22 CHARGER™ PISTOL

RE-ENGINEERED WITH ENHANCED FEATURES

The Ruger® 22 Charger™ pistol is back – recharged and re-engineered – with enhanced features and a new 22 Charger™ Takedown model. First introduced in 2007, this unique .22 LR pistol became a favorite of long-range target shooters and plinkers alike. The new 22 Charger™ pistol offers improved ergonomics and new features, including the new BX-15™ magazine. The takedown model employs the very popular 10/22 Takedown® quick disconnect feature that allows this pistol to be taken down quickly and easily.

Threaded Barrel Features a
1/2"-28 Thread Pattern

Adjustable Bipod Offers Rock-Steady
Sighting (Included with Both Models)

Included BX-15™ Magazine is the
Perfect Length When Shooting Prone
or From the Bench

* Some pistols may not be available in all states and locales due to laws limiting magazine capacity and feature-based restrictions. Please check with your local law enforcement agency prior to purchasing this firearm to verify that it may legally be purchased and/or possessed in your particular state and locale.

Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

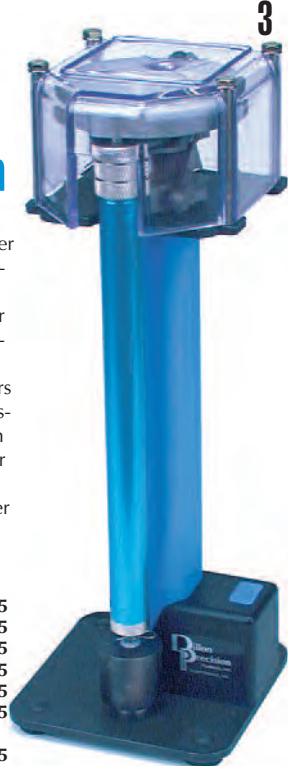

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I recently started making .300 AAC Blackout ammo. I was looking through your catalog and saw the RT 1500 trimmer. I called your number and was talking with your representative about the trimmer and how it worked. To make the story short, he convinced me to buy the trimmer and I was surprised how well it worked. I have convinced a friend of mine to purchase one by letting him make some .300 AAC Blackout brass from .223 brass. What I am attempting to say is, "Your staff knows your products and your product will sell itself when others use it."

Stephan Gozdzialski - Gozdzialski1607@charter.net

**RL 550B & XL 650
Short Trim Die Toolheads**

Thanks, Stephan! There's obviously a direct relationship between the current popularity of the .300 AAC Blackout and our development of the RT 1500 and the new Short Trim Die Toolheads we now offer for our RL 550B, XL 650 and Super 1050 reloading machines.

I'm happy to say that I'm the proud owner of three RL 550Bs. I have three friends who originally went out and bought "Brand X" presses, but they now own 550s, also. On the first 550 that I bought 25 years ago, the only problem I ever had with it was that I wore out the primer slide and primer magazine base. I can't believe that after all those years you replaced it with no charge. It works just like a brand new one now. I hope you keep up the good work and I'll keep on cranking. I load between 5,000 and 6,000 rounds a year.

Which Dillon is Right for YOU?

Page 8

SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

SUPER 1050

Our commercial-grade reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

10 THE CAR GUN...

By Peter Caroline

As Monty Python once dramatically reminded us, no one expects the Spanish Inquisition...but, it's not unreasonable to be prepared for other forms of unpleasantness. I routinely carry a spare tire, a fire extinguisher, a first aid kit, a flashlight and road flares in my car. I also carry a gun or two. Or more. Dedicated car or truck guns make sense, even if you routinely carry a gun on your person. A holstered gun may be inaccessible when you're in the driver's seat; your car gun should not be.

I'll never forget my first car gun, an 1880s-vintage Enfield Mk II revolver, purchased in the late 1950s for about \$15. It was a huge, ungainly beast that chambered .45 Auto Rim cartridges, and it lived under the driver's seat of my first car, a 1953 Austin A40 sedan, an unforgivably horrible vehicle. My criteria for a car gun, then as now, were that it had to be large, indestructible, cheap and eminently replaceable. Large, because I don't have to carry it on me, and because large guns make a more memorable first impression. Indestructible, because car guns tend to get bounced around more than most. And cheap and replaceable because it could possibly get stolen or even end up in an evidence locker.

Since then, I've owned a number of car guns, including a Boer War-era Webley Mk IV, which I

just retired. Now, I've added an additional criterion: large capacity. Why be reloading when you should be shooting? The Webley's replacement, a Third Generation Glock 21, holds 13+1 .45 ACP cartridges. It looks imposingly large, although it is in fact not as large as a double-column 1911. It was relatively inexpensive because it's not the latest model. And, it's eminently replaceable; there are many more exactly like it.

When I took the Glock 21 to the range for the first time, there were no surprises...it behaved exactly like a Glock, only bigger. It eats whatever you feed it: ball, hollowpoint, semi-wadcutters, even 1944-dated G.I. steel-case ammo. Sights are quite eye-friendly...a white-outline rear and white dot front. Trigger pull is about 7-1/2 to 8 pounds, but I had no problems keeping three-shot groups within the head of a police silhouette target at 10 yards.

The Glock 21 comes in a sturdy black plastic case, along with the usual cable lock, cleaning rod and brush, an extra magazine and a simple magazine loading device, which actually works nowhere near as well as an UpLULA.

There is one feature on my new car gun that was never on any of its predecessors...an accessory rail ahead of the trigger guard. That of course called for a new accessory, but I didn't want to bust the budget. I found a compact green NcSTAR

FIREPOWER TO GO ¹¹

laser on Amazon for \$44, and it fits perfectly. It lined up very closely with the iron sights at the first attempt, and I'll tune it in a little better on the next trip to the range. There is, however, one issue: green lasers are known to eat batteries like popcorn, and the ON-switch takes only a light touch or a bumpy road to activate. I did discover that a wooden safety match or a nickel stuffed in the gap under the switch can serve as a locking device, and it pops out with one finger when the gun is needed.

In terms of accessibility, I couldn't wish for a

more suitable vehicle than my Honda Ridgeline. I'm left handed, and the driver-side door pocket provides a very handy receptacle for a pistol. A

variety of other compartments in the cabin conceal extra guns and spare magazines. For other cars, there are a wide variety of specialty holsters and gun-retaining devices available to meet your needs. Most important is accessibility, followed by the gun not being visible from outside of the vehicle.

Having a car gun gives you a comforting extra level of protection. And of course, it's a wonderful rationalization for buying another gun.

