# 50 YEARS LATER AND THE RUGER® 10/22® IS STILL "THE ULTIMATE IN LOGICAL DESIGN!"

**The New Ruger 10/22  
.22 Caliber R.F. Self-Loader**

The ultimate in logical design

with a rugged 10 shot rotary magazine

The RUGER 10/22 is built on the same platform that sets the standard for the famous RUGER #4 Magnum Carbine. An obvious excellence we have designed, engineered and manufactured the 10/22 to get the best performance ever obtained in a .22 Rimfire Sporter. To insure this dependability and accuracy, the construction of the 10/22 incorporates many unique design features.

The 10/22 is an ordinary rifle — in one that .22 caliber rifle is hard to be better than any magazine — it had to be the best in every field. And it is. In logical construction and strength!

years of research and testing were required to create this distinctive all new RUGER. Our reputation for quality firearms is elevated with our new RUGER. We believe the Model 10/22, and the major advance in rifle design which it represents, will make it the first choice of the experienced shooter and the beginner of fine firearms.

# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

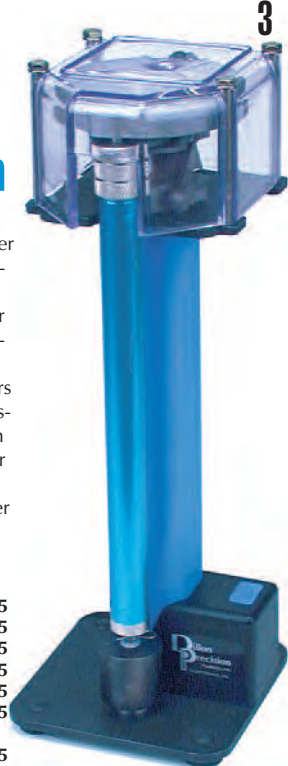

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

## We READ Our Mail!

I wish to thank all of the people at Dillon for the help I have received – from the technical support people to the people shipping out the parts. You folks are unbelievable! In today's world, it's hard to find a group of people who stand so solidly behind their products. I had some bad luck with my Square Deal "B" and broke a couple of parts. I called and talked to one of the tech support people, who diagnosed the problem, told me what to do, and had a lot of good information for me. I had a new part shipped to me at no charge in less than a week. That "No B.S." guarantee is better than money in the bank! I would not hesitate to recommend your products to anyone. Keep up the great work and thanks for your great products.

Lee Kirkeby – Dell Rapids, SD

I confess to not having recognized Dillon's *Blue Press* qualifying as a historical novel. However, after reading Brian Dillon's historical rendition of the Boer War, I am totally converted. What a wonderful narrative, an excellent history lesson, and an exciting read to the very end! Kudos, gentlemen, for making an excellent publication even better.

Greg Smith – North Webster, IN

The photo on page 62 of the May 2014 *Blue Press* showing the Boer guerrillas usually identifies the person in the front row right as a young woman.

Peter Caloger

Re: "Why the Hogleg, George?" (April 2014 issue) My grandfather and his son Bill were on the Border with Georgie prior to WWI. The family always called him Georgie because Uncle Bill served with him later at Fort Riley in the cavalry back in the 1930s, running out into the prairie on horseback, trying to shoot jackrabbits with issue 1911s and other strange adventures. I'm 90, carried a TSMG in WWII, and was top shot in the 117th after the War. DON'T STOP SENDING THE BLUE PRESS!

Henry Niese – Glenelg, MD

I always enjoy the articles in *The Blue Press*: The information in "2014 SHOT Show" was most informative and the article "Allie Barrett: Rising Star in a Rising Sport" was excellent!

R.H. Allred – Hinton, OK

Just a quick note about "Millisecond Molly" Smith (March 2014 issue) I already sent Robin an e-mail, thanking him, but you deserve credit as well for continuing to include some wonderful, entertaining, and informative articles and stories in your *Blue Press* publication – thanks very much!

C. Marc Rocque – rocquenroll33@gmail.com

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our commercial-grade reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

# .44 EXTRA SPECIAL: FREEDOM

By Peter Caroline

Whoever wrote "And lead us not into temptation" was probably referring to the SHOT Show. While wandering the aisles, I stopped at the Freedom Arms booth and innocently asked, "So, what's new and wonderful?" I was shown a "pocket model" .44 Special single action revolver that made every other single action I've owned look like a cap gun by comparison. I made a mental note to look into this further.

I must explain, I have a weakness for the .44 S&W Special cartridge. It's an old round with great accuracy potential, more than adequate for defense, without all the high drama of a .44 Magnum. I currently own a 1910-vintage S&W Triple Lock Target Model and a Cimarron Bisley in that caliber, and they're

both excellent shooters. Anyway, when I got home from the Show, I sent off a note to Bob Baker at Freedom Arms, requesting a sample of that model for review.

As it turned out, the gun that showed up at my door a week later was the very gun I saw at the Show, apparently a one-of-a-kind, at least for now. It differs from the catalogued Premier Grade Model 1997 Mid Frame revolver in a number of details: 1. Non-standard 3.5-inch barrel. 2. Round-butt grip. 3. Ivory Micarta grips. 4. Elevation- and windage-

**"I GOT THE IMPRESSION THAT, IF FREEDOM ARMS WERE NOT MAKING REVOLVERS, THEY MIGHT DO WELL MAKING BANK VAULTS."**

adjustable rear sight. 5. Replaceable blued front sight. The gun has a five-shot unfluted cylinder, brushed stainless steel finish, weighs 2-1/4 pounds, is 8-1/2 inches in overall length, and has a trigger pull of only 2-1/2 pounds. The hammer

# ARMS MODEL 1997 .44 SPECIAL <sup>11</sup>

incorporates a unique transfer bar mechanism that allows the hammer to engage the firing pin only when the trigger is deliberately squeezed.

The procedure for removing the cylinder is a bit different from that of your basic garden-variety single-action. There's no spring-loaded button; the head of the cylinder axis pin is secured to the cylinder axis pin by a screw. Once this screw is removed, you can slide the axis pin forward while pulling the ejector tab back a bit so the axis pin clears it.

One thing that really impressed me about the Model 1997 was the precise fit of the parts. I have a .002" feeler gauge left over from some project or other, and I couldn't fit it in the space between the cylinder and the barrel. It did fit, barely, between the rear of the cylinder and the frame. I got the impression that, if Freedom Arms were not making revolvers, they might do well making bank vaults. Now, the critical question is, how does it shoot? At this point, I had to confront one of today's harsh realities, ammo supply. I have an adequate stash of my own reloads, but I don't use those in guns that aren't mine. My usual source, a large hardware store in Tucson, has an amazing variety of ammo. But what they've got is what they've got.

