THE RUGER® 9E™

EVERYTHING YOU NEED AND NOTHING YOU DON'T®

Ambidextrous Manual Safety and
D-Straped Magazine Release

Black, High-
Performance,
Glass-Filled
Nylon
Grip Frame

Integral Accessory Mounting Rail

E: ESSENTIAL

EVERYTHING YOU NEED AND NOTHING YOU DON'T

Dovetailed, High-Visibility
3-Dot Sight System

Unique Reversible Backstrap is
Adjustable for a Flat or Arched Fit

The Ruger® 9E™ is the newest
addition to the popular SR-Series

line of pistols and features the Essentials –

Everything You Need and Nothing You Don't. A short
reach from the backstrap to the trigger creates a comfort

level that will challenge any standard-sized, striker-fired pistol available today.

The structurally rigid, recoil-reducing, glass-filled nylon frame and alloy steel slide
combine to create a low-maintenance, rugged and reliable handgun.

Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

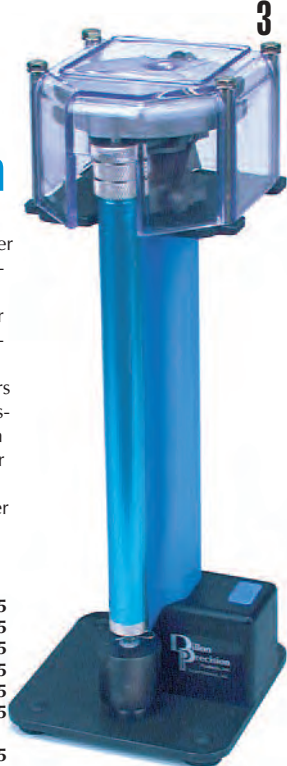

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I would like to thank John Marshall for his article about the Savage Model 99 rifle in the July 2014 issue of *The Blue Press*. My Dad, Elmer, owns just such a rifle, in .300 Savage, that he bought in the late 1950s for the exorbitant price of \$85. My Dad is 76 years old now and had shot more deer with that rifle than I'll probably ever see while hunting. As he started to do more moose hunting (he lives in the province of Ontario in Canada) he bought a pump .30-06 sometime in the 1980s and no longer hunted with his .300 Savage. Well, last fall I was able to bring him down here to Texas in the Rio Grande Valley for a few "firsts" for him. It was the first time he had ever hunted outside of Canada, it was the first time that he had harvested a feral pig with his Savage, and his first javelina harvest. Although I had to top off the rifle with a scope, as he doesn't see open sights properly anymore, he told me afterwards that he had forgotten "how much he loved that little rifle" and that using it again "brought back a lot of great memories" for him. It was a great pleasure for me to be there and see him again use his big game rifle of many years. Thanks again, John, for the article. I hope that one day again, my Dad can come down and use his .300 Savage for some more memories for both of us.

Steve Brown - Alton, TX

The first thing I read every time *The Blue Press* arrives is the "Classic Firearms" article. I appreciate your latest on the Savage Model 99. I've owned a number of them through the years and finally acquired an almost pristine 1950 model, cartridge counter and all. This one will not be sold or traded. Many thanks for your article on this fine firearm.

Neal Ackerly - Silver City, NM

Guys, thanks for your feedback about John's articles!

I'm pleased to announce that John's first book,

101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development,

should be available in the

October issue of *The Blue Press*. As promised, it's a compilation of articles that have been in *The Blue Press*, along with some yet to appear. The book is being published by Dillon Precision Products, Inc., and printed in the United States of America. A high-quality addition to any gun enthusiast's reference library, **101 Classic Firearms** is case-bound, full color and 224 pages. We hope you'll enjoy reading it as much as we did putting it together for you!

Which Dillon is Right for YOU?

Page 8

SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

SUPER 1050

Our commercial-grade reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

HP1 Electronic Hearing Protector

- *Protection Rating NRR 21*
- *External battery compartment*
- *Auto shut off extends battery life*
- *Extra-deep, replaceable ear pads*
- *Separate volume controls for each ear*
- *TRUE stereophonic sound*
- *Collapsible for ease of storage*
- *One-year warranty on electronics*

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

K84-20778, \$21.95

build and attention to detail are quite impressive. I noticed that the pair of screws fastening the forend to the forend hanger had their slots precisely aligned with each other, as did the four screws holding the gripframe to the receiver. I've seen this in some very fancy hand-made European guns, but never before on a modern American gun.

