# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

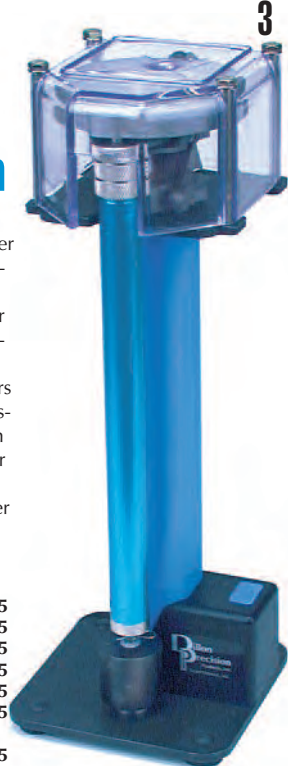

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

## We READ Our Mail!

Just finished the December catalog, it was almost as great as usual. Did you forget something? No model biography? She's been in at least two other magazines advertising for you, and looks very festive. Merry Christmas to everyone at Dillon Precision, you all do a great job and I admire your business model (and your cover models!) tremendously.

Jim Thomas – jim.thomas.17@gmail.com  
Sorry about that, Jim. Sometimes there just aren't any outtakes for Page 19, and sometimes I just need the extra space. Her name, by the way, is Susie.

As a very satisfied long-time customer of Dillon Precision – 20 or more years – I thought a comment might be helpful. My reloading room is filled with Dillon equipment including not the least of which includes two RL-550Bs and shelves full of other fine Dillon-supplied equipment. One of my favorite scales is your "Eliminator". I think it would be helpful in your advertising if you would mention that it is a three-prise scale unlike most others I have seen advertised. Possibly I have just missed that. Anyway, that sets that scale apart from others and that is a benefit that many "new to reloading" customers may not appreciate the value of until they use it. It's more than worth the few extra dollars it might cost.

Chris Carroll – chriscarroll4570@yahoo.com  
I am a neophyte to reloading. Your representatives were very helpful to me setting up my 550! While I have used a Square Deal "B" for 9mm, I'm using the 550 for .45-70. The Dillon company should give lessons in customer support.

Dr. Michael A. Greco (Mike)  
Even though I would look pretty foolish in a pleated Emini-skirt, sweater, and pom poms, I've been a cheerleader for the Dillon 550 press and Dillon service since I purchased mine nearly 30 years ago. The only problems I've had until recently were my fault, but Dillon's no B-S warranty covered my stupidity. Recently, I finally had a problem that wasn't my fault. A call to Gary Boyd got the repair parts delivered to my mailbox in three days. As usual, the No B.S. warranty was still in effect. As far as I'm concerned, Dillon is the gold standard which all manufacturers should strive to achieve!

**Dillon! Dillon! RAH! RAH! RAH!**

Tony Balaker – ceo\_scsr@yahoo.com

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our commercial-grade reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

### Reviewed by Peter Carline

My friend, Bill Berlat, has accused me of being partial to “weird guns.” I must plead guilty. While I certainly appreciate a good 1911 or a vintage N-frame, I do prefer a path less trodden. There is something almost magical about a Webley-Fosbery or a Bergmann Bayard or Mauser C96 or even a modern Chiappa Rhino. All are oddly appealing (or appealingly odd).

While wandering around the 2014 SHOT Show, I stopped at the Boberg booth. This little outfit in White Bear Lake, Minnesota, produces 9mm and .45 ACP pocket pistols with a fascinating difference. In addition to a rotating-barrel, locked breech action, Boberg pistols feature a patented reverse feeding mechanism. Cartridges are loaded nose forward into the back of the magazine. When firing, a live round is pulled out of the back of the magazine as the slide moves backwards. The round is then pushed up against the bolt face, where it is held, as the slide moves forward and inserts the cartridge **straight** into the chamber (Look, Ma, no feed ramp!). All this sounded rather Rube Goldberg-ish, but I was intrigued, and requested a sample 9mm model for testing.

Some months later, my test gun arrived, along with a great deal of literature. Included in the paperwork was a five-page list of different makes and models of 9mm cartridges. The first page listed cartridge types known to be incompatible with the Boberg pistol. Reasons for incompatibility included hard primers and, most important, improper crimp. Remember, the cartridge is being yanked backward, with great force, out of the magazine. A poor crimp or loose press fit will likely result in a separated cartridge, which makes a mess and could be embarrassing in some social

situations. The good news is, there are four pages of cartridges, with bullet weights from 90 to 158 grains, standard and +P, that will function perfectly in the Boberg.

With Boberg’s cartridge list in hand, I headed for my “happy place,” a large Ace Hardware emporium that stocks an amazing assortment of ammo. I selected Remington UMC Target 115-gr. MC, Winchester White Box 124-gr. FMJ and Winchester PDX-1 Defender 147-gr. Bonded JHP...all on the “Compatible” list.

When I set up at the range, I loaded the magazine with seven rounds of the Remington 115-gr. cartridges. It was more than a bit odd, loading the magazine from the rear. Also, the magazine has no follower. It’s not needed, but if you find this upsetting, Boberg can supply a follower for a couple of bucks extra (it works fine without it, really!). I racked back the slide with vigor, as instructed, and let it slam forward. The pistol fit my hand very comfortably, and the magazine tang offered a very secure grip. The long double action pull was smooth and about 7 lbs. The recoil was...surprisingly mild. I expected much worse. The pistol measures just 5.1” long by 4.2” high, and the weight is 17.4 ounces. At 10 yards, the bullet hit the steel gong right in the center, as did the next 6 rounds. The results with the 124-gr. and 147-gr. loads were identical...mild recoil, and shots hitting right where I pointed. The Boberg’s sights are a pleasure to use...three white dots, and sufficient space on either side of the front sight. The rear sight is adjustable for windage, and the front sight has two Allen screws and can be replaced easily. Standard barrel length is 3.35”, which, thanks to the unique magazine feeding system, is longer than any other

# Boberg XR9-S 9mm Luger <sup>11</sup>

9mm pistol of this size. A model with a 4.2" barrel, the XR9-L, is available, with somewhat superior ballistics, as might be expected.

According to Boberg's literature, one of the advantages of the Boberg straight feed system is the ability to use a tighter chamber, thus reducing out-gassing, and more energy being transmitted to the projectile. I'll take their word for it...none of my friends were willing to see if it hurt worse than a conventional 9mm. Spoilsports!

The Boberg comes in a well-padded hardcase, with an extra 7-round magazine, the inevitable cable lock and a wealth of explanatory literature.

Overall, I'm mightily impressed with the Boberg XR9-S. It shoots where it's pointed, feels comfortable in the hand and the recoil is inconsequential. In size, it is indeed a pocket pistol, but with none of the expected accuracy or power deficits usually associated with a pocket pistol. MSRP is \$1,049, which ain't peanuts, but the gun is first-class all around and built to last. Very tempting, indeed!

## Hyskore® Griplight: For Things That Go Bump In The Night

### Reviewed by Peter Caroline

It's 3 a.m., and you are awakened by the sound of breaking glass. You reach for your revolver and a flashlight. Have you ever tried aiming both a gun and a flashlight simultaneously? I have, while wide-awake in a night training exercise. I discovered that it's not all that easy, and requires a

good deal of practice. While professional instruction and a top of the line "hand-held illumination device" are quite desirable, there is now a more immediate and affordable one-hand solution... Hyskore's new Griplight, a compact 100+ lumen CREE LED light that replaces the existing grips on all S&W J-frame round-butt revolvers.