And in the case of .44 Special, it was just one variety, Ultramax 200-grain Round Nose Flat Point. So I bought several 50-round boxes and headed for the range.

I put my targets out at 20 yards, and set up the Model 1997 on a heavy pistol rest. The sights are an absolute joy to aging eyes, square and black, with a thin incised line below the center of the rear notch. The trigger pull, as I mentioned before, is a consistent 2-1/2 pounds, with virtually no noticeable trigger movement. The groups were all about an inch across, which is a great deal better than I usually do with any other handgun. Recoil is not a problem; the gun is no lightweight, and .44 Special is pretty easy on the hand.

Many years ago, when I was an undergraduate at Columbia, a kind and generous soul at Inskip Motors let me drive a vintage Rolls-Royce around the block. This experience led me to the realization that my tastes far exceeded my means, a very basic lesson in the incentives of capitalism. My bench time with this very special Freedom Arms revolver is very reminiscent of that memorable ride. The retail price

tag on the gun is \$2,680.50, and well worth it.

# BL 550 Dillon's Basic Loader

**\$259<sup>95</sup>**

**K80-15399**

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount K80-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**K80-20302, \$25.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**K80-20251, \$87.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**K80-21353, \$29.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**K80-22120, \$30.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: K80-16629, \$19.95**

**OverSize Die: K80-16626, \$19.95**

**Plastic Funnel: K80-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

**K80-20029, \$22.95**

**RL 450 Powder Die:**

**K80-20308, \$21.95**

# RL 550B

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty

All for ONLY...

**\$439<sup>95\*</sup>**

# RL 550B ACCESSORIES

## A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**K80-RL550B CON-**

**VERSION \$45.95** (Exotic calibers, \$55.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K80-20782, \$76.95 ea.**  
Magnum Rifle Powder Bar **K80-21353, \$29.95 each**  
X-Small Powder Bar **K80-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K80-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**K80-20064, \$11.35 each**  
**Three or more, \$10.25 ea.**

X-Large Powder Die, **K80-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**K80-13909, \$22.95 each**  
**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**K80-22055, \$20.95 each**  
**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

Dipped Ball-End Hex Wrenches	<b>K80-11483</b>	<b>17.95</b>
One-Inch Bench Wrench	<b>K80-10842</b>	<b>7.95</b>
Square-Deal-Only Wrench	<b>K80-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	<b>K80-22051</b>	<b>\$48.95</b>
XL650-only	<b>K80-22052</b>	<b>45.95</b>
Square Deal "B"	<b>K80-22223</b>	<b>64.95</b>

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	<b>K80-22214</b>	<b>\$41.95</b>
RL 1050 Tray Kit	<b>K80-22215</b>	<b>41.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-thirds of a grain.

Magnum Powder System  
**K80-97126 \$142.95**

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

**K80-16306 \$41.95**

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	<b>K80-17950</b>	<b>\$45.95</b>
Plastic Roller	<b>K80-22183</b>	<b>40.95</b>

**Quick-Change Cover** for use with powder measure. **K80-11143 \$14.95**

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

### RL 450 Upgrade Components

Frame Change	<b>K80-20094</b>	<b>\$94.95</b>

# Dillon's Case Preparation Equipment

**CV-2001**  
**K80-20493**  
**\$188.95**

**CV-750 K80-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator K80-20675 \$73.95**

**CM-500 Case/Media Separator K80-21045 \$46.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 K80-22047 \$213.95**

**Euro CV-750 K80-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle. **K80-13804** **\$8.95**  
Case (20 pc.) **K80-20255** **135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

*D.C.L. Dillon Case Lubricant*

8 oz. bottle **K80-13733** **\$8.95**  
Case (20 pc.) **K80-20256** **135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **K80-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.  
15-pound bag **K80-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.  
10-pound bag **K80-13496** **\$15.95**

This month's cover model is Shristi with a Wilson Combat Recon SR Tactical Rifle featuring the BILlet Upper/Lower Receiver Option. ## Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

4-3/4" SA Colts/clones **K80-11560**  
 4-5/8" Ruger Blackhawk **K80-15765**  
 2" J-Frame S&W Rev. **K80-15764**  
 Ruger LCR **K80-29030**

## "Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport - and no more - so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

1911 Holster **K80-19947** \$139.95  
 Mag Pouch **K80-19946** 44.95

# Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with

a quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K80-22080** is \$267.95. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below). Replacement carbide cutting blades, **K80-13141**, are \$19.95 each. Upper lock rings, **K80-13559**, are \$4.99 each.

# MILITARY BRASS?

**Eliminate the "Grunt Work" with Dillon's Super Swage 600**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

# The Safepacker

**THE WILDERNESS' SAFEPACKER™ HOLSTER** is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

**Mark Pixler, editor**

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

"Government Model" Safepacker, RH **K80-11703 \$89.95**

*"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.*

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

## Secure Firearm Products Secure-Mat

The Secure-Mat features a magnetic corner that keeps small parts in place when you field strip your firearm for cleaning. Its soft, non-slip neoprene construction protects both your firearm and the work surface. It's ideal for when you're shooting an out-of-town match and have to clean your pistol in a motel room!

K80-19398 \$27.50

## Arredondo Multi-Function Squib Rod

This is a MUST-HAVE range-bag accessory. It's a squib rod (for removing stuck bullets), magazine base removal tool, and scope windage adjustment and battery cap removal tool.

K80-15250 \$12.95

The Otis Technology, Inc. Breech-to-Muzzle Cleaning System cleans rifles .22 to .50 cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal. The system includes three memory-flex rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

K80-18174 \$39.95

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?!). No excuse, Sir!

K80-19257 \$11.95

# Dillon's Pistol Die Sets

## Size Die

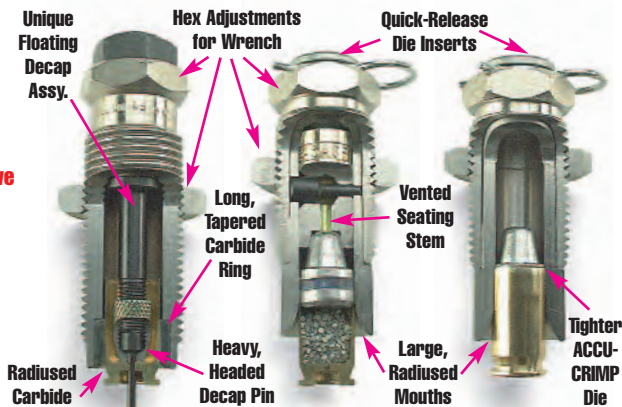

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets 35

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	K80-10839	\$66.95

Extra Loading Data Labels, K80-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use.

Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# KEEP IT CLEAN!<sup>37</sup>

## Bore-tips® Bore Cleaning Foam Swabs

Reviewed by Peter Caroline

Contrary to the opinion voiced by the majority of my college instructors, I am not lazy. I am energy efficient, and also highly environmentally conscious. I detest the waste of energy and natural resources consumed in the practice of cleaning guns. Sure, you can save your own valuable energy by training your children to clean your guns, but they inevitably grow up and leave home. Then, what do you do?

Now, think about the number of conventional cotton patches involved in the process of cleaning the bore of our favorite handguns or rifles after a shooting session. Did Eli Whitney expend all that time and effort in developing the cotton gin just so we could throw all those patches in the trash, and further saturate our overstuffed landfills? Hell, no! There must be a better way, and now there is, thanks to the wonderful folks at Swab-its® in Springfield, MA, which is also home to Smith & Wesson and the original Springfield Armory.

I first encountered Bore-tips Bore Cleaning Foam Swabs at the SHOT Show. I watched the demo at their booth, and it made a lot of sense. The foam swab surrounds a plastic jag that is sized for a tight fit in the bore. The swabs come in various sizes from .22 caliber to 12 gauge, color

coded for easy caliber identification, and they screw into all standard 8-32 thread cleaning rods. You first saturate a Bore-tip swab to apply solvent to your barrel, wait a while to let the solvent

work, and brush the bore to break up any fouling. Then you use a clean Bore-tip to push the crud out of the bore. After the now-dirty Bore-tip clears the bore, you wet it with some solvent and blot the dirt off with a clean rag or paper towel. Rinse and repeat, as they say. When your barrel is sufficiently clean, you can use a clean Bore-tip to dry the bore or apply a light coat of lubricant. The neatest part is, the Bore-tips can be cleaned with mineral spirits, dried and reused over and over again. Or, even handier, you can use a grease-cutting soap, like Dawn liquid detergent and water, rinse and let dry.

Bore-tips provide 360-degree bore coverage, are lint-free, stand up to just about every commercially available solvent and are a whole lot easier, faster and simpler to use

than traditional patches and jags. The Swab-its outfit also makes Gun-tips® foam swabs, which come in an assortment of sizes, are lint-free, washable and reusable, and replace cotton swabs. Best of all, Bore-tips and Gun-tips are available from Dillon (See Pages 67, 81). Patches? We don't need no stinkin' patches!

# Patches? We don't need no stinkin' patches!

## AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

**AP Custom USA's** Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

## TACCOM, LLC Tactical and Competition Accessories

**TACCOM, LLC's** Duaload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip (included)** that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

<b>2Up Belt/MOLLE</b>	<b>K80-19530</b>	<b>\$9.95</b>
<b>4Up w/Tek-Lok™</b>	<b>K80-19531</b>	<b>29.95</b>
<b>6Up w/Tek-Lok™</b>	<b>K80-19532</b>	<b>34.95</b>

**TACCOM, LLC's** Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holer and not have to worry about rim overlay...the rims are already overlapped in the correct position!

# CLASSIC FIREARMS: Early Co

By John Marshall

In the waning years of the 19th Century, John Moses Browning, the acknowledged firearms design genius, began to devote his attention to developing some practical and effective semiauto pistols. One of his first tasks was to specify dimensions and characteristics for a suitable cartridge around which to design his pistols. He settled on a .38 caliber round which was first called the “.38 rimless smokeless,” but which today is known as the .38 ACP (Automatic Colt Pistol). The exact same cartridge case was later used for the .38 Super, but loaded to higher pressure and velocity. Browning's first pistols worked and worked well, but his subsequent improved designs eclipsed them in features. As a result, the early landmark pistols are today only hard-to-find and relatively expensive collector items. Here is their story.

Browning began his work on recoil-operated pistol designs in late 1894. Within the next three years, he had patented four pistols. One of them was selected by Colt's Patent Firearms Manufacturing Company for development. It utilized a “parallel ruler” concept in which the slide unlocked from the barrel in recoil as the barrel dropped evenly, attached to the frame by two links. In 1897, 1898 and 1899, both Browning and Colt's fine-tuned the design with an eye on both military and commercial use. A couple of military trials were conducted, but the pistol was first placed on the civilian market in early 1900. This was the first American semiautomatic pistol commercially introduced. An improved version was marketed in 1902 and given the name “Sporting Model” to distinguish it from a similar “Military Model” with increased magazine capacity (8 rounds vs. 7) and a newly developed slide lock. The slide lock served to hold the slide back after the last round was fired from the magazine. Both of these pistols had 6-inch barrels. The Military Model had a more squared-off frame at the heel to accommodate a lanyard ring. In the latter part of 1903, a shortened, handier version of the Sporting Model was marketed as the “Pocket Model.” This pistol did not have the external slide lock, and no provision was made for locking the slide to the rear. All models were blued.

The year 1908 saw a few changes. The Sporting Model was dropped, and a new form of hammer with a spur instead of a rounded top became

standard for the Pocket Model. The Military Model also used this new hammer. These two pistols were made with few changes until 1927. In the meanwhile, .32 and .380 hammerless pocket pistols were introduced as the Models 1903 and 1908. The older .38 ACP Pocket Model has since become known to collectors as the Colt Model 1903 Pocket Hammer to distinguish it from its smaller hammerless cousins. The features of all the .38 ACP models are similar.

