# DESIGNED WITH THE TOUGHEST STANDARDS IN MIND BUILT TO PERFORM IN THE HARSHTEST CONDITIONS

## RUGER AMERICAN PISTOL

Anything Else Would Be Un-American.

Designed with the latest U.S. Military standards in mind, the **Ruger American Pistol** is built to perform in the harshest conditions. A true American innovation, this pistol was developed through a rigorous "Voice of the Customer" process—where numerous law enforcement and military trainers, firearms experts, distributors and retailers provided input, feedback and testing in the determination of the form, function and features of this firearm. The resultant new pistol is a revolutionary platform for Ruger, one that utilizes the combination of a recoil-reducing barrel cam (which is designed to better spread recoil energy over time) with a low mass slide, low center of gravity and a low bore axis to provide an unparalleled shooting experience.

# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need  
for primer pick-up tubes!***

***Fills the primer tube  
while you reload!***

***Clear polycarbonate shield  
and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

# We READ Our Mail!

Just wanted to say thank you to the folks at Dillon. After more than 200,000 rounds loaded on my Dillon XL 650, the case [insert] slide gave up. I called on a Monday and by Thursday of the same week I received a new complete slide free of charge. It does not get any better than that.

Fred Rohn – Coeur d'Alene, ID

I recently had an issue with my 650 machine, and I must say that the support I received in resolving the issue was outstanding. I had difficulty determining the root cause of the problem at first, but once it seemed obvious what the real issue was (a worn platform) I stripped the part from the machine and returned it via USPS on a Saturday. The replacement part was in my mail box when I returned home on Thursday, along with another new case insert slide and the tool necessary to properly align the assembly on reinstallation. Within about an hour I had the machine back together and it was functioning like it was brand new. Here is a shout out to the Dillon No B.S. lifetime warranty. Thanks for your support.

Michael Taylor – Albuquerque, NM

After contacting Dillon Precision to try to solve two issues I was having with my press, there was one employee who stood out above the rest. His name is Ron Farmer. During our conversation, he never seemed frustrated with me no matter how many questions I asked him. Mr. Farmer worked with me to resolve the problems with relative ease. He was a perfect gentleman throughout the entire time we were on the telephone together. His dedication and tireless devotion to Dillon Precision can be seen by the way he treated me throughout our last communication. I have come to respect his knowledge about reloading, and especially like how he knows the product that I am using. His integrity, openness, work ethic and reliability reflect on the company that employs him. I will continue to purchase your products, and have referred all of my friends to Mr. Farmer and Dillon Precision.

Justin Testa – Revere, MA

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

N48-20778, \$21.95

Cameron's rifle was built up on an Anschutz probably made originally sometime in the 1960s.

Rear sight is a handgun-like blade, set up halfway down the receiver, with a tiny notch.

Pulling the safety button to the rear exposes a red dot and readies the gun to fire.

### By Duane Thomas

Previously in *The Blue Press* I told you the story of choosing for a friend's 10-year old daughter, Cayla, her first-ever gun, the Savage Rascal, a single-shot, bolt-action .22 rifle designed for little kids. The Savage Rascal was intended as a Christmas present for Cayla. However as Rita, her mother, put it, "There's no way we can give Cayla this super-cool new rifle for Christmas and not give Cameron [her 18 months older sister] one too. That's like an invitation to extreme sibling rivalry." Picking a rifle for Cayla had been a direct appeal to my male-gunwriter gene. Honestly, I had always been looking forward to getting one for Cameron, as well. Because OF COURSE Cameron had to have one, too.

Here was the problem: while Cayla is a tiny girl, at 10 she's 4'7" tall and weighs a whopping 75 pounds – Rita calls Cayla her "speck" – at the age of 12 Cameron is already 5'6", weighs 150 pounds, and wears shoes a half size larger than her mother who is 5'7". When

Cameron is an adult she'll be six feet tall; at 12 she's already the size of an adult woman. She's literally twice her sister's size. So while the challenge with Cayla was to find a rifle that could work for a tiny little girl, the challenge with

Cameron was to get a rifle as much like her sister's as possible but have it be something appropriate for a young girl already the size of an adult.

I was polling friends, scouring local gun stores and pawnshops, when my friend, gunsmith Ron Soderquist, came up with the perfect solution. Knowing this was going to be a gift for a pretty little girl, and having a total soft spot for kids, Ron wheeled and dealt and traded, and came up with an old Anschutz. When I say "old" I mean this thing was probably built in the 1960s. It also came with a long 24" barrel. While Cameron's rifle

would need to have a longer stock than Cayla's, to work with her larger frame, I wanted to keep the overall length of the two rifles as close as possible, so Cameron wouldn't make fun of Cayla's "little

Cameron at 12, with no idea her first-ever rifle lurks in her near future.

# Cameron's Rifle

The trigger guard has been finished in a silver-gray polymer coating.

The crescent butt has no buttplate, but instead has serrations cut directly into the wood.

baby gun." No one with whom I have discussed this matter, who has actually had experience raising tween girls, by the way, thinks that was an unrealistic concern. The Savage Rascal has a 16-1/8" barrel, i.e. barely over the legal limit. Ron likewise cut the Anschutz's barrel down to barely over 16", then re-crowned it and re-blued the entire barrel and receiver.

The Anschutz, as you would expect from an older German rifle, is very European in its specs. The forend tip has a European-style schnabel, there is no buttplate, instead the crescent butt is serrated directly into the wood. This is common on many older European rifles. The bolt handle is curved downward, the safety lever operates forward for Safe, back for Fire, the opposite of what we have on the "American" Savage Rascal.

The stock, after 50 or so years, had seen better days. Thus Ron sanded it down, stained and lacquered it. The stain he uses, by the way, is handmade, not out of a can. There is an old procedure for making stain that involves boiling tobacco, squeezing all the juice out of it, then to that liquid adding black tea. The result is a beautiful, deep reddish-brown stain that looks a lot like cherry wood.

The trigger guard, frankly, had some pitting. Even after the pitting was polished out, the areas where the pits had been took bluing dif-

ferently than the non-pitted areas and, as Ron put it, the result "looked like a speckled owl." Thus the trigger guard was finished in polymer, not blued. Since Ron didn't have black polymer on hand, only silver-gray, Cameron's rifle has a silver-gray trigger guard. While I know that only happened because Ron didn't happen to have black polymer available, the truth is I like it. This looks like it was a deliberate, and esthetically very pleasing choice.

Cameron's rifle was taken to the range and tested with a variety of .22 Long Rifle ammo. In general, .22 rifles (handguns, too, for that matter) are picky about which ammo they'll shoot accurately, and this one was no exception. Its accuracy load turned out to be Federal Gold Medal 40-grain solid lead. Frankly I found the Anschutz's gold bead front sight, and tiny little rear notch set up in a sight blade halfway down the receiver, almost invisible, so it's something of a miracle I was able to fire a 1" three-shot group with it.