Shooting the Model 2008 was an impressive experience. I've known a couple of dedicated benchrest (rifle) shooters, and they are an interesting lot. Like most engineers, they seem to be capable of defecating through a straw without getting the insides dirty, and their guns weigh somewhat less than a fully dressed Ultra Glide. I was shooting off an 18-1/2-lb. pistol rest. My ammunition was not hand loaded or fancy, just bulk-pack Federal 55-grain FMJ, which I purchased several years before the current inflationary madness, plus some Hornady 55-grain TAP Urban and PMC 5.56mm Ball M193. Trigger pull measured a bit above 4 lbs., although it felt like a lot less. I fired three rounds at 100 yards, and all three

holes were touching, which I thought was remarkable, given my usual Mr. Magoo-like eyesight and the fact that I had to break open the pistol, remove the spent cartridge, insert a new cartridge, close the gun and return it to position for each shot. I did this several times with several different cartridges with the same results. This would be a lovely gun for prairie dog hunting...far more portable than my 14-lb. 6mm varmint rifle.

Unless you're in a position to have your guns hand built to order, you can't do any better than the Freedom Arms 2008. It's available in .223 Remington, 6.5x55 Swedish Mauser, .260 Remington, 7 BR Remington, .308 Winchester, .338 Federal, .357 Magnum, .357 Maximum, .375 Winchester and .454 Casull. Retail price with scope is \$2,018, and well worth it.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K84-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K84-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

AUTO PRIME SYSTEM

Includes:

Primer Housing /Shield
Primer Slides, Large/Small
Pickup Tubes, Large/Small

Square-Deal-Only Wrench	K84-19970	8.95

Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	K84-22051	\$48.95
XL650-only	K84-22052	45.95
Square Deal "B"	K84-22223	64.95

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	K84-22214	\$41.95
RL 1050 Tray Kit	K84-22215	41.95

Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-thirds of a grain.

Magnum Powder System	K84-97126	\$142.95
----------------------	------------------	-----------------

Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	K84-16306	\$41.95
--	------------------	----------------

Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	K84-17950	\$45.95
Plastic Roller	K84-22183	40.95

Quick-Change Cover for use with powder measure. **K84-11143 \$14.95**

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

Dillon's Case Preparation Equipment

CV-2001
K84-20493
\$188.95

CV-750 K84-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K84-20675 \$73.95

CM-500 Case/Media Separator K84-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K84-22047 \$213.95

Euro CV-750 K84-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K84-13804** **\$8.95**
Case (20 pc.) **K84-20255** **\$135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **K84-13733** **\$8.95**
Case (20 pc.) **K84-20256** **\$135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **K84-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag **K84-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag **K84-13496** **\$15.95**

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport - and no more - so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

 Mag Pouch **K84-19946** 44.95

Dillon's New Rapid Trim 1500 Case Trimmer 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **K84-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **K84-13141**, are **\$19.95** each. Upper lock rings, **K84-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K84-11703** **\$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K84-11702** **\$99.95**

"Mustang" Fits: Colt Mustang, Pony, KelTec P-32, Beretta Tomcat, etc.

Close & Ready Bedside Holster Caddy

Holster NOT Included

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

K84-18046 **\$29.95**

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

Dillon's Pistol Die Sets

Size Die

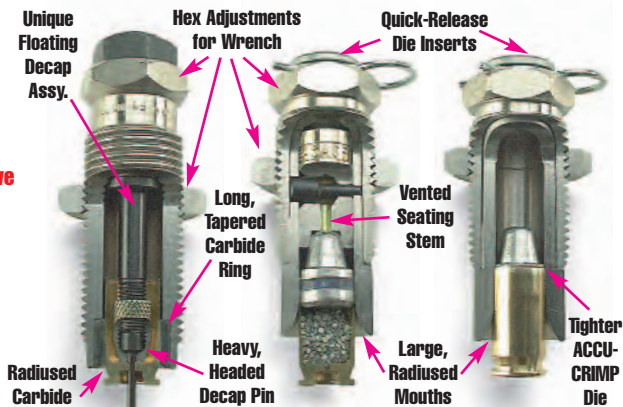

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)

The Zastava M

By J. B. Wood

The basic design of this pistol has been around for quite a while, and I think it has been often overlooked. In addition to its production by Zastava in Serbia, it was briefly made, about 20 years ago, by IMI in Israel as the Golan. Today's version, the Model 999, is imported exclusively by Century International Arms.

It is notable for two reasons: It has all of the design features of the Walther P88, at a fraction of the price, and – you left-handers take note – all of the controls are fully ambidextrous. This includes the slide latch, the hammer-lowering system, and the magazine release. The trigger is selective DA and SA, and the pulls are smooth and crisp, respectively.

The one shown here is in 9x19mm, but it is also offered in .40 S&W, if you're a fan of the "10mm Lite". (I'm not!) In 9mm, it comes with two 15-round mags, a hard-plastic case, a bore brush and a well-written instruction manual. Takedown is marvelously easy: Lock it

open, remove the magazine, turn the latch, and move the slide assembly off toward the front.

