Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

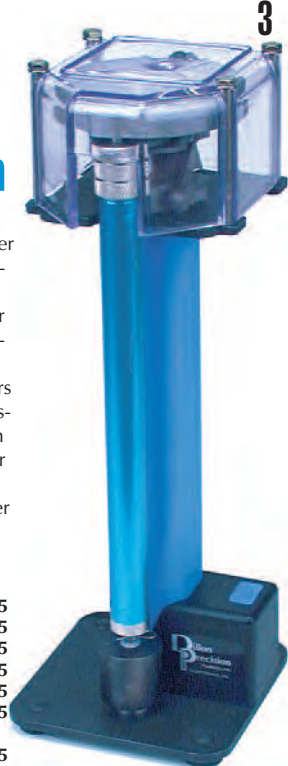

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

Shame on you, **Blue Press!** In this long-lasting sour economy, when so many qualified people can't find work, you run a two-page article [November 2012 issue] about an unqualified young woman getting a sweet job with a helicopter contractor? Why would you glorify the successes of a young woman who is getting by on her looks, when so many qualified people are losing their homes and struggling to pay for the bare necessities of life? Do you think this girl would even have been considered for the position if she'd looked like Massad Ayoob? This country is hurting, **Blue Press.** A lot of us are sick and tired of seeing the good jobs go to pretty young girls who have ZERO qualifications. Thanks for rubbing that in our faces.

Stephen Poor – Booneville, Arkansas
*Being curious about YOUR qualifications, Stephen, I did a Google search and found customer reviews on Amazon.com "By Stephen H. Poor (Booneville, Arkansas United States)." I looked at the reviews, and if they are your work, I found the following excerpts particularly interesting: **Mazooka Marshmallow Launcher** (Toy) – "I tried Kraft 'Jet-Puffed' marshmallows. These are the familiar full-size marshmallows that people love to toast over a fire. They are just a little too small to be optimum for this launcher."; **Nerf N-Strike Stamped ECS** (Toy) – "This one is very cool and fun, but my first two did not work at all. After two exchanges, I got one that worked, but the first two times I got guns that did nothing when you pulled the trigger."; and **Star Trek Movie Phaser** (Toy) – "I bought one of these for \$4.99, including Prime shipping. It is flimsy and the colors are awful. The sound effects are also a joke."*

Stephen, since you seem to be unhappy with your station in life, maybe it's time to put your toys away and study something else. Katie got her "sweet" job because she earned degrees in aviation maintenance and professional aeronautics. She has subsequently worked in the field and enhanced her qualifications by participating in on-the-job training and gaining experience with REAL weapons. And, if you know even ONE woman who looks like Massad Ayoob, you're hanging out at the WRONG bar there in Booneville!

Katie Weilage on the job.

ROCK 'N ROLL I

Slide Fire SSAK-47™ XRS

Reviewed by Peter Caroline

Bup-bup-bupbupbup! For those who have heard an M-16 on full-auto, the sound is unmistakable. I was on the silhouette range at the NRA Whittington Center, popping metal pigs with a .22 revolver, when I heard that distinctive cacophony. I fired off my last two shots, punched out the empties and listened again. Sure enough, there was another burst further down the firing line to my left. I put my gun down, and walked down the line to see what was going on.

There was a small crowd around a bench behind the firing line. An outfit called Slide Fire Solutions was displaying and demonstrating their wares, basically bump-fire stock devices to allow simulated full-auto fire from semiauto-only ARs and AKs. Did I want to try one? Hell, yes! But, I thought there might be a couple of wee problems: (1) I'm left handed, and (2) I am a fully certified klutz, capable of making any mechanical device malfunction.

As it turns out, neither was a problem. Slide Fire Solutions makes stocks in both left- and right-handed configurations. As for my coordination deficits, I just followed the instructions given by the lovely young lady who

was demonstrating these devices: I inserted my forefinger through the trigger well onto the finger rest ahead of the trigger; I snugged the rifle butt

against my shoulder and then gently pushed the handguard forward. I was rewarded with a very impressive burst of gunfire. Wow! I did it again, and again, until the magazine was exhausted. I could have fired off another magazine or two or three, but there were other people waiting to try it, so I handed the AR, with much thanks and laughter, back to my instructor, and went back to the bench, where I made arrangements to get a sample for more thorough testing. All in the interests of research, mind you.