Ron had told me, "I wasn't able to shoot this gun at very long range, but at 25 feet I was able to put them into one hole." I decided to try that 25 feet/one hole thing, so I moved in to 25 feet, a distance at which I could actually see both the sights and the target. At that range, three bullets went into a one-hole group measuring .163" center-to-center

# BL 550 Dillon's Basic Loader

**\$259<sup>95</sup>**

**N48-15399**

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount N48-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing / Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**N48-16627, \$82.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**N48-20302, \$25.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**N48-20251, \$88.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**N48-21353, \$29.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**N48-22120, \$30.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: N48-16629, \$19.95**

**Oversize Die: N48-16626, \$19.95**

**Plastic Funnel: N48-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

**N48-20029, \$23.95**

**RL 450 Powder Die:**

**N48-20308, \$21.95**

# RL 550B

**RL 550B DVD**  
**Instruction Manual**  
 N48-19483 \$19.95

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial Period!**

*All for ONLY...*  
**\$439<sup>95\*</sup>**

**N48-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

Total Price as pictured here with  
 optional accessories: **\$738.60**

.45 ACP Die Set	N48-14404	\$65.95
Strong Mount	N48-22051	\$48.95

Cartridge Case Bin/Bracket	N48-11185	\$24.95

# RL 550B ACCESSORIES

**A. RL 550B CALIBER CONVERSION KITS**  
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**N48-RL550B CON-**

**VERSION \$45.95 (Exotic calibers, \$55.95)**

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **N48-20782, \$77.95 ea.**  
 Magnum Rifle Powder Bar **N48-21353, \$29.95 each**  
 X-Small Powder Bar **N48-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **N48-22058, \$104.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**N48-20064, \$11.35 each**  
**Three or more, \$10.25 ea.**

**X-Large Powder Die, N48-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**N48-13909, \$22.95 each**  
**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**N48-22055, \$20.95 each**  
**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

**N48-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

- 2 Magazine Orifices, Small
- 1 550 Primer Cup Spring
- 2 Retaining Clips
- 2 Dispensing Tip, Large
- 2 Dispensing Tip, Small
- 1 Failsafe Bushing Rev. B

**N48-20048, \$18.95**

## L. MACHINE MAINTENANCE KIT

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare

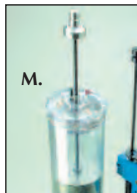

parts kit for your machine.

**Maint. Kit & Spare Parts Kit N48-97016, \$32.95**

## M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

**N48-16306, \$41.95**

## N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550B Cover, **N48-13795, \$23.95**

(O.) Master lock, **N48-**

**13083, \$3.95**

Quick-Change Cover (for use with powder measure)

**N48-11143, \$14.95**

## P. UNIVERSAL MOUNTING HARDWARE KIT

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

**N48-14355, \$5.49**

# Dillon Reloading Accessories

**Dillon's Reloading Accessory Package Deals** include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

SDB (Balance Beam Scale)	N48-14482	\$192.95
SDB (Electronic Scale)	N48-14483	251.95
RL 550B (Balance Beam Scale)	N48-21143	191.95
RL 550B (Electronic Scale)	N48-22117	250.95
XL 650 (Balance Beam Scale)	N48-21430	207.95
XL 650 (Electronic Scale)	N48-22118	266.95

**Dillon's Toolholders** are available for your RL 550B, XL 650, SL 900, and Square Deal B, and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650 with Wrench Set	N48-11555	\$29.95
XL 650 w/o Wrench Set	N48-11554	18.95
RL 550 with Wrench Set	N48-11541	28.95
RL 550 w/o Wrench Set	N48-11543	17.95
Square Deal B with Wrench Set	N48-19441	26.95
Dipped Ball-End Hex Wrenches	N48-11483	17.95
One-Inch Bench Wrench	N48-10842	7.95
Square-Deal-Only Wrench	N48-19970	8.95

## Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	N48-22051	\$48.95
XL650-only	N48-22052	45.95
Square Deal "B"	N48-22223	64.95

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	N48-22214	\$41.95
RL 1050 Tray Kit	N48-22215	41.95

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-thirds of a grain.

Magnum Powder System	N48-97126	\$145.95
----------------------	-----------	----------

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	N48-16306	\$41.95
--	-----------	---------

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	N48-17950	\$45.95
--------------	-----------	---------

**Quick-Change Cover** for use with powder measure. N48-11143 \$14.95

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

### RL 450 Upgrade Components

# Dillon's Case Preparation Equipment

**CV-2001**  
**N48-20493**  
**\$188.95**

**CV-750 N48-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator N48-20675 \$75.95**

**CM-500 Case/Media Separator N48-21045 \$47.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 N48-22047 \$213.95**

**Euro CV-750 N48-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle. **N48-13804** **\$8.95**  
Case (20 pc.) **N48-20255** **135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle **N48-13733** **\$8.95**  
Case (20 pc.) **N48-20256** **135.95**

<i>Half and Half</i>	10 bottles of polish /10 of lube

## Super 1050/RL 1050 Short Trim Die Toolhead

**N48-62219**  
**\$224.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. *(NOTE: the Blue 1050 toolhead stand – Part Number N48-62200, \$49.95 – is not included.)*

# Dillon's New Rapid Trim 1500 Case Trimmer <sup>23</sup>

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **N48-62164** is **\$329.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **N48-13141**, are **\$19.95** each. Upper lock rings, **N48-13559**, are **\$4.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	N48-62124	\$20.95

# Dillon's NEW Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access,

has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

- 4-3/4" SA Colts/clones **N48-11560**
- 4-5/8" Ruger Blackhawk **N48-15765**
- Ruger LCR **N48-29030**
- 2" J-Frame S&W Rev. **N48-15764**

## "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original. This belt is a favorite with law enforcement, military personnel, fire-

fighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

## Close & Ready Holster Caddy

Holster NOT Included

The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

N48-18046 \$29.95

## DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

N48-19371 \$29.99

# BLADE-TECH™

## “Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

# Range Bag

Dillon's Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 64). The Main Compartment is 12.5" long x 7" wide x 10" high, the

End Pockets are 8.5" tall x 6.5" wide x 2" deep and the Front Pocket is 9" tall x 6" wide x 2" deep.

Range Bag, Black  
Pistol Pouch, Black

N48-19366 \$89.95  
N48-17027 10.95

## 'Border Shift' Ammo Bag

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

I.D. Card Holder  
N48-14575 \$2.95

Black Ammo Bag

N48-13755 \$25.95

## Dillon's Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

Dimensions: 66" x 27.75"

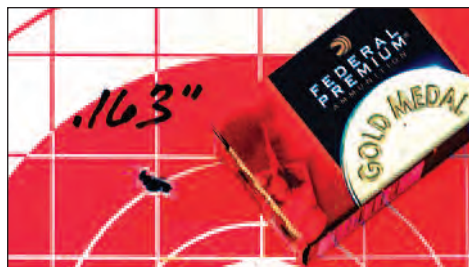

N48-18146 \$65.00

## Cameron's Rifle Continued from Page 11

At 50 feet from the bench, Cameron's rifle fired this 3-shot 1" group.

