RUGER® LIGHTWEIGHT, COMPACT HANDGUNS
PERSONAL PROTECTION FOR RESPONSIBLE CITIZENS

RUGER® COMPACT HANDGUNS

Ruger offers lightweight, compact handguns for every personal protection need.

380 AUTO LCP® CUSTOM

Designed with the shooter in mind, the Ruger® LCP® Custom is affordable, comfortable and perfect for licensed carry for personal protection, or as a backup firearm for law enforcement.

9MM LUGER LC9S®

Chambered in 9mm Luger and sized just slightly larger (less than 1" taller and 1" longer) than the LCP®, the LC9S® is compact, powerful and features a short, light, crisp trigger pull for faster shooting and improved accuracy.

380 AUTO LC380®

The LC380® provides 7+1 rounds of effective .380 Auto personal protection. Slim and lightweight for easy concealment, the LC380® combines reduced recoil with modern safety features in an easy-to-rack design.

22 LR, 22 WMR®, 38 SPL +P, 357 MAG, 9MM LUGER

LCR®

Now available in five calibers, there is a lightweight, reliable and easy-to-shoot LCR® for every need – from personal protection to low-cost practice at the range.

Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

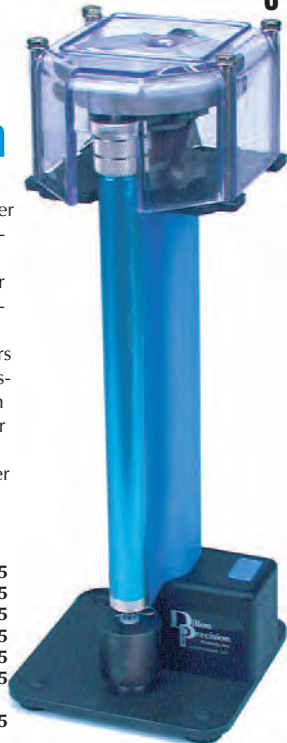

Clear polycarbonate shield and protective housing

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

Product Safety Warning and Recall Notice for IMR® 4007SSC Powder

Shawnee, KS, September 2, 2015 – IMR Legendary Powders is officially announcing a product safety warning and recall notice for **IMR 4007SSC** on the **six lot numbers listed in red below**. IMR has received reports that this particular powder in 1lb. and 8lb. containers may have become unstable due to possible rapid deterioration. Use of this product from these lot numbers shown on the enclosed label may result in spontaneous combustion, fire damage or possible serious injury.

Lot Numbers

10130139
10131139
10429139
10430139
80425139
80426139

What to do:

1. **Stop using this product immediately!** Fill the powder container with water, which will render the product inert and safe for disposal.
2. Mail, e-mail or FAX a copy of the powder label showing the lot number to the contact information below. Include your name, address, phone and e-mail.
3. Replacement choice of any other IMR smokeless powder product will be shipped to you for no charge.
4. If you have loaded the powder subject to this recall into ammunition, we recommend that you **pull the bullets**, remove the powder and wet the powder with water for safe disposal.

IMR deeply regrets any inconvenience this may cause, but we believe in **safety first**. **Contact information:** IMR Powder Company, 6430 Vista Drive, Shawnee, KS 66218; e-mail, help@imrpowder.com; website, imrpowder.com; or you can call 1-800-622-4366 or 913-362-9455 and FAX 913-362-1307.

SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

“WATCH YOUR Gunsite 250 Defensive Pis

If you're going to a class at Gunsite Academy, take lots of magazines!

By Peter Caroline

In August of 2014, I was invited to a writers' sample Defensive Pistol class at the Gunsite Academy in Paulden, AZ. The course was sponsored by Simply Rugged Holsters, Ruger, *et al*, and was, to put it mildly, an epiphany. If Gunsite were a TV reality show, it would be entitled "So you think you can shoot." The 3-day abbreviated class was a humbling, yet highly productive, experience...so much so that I decided that I would lay out my own cash for the full 5-day course a year later.

At 0730 hours on August 10, 2015, I was seated in the classroom at Gunsite with eight other students. Our instructors, Dave Starin and Mike Moore, came in and introduced themselves. They went into a brief history of Gunsite, its philosophy, the Four Basic Safety Rules and the Combat Triad: Mindset, Marksmanship and Gun Handling. We learned about the five elements of The Modern Technique, and much, much more. We also signed a multi-page release, and wrote down our lunch choices for the five days of class.

As students, we were required to have on hand a heavy-duty pistol in a serious caliber (9mm Luger and up), 1,000 rounds of ammunition, 50 rounds of frangible ammunition, heavy belt, holster, magazine carrier, a minimum of six maga-

zines, eye & ear protection, elbow & knee pads, a flashlight with pressure switch (more on that later), range bag and cleaning supplies, etc., etc., requiring us to take all of this baggage to the range in our own vehicles.

Lunch was most gratifying. I had a substantial roast beef sandwich with cheese, lettuce, tomato, onion, etc., accompanied by potato salad, a fruit cup, chips, a brownie, a Hershey's Kiss and a choice of beverages.

And now, a few words of caution: you *must* stay away from the Pro Shop. It is a den of temptation. You will find everything from \$3 Gunsite pins to 4-figure Gunsite-themed custom 1911s, 5.11-brand Gunsite-logo tactical apparel, ammo, holsters, flashlights and every other thing-that-you-can't-live-without. Chapter 11 and domestic altercations loom.

The real fun begins at the square range. There, we were instructed in range safety rules and procedures, marksmanship basics, proper Weaver stance and trigger discipline, tactical reloads, malfunction clearances, speed reloads, ad infinitum. There was, in fact, more information than we could process, but there were many, many drills to implant some level of familiarity. We had to frequently go back to the reloading shed to refill our

FRONT SIGHT!”¹¹ tol Course — August 2015

magazines. Live rounds that were dropped in clearance drills or by misadventure were to be left on the ground... no exception. It is, initially, very difficult to leave a perfectly good, expensive, round lying in the dirt. We got used to it.

I must say something about the quality of instruction. I am a product of the Cretaceous Period, and have never been particularly well coordinated. My instructors were able to quickly size up the situation and help me improve within my limitations. *Mille grazie.*

I've been shooting since I was thirteen. Except for some hunting and benchrest experiences, I have been primarily a target shooter. The Gunsite experience is...different. Note, the name of the course is **Defensive** Pistol. The targets are not your usual bullseye or police silhouette. They have the general head & torso shape of a silhouette, but have a camo pattern in various shades of brown that is deliberately designed to mess with your head. You will be standing anywhere from 3 to 25 yards from the target; the rangemaster will call for "One to the head" or "Two to center mass," and you will have anywhere from 1-1/2 to 3 seconds to draw your pistol from its holster and get off your shot(s) before the target turns at a 90-degree angle

Gunsite's "Square Range."

The Square Range with instructors.

A steel-target shoot off.

to you. You will be constantly admonished to "Watch your front sight, watch your front sight." And until you get into the habit of focusing on that front sight until you are intimately familiar with every scratch or imperfection on the sight, you will find your shots have landed in widely separated and inappropriate places. While you may **feel** humiliated, it's never because of anything the instructor said or did. These people are terrific; there may be a slightly cocked eyebrow or an amused expression, but never the "Drill Instructor Syndrome."

Over the five days of the course, I fired more than 1,100 rounds. We were taught to fire from standing, kneeling and prone positions. We had a number of exercises in which we faced away from the target and, on command, turned, drew our pistols and, optimally, hit the target before it turned away from us. In a couple of exercises, I found myself and an instructor walking in a muddy, rocky wash. Various steel silhouettes... either bad guys or hostages...were concealed along the way. Bad guys were to be promptly dispatched; hostages, not so much. I do like steel silhouettes; they make a satisfying clank when they fall over...if they fall over (it helps to hit them high).