BL 550 Dillon's Basic Loader

\$259⁹⁵

LOG-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount LOG-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

RL 550B ACCESSORIES

A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

L06-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **L06-20782, \$76.95 ea.**
Magnum Rifle Powder Bar **L06-21353, \$29.95 each**
X-Small Powder Bar **L06-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **L06-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

L06-20064, \$11.35 each

Three or more, **\$10.25 ea.**

X-Large Powder Die, **L06-21253, \$19.95 each**

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

L06-13909, \$22.95 each

Three or more, **\$20.95 ea.**

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

L06-22055, \$20.95 each

Three or more, **\$18.95 ea.**

G. 1" BENCH WRENCH

L06-10842, \$7.95 each

Two or more, **\$7.10 ea.**

Square Deal B with Wrench Set	L06-19441	26.95
Dipped Ball-End Hex Wrenches	L06-11483	17.95
One-Inch Bench Wrench	L06-10842	7.95
Square-Deal-Only Wrench	L06-19970	8.95

Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	L06-22051	\$48.95
XL650-only	L06-22052	45.95
Square Deal "B"	L06-22223	64.95

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	L06-22214	\$41.95
RL 1050 Tray Kit	L06-22215	41.95

Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System
L06-97126 \$142.95

Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

L06-16306 \$41.95

Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	L06-17950	\$45.95
Plastic Roller	L06-22183	40.95

Quick-Change Cover for use with powder measure. **L06-11143 \$14.95**

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

Dillon's Case Preparation Equipment

CV-2001
LOG-20493
\$188.95

CV-750 LOG-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator LOG-20675 \$75.95

CM-500 Case/Media Separator LOG-21045 \$47.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 LOG-22047 \$213.95

Euro CV-750 LOG-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **L06-13804** **\$8.95**
Case (20 pc.) **L06-20255** **\$135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **L06-13733** **\$8.95**
Case (20 pc.) **L06-20256** **\$135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **L06-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **L06-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **L06-13496** **\$15.95**

2" J-Frame S&W Rev. **L06-15764**

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport - and no more - so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

1911 Holster **L06-19947** **\$139.95**
Mag Pouch **L06-19946** **44.95**

Dillon's New Rapid Trim 1500 Case Trimmer ²³

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **L06-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **L06-13141**, are **\$19.95** each. Upper lock rings, **L06-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **L06-11703** **\$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **L06-11702** **\$99.95**
"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.
- "Officers" Model" Safepacker, RH **L06-11701** **\$99.95**
"Officers Model" Fits: Colt Officers' Model, GLOCK 19/23/30/32/36, Para P-12, etc.

"Mustang" Fits: Colt Mustang, Pony, KelTec P-32, Beretta Tomcat, etc.

Close & Ready Bedside Holster Caddy

Holster NOT Included

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

L06-18046 **\$29.95**

The Pistol Sheath by Center of Mass LLC

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

Dillon's Pistol Die Sets

Size Die

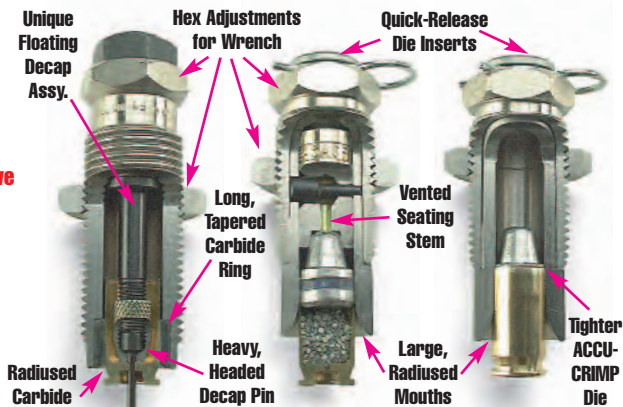

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)

5-Pack Die Lock Rings	L06-10669	4.15

Reloading With Dillon's R

Most shooters realize that reloading is the most economical way to enjoy their sport, but many shooters are unaware of just how simple it is to reload. In fact, Dillon's RL 550B is the easiest progressive loader in the world to learn to reload with. How can we make that statement? Simple. Since all of the reloading steps are performed with one stroke of the handle, there is less to remember (or forget) than with an old-fashioned single-station press. Skeptical? Follow me through the ABC system.

A Place a bullet and an empty cartridge case into the RL 550B's shellplate.

For more information about Dillon's RL 550B Progressive Loader, see Page 14.

B Lower, then raise the operating handle. The RL 550B will automatically deprime, resize and reprime. It dispenses the powder charge, seats the bullet to its proper depth and crimps it tight. All automatically. All you touch is the operating handle.

C Advance the index sprocket with your thumb and your RL 550B will automatically eject the loaded round into a convenient bin. What next? Repeat step "A." Sound easy? You bet it is!

RL 550B is Easy as A-B-C!

No Adjustments

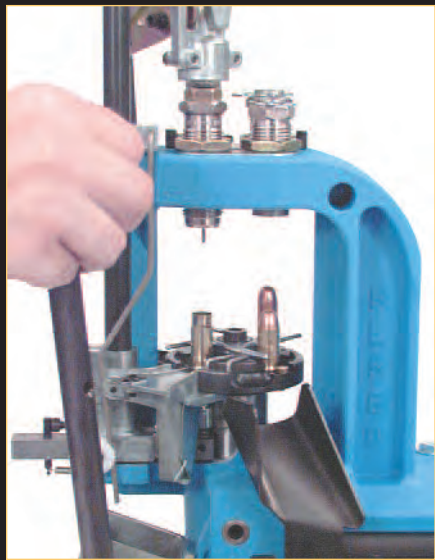

Of all the steps in reloading, the adjustment of the reloading dies is the most critical. With the Dillon RL 550B's removable tool-head, your dies will stay in perfect adjustment. There's no need to screw them in and out – even when changing calibers! The RL 550B functions perfectly with any standard 7/8" x 14 die set. There's less to go wrong, less to remember.

It's Your Choice

You can struggle along with a slow, cumbersome single-station press with all its adjustments, changes and secrets, or make your life easier with a progressive RL 550B. If you're thinking about a competitor's reloader, before you put your money down, consider this: Dillon will let you try the RL 550B for 30 days. If it doesn't live up to our claims (or your expectations), return it. We'll refund your money, including shipping. Our warranty is simple. If it breaks, we'll fix it FREE for as long as you own it.

Rifle and Pistol

The Dillon RL 550B will produce match-quality ammo for over 160 different rifle and pistol calibers. Priced at \$439.95, the RL 550B comes complete with one caliber conversion (pictured below, reloading dies sold separately).

Dillon's SL 900

Shotshell Loader

Comp-Tac's Trojan Horse Long Gun Case 39

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Standard Trojan Horse Long Gun Case **L06-19388 \$75.00**
 Heavy Rated Trojan Horse Gun Case **L06-16229 100.00**

ADCO SUPER

ATHUMB® offers models for popular centerfire pistols and 10/22 style magazines.

ST1 is for 9mm and .40 caliber Beretta, Browning, Ruger, SIGARMS, S&W, etc. In addition, the ST1 has interior rails and grooves to accommodate Colt Government magazines.

ST2 is for GLOCK and Para-Ordinance magazines.

ST3 handles virtually all centerfire, single-column magazines.

ST22 is for Ruger 10/22 rifles.

STJR is for Ruger, Browning, Colt and High Standard .22 pistols.

**Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.*

AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

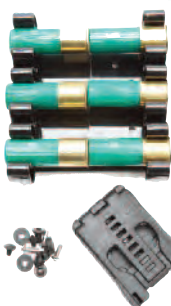

AP Custom USA's Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

TACCOM, LLC Tactical and Competition Accessories

TACCOM, LLC's Dualload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip (included)** that can be attached at various angles. The Dualload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.
2Up Belt/MOLLE **L06-19530 \$9.95**
4Up w/Tek-Lok™ **L06-19531 29.95**
6Up w/Tek-Lok™ **L06-19532 34.95**

TACCOM, LLC's Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shells come out of the holder and not have to worry about rim overlay...the rims are already overlapped in the correct position!
4Up Quaload Shotshell Holder **L06-19543 \$39.95**
8Up Quaload Shotshell Holder **L06-19544 69.95**

CLASSIC FIREARMS: The U.S.

By John Marshall

Invented by prolific arms designer John Browning too late to see anything but token employment in World War I, the famous “BAR” became a mainstay during WWII and the Korean War. In truth, deployed as a squad base of fire, it was a full-power machine gun that could be carried and deployed by a single infantryman. It was used with devastating effectiveness, and there was little like it in the arsenals of the world in the mid-20th Century. It was heavy compared to a standard rifle, but it had great range and killing ability. The standard joke in the “brown shoe” army was that they always gave the big Browning Automatic Rifle to the littlest guy in the squad. Nonetheless, the burden of humping these “heavy hitters” into battle yielded a tremendous advantage to our soldiers. The Army’s WWII table of organization and equipment (T. O. & E.) called for one in every nine-man infantry squad. It wasn’t until 1957 that it was officially superseded by the M14 rifle.

John Browning, in response to the lack of reliable automatic weapons in France, devoted his efforts to developing a suitable automatic rifle chambered for the standard .30-06 cartridge in 1917. The resulting arm was demonstrated, impressed the authorities, and was quickly placed into production in 1918. This first Model 1918 was made during World War I by Colt, Winchester and Marlin Rockwell. Browning’s son Lt. Val Browning demonstrated the weapon in France during the war. The BAR was originally set up to be fired from the hip in “walking fire,” supported by an over-the-shoulder sling. Unfortunately, few of these weapons made it to France before the armistice ended the Great War on November 11, 1918, in spite of about 85,000 having been manufactured.

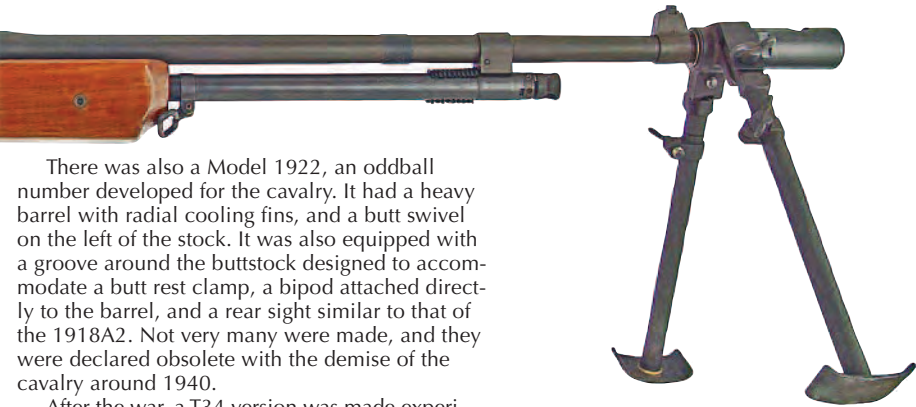

There were a number of models made over the years. The first, the Model 1918, weighed 16 pounds and was the lightest, since it did not employ a bipod. It was selective fire – full auto and semiautomatic. A tube-type flash suppressor was attached to the muzzle of the 24-inch barrel. The buttplate closely resembled that of the M1917 “Enfield” rifle used in large numbers during WWI. There was no flip-up support plate attached to the butt. Since the M1918 and the Enfield used the same full-power .30-06 cartridge, the rear sight

closely resembles and was calibrated similarly to that on the Enfield. This model entered U.S. service and was standard for 19 years.

In 1937, a couple of modifications were made to the original model, resulting in the M1918A1. Dispensing with the concept of “walking fire,” this one had a flip-up shoulder support, and a spike-footed bipod, which was attached to the gas cylinder directly in front of the checkered wooden forearm. These things made the arm more comfortable and accurate when used in the prone position, now its primary deployment mode.

The Model 1918A2 was put into service just before the U.S. entered World War II. A new bipod with skid-type feet was moved forward and fitted to the tubular flash hider. There were adjustments possible on each leg for height. The forearm was reduced in height and shortened. A removable stock rest could be fitted to a hole in the wooden buttstock. The shoulder rest was made shorter. A metal shield was placed in the forearm as a protection against excessive heat damaging the recoil spring and guide. Magazine guidance guards were attached to both sides of the front of the trigger guard. These also aided in keeping the 20-round magazine more stable. The rear sight now more closely resembled that of the M1919A4 machine gun. This sight was adjustable for both elevation and windage. While the M1918A2 was full-automatic only, single shots could be fired by tapping the trigger momentarily when the selector was set on the slow rate of fire. During WWII, this version went through some progressive modifications. A short forearm was provided with grasping grooves, the stock rest was ditched, and a plastic buttstock was utilized, giving the BAR the honor of having the first plastic furniture on a U.S. combat longarm. Late in the war, a wooden carrying handle was added, but this didn’t see much service. A prong-type flash suppressor came into use during the Korean War, as did a gas cylinder regulator that could easily be adjusted by hand instead of with a combination tool. The primary manufacturers of the BAR during WWII were IBM and New England Small Arms Corporation. They produced a total of about 208,000 during the war. In the early 1950s, Royal McBee Typewriter Corporation made about 61,000 BARs. The rifle illustrated is one of these.

5. Browning Automatic Rifle

There was also a Model 1922, an oddball number developed for the cavalry. It had a heavy barrel with radial cooling fins, and a butt swivel on the left of the stock. It was also equipped with a groove around the buttstock designed to accommodate a butt rest clamp, a bipod attached directly to the barrel, and a rear sight similar to that of the 1918A2. Not very many were made, and they were declared obsolete with the demise of the cavalry around 1940.

After the war, a T34 version was made experimentally to chamber the 7.62mm NATO cartridge, making it the very last of the U.S. military BAR line.

Colt's Patent Firearms Manufacturing Company made modified versions for sales to police and foreign entities. One was the Colt Monitor (a short-barreled type), and another was the R75A, which had a quick-change barrel. Among a number of foreign manufacturers, Fabrique Nationale in Belgium notably produced several different versions.

The gas-operated BAR fires from the open-bolt position for cooling efficiency and to guard against cartridge "cook-offs" from a hot barrel. It's readied for firing by turning the selector lever on the left side to "S" for safety, and pulling the left-side operating handle all the way back. This retracts and catches the bolt in the rearward position. The handle is then slid forward, where it will then not reciprocate on firing. Insert the loaded magazine and slap it home. For the M1918 and A1 models, the selector lever is set to "A" for full automatic, or "F" for semiautomatic fire. On the Model 1918A2s, there are two rates of fire. Moving the selector lever to "F" will give slow automatic fire (300-450 rounds per minute), and "A" will give a faster cyclic rate (550-600 rpm). As mentioned, tapping the trigger in the "F" mode will fire single shots. When fired, the massive bolt jumps forward with considerable spring-powered energy, chambering rounds and continuing to fire as long as the trigger is held down and there is ammo in the magazine. The "hump" on the receiver contains the locking surfaces for the bolt lock when the bolt is in the forward position. The internal mechanics are complex, but worked out carefully by Browning to give very reliable operation. Field stripping is also complex, not intuitive, and difficult to do right until learned and practiced often.