Several weeks later, USPS delivered a package with two Slide Fire stocks: one for an AR-15, the other for an AK, both left-handed. I had to pass, for the time being, on the AR stock. My AR is currently set up for .50

Beowulf, and it might take about three rounds of that, at full-auto, to knock me on my ass. Besides which, it's expensive! Okay, on to the AK. I have a nice Egyptian Maadi, recently acquired, and a plentiful supply of assorted 7.62x39mm surplus ammo.

Now, Slide Fire Solutions provides very clearly written installation instructions right inside the box. But I like a *visual* demonstration of how it's done. And Slide

Fire does have a very clear YouTube video that walks you through every step. There are a number of other installation videos and they, too, are helpful and fun to watch. After I spent about half an

Peter is shown here during the Shootists Holiday at The Whittington Center trying out the Slide Fire Solutions™ Slide Fire Stock for the AR-15.

STAY HERE TO STAY!¹¹

Super Performance Stock

hour watching the videos, it took me about five minutes to make the installation. The only tool I brought to the party was an ordinary screwdriver. Slide Fire supplies the small hex key needed to secure the interface block in place.

The next day, I arrived at our improvised range in the desert at 7:00 a.m. My shooting companions didn't notice anything unusual about the AK I brought with me...that is, until I brought the gun to my shoulder and let loose a six-round burst. That got their attention, and I had to answer the expected questions. No, it's not a machine gun. No, it's not a broken sear. No, it's not illegal. In regard to that last question, with every one of its stock assemblies, Slide Fire Solutions provides a copy of a BATFE letter, which states that the Bureau has determined that this stock is not regulated as a firearm under the Gun Control Act or the National Firearms Act. I recommend carrying said letter in your gun case or shooting bag, in case some nervous onlooker calls the local SWAT team.

I've put quite a few rounds through the Slide Fire-equipped AK, and it works every time. The

gun does get very hot, so it's recommended that you fire in short bursts, rather than empty the whole mag all at once. There's a control on the bottom of the stock that can be dialed in for ordinary semiauto. With a bit of practice, I can now fire two- or three-round bursts at will. Accuracy? After the first round, not so much, but I suppose that will improve with practice. The practical applications are debatable, unless your neighborhood is subject to human-wave charges. The main point is, it's FUN! And, for those of you who own Dillon progressive reloading presses, this is a very important adjunct; it can provide you with a steady source of empty brass.

Okay, back to reality. MSRP for the AK version is \$299; for the AR version, \$369. Yes, it does seem a bit pricey, but as I get older, I tend to heed the immortal words of my grandmother, who said, "You don't want to be the richest man in the cemetery."

12 WANT TO RELOAD? SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K13-21894 \$44.95

THE SHELLSORTER

...is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting.

The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time.

The **SHELLSORTER** is made of ABS, a strong plastic which will give a lifetime of service.

K13-19972 \$39.95

FROGLUBE CLP

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products. Frequent use will keep firearms running at optimal performance and not harm the FrogLube coating.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K13-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K13-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K13-22080** is **\$254.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below.) Replacement carbide cutting blades, **K13-13141**, are **\$19.95** each. Upper lock rings, **K13-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

Dillon's Case Preparation Equipment

CV-2001
K13-20493
\$187.95

CV-750 K13-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K13-20675 \$72.95

CM-500 Case/Media Separator K13-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K13-22047 \$212.95

Euro CV-750 K13-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K13-13804** **\$8.95**
Case (20 pc.) **K13-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

CLASSIC MILITARY RIFLES: The

By John Marshall

For many hundreds of years before the U.S. Civil War, the standard arm of the infantry soldier was a smoothbore muzzle-loading musket. Although effective for group volley fire, it was useless beyond about 50 yards for aimed work. The U.S. Model 1855 Rifle Musket changed all that and allowed precision shooting of man-sized targets out to 300 yards or more. As our first general issue rifled muzzle loading long arm, it richly deserves a place on the shelf of classic military rifles.

This was an innovative arm beyond just being rifled. It was the first to use the Minié bullet, the invention of French Army Captain Claude Minié. The bullet was improved to its final form by Master Assistant Armorer James H. Burton of Harpers Ferry Arsenal. It was hollow at its base, which allowed it to be somewhat undersized when loaded into the muzzle and then easily rammed down upon the powder charge. When the piece was fired, powder gases expanded the hollow base to engage the rifling as the bullet moved forward down the bore. The rifling imparted a spin to the bullet, which then continued on its way with great accuracy. The Minié bullet thus allowed the easy loading of the smoothbore musket combined with a rifled arm's accuracy. This was the origin of the term "rifle musket." Although Captain Minié gets credit and the bullet bears his name, the contribution of Burton is largely ignored today. Minié's original bullet had a movable plug in the base, but Burton discovered that a simple hollow bullet would work better.