BL 550 Dillon's Basic Loader

\$259⁹⁵

L60-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount L60-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

RL 550 Toolholder with Wrench Set	L60-11541	\$28.95
Cartridge Case Bin/Bracket	L60-11185	\$24.95

RL 550B ACCESSORIES

A. RL 550B CALIBER CONVERSION KITS
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

L60-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **L60-20782, \$76.95 ea.**
 Magnum Rifle Powder Bar **L60-21353, \$29.95 each**
 X-Small Powder Bar **L60-20780, \$29.95 each**

C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **L60-22058, \$103.95**

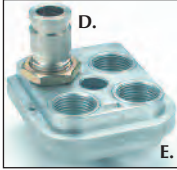

Loading dies sold separately on Pages 34, 35 & 52.

D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

L60-20064, \$11.35 each
Three or more, \$10.25 ea.

X-Large Powder Die, L60-21253, \$19.95 each

E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

L60-13909, \$22.95 each
Three or more, \$20.95 ea.

F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

L60-22055, \$20.95 each
Three or more, \$18.95 ea.

G. 1" BENCH WRENCH

L60-10842, \$7.95 each
Two or more, \$7.10 ea.

H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol L60-14450
 Small Pistol L60-14451

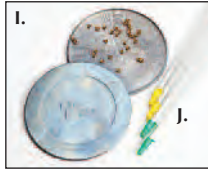

\$264.95 (110v US Model)

Large Pistol L60-14453
 Small Pistol L60-14454

L. MACHINE MAINTENANCE KIT

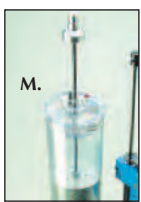

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

Maint. Kit & RL 550B Spare Parts Kit L60-97016, \$32.95

M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

L60-16306, \$41.95

N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550B Cover, **L60-13795, \$23.95**
 (O.) Master lock, **L60-13083, \$3.95**
 Quick-Change Cover (for use with powder measure) **L60-11143, \$14.95**

P. UNIVERSAL MOUNTING HARDWARE KIT

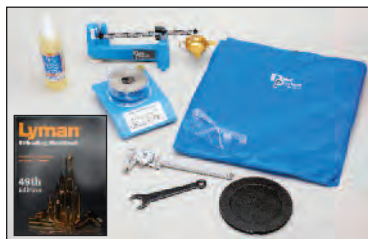

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

L60-14355, \$5.49

Dillon Reloading Accessories

Dillon's Reloading Accessory Package Deals include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

SDB (Balance Beam Scale)	L60-14482	\$182.95
SDB (Electronic Scale)	L60-14483	251.95
RL 550B (Balance Beam Scale)	L60-21143	181.95
RL 550B (Electronic Scale)	L60-22117	250.95
XL 650 (Balance Beam Scale)	L60-21430	197.95
XL 650 (Electronic Scale)	L60-22118	266.95

Dillon's Toolholders are available for your RL 550B, XL 650, SL 900, and Square Deal B, and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

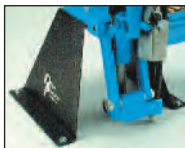

XL 650/SL 900 with Wrench Set	L60-11555	\$29.95
XL 650/SL 900 w/o Wrench Set	L60-11554	18.95
RL 550 with Wrench Set	L60-11541	28.95
RL 550 w/o Wrench Set	L60-11543	17.95
Square Deal B with Wrench Set	L60-19441	26.95
Dipped Ball-End Hex Wrenches	L60-11483	17.95
One-Inch Bench Wrench	L60-10842	7.95
Square-Deal-Only Wrench	L60-19970	8.95

Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	L60-22051	\$48.95
XL650-only	L60-22052	45.95
Square Deal "B"	L60-22223	64.95

Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System
L60-97126 \$142.95

Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	L60-17950	\$45.95
Plastic Roller	L60-22183	40.95

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	L60-22214	\$41.95
RL 1050 Tray Kit	L60-22215	41.95

Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

L60-16306 \$41.95

Quick-Change Cover for use with powder measure. **L60-11143 \$14.95**

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

Dillon's Case Preparation Equipment

CV-2001
L60-20493
\$188.95

CV-750 L60-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator L60-20675 \$75.95

CM-500 Case/Media Separator L60-21045 \$47.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 L60-22047 \$213.95

Euro CV-750 L60-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **L60-13804** **\$8.95**
Case (20 pc.) **L60-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **L60-13733** **\$8.95**
Case (20 pc.) **L60-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **L60-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **L60-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **L60-13496** **\$15.95**

Super 1050/RL1050 Short Trim Die Toolhead

L60-62219
\$224.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the 1050 toolhead stand is not included.)

Dillon's New Rapid Trim 1500 Case Trimmer ²³

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **L60-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **L60-13141**, are **\$19.95** each. Upper lock rings, **L60-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Dillon's NEW Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access,

has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

"Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

UM Tactical Universal Sight Mount and Holster System

UM Tactical has created a universal sight mount that will fit all pistols with a 1913 picatinny rail. Although many sight mounts exist; what makes the unit produced by UM Tactical unique, is that it will mount and dismount from your firearm in under 30 seconds with no tools or gunsmithing. Once set up with your favorite scope or red dot sight, the mount and optic can be taken on and off your firearm and still hold the zero. This high quality mount is constructed from CNC machined aluminum and is finished in Mil-Spec Type III anodizing.

UM Tactical's UMH3 Universal Holster attaches to the UM3 sight mount and not your handgun. This unique design is hand made and is constructed of thermoformed plastic (Boltaron).

BLADE-TECH™

“Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

Dillon's Pistol Die Sets

Size Die

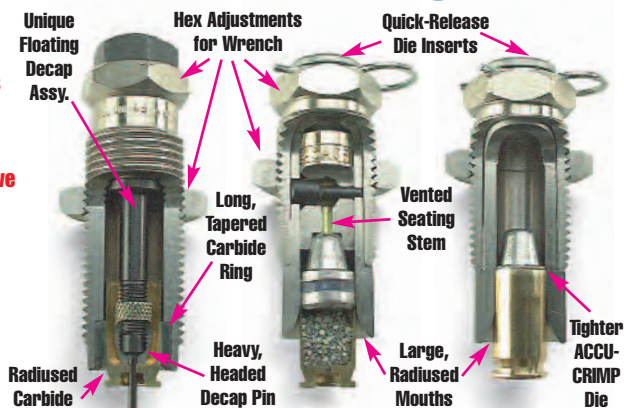

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

KICKS LIKE A

The Original – There were actually several different mare’s legs used over the run of “Wanted Dead Or Alive.” This early publicity shot shows a gun with octagon barrel and “D-lever.” Later mare’s legs featured a round barrel and “rounded triangle” teardrop lever.

By Duane Thomas

I’ve always been fascinated by the mare’s leg, that cut-down Winchester 1892 carried by Steve McQueen’s character Josh Randall in the old Western TV series “Wanted Dead Or Alive.” Basically a lever-action rifle trimmed at barrel, mag tube and buttstock to the dimensions of a large handgun, so compact it could be carried in a belt holster. Really, who wouldn’t want something so ultimately cool?

The amazing thing is that the mare’s leg, that piece of television firearms fiction, is such a basically sweet idea it has stuck in the public consciousness so much so that, 54 years after *WDOL* ended its run (the show originally aired from 1958–1961), it’s actually found a real-world niche. People like using the mare’s leg as an outdoors gun, the theory being it gives them more power, and it’s easier and more pleasant to shoot than a Magnum revolver, but it doesn’t require two hands, or a sling to carry, like a long gun. Instead it can be carried in a holster on the body, thus freeing up both hands.

