taylor Tactical Reload,” or “TTR”. The source of the author’s information is unknown, but though the Tactical Reload is discussed and illustrated in both of my handgun books and a dozen published articles, and hundreds of classes, I wasn’t consulted.

Nonetheless, as the person who Mr. Thomas designated as having developed the technique outlined in his article, I’m compelled to respond, *because in both concept and execution, Mr. Thomas is utterly and totally wrong.* It’s also clear that he fails to understand not only the HOW of the Tactical Reload, but the WHY and WHEN as well. Viewed from a tactical standpoint, the Speed Reload he insinuates is preferable is actually intended for a completely different set of circumstances. Specifically, it was invented by an old friend of mine, the late Ray Chapman, for use in IPSC competition with the M1911. *It never had any tactical basis, nor has it ever won a gunfight – only marksmanship can do that.*

In the real world of the actual gunfight, there can be only two reasons for Speed Reloading – 1) in spite of your best efforts, the situation has continued to escalate beyond control; and, 2) *you’ve been missing too much!* While it’s theoretically possible that reason #1 could occur, statistically it has about the same potential as being struck by lightning on a clear day or winning the lottery, making #2 – missing too much – the overwhelming reason people perform it. This being the case, disproportionately emphasizing it is a waste of time better spent on what’s important – hitting targets quickly and accurately.

Given the preponderance of large-capacity pistols these days, there can be little legitimate reason to Speed Load. After all, if you don’t solve the problem with the first 17 shots, *what makes you think it will get any better with the next 17?* The fact is that in a typical tactical situation, it won’t – *because the more you shoot, the more poorly you shoot.* Given this fact of tactical life, the odds are overwhelming that you won’t survive long enough to successfully perform it.

The Tactical Reload, however, was created to fill a void – how to bring your weapon back to full ammunition capacity after the initial confrontation

D: WHY, WHEN & HOW ²¹

LOAD SETS THE RECORD STRAIGHT

Figure 3 – The index finger is curled back from the front of the magazine in order to allow it and the non-firing thumb to articulate.

Figure 4 – The magazine release button is pressed and, with the thumb and forefinger of the non-firing hand, the partially spent magazine is removed from the gun.

Figure 7 – The partially spent magazine is grasped by the non-firing hand and moved to whatever retention location the firer desires. A pants pocket is usually the best place.

Do not attempt to insert it into your spare magazine carrier.

With wet, shaking hands, the potential for dropping it is too great.

Figure 8 – The non-firing hand is then returned to the gun. Note that during the entire procedure, the gun is kept at the Ready Position, and is never, ever, brought up in front of the face.

concludes. Under such circumstances, there are no targets and thus no emergency as would be present if a Speed Reload situation were present.

However, in a Tactical Reload situation, there is a lull in the action; all initially-engaged targets are down and neutralized. But handgun fights being what they are – reactive, close-range encounters – additional targets might well appear at any moment. So bringing the gun back to its full ammunition capacity is a smart move and the reason I created the Tactical Reload in the first place.

Under such circumstances, a Speed Reload makes no sense. Why would anyone want to unnecessarily abandon a magazine that still contains ammunition that might be sorely needed in the next few seconds, then bend down, locate the dropped magazine and retrieve it? Doing so is also tactically dangerous in that it takes your eyes from the area of conflict and takes longer than a properly executed Tactical Reload.

The so-called “Taylor Tactical Reload” Mr. Thomas incorrectly describes involves having two magazines in the non-firing hand simultaneously, while attempting to control the partially spent mag and inserting a fresh one into the gun. During the Tactical Reload’s developmental stage back in

1982, the first protocol I formulated utilized this concept and was quickly discarded upon discovery that it had a 40-percent error-rate! As a result, it was *never taught by me, nor espoused to anyone.*

It’s also worth noting that in a real gunfight, two metabolic conditions are guaranteed to appear: 1) *your hands will be instantly soaking wet; and, 2) due to the massive adrenalin surge that accompanies all deadly encounters, they will also be shaking.* If you add these issues to the equation, you can easily see why trying to simultaneously manipulate both magazines in the same hand is undesirable – the danger of dropping one or both of them or inadvertently re-inserting the partially-spent magazine back into the gun is quite real. If you don’t believe me, try to perform the protocol five times without mishap after coating your hands with motor oil and running a hundred yards and back. That will illustrate the problem nicely. The correct Tactical Reload procedure has none of these flaws and can be performed without ever looking at the gun at all.