I tried out the Griplight and I must admit, it's pretty impressive. Installation is a cinch. You just remove the existing grips and replace them with the Griplight. The frame of the unit is aluminum, with tactile grip inserts. The Griplight is larger than

your standard grips because of the size of the Lithium CR2 battery required, but I found that the larger grip makes for far more comfortable shooting, especially with hot .357 Magnum defense loads. A micro-switch in the front of the grip turns on the light, illuminating both the room and your

front sight. There's also a main switch that can be turned off to prevent the light from being activated accidentally. The Griplight is pre-aligned, so no sighting-in is required.

The individual who came up with the idea for the Griplight is none other than Roy Huntington, retired police officer, gun magazine editor, *bon vivant* and all-around gun guy. The Hyskore Griplight is available at a price of \$129.95 at [www.cylinder-slide.com](http://www.cylinder-slide.com). Just click on "New Products" to find the Griplight, Part #CS0501, or call **1-800-448-1713**.

Strong Mount L05-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**L05-16627, \$82.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**L05-20302, \$25.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**L05-20251, \$87.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**L05-21353, \$29.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**L05-22120, \$30.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: L05-16629, \$19.95**

**Oversize Die: L05-16626, \$19.95**

**Plastic Funnel: L05-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

**L05-20029, \$22.95**

**RL 450 Powder Die:**

**L05-20308, \$21.95**

# RL 550B

**RL 550B DVD**  
**Instruction Manual**  
 L05-19483 \$19.95

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial Period!**

*All for ONLY...*  
**\$439<sup>95\*</sup>**

**L05-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

Total Price as pictured here with optional accessories: **\$736.60**

# RL 550B ACCESSORIES

## A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

### L05-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **L05-20782, \$76.95 ea.**  
Magnum Rifle Powder Bar **L05-21353, \$29.95 each**  
X-Small Powder Bar **L05-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **L05-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**L05-20064, \$11.35 each**  
**Three or more, \$10.25 ea.**

**X-Large Powder Die, L05-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**L05-13909, \$22.95 each**  
**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**L05-22055, \$20.95 each**  
**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

**L05-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

Square-Deal-Only Wrench	<b>L05-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	<b>L05-22051</b>	<b>\$48.95</b>
XL650-only	<b>L05-22052</b>	<b>45.95</b>
Square Deal "B"	<b>L05-22223</b>	<b>64.95</b>

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	<b>L05-22214</b>	<b>\$41.95</b>
RL 1050 Tray Kit	<b>L05-22215</b>	<b>41.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System  
**L05-97126 \$142.95**

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

**L05-16306 \$41.95**

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	<b>L05-17950</b>	<b>\$45.95</b>
Plastic Roller	<b>L05-22183</b>	<b>40.95</b>

**Quick-Change Cover** for use with powder measure. **L05-11143 \$14.95**

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

### RL 450 Upgrade Components

# Dillon's Case Preparation Equipment

**CV-2001**  
**L05-20493**  
**\$188.95**

**CV-750 L05-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator L05-20675 \$75.95**

**CM-500 Case/Media Separator L05-21045 \$47.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 L05-22047 \$213.95**

**Euro CV-750 L05-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle. **L05-13804** **\$8.95**  
Case (20 pc.) **L05-20255** **135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle **L05-13733** **\$8.95**  
Case (20 pc.) **L05-20256** **135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **L05-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **L05-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **L05-13496** **\$15.95**

This month's cover model is Katie with a Ruger New Vaquero Montado in .45 Colt with a 3.75" barrel, available exclusively from Davidson's Gallery of Guns.

## Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws. 4-3/4" SA Colts/clones **L05-11560** 4-5/8" Ruger Blackhawk **L05-15765** Ruger LCR **L05-29030** 2" J-Frame S&W Rev. **L05-15764**

## "Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport - and no more - so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

1911 Holster **L05-19947** **\$139.95**  
Mag Pouch **L05-19946** **44.95**

# Dillon's New Rapid Trim 1500 Case Trimmer 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **L05-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **L05-13141**, are **\$19.95** each. Upper lock rings, **L05-13559**, are **\$4.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	L05-62124	\$20.95
9mm Adaptor	L05-62168	14.95
.40 S&W Adaptor	L05-62169	14.95

**L05-20095**

# The Safepacker

**THE WILDERNESS' SAFEPACKER™ HOLSTER** is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

**Mark Pixler, editor**

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **L05-11703** **\$89.95**  
*"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.*
- "Commander" Safepacker, RH **L05-11702** **\$99.95**  
*"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.*
- "Officers" Model" Safepacker, RH **L05-11701** **\$99.95**  
*"Officers Model" Fits: Colt Officers' Model, GLOCK 19/23/30/32/36, Para P-12, etc.*
- "GLOCK 26/27" Safepacker, RH **L05-11700** **\$89.95**  
*"GLOCK 26/27" Fits: G 26/27, Springfield XD Subcompact, Makarov, etc.*
- "J-Frame" Safepacker, RH **L05-11699** **\$89.95**  
*"J-Frame" Fits: S&W Centennial, Taurus M85, Walther PPK, KelTec P-11, etc.*
- "Mustang" Safepacker, RH **L05-11698** **\$89.95**  
*"Mustang" Fits: Colt Mustang, Pony, KelTec P-32, Beretta Tomcat, etc.*

## Close & Ready Bedside Holster Caddy

**Holster NOT Included**

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

**L05-18046** **\$29.95**

## The Pistol Sheath by Center of Mass LLC

Center of Mass LLC's **Pistol Sheath** is an adjustable, ambidextrous, multi-fit KYDEX® holster that is durable, affordable and Made in Idaho!

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

### Measured Waist

# BLADE-TECH™

## “Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?! No excuse, Sir!

L05-19257 \$11.95

# Dillon's Pistol Die Sets

## Size Die

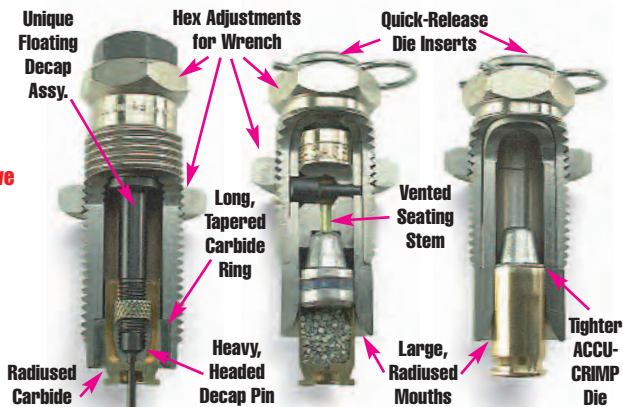

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

### Spare Decapping Pins

Package of 10	L05-21528	\$5.75
---------------	-----------	--------

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	L05-10839	\$67.95
.308 Winchester	L05-15574	67.95
.30-06 Springfield	L05-10840	67.95

### Dillon Carbide Rifle Dies (Three-Die Sets)

# Self-Defense Shooting:

The editor humbly suggests that the (unfortunately now-discontinued) CZ-83 ([www.cz-usa.com](http://www.cz-usa.com)) chambered in .32 ACP (7.65 Browning) might be an ideal choice for folks with recoil sensitivity issues.