Today three companies produce mare’s legs: Chiappa, Rossi and Henry. Of the three, we can eliminate the Henry. A great advantage of the lever-action rifle is its loading gate, and that you can keep the action closed on a round in the chamber while stuffing in new ammo. The Henry, however, loads like a .22 rifle: twist the knob on the inside mag tube to unlatch it, withdraw the

This later shot highlights a difference between original mare’s legs and the Chiappa: the originals had crescent buttplates, while the Chiappa features a more conventional, less visually interesting but probably more sensible and comfortable flat buttplate.

tube until the follower clears the loading port in the outer mag tube, elevate the muzzle and drop rounds into the port, then reinsert the inner mag tube and twist the knob to latch it back in place. In other words, it’s useless for reloading in any sort of timely fashion. Both the Chiappa and Rossi, by contrast, feature proper M92 loading gates. I will be examining the Rossi in another article; however, this one focuses on the Chiappa.

The Chiappa follows the original mare’s leg pattern as seen in “Wanted Dead Or Alive” fairly closely. Josh Randall’s gun had a 9” barrel with correspondingly trimmed magazine tube. The Chiappa likewise has a 9” barrel. From muzzle to buttplate it measures 20” long. That’s short enough to be carried in a thigh holster, as Randall did. Mernickle makes several models of thigh holsters for mare’s legs, as well as a backpack holster, which is quite popular among those carrying mare’s legs in the field.

Since these guns have never been rifles, they were assembled right from the get-go with short barrels and stocks as opposed to being modified from previously existent long guns, they’re considered pistols by the ATF, thus skirting the whole 16” barrel/cut-down rifle portion of the law.

When you add up all the cartridges the Chiappa/Rossi/Henry are chambered for, it’s possible to have a mare’s leg in .44 Magnum, .44-40, .45 Colt or .357 Magnum. At first I was leaning toward .44 Magnum, in line with the idea Josh Randall car-

MARE'S LEG

37

Mare's Leg – The Chiappa mare's leg follows the 9" rounded barrel treatment of mare's legs used throughout most of "Wanted Dead Or Alive," however the buttstock and lever are different. Note the bottom of the saddle ring attached to the other side of the gun, visible through the trigger guard.

Loading Gate – A great advantage of the traditional lever action rifle is its loading gate, which allows topping off the gun with the action closed and a live round in the chamber.

ried a mare's leg because it gave him a gun significantly more powerful than revolvers of the time. However, editor Mark Pixler guided me away from that, commenting that .44 Magnum isn't particularly fun to shoot in a full-sized Model 92; out of a mare's leg it would be brutal. Thus my sample Chiappa mare's leg was chambered for .357 Magnum.

While the .357 Magnum mare's leg may theoretically be fired with .38 Specials (just as .44 Magnum M92s can theoretically use .44 Specials), the sad truth is that .357 Magnum chambered M92s are notorious for not feeding shorter .38 Special cartridges. Dry cycling .38s, my mare's leg proved no exception to the rule, thus live-fire testing focused only on .357 Magnum.

Loaded with .357s, magazine capacity of a Chiappa mare's leg is four rounds. With a round in the chamber, it's a 5-shot gun. Just as a point of marginal interest, with .38 Specials mag capacity jumps one round to five, so with .38s it's a 6-shot gun. Too bad it stops working if you do that. By the standards of the late 19th Century, when "six shooters" weren't safe to carry fully loaded, thus the knowledgeable carried with an empty chamber under the hammer, so they were actually "five shooters" and you had to essentially disable the gun every time you reloaded, a 5-shot mare's leg that could be topped off with the action closed

Lever – Rather than a D-lever or teardrop, the Chiappa has a somewhat widened version of the standard flat bottom lever. It's quite comfortable to operate. The author has wrapped his sample mare's leg's lever with leather to bite into the hand and speed cycling.

and a round in the chamber would have actually made a lot of sense in a serious combat weapon.

.357 Magnum is not a cartridge for which I have traditionally stocked very many loads; however, scanning the ol' Thomas ammo locker disclosed two. From Black Hills came their 158-grain .357 Magnum cowboy load, intended to give .38 Special ballistics in .357 Magnum casings, for both light recoil and feed reliability in M92s used in Cowboy Action Shooting. However I was very curious to see how full-power .357 Magnum would perform from a 9" barrel without a revolver's velocity leeching barrel/cylinder gap, so I also tested the Winchester 125-grain JHP.

With Black Hills, the mare's leg proved a very mild-mannered gun. Recoil was soft. The same was not true with full-power .357 Magnum. At that point the mare's leg started living up to its name, as in "kicks like a..." When firing from the bench, recoil gets about twice as heavy because your body is braced behind the gun, it can't give and absorb energy the way it does when shooting freestyle. Benching the mare's leg with .357s, the weapon's stock, and my hand wrapped around it, came back and popped me in the nose and eye. *Boom! Whap! Boom! Whap!* My friend Cameron, who was shooting on the same range, said to me,

The Chiappa mare's leg was tested with two loads, one reduced velocity, one full-power .357 Magnum.

Holster –
Bob Mernickle made this mare's leg thigh holster that is considerably more secure than the skeletonized rig used by Steve McQueen in "Wanted Dead Or Alive." For more info about the holster, visit Mernickle Holsters' website: mernickleholsters.com.

"Every time you fired that thing, I kept expecting you to turn to me with a bloody nose."

I chose to test the mare's leg with the traditional 5-shot groups from a pistol, instead of the 3-shot groups of a rifle. The Black Hills put all five shots into one hole measuring 0.5" center-to-center. Obviously this is an accurate gun. With full-power .357 Magnum, three rounds went into a one hole clover leaf measuring 0.4", with two fliers, one high, one low, opening up overall group size to 2.2". (I'm not saying the recoil level, and getting basically punched in the face every time I pulled the trigger, had anything to do with that, mind you.) From the bench, both loads hit way high, the light load more so than the heavy, however, from standing the gun hit spot-on.

Chronographing revealed the lightly loaded Black Hills averaged 952 fps, basically a .38 Special +P+ power level. Look at ballistic charts about what happens as you begin firing handgun cartridges from ever longer barrels, in short order it becomes obvious that, of them all, .357 Magnum profits the most. I was very, very curious to see what would happen to that Winchester 125-grain JHP out of the mare's leg. Answer: it averaged 1,840 fps. That's pretty darn smokin'. The mare's leg basically turns .357 Magnum out of a 9" barrel into .30 Carbine out of an 18" barrel.

Firing the mare's leg, I bring the short butt up to my face and snug it right under my right cheekbone. When I do that, it's amazing how well and naturally the sights align for me. It struck me that a mare's leg might be capable of being fired with a decent combination of speed with accuracy. But how to test that? Why, I'm glad you asked!

Black Hills – From the bench at 50 feet, the Black Hills 158-grain CNL put five rounds into a one-hole group measuring 0.5".

Winchester – Full-power Winchester 125-grain JHP put three rounds into one hole measuring 0.4", with two fliers opening up overall group size.

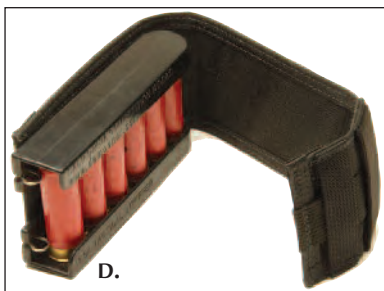

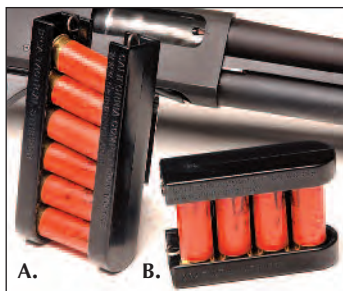

Part of the Firearms Academy of Seattle's Handgun Master test is to draw from the holster and fire six rounds into a USPSA target, all hits must be in the A-zone, time limit is 30 seconds. I have earned the FAS Handgun Master rank four times, with two different Glock 9mms, two different 1911 .45s. So you know I had to try it with the mare's leg, right? Of course, since the gun only carries five rounds to start, and this is a six shot drill, there would have to be a reload in there somewhere, which could make things...interesting. I passed the drill with the Black Hills load, no problem. Of COURSE that meant I had to try it with full-power .357 Magnum. Passed it with .357, as well. I get an inordinate kick out of that. So to speak.

