LONG DISTANCE CARRIERS

THIS COULD BE YOUR RIFLE. *At Savage, we understand the difference between a shooter and a rifleman. For those wanting to test their skills at extreme distances there is the M110 and M111 rifles in .338 Lapua. A lot of companies make guns for shooters. Savage makes them for riflemen.*

Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

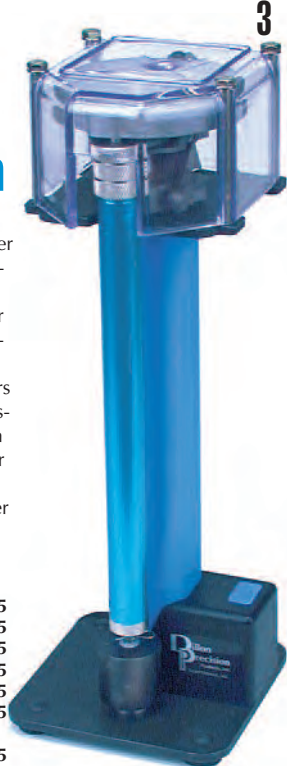

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

Just wanted to tell all the folks at Dillon that I am a more-than-satisfied customer. I am 81 years old and using the RL 550B that I purchased in 1988, and I am still loading with it using the new 9mm dies, 9mm conversion kit and the new powder measure. I started reloading using an RCBS Junior single-station press, which I now only use for 45 ACP. I wanted you to know that everything that I received worked great and is such a pleasure to use. You manufacture a good product, and over the years have provided the best service and help when needed. I want to thank you so much.

Ron Hinkle – South Fulton, TN
We owe you the thanks, Ron! Without loyal customers like you, we'd be just another reloading equipment company. Mike Dillon recognized this very early on, and made customer service his first priority.

For someone who has been shooting as long as I have, it's painful to admit I got it all wrong. Duane Thomas' article (Nov. 2013) on "Shooting Tips" advocating turning elbows toward the outside will greatly enhance endurance and accuracy, something already evident thru dry firing. Looking forward to next range visit. Thanks to **The Blue Press** this turned out to be a priceless bit of info.

Carson Lemmon – Savannah, GA

Why do you have your catalogs "taped" so that nothing falls out? Seems strange, as I receive other catalogs that do not have "taped" ends. Yours does not have anything to fall out! Extra money for the printer?

P Estes – Louisville, KY

Actually, it's a bit LESS money for the USPS. The wafer seals allow The Blue Press to mail at a more-favorable postage rate. In order to qualify, the mailpiece has to be sized appropriately and able to run through automated processing equipment. Since we mail 300,000-plus copies every month, postage tends to add up.

This letter is to express my appreciation for the great article about the M1 Carbine. I have one I purchased through the NRA's military surplus program back in the early 1960s. I believe I paid \$17.50 for it. I would like to have your permission to copy this article and enlarge it and frame it. I will hand down this rifle to my son. I was wondering if John Marshall has ever done an article on the 1903 Springfield .30-06 military bolt-action rifle. If so, can I get a copy of it? I like to communicate by e-mail and wanted to know if you have an e-mail address I can use.

Mike O'Connor – Shawnee, KS

Mike, my e-mail address is in the masthead below. I tried returning your e-mail and it bounced back.

RUGER®

Which Dillon is Right

Square Deal "B"

Dillon's Square Deal "B" was designed to produce large amounts of ammunition in the least possible time for just a little bit of money. At 300 to 400 rounds per hour, you can produce enough ammo for several pistol matches or practice sessions in just a few hours.

See Page 8

RL 550B

More RL 550s have been sold than any other progressive machine in the world, and for good reason: The RL 550B's versatility is almost unlimited. It will load over 160 different rifle and pistol calibers. Its quick-change tool-head allows the user to change calibers without having to readjust dies.

See Page 14

XL 650

Dillon's XL 650 resulted from several years of listening to our customers expressing their fondest wishes. We took every good idea we and our customers ever had, tested them extensively, and then incorporated them all into the design of the XL 650.

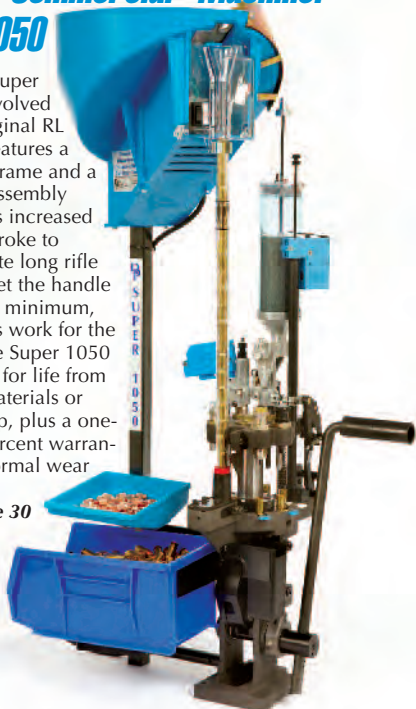

See Page 20

Dillon's "Commercial" Machine: Super 1050

Dillon's Super 1050 evolved from the original RL 1050, and features a lengthened frame and a new crank assembly that provides increased functional stroke to accommodate long rifle cartridges, yet the handle stroke is at a minimum, meaning less work for the operator. The Super 1050 is warranted for life from defects in materials or workmanship, plus a one-year, 100-percent warranty against normal wear and tear.

See Page 30

Right for YOU?

BL 550

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

See Page 13

RL 550B With Accessory Casefeeder

Adding an automatic casefeeder system to your RL 550B will easily increase your ammo production rate by 25 percent or MORE! The casefeeder streamlines the loading process by reducing hand movement, and the RL 550 Casefeeder uses time-tested, proven technology.

See Page 16

Dillon's "BFR" Big Fifty Reloader

You KNOW you want one! There's nothing quite as thrilling as touching off one of those .50 BMG cartridges and sending 750 grains of copper-jacketed lead downrange. WAY downrange! If the cost of loaded .50 BMG ammo has been putting you off, you no longer have an excuse.