The pistol illustrated for this article is a Colt Pocket Hammer, which was shipped from the Colt Factory in Hartford, Connecticut in 1913. This century-old example has seen some honest wear, but it is still quite functional. The right side of the slide is lightly stamped “AUTOMATIC COLT / CALIBER .38 RIMLESS SMOKELESS”. The left side is

marked in the same manner “COLT'S PT. F.A. MFG. CO. / HARTFORD, CT. U.S.A.” The pistol measures 7-1/2 inches in length, and the barrel is 4-1/2 inches long. It weighs 32 ounces unloaded. The rampant Colt logo is behind the retracting grooves on the left side of the slide. There are 19 vertical grooves on each side, located over the gutta percha grips. The serial number is stamped deeply in the left side of the frame over trigger guard. The standard “VP in a triangle” Colt proof mark is stamped on the left side of the trigger guard. The sights are fixed; the rear sight is drift-

# Colt .38 Semiautomatic Pistols

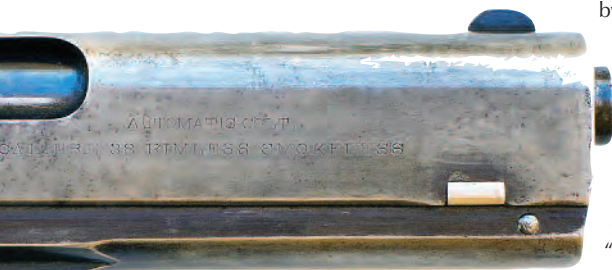

adjustable for windage, and the front sight is of the half-moon variety.

The slide is secured in the frame by a transverse wedge or mortise, which is in turn locked in place by a spring-loaded plunger under the muzzle.

Pressing the plunger in and pushing the wedge out from right to left initiates field stripping. There is no manual safety on the pistol. The only safety devices are a half-cock notch on the hammer, and the disconnector system that prevents firing until the slide

Production figures for the Sporting and Military models have been very hard to ascertain. Although it's somewhat difficult to estimate due to some intermixing of serial numbers between models, it appears that about 22,000 of the Pocket Hammer model were made. Although production ceased in 1927, the distribution and sales of this model continued for several years until existing inventories were exhausted. The Military Model was also dropped in 1927, although, similarly, sales continued for a while. Both were superseded in 1929 by the introduction of the .38 Super pistol, which was based on the frame and action of the Model 1911A1.

Contracts for the .38 Military Model never materialized, although trials were conducted not only by the United States, but also by Great Britain, Norway and Sweden. The principal problem cited was caliber – bigger was considered better. Somewhat under 200 “U.S.”-marked trial pistols, marked “Model

“Contracts for the .38 Military Model never materialized.... The principal problem cited was caliber – bigger was considered better.”

is fully forward. The spring-loaded firing pin is of the floating type, shorter than its channel. It therefore requires a full blow of the hammer to fire a cartridge. The gun may be carried safely, chamber loaded, with the hammer lowered slowly and carefully all the way down. The magazine holds seven rounds of ammunition, and is marked “PKT / COLT / 38 CAL” on the bottom plate. There are six witness holes on each side. The barrel has three transverse ribs in front of the chamber, which lock into corresponding recesses in the upper part of the slide when the slide is forward. As the pistol recoils, the slide and barrel move together to the rear. The links on the barrel drop the barrel down uniformly, parallel to the slide, to disengage it from the slide. A recoil spring under the barrel returns the slide forward and into battery, stripping a round from the magazine and feeding it into the chamber. The disconnector system – which provides for semiautomatic fire – will be familiar to anyone who has fully disassembled a 1911 pistol. The trigger moves straight to the rear, its yoke surrounding the magazine, nearly identical to the later 1911 pistol. The magazine release is a spring-loaded tab in the heel of the frame. Squeezing it forward with the thumb while pinching the lip of the magazine down with the index finger removes the magazine from its well in the frame.

1902” were sold at public auction around 1906. These, of course, are quite valuable today. A few Military Models were reportedly purchased by Siam for military and police use, but for the most part, this model never got off the ground. However, many of its features paved the way for the Model 1911 .45 pistol, which is one of the most enduring designs ever made.

These early .38 Colt semiauto pistols are mostly just curiosities today, but still are highly sought after by collectors and students of history. They gave John Browning a proving ground for principles upon which he based his subsequent 1911 and 1935 pistols, both of which have achieved immortality. Any of these pistols, many of which are over a century old, should be examined carefully by a competent gunsmith before firing with proper .38 ACP ammo. Although .38 Super rounds will chamber and fire, that would invite destruction of the weak old actions and very probable injury to the hapless firer. Values on decent condition .38 pistols continue to rise as they become more scarce, victims of the passing years. They are definite milestones in firearms history and very interesting classics, well deserving of study. It's my hope that this summary will give those who encounter them a greater understanding of their place in history and essential characteristics.

# SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

**K80-21894 \$44.95**

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

**K80-19972 \$39.95**

## Stainless Steel Dial Caliper

- .100 per revolution.
- Covered track for longer caliper life - keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

# Concealed Carry Tote<sup>47</sup>

\$45<sup>00</sup>

K80-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

## 'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

Brown 5-Mag. Double-Stack (9/.40 GLOCK)	K80-19857	39.95

## Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

K80-19495 \$9.95

## Baschieri & Pellagri 12 Ga. Target Slug

Reduced recoil, 1200 fps  
25 per box

K80-19214 \$21.00

## DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

K80-19371 \$29.99

# 9mm vs. .40

By Larry Drake

If you're over 35 and have been a firearms enthusiast for most of your life, you probably remember the VAST number of articles comparing 9mm to .45 ACP, .40 S&W, .357 SIG and any other cartridge you can imagine. It seemed every gun magazine in America was enthralled (or their editors all thought WE would be) with this debate. The "Versus Whatever" arguments always involved magazine capacity, stopping power, penetration in ballistic gel, and a bunch of other scientific mumbo jumbo that left most readers wondering what the hell they'd just read.

Should I have a lot of light, fast, bullets or would a smaller number of heavy hitters serve me better? What if the bad guy is wearing a leather jacket? Will my 9mms get caught in the zipper? Soooo many choices.

Well, I'm not going to debate any of that. I'm more interested in the COST of shooting and the good ol' standby .22 LR isn't exactly winning that debate anymore.

I know lots of gun owners and can think of very few that don't own at least ONE gun in .22 LR. We all love the little guns, and for many of us they were our FIRST guns. I know I have fond memories of grabbing a box of .22s and plinking for what seemed like forever. What's not to love about the .22 LR? The guns are usually inexpensive and many of them are highly customizable to suit the shooter. The ammo is dirt cheap and plentiful...oh, wait...it isn't so cheap anymore and it's become increasingly hard to find. So, why shoot .22 LR at all if it isn't cheap to run? Just for the fun of it? If I can shoot something with more oomph and spend the same money doing it, THAT's the plan for me!