Moreover, the method demonstrated by Mr. Thomas positions the pistol in front of the firer’s face, thus blocking much of his view of the area of

Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

Stylemaster-DL \$150

A superior shoulder rig made of best-quality leather with solid brass fittings — no cheap plastic, no soft suede or other low-quality leather.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K67-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K67-11702 89.95**
"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.
- "Officers" Model" Safepacker, RH **K67-11701 89.95**

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

Uncle Mike's Kydex Holsters

Michaels of Oregon's injection-molded Kydex holsters have a level of detailing, quality and affordability unmatched by other manufacturing methods. The almost-vertical rake allows for behind-the-hip carry, and for some applications, the holster can function as a crossdraw. Smaller-size holsters can also be used for "appendix" carry. To aid concealment and to assist in the draw, the holster rides close to the body at a mid-level height. The injection-molded belt loop is designed to accept and support a variety of belts from 1" to 1.75" wide.

BLADE-TECH™

“Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

Springfield XDM .40	K67-40077	39.95

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

'Belted Magnum' Powder System

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder.

Like all of Dillon's powder measures, the Belted Magnum Powder System is case-activated and can be used with your RL 550B, XL 650 or AT 500 reloader. It's ideal for loading large-caliber magnum rifle cartridges. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

The "Belted Magnum" Powder System is based on our SL 900 Shot Dispenser, so the Maximum Charge Bar won't work in our standard powder measures – you'll need to buy the entire system. The good news is that the "Belted Magnum" Powder System has an integral drain, so it's easy to empty the hopper in order to change powder types; so, if you load several big calibers with various powders, it's easy to switch from one to another.

Keep plenty of extra powder on hand, because when you're dispensing 100-plus grains into every cartridge, you'll need it!

Magnum Powder System **K67-97126 \$137.95**

Forster Products Datum Dial Ammunition Measurement System

Forster Products' easy to use Ammo Measurement System gives you the data you need to refine your case-sizing and bullet-seating operations. For example, using the average relative measurement taken from several cases that have been fire-formed from the same firearm, you can then adjust your sizing die to produce cartridges with a headspace tailored to your firearm's chamber. This complete kit includes one Datum Dial tool for checking cartridge cases, both bullet/cartridge dials for use with .17, .204, .224, .243, .257, .264, .277, .284, .308, and .338 caliber bullets, a laminated chart showing common datum diameters, complete instructions and storage box. (A caliper is required.)

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

Bullet Comparator

Correct bullet seating depth is critical to accuracy. In addition, minor variations in bullet seating depth will have an effect on both pressure and velocity. The L-N-L Bullet Comparator provides precision handloading dimensions.

Dillon's Pistol Die Sets

Size Die

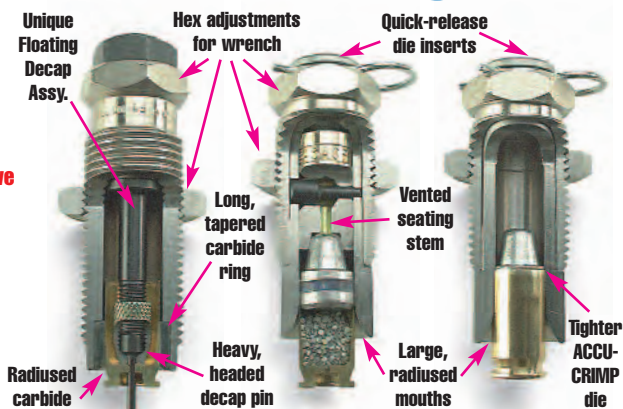

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)

.223 Remington	K67-10839	\$66.95
.308 Winchester	K67-15574	66.95

Extra Loading Data Labels, K67-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

California Competition Works

12 Gauge Shotshell Tactical Strippers

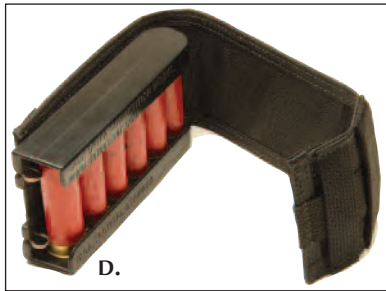

A.

B.

C.

D.

California Competition Works' Tactical Strippers are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84 attachment device

(C. & D.) that will accommodate up to a 2-1/4" duty belt.