Join the ranks of the LONG-range target shooters and roll your own .50 BMG (and other long-range, specialty cartridges) on Dillon's BFR.

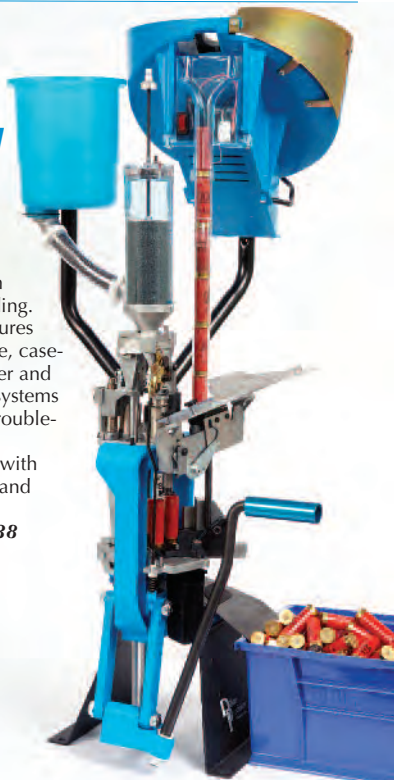

See Page 50

SL 900 Dillon's Shotshell Loader

Dillon's SL 900 is the new standard in shotshell reloading. The SL 900 features easily adjustable, case-activated powder and shot dispenser systems that eliminate troublesome bushing changes, along with spilled powder and shot.

IT'S THE BIG ONE!

Reviewed by Peter Caroline

When I was 13 years old and attending a summer camp in Maine, there was a store on a street corner in beautiful downtown Ellsworth where we could buy fireworks. They also had a wonderful display of old, used lever-action rifles on the wall, all for sale. I didn't have enough money to buy one, even at the \$20 - \$35 they fetched in those days, but I did have lots of questions about them. I was particularly impressed by one well-aged Winchester Model 1886 carbine with a cavernous bore. I asked the proprietor what kind of cartridge that rifle fired. He brought an old cigar box filled with assorted ammo out from behind the counter, and handed me one imposingly large cartridge. "That's a .45-70," he explained, "and when you're big enough to shoot that, you come back here and we'll sell you the gun."

I never did buy that particular rifle, but I kept the cartridge. When I was in college in New York, I still couldn't afford to buy a rifle, but I did buy all the parts, piece by piece, mostly from Francis Bannerman's Sons, for a Trapdoor Springfield .45-70 rifle. It took nearly a whole semester, but I finally got it put all together, took it home for summer vacation, and fired it. I was hooked. I've had other .45-70

rifles since then...several Springfields, a couple of Marlin's, a Remington Rolling Block and a Winchester High Wall, all literally a blast to shoot.

You might think that a cartridge that celebrated its 140th birthday in 2013 would be nothing but a footnote in history, but the .45-70 Government keeps on keeping on. Sure, you can buy belted magnum calibers today that put the .45-70's rainbow trajectory to shame, but if you want to walk confidently in bear country or go after moose in thick woods, a .45-70 lever-action carbine is an easy choice. And they're still being made.

A week ago, I received a new .45-70 lever-action rifle from Henry Repeating Arms Company. I was familiar with their line of .22 LR lever-actions, but never had a chance to try anything larger. This is one solid little gun...18-1/2" barrel, about 7 lbs., 37" OAL, with a handsome checkered pistol-grip walnut stock, a substantial rubber recoil pad, sling swivels, an adjustable XS Ghost Ring Aperture rear sight and a white-line front.

Like the Winchester and Marlin lever actions, the Henry uses a tubular magazine. Unlike its competition, the Henry magazine is not loaded from a loading port in the side of the receiver, but from a cutout in the blued steel outer magazine

tube, exactly like a tube-fed .22 LR. This feature, I discovered, is one of those love-it/hate-it deals. I do really like it. It's simple, and I don't strain my fingers stuffing cartridges into a cranky side door. A shooting buddy of mine claims that it's a tactical disadvantage, "You're more exposed to opposing fire while reloading." I don't know anyone who has encountered opposing fire from a bear or moose or feral hog, so I can't comment. The instruction manual claims a 4+1 round capacity, although you can actually stuff six rounds into the magazine.

Shooting the Henry .45-70 is a very pleasant experience. The action was a bit stiff initially, but got a lot easier after I'd worked the lever back and forth for a couple of minutes. The trigger has a nice, crisp 5-lb. pull. The recoil pad does its job very well. I was using Winchester 300-grain JHP and Remington 405-grain SP, in addition to my own reloads, which use H4895 with a 405-grain lead flatpoint bullet. Initially, I had a feeding problem with the reloads. The Henry is set up for a factory 405-grain bullet. My 405-grain reloads were just a bit too long to feed properly. Lesson learned.

**"YOU MIGHT THINK
THAT A CARTRIDGE
THAT CELEBRATED ITS
140TH BIRTHDAY IN 2013
WOULD BE NOTHING
BUT A FOOTNOTE IN
HISTORY..."**

HENRY .45-70 RIFLE

At 50 yards, using sandbags, I was able to get 1-1/2" - 2" three-shot groups, which I regard as quite satisfactory, given the iron sights. There are two windage screws on the rear sight. To adjust for elevation, you simply loosen one of the windage screws a couple of turns, and rotate the rear sight aperture, counter-clockwise to raise, clockwise to lower. The Henry is also drilled and tapped for scope rings, which may be a bit of overkill, since you're probably not going to use this rifle for prairie dogs at 200 yards. I did pop a few golf balls with the .45-70. It helps to have a lot of golf balls,

because if you hit one, you'll never see it again!

You don't have to fire many rounds to understand why a cartridge that earned its stripes during the Indian Wars is still winning fans today. The Henry .45-70 is a well-built, versatile lever gun that you can rely on for any species of large game on this continent. MSRP is \$799.95, but street prices are running in the \$650-\$700 range.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K71-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K71-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (Page 15) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (bottom right photo) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

AUTO PRIME SYSTEM

RL 550B ACCESSORIES

A. RL 550B CALIBER CONVERSION KITS
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

K71-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K71-20782, \$76.95 ea.**
 Magnum Rifle Powder Bar **K71-21353, \$29.95 each**
 X-Small Powder Bar **K71-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K71-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

K71-20064, \$11.35 each
Three or more, \$10.25 ea.