Another innovation was the priming system. Percussion caps had replaced flintlocks in U.S. service in 1842, but required a soldier to fumble in his cap box for a cap to place on the nipple under the hammer before a round could be fired. A Washington, D.C. dentist, Dr. Edward Maynard, invented a mechanism using a roll of paper caps that worked a great deal like those used in today's toy cap pistols. As the hammer was cocked, a pawl located in front of the hammer advanced the roll of caps to position a fresh cap on top of the percussion nipple, ready for firing.

This cut the time to load and fire the arm considerably. The roll of caps and the pawl mechanism were contained under a swinging plate marked with a spread eagle in the lockplate (*inset photo, right*). In dry weather, this system worked well enough, but rain, humid weather and dust could render the paper-covered caps useless or foul the mechanism. Fortunately, regular metallic "top hat" percussion caps could still be used in such an eventuality. Dr. Maynard was paid \$75,000 for his invention by the U.S. Government.

As first manufactured in 1857 at Springfield Armory and approved by Secretary of War Jefferson Davis, the Model 1855 measured 58.5" long, and was equipped with a 40" .58 caliber rifled barrel. Finish was "national armory bright", or unblued metal. The first-issue rear sight was located six inches from the breech. It utilized a sliding open sight with a ramped "sidewall" base. In 1858, this was changed to a simpler two-leaf rear sight located three inches from the breech. The first models had a riveted brass stock tip, but from 1858, these were made of iron, secured with a screw. The rifle illustrated was made at Springfield Armory in 1858, and has these latter features. The bullet weighed 500 grains and was propelled by 60 grains of black powder, resulting in a muzzle velocity of about 950 feet per second. The pitch of the three-groove rifling was one turn in six feet, with a uniform twist. The power of the bullet was sufficient to penetrate four inches of soft pine at 1,000 yards. These were very deadly arms.

In October of 1859, a metal swinging-plate patch box was added to the design on the right rear of the stock in front of the butt plate. Production began at the Harpers Ferry, Virginia National Arsenal in that year. From that point on both Springfield and Harpers Ferry were producing arms on the same pattern. In all, 59,273 Model 1855 rifle muskets were produced through 1861. Almost 80 percent of these were made at Springfield. Harpers Ferry also produced 5,587 short Model 1855 rifles, and Springfield made 2,813 cadet muskets for use at the U.S. Military Academy at West Point, New York. The

U.S. Model 1855 Rifle Musket

The Civil War saw extensive carnage, partially because both sides could fire their new rifled arms accurately at extended ranges.

From that time on, no one was safe on the battlefield simply by being “out of range.”

short rifles had two barrel bands, while the cadet musket had three. They measured 49.3” and 53” in overall length, respectively.

In actual use, the Maynard primer mechanism proved to be too complicated and unreliable, particularly in inclement weather. The paper rolls of caps were not widely available on Civil War battlefields, and most troops reverted to standard percussion caps for use with their arms.

The Model 1861 Rifle Musket superseded the Model 1855, eliminating the Maynard priming, but retaining most of the other features and dimensions of the Model 1855. This arm, produced at Springfield, became the pattern for quite a number of subcontractors who provided this model prolifically during the Civil War. The Model 1861

spawned the Models 1863 and 1864, both very similar in design.

There were still sufficient numbers of Model 1855 Maynard-primed arms for the War Department to issue a special instruction manual for the troops in 1862. Almost all produced were to undergo battle in the Civil War. The Civil War saw extensive carnage, partially because both sides could fire their new rifled arms accurately at extended ranges. From that time on, no one was safe on the battlefield simply by being “out of range.”

Today, the Model 1855 Rifle Musket is a seldom-found collector’s item worth thousands of dollars in virtually any condition. It occupies a classic niche in U.S. military history, and it’s a treasure when encountered today.

Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

Stylemaster-DL \$135

A superior shoulder rig made of best-quality leather with solid brass fittings — no cheap plastic, no soft suede or other low-quality leather.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K13-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K13-11702 89.95**
"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

Uncle Mike's Kydex Holsters

Michaels of Oregon's injection-molded Kydex holsters have a level of detailing, quality and affordability unmatched by other manufacturing methods. The almost-vertical rake allows for behind-the-hip carry, and for some applications, the holster can function as a crossdraw. Smaller-size holsters can also be used for "appendix" carry. To aid concealment and to assist in the draw, the holster rides close to the body at a mid-level height. The injection-molded belt loop is designed to accept and support a variety of belts from 1" to 1.75" wide.