The BAR was made with a massive solid steel receiver, and most of its many parts were also made of steel. These components made for a heavy firearm, made to last a lifetime of use. In quick-moving combat, BAR men who had to lug them

would often discard the bipod (and the carrying handle, if present) to save weight and give better mobility. Fully up, the BAR weighed about 21 pounds; these measures brought it back down by about four pounds.

I have had personal experience firing the 1918A2 model when I was in Army JROTC in the mid-50s. On first encounter, when dry-firing it, one is surprised by the clack and shock of the bolt slamming forward with such force. Upon actual firing, the recoil is nicely absorbed by the weight of the gun and the gas operation. In the slow-fire mode, it's actually pretty easy to tap off single shots. In combat, this would be an advantage so as to not alert your enemy to the fact that you have a full-automatic arm until it's really needed for mass fire. Two or more BARs with interlocking fields of fire can provide very deadly cover when required to support infantry maneuvering. It's no wonder that the BAR was mourned when it became obsolete. A number of attempts were made to permit the M14 rifle to serve in the supporting fire role, but none were very satisfactory due to its lighter weight. John Browning made the BAR robust and heavy for a reason – it had to withstand the substantial recoil of a full-power battle cartridge and stay on target in full automatic fire. And this it did. Changing the 20-round magazines frequently was a bit of a pain, but as long as this was done with dexterity and the ammo held out, the old BAR was the infantryman's friend.

Full-auto BARs are of course controlled and taxed under the National Firearms Act of 1934, and no more can be sold than are currently on the market. Semiautomatic-only versions have been made for collectors, and these are quite expensive as well as being in high demand. The Browning Automatic Rifle is iconic and was seen in nearly every World War II battle in which the U.S. was engaged. It soldiered on in Korea and even in the early stages of the Vietnam War. It's a true classic as a milestone in U.S. military armament.

46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

L06-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

L06-21894

\$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

L06-19972

Concealed Carry Tote⁴⁷

\$45⁰⁰

L06-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

Maria Gushchina:

Russia's Queen of the Production Gun

By Robin Taylor, www.taylorfreelance.com;
 Large Photo by Paul Hyland, www.liveshots.net,
 Small Photo courtesy of Julie Golob

In many ways, Maria Gushchina doesn't "fit." She's a soft-hearted, soft-spoken teenager coming from a country known for oppressive gun control. Yet the 19-year-old Russian's skills with a 9mm have made her a giant in the IPSC world.

IPSC shooting (and the American version, USPSA) combines speed, power, accuracy and movement into a freewheeling shooting sport. Its top athletes have amazing skills and a high level of physicality. Maria is running ahead of the best.

Americans recently got a first-hand look at Russia's Queen of the Production Gun when she came to Frostproof, Florida for the IPSC World shoot last year. Gushchina put such a lead on the field of women that victory by the Russian team became a virtual certainty. Make no mistake, the entire Russian squad is excellent, but with Gushchina putting a ONE-HUNDRED point lead on America's lead shooter Julie Golob (pro shooter for S&W), the outcome was easy to predict.

"She's the single best female practical shooter out there in the world right now," says Golob — who holds more than 50 national and world titles of her own. "She's the only woman to win a Level IV outright. (Beating all comers — male or female — at the Australasian championship.)"

Julie has competed against Maria several times, including during a visit to Russia for the Moscow Open in 2011. Golob brought me right to the point.

"We're talking a whole different level. *Three years ago* at age 16, she shot over 80-percent of (World Champion) Bob Vogel's score at the World Shoot. What woman has done that? This is what people don't realize, she's THAT good."

The Americans put two of their three team members into the top three that year, Golob and Sara Dunivin – and still lost to Maria and the Russians. Golob and Dunivin placed third and fourth last year, and again, lost to the Russians.

"How do you put two out of three people into the top three and NOT with the team title?" says Golob. "They took gold because of Maria."

A fan of the CZ 75 platform, Gushchina won that first world title with a top-of-the-line Grand Power (the X-Calibur), before switching over to the famous Tanfoglio "Stock II" in 9mm.

IPSC's restrictive rules all but forbid making changes to your pistol, so firms vie to create the best "package racegun" in an effort to win titles. The CZ "Shadow" package gun has a big following in the United States, but the Tanfoglio "Stock" line has made rapid inroads. Virtually all the medalists on the Production platform at the past two World Shoots shot Tanfoglio "Stock II" pistols – Bob Vogel and Julie Golob being the obvious exceptions.

Sweetheart Off The Line

Everyone we spoke to about Maria commented on her kind-hearted personality.

"As a person she's a very kind young woman," says European pro Gregory Midgely (his girlfriend and Maria are close friends), "But when she's shooting she's a total pro. Focused 100 percent."

Golob said much the same thing. "She doesn't have the tiger spirit that you'd expect she would have. She laughs, she giggles, she's very much a teenage girl in a lot of ways, but when the buzzer goes, it all changes."

At the pinnacle of the shooting sports, the competitive environment can turn hostile. Charles Barkley didn't invent the concept of "psyching out" your opponent; he just took it up a few notches. In the USPSA/IPSC world, Todd Jarrett and Blake Miguez' on- and off-screen disagreements were famous, and the ladies (while generally much more supportive) aren't immune.

"This year we expected to have a lot of tension with the Russians and other top teams, but it wasn't there," says Golob. "That's thanks to Maria's leadership. The ladies as a group all stood up for each other."

If one wanted to "game" somebody into a competitive disadvantage, IPSC offers plenty of opportunities. In US events, a competitor can walk the stages before the match and has AT LEAST five minutes to wander around each course to develop a game plan, plus chances to come back and double-check. IPSC poses a great challenge with a fixed three-minute group walk-through. In some cases, that's the only time you can truly inspect the course prior to coming to the line.

If your team is sharp-elbowed during this critical time, you can disrupt your opponents' planning or break their focus. It's poor sportsmanship, to say the least, but it happens.

Golob credits Maria with establishing a more supportive environment. "It hasn't always been that way," she says.

Power On The Line

IPSC shooters have "styles" determined in part by the gear they use. The rules for "Open" and "Limited/Standard" forgive less-than-perfect accuracy, so the people that shoot there develop a style that puts the emphasis on speed. They run (literally, *run*) just inside their ability to keep the gun on target and in control. "Production" stylists, on the other hand, face severe scoring penalties for inaccurate hits, so they're much more careful and poised. This applies twice over to female shooters, who tend to be less muscular in the way they move.

Watching Maria shoot, that "careful" stylistic cue is missing. Instead, she drives the gun at maximum speed, and rips to and fro like a skilled male athlete driving a Limited gun – yet she scores nearly 100-percent "A" hits. I checked with Midgely to see if he was seeing the same thing.