At 25 feet, three bullets went into this one-hole group measuring .163" center-to-center.

according to my dial calipers. Groups did impact 1-1/2" left and 2" high at 50 feet, less at 25 feet obviously. I could stand to see this rifle fitted with some sort of adjustable, aperture rear sight, but as Christmas was near, instead it went in the mail to a certain pretty little 12-year-old girl. Fortunately, according to Rita, both her daughters have absolutely perfect eyesight, "they can see a spot of lint on the carpet while walking down the carpet," so I expect the sights on the Anschütz will be considerably more visible to Cameron's 12-year-old eyes than they are to my 52-year-old eyes.

I mentioned the idea, in my earlier "Cayla's Rifle" article, that

Cameron's reaction to receiving her first-ever rifle was unrestrained joy.

while Cayla is a budding little gun nut, older sister Cameron is what I call "a non-gun person," i.e. she doesn't love guns, she doesn't hate them, she just doesn't care very much about them one way or another. Rita said to me, after Cameron got her rifle, "We may have underestimated how into gun's Cameron is. She's just absolutely over the moon about her rifle. She loves the fact that HER gun is vintage, HER gun is old, HER gun is European."

So two little girls, as Christmas presents, got their first-ever gun, one apiece bolt action, single-shot .22 rifle, each chosen to work for them in particular. My male-gunwriter gene is satisfied.

# Dillon's Pistol Die Sets

## Size Die

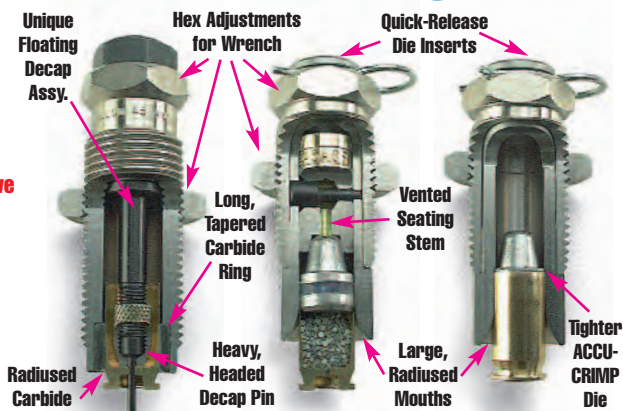

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	N48-10839	\$67.95
.308 Winchester	N48-15574	67.95
.30-06 Springfield	N48-10840	67.95

### Dillon Carbide Rifle Dies (Three-Die Sets)

.223 Remington	N48-10096	\$163.95

**Your Grandpa's  
Iver Johnson  
Iver Johnson  
Eagle XL 10mm**

## Reviewed by Peter Caroline

In the early 1980s, Lt. Col. Jeff Cooper envisioned a cartridge that would eclipse the classic .45 ACP both in power and range, capabilities that had previously been available only in revolver cartridges. Cooper, in collaboration with Dornaus & Dixon Enterprises, Inc., came up with a semiautomatic pistol design influenced to some extent by the Czech CZ-75. The pistol was called the Bren Ten. Its newly minted 10mm cartridge offered performance characteristics somewhere between those of a .357 Magnum and a conservatively loaded .41 Magnum.

Despite some very seductive hype on the popular "Miami Vice" TV drama, the Bren Ten saw limited sales, maybe 1,500 in all. One problem...the magazines were as scarce as a BLT in Mecca. When customers found that their pistol would be delivered without magazines, many orders were cancelled, and Dornaus & Dixon was effectively out of business. Colt picked up the 10mm ball with its Delta Elite in 1987, ditto Smith & Wesson with their Models 1076 and 1006, and GLOCK followed in 1991 with the Model 20.

Following the disastrous 1986 Miami shootout,

the FBI briefly considered arming their personnel with a 10mm pistol, but many agents found the pistols too large and the recoil too stout to be manageable. A shorter and less-ferocious version of the 10mm, entitled the .40 S&W, became the standard, and gained wide acceptance throughout the law enforcement community.

Today, the 10mm cartridge seems to be enjoying a resurgence. For those who require magnum-

**"It's obviously not an everyday carry gun, but a useful woodland companion for chance encounters with large, unfriendly wildlife."**

level performance in a semiautomatic pistol, it's a logical choice. It can also be a bit pricey, though, with most brands falling into the four-figure level. Iver Johnson Arms, Inc., offers its 1911-configured Eagle XL 10mm, with 6" ported slide and barrel, at an MSRP of \$940, with street prices considerably below that. I checked out

the Iver Johnson line of 1911s at the SHOT Show. They are Series 70 designs made for Iver Johnson in the Philippines, and very nicely put together with forged slides and CNC-machined frames. The Eagle XL, available in both 10mm and .45 ACP, is a particularly imposing beastie with its long, ported slide and barrel. It features front and rear thin-line slide serrations, a lowered and flared ejection port and a slightly beveled magazine well. The beaver-

tail safety has a memory bump. The finish is described in IJ literature as "matte blue"; it looked black to me. There is a fully adjustable Bomar rear sight with two white dots and a dovetail front sight. I was curious about the front sight, which has a dimple where a white dot would normally be placed. I was told that it was made that way in order that the user could paint whatever color front dot he or she desired.

I must admit that I was quite curious about the Eagle XL because I had never had an opportunity to fire a 10mm handgun. When the GLOCK 20 was fairly new on the market, I had considered buying one, but I was putting two kids through college and paying off two mortgages. So now, when I had an opportunity to put a 10mm through its paces, I ordered a sample Eagle XL and bought a quantity of ammo at my local gun shop.

When the gun arrived, I tried out the trigger. I had been told that the trigger pull was normally in the 6- to 7-lb. range, which seemed to be a bit much. The measured pull was, in fact, above the 8-lb. limit on my scale. Well, this promised to be an interesting test. I took the gun to my improvised range in the desert. The ammo I had on hand was Armscor 180-gr. FMJ and C.O.P. 155-gr. Solid Copper Hollow Point. Firing initially offhand at a 2" orange stick-on dot on a steel disk at 15 yards, I was surprised when my first and second shots shredded the target. I put up more stick-on targets

with the same results. Even more surprising, the recoil was comparable to that of a factory-load .45 ACP. This is most likely a benefit of the extended barrel and slide – the gun is 9-3/4" overall – and the 2 lb., 10 oz. weight of the pistol. From a portable bench with sandbags, the Eagle XL showed that it was capable of repeatable small groups. I had been advised that some break-in might be necessary before the pistol would function reliably with hollow points, but this was not a problem; it worked very smoothly from the get-go. The frame-to-slide fit was tight and wobble-free, and the action was very slick. The grips are comfortable...what Iver Johnson describes as "Dymondwood walnut," with laser-cut checkering and the traditional IJ owl head logo. The pistol comes with one 8-round Mec-Gar magazine, the inevitable cable lock, a lockable plastic pistol case and an owner's manual.