X-Large Powder Die, K71-21253, \$19.95 each

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

K71-13909, \$22.95 each
Three or more, \$20.95 ea.

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

K71-22055, \$20.95 each
Three or more, \$18.95 ea.

G. 1" BENCH WRENCH

K71-10842, \$7.95 each
Two or more, \$7.10 ea.

Casefeed 550, w/o Wrench Set

K71-11542 \$17.95

Bullet Tray Kits

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the "feel" of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

Bullet Tray Kit **K71-22214 \$41.95**
RL 1050 Tray Kit **K71-22215 \$19.95**

Quick- Change Dust Cover

Quick-Change Cover for use with powder measure. **K71-11143 \$14.95**

Accessory Package Deal

Includes: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook* (not pictured, see Page 62).

RL 550B (Balance Beam Scale)

K71-21143 \$181.95

RL 550B (Electronic Scale)

K71-22117 \$250.95

Low Powder Sensor

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

K71-16306 \$41.95

Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel." A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

Alum. Roller **K71-17950 \$45.95**
Plastic Roller **K71-22183 \$40.95**

Belted Magnum Powder System

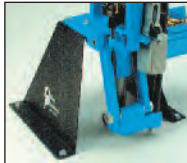

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System

K71-97126 \$142.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

RL550/XL650 **K71-22051 \$48.95**

RL 450-to-RL550B Upgrade Parts

You can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

Dillon's Case Preparation Equipment

CV-2001
K71-20493
\$188.95

CV-750 K71-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K71-20675 \$73.95

CM-500 Case/Media Separator K71-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K71-22047 \$213.95

Euro CV-750 K71-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K71-13804** **\$8.95**
Case (20 pc.) **K71-20255** **\$135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **K71-13733** **\$8.95**
Case (20 pc.) **K71-20256** **\$135.95**

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

K71-16306 \$41.95

Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel." A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

Alum. Roller **K71-17950 \$45.95**

Plastic Roller **K71-22183 \$40.95**

Belted Magnum Powder System

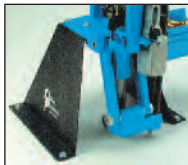

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System

K71-97126 \$142.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

RL550/XL650 **K71-22051 \$48.95**
XL650-only **K71-22052 \$45.95**

Powder Check System

Quit worrying about squib loads and double-charged cases.

K71-21044, \$68.95 each

Three or more, \$61.95 ea.

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K71-22080** is **\$267.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below). Replacement carbide cutting blades, **K71-13141**, are **\$19.95** each. Upper lock rings, **K71-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K71-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K71-11702 89.95**

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

Dillon's Pistol Die Sets

Size Die

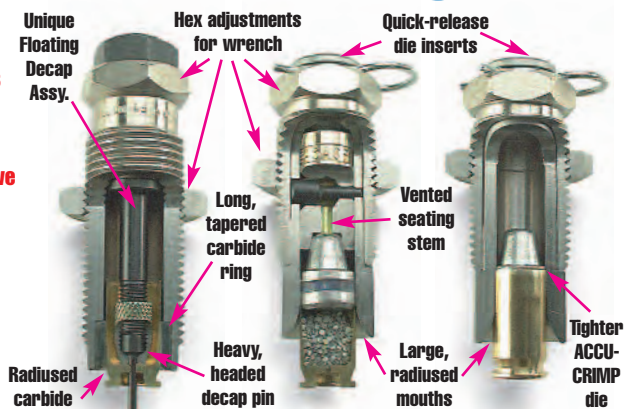

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Extra Loading Data Labels, K71-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use.

Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

California Competition Works

12 Gauge Shotshell Tactical Strippers

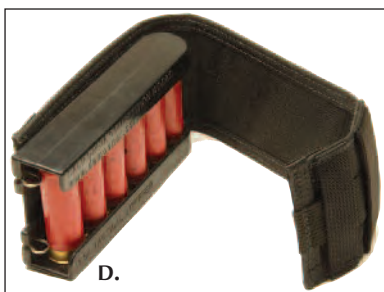

A.

B.

C.

D.

California Competition Works' Tactical Strippers are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Designed to carry up to 3" magnum* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84 attachment device

(C. & D.) that will accommodate up to a 2-1/4" duty belt.

A. Six-Shell Tactical Stripper **K71-18606 \$23.95**

B. Four-Shell Tactical Stripper **K71-18605 22.95**

C. Three-Shell Aluminum Stripper* **K71-19475 34.95**

D. Six-Shell Covered Tactical Stripper **K71-19225 33.95**

*Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.

AP Custom USA Shotshell Carriers

AP Custom USA's Shotshell Carriers are 100-percent machined from solid billet aluminum, and utilize proven 303 Hi-Yield Stainless steel leaf springs to contain either three or four 2-3/4" 12 Gauge shells in their slots, depending on model. Both models offered here feature the BLADETECH Tek-Lok™ Universal Belt Clip. The 4x4 Shotshell Carrier holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong or weak-handed. The 3x3 holds three 2-3/4" 12 Ga. shells in two adjacent slots.

4x4 Shotshell Carrier

TACCOM, LLC Tactical and Competition Accessories

QUICK CADDY...
Light, easy, simple!
Made from Delrin, TACCOM's Quick Caddy holds the shot shell by the rim only, allowing for easy access to the shells for simple and fast removal. Holds four 12 gauge shells, any length! Comes with a belt strap to attach to your belt, but allows you to use the Tek-Lok™ or ELS systems and is adaptable to MOLLE system as well.

K71-19537 \$24.95

TACCOM, LLC's Duaload Shot Shell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. We're offering the 2Up version that can be either attached to a belt or MOLLE gear, as well as the 4Up and 6Up versions with a BLADETECH Tek-Lok™ Universal Belt Clip (included) that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun. It's quick, easy and (most important) intuitive!