A. Six-Shell Tactical Stripper **K67-18606 \$23.95**

B. Four-Shell Tactical Stripper **K67-18605 22.95**

C. Three-Shell Aluminum Stripper* **K67-19475 34.95**

D. Six-Shell Covered Tactical Stripper **K67-19225 33.95**

*Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.

AP Custom USA Shotshell Carriers

AP Custom USA's Shotshell Carriers are 100-percent machined from solid billet aluminum, and utilize proven 303 Hi-Yield Stainless steel leaf springs to contain either three or four 2-3/4" 12 Gauge shells in their slots, depending on model. Both models offered here feature the BLADETECH Tek-Lok™ Universal Belt Clip. The 4x4 Shotshell Carrier holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong or weak-handed. The 3x3 holds three 2-3/4" 12 Ga. shells in two adjacent slots.

TACCOM, LLC Tactical and Competition Accessories

QUICK CADDY...
light, easy, simple!
Made from Delrin, TACCOM's Quick Caddy holds the shot shell by the rim only, allowing for easy access to the shells for simple and fast removal. Holds four 12 gauge shells, any length! Comes with a belt strap to attach to your belt, but allows you to use the Tek-Lok™ or ELS systems and is adaptable to MOLLE system as well.

K67-19537

\$24.95

TACCOM, LLC's Dualload Shot Shell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. We're offering the 2Up version that can be either attached to a belt or MOLLE gear, as well as the 4Up and 6Up versions with a BLADETECH Tek-Lok™ Universal Belt Clip (included) that can be attached at various angles. The Dualload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun. It's quick, easy and (most important) intuitive!

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

*FAQ About Berry's Preferred Plated Bullets

1. What is "DS?"

"Double Struck." Double-Struck bullets go through an extra sizing process after being plated. This makes the bullet 100 percent symmetrical. This can give you an edge in competition, but most shooters won't notice the difference.

2. What is the difference between Plated/Jacketed/Cast bullets?

Berry's Preferred Plated bullets begin as a swaged lead core. The plating process works through electrolysis. The swaged lead cores are tumbled in an electrically charged cyanide bath containing high-grade copper ingots. The copper clings to the lead and the longer the bullets remain in the bath, the thicker the plating.

3. How do I load Berry's Preferred Plated Bullets?

Plated bullets occupy a position between cast bullets and jacketed bullets. They are soft lead, but have a hard outer shell on them. When loading plated bullets we have found best results using low- to mid-range jacketed data in the load manual. You must use data for a bullet that has the same weight and profile as the one you are loading. Do not exceed mid-range loads.

4. How fast can I shoot these bullets?

Velocities depend on the caliber, but as a rule of thumb, we recommend you don't shoot our plated bullets over 1200 fps (feet-per-second). Our 44s actually shoot best around 1150 fps. 45s are generally good at 850-900 fps. Our bullets are NOT recommended for magnum velocities.

5. Can I shoot your plated bullets in my GLOCK?

Yes. We have a large contingent of loyal GLOCK shooters using our bullets. The plating is thick enough that you will not get lead fouling in your bore, which is the nemesis of polygonal barrels.

*DS = Double Struck, TP = Thick Plate, HB = Hollow Base, RN = Round Nose, FP = Flat Point, SWC = Semi Wadcutter, WC = Wadcutter

About SNS Casting: SNS Casting, Inc. is a family owned and operated business located in rural Flanagan, Illinois and was officially founded by Jim Stinar in the winter of 2008. Jim's casting history actually began in the mid 1980s as a hobby. This supplied not only himself but a group of friends and fellow avid shooters who were tired of paying too much for inferior products. Eventually, word was spreading throughout the surrounding states of his bullets, which were priced right for the quality.

Today, SNS Casting features seven of Magma Engineering's Mark VIII casters and three Lube Master lube/sizers fitted with M-A Systems Collators. **Our lead is a certified factory alloy of 92 percent lead, 6 percent antimony and 2 percent tin, which is purchased in 44,000-pound lots to ensure consistent quality. The lube we use is Magma blue lube.**

SNS Casting's founder/owner Jim Stinar and his son Ryan are avid USPSA (A30909, A63666) shooters, SASS members and NRA members.

NOTICE: There is a \$20.00 minimum 'Hazardous Material' (HazMat) handling fee for shipping PRIMERS. This fee is assessed in increments of 10,000 primers. Primer orders MUST be shipped separate from other items, and require a separate shipping and handling charge. Shipping and HazMat fees are not included in prices.