**Holster NOT
Included**

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

SUPER 1050

STANDARD FEATURES:

- Automatic Indexing
- Commercial Grade Machine
- Swages Military Primer Pockets
- Loading Rate: 1000-1200 Rds/Hr
- Includes One Caliber Conversion
- Factory Adjusted Reloading Dies
- Automatic Powder Measure
- Automatic Primer System
- Automatic Casefeeder

All for ONLY...

\$1689^{95*}

*Prices vary on exotic-caliber machines.

Dillon Range Bag

Dillon's re-designed Modular Range Bag features a MOLLE-style fastener system to make it easy to reconfigure the bag to fit your individual needs. The end compartments and side compartments are removable, and extra end compartments are available.

The Range Bag comes with a removable, open-topped Stage Bag, so you can carry your ammo to shoot a stage

without having to take the entire bag. The main compartment is designed to hold the Stage Bag or a Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box.

Range Bag, Black 17"x11"x10"	K13-19258	\$99.95
Extra Stage Bag (inset, top right)	K13-19259	29.95

RL 550B (Electronic Scale)	K13-22117	250.95
XL 650 (Electronic Scale)	K13-22118	266.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

SDB Mount	K13-22223	\$64.95
RL550/XL650	K13-22051	48.95
XL650-only	K13-22052	45.95

Bullet Tray Kits

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the "feel" of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

Bullet Tray Kit	K13-22214	\$41.95
RL 1050 Tray Kit	K13-22215	41.95

RL 550B/XL 650 Toolhead Stands

This all-metal stand provides a place to store your complete caliber conversions: toolhead, reloading dies, powder measure, shellplate and locator buttons. The mounting system makes it possible to secure the toolhead stands to your bench, keeping them from getting knocked over by your well-meaning-but-clumsy shooting buddies.

Dillon's new toolhead stands are finished with a high-quality, durable powder coating designed to meet the needs of even the highest volume, commercial reloading operation. They are available individually or in packages of three, and are packaged with reloading data labels to help you record your favorite loads.

550/650 Stand	K13-22055	\$20.95 ea.
Three or more, \$18.95 ea.		

Low Powder Sensor

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light.

This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Sensor	K13-16306	\$41.95

Dillon's Pistol Die Sets

Size Die

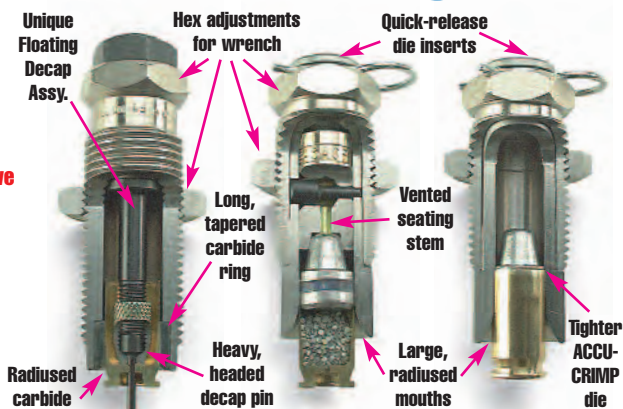

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

Spare Decapping Pins

Package of 10	K13-21528	\$5.75
---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Extra Loading Data Labels, K13-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use.

Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

'Belted Magnum' Powder System

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder.

Like all of Dillon's powder measures, the Belted Magnum Powder System is case-activated and can be used with your RL 550B, XL 650 or AT 500 reloader. It's ideal for loading large-caliber magnum rifle cartridges. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

The "Belted Magnum" Powder System is based on our SL 900 Shot Dispenser, so the Maximum Charge Bar won't work in our standard powder measures – you'll need to buy the entire system. The good news is that the "Belted Magnum" Powder System has an integral drain, so it's easy to empty the hopper in order to change powder types; so, if you load several big calibers with various powders, it's easy to switch from one to another.

Keep plenty of extra powder on hand, because when you're dispensing 100-plus grains into every cartridge, you're gonna need it! Magnum Powder System **K13-97126 \$137.95**

PROTEKTOR MODEL

The Original Leather Sandbag* Rifle Rests

All Protektor Model leather bags are made with the best top grain cowhide available. The welded steel rest is strong enough to stand on and won't break if dropped (*Owl Ear Front Bag sold separately*).