Forster Products Datum Dial Ammunition Measurement System

Forster Products' easy to use Ammo Measurement System gives you the data you need to refine your case-sizing and bullet-seating operations. For example, using the average relative measurement taken from several cases that have been fire-formed from the same firearm, you can then adjust your sizing die to produce cartridges with a headspace tailored to your firearm's chamber. This complete kit includes one Datum Dial tool for checking cartridge cases, both bullet/cartridge dials for use with .17, .204, .224, .243, .257, .264, .277, .284, .308, and .338 caliber bullets, a laminated chart showing common datum diameters, complete instructions and storage box. (A caliper is required.)

K71-18960 \$157.00

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

Bullet Comparator

Correct bullet seating depth is critical to accuracy. In addition, minor variations in bullet seating depth will have an effect on both pressure and velocity. The L-N-L Bullet Comparator provides precision handloading dimensions.

*DS = Double Struck, TP = Thick Plate, HB = Hollow Base, RN = Round Nose, FP = Flat Point, SWC = Semi Wadcutter, WC = Wadcutter

*FAQ About Berry's Preferred Plated Bullets

1. What is "DS"?

"Double Struck." Double-Struck bullets go through an extra sizing process after being plated. This makes the bullet 100 percent symmetrical. This can give you an edge in competition, but most shooters won't notice the difference.

2. Plated/Jacketed/Cast bullets: What's the difference?

Berry's Preferred Plated bullets begin as a swaged lead core. The plating process works through electrolysis. The swaged lead cores are tumbled in an electrically charged cyanide bath containing high-grade copper ingots. The copper clings to the lead and the longer the bullets remain in the bath, the thicker the plating.

3. How do I load Berry's Preferred Plated Bullets?

Plated bullets occupy a position between cast bullets and jacketed bullets. They are soft lead, but have a hard outer shell on them. When loading plated bullets we have found best results using low- to mid-range jacketed data in the load manual. You must use data for a bullet that has the same weight and profile as the one you are loading. Do not exceed mid-range loads.

4. How fast can I shoot these bullets?

Velocities depend on the caliber, but as a rule of thumb, we recommend you don't shoot our plated bullets over 1200 fps (feet-per-second). Our 44s actually shoot best around 1150 fps. 45s are generally good at 850-900 fps. Our bullets are NOT recommended for magnum velocities.

5. Can I shoot your plated bullets in my GLOCK?

Yes. We have a large contingent of loyal GLOCK shooters using our bullets. The plating is thick enough that you will not get lead fouling in your bore, which is the nemesis of polygonal barrels.

SNS Casting has officially become a coated bullet supplier. The advantages of a coated bullet are that there's no risk of losing lube during shipping, there's no wax lube to get into your reloading dies, and there's significantly less smoke than standard cast bullets. The end result is cleaner hands, guns/barrels, and loaders!

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K71-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

Concealed Carry Tote⁴⁷

\$45⁰⁰

K71-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

TUFF PRODUCTS MAG POUCHES

Front view with flap.

Front view without flap.

Rear shows loops and Molle fasteners.

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system; for instance, the Dillon Range Bag, a tactical vest or body armor carrier. Available in black or coyote brown.

By Robin Taylor, Photos by Gabrielle Pitre (large photo) and Jesse Boone (inset)

Fair warning: if you've got some kind of sexist "thing" about how girls aren't supposed to shoot high-powered rifles as well as guys – Natasha Pitre is your nightmare.

At Camp Perry this year, 251 of the best marksmen in the country lined up on the 1,000-yard line. They shot it out in four relays, the best of each relay earning a slot in the Mustin Trophy shoot off. Amid the long line of heavy leather shooting jackets on relay No. 3 lay a 17-year old would-be nursing major shooting out of Ferndale, Washington. With her hair tumbling incongruously down her shoulder, at first blush, Natasha Pitre looked like "the underdog."

Long Range events offer no room for error. In perfect conditions, a one-MOA "sniper rifle" will hold a group larger than 10 inches at 1,000 yards – and the X-ring (for F-class) is half that. Way out here, "aiming small" and having good gear isn't even close to enough. Between the mirage, changing wind speed and crosswind angle (or "value"), shooters constantly adjust their sights to keep their shots on center.

Young Natasha out-scored every other shooter in her relay – shooting an iron-sighted rifle with a sling – AND out-scored all the "F-class" guys as well. (F-class allows scopes, bipods, magnum calibers, and SANDBAGS.) Again in the best-of-the best shootoff, Pitre emerged victorious, shooting "clean" (100-4X) at the 1,000-yard mark with the same rifle. It's one of few times in recent Camp Perry history that a junior marksman, much less a junior female, has bested the 1,000-yard field.

Pitre's only been playing this game for three years, but she already ranks among the top long-range marksmen in the country. Winning the Mustin Trophy at Camp Perry is one thing. ("Maybe she got lucky, right?") However, if you add up her scores from all five 1,000-yard contests at Camp Perry this year, plus the Palma Course (with shots at

800, 900, and 1,000 yards), and compare them to all those other marksmen, Pitre ranks 11th. She won the High Junior Canadian Cup outright (a three-match aggregate). Compared to the Mustin and the Canadian Cup, the Tompkins Trophy for juniors in long range looks like an afterthought.

How'd That Happen?

Pitre is flattening the macho egos of distinguished marksmen nationwide. You'd think she must have grown up with rifles, but curiously, Pitre's "roots" lie in competitive shotgun. She got the gun bug while shooting with her dad in Wasilla, Alaska. But, "When we moved to Washington, there wasn't anything like that down here," she says. Instead, "we found Custer Sportsmens Club and started shooting smallbore with Jeff Rachinski."