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K67-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

K67-19972 \$39.95

Stainless Steel Dial Caliper

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

Easy to Read!**

K67-17171 \$39.95

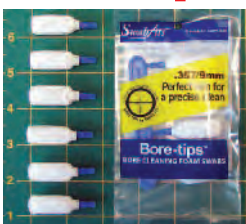

The Otis Technology, Inc. **Breach-to-Muzzle Cleaning System** cleans rifles .22 to .50

cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal.

The system includes three memory-flex rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

K67-18174 \$39.95

Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I work the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of sol-

vents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Concealed Carry Tote⁴⁷

\$45⁰⁰

K67-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy-duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5"x11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

K67-19495 \$9.95

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?!). No excuse, Sir!

K67-19257 \$11.95

DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

K67-19371 \$29.99

conflict, which is always a bad idea. Regardless of whether the operator utilizes the “in-out” Isosceles or “up-down” Weaver stance, the Tactical Reload is performed with the gun at the Ready Position, not in front of the face like a Speed Load.

The Isosceles “in-out” Ready position places the gun in both hands in front of the chest just below shoulder level, whereas the “up-down” Weaver Ready has the gun held diagonally down in both hands with arms extended at about 40-degrees below the shooter’s line of sight. In both cases, the weapon is kept well below the firer’s line of sight to maintain visual contact with the target area, never in front of his face.

The correct Tactical Reload entails the following and is the result of extensive range and “in the field” testing. It’s execution from both the Isosceles and Weaver Ready positions is performed thus:

1. – The firer removes his non-firing hand from the gun, moves to his spare magazine and grasps it, with the index finger placed along the front edge of the magazine.

2. – The magazine is withdrawn from its carrier and brought rapidly to the vicinity of the gun’s magazine well.

3. – The index finger is curled back from the front of the magazine in order to allow it and the non-firing thumb to articulate.

4. – The magazine release button is pressed and, with the thumb and forefinger of the non-firing hand, the partially spent magazine is removed from the gun.

5. – The magazine is then placed high between the ring and little finger of the firing hand to avoid obstructing the mouth of the magazine well.

6. – The forefinger of the non-firing hand is then replaced on the front of the full magazine, which is then “rolled” into the well from rear to front and firmly seated with the base of the non-firing palm.

7. – The partially spent magazine is grasped by the non-firing hand and moved to whatever retention location the firer desires. A pants pocket is usually the best place. Do not attempt to insert it into your spare magazine carrier. With wet, shaking hands, the potential for dropping it is too great.

8. – The non-firing hand is then returned to the gun.

Note that during the entire procedure, the gun is kept at the Ready Position, and is never, ever, brought up in front of the face.

With only a few repetitions, the protocol is easily executed without ever looking at the gun, and with reasonable practice, can be completed in as little as 3.5 seconds. Abandoning the partially spent magazine while performing the Speed Reload, then locating it on the ground and recovering it takes much longer.

This, then, is the WHY, WHEN and HOW of the correct Tactical Reload, the one I’ve taught to

several hundred thousands of students over the years. It’s been battlefield-tested and works quite well, far better than the mutations created on and for use on shooting ranges that ignore the wet, shaking hands that accompany every gunfight. No one gets in gun battles on shooting ranges or during an IPSC/USPSA match and for such environments, those conditions won’t be present, so the techniques they engender are irrelevant.

Tactical shooting is an art and science all its own, and entails circumstances not encountered on a shooting range or in an IPSC/USPSA match. Thus the mind-set and resulting methodologies are completely different and have little validity when the bullets fly *both* ways and life itself hangs in the balance.

In conclusion, I hope the reader won’t misunderstand – I have no axe to grind with Mr. Thomas, *per se*. This is, after all, a free country and however ill advised I find them to be, Mr. Thomas has a right to his opinions. However, as mentioned earlier, when I’m specifically referenced in print as the creator of a technique that’s totally wrong in every respect, I must respond. Life and death are serious business, demanding a responsible, professional, real-world approach and it’s in this spirit that I “set the record straight.”