Firing the Winchester 125-grain JHP .357 Magnum loaded mare's leg freestyle, standing up on my own two legs like a man, recoil was not quite as punishing as it was from the bench, though it was still definitely there. With full-power ammo, the .357 Magnum mare's leg is right on the outer edge of what I still consider fun, though I did end the shooting session with a C-shaped red mark in my right cheek that looked amazingly like half a mare's leg buttplate.

However, I do consider this gun immensely fun. So much so I have decided to buy the article sample piece from Chiappa. When you earn your living as a gunwriter, you don't make any money if you're constantly buying your test guns, thus I keep that to a minimum. That being said, the Chiappa .357 Magnum mare's leg is just too good a gun to let go. Not to say it's perfect, however, and a follow-up article to this one will detail the modifications I intend to apply to it to bring out its full potential.

40 12 Gauge Shotshell Tactical Strippers

California Competition Works' Tactical Strippers are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84 attachment device

(C. & D.) that will accommodate up to a 2-1/4" duty belt.
A. Six-Shell Tactical Stripper L60-18606 \$23.95
B. Four-Shell Tactical Stripper L60-18605 22.95
C. Three-Shell Aluminum Stripper* L60-19475 34.95
D. Six-Shell Covered Tactical Stripper L60-19225 33.95
**Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.*

AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

AP Custom USA's Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

TACCOM, LLC Tactical and Competition Accessories

TACCOM, LLC's Dualload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip (included)** that can be attached at various angles. The Dualload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE	L60-19530	\$9.95
4Up w/Tek-Lok™	L60-19531	29.95
6Up w/Tek-Lok™	L60-19532	34.95

TACCOM, LLC's Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holder and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder	L60-19543	\$39.95
8Up Quaload Shotshell Holder	L60-19544	69.95

CLASSIC FIREARMS: The S&W

By John Marshall

Way back in 1967 a number of my co-workers and I enjoyed going out on the desert near Phoenix to target practice with centerfire revolvers. I had a well-used S&W Model 1950 .45 ACP target revolver that I had picked up a number of years earlier because it used then-plentiful military surplus ammo. Some of my friends had Smith & Wesson Model 28 Highway Patrolman revolvers. They were excelling at longer shots (out to and beyond 100 yards). At those longer ranges my old .45 revolver had a trajectory like a thrown Dutch oven, while their .357s got out there with plenty of hustle left over. That lesson was not lost on me – the .357 magnum was a lot of gun. While talking with them and examining their revolvers, I learned that these beauties could be had new for a lot less than the deluxe Model 27. It didn't take long for me to trade in that Model 1950 for a brand new Model 28. Yes, the ammo was more expensive, but I could learn to reload, and I did.

I was not unique in my zeal for this gun. At that time, the Highway Patrolman revolver was often an individual's first .357 revolver. It was, very simply, a more utilitarian and less expensive version of the famed S&W .357 Magnum (which became the Model 27). While that fine revolver had held sway as an ideal robust N-frame in the S&W lineup since 1935, it was always a classy premium firearm. It featured a high-gloss blue or nickel finish, with the frame's top strap, rear sight tang and top rib of the barrel finely checkered to reduce any possibility of light reflecting off of those surfaces while aiming. There were many choices offered on the gun, including types of stocks, front and rear sight options, and target-style triggers and hammers. All of those things cost money.

In the early 1950s, numerous inquiries were made to S&W by various law enforcement agencies regarding a possibly less-expensive version of the .357 Magnum. Hopefully, such a gun would be more affordable by both the agencies and individual officers. One of the most vocal of the groups was the Texas Highway Patrol. Their pleas did not fall on deaf ears. The president of Smith & Wesson at the time was Carl Hellstrom. He took the initiative to huddle with his engineers to see what could be done to satisfy this perceived need. What was called for, he thought, was a gun fully as functional and as smooth-operating as the .357 Magnum, but with a lesser cosmetic finish and fewer options. It would be less expensive to make, and the economies could be passed on to their customers.

S&W had some experience doing alterations of this type when they made the Victory Model .38 special revolvers for our armed forces during World War II. Hellstrom's engineers went to work, and what resulted was a real game-changer.

In January of 1954, prototypes of the new gun were crafted. These guns mimicked the .357 Magnum, but had a brush blue finish rather than the high-polish blue or nickel finish that was standard on the flagship gun. The top surfaces (non-serrated barrel rib, top strap and non-serrated rear sight tang) and the front

and back of the frame received a matte finish. The plain no-insert Baughman front sight and its base were transversely serrated. There were no trigger or hammer options offered. There were to be only two customer choices – either a 6-inch or a 4-inch barrel, and either magna (service) or target stocks. All of these guns would receive a micrometer click-adjustable rear sight with no frills. Samples were sent to a number of agencies for field evaluation. The original test samples were marked simply "Patrolman." By March of that year, the majority of the opinions returned were quite favorable, and plans were made for volume production. On April 15, 1954, the first production guns came off the assembly line, with the initial serial number being S103,500. The gun was first presented in the January, 1955 catalog. The only listed customer options were barrel length and stock style. Either barrel length cost the same (\$85.00), but if target stocks were ordered, the gun cost slightly more (\$89.50). The only finish was brush blue. The name change to "Highway Patrol-

"In the early 1950s, were made to S&W by v agencies regarding a p version of the

Highway Patrolman Revolver

man" was widely reputed to be at the suggestion of Mrs. Florence (Flora) Van Orden of Evaluators Ltd., located near Quantico, Virginia. At any rate, this name was adopted and stamped on the barrel. All of these first-production revolvers were built on the square-butt target N-frame with 5 screws.

The acceptance of the new revolver was quite strong, and S&W produced a total of 8,427 of them by the end of 1954. All had chambers counter-bored for cartridge rims, and pinned barrels. The stocks had checkering with a diamond center pattern.

The guns had shrouded

extractor rods, semi-target hammers, and 6-groove serrated backstraps and forestraps on the grip frame. These were later changed to 10 grooves, front and back. Triggers came from the factory either .265" grooved or .400" smooth, depending on inventory. In 1956, the upper sideplate screw was eliminated in favor of a dovetailed tab.

In 1957, the Highway Patrolman officially became the Model 28. The

numerous inquiries
various law enforcement
possibly less-expensive
.357 Magnum."

model number was stamped in the frame recess for the crane, and the barrels continued to be marked as before. Some very rare variations were made over the years. Twenty-five guns with 5" barrels and nickel finishes were made for the Florida Highway Patrol in 1959. 761 guns with 6" barrels were made as Washington State Patrol commemoratives. Less than 100 were reported to have been made with 8 3/8" barrels. Five specially-crafted guns were reported as being made with a satin nickel finish for Adolph Blaick, Inc., and stamped with the Performance Center trademark in 2000. Some salesman samples and some made for the New York State Police (marked NYSP) have been found with red ramp front sights and white outline rear sights. In 1960, the Model 28-1 (now extremely rare to find because of its very short run) changed the extractor rod from right hand to left hand thread. The following year saw the Model 28-2, in which the cylinder stop was changed, eliminating the trigger guard screw. In 1968, the diamond-center stocks were discontinued. The revolver illustrated is a 28-2, manufactured in September 1980. It's factory-equipped with beautiful target stocks.

The Model 28-3, in 1982, eliminated the counter-bored chambers and the pinned barrel, making it the least desirable version for collectors.

The Model 28 continued to be made until 1986 as a standard catalog item. As semi-auto pistols took over the police market and an increasingly large segment of the civilian market as well, it was finally discontinued. In its day, the Model 28 was wildly popular and never lacked for being the equal of the famed Model 27 functionally. For quite a

while, these guns were plentiful as used items, usually in great condition, as they were tough revolvers. In recent years, however, the prices they command have zoomed as availability decreased and more people realized what great revolvers they are. I still

have the 6" model I bought in 1967, and my father's 4" variation I chose for him in 1968. As a home-defense gun, a field

gun, or as police equipment for agencies still using revolvers, it's pretty close to ideal. Although heavy compared to some .357s, it has great strength and can easily withstand years of shooting with very high-powered loads. Its weight also soaks up recoil and makes it easy to shoot well. If you find one in decent condition, think twice before passing it up. It's become a modern classic.