"It's true!" he says. "Maria is outstanding in her performance."

Midgely related a story about a mutual friend watching Maria for the first time. He was gobs-macked by Maria's speed, exclaiming, "What was THAT?"

Midgely explained Maria was the reigning World Champion, and our friend blurted out (to Maria) "She moves and shoots like a man!"

Maria blushed.

Golob views it a bit differently. "Maria shoots with power, there's no doubt about it. But there's also a grace about her, like a Russian ballerina. She has a style all her own."

Now a two-time World Champion at just 19, we're certain to see more of Maria in coming years. She's one of few about whom women like Golob are willing to say, "She's so good, it's hard to catch up."

Maria Gushchina (right) and Julie Golob with their trophies at last year's IPSC World Shoot in Frostproof, Florida.

50 "Big Fifty Reloader"

STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	L06-14067	\$1.35

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Armorer's Block **L06-19536 \$29.95**

Sun Devil Mfg. AR-15/10 ADIGS

Sun Devil Manufacturing's Adjustable Drop In Gas System for AR-15 and AR-10 rifles allows you to adjust your rifle's gas system for best performance.

L06-19674 \$59.95

EGW AR-15 Forward Assist Plug

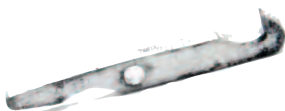

Evolution Gun Works' AR-15 Forward Assist Plug is for use on competition rifles that do not use the forward assist. It's anodized for long life, matted to match most uppers.

L06-18991 \$9.99

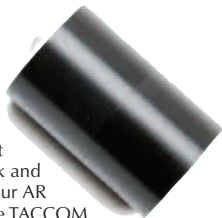

TACCOM's Enhanced Firing Pin for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

L06-19538 \$13.95

The TACCOM Extreme Extractor is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

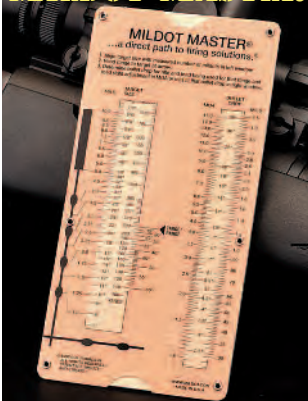

L06-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The TACCOM Pressure Plug will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

L06-19533 \$7.95

MILDOT MASTER

You can become a master at using a Mil Dot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

GLOCK TRIGGERS Custom Tr

By Duane Thomas

Glock Triggers offers numerous aftermarket trigger systems for Glocks. In this article we will review The Edge, which is actually a combination of two different systems, one a method of reducing initial takeup to the trigger stroke (spec'd out by combat Marine/firearms instructor Travis Haley) and another to limit overtravel (designed by police officer/USPSA Grand Master/IDPA Master/champion shooter Bob Vogel). Both these systems are available by themselves, but in The Edge we have them both together. I have had one of these kits in my carry Glock 17 for a couple of months now. Short form: I like it. A lot.

All Glock Triggers kits are built up on Glock OEM parts. Without giving away any proprietary information, let me just say that when you examine how the reductions in takeup and overtravel (especially the former) were achieved with The Edge, you will be reminded of the old saying, "Genius is the ability to make the complicated simple." In both instances, what we have here is the least complicated, most straightforward way to accomplish the job that needed doing. There are trigger kits out there for Glocks that are more complicated than The Edge, more challenging, more failure prone...but really nothing that works any better.

Let's talk a bit more about that "all OEM parts" thing. Glock Triggers kits retain the functionality of all the stock safety components. Specifically they retain the functionality of the "second trigger" lever. There seem to be a lot of people out there who don't understand the purpose of this part – and some of them have apparently designed aftermarket Glock trigger kits – so let me clear this up for you. No, it's not there "in case something gets hung up on the trigger as you're holstering so if you've got a good holster it doesn't matter." The reason Glock incorporated the second trigger lever into their design is that it functions as a sort of reverse drop safety. When testing their design in the prototype stage, Glock found that, if it was dropped from a sufficient height and

landed on the rear of the slide, muzzle up, the trigger bar would, through inertia alone, move far enough to the rear to fire the gun. The second trigger lever, which must be depressed by the index finger before the trigger can move to the rear, prevents that from happening. Let's just say I was very happy to see that second trigger lever, missing on certain other aftermarket Glock trigger kits, still present and functional on The Edge.

So, does The Edge make a difference in my shooting? Yes, it does. For instance, one of the drills I practice on a regular basis is to begin with the gun extended in the Low Ready position and aimed in at the target's "pelvis" and, on the timer's buzzer, bring the gun up and fire one center chest hit, measuring my time to get in that first, accurate, aimed shot. For years my times hovered in the mid- to high .5 second range. Occasionally I'd dip down in the .4s but that didn't happen too often. The very first time I ran this drill with The Edge, I pulled a .48, and in practice since I'm generally in the mid to low .4s, occasionally down into the high .3s. Rarely do I get up into even the low .5s. More importantly, even at the faster speeds, my shots are much better centered.

To apply rifle terms to a handgun, we are in essence here turning the Glock trigger from a two-stage system to a single-stage system. It makes a difference. On something like the Ready Position drill, there is simply less you need to do before firing the shot. Fewer things to be done equals less time required to do them, and more control when the shot breaks.

The time differences from the overtravel stop are less dramatic. Actually, there are no time differences, my fastest I-can-go splits (shot-to-shot speeds) still go in the high 'teens to very low .2s.

(If there was a way to buy faster reflexes, I would.) What HAS changed is that at that speed I'm much more accurate.

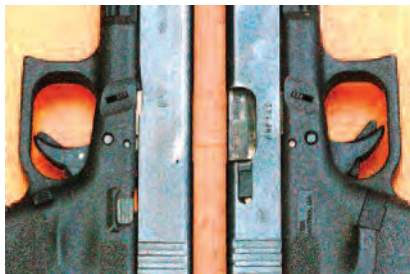

The overtravel stop system, by the way, also comes equipped with three aftermarket firing pin springs, marked 5.0, 4.5 and 4.0 pounds. According

All Glock Triggers units are built on Glock OEM parts, and retain a functional "second trigger lever" drop safety.

This image of an Edge-equipped Glock laid over a Glock with the stock trigger system in place shows just how much takeup distance The Edge gets rid of.

This much difference in the visible trigger position, between The Edge (left) and the stock Glock trigger (right) will move your from Stock to Enhanced Service Pistol division in IDPA.

to my NRA weight set, in my Glocks the resultant trigger pull weights with each spring are actually much lighter than stated. Since I prize the ignition reliability of the stock, full-power firing pin spring, which smacks primers harder, that's what I continue to run. Using the stock firing pin spring with The Edge, my trigger pulls go four and a quarter pounds. If you can always ensure you'll be putting nothing but soft Federal primers into your gun, on the other hand, feel free to experiment with the lighter springs. For a carry/competition gun, I'll stick with the heavy stock unit.