## By Chuck Klein

Now that the baby-boomer generation is reaching their late 60s, it is clear that long-ignored shooting/self-defense issues are becoming apparent. If you're a senior citizen you most likely are a victim of C.R.A.V.Y. – Comfort-Recoil-Arthritis-Vision-Yips. One or more of these age-related maladies are evident if we're lucky enough to pile on the years. Though there is no cure to aging, accepting and dealing with symptoms is the only solution. These C.R.A.V.Y. factors, as they relate to handgun shooting and self-defense, are defined as:

**Comfort:** One of my fellow classmates at the Norwood, Ohio Police Academy (over 40 years ago) asked the OIC, Lt. Umbaugh, if we should carry a gun while off-duty. His answer was so obvious; I have not only lived it, but written about it and taught it. The Lieutenant said: *"One either never carries or one always carries, but one never sometimes carries."* When it comes to concealed carry, owning the latest and most powerful assault stopper is insignificant if it is too big or too heavy

for all day – everyday carry. There is a huge selection of carry rigs available from fanny packs/purses to holsters available to fit almost any part of the body. Finding a comfortable carry mode AND firearm that fits you and your lifestyle is a significant task and should be addressed with great importance.

**Recoil:** Many of us, as we age, become less tolerant to noise and physical punishment. Modern lightweight guns, even in the lesser self-defense calibers of .380 ACP, can be uncomfortable to shoot. The old saying, "a .22 caliber handgun beats an empty fist" applies here. The .22 is not known as a man-stopper, but a well-placed shot or two will go a long way to bringing an end to most life-threatening attacks. So what's the big deal if you're in a firefight and your +P+ magnum bruises your hand while stopping a deadly assault? The "big deal" is: if your carry firearm is punishing to shoot, then practice won't be high on your list of lifesaving priorities. Without regular practice your ability to stave off a deadly attack will not only be

# Considerations for Seniors

negated, but if a missed shot causes collateral damage and the following legal action discloses you didn't practice....

**Arthritis:** The affliction is suffered, at some level and degree, by most of the older generation. This condition might not be a noticeable problem while conducting everyday affairs, but strong and agile wrist, elbow and finger joints are a requisite to defensive handgun shooting. Being unable to operate a double-action trigger, grip the handgun with adequate strength or rack a slide is common among persons with arthritis. There are some medications that help, but the severity of the ailment usually comes and goes during the week or day – or even hour to hour. If you've noticed it's difficult to make a tight fist or experience discomfort in other joints, now might be a good time to begin looking for a handgun you can operate with ease.

**Vision:** This is the easiest of the five factors to correct. Of course, eyeglasses will improve visual acuity – if you have them on. Corrective lenses will not solve issues related to cataracts, night blindness or specific distances such as being able to focus on the front sight while still seeing the rear sight AND the target. One solution to most vision problems can be overcome by learning and practicing instinct shooting, i.e., shooting by focusing on the target only. Under close-quarter-combat conditions, if you can't see the sights but can still see the target, the point-shooting technique should be sufficient. Another remedy is laser sights, though they have the drawback of having to expend an instant looking for that red or green dot.

**The Yips:** A term attributed to golf pro, Lee Trevino, to describe an involuntary, unexpected

and age-related twitch. Swinging smoothly and following through during a putt is no different than stroking a trigger. If, at this critical moment you suddenly have an, albeit, minuscule muscle spasm – you missed. Missing a putt, even if for big bucks, is not the same as missing a shot that cost you your life. For no other reason, this is why one should always keep their finger off the trigger until a shot is necessary. There is no known cure for the Yips and this quirk tenders no warning, but a firm two-hand and practiced grip will help to hinder twitch possibilities.

**Summary:** First, if you're over 50, own up to the fact that you are aging. Test yourself with honest appraisals every time you handle your carry firearm. Second, only carry a firearm you shoot well and one that is comfortable – size and weight wise. A diminutive handgun might be easy to carry, but if you can't hit a man-sized target at close-quarter-combat distances, it will be of little value. Many modern firing ranges rent handguns for the purpose of allowing their customers to try-out different guns to help determine what works best. It's an inexpensive way to learn what's a good fit for you. Finally, practice self-defense tactical shooting including instinct combat shooting.

# Comp-Tac's Trojan Horse Long Gun Case 39

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Standard Trojan Horse Long Gun Case **L05-19388 \$75.00**  
 Heavy Rated Trojan Horse Gun Case **L05-16229 100.00**

## A DCO SUPER

**ATHUMB®** offers models for popular centerfire pistols and 10/22 style magazines.

## AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

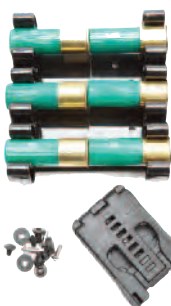

**AP Custom USA's** Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

## TACCOM, LLC Tactical and Competition Accessories

**TACCOM, LLC's** Dualload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip** (included) that can be attached at various angles. The Dualload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE	<b>L05-19530</b>	<b>\$9.95</b>
4Up w/Tek-Lok™	<b>L05-19531</b>	<b>29.95</b>
6Up w/Tek-Lok™	<b>L05-19532</b>	<b>34.95</b>

**TACCOM, LLC's** Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holder and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder	<b>L05-19543</b>	<b>\$39.95</b>
8Up Quaload Shotshell Holder	<b>L05-19544</b>	<b>69.95</b>

## THE SWAB THAT DOES THE JOB

### Gun-tips™ Foam Swabs Reviewed by Peter Caroline

Nooks and crannies are wonderful things...on English muffins. On guns, not so much. The nooks and crannies encountered on firearms are repositories for gunk and crud and nasty stuff that turns a functioning gun into a paperweight, inevitably when you most need it to work.

In the June 2014 issue of *The Blue Press*, I wrote about Bore-tips® by Swab-tips®, an economical, washable and re-usable replacement for traditional bore-cleaning patches and jags. On those occasions when I absolutely must get off my indolent posterior and clean my guns, Bore-tips make the task go a lot easier and quicker, and there are no grimy patches to dispose of. Once the bore is clean, then comes the fun of cleaning the above-mentioned nooks and crannies. For years, I used cotton swabs...lots of them. And they didn't really do the greatest job; usually they managed to

replace gunk and crud with lint, which then had to be swept out with a toothbrush or brass brush. I've also used automotive starting fluid, basically ether, which is pretty nasty stuff, and you don't want to use it indoors. It also leaves a dry residue, which has to be blown or brushed out.

Gun-tips® are a whole different ballgame. Unlike cotton swabs, they are reusable, and they come in a half-dozen different sizes, shapes and lengths, so you always have the right configuration for cleaning and lubricating every crevice or hard-to-reach area. All you do is soak a Gun-tip in gun-cleaning solvent or lubricant and you're good to go.

To reuse Gun-tips, simply dip them in mineral spirits and let them dry, or you can use a grease-cutting soap like Dawn dish-washing detergent, rinse and let dry.

Like Bore-tips, Gun-tips are available from Dillon (See Page 65). Who said you can't get good help nowadays?