46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

L60-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

THE SIMPLES

Photograph of the breach and trigger area of an actual prototype of the simplest firearm ever designed by master gun designer, John M. Browning. This plain-stocked rifle with a 32-inch overall length has an 18-inch barrel finished in the white stamped "BROWNING BROS. OGDEN, U.T." Permission granted to reproduce this photograph for this article courtesy of the Buffalo Bill Center of the West, Cody, WY, USA; Gift of Olin Corporation, Winchester Arms Collection.

By Gus Cotey

Pretty much everyone in the United States with even a passing interest in firearms has at least heard of John Moses Browning, if only just his surname. Browning was born in Utah Territory in 1855 and died in 1926. He was the son of a self-taught Mormon gunsmith, and became by far the most prolific gun designer of all time. Browning's numerous and varied designs include everything from falling block single shot rifles, to tiny, small caliber vest pocket pistols, to full-size service pistols (including the famous M1911 .45 ACP), to an assortment of lever, pump, and semiauto rifles, to over/under shotguns, to machineguns ranging from the handheld Browning Automatic Rifle (BAR) up to the awesome and formidable M2 caliber .50 heavy machine gun ("Ma Deuce" and still in use!), and even aircraft-mounted 37mm auto cannons.

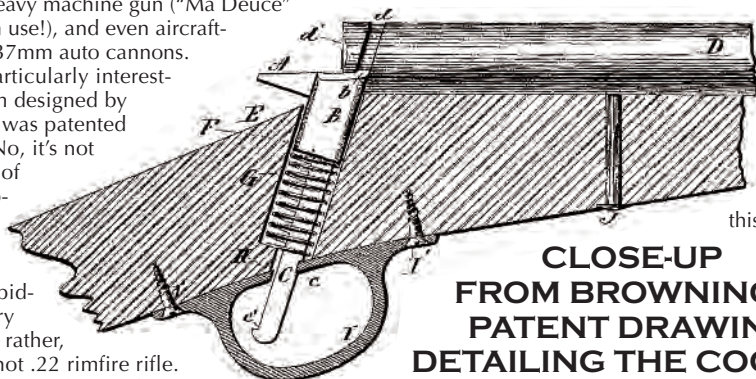

One particularly interesting firearm designed by Browning was patented in 1893. No, it's not some sort of exotic sub-machine gun, machine-gun, or rapid-fire artillery piece, but rather, a single-shot .22 rimfire rifle. True, when one thinks of a single-shot .22, "interesting" the last adjective that comes to mind, but this design is truly interesting in that it is the simplest breach-loading, fixed ammunition-firing gun ever devised. This particular weapon has only one moving part (two, if the mainspring is also counted). This gun design with the patent number 511,677 never went into production, but its patent was nonetheless purchased by the Winchester Repeating Arms Company. A few prototypes of this firearm were built

and are housed for display at the Cody Firearms Museum, in Cody, Wyoming.

The action of this ultra-simple firearm is a variation of the falling-block concept, which is a repeated theme in a variety of Browning-designed firearms starting with his original single shot rifle design patented on October 6, 1879. The vertically moving block concept as favored by John Moses Browning is also found in his lever action repeating rifles, his caliber .30 (.30/06) M1917 water-cooled machinegun, his M1919 air-cooled MG of the same caliber, as well as the big caliber .50 M2 and its variants. In the case of the aforementioned machinegun designs, the bolt is locked in place while in battery by a locking block, which moves upward into a corresponding slot on the underside

of the bolt via an elevated surface of a locking cam.

The breech-block of this most sim-

CLOSE-UP FROM BROWNING'S PATENT DRAWING DETAILING THE COCKED MECHANISM.

ple of J. M. Browning's designs has a spur at its rear which is pressed downward in order to permit manual insertion of the round into the barrel's chamber. The trigger is simply a rod affixed to the bottom of the breechblock. This rod is provided with a notch on the front of it, which locks into a corresponding lip integral with the gun's floorplate portion of the trigger guard. The trigger rod is surrounded by a coil spring, which serves as the igni-

Patent drawings for John M. Browning's simplest firearm design depicting coil-type and leaf-type mainspring variants (US Patent Number 511,677).

tion system's mainspring and is compressed as the breechblock is pressed downward into cocked firing position. Browning also designed a leaf spring-powered variant of this rifle and its action is illustrated in the patent drawing along with the coil spring-powered one.

To fire the rifle, the spur portion of the breechblock is first pressed downward until the weapon is cocked and then a round inserted into the chamber. When the trigger is pressed, it suddenly slips while rubbing against the shooter's trigger finger and the major portion of it disappears as the breechblock to which it is attached is suddenly pushed upward and forward (at a 20-degree angle) by the mainspring. When the breechblock terminates its upward/forward travel and slams into battery, a fixed firing pin projecting from the breech face impacts the case rim, thereby setting off the primer.

This simplest of cartridge-utilizing of small arms is reloaded by once again pushing the breechblock spur completely downward, thereby re-cocking the piece. The spent cartridge case is then pulled out with the shooter's fingers and a

fresh cartridge is inserted into the chamber. The rifle is now ready to fire again.

The Winchester Repeating Arms Co. (WRA) probably never intended to build such an odd but fully functional firearm, but also wanted no one else's company to do likewise. John M. Browning in all likelihood also knew that a big name company like Winchester such a firearm, but designed and built prototypes nonetheless as sort of a genius' joke. It could even be that the old boy simply wanted some spare change in the form of patent purchase fees from WRA.

Regardless of John M. Browning's motivations in designing this gun, the prodigiously ingenious inventor managed to design a curious, but functioning small arm of a landmark level of previously unknown utter simplicity.

I wish to express my thanks to Ms. Ashley Hlebnsky, Curator of the Cody Firearms Museum (Cody, WY) and Mr. Daniel Brumley, Curatorial Assistant, Cody Firearms Museum, for providing me with their valuable time and assistance during my research for this article.

Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

The Gunsite Academy Pro Shop...be careful in there!

Gunsite founder Jeff Cooper's gun room.

Our Defensive Pistol Class (author on far right).

The author's certificate of training for the class.

Another exciting and challenging event was the Fun House. This is an indoor room-clearing exercise where we used frangible ammo to minimize the risk of ricochets. We learned "slicing-the-pie" techniques, maximizing distance between yourself and the threat, and maintaining balance and stability while moving. Shooting every target you encounter is not recommended, as there are hostage targets and even one individual holding a bouquet of flowers.

On Thursday evening, after a supper break, we came back to the square range for a "diminished light" shoot. "Diminished," hell, it was pitch black. We learned to find the target with a small Surefire-type high intensity flashlight with a rear pressure switch. One note of caution: do NOT buy a flashlight with more than one mode...or inevitably, you will be trying to illuminate your target with a distracting strobe. Don't ask me how I know this. Our targets for this event were not the usual camo maze, but an image of a black ninjad-clad individual aiming a handgun at us. I discovered that I actually shoot much better at night than in daylight. My instructor said, "That's because the front sight is all you can see...and that's what you *should* be looking at!"