Overall, I like this gun. It has all the right bells and whistles, and performed very well despite the heavy trigger, which could be quickly remedied by any competent gunsmith. It's obviously not an everyday carry gun, but a useful woodland companion for chance encounters with large, unfriendly wildlife.

# CLASSIC FIREARMS: The Smith & Wesson

## By John Marshall

His name was Paris Theodore. Not many folks around today have heard of him. In 1966, after reportedly working for some unnamed clandestine government agencies for a few years, he started a small holster-making business in New York City. He was then 23 years old. On the quiet in the back of his shop, he also made very special firearms for government “spooks.” These included pen guns, cigarette lighter guns, a cartridge-firing clipboard, and some briefcase guns.

In the late 1960s, some of his clients asked if he could make an ideal undercover 9mm pistol for their overseas use. It would have to be concealable yet decisively and quickly effective. What he came up with was a cut-down and slicked-up version of the Smith & Wesson Model 39, which was a full-size single-stack double action 9mm pistol. It was called the ASP 9, and it incorporated over 200 changes to the Model 39. Theodore shortened the slide, barrel and frame, and lightened the slide considerably. He replaced the sights with a single “guttersnipe” fixture that in effect was a simple elongated V-shaped trough. The stocks were made of clear Lexan plastic, through which the number of rounds in the cutaway magazine were visible. A curved baseplate was added to the magazine. All sharp edges were “melted,” curved for smoothness. The hammer was bobbed to be snag-free, and the slide stop and safety were reduced in size and smoothed out. A forefinger hook was added to the trigger guard. The gun’s finish was Teflon-S, which had high lubricity. The double-action trigger pull was reduced from 10 to 6 pounds, and the gun weighed in at just 21 ounces. The overall length was 6.7”. It was an ideal concealment gun, quick to employ and more than effective for self-defense. Beginning in 1968, Theodore converted quite a number of Model 39s, and patented the design in 1971. In 1982, he licensed the conversions to be done elsewhere. He decided to quit working on guns after 1987, and his patents expired in 1988. He himself expired in 2006.

The management people at Smith & Wesson were impressed by Paris Theodore’s innovations on their Model 39, and saw a market for a factory-produced concealable 9mm pistol with similar characteristics. So in 1989 (right after Theodore’s patents expired) their Model 3913 was born. Taking advantage of more modern materials and manufacturing technology, the new gun became a sought-after item from the start. It was a generation 3 traditional double-action pistol with an 8-shot magazine. It had a shortened slide, abbreviated frame and a 3.5” ramped barrel. The frame was lightweight aluminum, while the slide, barrel and other components were stainless steel. It had a wraparound Xenoy grip with a straight backstrap, and an ambidextrous slide-mounted decocker/safety lever.

A magazine safety was incorporated, disconnecting the trigger when the magazine was removed. The gun weighed in at 25 ounces, and measured 6.8” in overall length. The Novak low-mount sights were fixed, but drift-adjustable for windage. This original Model 3913 continued in the S&W lineup until 1999.

In 1990, a very popular version of the 3913 was introduced as the “Lady Smith” model. Designed originally for the women’s market, it featured a slanted dustcover on the frame, and a slant-cut nose to the slide. The decocker/safety lever was

accessible for right-hand use only. The front of the grip frame and the forward part of the trigger guard were checkered. The Delrin wrap-around grip was a similar grey color to the aluminum frame. Both curved and flat baseplate maga-

“What [Paris Theodore] came up with was a cut-down and slicked-up version of the S&W Model 39.... It was called the ASP 9....”

zines were available. It featured a “Lady Smith” logo on the right side of the slide, and came in a softside carry case. The racy-looking Lady Smith 3913 was also so popular with males that an absolutely identical version was produced without

# Wesson Model 3913 Series Pistols

the “Lady Smith” logo on the slide. This was the Model 3913NL, and was first produced in 1991. It continued in the line until 1995, and was an instant hit with the guys. The pistol illustrated is a 3913NL, and was shipped in 1995. It is equipped with aftermarket tritium night sights.

A “tactical” version, the Model 3913TSW, was produced beginning in 2000. This had black hardware on the slide and frame and had “Tactical” inscribed on the left side of the slide. The original model had a shorter frame and used a 7-round magazine. Later ones used the standard 3913 8-

ore]  
a  
d-up  
w  
alled

round frame and magazine. These featured a black accessory rail fastened to the forward part of the frame. The upper rear of the barrel hood had a notch in it to serve as a visible loaded chamber indicator. The frame and slide had oversized frame rails that were machined as a matched set. Matching assembly numbers were inscribed on each of these two parts. All TSW pistols, including the double-action-only pistols described later in this article, have a modified barrel cam delayed-unlocking system developed by the S&W Performance Center. It provides arguably less felt recoil.

In 1990, the Model 3914 was first produced. This effectively was a 3913, but with a blued carbon steel slide and a black-anodized aluminum frame. A 3914 Lady Smith was also made, mimicking the slanted-dustcover 3913 Lady Smith, but with the blued finish of the 3914. It was laser-etched “Lady Smith” on the slide’s right side and came in a hard case. These are rare, as production on them stopped after just one year in 1991. The similarly rare 3914NL (no Lady Smith logo) with blued finish was its partner in the same time frame. A “value line” version of the 3914, with economy manufacturing shortcuts, was produced as the Model 908 from 1996 to 2007.

A double-action-only version of the 3913 was cataloged as the Model 3953 from 1991 to 1999. Ten were shipped to the NYCPD in January 1997 without magazine safeties; these were marked Model 3983. A “tactical” DAO version, the Model 3953TSW, with “Tactical” laser-etched on the left of the slide was produced from 1997 to 1999. It had an overall length of 6-5/8” and had the compact 7-round frame and magazine. The product code was 104540. Product code 10451 was also named the Model 3953TSW, but was essentially the 3913TSW (with normal frame and accessory rail) in double-action-only flavor. Its production began in 2000. Another double-action-only pistol was the Model 3954, produced in 1991 and 1992. It was basically a DAO blued Model 3914. Some 3954TSW pistols were also made, but are seldom seen today. Smith & Wesson could convert, on request, the safety on any DAO model to decock-only or eliminate it entirely. None of these DAO pistols could provide second-strike capability without working the slide. The lone exception was the Model 3914DAO, made specifically for NYCPD off-duty use, approximately 1995-2014. It did have second-strike capability and also differed from the 3954 in that it had a standard-size 3914 slide with no safety lever. Made in S&W’s Houlton, ME plant, it was uncataloged with product code 103922.