# CLASSIC FIREARMS: The S&W H

By John Marshall

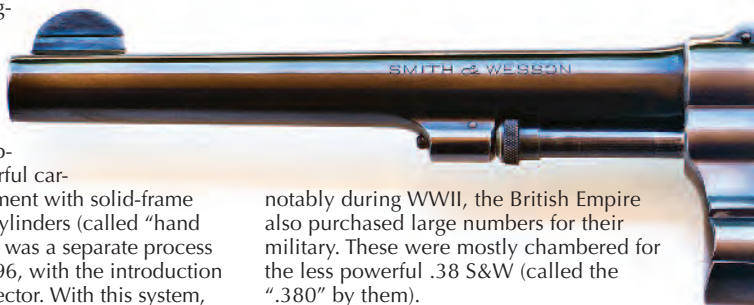

It is arguably the most popular revolver ever made. Its reputation was such that even one of our prominent high-ranking enemies (German *Reichsmarschall* Herman Goering) carried one for protection during WWII. The Smith & Wesson Hand Ejector Military and Police revolver found universal acceptance with police and military units throughout the world as well as with the civilian population. The immortal .38 Special cartridge came into being with this handgun, and the hand-fitting “K-frame” has survived from 1899 to the present day. This is its story.

Smith & Wesson had for years made a variety of “top break” revolvers in which spent cartridge cases were ejected automatically by lifting a latch and swinging the barrel and top frame downward. While this made for speedy ejection, the relative weakness of the jointed two-piece assembly prohibited the use of more powerful cartridges. S&W’s first experiment with solid-frame revolvers with swing-out cylinders (called “hand ejectors” because ejection was a separate process by hand) took place in 1896, with the introduction of the .32 caliber Hand Ejector. With this system, the cylinder in the solid frame was released for opening by pulling the ejector rod located in the center of the cylinder forward. It could then be swung out on a yoke, and the ejector rod could be pressed or hit with the thumb or palm of the hand to extract and eject all the cases in the cylinder. When the spring-loaded extractor rod retracted back into the cylinder, the cylinder could be fed with fresh cartridges. With this accomplished, the cylinder could be rotated back into the frame and would latch automatically when fully closed.

Company president Daniel Baird Wesson conferred with his son Joe to develop a similar revolver, which was originally planned to fire the .38 Long Colt cartridge, then the standard U.S. service revolver round. This anemic number had a poor reputation for stopping power, and so D.B. Wesson decided to upgrade that cartridge instead to give it more power. He chose to lengthen the cartridge case slightly and increased the black powder charge from 18 grains to 21.5 grains. The standard bullet weight was increased from 150 grains to 158 grains. This new round was introduced as the .38 S&W Special concurrently with the first “K-frame” revolver in 1899. In this revolver, the cylinder was released for opening by pushing a thumbpiece located on the left side of the frame. The new revolver was marketed as the .38 Military and Police Model. This first issue is now referred to as the Model of 1899, and it was

provided in both .38 Special and .32 Winchester Center Fire, also known as the .32/20. These handguns could be purchased either blued or nicked in barrel lengths of 4”, 5” and 6”. All had rounded rather than square frame butts. The .32/20 variation was not as popular as the instant-hit .38 Special.

On June 25, 1900 the U.S. Navy made the first military purchase of the .38 M&P Hand Ejector, ordering a batch of 1,000 revolvers. These guns were serial numbered in the S&W system from 5,000 to 6,000. The U.S. Army quickly followed suit in February 1901, ordering 1,000 handguns in the serial range of 13,001 – 14,000. These were the first purchases of many versions of the gun by our armed forces over the years. In later years,

notably during WWII, the British Empire also purchased large numbers for their military. These were mostly chambered for the less powerful .38 S&W (called the “.380” by them).

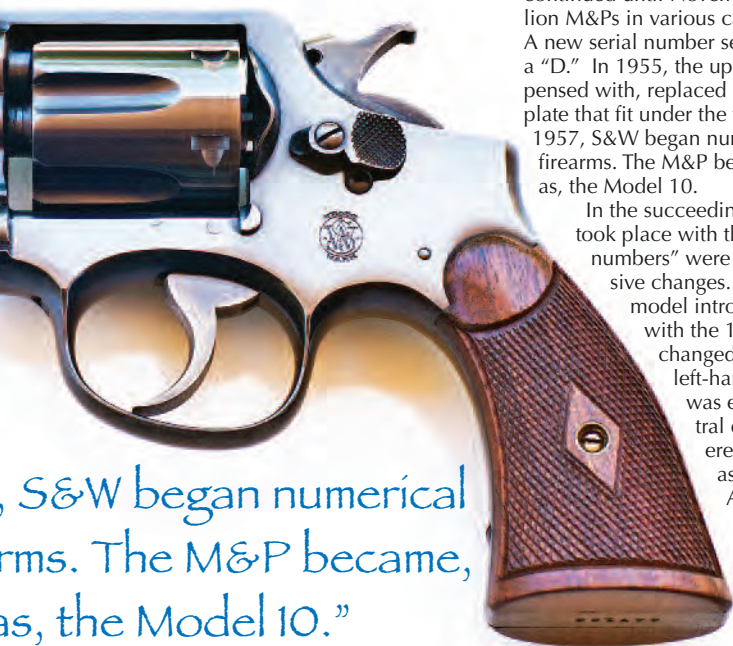

In 1902, an important change was made in the latching system by providing a lug on the barrel that contained a short spring-loaded locking bolt that latched into the front of the ejector rod. This provided a 3-point lockup for the cylinder – the barrel latch, the cylinder stop, and

“Starting in June of 1957,  
designations for its firearm  
and is now known a

finally the spring-loaded pin in the middle of the ejector star, which fit into the frame itself. This improved revolver was called the Second Model, or Model of 1902. My paternal grandfather purchased one of these in 1904 as a store gun when he owned a country store in northern Kentucky. It still works after well over a century and remains in the family as a valued heirloom. In 1904, an alternate square butt style was introduced. This became very popular, as it allowed better control. It quickly became the standard configuration. This was the last change of the gun under D.B. Wesson, as he passed away the following year. He was succeeded by his son Joe.

# Hand Ejector .38 M&P Revolver

There were gradual changes over the years in the lockwork of the M&P. The early models were not entirely drop-safe, although the hammer-mounted firing pin automatically retracted when the trigger was in the forward position. A push or blow on the hammer would allow the firing pin to come in contact with the primer. Beginning in 1915, a change was designed to prevent this. The revolver illustrated is specifically known by collectors as a Model of 1905 4th change. Made in 1923, it has a leaf spring hammer block in the sideplate that is designed to make it drop-safe. It extends under the hammer when the trigger is at rest, and is cammed back by a projection on the hand to retract it when the hammer is cocked or the trigger

... S&W began numerical  
... arms. The M&P became,  
... as, the Model 10.”

is pulled. Unfortunately, if dirt, debris, rust or heavy grease prevents this key part from extending under the hammer by its own spring action in order to block it, these later guns could conceivably fire if dropped on the hammer. Although this rarely happened, it was possible. During WWII, one of our sailors dropped a loaded Victory Model revolver (essentially an M&P with a wartime finish and smooth wood stocks) on the deck. It fell on the hammer, discharged and killed him.

Following the receipt of this distressing news at S&W, its then-president Carl Hellstrom immediately directed that a mechanically actuated sliding hammer block be designed and made standard.

This improved and very positive system, first implemented in late 1944, proved far safer and is still in use today. Many Victory Model revolvers were retrofitted with the new safety device. Those with serial numbers incorporating an “S” identify the improved revolvers.