For the competition shooters out there, be aware that while The Edge is legal in USPSA Production division, in IDPA it will move you from Stock Service Pistol into Enhanced Service Pistol since the fact the trigger sits, at rest, further to the rear than the stock system is considered an externally visible modification, which is *verboden* in SSP.

I have been doing my own trigger work on Glocks for years. Part of that entails polishing every relevant contact surface. In Glock Triggers units, they go a step further, they polish EVERYTHING, not just the areas that actually matter. While that's quite attractive, and may give some users a little extra pride of ownership, from a functional standpoint it's just, well...pretty.

No, The Edge, for all its reduction of takeup and overtravel, will not turn your Glock into a 1911.

What it did for me was to turn it into a gun much more manageable than with even a nicely massaged but otherwise stock unit – like I'd been running for years.

I will finish this article with a caveat. I regularly practice with a friend of mine who, though he has never shot the IDPA classifier "for real," when we've done it in practice with me has scored Sharpshooter. In other words, he's not setting the world on fire but he's better than most people ever get. And he is a Glock shooter. His response to The Edge, compared to his own home-brewed trigger job (not nearly as nice as mine, he said with becoming modesty) was, "I don't feel any difference." Now, I can feel a BIG difference. I also happen to be an IDPA Stock Service Pistol Master with a Glock 9mm. For shooters at the lower skill levels, I don't want to promise you something you won't get. Not only will The Edge not magically make you a better shooter – you can't buy competence – it's quite possible you might not even be able to notice a difference. At the higher skill levels, by contrast, it offers a very noticeable, and a very usable, advantage.

THE SWAB THAT DOES THE JOB

Gun-tips™ Foam Swabs Reviewed by Peter Caroline

Nooks and crannies are wonderful things...on English muffins. On guns, not so much. The nooks and crannies encountered on firearms are repositories for gunk and crud and nasty stuff that turns a functioning gun into a paperweight, inevitably when you most need it to work.

In the June 2014 issue of *The Blue Press*, I wrote about Bore-tips® by Swabits®, an economical, washable and re-usable replacement for traditional bore-cleaning patches and jags. On those occasions when I absolutely must get off my indolent posterior and clean my guns, Bore-tips make the task go a lot easier and quicker, and there are no grimy patches to dispose of. Once the bore is clean, then comes the fun of cleaning the above-mentioned nooks and crannies. For years, I used cotton swabs...lots of them. And they didn't really do the greatest job; usually they managed to

replace gunk and crud with lint, which then had to be swept out with a toothbrush or brass brush. I've also used automotive starting fluid, basically ether, which is pretty nasty stuff, and you don't

want to use it indoors. It also leaves a dry residue, which has to be blown or brushed out.

Gun-tips® are a whole different ballgame. Unlike cotton swabs, they are reusable, and they come in a half-dozen different sizes, shapes and lengths, so you always have the right configuration for cleaning and lubricating every crevice or hard-to-reach area. All you do is soak a Gun-tip in gun-cleaning solvent or lubricant and you're good to go.

To reuse Gun-tips, simply dip them in mineral spirits and let them dry, or you can use a grease-cutting soap like Dawn dish-washing detergent, rinse and let dry.

Like Bore-tips, Gun-tips are available from Dillon (*See Page 65*). Who said you can't get good help nowadays?

64 *Get your "stuff" together, then keep it that way!*

"Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, 106-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

-----------------	------------------	---------------

Snake Oil is a derivative of an FDA certified medical lubricant used in high-speed medical drills.

- Provides a film that separates and protects moving parts, for smoother operation and increased efficiency.
- Contains no evaporants and has a film affinity in excess of two years.
- Reduces the collection of dirt, dust and other contaminants.
- Performance in extreme conditions is unparalleled.

Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps. L06-18599 \$14.95

drymate™

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ L06-11313 \$19.95

Bore-tips® Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (thinking fast), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless **L06-18600** \$49.99
Blued **L06-18601** \$49.99

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

Four-Magazine Storage Sleeve **L06-19226** \$14.95
Six-Magazine Storage Sleeve **L06-19227** 17.95
Magazine Sleeve I.D. Tag/Hanger **L06-19476** 1.95

Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight **L06-18210** \$53.95

Secure Firearms Products' Universal Spring Tester will help you determine if the recoil spring in your pistol needs replacing, and you'll save time and money by testing and organizing loose recoil springs in your shooting bag.

Recoil Spring Tester **L06-15305** \$39.95

MAGPUL 1911 Grip Panels feature reinforced polymer construction and a unique diamond-shaped cross section to prevent twisting in the hand. They also have an aggressive mag-release cut out and are compatible with ambidextrous safeties.

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

| D. Rear Bag | L06-10882 | 26.95 |

*Sand not included.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

L06-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

L06-15384 \$29.95

TARAN TACTICAL INNOVATIONS

The **TTI Magazine Extension** for MagPul AR-15 5.56 PMAGs is constructed of machined aluminum.

L06-15770 \$39.99

The **TTI Benelli Extended AccuGuide Carrier** is the first extended carrier ever manufactured from one solid piece of SAE 304 Stainless Steel, which eliminates the need for welding. It is heat-treated and polished, providing optimal performance. The Carrier features an extended guided rail on each side to assist in centering the round while reloading. It will provide you the speed and comfort of not having your thumb torn up after reloading. Compatible with: Benelli M1/M2/M3/SBE, Versamax.

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot. TRS-25 **L06-11643** **\$89.95**

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **L06-25374** **\$79.99**
Scout Scope Mount for SKS Rifle **L06-25373** **78.99**

SPENCER CARBINES IN THE

Grandpa Dillon's Spencer Carbine, a Model 1865 Burnside contract, .56-50 rimfire, made only days after Appomattox. Hammer cocked, action open, and loading tube

By Brian Dervin Dillon, Ph.D.

The American Civil War was fought mostly with muzzle-loading rifles. Towards its end a growing number of breech-loading, metallic cartridge firing guns also came into use, almost exclusively by Union soldiers and sailors. Most were experimental and produced in very small numbers. The most successful Northern metallic cartridge gun was a reliable rimfire repeater, and very popular with the troops fortunate enough to have it: the Spencer Carbine.

All American gun aficionados know the myth; after the head of U.S. Army purchasing declined to order the Spencer repeater because the troops would "just shoot up expensive ammunition much faster" than with muzzleloaders, Christopher Spencer, the new gun's inventor, went out of channels, took one to Washington and presented it to President Lincoln. Honest Abe shot the Spencer, declared it just what his beleaguered bluecoats needed, and overruled his mentally deficient head of ordnance. A wonderful story, but untrue. The first Spencer repeaters had been ordered by the U.S. Navy two years earlier, and Spencer's August 1863 meeting with the President was to explain why his first shipment to the army was six months late, and why earlier test guns sent to Lincoln wouldn't fire. Nevertheless, at this meeting Lincoln did indeed shoot a Spencer at a wooden board target, hitting it six out of seven times. Yet another persistent myth is that Spencer carbines, in the hands of Buford's Union Cavalry, turned the tide against Rebel infantry on the first, crucial, day of the three-day Gettysburg battle. Again untrue, for Spencer carbines were not issued in any numbers until many months after Gettysburg.