In 1998, an even more compact version of the 3913 was introduced as the CS9 Chiefs Special. Offered first in matte blue finish, the stainless iteration came out in 1999. These guns had 3” barrels and shortened frames and magazines with a capacity of 7 rounds. Overall length was 6-1/4”, and the weight was 20 ounces. An ambidextrous safety was standard. The Hogue wrap-around grip and often the safety were black, and “Chiefs Special” was inscribed on the left of the slide.

Now fully discontinued in favor of polymer-framed pistols, the S&W Model 3913 series guns have become sought-after collector items. They can still serve superbly as very concealable self-defense pistols, and not a few experts will tell you that they may in fact be the best production discreet-carry 9mm pistols ever made. Classics all!

# 46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

N48-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

Berry's Mfg. Clear Ammo Can

## SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

N48-21894

\$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

### By J.B. Wood

The history of this rifle goes way back, almost to the middle of the last century. Herr Vorgrimmler, an engineer from the Mauser Werke in what was then West Germany, was doing some design work in Spain for CETME (*Centro de Estudios Tecnicos de Materiales Especiales*). Ludwig Vorgrimmler perfected his version of a roller-locked bolt design in the early 1950s.

In 1954, the Spanish government invited Heckler & Koch to assist in production of the rifle for use by Spanish military forces. The first 400 guns were made in 1958. In the next year, the Bundeswehr of West Germany decided that this was a really neat design, and they adopted it as the G3.

Subsequently, Heckler & Koch produced the G3 for more than 40 other countries. A semiauto-only version was also offered for commercial sale, as the HK91A2. U.S. importation of that one ended in 1989, and when you find one, the price is going to be around \$2,500.

Well, thanks to the good folks at Century Arms, you can now get essentially the same thing for around \$750! And no, they haven't cut any corners. The quality is still there, and their C308 works perfectly. I think some of the parts are originals, from the European production of many years ago.

It has the original "roller locked" bolt design, which has been referred to by some writers as being a "delayed blowback" system. Nonsense. Locked is locked, there are just degrees of dwell time. To ensure reliable operation with all loads, the chamber is slightly "fluted," the grooves easing extraction.

The last feature mentioned makes it a little unfriendly to reloaders, as the fired cases will have a few stripes. That is, if you can find them. The ejection is quite vigorous, the C308 flinging them into the next county. The felt recoil, though, is moderate, only slightly more than a comparable gun in a smaller chambering, like .223.

To those who remember the earlier versions, the C308 will have a familiar feel. The manual

# The Century C308 Rifle

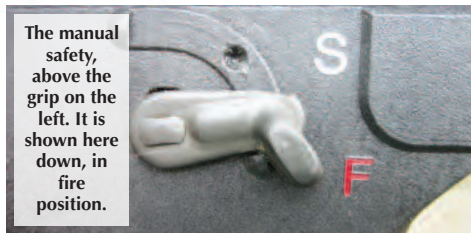

Above and top: Left- and right-side views of the Century C308 Rifle.

The test ammo, also from Century Arms, a full-jacket load, Boxer primed, from Poland.

The manual safety, above the grip on the left. It is shown here down, in fire position.

The bolt-retraction lever, pulled out for use, is otherwise kept flat against the receiver.

The magazine release button is on the right side, just behind the magazine well.

safety is at the top of the handgrip, up for on-safe, down to fire. The bolt-retraction handle is far forward on the left, spring loaded to lie flat when not in use. When it's fully to the rear, turning it upward to the right will lock the bolt open.

This last note is useful when loading. As with the original guns, seating a fully loaded magazine when the bolt is closed is difficult. The magazine release button is on the right side, and my elderly thumb found it to be quite stiff in operation. Younger hands will have no problem with it, and it does hold the magazine securely. In friendly states, capacity is 20 rounds.

For a military-style rifle, the sights are excellent. The flip-over rear sight is calibrated for 100 to 400 meters. The front sight post can be adjusted for windage. Fortunately for me, the 100-meter setting at the rear is a V-notch open sight. Because of an old eye injury, I can't use an aperture sight. The 200- and 400-meter leaves are that type.

My test firing of the C308 was at around 50 yards, seated, using a "casual rest" – an MTM

Shooting Stick. The .308 ammo used was also from Century Arms, made in Poland, "Hotshot Elite," 146-grain full-jacket. The distance factor made me hold low on the 8" black of the Champion VisiShot target. This proved to be just right. Well-centered groups were all 4" to 5".

For a gun of this type, the trigger pull was not bad. A tiny amount of take up, then a clean let off that was between 7 and 8 pounds on my Lyman electronic scale. It will likely settle in between 6 and 7, after more use. The other numbers: Barrel length is 18", overall length 40.5". Weight is 9 pounds 12 ounces, very close to the figure for an old original.

So, for everyone (including this writer!) who has always wanted an "old original" but paled at the price, the C308 is the answer.

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**N48-50050, \$399.95**

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**N48-50075, \$869.95**

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

**N48-50125, \$76.95**

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**N48-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

**N48-50001, \$299.95**

### E. (1) PRIMING CONVERSION

Converts Swager to Priming System.

**N48-50003, \$76.95**

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

**N48-50002, \$299.95**

.50 BMG Seat/Crimp Die

**N48-21895, \$139.95**

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

## Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	N48-14067	\$1.35
5-Pack of Die Lock Rings	N48-10669	4.15
1" Dillon Bench Wrench	N48-10842	7.95

# ElZetta

## Tactical Flashlight Mounts

Every ElZetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the ElZetta® ZFL-M60. (Sizing Adapters are not required when using an ElZetta ZFL-M60 or other 1-inch lights.) The ElZetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular ElZetta ZFH1500.

The NEW ElZetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the ElZetta ZFL-M60. The ElZetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

ZFH1500 AR15 Flashlight Mount	N48-12020	\$29.95
ZSM Tactical Shotgun Mount	N48-18050	39.95

# Infringed-Capa

## Talking Points for the Full

By Alan Korwin  
The Uninvited Ombudsman ([GunLaws.com](http://GunLaws.com))

Legislators have asked me to prepare this list, to help them with the media inquisition they face. Unbiased “news” media never grill people who want to limit or deny your right to arms, only folks who defend those rights. It’s unthinkable for network anchors to ask democrats, “Why are you proposing limits on magazines for the public, when any ammunition for criminals is already completely illegal?” Here’s the bottom line:

Depriving the public of gear as a way to stop murderers is misguided, doesn’t work and puts innocent lives at risk. At its core it’s a thinly disguised effort to get to zero-round magazines – in the false and dangerous belief that disarming citizens will finally disarm criminals.

### The crux of the magazine-infringement issue:

By focusing on magazine size instead of ways to stop active murderers you jeopardize everyone’s safety.

Hoping to limit murderers by limiting new magazine sales is irrational and **hoplophobic** (a morbid fear of guns).

The proposed ten-round limit is artificial – why not two, or eleven? Ask: Is there something magical or especially safe about the number ten? Then pause.