Following the war, commercial production began anew in late 1945 at serial number S811,120. Sales immediately became brisk for both police and civilian use. In February 1948 at serial number S990,184, the .38 M&P was further improved by using a shorter hammer throw that was originally designed for target revolvers. In March of that same year, the second millionth M&P revolver was shipped, at which point a new serial number series beginning with C1 was started. It continued until November 1967, when three million M&Ps in various calibers had been completed. A new serial number series was then prefixed with a “D.” In 1955, the upper side plate screw was dispensed with, replaced by a tab at the top of the plate that fit under the frame. Starting in June of 1957, S&W began numerical designations for its firearms. The M&P became, and is now known as, the Model 10.

In the succeeding years, gradual changes took place with the Model 10, and “dash numbers” were instituted to reflect successive changes. For example, the 10-1 model introduced a heavy barrel, and with the 10-2 model the extractor rod changed from right-hand thread to left-hand. The trigger guard screw was eliminated in 1962. The central diamond pattern in checkered grips was deleted in 1968, as was the barrel pin in 1982. All the dash numbers are too numerous to catalog here, and many offshoots of the Model 10 were developed and put into production. Suffice it to say that the .38 M&P is still made today. It has evolved with a

floating firing pin, some metal injection molded parts, minor lockwork changes, a frame flange rather than a stud as a cylinder stop, and a controversial internal lock located just above the cylinder release thumbpiece. The old-time careful hand fitting has been replaced by computer-controlled tight manufacturing tolerances.

It may be blued, nicked or stainless, and its model number may vary, but the basic K-frame revolver first introduced in 1899 and the .38 Special cartridge that accompanied it are enduringly popular today. It has become an icon around the world, a true classic that may still be around well into the 22nd Century.

## 46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

# SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

L05-21894

\$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

L05-19972

# Concealed Carry Tote<sup>47</sup>

**\$45<sup>00</sup>**  
**L05-18193**

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

## 'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner **L05-10252** **\$24.95**

# TUFF PRODUCTS MAG POUCHES

Front view with flap.

Front view without flap.

Rear shows loops and Molle fasteners.

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system; for instance, the Dillon Range Bag, a tactical vest or body armor carrier. Available in black or coyote brown.

## Comtech's STINGER

**THE STINGER:** Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

**L05-19495** **\$9.95**

## Baschieri & Pellagri 12 Ga. Target Slug

Reduced recoil, 1200 fps  
 25 per box

**L05-19214** **\$21.00**

**Streamlight's Nano Light® LED** flashlight is super bright (10 lumens), can be seen a mile away, is made of virtually indestructible machined aluminum with an anodized finish, is weatherproof, nearly weightless and fits on your keychain or zipper pull tab!

**L05-19942** **\$11.95**

# Burnin' Down the

By Robin Taylor, [www.taylorfreelance.com](http://www.taylorfreelance.com);  
Photo by Whoever

Shooters from around the world migrate to Rio Salado Sportsmen's Club in Arizona to shoot the "Desert Classic" each November.

They come to "Rio" to test themselves against Rob Leatham, Nils Jonassen – the very best of the best.

Kincaid Ross joined the crowd and came hundreds of miles south (from Reno) to test himself. After quietly driving toward his goal of becoming a professional shooter for years, now was the time to try. He'd placed 21<sup>st</sup> in the World at the recent World Shoot in Florida – but Rio?

The result is still spinning around the discussion forums. Kincaid Ross WON the "Desert Classic" by a wide margin, leaving legendary marksmen in his dust. Cameron Custom's Eddie Garcia finished second, Grand Master Naim "Nick" Saiti third.

Winning the Area 2 got him noticed, but before he thinks about "going pro" he needs to wait a bit.

Kincaid turned 15 in August. As a high school freshman he's still balancing girlfriends, Algebra 1, and the drama of adolescence. He's nine months from getting a driver's license, yet he shoots circles around expert marksmen twice his age.

"I've been shooting seriously since March 2012, I guess that's almost three years," says Ross.

Kincaid actually started shooting when he was three (yes, three), going to the range with his grandfather and plinking from a bench. He started shooting pistols with grandpa at age nine.

"We went to bowling pin matches," Kincaid says. "Then when my mom married my stepdad, I kind of got him into it."

I paused, "Wait, you got YOUR STEPDAD into shooting – not the other way around?"

"Yeah, it's a little backwards," laughed Kincaid.

Glenn Fannin (who manages first responders for the local power company) gave up team roping and rodeos to shoot with his stepson. Now the two travel together extensively, hitting roughly one "major" match a month. "We take December and January off and re-start at the Florida Open," says Kincaid.

Kincaid continues a tradition of young American phenoms that have terrorized the USPSA/IPSC world over the last decade. KC Eusebio, Max Michel Jr., Blake Miguez, Chris Tilley, JJ Racaza – all of them were young superstars, often winning gold for the United States team.

# Southwest - Reno's Kincaid Ross

49

## Awesome Gear

Like those that came before him, Ross shoots "Open" division – the "top fuel" division of USPSA/IPSC. Open guns are famously high-tech, and Ross' pistol takes that to a new height.

"I shoot a custom Limcat "H-Bar" that has a tungsten sleeved barrel," says Ross.

The heads-up red dot sight, recoil compensator, and 28+1 magazines are standard for Open guns, but the tungsten barrel-sleeve concept just came out.

"There's only so much weight you can put on the slide without making the gun recoil more," says Ross. "Weighting the barrel makes it shoot a little flatter."

Kincaid's ammo uses a 9mm Luger case, but he loads it long and super-hot, achieving power levels well above +P standards. USPSA shooters call this handload "Major 9," and Ross' particular version propels a 124-grain Berry's hollow base driven by Winchester Autocomp at a little under 1400 fps. Yes, that's almost .357 Magnum ballistics, so PLEASE DO NOT TRY THAT AT HOME! If you must know more, contact Kincaid's sponsor Battleborn Ammunition – but don't be surprised if they're a little hesitant to share data.

## Awesome Coaching and Support

When you see Kincaid Ross and his stepdad at the range, take a step back and look for another Limcat jersey. Odds are, that's James Ong, a well-known grand master from Reno that has taken the time to invest in Ross and his career.

Where stepdad Fannin covers the parental and mental sides of supporting Kincaid, Ong and his friend Johnny Lim (of Limcat Custom) have supported Ross on the technical side. Limcat Custom forms a bridge between the American shooting scene, and the Philippine Practical Shooting Association (PPSA). Practical shooting is huge in the Philippines, and a great many of the world's greats have direct or indirect connections with PPSA and/or Limcat. Limcat's gorgeously machined custom STI/SV 2011-pattern racing pistols command respect among champions on both sides of the Pacific.

This year the Philippine juniors bumped Kincaid and the US juniors down to silver-medal status at the World Shoot.

Kincaid defeated all the individual Philippine junior team members, but lost to an older youth from Finland. Now ranked second worldwide, God willing Kincaid will be back in three years to take the gold.

Talking to him today, you'll find a confident, quiet young man that has the social graces of the Southwest. He answers questions with a calm "Yes sir," or "No sir," and doesn't exaggerate. He's a steady, even speaker, and prefers country music to

pop. "I like the faster stuff," he says. "And some of the older country."

On the line, he's wickedly fast, taking time to build himself up for an explosive start. He'll go through his pre-shot routine, visualizing what he's about to do, then breathes deep and focuses as the Range Officer announces "Shooter ready! Stand by...."

"Watch him," says teammate Christopher Oosthuisen, "and right before he starts his fingers start to twitch."