About Chuck

The author of over a thousand published magazine articles and four successful books (*The Complete Book Of Combat Handgunning*, *The Fighting Rifle*, *The Combat Shotgun & Submachine Gun* and the 4th Edition of the *Guns Digest Book Of Combat Handgunnery*) on weapons & tactics, Chuck is both airborne and Ranger qualified, an Adjunct Professor of Police Science, court-certified Expert Witness and the first 4-Weapon Combat Master. A decorated Vietnam Veteran of two infantry and SpecOps tours in that conflict, he also has additional expertise in SWAT, counter-insurgency and counter-terrorist operations.

A former World-Class IPSC competitor & U.S. “Blue” Team member, he also holds NRA Expert ratings with Light Rifle, High-Power Carbine & High-Power Rifle. While on active military duty, he earned Expert ratings with the M1911 .45 ACP pistol, M1/M14/M16 rifles, M14A1 squad automatic weapon, M60 machine gun and M79 grenade launcher and has successfully qualified nine different times as a Handgun Combat Master with as many different handguns.

As the founder/director of CTASAA, he has been involved in the training of tactical and security personnel not only the Olympics, but of a number of both well-known and covert military and police special-operations teams and the corporate security officers and personal bodyguards of several high-profile corporate and political figures as well. A brown belt in Judo and black belt in karate, he is also a 3rd degree black belt in *Hojutsu* – the martial art of the firearm.

Chuck’s contributions to the field of tactical handgunning are numerous, far-reaching and widely copied. Among his accomplishments in this area are the Tactical Reload, proven-superior Malfunction Clearance techniques, Multiple Target Engagement tactics, Responses to the left, right and rear, shooting on the move and the adaptation of the Speed Rock and Stepback into highly effective close-quarters emergency response procedures.

Because he’s a dedicated innovator with an unflinching commitment to results, Chuck’s techniques have been credited with saving the lives of hundreds of law-enforcement officers, military personnel and civilians alike. In fact, many of his professional colleagues learned much of what they know from him. As the Director of CTASAA, he can be found either in the field training or conducting research in pursuit of his lifelong goal – saving lives by advancing the state-of-the-art of tactical shooting.

For information on Chuck’s training, contact him at Nighthawk6@cableone.net; www.chucktaylorasaa.com; Phone: 928-710-7099.

A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

K67-50050, \$374.95

B. 50 BMG CARBIDE SIZE DIE
The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

K67-50075, \$849.95

C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

K67-50125, \$74.95

D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

K67-50200, \$149.95

E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

Deluxe Set: 510.5 grains for bullets, cases and powder.

K67-12458 \$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	K67-14067	\$1.35

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Take out your frustrations, and build your grip strength at the same time! Just think about...oh, socialized medicine, tax increases, high-capacity magazine bans, etc.

1 lb. K67-15532 \$7.99

2 lb. K67-15533 \$14.95

Note: These Come in Assorted Colors

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

K67-19538 \$13.95

The **TACCOM Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is **KEY** for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

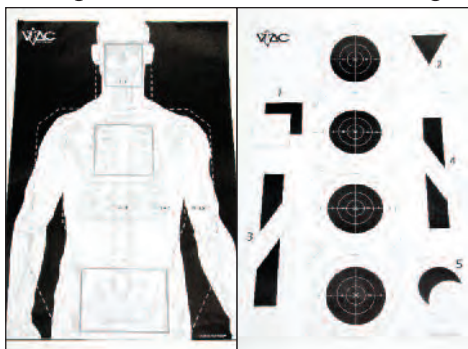

K67-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The **TACCOM Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

58 Performance Parts for Your GLOCK® Firearm

Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K67-14760 \$24.95**

Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K67-18630 \$14.95**

C. Bullet Forward Slide Release **K67-18629 19.95**

GLOCK® Factory Original Parts:

D. Extended Mag Release (Small Frame) **K67-18569 \$9.95**

Duane Thomas, On-line

www.Self-Defense-Handguns.com

Reviewed by Peter Caroline

I'm constantly reminded that a shooter's greatest resource, in terms of potentially valuable information, is the Internet. That's where I discovered Duane Thomas's website, www.Self-Defense-Handguns.com. Duane has been a regular contributor to *The Blue Press* for many years, and is one of the few independent (*really independent*) gun writers who actually makes a living from his craft. If you've read his work, you know that he is one highly opinionated individual. To his credit, these opinions are based on a wealth of experience and knowledge; this is a guy who thoroughly knows and enjoys his guns and the shooting scene.