Are they saying it’s OK to only kill ten people? That’s “irrational” like the proposal itself. The typical/honest reply is “We would make it zero bullets if we could!” exposing the truth. Reporters should point out it already is zero – for criminals.

Would it be OK to make police obey the same limit for safety? The answer is self-evident – less ammo makes police less safe, not more safe. The same reasoning applies to the public, so the proposals must fail.

An infringed-capacity magazine violates your civil rights.

**“Depriving the public of gear as a way to stop murderers is misguided, doesn’t work and puts innocent lives at risk.”**

### Parity With Police – is what makes sense:

The public faces the same criminals police do. The public is *always* first at the scene.

Because you cannot justify infringing on police with ammunition limits, you cannot legitimately justify doing that to the public, for the exact same sensible reasons.

The public is entitled to equal protection under the law. Making people inferior to police is legally and morally indefensible.

Limiting the public doesn’t limit criminals. It just limits the public.

A criminal can’t have a magazine of any size. A law restricting size takes away nothing from the criminals we seek to stop. Limiting criminals to small magazines is nonsense.

One rational response in recognizing a person can go berserk and cause mayhem is to get educated, trained and learn self-defense techniques. A culture of marksmanship, which America used to have, would be a valuable asset to reintroduce.

### None of these arguments matter to the anti-rights side because:

Their goal is to restrict ammo for the public, not criminals who are already banned.

They roll out these arguments only after criminal atrocities, manipulating emotions, not calmly when it could be debated rationally, when it cannot withstand scrutiny.

They used the Tucson assassin for momentum, the Batman murderer,

Ft. Hood, Paris, San Bernardino, Sandy Hook, Orlando – where the real issues were psychopaths and the global muslim jihad, not magazines. Yet still the anti-rights people work to infringe the public, not the bad guys, and the media doesn’t call them on it.

They both seek any kind of gun bans they can get, regardless of crime-fighting potential, public safety, logic or reason. Magazine size is merely a *soup du jour*.

# city Magazines

## -Capacity Magazine Debate

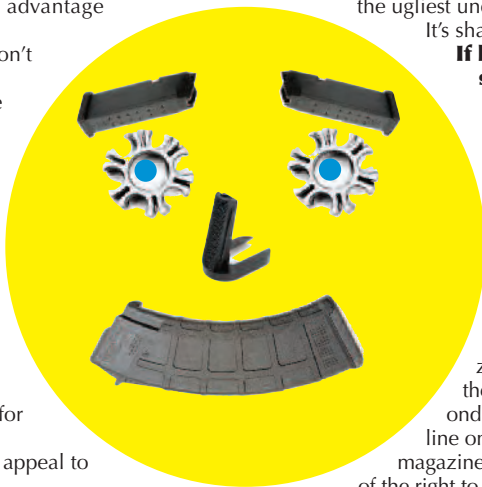

They are emotionally compromised. Tell them so.

### Self Test

1. Ask: "If more good people carried guns, the bad guys might get off less shots."
  - True.  False.  Don't know.
2. Limiting the amount of ammunition a person has for self defense is dangerous.
  - True.  False.  Don't know.
3. The only way to stop a lethal attack is with countervailing force.
 

That has stopped every single spree murderer so far.

  - True.  False.  Don't want to accept reality.
4. The correct response to a mass murderer is not to restrict the public, but to empower the public and give us every advantage possible.
  - True.  False.  I don't understand the question.
5. It's people who are the very first responders. Police are second responders.
  - True.  True.
6. Will magazine-size bans feel good, as if you're really doing something?
  - Maybe.
7. Will they actually do something good?
  - No.
8. What's the Latin name for that logic error?
  - Appellare desperadi*, appeal to desperation:
9. "We have to do something."
  - We must do the right thing, not SOME thing.
10. What's the larger name for that approach?
  - Security Theater.

**"The correct response to a mass murderer is not to restrict the public, but to empower the public and give us every advantage possible."**

### Simple reasoning might help:

- Will a magazine limit stop a murderer from carrying several guns? Of course not.
- Will it prevent swapping out magazines? How do you propose controlling that?
- How do you propose dealing with the tens of millions of magazines already out there?
- Does limiting the public limit criminals? It just limits the public.

If officials want to do something to increase public safety, organize public terrorism-response training programs, with this station and the Ad Council.

Inflicting on the size of a magazine doesn't stop crazy people.

Imagining that it somehow will, now *that's* crazy.

Trying to stop crime or crazy people by limiting any hardware size can't work. We tried that, for ten years under Clinton's size ban. It's a proven failure. *The NY Times* admitted this:

<http://www.gunlaws.com/NewYorkTimesAnd-Guns.htm>.

Using tragedy to advance a political agenda aimed at incrementally disarming the public is the ugliest underbelly of politics.

It's shameful.

**If legislation really could stop criminals there wouldn't be any.**

Laws do not stop crime.

Law enforcement stops crime.

Millions of 30-round and larger magazines are not used for killing, they're used daily at ranges, which is where most legal gun use happens. Attacks on magazines are attacks on ranges, the home court for the Second Amendment, the bottom line on legal gun use. Attacks on magazines are attacks on the heart of the right to keep and bear arms.

Inflicting on the Second Amendment is a violation of your oath of office.

Denial of civil rights under color of law is a criminal act. 18 USC §241 *et seq*.

Criminals can't have *any* magazines, ammo or firearms.

Disarm criminals first.

**Alan Korwin** is the author of 14 books, 10 of them on gun law. His book *After You Shoot* examines ways to lower your risks after a self-defense shooting. He has been invited twice to observe oral argument in gun cases at the U.S. Supreme Court. Reach him at [GunLaws.com](http://GunLaws.com), where he is the publisher of Bloomfield Press.

**64** *Get your "stuff" together, then keep it that way!*

Extra Loading Data Labels, N48-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em - you just can't beat 'em! Buy several and get your "stuff" together.

# Swab-its® - A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning

- rods, and are tough and reusable.
- .22/.56mm (6 ea.) **N48-15310 \$4.98**
  - .243/6mm (6 ea.) **N48-15311 4.98**
  - .307/.62mm (6 ea.) **N48-15312 4.98**
  - .357/9mm (6 ea.) **N48-15313 4.98**
  - .40/10mm (5 ea.) **N48-15314 4.98**
  - .45 Caliber (5 ea.) **N48-15315 4.98**
  - .50 Cal./28 Ga. (3) **N48-43311 9.99**
  - 20 Gauge (3 ea.) **N48-15326 8.98**
  - 12 Gauge (3 ea.) **N48-15325 8.98**
  - Multi Pack:** (6) .22/.56, (6) .307/.62, (6) .357/9mm, (5) .40/10mm, (5) .45 **N48-43312 26.99**

Gun-tips® 3" Precision Tip foam swabs are reusable. 24-count value pack. **N48-15345 \$9.99**

## Gun-tips®

Gun-tips® Extended Reach Firearm Cleaning swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package. **N48-12583 \$9.99**