## Training

"We practice about once a week, and it's usually just me and my stepdad," says Kincaid. Ong may come by, but the "real work" is done in those local matches, perfecting Kincaid's game through repetition and study.

"Generally we're figuring out whatever we're weakest at, and working with it," says Kincaid.

At 5'11" and 160 pounds, Kincaid is tall for his age. Big strides eat up huge amounts of terrain, giving Kincaid an edge.

"Where I gain my time is movement. I don't have record splits or draws or anything, but I have it all combined to where I can *run*," he says.

Kincaid emphasized that "I don't have a particular thing that I'm fantastic at," his main skill is the ability to put everything together so it flows – reloads, shooting, pivots, movement, etc.

## Looking Ahead

"He's really whupping up on us," says an amazed Nick Saiti.

"If he can stay on this track, obviously he's got a bright future ahead of him," adds Oosthuisen.

Practical shooting generally isn't a scholarship sport, much less a career path, but there are a lot of doors that open for grand master-level shooters.

That's something the family is praying about when they talk over career plans with their top-rated son.

"Right now I'm looking to do AMU or be a training instructor like JJ Racaza," says Kincaid. "I'm thinking along the lines of training people how to shoot guns."

It's not easy to balance nationally ranked athlete status against having something like a normal life on the other. Kincaid has two older step siblings and two younger half siblings, and the Rosses have started exploring home school/on-line school because conventional schedules pose problems.

"After school and family, shooting is my focus right now, and will be for a long time," says Kincaid.

USPSA will remain his focus for now, but look for his name to appear near the top in other shooting games as well. If you have an interest in the future of the shooting sports, keep an eye out for Kincaid Ross.

# 50 "Big Fifty Reloader"

## STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

## Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring

## Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Armorer's Block **L05-19536 \$29.95**

## Sun Devil Mfg. AR-15/10 ADIGS

Sun Devil Manufacturing's Adjustable Drop In Gas System for AR-15 and AR-10 rifles allows you to adjust your rifle's gas system for best performance.

**L05-19674 \$59.95**

## EGW AR-15 Forward Assist Plug

Evolution Gun Works' AR-15 Forward Assist Plug is for use on competition rifles that do not use the forward assist. It's anodized for long life, matted to match most uppers.

**L05-18991 \$9.99**

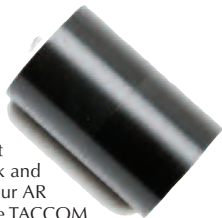

TACCOM's Enhanced Firing Pin for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

**L05-19538 \$13.95**

The TACCOM Extreme Extractor is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

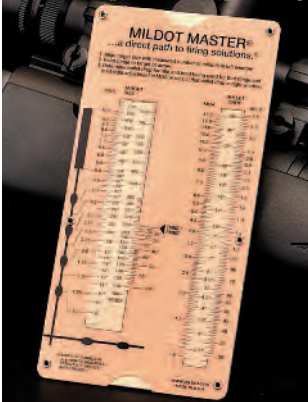

**L05-19539 \$10.95**

Does your .22 Long Rifle insert move back and forth in your AR upper? The TACCOM Pressure Plug will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

**L05-19533 \$7.95**

## MILDOT MASTER

You can become a master at using a Mil Dot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

Mildot Master® **L05-14762 \$29.95**

## The Larry™ 8 LED Pocket Work Light

The Larry™ 8 LED Pocket Work Light is the essential handyman light. 8 powerful LEDs provide 60 lumens of bright white light. The rotating magnetic clip gives you convenient hands-free lighting. The reinforced plastic body design is shock-proof and water-resistant, making the Larry™ basically indestructible.

The ERGO Grip Delta Grip™ is the first truly ergonomic grip for J Frame revolvers. Designed for the most important part of the gun, the shooter, the Delta Grip was engineered to fit the natural point of aim and mechanics of the human hand, wrist and arm. The result is a grip with a superior natural point of aim, comfort and control. Fits round butt J-Frames. Will not fit on Smith and Wesson Bodyguard 38 Model (sku 103037 and 103038).

L05-19684 \$19.95

## DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

# The Heckler & Koch

1.

2.

3.

1. The HK VP9 is a striker fired, polymer framed, high capacity 9mm.  
 2. Front sight is an almost square cube highlighted with a large yellow dot.  
 3. Rear sight is a Novak LoMount-ish fixed unit, also highlighted with yellow dots. 4. The VP9 has slide release levers on both sides of the gun. 5. The magazine well opening is wide and nicely flared.

5.

4.

## By Duane Thomas

When you first examine Heckler & Koch's new VP9, you will have two immediate reactions. (1) "This looks like a striker fired P30." However that impression is illusory. The VP9 does incorporate the hammer fired P30's very distinctive removable/replaceable side panels/backstrap system, and in fact feeds off the exact same magazine holding 15 rounds of 9mm. Other than that, these are two very different guns. (2) "This looks a lot like a Walther PPQ." There is a lot of truth to that latter impression. However, while it's tempting to view the VP9 as essentially a Walther PPQ with a P30 grip grafted on – because that's certainly what it looks like – examining both guns' internal designs shows us not only many similarities but also many differences between the two.

Sights on the VP9 are a smooth ramp up front and a Novak LoMount-ish fixed rear. These sights are highlighted with three dots, one up front, and one to each side of the rear notch, of glow-in-the-dark paint. This is an attempt at night sights from a country, Germany, where tritium vials are illegal except for spec ops teams, and regulated heavily even there. While the paint on the VP9's sights does hold its brightness longer than that on an HK 45 Compact I tested just a few short years ago (which would dim totally out inside a minute of being placed in darkness after being exposed to a bright light source), still I would say the person who's been carrying this gun under a concealing

garment for hours on end before pulling it out in self-defense, expecting to see glowing dots, is going to be disappointed.

The sight picture is quite cramped, with very little in the way of light bars. Also since so much of the front sight is taken up with a large, light colored dot which makes the blade appear to fade out when viewed through a tight rear notch, the overall sight picture is not the most visible thing in the world. If this was my gun instead of HK's, I would be removing the useless paint with fingernail polish remover to give me a plain black sight picture, and applying the kiss of the file to thin the front blade and widen the rear notch thus creating decent light bars.

At the rear of the slide, to either side, is found a protrusion HK calls the "charging support" designed to give added purchase when racking the slide. No one I've let handle this gun is indifferent to this part; they either love it or hate it. The good news is, if you fall into the latter camp, the part is removable. Drive out the rear sight, lift off the upside-down U-shaped piece of plastic that was held in place by the rear sight, then reinstall the sight.

The one feature that, in my experience, most people comment on negatively regarding the VP9 is the slide release, which they find so low profile it can be difficult to actually use during a fast slide-lock reload. I didn't have that problem myself, it seemed just fine to me, nicely protuberant, well-serrated. My problem with the slide release is that

# VP9 “Volks Pistole”

6.

7.

9.

8.

6. The VP9 trigger features the “second trigger” lever commonly seen on Glocks. Note the trigger guard does not feature the raised “speed bump” in its interior, seen on previous HKs, that many users found abraded the underside of their trigger finger. 7. The VP9’s ambidextrous magazine release paddles, in Thomas’ opinion, could stand to be a bit wider and serrated versus their actual narrow, smooth configuration. 8. The forward of these two levers is the disassembly latch. The rearward is the slide release. 9. Overall size-wise, the VP9 is equivalent to a Glock 17, a gun with which it is obviously intended to compete.

its location is such that, with my grip technique, it’s depressed by my master hand thumb while shooting. Failures of the action to lock open when empty are the norm for me with the VP9. I could however retrain myself out of that.