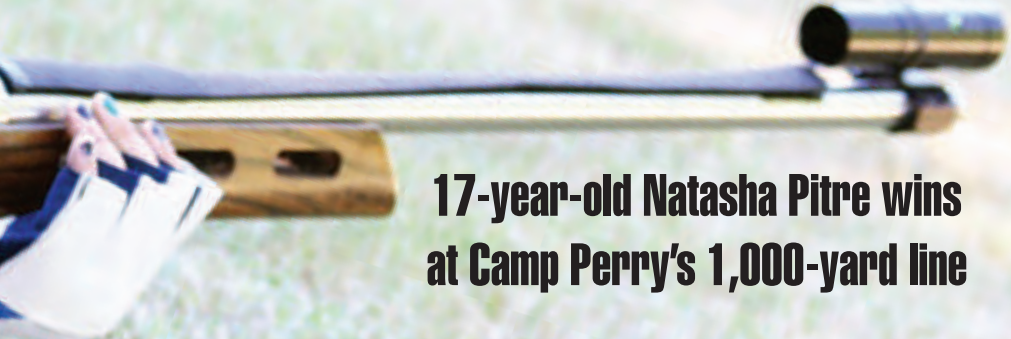

With Jeff's daughter Brianna (2011 national junior champion) as a model, Pitre advanced very, very, rapidly, becoming a distinguished expert in four-position smallbore rifle. Rachinski invited her to shoot "across the course" High-Power matches with an AR-15, and then she decided to shoot long-range events with the help of Bud Solis, and the rest was history. The Pitre family became a fixture at long-range events in the West.

In true sniper/spotter style, 1,000-yard people often shoot as a team, one marksman on the rifle, the other coaching the offsets and corrections. Since conditions change fast, every shot is called separately, before the conditions change again.

Gary Rasmussen (coach for the US National Palma Team) is one of many seasoned wind coaches that worked with Pitre. Pitre could "hold the waterline" well enough as long-range shooters say. (The "waterline" is an imaginary line drawn through the middle of the target, side to side.) But, if you're shooting in an individual event, you have to make all your wind calls yourself.

"She did a lot of training up here at shorter distances. Most of the time I had her for 600 yards, using a scaled 1,000 yard target," says Rasmussen. "We worked on wind reading, basic position,

The Girl Can Shoot

17-year-old Natasha Pitre wins at Camp Perry's 1,000-yard line

team-oriented shooting...working with someone for wind and sight adjustments is a big part of the game at the world level."

That process wasn't always easy, but Rasmussen gives her high marks for being a serious student of the game.

"Natasha's not just a prone shooter, she shoots 'across the course' high power as well, but she excels at prone," Rasmussen paused, "I'm hoping she can stick with it for the World Championships in 2015."

Pitre enrolled in Western Oregon University this year, becoming an Army ROTC cadet, pre-nursing. Personality-wise, she's a modern Mary Poppins with a rifle – organized, shoots like a sniper, and does aerobic kickboxing for exercise. By various accounts she's a quiet, caring person who triumphs through continuous effort, focus, and hard work.

"I'm a very organized person," she says. "I'm not really a neatnik, but I like to keep things very clean and in their same spots." She'll admit that math is really not her strong suit, "but if anything I overthink things a bit."

Where some shooters drive to make certain goals by certain dates, Natasha is not so linear. For her it's about personal excellence, one well-organized step at a time.

"My goal, every time I go to shoot is to do the best I possibly can, to put the most into it I possibly can. As long as I know I did my best, I'm happy, and the score doesn't really matter."

Pitre told me she takes everything people tell her seriously, and considers it. She's been shooting with some great coaches (Northwest Washington is blessed that way) so she's had a chance to pick up a lot.

"Natasha has changed so much," says Coach Rachinski. "I can remember when she went to her first long-range match. She was all concerned about what WE thought. At one point I grabbed her by the shoulders and said, 'girl, we're here for

you. Stop worrying about what we think and go have fun!"

Off The Range

When she's not busy, Pitre takes off to go hiking. She places a high value on being outside, working out, and being physically fit – something which plays well as an Army ROTC cadet.

"When I'm home I spend time with my family and play with my dogs. I've got three labs, one chocolate, one black, one yellow," says Pitre.

Given the shotgun shooting and three labs in the house, it sounds like she comes from a bird hunting family, but when I asked about that she laughed. "Two of the labs are scared to death of gunshots.... The brown one, if you even get a gun out, he's upstairs hiding!"

All Palma rifles shoot .223 or .308. Pitre's .308 wears a Nesika action mounted to a Cloward stock with a 32" Krieger barrel. The Warner rear sight and Riles front give excellent contrast and precision adjustment. All told, the rifle weighs 16+ pounds, not including the sling, jacket, and other gear. It's an awesome shooter, but being a match rifle, barrel life is measured in months.

"This year before Lodi I pushed 3,000 rounds through the barrel and it was done," she says. "Barrel life in 1,000 yard varies, depending on the load that you shoot, how often you clean it, the make, the twist.... We typically see around 3,000 to 3,500 and then it's time for a new barrel."

Pitre shoots Lapua brass with 155-grain Sierra 2156 match bullets and a charge of Varget that gives her a muzzle velocity in the neighborhood of 2,850 fps. "Right now I shoot .308 all the time, but I'm looking at a 6.5 x 284 for any/any matches," (any caliber, any sight).

If you've got plans to shoot a long-range event in the West this year, check the parking lot for a white 1998 Dodge Durango with Washington plates. If it's there, odds are Pitre is as well. You can also find her on-line at www.facebook.com/NorthwestCompetitiveShooter.

A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

K71-50050, \$384.95

B.

B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

K71-50075, \$869.95

C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

K71-50125, \$76.95

C.

D.

D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

K71-50200, \$149.95

E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

K71-50001, \$299.95

E. (1) PRIMING CONVERSION

Converts Swager to Priming System.

K71-50003, \$76.95

F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

K71-50002, \$299.95

F. (1) SWAGER CONVERSION

Converts Priming System to Swager.

Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	K71-14067	\$1.35
5-Pack of Die Lock Rings	K71-10669	4.15
1" Dillon Bench Wrench	K71-10842	7.95
<i>(Buy two or more 1" Bench Wrenches for \$7.10 each)</i>		
Wrench/Lock Ring 5-Pack	K71-10668	9.95

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Armorer's Block

2 lb. K71-15533 \$14.95

Note: These Come in Assorted Colors

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

K71-19538 \$13.95

The TACCOM **Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

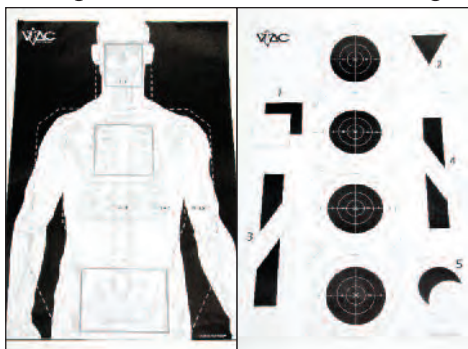

K71-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The TACCOM **Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

K71-19533 \$7.95

Viking Tactics 35" x 23" Rifle Target

Double-Sided Rifle Target (Pkg. of 10) K71-40057 \$10.00

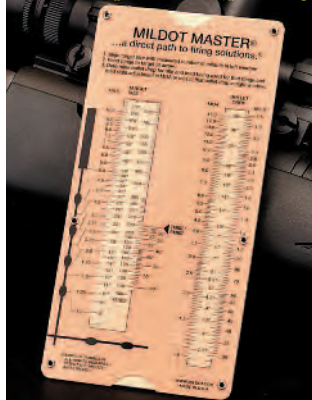

\$52.99

California Competition Works⁵⁷

.22 LR Speedloader

California Competition Works' 10-Round Speedloader for S&W Model 617 .22 LR Revolvers is ideal for Steel Challenge or Ruger Rimfire Series competition. The speedloaders are machined from 6061 T6 aluminum, then black anodized. The Loading Block (inset photo) is CNC machined from polymer and holds 120 rounds of .22 LR ready for insertion into speedloaders.

CCW Model 617 Speedloader	K71-12623	\$34.95
CCW .22 LR Loading Block/Case	K71-12627	49.95

North Mountain

Moon Clip Holder

I've tried several methods of holding my moon clips, and this works best for me! My hand only has to go to one place, so I don't longer grope around frantically for my reloads. - *Mark Pixler* For 610/625, 7-Shot 686, 8-Shot 627 **K71-21883 \$130.00**

Stainless EDM 8-Shot Moon Clips

These .025 EDM Stainless Moon Clips are designed to fit Remington brass **SNUGLY**, eliminating nasty "cartridge flop" when you reload.

58 Performance Parts for Your GLOCK® Firearm

Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K71-14760 \$24.95**

Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K71-18630 \$14.95**

C. Bullet Forward Slide Release **K71-18629 19.95**

GLOCK® Factory Original Parts:

Lone Wolf Distributors' Match-Grade Barrels for GLOCK Pistols

These replacement barrels are manufactured from the highest grade mill-select 416 stainless forgings. Standard land-and-groove rifling makes these an excellent choice if you wish to shoot lead, plated or jacketed bullets. Can be used in factory ported or stock pistols. Ready to use, pre-fit drop in. No gunsmithing required.

Ultimate Advanced Revolver with Jerry Miculek – The World's Greatest Revolver Shooter
 Jerry Miculek is recognized as the fastest and most accurate revolver shooter in the world. His speed and skills are, in one word...Amazing! They've been verified in hundreds of local and national competitions. In this program, he shares with you some of the techniques and secrets he has mastered over the past 25 years to become the shooter he is today. And, you'll see an incredible display of revolver shooting and reloading. 100 min.

K71-14608 \$19.95

Competition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

Build the Perfect Survival Kit by John D. McCann – When an unexpected emergency situation rears its ugly head, will you be up to the challenge? "I wasn't prepared for that!" will no longer be a valid response with the survival-kit-building methods in this book from survival expert John McCann. According to McCann, the secret to surviving any life-

threatening crisis is being prepared through careful advance planning, and that means designing, building and carrying your very own customized survival kits. 192 pages, published by Krause Publications.

K71-19394 \$16.99

Build the Perfect Bug Out Bag by Creek Stewart – Be ready when disaster strikes! If an unexpected emergency or disaster hits, are you prepared to leave your home – fast? You will be if you follow the advice in this book. *Build the Perfect Bug Out Bag* shows you how to create a self-contained disaster preparedness kit to help you survive your journey from ground zero to a safer location. Survival expert Creek Stewart details from start to finish everything you need to gather for 72 hours of independent survival – water, food, protection, shelter, survival tools, and so much more. 208 pages.

CLASSIC FIREARMS:

By John Marshall

Following their “six-day war” against Egypt, Jordan and Syria in 1967, the Israeli Defense Force (IDF) leadership decided that they wanted a new, standard made-in-Israel rifle to replace their hodge-podge of weapons systems which had included FALs, AKs, Mauser turn-bolts, M16s and others. They decided on 5.56 x 45mm (.223 Remington) as the preferred cartridge in order to standardize with the Americans. The weapon they crafted became a modern classic and is regarded even today, more than 40 years later, as one of the better assault rifles.

The consensus among the planners was that the AK-47 was “the lion of the desert” for its ability to withstand adverse conditions including dirt, dust and sand. Accordingly, a number of selective-fire guns similar to that rifle were submitted. Several showed promise, including one by Uziel Gal, the inventor of the UZI submachine gun. However, the one selected as the most promising was submitted by Israel Galili and Yaacov Lior. It was eventually to be known as the Galil rifle, in honor of Galili, the principal designer. The rifle broke no new ground, but was a combination of features from other proven designs, melded to provide the Israelis with a gun optimally suited to their mostly desert operating environments and perceived needs.

The initial guns were somewhat based on the Finnish Valmet Rk 62, but with some interesting twists. These Valmet-receiver prototypes were tested against the AK-47, M16A1, HK 33, and Stoner 63. There were drop tests, sand tests, mud tests, and many more. Minor changes were made, and the gun was submitted to an 18,000-round endurance test. Some more small changes were made, and on Sept. 5, 1971, the Galil was accepted as the new IDF standard rifle. Production began at Israel Military Industries (IMI), and the first widespread issue began in September 1974.