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

OAL Gauge	K13-14622	\$32.95

.300 Win. Mag.	K13-14655	6.99

Bullet Comparator

Correct bullet seating depth is critical to accuracy. In addition, minor variations in bullet seating depth will have an effect on both pressure and velocity. The L-N-L Bullet Comparator provides precision handloading dimensions.

Roza Shanina commanded a squad of female snipers who proved to be the scourge of the German army. These courageous young women used a rifle that was state-of-the-art at the time and is still in service in some strange places!

The Russian PPSh-41 Submachine Gun ...

... but we call it the **PPSS0/22**

New!

(ATF gets a little 'festy' about submachine guns), so ours is semi-auto and in .22LR caliber. You can afford to shoot all day. The PPSS0/22 is shown here with the optional 50-round drum mag. Plus FREE: Original WWII-era Soviet Leather and web sling and new swivels (while supplies last). **PPSS0/22 is \$495.**

Rifles, Stalwart of the Russian Army. My sniper rifles are in outstanding condition, even though they were manufactured as snipers in WWII. When I found them, they were ready for military service again. But now they're civilians. Call in right away and get one while you can! You get the rifle, the original accessories, the display stand and DVD, **All for only \$799.**

My 'Black Lightning' Rifle

Here's a next generation version of the famous Colt M-16! This one is semi-auto and in .22 Magnum caliber.

The Black Lightning has a full-length Picatinny rail. ... allowing you to equip your rifle with M-16-style sights (as shown) or you can equip it with any variety of scopes and even add a bi-pod. .22 Magnum ... powerful and accurate out to 150 yds with soft recoil! **Black Light Rifle with scope rings Only \$595.**

Christmas Gift Bonus: Call in and one of my guys will help with your choice. You buy risk-free, because I guarantee your satisfaction.

PLUS, just for Christmas - if you buy more than one of these rifles at the same time, I'll give you a **10% Discount** on the rifles. . . **Merry Christmas!**

UTG AR15 Brass Catcher

Brass Catcher K13-15478 \$9.99

This tool provides that "third hand" you need to remove the handguards on carbines and full sized AR15 style rifles. All areas that contact the rifle are protected to prevent damage to the rifle's finish. Fits the AR15, M16 and M4.

Handguard Tool K13-15479 \$14.99

BLACKHAWK! Sling for Collapsible-Stock ARs

Fully adjustable 3-point sling design with a bilateral transition buckle allows shooting from both strong or support side for proper cornering. Available in coyote brown only!

Tactical Sling K13-15480 \$9.99

Concealed Carry Tote⁴⁷

\$45⁰⁰

K13-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged nylon fabric, with heavy-duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5"x11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. Plus, it passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You'll love your Stinger and undoubtedly draw a great deal of security and peace of mind from its mere presence. You deserve a Stinger today!

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	K13-19220	\$29.95
Advanced Trauma Kit (A.T.K.)	K13-19322	69.95

Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K13-14760 \$24.95**

Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K13-18630 \$14.95**

C. Bullet Forward Slide Release **K13-18629 19.95**

Lone Wolf Distributors' Match-Grade Barrels for GLOCK Pistols

These replacement barrels are manufactured from the highest grade mill-select 416 stainless forgings. Standard land-and-groove rifling makes these an excellent choice if you wish to shoot lead, plated or jacketed bullets. Can be used in factory ported or stock pistols. Ready to use, pre-fit drop in. No gunsmithing required.

THE FUTURE IS HERE AND IT SHOOTS .45 ACP: KRISS CRB

By D. K. Pridgen

The one constant in the firearms world is something is always new. Not a bad thing, considering I enjoy testing new items! Actually, I enjoy testing old or new.

For instance, the futuristic-looking Kriss Vector began development around five years ago, but only recently became widely enough available to get a CRB, the carbine version of the Kriss line. It pounds out .45 ACP bullets from a GLOCK 21 magazine, through a 16.25", 4140PH Cr-Mo steel, button rifled, 1-in-16" right hand twist barrel. The closed bolt, mechanically delayed blowback CRB utilizes the interesting Kriss Super V recoil system to "virtually eliminate felt recoil and muzzle climb."