The VP9 is fully ambidextrous; there is a slide release lever and downward rotating magazine release paddle on either side of the gun.

The VP9’s major positive attribute, far as I’m concerned, is its grip system, which allows both side panels and the backstrap to be replaced with any one of three size options. Installing the smallest version available in all three areas makes this gun fit my hand, and point for me, so well it’s eerie.

Trigger stroke on the VP9 has quite a bit of takeup, creep and overtravel. It broke at 4-3/4 pounds according to my NRA weight set. Given that I do the vast majority of my shooting these days with nicely massaged Glock and occasionally 1911 trigger actions, I must admit the VP9 trigger does seem a bit untutored to me, not for its weight which is just fine, but for the excess take-up, and especially the creep and overtravel. However Bruce Gray’s company Grayguns ([541-468-3840](tel:541-468-3840), [www.grayguns.com](http://www.grayguns.com)) does HK trigger work; Bruce reports to me their VP9 trigger job erases most of the takeup, creep and overtravel, and “Once we’ve worked it over, the VP9 trigger compares favorably to anything.”

The HK VP9 was accuracy and reliability tested with a reasonably diverse assortment of seven

9mm loads. From Black Hills came both their 115-gr. JHP +P and standard pressure 124-gr. JHP (both factory new “red box” loads), from Hornady the 115, 124 and 147-gr. XTPs, from Winchester the 147-gr. SXT, and also a handload consisting of the Berry’s 124-gr. Hollow Base Round Nose over Tite-group powder.

The gun worked perfectly with all ammo tested. Accuracy-wise, 5-shot groups from the bench at 50 feet, the maximum distance possible at the indoor range where I do most of my shooting, the VP9 proved decently accurate, though the less-than-ideal trigger pulls and nearly invisible sights meant I had to work hard to extract that accuracy. Best group was 1.1” with the Black Hills 124-gr. JHP. Point of impact, depending on the load, was from 1-1/2 to 2-1/2 inches above point of aim. Higher front sights are available from HK that could deal with this discrepancy.

Heckler & Koch autopistols are known for costing more than other, tactically equivalent guns. The VP9 breaks from that tradition with an MSRP of \$719. Almost no gun shop sells for full retail. A few quick phone calls disclosed a best price in my area (Tacoma, Washington) of \$599. Thus the VP9 is well-poised price-wise to be HK’s Glock 17 killer. The “VP” in VP9 stands for *Volks Pistole* i.e. the People’s Handgun. HK obviously hopes and intends it will have that level of appeal and affordability to the masses.

Duane’s website is [Self-Defense-Handguns.com](http://Self-Defense-Handguns.com).

Extra Loading Data Labels, L05-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use.

Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth **L05-18613 \$6.99**

**Snake Oil** is a derivative of an FDA certified medical lubricant used in high-speed medical drills.

- Provides a film that separates and protects moving parts, for smoother operation and increased efficiency.
- Contains no evaporants and has a film affinity in excess of two years.
- Reduces the collection of dirt, dust and other contaminants.
- Performance in extreme conditions is unparalleled.

0.5 oz. Bottle	<b>L05-16035</b>	<b>\$4.95</b>
2 oz. Bottle	<b>L05-16508</b>	<b>8.95</b>
Grease, (2) 4cc Tubes	<b>L05-17073</b>	<b>4.95</b>
0.5 oz. Oil, 4cc Grease	<b>L05-10059</b>	<b>5.95</b>

**M-PRO7™ Gun Cleaner** is odorless, non-toxic and biodegradable. "Safely cleans rifles, handguns, shotguns..., black powder, corrosive priming deposits and much more."

4 oz.	<b>L05-10139</b>	<b>\$11.95</b>
8 oz.	<b>L05-10138</b>	<b>18.95</b>
32 oz.	<b>L05-11298</b>	<b>40.95</b>

**M-PRO7™ Copper Remover** works up to four times faster than ammonia-based cleaners and is odor free.

4 oz. **L05-19370 \$11.95**

**M-PRO7™ Synthetic Grease** is specifically formulated to adhere, protect, and lubricate metal-on-metal sliding surfaces.

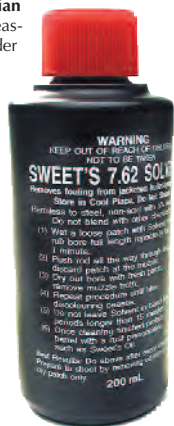

4 oz. **L05-16180 \$14.95**

## Sweet's Australian 7.62 Solvent

easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

**L05-13128 \$12.95**

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	<b>L05-15571</b>	<b>\$7.95</b>
Slide-Glide Lite	<b>L05-15572</b>	<b>7.95</b>

**Micron UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

**L05-75125 \$9.95**

**FrogLube** is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

4 Oz. Paste	<b>L05-15443</b>	<b>\$10.99</b>

## Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps. L05-18599 \$14.95

# drymate™

## Bore-tips® Bore Cleaning Foam Swabs

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ L05-11313 \$19.95

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (thinking fast), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

## Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar steel stock and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless	L05-18600	\$49.99
Blued	L05-18601	49.99

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

Four-Magazine Storage Sleeve	L05-19226	\$14.95
Six-Magazine Storage Sleeve	L05-19227	17.95
Magazine Sleeve I.D. Tag/Hanger	L05-19476	1.95

## Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight	L05-18210	\$53.95
-------------------------	-----------	---------

Secure Firearms Products' Universal Spring Tester will help you determine if the recoil spring in your pistol needs replacing, and you'll save time and money by testing and organizing loose recoil springs in your shooting bag.

# ElZetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

## PROTEKTOR MODEL

The Original Leather Sandbag\* Rifle Rests

All Protektor Model leather bags are made with the best top grain cowhide available. The welded steel rest is strong enough to stand on and won't break if dropped (Owl Ear Front Bag sold separately).

- A. Front Bag    L05-10880    \$19.95  
 B. Rifle Rest    L05-10883    49.95  
 C. Std. Front Bag    L05-10881    22.95  
 D. Rear Bag    L05-10882    26.95

\*Sand not included.

## The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

L05-18146    \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

L05-15384    \$29.95

# TARAN TACTICAL INNOVATIONS

The **TTI Magazine Extension** for MagPul AR-15 5.56 PMAGs is constructed of machined aluminum.

L05-15770 \$39.99

The **TTI Benelli Extended AccuGuide Carrier** is the first extended carrier ever manufactured from one solid piece of SAE 304 Stainless Steel, which eliminates the need for welding. It is heat-treated and polished, providing optimal performance. The Carrier features an extended guided rail on each side to assist in centering the round while reloading. It will provide you the speed and comfort of not having your thumb torn up after reloading. Compatible with: Benelli M1/M2/M3/SBE, Versamax.

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.  
TRS-25 **L05-11643** **\$89.95**

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **L05-25374** **\$79.99**  
Scout Scope Mount for SKS Rifle **L05-25373** **78.99**

**L05-19671** **\$29.95**

# WILSON'S 7.62

Above: The Wilson Combat BILet-AR receiver is CNC machined from 7075-T6 aerospace aluminum billet stock and was engineered from the ground up to address structural design weaknesses in standard USGI receivers and enhance overall tolerances.