Enter the 9mm. Still manageable, recoil-wise, for shooters of almost any stature, the guns tend to hold a lot of ammo and, these days, it's just as cheap to shoot as .22 LR. Well, if you reload, it is

and for those who are likely to be reading this article, you either reload or are seriously thinking about it. So, let's look at the cost of shooting .22 LR compared to reloading 9mm.

Checking the cost of .22 LR online, the cheapest I can find is 13¢ per round and that's for a lesser-known brand. The cheapest name-branded ammo comes in at 15¢ per round. That makes that 500-round brick of ammo we used to get for less than \$20, come in at \$75. At a recent gun show, I watched a vendor who sat across from me sell off a large quantity of .22 LR at \$65 a brick, and those were short bricks that had something like 366 rounds in them!

Checking online for 9mm components I found the following:

Brass (once fired) 4.4¢; 115-Grain RN bullets 7.3¢; Small pistol primers 3¢; Powder (average cost) \$25/lb.

This gives us a cost of \$172 for 1000 pieces of brass, bullets, primers and a pound of powder. So we are at 17.2¢ for one round, which is a bit higher than our .22 LR cost. Or is it? We're reloaders, right? So we're going to be picking up that brass, cleaning it and using it again. That cuts our brass cost significantly since we get to "Go Green" and recycle it. I usually divide my brass cost by 10 to account for loss and wear. That reduces it to less than 1/2¢ for each piece of brass.

Another area to examine the "real" cost of our components is powder. In a typical

9mm load I get about 1500 rounds out of a pound of powder. That means my powder cost for enough powder to make 1000 rounds is \$16.66, which makes my cost per round \$0.017 if I round up.

Given those factors, let's do our math again:

<b>Brass</b>	\$0.004
<b>Bullet</b>	\$0.073
<b>Primer</b>	\$0.03
<b>Powder</b>	\$0.017
<b>TOTAL</b>	\$0.124

**So, why shoot .22 LR at all if it isn't cheap to run? Just for the fun of it? If I can shoot something with more oomph and spend the same money doing it, THAT's the plan for me!**

# S&W .22 LR? <sup>49</sup>

That's 12¢ per round to make 9mm ammo and plink away at a cheaper cost than running our .22 LR, which you may recall was 13¢ for "Brand X" and 15¢ for "Name Brand" ammo. On a round-by-round basis, that's just pennies, but when we look at the cost per thousand it's a different story:

"Brand X" .22 LR	\$130/thousand
"Name Brand" .22 LR	\$150/thousand
9mm Reloads	\$124/thousand

With 9mm reloads you save \$6 per thousand over "Brand X" and \$26 per thousand over the "Name Brand" 22s. That 9mm ammo isn't just for plinking, either. You can use it for practical pistol competition in USPSA, IDPA, ICORE and others. If you have a local steel match (we have several in the Phoenix area) 9mm is just about the ideal round for competition.

The math works out for other cartridges, too. You can use pretty much the same cost calculations for .38 Special or any of the .355 - .357 caliber cartridges out there. Brass costs vary, but that's by far the least expensive part of the

formula if you're starting out with once-fired brass (and given that you're going to re-use it several times). Even .40 S&W isn't much more since bullet costs are usually only 1¢ or 2¢ more per round, and all the other components are about the same price.

For those of you who may not reload, but are reading this article because you're interested in starting; I'd urge you to get going. Prices don't seem to be going down any time soon and you want to be able to keep shooting, right? An investment in a solid reloading machine and a supply of quality components will go a long way towards insuring that you can continue to have ammo for the foreseeable future.

So, in the 9mm vs. .22 LR showdown, I have to give the nod to 9mm. For the time being, the .22s can stay in the back of the safe and my REALLY fun guns get to come out and play. Maybe - one day - the tables will turn again and the old .22s will be my "go to" guns, but for now the math says to "go bigger" and reload!

BFR Mounting Hardware Kit	K80-50140	\$9.95

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**K80-50050, \$384.95**

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**K80-50075, \$869.95**

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

**K80-50125, \$76.95**

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

**K80-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

### RCBS Scale Check Weights

Standard Set: 60.5 grains for powder charges.	K80-12297	\$34.95
Deluxe Set: 510.5 grains for bullets, cases and powder.	K80-12458	\$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Wrench/Lock Ring 5-Pack	K80-10668	9.95

## Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Armorer's Block **K80-19536 \$29.95**

# Grace USA<sup>53</sup> Gun Care Tool Set

This custom designed 12" x 9" x 1-1/2" case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

Note: These Come in Assorted Colors

# TACCOM, LLC Accessories for .22 LR AR-15 Conversions 55

**T**ACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

**K80-19538 \$13.95**

**T**he **TACCOM Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is **KEY** for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

**K80-19539 \$10.95**

**D**oes your .22 Long Rifle insert move back and forth in your AR upper? The **TACCOM Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

**K80-19533 \$7.95**

**T**  
**SPORTS®**  
**TACTICAL**

**AR-15 Super Tool**

**K80-19549 \$24.95**

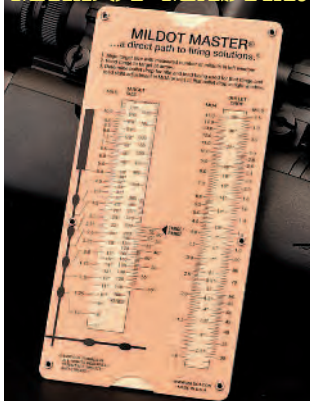

**\$52<sup>99</sup>**

**T**he **De Santis Elastic Belly Band** accommodates small autos and revolvers with one reload and a pair of handcuffs. Fastest when worn under an un-tucked shirt, but can be used with a tucked-in shirt for deep concealment.

24" - 28" waist **K80-18557** 30" - 34" waist **K80-18558**  
36" - 42" waist **K80-18559** 44" - 50" waist **K80-18560**

**MILDOT MASTER**

**Y**ou can become a master at using a Mil Dot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

Mildot Master® **K80-14762 \$29.95**

**Schuster Mfg. Inc.**  
**Adjustable M1/M1A Gas Systems**

**A**ll Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

# The Firearms Academy of Sea

## By Duane Thomas

Recently I attended the Firearms Academy of Seattle's Speed Shooting Course. And a very interesting course it was, too. This class is meant to teach shooters techniques that can help improve their speed, both in pure shooting skills like shot-to-shot speed (splits) in rapid fire and the ability to transition the gun fast between targets, and gun-handling skills like the draw and speedload, etc.