Throughout five days of shooting, more than 1,100 rounds of .45 ACP, and no cleaning, my Ruger SR1911 Lightweight Commander performed

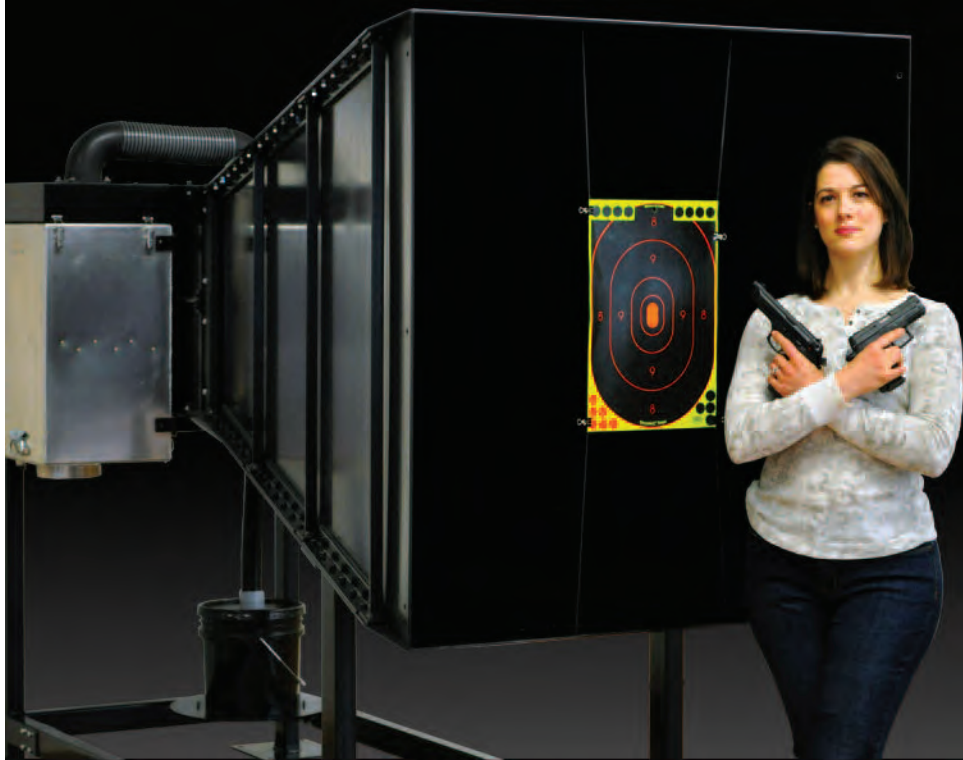

flawlessly. The three misfeeds I had were due to my not slamming the magazine in hard enough. I had brought two back-up 1911s; they never came out of the case. My left-handed Simply Rugged "Shootist" holster worked like a charm, with good retention, a smooth draw and instinctive return. Thanks, Rob Leahy!

On Friday, after graduation and awarding of certificates, we had the opportunity to visit the Sconce, the late Colonel Jeff Cooper's home and veritable fortress. Mrs. Cooper was our gracious hostess, and served sun tea and homemade brownies (excellent brownies!). The view from the back deck was most impressive....one could see for miles and miles. Colonel Cooper's subterranean gunroom was a peerless museum of rare and desirable firearms; just one example...not just a Bren Ten, which is quite rare on its own, but a cased pair of Bren Tens, one custom engraved and gold inlaid.

The next morning, slowly and reluctantly, I got on the highway heading home. The Gunsite Experience is exhausting, exhilarating and infinitely rewarding. And I will do it again.

RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

Extra Loading Data Labels, L60-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Swab-its® - A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!"

The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	L60-15310	\$4.98

20 Gauge (3 ea.)	L60-15326	8.98

Gun-tips® 3" Precision Tip foam swabs are reusable. 24-count value pack. **L60-15345 \$9.99**

Gun-tips®

Gun-tips® Extended Reach Firearm Cleaning swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

L60-12583 \$9.99

Bore-Whips™

Bore-Whips™ .17 and .22 caliber (pictured) by Swab-its® are ideal for air rifles, rimfires or any other .17 or .22 caliber firearm that's difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator.

-------	------------------	----------------

Sweet's Australian 7.62 Solvent

easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

L60-13128	\$12.95
------------------	----------------

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	L60-15571	\$7.95
Slide-Glide Lite	L60-15572	7.95

Micron UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight **L60-18210** \$53.95

Secure Firearms Products' Universal Spring Tester will help you determine if the recoil spring in your pistol needs replacing, and you'll save time and money by testing and organizing loose recoil springs in your shooting bag.

Recoil Spring Tester **L60-15305** \$39.95

MAGPUL 1911 Grip Panels feature reinforced polymer construction and a unique diamond-shaped cross section to prevent twisting in the hand. They also have an aggressive mag-release cut out and are compatible with ambidextrous safeties.

TACCOM, LLC .22 Rimfire AR Components

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

L60-19538 \$13.95

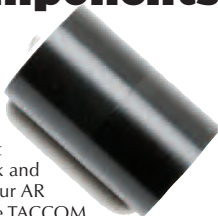

The TACCOM **Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

L60-19539 \$10.95

Does your .22 Long Rifle insert

move back and forth in your AR upper? The TACCOM **Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

L60-19533 \$7.95

M-16/AR-15 BUTTSTOCK CLEANING KIT

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.
TRS-25 **L60-11643** **\$89.95**

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **L60-25374** **\$79.99**
Scout Scope Mount for SKS Rifle **L60-25373** **78.99**

GRANDPA DILLON

By Brian Dervin Dillon, Ph.D.

A popular action movie of 1963 was “55 Days at Peking.” This epic starred Charlton Heston as a screen version of Captain John T. “Handsome Jack” Meyers, a heroic U.S. Marine officer. David Niven was cast as an urbane British diplomat, and Ava Gardner as a glamorous – completely fictional – Russian countess. Filmed in Spain, not Asia, in typical Hollywood fashion non-Chinese played all of the lead Chinese roles. This movie’s garbled historic message forms the basis for what most Americans know, or think they know, about the Boxer Rebellion of 1900. Heston portrayed a cowboy adrift in China in the 1963 film. His character found time to

romance the Russian countess while almost single-handedly holding off swarms of Chinese Boxers bent on slaughtering every last man, woman and child inside the Peking legation. “55 Days at Peking” gives the impression that the only Americans to fight during the Boxer Rebellion were a handful of

U.S. Marines. In fact, while some 300 Marines in three different detachments were in combat, more than ten times that many Regular Army soldiers also “rode the dragon,” or fought in China that same summer of 1900. One of them was my grandfather, W. T. Dillon (1869-1938). The 55-day siege at Peking was but a single component of a long, politically and militarily complex, geographically diverse, conflict. And, the real “Handsome Jack” Meyers (1871-1952) looked more like a prissy *Parisian boulevardier*, complete with waxed mustachios pointing off at ridiculous angles, than he did an Arizona cowboy.

The irregular rebel forces wanted revenge for more than 60 years of humiliation at the hands of foreigners, specifically the British, French, Russians, and Japanese. They were dubbed “Boxers” because of their unarmed combat exercises, practiced in public. Seventy years later such martial arts would be familiar as *Kung Fu*, popularized by Bruce Lee. Boxers murdered Chinese Christian converts far

from the Chinese capital then began killing European and American missionaries as well. The Christian death toll would eventually exceed 32,000. During the spring of 1900, foreign warships anchored off Taku. Here, four forts at the mouth of the Pei Ho River were the principal Chinese Imperial coastal defensive works at the gateway to Peking, which lay a hundred miles upriver. Eight countries sent naval and land forces to China: Japan, Russia, Great Britain, France, Germany, Austria, Italy, and the United States. At first, these were only small detachments for the defense of the Peking diplomatic compounds. Some of the “Eight Nations” were bitter rivals; having recently fought wars against

each other (France and Germany in 1870-71) or would do so shortly (Japan and Russia in 1904-05). Consequently, cooperation between the nominal “allies” was often at best illusory.