Spencers were chambered for a bewildering variety of rimfire cartridges: .56-56, .56-52, .56-50, and .56-46. The two measurements indicated the diameters of the casing rear and mouth, the second approximating that of the bullet. The earliest, .56-56, was a straightwall cartridge with a 360-grain bullet in front of 45 grains of powder. The .56-46 was a post-Civil War chambering, a bottleneck cartridge stepping the casing down to a .44 caliber bullet. The vast majority of Model 1860 and 1865 carbines were chambered for the .56-50, a tapered round with 45 grains of powder behind a 350-grain, .512 Caliber bullet. In 1866 Spencer introduced the .56-52 with a slight bottleneck, but the same charge and bullet as the .56-50: the two rounds chamber interchangeably. All Spencer rounds were harder hitting than their .44 Henry rimfire contemporary.

Estimates of the number of Spencers produced vary wildly; the totals suggested below are conservative. Certainly, over 12,000 Model 1860 Spencer rifles with 30-inch barrels were delivered to the U.S. Army

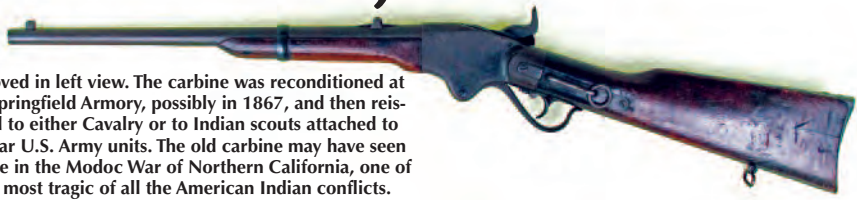

and Navy before production moved on to carbines. The first Model 1860 carbines were delivered in October 1863, and over 45,000 were made during the next two years. And, just over 30,500 second-generation, Model 1865 Spencer carbines were also made under contract by the Burnside Rifle Company. By the summer of 1864 the seven-shot Spencer carbine had become the favorite of the Union Cavalry under its aggressive leader Phil Sheridan. Spencers captured by Rebels were worthless, as they could make no ammunition for them.

The Model 1860 carbines had six-groove rifling and 22-inch barrels, while the Model 1865 carbines had three-groove rifling and shorter, 20-inch barrels. None of these later guns were received until after the Appomattox surrender in early April 1865. Consequently, none were issued during the Civil War itself. An important post-Civil War invention was the Stabler cut off or single-shot conversion lever. These were most often installed at the Springfield Armory on Model 1865 and Model 1860 conversions. The Stabler device, a simple rotating lever in front of the trigger, stopped the action partway through its cycle, after ejecting the casing from the round just fired, allowing the gun to be reloaded as a single shot. Unfired rounds in the tubular magazine could thus be left in reserve for when needed.

Following the Civil War, thousands of Spencer carbines filled U.S. Government armories. They continued to be issued to cavalry units, but the move from rimfire to centerfire, beginning in 1866, meant that few of the repeaters now went to the foot soldiers. Infantry muzzleloaders were instead replaced by the new .50-70 single-shot, full-length rifles. Many northern soldiers bought Spencer carbines at very low prices upon their release from service. Spencers were also sold as far away as Meiji, Japan and France, where numbers of them saw action in the Franco-Prussian War of 1870-71. The Spencer company failed in 1868, and was eventually absorbed by Winchester. While no new Spencers were made afterwards, new ammunition was produced for the old rimfire guns for the next 50 years, in ever-smaller amounts. Surplus .56-50 ammo could still be had from Bannerman's, mail order, as late as 1940, for \$1.50 per hundred rounds.

The Modoc War of 1872-73 was the Spencer carbine's swan song. Five Troops of dismounted U.S. Cavalry, plus infantry and field artillery units fought in the conflict. Some, particularly cavalrymen, carried Spencers, but shortly afterwards they were replaced by the new .45-55 and .45-70 centerfire Springfields. The old repeaters were prized by the Indian Scouts attached to the U.S. Army. The Modoc War unit numbered upwards of 40 Warm Springs Indians, led by

MODOC WAR, 1872-1873

removed in left view. The carbine was reconditioned at the Springfield Armory, possibly in 1867, and then reissued to either Cavalry or to Indian scouts attached to regular U.S. Army units. The old carbine may have seen service in the Modoc War of Northern California, one of the most tragic of all the American Indian conflicts.

their captain Donald McKay. McKay carried a Sharps, his men carried Spencer carbines.

The Dillon family Spencer came from the Gold Dust Saloon, a Sausalito soldier's bar just outside the entrance to Fort Baker, California. Thirty years after the end of the Modoc War, it had been put up on the wall. Grandpa Dillon got it for two dollars when prohibition closed the place in January 1920. It is a Model 1865 Burnside contract carbine, in .56-50 rim-fire, with the original 20-inch, three-groove barrel. A very low, four-digit serial number followed by a very lightly stamped "A" indicates manufacture in early May 1865, and reconditioning at the Springfield Armory, where its Stabler cutoff was installed. An unusual numeral "67," cut into its action, possibly indicates the year of reconditioning. Our Spencer carbine is exactly the kind carried by the Warm Springs scouts and the U.S. Cavalry, dismounted, in the Modoc War. Whether it saw service in this conflict, and how it got to Sausalito, are questions still unanswered at present.

Donald McKay (1836-1899) was the half-Cayuse son and grandson of Astor Fur Company Scots fur traders. McKay's step-mother was Chinook, so he grew up at least trilingual. He later learned several other Indian languages. Before fighting the Modocs he had gone to war against the Bannocks, Shoshone and Paiutes as a U.S. Scout. The Warm Springs Reservation was created in central Oregon in 1855, to receive McKay's neighbors the Wasco and Tenino Indians. The Tenino were a Sahaptin-speaking people who originally lived on the Columbia River. Their linguistic relatives were the Walla Walla, Klikitat, Umatilla, Yakima and Nez Perce. The Wasco, like their kin the Clackamas and Multnomah, were a Chinook people also moved southwards onto the Warm Springs Reservation from their Columbia River homeland.

Northeastern California is the state's "empty quarter," retaining its lowest population density. Much of the country, on the Oregon/California/Nevada border, takes the form of a lunar landscape of old lava flows interspersed with large, shallow lakes. The Indians

called the volcanic wasteland – part of it now Lava Beds National Monument – the "Land of Burnt-Out Fires." When winds blew from the south, locals said, Lower Klamath and Tule Lakes "got up and moved into Oregon," but when they blew from the north, the lakes "went back home to California." The Modoc Indians of California's northeastern most corner got along well with the few White ranchers that had ventured into their territory. Many Modoc men worked as cowboys or timber cutters on these ranches, while some Whites took Modoc wives.