Right: Wilson's goal in producing the 7.62x40 was to develop an inherently accurate and low-recoil cartridge that has more terminal effectiveness than the 5.56 while utilizing as many standard AR platform 5.56/.223 components as possible.

## By Mark Pixler

Whether you love or hate "The Black Rifle," the sheer number of companies manufacturing AR-15 variants and accessories have made it unquestionably one of the most versatile firearm platforms available. It can be configured as a pistol, a belt-fed squad automatic weapon, a single-shot .50 BMG sniper rifle and just about anything else imaginable.

I've lost track of just how many different cartridges for which the gun has been chambered, but in addition to the original .223 Remington/5.56 NATO, some of them include the 5.45x39, .204 Ruger, 6.5 Grendel, 6.8 SPC, .300 Whisper, .300 AAC Blackout, .30 Remington AR, .450 Bushmaster, .458 SOCOM and .50 Beowulf.

Seemingly, lots of folks believe the AR-15/M16/M4 platform benefits from the ability to chamber a cartridge with a larger-than-.22-caliber projectile. Again, there are several available, but this article is going to focus on one that I believe has the most to offer for the least amount of effort and expense: the 7.62x40 Wilson Tactical (WT).

Bill Wilson, of Wilson Combat & Scattergun Technologies in Berryville, Arkansas, offers rifles,

uppers and barrels chambered for the 7.62x40 WT cartridge, as well as loaded ammunition, reloading dies and various accessories to load the cartridge.

I became aware of the 7.62x40 when Wilson Combat sent me a box of the ammunition and a press release as it was introduced in 2011. Since I didn't own an AR, I looked at it, thought it was

really cool, and put the 20-round box in my desk drawer. At some point, I gave the ammo to a cartridge collector friend of mine and forgot about it.

Fast forward to 2014, when Tim Richards – one of our customer service representatives – bought a Wilson 7.62x40 barrel with the goal of building up a rifle for 3-Gun competition. His idea is to try to "make major" with a rifle that's not chambered in .308 Winchester/7.62 NATO.

Discussions with Tim piqued my interest in the cartridge. His enthusiasm, and the Wilson Combat BILet-AR they sent me for *Blue Press* cover photos (December 2013, June 2014), inspired me to ask Bill for a 7.62x40 WT upper to use for this series of articles.

To me, the primary advantage of this cartridge – compared to most of the others available for the AR platform – is that it requires minimal changes to the rifle. If you already own an AR-

From left, as close to actual size as possible: 7.62x40 WT, 5.56 NATO, 7.62x39, 6.8 SPC and .300 Blackout.

# X40 WT, PART I 79

15, all you need to convert it is a barrel chambered in 7.62x40.

"But," you might ask, "why not just go with the .300 Blackout?" Indeed, the current darling cartridge of the marketeers is the .300 AAC Blackout, essentially a re-imagining of the .300 Whisper created by J.D. Jones as an easy-to-suppress cartridge that would work in the AR platform. While the Whisper/Blackout might be ideal for those who want/need a suppressible cartridge, according to Wikipedia, "Extreme care should be taken with .300 BLK ammo, as with certain bullet profiles, the round may chamber in a standard .223 or 5.56 AR platform with disastrous results and possible injuries." Uh, forget THAT.

Another problem with the .300 Blackout is that it can be a pain in the butt to make cases for, and frankly, it seems wasteful to me to trim away that much of a perfectly good cartridge case. By comparison, the 7.62x40 case is much easier to make, and I'd rather have the extra case capacity, thank you.

In addition, the 7.62x40 is a much more versatile round overall. If you want subsonic loads, the folks at Western Powders, Inc. ([www.westernpowders.com](http://www.westernpowders.com)) list Accurate 5744 and 1680 data for 210-, 220- and 230-grain bullets.

If you're looking for a full-power load, they list Accurate 5744 and 1680 data for 110-, 125-, 150-

and 168-grain bullets. One of the 150-grain-bullet loads is a virtual duplicate of the time-honored .30-30 Winchester cartridge. Imagine a semiauto .30-30 with a high-capacity magazine, a more efficient bullet shape and a lower recoil impulse.

Wilson Combat's website lists reloading data for 110- and 125-grain bullets using Hodgdon Lil'Gun and H110, IMR 4227, Power Pro-300 MP, and Accurate 1680 powder, and the ballistic performance comparison chart featured in this article is from their website as well.

If you're a hand-loader who likes to experiment, this is an ideal cartridge. Unlike some of the new AR cartridges – 6.5 Grendel (parent case .220 Russian), 6.8 SPC (parent case .30 Remington), .30 Remington

## Ballistic Performance Comparison

### 7.62x40 WT (16" barrel)

110 gr: 2534 FPS Muzzle Velocity and 1569 Foot Pounds of Energy

125 gr: 2463 FPS Muzzle Velocity and 1684 Foot Pounds of Energy

### 5.56 NATO (16" barrel)

55 gr: 3150 FPS Muzzle Velocity and 1212 Foot Pounds of Energy

62 gr: 3000 FPS Muzzle Velocity and 1239 Foot Pounds of Energy

77 gr: 2750 FPS Muzzle Velocity and 1293 Foot Pounds of Energy

### 7.62x39 (16" barrel)

123 gr: 2320 FPS Muzzle Velocity and 1470 Foot Pounds of Energy

### 6.8 SPC (16" barrel)

110 gr: 2550 FPS Muzzle Velocity and 1594 Foot Pounds of Energy

### .300 BLACKOUT (16" barrel)

125 gr: 2275 FPS Muzzle Velocity and 1436 Foot Pounds of Energy

*NOTE for Handloaders: Once a 7.62x40 WT case has been fired it will be fire-fuzed and provide approximately 1 grain additional powder capacity and the potential for approximately 25-50 FPS more velocity at comparable pressure levels.*

**80** AR (parent case .284 Winchester/.450 Bushmaster), etc. – the parent case for the 7.62x40 WT is easy to find and cheap to buy because there are plenty of once-fired .223 Remington/5.56 NATO cases available. Try finding some once-fired .30 Remington or .220 Russian.

Initially, I was under the impression that the 7.62x40 would work seamlessly with G.I. magazines. When I tried to load 7.62x40 cartridges into a G.I. mag, the ogive of the bullet interfered with the guide ribs pressed into the sides of the magazine and cartridges started to bind after loading only five or six rounds. Ordinarily, that would have been a deal breaker, because what attracted me to the cartridge in the first place was that it would theoretically work with only a barrel change.

All is not lost, however, as there is no shortage of aftermarket AR magazines. Tim has been using unmodified Lancer magazines and says they work fine. I have one Lancer magazine and was able to stuff 30 rounds of 7.62x40 into it without binding. I've yet to try shooting the rifle with a full maga-

zine, so for the moment, the question of feed reliability remains unanswered.

I'm optimistic, because the folks at Wilson Combat chose the Lancer magazine to modify for the 7.62x40. They offer 20- and 30-round caliber-specific Lancer magazines for sale on the Wilson Combat website. As I understand it, the modification they do to the magazine involves removing some material from the guide ribs. I'll start with the Lancers, but I plan to try other magazines to see if I can find one that requires little or no modification.

As I progress with this rifle/cartridge combo, and work with Tim as he tries to "make major" with it, I'll report about what may very well become my new favorite rifle cartridge. In "Part Two," I'll go into more detail about making cartridge cases and reloading for the 7.62x40.

# RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

# Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	L05-19220	\$34.95