Although the gun is basically an AK-47, there are important differences. It's chambered for the

5.56 x 45mm round rather than the 7.62 x 39mm. The bolt lugs lock into the receiver rather than a barrel extension. This makes for better heat dispersion and a lessened chance of cartridge “cook-offs” in automatic fire, but the receiver had to be made of thicker machined steel. Primary extraction of the cartridge takes place during bolt rotation, eliminating the need for the massive AK extractor. Case ejection proved robust, with cases tossed forcefully yards away. The firing pin is loaded with a very strong coil spring in order to prevent slam-fires common with the floating AK pin when using sensitive non-military primers.

The rear sight is mounted on the rear of the receiver cover, almost identically to the Valmet Rk 62. It had to be mounted in a stable manner, and accordingly the gun was designed with a very close fit of the receiver cover on the receiver. The purpose of this arrangement was a longer sight radius over the forward-mounted open-sight types found on most AKs.

The tubular stock of the Valmet was replaced. The new folding stock resembled the type used on the FN FAL paratrooper model, but was much more robust. It was made of steel and aluminum and locked up solidly when swung away from the receiver and into position. The operating handle was vertical, projecting up over the top of the receiver cover, enabling its use with either hand.

There were three basic models issued, designated ARM, AR and SAR. The ARM was intended to serve as a squad automatic rifle. It had an 18.1” barrel (19.2” with flash suppressor), a bipod, a large teakwood handguard and a carrying handle. The current handguard is polymer. The overall length was 38.5”, and with the stock folded it was 29.2”. The bipod for this version incorporated a wire cutter. The handguard retainer was integrated with two bottle openers that hold the bipod in the closed position. I guess bottled beer is considered

The Israeli Galil Rifle

“Although the gun is basically an AK-47, there are important differences.”

a necessity in the desert! Often, the bipod was discarded by the ARM's users to get rid of the extra weight; the magazine serving as a monopod. The AR was the standard infantry rifle, with the same specs as the ARM, but without bipod or carrying handle. It has a high-impact plastic handguard. The SAR was designed primarily for paratroopers and other special units. It had a 13.1" barrel (14.1" with flash suppressor). Overall length was 33.1" with the stock extended, and 24.2" when folded. Like the AR, it had a plastic handguard. Some sniper and micro models of the Galil have also been made. There have been numerous variants of these with minor changes.

Magazines were issued with three capacities, 50, 35, and 12 rounds. Flip-up tritium sights were standard issue, modeled after a similar arrangement on the Valmet rifle. The rear tritium sight had two self-luminous dots, while the front one had a single dot. The rear sight employed an L-shaped flip-flop two-leaf peep, much like the early sights on the U.S. M1 carbine. The two sight leaves were calibrated for 300 and 500 meters, marked "3" and "5" for quick range adjustment. The front sight, topped with a non-detachable protective circular hood, was adjustable for windage with two opposing screws. It was also adjustable for height, using the standard UZI sight adjustment tool through a hole in the top of the sight hood. The sight picture presented was a post within a circle-within-a-circle. This made for very quick sight acquisition. The tritium sights were normally flipped down, but could be rotated up easily in seconds for low-light use. The flash suppressor doubled as a grenade launcher, and a disposable grenade sight could be mounted on the front sight assembly.

The AK dust cover/selector on the right side remained, but could also be easily manipulated

with a thumb switch on the left side. This was considered a necessity because when closed, the folding stock interfered with the operation of the traditional AK selector lever. Galils equipped with bayonet lugs will accept standard U.S. M16 bayonets.

The gun was not without its faults. As is true of AK designs, there is no last-round hold-open device. The receiver cover is so closely fitted that it usually requires a rubber mallet to take it off and re-seat it. This does not make for easy field stripping or re-assembly. I suspect many users might have tended to neglect cleaning and lubricating the internal components because of this, potentially leading to problems. The trigger pull is the usual mushy AK standard. Because of its thick milled receiver and the partially steel buttstock, the weight was substantial compared to the M16 series. It would not easily accept a scope or other optical sight arrangement, although some were rigged to do so. The stock was not length-adjustable to suit varying physiques, attire and equipment.

All criticism aside, in combat the gun performed magnificently, easily besting other designs for reliability. It has been sold to scores of other nations chambered for both 5.56 x 45mm and 7.62 x 51 mm.

Eventually, the easy and cheap availability of M16 rifles from America finally saw the Galil being superseded by those rifles, often provided or financed by military aid from the United States. Today, most of the IDF is armed with M16s or M4s, although Galils are still in inventory.

The Galil was probably close to the pinnacle of the basic AK design concept. Semiauto versions, some with American receivers and Israeli parts, can be found here in the U.S. This effective rifle is one of the more interesting Kalashnikov variants and has become a sought-after collector's item. **DP**

Evolution Gun Works

These two-piece flat checkered mainpring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainpring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainpring housings on full-size or commander model 1911s.

Stainless	K71-18600	\$49.99
Blued	K71-18601	49.99

Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it. Adjustable Pistol Sight

K71-18210 \$53.95

California Competition Works Magazine Storage Sleeves

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

*Sand not included.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

K71-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

Comp-Tac's Trojan Horse Long Gun Case

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,

30mm tube and

bright illumination of the reticle are just a

few of the many features of the DMS-1. Bright

red illumination of the reticle adds to the quick-

ness of the sighting system in day and low-light condi-

tions. At one power it works well as a reflex sight and at

longer ranges the four-X magnification gives increased ac-

curacy.

K71-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

K71-11643 \$89.95

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Tactical Sports 45°-Offset Auxillary Optics Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Auxillary Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)
45° Offset Optic Mount K71-14472 \$14.99

TACCOM, LLC 90° C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE (Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

The Firearms Academy of Seat

Drill #1: Fire six shots into the A-zone at 15 yards. Thomas, suffering from stomach flu at the time, fired this sloppy but sufficient group in six seconds from the holster.