One of the first things Marty Hayes, head man at FAS, had us do was close-range draw and fire, just pushing the speed to the maximum possible for a series of draws on a target three yards away, maintaining safety, all rounds fired going down-range, but not really worrying about where the bullets hit on-target. We can become fast and accurate after we've become fast first.

To start with, Marty demonstrated, his first draw was .86 second. Not at all shabby! Marty commented afterward, "That's the fastest draw I've ever done. Okay, folks, now the time to beat is .86 second!" Then he went down the line, every person got to do a series of max speed draws. When my time up came, Marty asked me, "Have you ever done a sub-one-second draw before?"

"Yes."

"What's your fastest draw ever? The time to beat is .86 second."

"Actually, my fastest ever draw thus far was clocked at .85 second."

"Okay, folks, the time to beat is now .85 second! That means now *you* need to do it in .84 second."

Wouldn't you know it, my very first rep was .84 second. "Okay, folks, now the time to beat is .84 second!" That's what happens when you have an instructor with a skill level such that he can push you.

Also this class was an excellent opportunity to practice transition speed. This is where shooters at the higher skill levels absolutely murder those at the lower skill levels, even if those lower-level shooters should happen to possess innately faster reflexes and better hand-eye coordination.

Allow me to seemingly digress for a moment. I remember one time I was shooting with a friend of mine, who possessed only the most rudimentary knowledge of firearms, though he did own his own 1911 .45. Just for fun we were doing some runs where we double tapped three USPSA targets at five yards, with a couple of yards between targets, measuring our performance with an electronic timer. Since he didn't have a holster, I let him start with the gun already in his hands at the Low Ready, whereas I went from the holster. I deliberately factored draw time out of his performance so that would allow him to "beat" me for total time on every rep.

Looking at our times afterward I found absolutely fascinating. This guy might not have

# ttle's Speed Shooting Course

Marty Hayes demonstrates a draw at the FAS Speed Shooting course. (1) The draw begins, the master hand moves to the gun in the holster while the support hand moves in to the body. (2) The gun is lifted from the hol-

ster and is rotated toward the target. (3) Once the hands meet, extension begins. (4) The gun is pushed out toward the target. (5) The shot fires. With practice this process can take considerably less than one second.

At the FAS Speed Shooting Course, a class attendee practices drawing and engaging a three-target array. (1) The draw begins, as the shooter moves to acquire a firing grip on his Glock in an IWB holster. (2) The gun is drawn, the push out toward the target begins. (3) Lock

out, the first target is engaged. (4) The shooter transitions the gun to Target 2. (3) Then transitions to Target 3, out of frame to the right. Note the relationship of the head to shoulder to torso to hips never changes, from the start of the draw all the way to engaging Target 3.

had much experience shooting, but he had absolutely smoking reflexes. With very little experience shooting, and not really knowing what he was doing, he could turn in consistent .13-second splits on-target. That's fast. That's faster than I can do it even after decades of practice, I just don't have the reflex level. But then his transition times to get the gun between targets, the time interval between the last shot on one target and the first on the next, averaged around .65 second.

By contrast my splits averaged .24 second, but my transitions averaged .28. Because transition speed is more a matter of technique than pure reflex level. In any sort of even contest, the person who can turn in transition times equal to or very close to their splits is going to walk all over the person who has faster splits but doesn't know how to transition the gun.

On the classic three-target array you can actually HEAR the difference in skill level. At the lower skill levels it sounds like *Bang-bang! Bang-bang! Bang-bang!* with a perceptible pause between each target. At the higher skill levels it sounds like one continuous string of fire: *Bang-bang-bang-bang-bang-bang!*

Also I kept track of our accuracy. The very best rep my friend turned in was three As, two Cs, one miss. Every single one of my reps was all As. If you're familiar with USPSA/IPSC scoring, you'll realize that the person who can combine transitions at the same speed as their splits with a high level of accuracy is going to pull away from those at the lower skill levels and never look back.

One of the keys to maintaining accuracy at speed, and something Marty teaches at the FAS Speed Shooting Course, is to isolate muscular tension during transitions in your lower body, away from the upper body. Most people when transitioning the gun twist at the waist. This causes muscular tension in the upper body that makes the gun do a hula dance in recoil. What you want to do it keep the relationship of your head, arms, shoulders, chest, belly, hips, your entire torso, the same when transitioning, and do all your movement with the knees. When you do this, transition movement feels very distinctive, very different from what most people do. (What, in all probability, you were doing before you learned this technique.) Rather than feeling like you're moving the gun from target to target, you

**64** feel like you're just moving your entire body, already set up in this perfect shooting stance, from target to target, and nothing really changes above the knees.

The class ended with the far-famed FAS Handgun Master test, during which I posted my fourth pass on it, this time with a Rock River Arms Limited

For his fourth pass of the FAS Handgun Master test, Duane used a Rock River Arms Limited Match Pistol, Black Hills factory .45 hardball, a Blade-Tech Standard Belt Holster, a matching double mag pouch from the same maker, and Wilson magazines.

ed Match Pistol, a "factory custom" 1911 .45.

I don't have space in this article to discuss all the great lessons imparted at the FAS Speed Shooting Course, I have barely scratched the surface. If ever the opportunity to attend this training comes your way, I highly recommend you take it.

Visit Duane's site: [Self-Defense-Handguns.com](http://Self-Defense-Handguns.com)

The gun Duane used for this course was a Rock River Arms Limited Match Pistol, a "factory custom" 1911 .45 auto.

## Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

K80-18599 \$14.95

# drymate™

## Bore-tips® Bore Cleaning Foam Swabs

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ K80-11313 \$19.95

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 threading cleaning rods, and are tough and reusable.

## Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar steel stock and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless	K80-18600	\$49.99
Blued	K80-18601	49.99

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

Four-Magazine Storage Sleeve	K80-19226	\$14.95
Six-Magazine Storage Sleeve	K80-19227	17.95
Magazine Sleeve I.D. Tag/Hanger	K80-19476	1.95

## Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight	K80-18210	\$53.95

# ElZetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).  
 ZFH1500 AR15 Flashlight Mount **K80-12020 \$29.95**

## The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

**K80-18146 \$65.00**

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

**K80-15384 \$29.95**

# 72 AR MAGAZINES

**C**-Products 30-Round aluminum M-16/AR-15 magazines. **K80-15593 \$19.95**

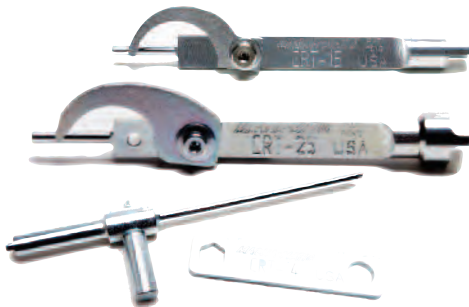

**M**SAR 30-Rd. polymer AR-15/M-16 mags for 5.56 & .300 Blackout. **K80-19105 \$12.99**

## Comp-Tac's Trojan Horse Long Gun Case

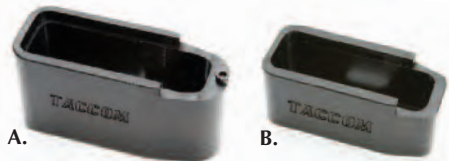

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Standard Trojan Horse Long Gun Case **K80-19388 \$75.00**  
 Heavy Rated Trojan Horse Gun Case **K80-16229 100.00**

## Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,

30mm tube and

bright illumination of the reticle are just a

few of the many features of the DMS-1. Bright

red illumination of the reticle adds to the quick-

ness of the sighting system in day and low-light condi-

tions. At one power it works well as a reflex sight and at

longer ranges the four-X magnification gives increased ac-

curacy.

**K80-19458 \$249.95**

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

TRS-25	<b>K80-11643</b>	<b>\$89.95</b>
TRS-25 HiRise with base (Pictured)	<b>K80-16227</b>	<b>119.95</b>

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	<b>K80-25374</b>	<b>\$79.99</b>
Scout Scope Mount for SKS Rifle	<b>K80-25373</b>	<b>78.99</b>

# BALLISTIC SHIELDS: THE ULTI

By Robin Taylor, [www.taylorfreelance.com](http://www.taylorfreelance.com)  
Photos by Hardwire LLC & André M. Dall'au

Turn on the 6:00 News, and eventually you'll see a "bulletproof" shield in use. They're standard equipment for law enforcement entry teams, but since Sandy Hook, civilian-market shields now include everything from bulletproof clipboards and backpacks to full-on police-style shields. School districts in a number of states have started using them (disguised as whiteboards), working shields into their "lockdown" strategies.

"For the past 10 years most of what we've done is for the military," says Emily Heinauer with Hardwire LLC. "We armored the sides of many of the trucks going to Iraq and Afghanistan. During that time we started making clipboards for law enforcement, and after Sandy Hook, we adapted that to Bulletproof Whiteboards for educational and commercial settings. Our school and home products have dual functionality as dry erase boards for daily use and ballistic protection."

A Hardwire Level IIIA whiteboard weighs less than 4 pounds, and measures 18" by 20". While small by comparison to a full-size shield, it sells for under \$300, and it's practical. Backpack inserts go for even less.

I did some digging into "the way of the shield" with the help of Bill Blowers at Tap-Rack Tactical ([www.tap-rack.com](http://www.tap-rack.com)). Bill serves as a police sergeant on a large regional SWAT team and is the owner of Tap-Rack Tactical. Police departments use ballistic shields for warrant service and other calls a lot, so Bill offered to throw me in with a dozen new SWAT officers that needed to get up to speed. Training with Blowers turned out to be one of the highlights of my year.

## Shield = "Bulletproof" Vest With A Handle

A ballistic shield acts like a bulletproof vest with a handle. It is rated like a vest (III A, III, IV), and has similar capabilities. Depending on when the shield was made, it could contain any of several fibers, including Dyneema®. The hard format

of the shield allows using polyethylene fibers to stabilize and protect the material from humidity, wear, and UV light, making the shield vastly more durable. Typical examples last for decades. (Soft Kevlar armor vests degrade when exposed to moisture and UV light, and must be replaced every few years.) The typical polycarbonate viewport stops bullets as well as the shield itself, helping the shield to absorb bullets like a sponge.

## Aren't They Really Heavy?

Not anymore. The total weight of a typical IIIA shield has dropped from around 40 pounds, to a little over 20, including on-board floodlights. For the officer in the field, that's tremendous, because the "shield man" does heavy, surprisingly technical work. For the home defender that isn't built like a SWAT cop, the lighter shields offer mobility – and smaller-bodied people can use them effectively.

If you're willing to go smaller and simpler, shields can be made even lighter. What I'll call "three-quarter-size" 20" x 30" shields can weigh just 5.8 pounds. Drop the on-board lights, and a full-size Level IIIA model can be had as light as 8.2 pounds, including a viewport.

## Roman Inspiration

Roman legionnaires loved the curved-rectangle "Scutum" shield for its wide arc of protection, and its ability to interlock with your neighbor's shield to form a continuous wall. Modern shield makers have taken the hint, and by the end of our class, my group formed into miniature versions of the old Roman "tortoise" (one row of shields facing front, another laid over the top to form a roof) in order to enter stairwells or warehouses with overhead threats.

For the static defender, the curved rectangle offers a protective arc, coupled with a

# MATE DEFENSIVE ACCESSORY

wide viewing area (hold your forehead against the top of the viewport). In Simunition fights with my classmates, a moving shield man was terribly vulnerable to shots fired at the legs, but if he knelt and anchored his pistol's trigger guard against the side of the shield – he offered no target at all. (Given time to prepare, police shield men strap on shin and leg protectors.)

Although it lacks a viewport, the 20" x 30" flat shield offers most of that protection at a tiny fraction of the weight and cost.

## Shield Team = Deadly Buddy System

Shield bearers give up offensive potential to protect the team. It's their partners' job to shoot around and over the shield while the shield bearer deals with blind corners and point-blank threats with his pistol.

Done right, that buddy system is downright formidable. Done wrong, that "around and over" business can bite the shield bearer. Blowers' agency has seen what happens when it goes bad. When one of their own fired his AR-15 with the muzzle even with the shield man's ear, the shield man suffered permanent hearing loss. To his great credit, the shield man stayed in the fight, but was in tremendous pain. The rifle wore a standard birdcage flash hider – just imagine what damage a side-venting recoil compensator could have done!

Suppressed rifles make a lot of sense for "around and over." Sticking with pistol caliber carbines or and/or a shotgun makes good sense too. Common shotguns lack any legal bother, put the

muzzle ahead of the shield (when used properly), and pack a massive short-range punch.