Duane's website is an invaluable source of information and counsel for handgunners of every skill level. In addition to a large compilation of his published articles over the years (downloadable for FREE), it includes a \$19.95 audio download of an unedited interview with the late Jim Cirillo, a member of the NYPD Stakeout Unit in the 1960s.

Jim was an amazing storyteller, and his stories are true. A word of warning, however: this is not for a squeamish, prudish or politically correct audience. This is unvarnished cop-talk, from a man who had not only survived but also prevailed in 17 armed encounters and gunfights. Jim had "seen the elephant" and lived to tell of it.

The website also offers an opportunity to buy Duane's first book, *The Truth About Handguns*, which has been out of print for several years. (He's currently working on his second book, which will be out next year.) You don't have to spend much time with firearm enthusiasts to realize that there's an awful lot of Bravo Sierra being disseminated and perpetuated as gospel. Everyone knows that the M1911A1 is the finest fighting handgun ever

created, that double-action autos frustrate any attempts to master that damn schizophrenic trigger pull, and that a handgun bullet's stopping power is more important than magazine capacity...or is it the other way around? Thomas takes on each of these issues and more...logically, informatively and entertainingly. There is a very good chance that much of what he has to say will piss you off. There's an equally good chance that he's right.

There's a fascinating chapter on Alvin C. York, a conscientious objector who became one of America's greatest war heroes, with a detailed account of how Sgt. York won his Medal of Honor. Thomas also includes chapters entitled "Are Revolvers Obsolete?" "Firepower Versus the One-Shot Stop" and "Just How Good is the .40 S&W?" In addition, there is a 181-question firearms trivia quiz that will challenge every firearms aficionado's fund of useless information.

By the end of *The Truth About Handguns* you will learn why we tend to get so worked up over nitpicky details of firearms and ballistic minutiae, just as some sports fans do over such important questions as "Who was the National League's greatest left-handed shortstop?" You'll also come to realize that (Glock) (M1911A1) (double-action) (.40 S&W) (fill in the blank) proponents

might not be such idiots after all. Throughout the book, it's quite evident that Duane Thomas (a) knows his guns, (b) takes nothing for granted, and (c) is eminently readable. You can buy the digital download for \$19.95. It's well worth it.

Duane's website also features a valuable list of recommended resources, links to some highly thought-provoking Colion Noir videos, plus a very useable readers' forum and message board. For both information and entertainment, I highly recommend www.Self-Defense-Handguns.com. P

"Duane has been a regular contributor to *The Blue Press* for many years, and is one of the few independent (*really independent*) gun writers who actually makes a living from his craft."

Ultimate Advanced Revolver

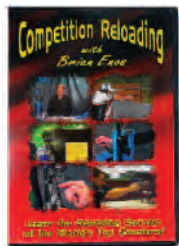

with Jerry Miculek – The World's Greatest Revolver Shooter Jerry Miculek is recognized as the fastest and most accurate revolver shooter in the world. His speed and skills are, in one word... Amazing! They've been verified in hundreds of local and national competitions. In this program, he shares with you some of the techniques and secrets he has mastered over the past 25 years to become the shooter he is today. And, you'll see an incredible display of revolver shooting and reloading. 100 min.

K67-14608 \$19.95

Competition Reloading

with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

Build the Perfect Survival Kit

By John D. McCann

When an unexpected emergency situation rears its ugly head, will you be up to the challenge? "I wasn't prepared for that!" will no longer be a valid response with the survival-kit-building methods in this book from survival expert John McCann. According to McCann, the secret to surviving any life-threatening crisis is being prepared through careful advance planning, and that means designing, building and carrying your very own customized survival kits. 192 pages, published by Krause Publications.

K67-19394 \$16.99

Build the Perfect Bug Out Bag

By Creek Stewart

Be ready when disaster strikes! If an unexpected emergency or disaster hits, are you prepared to leave your home – fast? You will be if you follow the advice in this book. *Build the Perfect Bug Out Bag* shows you how to create a self-contained disaster preparedness kit to help you survive your journey from ground zero to a safer location. Survival expert Creek Stewart details from start to finish everything you need to gather for 72 hours of independent survival – water, food, protection, shelter, survival tools, and so much more. 208 pages.

K67-19393 \$16.99

Shooting Tip: Why You

Left: The Airsoft pistol at bottom is based on the Glock 17. Note it does not feature the “second trigger” lever of the real Glock.

Right: Green Gas is expensive. Readily available, inexpensive propane may be used instead, as long as the shooter adds silicon to it.