The Chinese Dowager Empress, under intense foreign pressure, sent her own Imperial troops against the Boxers. But the battles fought between the

rebels and Imperial forces were inconclusive. When it became obvious that the Imperial Chinese Army could or would not defeat them, the Boxers began to threaten Peking’s legation (or diplomatic) quarter and all of the foreigners within it. By May, the first Boxers, identified by their bright red sashes, were seen in the streets of Peking. The first Boxer was killed there on June 9th. In retaliation, Chancellor Sugiyama, a senior Japanese diplomat, was murdered on June 11th, then Baron von Ketteler, a German one, on the 20th. The Boxers were blamed at first for both killings, but Imperial troops were later implicated. The first pitched battle took place on June 14th when the Boxers attacked the foreign legations. They were repulsed, leaving their dead in the streets. By June 20th, tens of thousands of Boxers had completely surrounded Peking’s Legation Quarter, cutting off 200 foreign diplomats from the outside world. Twenty-two officers and 388 enlisted men from eight different nations were all that stood between the foreigners and annihila-

Figure 1: 3.2-inch field guns of Reilly’s Battery (Battery F, 5th U.S. Artillery) in action near the Forbidden City, Peking, China, mid-August, 1900. William T. Dillon, after earlier service in the Philippines and South Africa, fought his third war as an enlisted man with this unit. U.S. Army Photo by C.F. O’Keefe.

RIDES THE DRAGON ⁷⁹

tion. The defenders included 55 U.S. Marines under Captain Meyers.

The second act of the drama began even before the foreign legations at Peking were besieged. This was the abortive relief expedition led by the stunningly incompetent British Admiral Edward Seymour. Since most of the foreign warships could not be floated over the Taku Bar at the mouth of the Pei Ho River, Seymour collected just over 2,000 sailors and Marines from the 40-plus vessels at anchor, loaded them onto five trains, and led his international force up the railway line towards Peking on June 10th. He intended to rescue the diplomats in the Chinese capital, and return them to the safety of their respective

country's warships. Unfortunately, the salt-water Admiral proved totally inept on dry land. Boxers ripped up the rails both ahead and behind, completely marooning Seymour's force. In four days they had only reached Anping, barely two-thirds of the way to Peking (Figure 2). Completely surrounded by thousands of Boxers, the Allies retreated back down the tracks. After very hard fighting, spearheaded by 112 U.S.

Marines, Seymour limped back into Yangtsun, where the railroad tracks crossed the Pei Ho River. Junks were commandeered, and the battered force floated down the river to Hsiku, where they were again surrounded by vengeful Boxers and took refuge in an Imperial arsenal. Seymour and his "rescuers" would now have to be rescued themselves.

Meanwhile, the third act in the drama began on June 17th, when the Allied demanded that the same Taku Forts that Seymour had simply bypassed, be surrendered, and if not, bombarded. The senior American naval officer present, Admiral Louis Kempff, opposed this unnecessary and unjustified idiocy, an act of war against the neutral Chinese Empire. Kempff argued that the fight was against the rebels, not the Dowager Empress, and

that attacking Taku would turn a nominal ally into a second enemy. Despite Kempff's caution, over 900 allied troops attacked the Taku Forts after a blistering barrage. The American admiral proved 100 percent correct, for the Chinese Imperial forces now reversed polarity, and began fighting alongside the Boxers instead of against them. The Eight Nations would now have to contend with two very angry Chinese dragons, not just one. The Boxers carried only knives, swords, spears and shields, but individual Imperial Chinese units were better armed than some of the Eight Nations forces, with the latest Krupp smokeless breech-loading cannon and modern Mauser magazine rifles.

A force was sent to rescue the hapless Seymour expedition on June 22nd. Numbering about 2,500 men, mostly Russian, at its forefront was a third party of U.S. Marines, five officers and 131 enlisted men, led by Major Littleton Waller. Seymour's force was rescued by June 26th, 16 days after they began what was to have been a five-hour train trip. For the rest of his life, Seymour was derided as "Admiral See-no-more" for his "disappearing act"

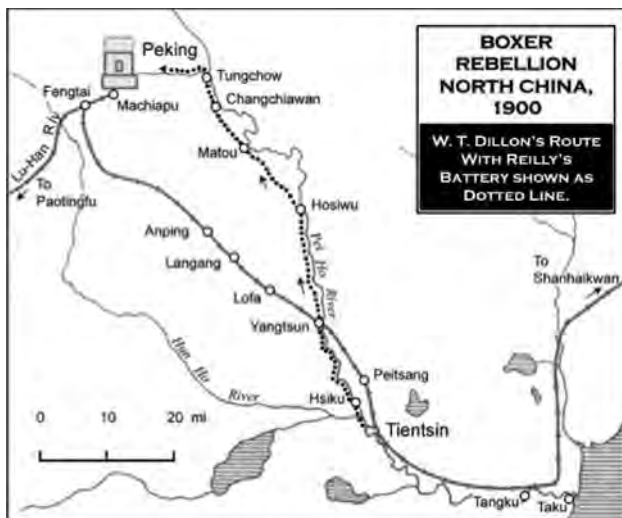

Figure 2: British Admiral Seymour's first relief attempt was by rail but the Boxers cut the line both in front and behind, forcing him into ignominious retreat. The second included soldiers from eight different countries at first, down to only four by its end. Reilly's Battery, with Grandpa Dillon serving one of its horse-drawn cannons, was part of this force. Although skirmishes were fought along the entire route, the major battles were at Tientsin, Yangtsun, and Peking. The route followed by the second multinational China Relief Expedition during the summer of 1900 is shown by the dotted line.

Map by B. D. Dillon and Rusty van Rossmann after Fleming, 1959.

which got 62 of his men killed and 228 wounded, to absolutely no purpose: no diplomats were ever reached, much less rescued. Meanwhile a fourth chapter in the drama was unfolding, this time at Tientsin, 83 miles from Peking, where a new Boxer army, joined by Imperial troops, surrounded this great city of a million inhabitants. Chinese Imperial artillery began bombarding its foreign quarter on June 17th, in retaliation for the Allied attack on the Taku Forts, and foreign diplomats and businessmen now found themselves besieged within Tientsin, just like their counterparts in Peking. One was future American President Herbert Hoover, who organized the city's defense.

The Dowager Empress declared war against the foreigners on June 21st. Now began the fifth act of

80 the Boxer Rebellion drama. Ground forces were mobilized on both sides, for a protracted shooting war. American Army troops were pulled out of their Philippine commands and sent to China, to be later joined by more reinforcements steaming all the way across the Pacific from the San Francisco Presidio. The first large body of American troops to board ship in the Philippines were elements of the 9th Infantry, 1,271 men, led by 39 officers under Colonel E.H. Liscum. They sailed on June 27th, and began to disembark on an assault on Tientsin on July 11th. The 9th U.S. Infantry charged the southern part of the city on July 14th, inflicting hundreds of Chinese casualties, but suffering greatly itself: Colonel Liscum and 22 other Americans were killed, and 73 wounded. They, along with approximately 12,000 other Allied troops, were fighting an estimated 20,000 Boxers and Imperial Chinese soldiers. Virtually all of the Eight Nations casualties were inflicted by Mausers sold to the Chinese by the Germans. The toll would have been much higher had some untrained Chinese troops not set their Mauser sights for maximum elevation. They mistakenly thought that raising the rear sights increased the power of the rounds fired, and consequently, and fortunately for the allies, often shot too high, right over their heads.

Most "British" troops were Sikhs, Rajputs, and even Bengal Lancers, rushed from India. Similarly, most "French" troops were diminutive Tonkinese draftees from the part of French Indochina that would become North Vietnam. Meanwhile, more American troops were assembled in the Philippines for China service. On July 15, elements of the 14th Infantry, 26 officers and 1,118 men, and of the 6th Cavalry, 27 officers and 1,083 men, sailed from Manila. Accompanying them was Battery F, six 3.2-inch guns, of the 5th U.S. Artillery, served by four officers and 138 enlisted men, led by Captain Henry J. Reilly, one of the most remarkable mustangs of the American Army. One of his newest privates was my grandfather, William T. Dillon. Already a veteran of fighting in the Philippines as an infantryman (*Blue Press* #279), and in South Africa as a cavalryman (*Blue Press* #263), Dillon's new fight in China would be his third war, albeit his first as an artilleryman.