## Bore-Whips™

Bore-Whips™ .17 and .22 caliber (pictured) by Swab-its® are ideal for air rifles, rimfires or any other .17 or .22 caliber firearm that's difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator. **.17 Cal. N48-12689 \$9.99**  
**.22 Cal. (Pictured) N48-12690 9.99**

## Gun-tips®

Gun-tips® foam swabs are reusable and replace cotton swabs. 9-pack **N48-15316 \$4.99**

## Ram Rodz Barrel and Breech Cleaners

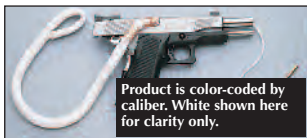

The RamRodz® Range Kit comes with 400 Breech Cleaners, 100 .22-Caliber swabs, 60 .38-Caliber swabs, 50 .40-Caliber swabs, 40 .45-Caliber swabs and 30 .50-Caliber swabs. **N48-43293 \$34.95**

## E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth	N48-18613	\$6.99
-----------------	-----------	--------

## Otis

Technology, Inc.  
Breech-to-Muzzle  
Cleaning  
System

The **Otis Technology, Inc. Breech-to-Muzzle Cleaning System** cleans rifles .22 to .50 cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal. The system includes three memory-floy rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

N48-18174	\$39.95
-----------	---------

## M-PRO7

**M-PRO7™ Gun Cleaner** is odorless, non-toxic and biodegradable. "Safely cleans rifles, handguns, shotguns..., black powder, corrosive priming deposits and much more."

4 oz.	N48-10139	\$11.95
8 oz.	N48-10138	18.95
32 oz.	N48-11298	40.95

**M-PRO7™ Copper Remover** works up to four times faster than ammonia-based cleaners and is odor free.

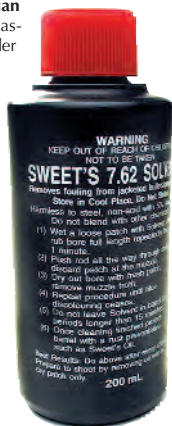

4 oz.	N48-19370	\$11.95
-------	-----------	---------

## Sweet's Australian

**7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try Sweet's!

N48-13128	\$12.95
-----------	---------

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	N48-15571	\$7.95
Slide-Glide Lite	N48-15572	7.95

**Microlon UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

N48-75125	\$9.95
-----------	--------

**FrogLube** is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

## Dewey's AR-Link Cleaning

Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1)

Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

N48-18599 \$14.95

## HIPERTOUCH® 75 24C AR 15/10 Fire-Control

The HIPERTOUCH® 24C is the competition version of high precision fire-control drop-ins for installation in AR-15® and AR-10® type rifles.

N48-11816  
\$235.00

## HIPERTOUCH® 24 3G AR 15/10 Fire-Control

The HIPERTOUCH® 24 3Gun, or 24 3G, is similar to the 24C, but with a curved trigger bow instead of straight, for installation in AR-15® and AR-10® type rifles.

N48-11819  
\$225.00

The Specialized Dynamics AR15/AR10 Armorers Upper Receiver Block is made from billet aluminum and holds your upper receiver securely in order to make it easier to install barrels, free-float tubes, muzzle devices, etc. One block fits AR15s and ArmaLite and DPMS platform AR10s. (Sorry, the upper receiver pictured above is NOT included.)

N48-43234 \$59.99

# C-MORE SYSTEMS

RTS2R

Railway

Tactical Sight

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

## 5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

*Sorry, the optic pictured here is NOT included with the Scout Scope Mount.*

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **N48-25374**

**\$79.99**

Scout Scope Mount for SKS Rifle **N48-25373**

# LOADING THE .30

A view of the author's Dillon XL650 reloader with .300 BLK in full process.

208 grain subsonic Hornady AMAX shown next to the author's 180-grain subsonic Rainier Ballistics Flat Point. Note the very different bullet profile.

## By Cameron Benz

The .300 AAC Blackout has become one of the more popular chamberings for the AR-15 platform. Despite five-plus years since its approval by the Sporting Arms and Ammunition Manufacturers' Institute (SAAMI), load data and .300 Blackout (.300 BLK) specific loading components have been slow to arrive. This is changing.

The .300 BLK draws on J.D. Jones' (of SSK Industries fame) work with the .300 Whisper, sometimes referred to as .300 Fireball or even .300-221. The ".221" reference comes from the necked-up .221 Fireball cases that were originally used to develop the .300 Whisper. Due to their similarity in case dimensions, it was decided .223 Remington and 5.56mm NATO cases could also be used as donors for the .300 BLK.

So what happened to .300 Whisper? There were never SAAMI specifications drawn up on the .300 Whisper, which meant there weren't really any standardized reamers. To complicate things further, Whisper was trademarked by J.D. Jones's company, SSK Industries, meaning that if anyone else wanted to use it, they had to pay royalties. To get around this, some companies would avoid using the Whisper name and instead list it as .300/.221 or something along those lines.

**"Affordable" factory plinking ammo has been in relatively short supply.**

Yet another issue was that .300 Whisper tended to see use in single-shot pistols such as the Thompson Center Contender where cartridge overall length wasn't a concern. However the same couldn't be said when it came to making it work inside the confines of an AR-15 magazine. With cartridges loaded long, the bullet wouldn't clear the thick rib near the front of the magazine. If a cartridge is loaded too long, even assuming it fits into the magazine, the bullet itself may bind on

the rib in the magazine, leading to failures to feed. It is conceivable to load subsonic cartridges to a shorter length, however the possibility then exists the cartridge can be easily, accidentally chambered in a .223/5.56mm AR-15 which would be a rather explosive situation (i.e. BAD).

Enter the .300 BLK, which was SAAMI approved as a standardized cartridge in 2011. The idea behind the .300 BLK was to have a cartridge that could be used in current AR-15s and M16 variants with minimal changes (it generally only requires a barrel change) and have the capability to shoot both supersonic and subsonic ammunition either with a silencer or without. That meant a user could swap from relatively quiet subsonic ammunition to a supersonic load, with similar ballistics to the 7.62x39mm, by simply changing the magazine. (As we will discuss later, due to

# 0 AAC BLACKOUT <sup>79</sup>

D&H Tactical magazines are available with a shallower front rib and reconfigured magazine follower for better feeding with subsonic 300 BLK. Their magazines are also available in a variety of finishes and capacities.

A peek at the contents of a 300 BLK cartridge using brass from GI Brass Locker and 180-grain bullets from Rainier Ballistics.

bullet shape issues, standard .223/5.56mm magazines tend to feed supersonic .330 BLK well but not subsonics.) Thus the cartridge could have some applicability for special operations personnel in various military units around the world. It also meant the cartridge could work well at short range on feral hogs, as Bill Wilson demonstrated pretty early on, as well as deer, due to the super-sonics being ballistically similar to .30-.30.