However, its appearance initially garners all the excitement. A folding, square tube, polymer stock and rakish-looking upper and lower housings combine with an apparently suppressed barrel to create the striking appearance. The molded polymer (15 percent fiber-reinforced Nylon) upper receiver includes the fire control group and comfortable hand-filling pistol grip with a removable buttplate to house a few items. The grip's front forms the back of an open rectangle I mentally dubbed the handhold area, with trigger guard at the top and lower housing at the front. The trigger guard is sized for gloved-hand use.

A molded polymer assembly, the lower housing contains the A2 steel, stamped sheet receiver, and barrel, recoil, and charging assemblies. The lower housing has two wells – magazine and recoil (for recoil assembly) – butted together, with the magazine well at the front. The recoil well encloses the famous Kriss Vector recoil system.

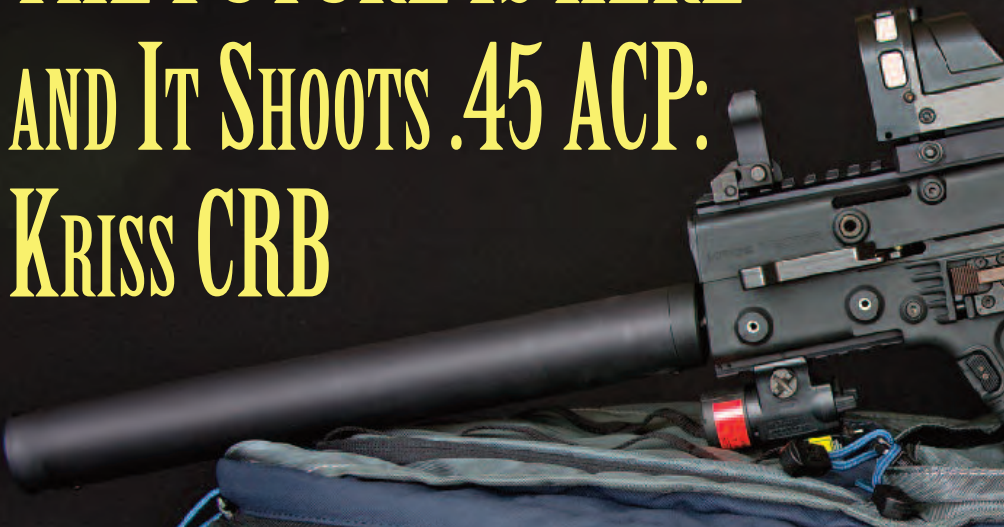

After the bolt breaks free and begins rearward motion the slider is forced downward into an

internal cavity behind the magazine well, then rebounds, shooting the bolt back into place chambering the next round. Movement of the slider assembly (mainspring and buffer) directs recoil from the bolt's rearward movement downward into the recoil well, rather than following the bore line. Kriss advertises felt recoil reduction of as much as 50 percent, and muzzle climb as much as 95 percent.

The magazine well's rounded front has horizontal grooves working their way down to a finger hook. Here is where Kriss anticipates users holding the CRB while working its magic. An alternate control point would be a vertical fore-grip (VFG) attached to the 3.25" rail riding on the bottom of the lower receiver's barrel extension. Any idea of holding the non-ventilated aluminum barrel shroud (not suppressor) is a non-starter – it gets hot!

Controls for the Kris Vector are the usual suspects, with several located somewhat novelly. Ambidextrous thumb safeties located on the upper rotate from rear forward to fire, a slightly long throw for medium hands but snappy for healthier digits. Use of the trigger finger might be a better idea for the digitally challenged.

The placement of several controls on the Vector's left side seems a little unusual, initially, but works out well. The magazine release button is only located on the lower housing's left, perfectly located for pressing by the thumb of the left hand or the middle finger of the right hand, which ever grips the mag well. Raising the same digit positions it on the bolt catch release lever. Having the forward folding non-reciprocating charging handle on the left side is just right for use by the hand squeezing the mag well's front.

The smooth-faced trigger is wide and skeletonized, vaguely resembling a Colt Gold Cup trigger on steroids. Unlike the Gold Cup, the CRB's trigger broke at about 7.1 pounds – a little heavy for ultimate precision, but not affecting practical usability.

Excellent Midwest Industries “flip-up and lock in place” sights were marked Kriss and rode the 13” long top rail. Plenty of room remains for an optic on the rail. Kriss offers an optional loop sling attachment point that bolts to this rail, as well as several styles to replace the folding stock hinge pin.