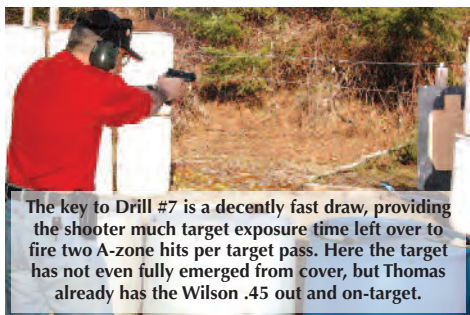

Drill #2: Draw from the holster and fire six A-zone hits in a row, in 2.0 seconds or less per rep.

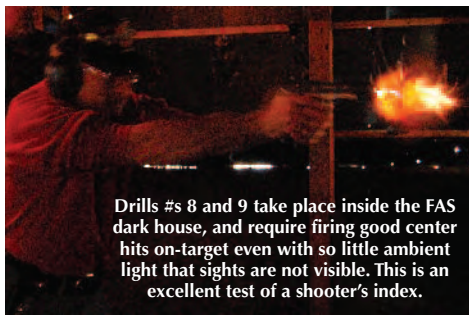

Here Thomas completes one portion of the six-part Drill #5: moving straight to the rear while drawing and engaging a target with two A-zone hits, in 1.8 second or less per rep.

Thomas' target for Drill #5. Even though every shot occurred during fast rearward or lateral movement, all hits landed well within the A-zone, which tends to reinforce moving while shooting as a combat technique.

The key to Drill #7 is a decently fast draw, providing the shooter much target exposure time left over to fire two A-zone hits per target pass. Here the target has not even fully emerged from cover, but Thomas already has the Wilson .45 out and on-target.

Drills #s 8 and 9 take place inside the FAS dark house, and require firing good center hits on-target even with so little ambient light that sights are not visible. This is an excellent test of a shooter's index.

By Duane Thomas

I thought the readers of *The Blue Press* might be interested in what standards a well-respected shooting school has set to be awarded the rank of Handgun Master. There have, over the years, been three different versions of the Firearms Academy of Seattle's (www.firearmsacademy.com) Handgun Master test. According to Marty Hayes, headman at FAS, I am the only person, other than himself, who has passed the test in all three versions. There are currently nine different drills a shooter must pass to be awarded the FAS Handgun Master rank. You are only allowed two tries at each drill. If you pass it first time through, fine, you don't have to do it again. If not, you are allowed ONE retry and that's it; after that you have failed the entire test. The test is shot on USPSA cardboard targets.

Drill #1, Marksmanship: At 15 yards, draw and

fire six shots in 30 seconds, Master standard is hits inside the A-zone.

Drill #2, Draw & Fire: At seven yards, draw and fire one shot. Do this six times. All A-hits in 2.0 seconds or less per rep.

Drill #3, Reloading: Start with a round in the chamber, an empty mag in the gun. Draw, fire one, do a slidelock reload, fire one more. Three reps. All hits inside the C-zone in 5.0 seconds or less per rep.

Drill #4, Multiple Targets: At seven yards, draw and hit three targets once apiece. Do this three times. All hits inside the C-zone in 3.5 seconds or less.

Drill #5, Moving & Shooting: A three-part drill. Begin standing within touching distance of the target. On the ground around you is drawn a box 8' wide by 8' deep. Draw and fire two shots while moving away from the target. Six reps total: two moving straight to the rear, two diagonally right,

tle (FAS) Handgun Master Test

Drill #3: Draw, fire the gun to slide-lock, do a slide-lock reload, and fire one more shot, all in 5.0 seconds or less, three times in a row.

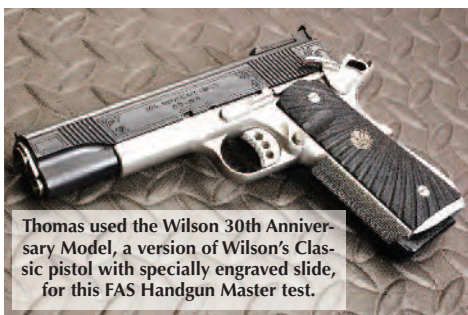

Drill #4: Draw and hit three targets once apiece in 3.5 seconds or less, three times in a row.

Drill #6: fast center hits delivered both right hand only and left hand only.

Marty Hayes presents Duane Thomas with his third (of four) FAS Handgun Master certificates.

Thomas used the Wilson 30th Anniversary Model, a version of Wilson's Classic pistol with specially engraved slide, for this FAS Handgun Master test.

two diagonally left. You must move swiftly enough that your second shot is fired outside the box. All A-hits, times not exceeding 1.8 second per rep.

Drill #6, One-Hand-Only Shooting: A two-part drill. At four yards, draw and fire six rounds, master hand only. For the second string, switch the gun to the support hand, from Low Ready fire six rounds. All A-hits, time for neither string to exceed 6.0 seconds.

Drill #7, Moving Target: The moving target begins concealed behind a barrel. When you see the mover appear and not before, draw and fire two shots before it disappears behind another barrel. Distance between barrels is five yards, exposure time is 2.25 seconds. Three reps. All A-hits.

Drill #8, Low Light Draw & Fire: Inside the FAS dark house the light level will be such you can barely see the target(s), much less your sights. At five yards, draw and fire one shot on one target.

Six reps. All shots 2.0 seconds or faster, all A-hits.

Drill #9, Low Light Multiple Targets: Still inside the dark house at five yards, draw and shoot three targets once. Three reps. All hits inside the C-zone, not more than 3.5 seconds per string.

I have earned the FAS Handgun Master rank on four separate occasions, the first with a Glock 19, second with a Glock 17, the third and fourth with 1911 .45s (Wilson and Rock River Arms, respectively). All the photos in this article came from my third run-through; they are not posed images, but rather taken while I was actually shooting the drills for score. This is not really an equipment-intensive test. In every case I passed with my daily carry gun and gear. You would be hard-pressed to find a better, more varied test of shooting skill anywhere than the Firearms Academy of Seattle's Handgun Master test.

This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.