Of all the Indian conflicts of the 19th Century, perhaps California's Modoc War was the most unnecessary and tragic. California Indians, compared to the Apache, Comanche or Sioux of the

Plains and Southwest, were peaceful and inoffensive. Yet any Native American group would fight if pushed too far, and no American Indians fought so effectively with so few warriors as the California Modoc. For half a year 53 Modocs held off U.S. Army forces that outnumbered them 10-to-one. They were never defeated militarily. The Modoc War attracted international attention and many newspapers sent reporters to cover the conflict. Queen Victoria, amongst many others, followed the campaign in the *London Illustrated News*. The Northern California Indian war gave the American military a major

Loa-Kum Ar-Nuk, one of Captain Donald McKay's U.S. Army Warm Springs Indian Scouts with his Model 1865 Spencer Carbine behind a lava rock barricade. This famous "front line" photograph, actually carefully posed by the famous English photographer Eadweard Muybridge, was one of a stereo pair. It was frequently mislabeled "a Modoc Brave on the Warpath" to boost sales.

Courtesy of the Bancroft Library, University of California, Berkeley.

black eye, and caused President Grant to lose his temper in a most terrible way upon its conclusion.

The Modoc War was caused by brain-dead bureaucrats whose stupidity created a conflict where none need ever have occurred. Indeed, after the war's end, General John M. Schofield, commander of the Pacific Military Division, wrote that the "Indians... [were] driven to war by injustice and outrage." For centuries the Modoc had moved back and forth between what, after 1850, became the new state of California and the neighboring Oregon territory. Suddenly, a border meaningless to the Modocs took on great significance to politicians and Indian Agents both out West and in Washington. A bureaucratically idiotic decision was to settle three different Indian

groups, California Modoc, Nevada Paiute and Oregon Klamath, on a single large reservation in Southern Oregon. At the best of times the three tribes observed an uneasy truce, but now two left feet were being forced into a single right shoe already containing a right foot.

Shortly after the Modoc War the very first anthropologist to work in Northern California wrote that the Klamath Reservation was "ruled by imbecility." The new reservation was created largely out of traditional Klamath territory, and the Modoc and Paiute were despised as interlopers by the more numerous Klamaths with prior claim to the land. Most of the Paiutes drifted back to Nevada. Eventually the Modocs, under their Chief *Kientpuash*, better known as Captain Jack, also took the path of least resistance. They jumped the reservation, returned to California, and went back to work for their White friends and employers on the cattle ranches.

But Indian Agents cannot justify their existence without Indians, so the Modocs were forced back to the reservation again at the end of 1869. When *Kientpuash* protested renewed Klamath abuse to the Federal agents, instead of being listened to, he was threatened with jail. So, Captain Jack and his band of Modocs left the Reservation a second time. They were now determined to fight the Whites if ever forced to leave California again. The Army was mobilized at the end of November 1872, sent to round up the errant Modocs and herd them back north. This time shots were fired and both Indians and Whites were killed. Jack and 52 other warriors holed up in the natural fortress of the Lava Beds, besieged for many months. They hid out in ice caves, all but invisible to the U.S. infantry, dismounted cavalry and artillery, periodically emerging to ambush unwary soldiers and officers. The Modocs used whatever firearms they could scrounge up, reloading centerfire ammunition with percussion caps for primers and scrap metal for bullets. Ranges were so close that the Indians sometimes threw rocks to conserve their scarce ammunition. Wounded soldiers, crawling to safety over the lava, abraded all the skin away from their kneecaps, revealing the bone. The Modocs could not be starved out, for they slipped out at night to rustle cattle, driving them back underground as rations "on the hoof." After five months of stalemate, peace talks were held. Jack, goaded by hotheads in his band, murdered the chief U.S. negotiator, General Edward Canby, in the "peace tent" on April 11, 1873. Betrayed by his own followers, Captain Jack finally surrendered on June first.

Ulysses S. Grant is usually given very high marks for his treatment of American Indians. He often cut through red tape to create long-overdue reservations and recognized Indian claims that most other Presidents simply ignored. But Grant had very mixed feelings about California, where his own personal nadir had been reached and his pre-Civil War military career fizzled out 20 years before. Now, outrage over General Canby's murder pushed him over the edge. The man who should have defended the battered and beleaguered California Indians lost his temper. With a vindictiveness deeply regretted later, President Grant let his wishes be known: the Modoc murderers were to face a tribunal as rapidly as possible, then be executed. Captain Jack, Black Jim, Boston Charley and Schonchin John were hanged on October 3,

1873. Two more condemned Modocs were spared in front of their own freshly dug graves. Another horrible part of the tragedy was performed by Army surgeons, who decapitated the four hanged Modocs, and sent their severed heads back east to the Smithsonian Institution in our Nation's Capital. Grant then ordered the Modoc tribe forever banished from California. The remaining Modocs were exiled to Oklahoma, their own trail of tears the reverse of the original one 40 years earlier.

In 1874, with the war over, the defeated Indians were, ironically, honored with the name of the newest California County, *Modoc*, encompassing their ancestral territory. Much earlier, to the north, the Warm Springs Reservation was established on land claimed both by the Tenino and the Northern Paiute; the latter Indians conveniently absent when the Columbia River people were moved in. In 1879, the U.S. Government, having learned absolutely nothing from the Modoc War, fought only six years earlier, moved the Paiutes back onto the Warm Springs Reservation, once again unnecessarily creating a climate of conflict between traditionally hostile groups.

The Modoc War was almost immediately transformed from historical fact to sensationalistic fiction. In 1874 Donald McKay formed a stage show with his Warm Springs Scouts and took it on the road. For two years they aimed their unloaded Spencers at eastern audiences. Then, in 1876, McKay joined Texas Jack Omohundro's Wild West Show, touring Europe with it. His ghostwritten biography appeared in 1887; during his final years he sold snake oil. Meanwhile, false "histories" of the Modoc War were written by those who had never been anywhere near the Lava Beds nor ever seen a live Modoc. These appeared for many years until Jeff Riddle, the son of Winema, Captain Jack's female first cousin, and her husband, a White man entirely sympathetic to the Modocs, had had enough; in 1914 Riddle's *Indian History of the Modoc War* attempted to set the record straight. The best modern book on the Modoc War was published by my father, Richard H. Dillon, in 1973, its centennial. *Burnt Out Fires: California's Modoc Indian War* is still available as a paperback, more than 40 years after its first appearance.

Miraculously, the Modoc War has not yet been ruined by a misbegotten Hollywood epic, although tinseltown has discovered the Spencer carbine. Clint Eastwood fired one (misidentified as a "rifle") in his 1992 blockbuster "Unforgiven." Others appeared more recently in "3:10 to Yuma," a 2007 remake of the 1957 original, and in "Appaloosa," in 2008. Today, the **Spencer Shooting Society** has its own web page, and its members help each other identify dates of manufacture and combat usage. And a raft of modern reproductions, in smaller caliber centerfire chamberings than the original rimfire behemoths, keep the elegant old Spencer design alive.

History still walks around upright in Modoc County, California. Some years back I worked on a ranch where the martyred Indian leader Captain Jack, six score years earlier, before the outbreak of the Modoc War, had worked as a cowboy for the present owner's grandfather. If, over time, history is forgotten, its artifacts sometimes remain intact. Our 1865 Spencer Carbine, a silent reminder of California's Modoc War, still hangs on the wall, as it has for more than a century.

RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	L06-19220	\$34.95
Advanced Trauma Kit (A.T.K.)	L06-19322	69.95