Early reception was very favorable due, in part, to Remington promising affordable ammunition. Plus .300 BLK tends to work quite well in short barreled rifles (SBRs). The reason .300 BLK works so well in SBRs is that it burns most of its powder in 10 inches of barrel length, thus there was very little reason to have a 16-inch barrel. I believe this fact, in part, led to the increase in popularity of short-barreled rifles both with and without suppressors, as in .300 BLK a suppressed carbine could be made up in a compact package without losing significant energy.

For military and law enforcement, this meant a solid performer that would retain 30-round magazines. To those lamenting that a 30-round magazine is unnecessary for hunting, I would submit that there is no rule anywhere stating that, just because you have the capacity, you have to use it.

**.300 Blk works well in SBRs because it burns most of its powder in 10" of barrel length.**

After all, you don't suddenly decide to use all the fuel in your car when you fill it up, do you? There are also lower capacity magazines available.

"Affordable" factory plinking ammo has been in relatively short supply. Non-plinking ammo is, in many cases, not one what would call affordable, with some of it reaching as high as \$1.75 per round. It doesn't have to be this way. Thankfully, reloading components, as of the time I write this (pre-three-ring circus presidential election), are beginning to become available.

#### **Brass**

Currently, several companies make .300 BLK brass. Remington, obviously, as they were involved with the initial production of ammunition. Lapua, Federal, Nosler, Winchester and even Norma have it available. For plinking ammo though, some of those options are a bit pricey. If you want a more economical

alternative, G.I. Brass Locker has once fired Lake City .223 brass they convert to .300 BLK. This is the route I chose for my plinking ammo.

#### **Powder**

Aah, it is nice to be able to find powder again! Most of the major powders are on the shelf in my local area. You'll need to check yours. Hodgdon has a lot of powders suitable for reloading the .300 BLK, depending on your selected bullet

**80** weight. If you're looking to load the heavy subsonics (200-220 grain), IMR and Hodgdon 4198, IMR 4227, Winchester 296, and Hodgdon H110 and Lil'Gun. If you're looking at loading the supersonics (110-180 grain), Vihtavuori N105 and N110, IMR 4227, Winchester 296, Hodgdon H110 or Lil'Gun are all fairly versatile, though if cycling an AR-15 is necessary, some of them may prove a bit more limited.

Then you have the subsonics on the lighter side, specifically 180 grains. At this point, you may need to play around. I was looking for a powder allowing a subsonic load that would cycle the gun both suppressed and unsuppressed. I settled on Alliant Reloder 7 due to input from Bill Alexander (more on this further down). This may change as more data becomes available.

### **Bullets**

The default for bullets has, for the most part, been either Sierra Match Kings or Hornady A-MAX or V-MAX. Outside of that, some opt for standard Full Metal Jacket .308 bullets, which are more common and still relatively affordable, but neither option has been a good choice for subsonic ammo.

Enter Rainier Ballistics. Bill Alexander and Rainier Ballistics collaborated to bring a plated 180-grain bullet to market, specifically for subsonic use. Normal jacketed rifle bullets are a bit heavier duty than necessary for subsonic ammunition

**The first look into the bag of .300 BLK brass from GI Brass Locker.**

and, as such, more expensive than necessary, particularly when one wants subsonic plinking ammo. (Suppressors are kind of fun, after all).

The projectile itself is rather interesting in its shape. Instead of having the curved ogive of most rifle bullets, it instead is more angular, with a blunt, round nose. One reason plated bullets are less expensive than jacketed bullets is they tend to use softer lead. With a plated bullet, going much

The two powders the author has used the most, so far, in loading .300 BLK. There are others that are also quite suitable.

narrower in the nose would result in bullet deformation when the nose impacts the feed ramp.

Now I get to the good news/bad news part of this. When loading .300 BLK Rainier 180-grainers to the longer lengths typically prescribed by load data, the bullet is forced against the inside rib of the magazine, resulting in binding and feeding issues, so running standard .223/5.56mm

magazines is not going to work without modifying the magazines. The good news is that D&H Tactical has relatively affordable, aluminum .300 BLK-specific magazines now available that remedy this issue, available in a variety of finishes and capacities.

There are also plated hollow point bullets in the works. According to Bill Alexander at Alexander Arms, they intend to have loaded subsonic ammunition available first, with component bullets available later. Their goal with this ammo is to be meet the FBI test protocol as closely as they can with this design.

In conclusion, the .300 BLK appears to have lots of room for growth as more development time is spent on it. More components are becoming available, and more data is being developed all the time. These factors, combined with the versatility of being able to be used for military, law enforcement, home defense, and even hunting, either with a suppressor or not, makes it a solid alternative to .223 Remington or 5.56mm NATO.

**Making Ammo: A Beginner's Guide to Hand-loading** by Kyle Lynch – Ammo shortage? Not anymore! Learn a new hobby that will save you money and ensure that you always have enough of the right ammunition for your shooting needs. This guide offers you an opportunity for first hand information from an experienced reloader as he takes you through the reloading process. Examples explain what works and what doesn't. If you are new to reloading or want to understand the fundamentals more fully, this guide provides simple step-by-step instructions.

**N48-43270 \$23.95**

**Legally Armed: A Concealed Carry Gun Law Guide** – Learn the basics of concealed carry and the laws associated with this astronomically growing group of self-reliant Americans. If you depend on a handgun for the protection of yourself or your family, arm yourself with knowledge, too. What's inside? What to consider before carrying a firearm • Protecting oneself: discharging a firearm in self-defense • What to do when interacting with Law Enforcement • Gun handling, practice and storage • State-by-state quick reference guide to carry laws where you live and travel.

**N48-43269 \$14.95**

**Armed & Smart: A Beginner's Guide to Concealed Carry** – If you are new to concealed carry and need a great resource for information, this is the book for you. This book covers all the basics a beginner needs to know.

Before you make the decision to exercise your Second Amendment right to bear arms through concealed carry, you should consider factors like what type of gun is best for carry, when to carry a firearm, how to carry concealed, and why you should carry a concealed firearm.

We carefully cover handgun safety and the proper steps for using and caring for your firearm. Other topics include cartridge selection, accessories available, practice techniques, and range etiquette. **N48-43232 \$16.95**

**Armed & Smarter: Advanced Concealed Carry Weapons & Training** – Once you have mastered the basics for carrying your concealed firearm, you need a book to build on that foundation and hone your skills to those of an intermediate-level handgunner. After obtaining your concealed carry permit and securing a firm grasp of the responsibilities attendant to carrying a concealed firearm, it's time to focus on becoming an excellent marksman.

In **Armed & Smarter**, our authors prepare you, the shooter and gun owner, to handle and use your handgun responsibly. By the end of this book, you will understand the importance of strong habits and perfect practice. **N48-43233 \$16.95**

# Wise Company's "Grab & Go" Emergency Food Kits

Wise Company's **18 Wise Favorites 72-Hour Kit** includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.