Left: Airsoft “1911s” are also available in doublestack, match-gun configuration like this *faux* Limited-division “gun.”

Right: For purposes of draw practice, the Airsoft replica will fit in a holster made for its real counterpart. This Airsoft G17 fits in the author’s everyday carry Blade-Tech Standard Belt Holster.

By Duane Thomas

An Airsoft is a plastic-pellet-firing, replica “gun” designed from the ground up to not only look as much as possible like a real firearm, but also work as much as possible like it. Airsofts operate through a variety of mechanisms, but for the purposes of match/self-defense training, let’s focus on the autopistol replicas that operate through Green Gas.

In such Airsofts the gas reservoir is the magazine. As on a real gun, the slide cycles every time you pull the trigger, the external hammer (assuming it has one) recocks itself with every shot, the trigger action is precocked by the reciprocating slide. The slide stop works, the action locks open when empty, you may also use the slide stop to manually lock the action open. The mag release button is functional, and magazines come out of the gun. In short, the manual of operations between an Airsoft and a real autopistol is identical.

The World Speed Shooting Championship, aka the Steel Challenge, has been won several times by Japanese shooters who practice all year long with an Airsoft (since they’re not allowed to own real guns in their homeland) then a few weeks before the match, fly to America (where, I can only assume, their real guns are stored), spend a few weeks practicing to get grooved-in on that gun’s recoil and handling qualities, then go on to kick butt on the rest of the best speed shooters on the planet. Those observing this phenomenon eventually came to realize there are huge advantages to doing most of your training with an Airsoft.

What allows firing a handgun with speed and accuracy is tracking the front sight in recoil. Feedback from the front sight lets us KNOW where the bullet just went, so we can instantly move on to the next shot. Many people think the key to becoming

a great shooter is to fire tons of live ammo. Not necessarily. True, by the time you’re really good, you’ll have created enough empty shell casings to fill a dumpster. However, once you get to that point, you realize the dumpsterful of brass wasn’t where the real improvement came. Doing all, or even most, of your practice with live ammo is self-defeating; it builds bad habits that block you from truly advanced performance.

When we fire a handgun with live ammo, we see a hard piece of metal flip up across our line of sight – consciously or subconsciously we’re afraid the gun is going to come back and hit us in the face. Accompanying all this, a firecracker goes off about two feet in front of our face. This all leads us to a phenomenon for which we have a very technical term: it’s called a “flinch.” Whatever we do, the vast majority of times we pull the trigger, will become our habit. Do most of your practice with live ammo, you will engrain a flinch.

The classic solution to this problem is dry fire. When you pull the trigger on an empty gun it doesn’t flip its muzzle, doesn’t make that big horrible noise. However, a couple of problems with dry fire: (1) the trigger action doesn’t reset itself; if you want to practice hitting the trigger reset, you must hold the trigger to the rear while you hand cycle the action; (2) perhaps most importantly, people find dry fire BORING, thus they have a hard time motivating themselves to actually do it to any real extent, over any real period of time.

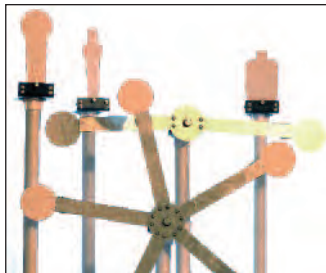

Neither of those problems afflict the Airsoft. The Airsoft cycles and resets its own trigger action with every shot, thus your practice is far more realistic. Also Airsoft is FUN. Almost as fun as the real thing. Thus it’s much easier to motivate yourself to practice. More frequent, more realistic, longer practice

Need an Airsoft Pistol

Left: Airsoft guns may NOT be lubricated with standard, petroleum-based products. Gun Butter, being non-petroleum based, is an excellent choice.

Right: Airsoft replicas are available to mimic a variety of aut pistols, for instance the singlestack 1911.

BAM Targets makes a variety of innovative Airsoft reactive target systems.

The author built this BAM 5-plate rack using a piece of wood for the target base and readily available PVC pipe for the legs.

sessions lead directly to a higher skill level.

Practicing with an Airsoft is much more affordable than firing a real gun with real ammo. It's also more time efficient because it's much quieter, and its projectiles much less penetrative, than a real gun, thus you can shoot it in your own home instead of having to travel to a soundproofed range that's been hardened to contain real bullets.