In front of the railed area, but above the barrel, is a receptacle for an optional Kriss light kit of a SureFire E1B 120-lumen flashlight and remote switch pad. If a light is desired on the CRB (it should be), this is not a bad location, with the light well protected and the beam pretty much unobstructed. Unfortunately, the kits were on backorder!

The Kriss at Work

I was excited about giving the CRB a workout, perhaps with visions of Star Wars rifles! First, I devoted time to examining and outfitting the Kriss. For a single-point sling I chose the Magpul MS3, easily adjustable between two-point and single. Simple and effective. Moving the rear sight forward slightly, I tried the Kriss Low Profile Rail Sling Mount but found its sling loop a little small for confident use with the MS3. Instead, I added Magpul's Rail Sling Attachment, with a larger loop.

I asked for a Vector Quick Release Sling-mount Pin for the folding stock hinge, but was not too enamored of the result. I decided to try it the upper, rear-most takedown pin's hole. Better

than the hinge location, it was still not as functional as the Magpul RSA.

It is foolish not to take advantage of modern optical sights, so a Meproflight M21 was slapped on the top rail. Sharp and clear, this version of the M21 came with a triangle reticle, illuminated by fiber optics or tritium. On the lower rail choices were VFG or light. The front of the mag well works adequately as a VFG, and lights are necessities. I added a Streamlight TLR-4, with white light and laser controlled by a rear toggle switch located for easy support-hand-thumb manipulation.

The shooting began with several volunteers anxiously doing trigger time. There was no way to quantify the effectiveness of Kriss' recoil system, but the sight seemed to stay on the target very well, needing little motion to pull it back down. There was no problem gnawing a hole in the center of an IDPA target *quickly* out to 10-12 yards.

Accuracy at 25 yards hovered just below 2 inches, regardless of ammunition used. A quick test at 50 yards showed one load's group opening up to over 3". I'd be happy with those results, especially using a heavy trigger!

In fact, I was pleased with everything about the Kriss CRB; feeling only the ambidextrous thumb safeties could stand a little improvement. A 50 percent extension of the levers' length would make them just right for almost all hands.

Even with the safeties unmodified, the Kriss CRB is an excellent CQB weapon. Its compactness makes it easy to maneuver in tight spaces such as halls, and the control provided by the recoil system will allow quick application of multiple rounds to a threat. This T&E has left me with a real desire to workout with the SMG!

64 Shooting Tips: The IDPA Classifier; Sta

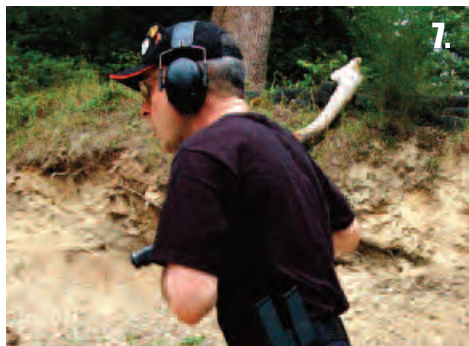

1. Thomas earned his IDPA Stock Service Pistol Master rank with a GLOCK 34 and Blade-Tech Standard Belt Holster and double mag pouch. Excellent equipment, though less important than technique.

2. On Strings 10 and 11 at 10 yards, trigger prep becomes even more important than at closer range – though it is never UNimportant.

3. The close up indicates the concept of trigger prep dry fire – all the slack is taken out of the trigger and it is hard up against the “link” resistance point.

7. The turn is completed before the gun is out and both hands are on the gun.

8. After the turn is completed, the gun is extended toward the target.

By Duane Thomas
Photography by Ed Leavitt

An IDPA Master Tells You How to Do It, Too!

In Part 6 of this series on shooting the IDPA classifier, we will finish up the last two strings on Stage 2, both of which take place at 10 yards. You will notice that Strings 10 and 11 are basically Strings 6 and 7 over again, only at 10 yards instead of seven, and with two shots per target required on the Modified El Prez in String 10 instead of only one per in Stage 6.

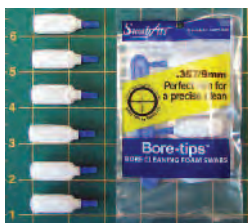

STRING 10: Modified El Presidenté, start with six rounds in the gun: two rounds each T1-T3, slide-lock reload, two more rounds each T1-T3.

(My time: 8.45 seconds.)

Tip #1: This stage is mostly about trigger control. There's no reason you can't put every shot on an El Prez at 10 yards into the 8" circles, and that should be your goal.