Irish-born Captain Henry Joseph Reilly (1845-1900) had come up the hard way through the enlisted ranks. A bonafide bi-national hero (of both Ireland and America), Reilly (Figure 3) was one of the very last of thousands of Irishmen to be killed in action in American uniform over a 50-year period. Immigrants like him, mostly Potato Famine refugees, despised by Eastern WASPs, clawed their way towards acceptance by fighting in the Ameri-

can military, first in the Mexican War of 1846-48, then in the Civil War of 1861-65, and finally in Cuba and the Philippines beginning in 1898 and in China in 1900. Reilly enlisted in the U.S. Navy in 1863 at seventeen. He fought in many brownwater Mississippi River battles until discharged from the Navy in 1864, whereupon he joined Battery B of the 5th U.S. Artillery as a private. Promoted to Corporal, he closed out his Civil War artillery service as a Sergeant. Reilly was jumped from the enlisted ranks and made a 2nd Lieutenant in 1866, then 1st Lieutenant two years later. An 1876 graduate of the Fort Monroe, Virginia, Artillery School, he was frozen in rank for 26 years until finally promoted to Captain in 1894. Sent to the San Francisco Presidio as the commander of Battery F, 5th U.S. Artillery, he was detailed to Cuba in 1898, and fought in the Santiago Campaign. Reilly's Battery went to the

Philippines in 1899, where it replaced Grandpa Dillon's good friends, the California Heavy Artillery. By July 27, 1900, Reilly's Battery was at Tientsin, waiting for General Chaffee, who was steaming full-speed across the Pacific from San Francisco.

Adna Romanza Chaffee (1842-1914), like Reilly, was a mustang. But if the Irish artilleryman's military career was remarkable, then Chaffee's was extraordinary: he was, quite simply, the most successful mustang officer in American military history. Chaffee, one of twelve children, enlisted as a 19-year old private in the 6th U.S. Cavalry in 1861. By 1862, he had been promoted to sergeant, then, after exemplary service at the Battle of Antietam, to First Sergeant. Wounded at Gettysburg in 1863, Chaffee was jumped from the ranks, and

made a 2nd Lieutenant. He was wounded a second time, and fought with Phil Sheridan in the Shenandoah Valley campaign of 1864. Promoted to 1st Lieutenant early in 1865, he finished his Civil War service as a brevet Captain. He then fought Indians in the Southwest and on the Plains, and was brevetted Major in 1868, and Lieutenant Colonel in 1882. Confirmed in his permanent rank of Major in 1888, he was transferred into the 9th Cavalry, a Buffalo Soldiers unit. In 1897 Chaffee was finally promoted to Colonel, moved to the 3rd U.S. Cavalry, and made the Fort Riley Cavalry School commander. With the outbreak of the Spanish American War in 1898, Chaffee was made Brigadier General of volunteers, and sent to Cuba. Promoted to Major General of Volunteers, he was bumped back down to his permanent rank of Colonel once the Cuban fighting ended. Recalled to duty on July 19, 1900, as Major General of Volunteers (for the second time), he was given command of all American forces in China. New York Governor Teddy

Figure 3: Irish-born mustang Captain Henry J. Reilly, commander of Battery F, 5th U.S. Artillery, private W.T. Dillon's C.O., and the final American officer killed in China in 1900. U.S. Army photo.

Roosevelt offered to serve under Chaffee as one of his Colonels, but T.R. was left behind.

General Chaffee arrived at Taku, and quickly moved on to Tientsin, where he discussed strategy with the other Allied commanders before they mounted the second relief expedition to Peking on August 4, 1900. The new force numbered nearly 20,000 men, almost half of them Japanese. Of the 2,000-plus Americans in this force, 1,600 were infantry, 75 were cavalry, another 150 were Marines, and just under 150 were Reilly's artillerymen. The Eight Nations army, now reduced to five, marched to Peitsang and Yangtsun, where bitter battles were fought, then turned north along both banks of the Pei Ho river, for the final race to Peking. The "weak sisters" of the Eight Nations forces, Germany, Austria, and Italy, had dropped out, and would take no part in the final fighting at Peking. All would show up later, however, to loot the Chinese capital. French-speaking Private Dillon served as an interpreter with America's Japanese and Russian allies: French was the only language all three had in common. American troops greatly appreciated the bravery and discipline of their Japanese comrades in arms, but the Russians were quite another matter. They crossed in front of other allied troops, often stalling their advance. The Russians committed many atrocities against Chinese civilians, including children, turning the stomachs of the American soldiers. They seemed incapable of coordination: their timing was always erratic and they seldom stayed within their own reserved zone of attack. And, on one occasion, Russian artillery accidentally bombarded the 14th U.S. Infantry. Their shortcomings became more blatant as the walls of Peking came into view. By now the small French contingent was lost and far behind the others: only four nations would make the final assault on August 14.

Lieutenant Charles Summerall, one of Reilly's juniors, later famous as a high-ranking American officer, marked gates through the Chinese capital city's many walls with a white chalked "X". They were then blown down with 3.2-inch shells, and American infantry attacked though them. Then the next gate was obliterated with cannon fire, and the next, and so forth and so on (Figure 1). When they could not go through, they went over. Grandpa Dillon told his four sons that he was the second American "over the wall" of the Forbidden City: only his sergeant preceded him. An amazing photograph of Reilly's enlisted men scaling this wall on rickety ladders lashed together appeared in an American magazine in October 1900. Early on the morning of August 15, 1900, with the war all but won, Captain Reilly was standing next to General Chaffee at the

south end of the Forbidden City when hit by a Chinese Mauser bullet. He was the last American officer killed during the entire campaign. Reilly was buried the next day inside the Peking legation. American flags in Peking were in very short supply, but when minister Edwin H. Conger, the highest ranking American diplomat in China, attempted to retrieve the national colors covering Captain Reilly's body, General Chaffee exploded: *"Don't touch that flag. If it's the last American flag in China, it will still be buried with Reilly."*

While small American Army, Navy, and Marine detachments would remain in China until 1941, we refrained from the shameful land-grabs the British, German, Japanese, and Russian governments degenerated to. Nonetheless, the China Relief Expedition made history in many ways. For the first time since the 1760s Americans fought under British officers.

Admiral Sir Edward Seymour reinforced our long-standing conviction of their institutional ineptitude, forged much earlier during our Revolution and War of 1812. For the first time Americans found just how unpredictable the Russians could be as allies, a situation repeated 40 years later in World War II. And, for the first time, Americans fought and killed large numbers of Chinese in an undeclared war, reprised 50 years later in Korea. Most remarkably, the China Relief Expedition of 1900 was the first and only time German, Japanese, and even "North Vietnamese" troops fought alongside Americans as allies.

In 1901, Captain Reilly was disinterred, and reburied with full honors at Arlington National Cemetery. That same year, Reilly's Battery was re-designated the 10th Battery, U.S. Field Artillery. During this reorganization private Dillon was offered sergeant's stripes provided he transferred to the

6th Artillery, then being converted into Coast Artillery companies, a brand-new branch of the service, for duty back home in California. He said yes, and so began his own rise up through the ranks in 1902 with the 61st Coast Artillery Company. With the overhaul of the regular Army at the insistence of the new President Theodore Roosevelt, Chaffee was finally confirmed as a Major General. Promoted to Lieutenant General in 1904, he became Chief of Staff, the top soldier in America. The old mustang's final honor was to lead the inaugural parade for his younger admirer President Roosevelt in 1905. A dozen years later, another soldier who had "ridden the Dragon" during the summer of 1900 became a brand-new American Army mustang officer. Captain W.T. Dillon stepped up to follow the proud tradition established by his own two inspirational commanders, fellow mustangs Henry J. Reilly and Adna Chaffee.

Figure 4: The China Relief Expedition Campaign Medal, with five-clawed imperial dragon, issued to U.S. Army troops fighting in China in 1900. Sailors and Marines were awarded a different medal, with no dragon.

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics. The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll. The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.