Green Gas, the propellant you can buy for an Airsoft, is in essence propane with silicon oil added. Inside your Airsoft are rubber gaskets; if they dry out and crack, they no longer provide an airtight seal and the Airsoft stops working. The silicon oil inside Green Gas lubricates the slide-to-frame-to-barrel action, but mostly it's there to keep the rubber gaskets wet. Every time you pull the trigger on an Airsoft, along with gas to power the pellet downrange and operate the action, a quantity of silicon oil is also blown up into the gun. I will admit to lubricating my Airsofts beyond just trusting in the silicon. I like Gun Butter for this job because, being a non-petroleum based product, it won't attack an Airsoft's rubber gaskets like more conventional lubricants.

Canister propane, like the small bottles used to run gas barbecues, doesn't have silicon oil added; however propane is MUCH less expensive (and more commonly available) than Green Gas. You may buy plastic or metal adapters that screw onto the top of a propane canister. Insert some silicon oil into the adapter, clamp it down over the canister, and when you then load the magazine, silicon oil gets blown into the magazine along with the gas. *Voilà!* You get *de facto* Green Gas without the Green Gas price.

Magazines only cost around \$20 apiece, so there's no reason not to have lots of them. If you only have one magazine, it's a real pain during a practice session needing to stop on a regular basis

to gas up the mag. But if you start with, say, half a dozen or so magazines already loaded and gassed, you can get in some pretty decent practice without stopping even once to gas up.

Practicing with a "gun" that actually fires projectiles, as opposed to dry fire, means you can now fire on reactive targets, for immediate "hit or miss" feedback. My favorite Airsoft targets are the falling plates from BAM Targets. All BAM's targets are sized to, at close range, duplicate the relative size of an actual target at a realistic real-world range. If you're willing to put in the work, you can learn a lot with a BAM five-plate rack and an Airsoft.

Though they were originally designed as toys, you should be careful about treating Airsoft pistols like toys. They can actually, seriously injure people. As your mother told you about your BB gun, "Someone could put their eye out." I wear protective lenses when firing on steel plates to protect my eyes from flying pellet fragments (yes, the plastic pellets fragment, just like real bullets, when they hit the plates).

It's a common experience for people who lay off live fire for awhile, and do a lot of training with an Airsoft, when they do go back to the range and fire live ammo, to find that not only have they become faster, but also more accurate. Remember, tracking the front sight is how we get speed with accuracy. When we fire an Airsoft, there is a certain amount of recoil, however the sight doesn't flip nearly as much, and the reciprocating slide moves much more slowly. Thus tracking the front sight in recoil is much easier. It's like training wheels for acquiring front sight tracking skills. Do a lot of practice with an Airsoft, and on your next trip to the range you'll find that whole "tracking the front sight thing just got a whole lot easier.

J. Dewey Mfg. Co.

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits all AR-15s and AR-10s with standard and oversized take-down pins up to .316" in diameter.

To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless	K67-18600	\$49.99
Blued	K67-18601	49.99

Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight	K67-18210	\$53.95

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

*Sand not included.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

K67-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

Comp-Tac's Trojan Horse Long Gun Case

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

K67-19388 \$115.00

Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,

30mm tube and

bright illumination of the reticle are just a

few of the many features of the DMS-1. Bright

red illumination of the reticle adds to the quick-

ness of the sighting system in day and low-light condi-

tions. At one power it works well as a reflex sight and at

longer ranges the four-X magnification gives increased ac-

curacy.

K67-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

K67-11643 \$89.95

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle K67-25374 \$79.99
Scout Scope Mount for SKS Rifle K67-25373 78.99

Tactical Sports 45° Offset Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)
45° Offset Optic Mount K67-14472 \$14.99

90° C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE (Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.
Ruger MK1 (pictured) K67-19535 \$79.95
Browning Buckmark K67-19534 79.95

Millett's 100-percent aircraft aluminum alloy mount allows you to attach your optics or accessories on a Picatinny rail while maintaining co-witness with your iron sights. For added versatility, the mounts are equipped with removable shims for 1" to 30mm tubes.

How do you make a Savage rifle even more accurate? Well, as the adage goes, you can't kill what you can't see, so you include a Nikon 3-9x40 BDC reticle scope, mounted and bore sighted. This unique reticle can be ballistically matched to your exact cartridge using Nikon "Spot On" Software. Coincidentally, the price of the New package is "Spot On" too. See your favorite Savage dealer for details.