Tip #2: The two shots you're most likely to pull on this string are the first shot on T1 after the turn, and the first shot on T1 after the reload. Knowing that, really focus on those shots. Taking a few extra

Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!”

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit

which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.45 Caliber (5 ea.)	K13-15315	4.98

Stage 2, Strings 10 & 11: Ten-Yard Work ⁶⁵

4. String 10 is basically String 6, master-hand-only work, but at 10 yards instead of seven. 5. As the close up of the author actually live firing shows, the trigger is prepped hard between shots.

All the components of a fast turn and draw executed on String 6 also apply on String 11, another Modified El Presidente.

6. A key to a fast pivot is, at the start signal, swiftly snapping the head around to look at the center of the first target. The hands have already begun moving toward the gun.

9. Keep the gun high during the reload from slidlock on String 11.

hundredths or even tenths to get those shots in there is better than two half-second penalties. All the other tips for String 6 apply to this string as well.

STRING 11: Strong hand only, draw and fire two shots each T1-T3.

(My time: 4.81 seconds.)

Tip #3: Basically the same problem as String 7 with more precise trigger control required. As you move further to the rear on each stage of the classifier, quality of trigger control becomes progressively more important. Again, there's no reason you can't put all six shots inside the 8" cir-

10. One great advantage of keeping the gun high during the reload is that, after the load is complete, since the gun is still up in line of sight, the shooter can then easily reacquire the sights while the gun is being re-extended back toward the target.

cles from this distance, and that's your goal.

We have now completed Stage 2. Let's total up my performance for all of its four strings.

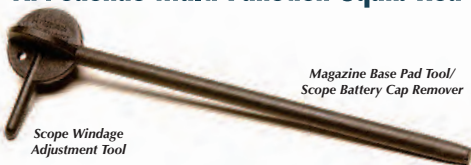

STAGE 2 TOTAL RAW SCORE: 20.41

DROPPED POINTS: 8 x 0.5 = 4.0

OVERALL SCORE: 24.41

Next month we will move on to the most complex, challenging and (I think) fun part of the IDPA classifier, Stage 3 which incorporates 20-yard shooting, barricade work, movement, and shooting from low cover.

Snake Oil is a derivative of an FDA certified medical lubricant used in high-speed medical drills.

- Provides a film that separates and protects moving parts, for smoother operation and increased efficiency.
- Contains no evaporants and has a film affinity in excess of two years.
- Reduces the collection of dirt, dust and other contaminants.
- Performance in extreme conditions is unparalleled.

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

K13-13128	\$12.95
------------------	----------------

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	K13-15571	\$7.95
Slide-Glide Lite	K13-15572	7.95

Micron UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

J. Dewey Mfg. Co.

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits all AR-15s and AR-10s with standard and oversized take-down pins up to .316" in diameter.

To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

Evolution Gun Works

These two-piece flat checkered mainpring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainpring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainpring housings on full-size or commander model 1911s.

Stainless K13-18600 \$49.99
Blued K13-18601 49.99

Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Bring on the Zombie Apocalypse!

Or not. Either way, American Tactical Imports' 75 Round AK-47 & SKS Drums hold enough 7.62 x 39 ammo to keep those marauding targets at bay! You simply open up the door of the magazine, load 75 rounds, close the door and wind up the spring. This system allows you to store ammo in the magazine. Load it, then don't wind it. No springs weaken during storage.

K13-18531 **\$6.75**

The Pressure Plug
For AR15 .22 LR Inserts and Dedicated Uppers

Does your .22 LR insert move back and forth in your upper? Did you know that the very top of your lower receiver takes all the recoil of your .22 LR insert? You can eliminate those problems by inserting the pressure plug in front of your buffer. The front of the plug has a taper that allows you to open and close the weapon just like always.

76 Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards. Compact design, 30mm tube and bright illumination of the reticle are just a few of the many features of the DMS-1. Bright red illumination of the reticle adds to the quickness of the sighting system in day and low-light conditions. At one power it works well as a reflex sight and at longer ranges the four-X magnification gives increased accuracy.

K13-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

K13-11643 \$89.95

C-MORE SYSTEMS

C-More Systems sights feature a "Heads-Up Display" for an uncluttered, limitless field of view; a totally fogproof laminated single lens; and a positive locking screw for windage and elevation settings.

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES ⁷⁷

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **K13-25374 \$68.95**
 Scout Scope Mount for SKS Rifle **K13-25373 67.95**

90 Degree C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE

(Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.