## Lasers and the Shield

Love 'em or hate 'em, lasers come into their own around a shield. Using a laser-aimed pistol, a shield man can remain totally protected by the shield and still put accurate fire on target. Instead of sticking his arm out into harm's way to use the sights, the shield man locks the bottom of his pistol's trigger guard against the side of the shield, aiming with the laser alone. Having a pistol on each side of the body (what Blowers calls a "Yosemite Sam rig") gives the shield bearer the ability to rapidly switch sides as he moves.

For the barricaded defender, however, complex switching is not in the cards. If our focus is to hold ground – a single laser-aimed handgun is plenty.

## What Will a Shield Stop?

All the available ballistic shields stop baseball bats, thrown rocks, knives, chemical agents, and onrushing bad guys in ways that a vest just can't. For that sort of protection, shields have no equal.

However, this is a balancing act. A briefcase or clipboard shield is like a pocket pistol. It's nobody's first choice, and hard to use well. A full-size level IV is like a

heavy machine gun – you'll want wheels and a pickup to move it very far.

According to Blowers' thinking, Level IIIA shields offer the best balance. They stop all common handgun and shotgun cartridges – including 12-gauge slugs. When his department decided to

Left: Hardwire LLC's Tactical NIJ Level IIIA 20" x 30" Notched Shield. Above: Homeowner using Hardwire LLC's 18" x 20" NIJ Level IIIA Bulletproof Whiteboard as he opens the door.

*Photos courtesy Hardwire LLC.*

**80** retire some older IIIA shields, Blowers trotted one out to the range for testing. The shield stopped everything it was rated to stop – including 12-gauge hunting slugs and a broadhead hunting arrow. The viewport took multiple .45 hits in the same spot before it finally failed. The 12-gauge slug pushed out a fair-size dent in the back of the shield, but it stopped. Most shields have a standoff device to deal with back face deformation like this – some use a pad, while others use nylon webbing. Keep in mind shields can stop a hard impact like that without “taking the hit” on your flesh the way you would wearing a soft vest. Vest owners often wear tiny shields (“trauma plates”) to spread the blow and protect their sternum from impacts like that.

### What Will a Shield NOT Stop?

After that initial test, Blowers set up a mannequin wearing a IIIA vest behind the shield and fired the common 62-grain M855 “green tip” 5.56 NATO at it. The bullet punched the shield and continued through the vest, the dummy, and the IIIA vest’s back panel before drilling a hole through the support structure beyond. Yowza! Congress decreed the mild-steel-cored M855 to be non-armor piercing through legislation, but to soft armor and light shields, it’s a major threat. Rifle ammo of any form will punch IIIA, making a chest-plate mission-critical equipment if that’s part of the expected fight.

To stop rifle ammo, you need level III, and common low-grade penetrators like the “green tip” demand level IV. Such armor weighs four times as much as typical IIIA, transforming that nimble, 20-pound IIIA shield I mentioned earlier into an unwieldy 80-pound slug. Even the neat little IIIA 20” x 30” shields offered by Hardwire go to almost 20 pounds for Level III. Want Level IV in that size? Forget it.

### Shield Work = Ultimate in Pistol Handling

Working with Blowers’ crew, I learned why shield men treasure reliable super-hi-cap magazines. Take a moment and imagine reloading

while holding a shield in one hand. Now try clearing a double-feed. We all did it, but it’s slow – very slow.

“Take this part of the pistol and punch yourself in the thigh,” coached Blowers – pointing to the area just ahead of the rear sight, then punching himself with it. By driving the pistol hard at his thigh, the slide would “stick” against his pants leg while the frame glanced down and away, cycling the slide. Like most techniques of this sort, let me say right off: “don’t try this at home” (or your home range) until you get proper training in it

prior to live fire. There are very real risks for accidental discharge (as Blowers emphasized) if you don’t perform it properly. Blowers warned us repeatedly, and emphasized INDEXING (keeping the trigger finger on the frame) while keeping the muzzle pointed away from yourself or others. For me, the technique worked okay on plain cloth, but worked great if I could hook my pants pocket with the rear sight.

Does it work? Sure enough, during the live fire section my trusty G17 jammed. Thanks to Blowers’ coaching I was able to “punch myself” and get back in the fight in seconds.

### What Do Shields Cost?

A little shopping online gave me a wide range of bullet-resistant options. Hardwire’s “notched” 20” x 30” Level IIIA with no viewport costs just \$549 (about what

you’d spend for a Glock or S&W M&P). A curved shield, Level IIIA with viewport, runs \$1,500. A briefcase/backpack insert goes for as little as \$99. ([www.hardwirellc.com](http://www.hardwirellc.com) – or 410-957-3669).

Top IIIA shields meant for heavy LE use run in the neighborhood of \$2,500 apiece – including the floodlights and other goodies. Realistically, a full-size shield is something like a sports car – expensive, specialized, but tremendously good at what it’s designed for. They’re not for everyone, but when it comes to “hardening” yourself or your home against serious attack, ballistic shields are the ultimate defensive accessory.

The Cramerton, North Carolina, Police Department SORT, performing an exercise using a ballistic shield.

**Ultimate Advanced Revolver with Jerry Miculek – The World's Greatest Revolver Shooter** Jerry Miculek is recognized as the fastest and most accurate revolver shooter in the world. His speed and skills are, in one word...Amazing! They've been verified in hundreds of local and national competitions. In this program, he shares with you some of the techniques and secrets he has mastered over the past 25 years to become the shooter he is today. And, you'll see an incredible display of revolver shooting and reloading. 100 min.

**K80-14608 \$19.95**

**Competition Reloading with Brian Enos** guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

**K80-14341 \$19.95**

## Close & Ready Bedside Holster Caddy

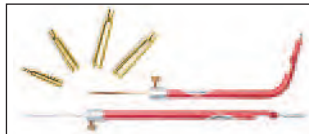

**Holster NOT Included**

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

**K80-18046 \$29.95**

## Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

### Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

OAL Gauge **K80-14622 \$38.95**  
 OAL Gauge, Curved **K80-14862 39.95**  
 (Use for auto, lever and pump rifles)

 .300-06 **K80-14653 6.99**  
 .300 Win. Mag. **K80-14655 6.99**

### Bullet Comparator

Correct bullet seating depth is critical to accuracy. In addition, minor variations in bullet seating depth will have an effect on both pressure and velocity. The L-N-L Bullet Comparator provides precision handloading dimensions.

This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

# Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	<b>K80-19220</b>	<b>\$29.95</b>
Advanced Trauma Kit (A.T.K.)	<b>K80-19322</b>	<b>69.95</b>