The numbers: Overall length is 7.8", and height 5.5". Width, including the control levers, is 1.65". The empty weight is 2.05 lbs., just a hair over 32 oz. There is also a Compact version, differing mostly in slide and barrel length. On this full-sized model, the barrel length is 4.25". For house, car, or outside-holster carry, it's fine.

It feels good in the hand. The grip-frame has a deep incurve at upper rear, so no danger of hammer-bite. The trigger does have vertical ridges, but they are finely done and not annoying. Both front and rear sights are dovetail-mounted, so lateral adjustment is possible. The picture is square post and square notch, with three white dots. On top of the slide, just rearward of the ejection port, a small pin rises to tell you the chamber is loaded.

The locking system is classic falling-barrel, with the squared-off chamber portion rising into the large ejection port. There

Above: A single ambidextrous lever operates the slide release and lowers the hammer. Below: The pistol, ammo box, target.

Model 999 Pistol

is no separate manual safety. An automatic internal firing pin block prevents its movement at all times, cleared only when the trigger is fully to the rear.

The slide stays open after the last shot. The release lever is perfectly located, at the top of the grip on both sides. Moving it downward lets the slide go forward. Then, pushing it again, it lowers the hammer. A marvelous system, because you don't have to re-position your hand, or look for another lever.

Also, I will note that the lever actually lowers the hammer; it doesn't "drop" it. Even though hammer-drop systems have hammer-blocks and firing-pin-blocks, I have always thought, why stress the parts? With those, my policy has always been to ease the hammer down as the lever is moved. With the Zastava, no worries, just push the lever.

At the Big Tree range, the Model 999 had no problems with the Black Hills 147-grain JHP loads. At the classic seven-yard distance, with a two-hand hold, it kept all hits in the 8" black of the Champion VisiShot target. The first three were dead center, group 1.75". The other two were slightly left and up, 4" apart. For serious social encounter purposes, most acceptable.

At gun shops and gun shows, prices are going to vary, but you can expect the Model 999 to cost around \$370, considering its features, quality, and reliability, a moderate price. If there's anything else you want to know, here's the contact data:

Comp-Tac's Trojan Horse Long Gun Case 39

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Standard Trojan Horse Long Gun Case **K84-19388 \$75.00**
 Heavy Rated Trojan Horse Gun Case **K84-16229 100.00**

ADCO SUPER **ATHUMB®** offers models for popular centerfire pistols and 10/22 style magazines.

**Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.*

AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

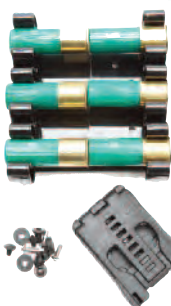

AP Custom USA's Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

TACCOM, LLC Tactical and Competition Accessories

TACCOM, LLC's Dualload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip (included)** that can be attached at various angles. The Dualload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE	K84-19530	\$9.95
4Up w/Tek-Lok™	K84-19531	29.95
6Up w/Tek-Lok™	K84-19532	34.95

TACCOM, LLC's Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shells come out of the holder and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder	K84-19543	\$39.95
8Up Quaload Shotshell Holder	K84-19544	69.95

CLASSIC FIREARMS: The U.S.

By John Marshall

Way back around 1951, when the U.S. was facing the Soviet Union in the Cold War, a need was perceived by the U.S. Air Force for an emergency survival gun that could be packed by downed pilots for small-game shooting. It had to be simple, shoot both rifle and shotgun ammo, and be able to be fired while wearing cold-weather mittens. The Ithaca Gun company of Ithaca, New York came up with a gun that met these requirements, based loosely on the concept of the old Marble "Game Getter" guns which were over/under guns with .22 uppers and shotgun lowers.

The Ithaca gun was approved. Contracts were let, and the guns were issued. The gun that Ithaca developed was a folding over-under piece. The upper barrel was chambered for the .22 Hornet cartridge (5.6x35mmR). The lower was for a .410 3" shotgun load. A lift-up latch over the rear of the barrels allowed the action to break open, and an automatic spring-actuated extractor lifted both rounds partially for extraction. A unique palm trigger was utilized so it would work with gloved hands. A lift-up section in the top of the metal buttstock covered holes that accepted 9 Hornet rounds and 4 shotgun shells. The barrels measured 14" in length, making the piece subject to the National Firearms Act in the "any other weapon" class, requiring registration and taxation. Folded, the package measured a scant 15" in length for carrying in a pouch. The weight was a modest 3 pounds and 12 ounces. These Ithaca guns were manufactured from 1951 to 1953.

The flip-flop rear sight had a peep with a 100-yard zero for the rifle, and a V-notch with a 25-yard zero for the shotgun. A push-pull device on the rebounding hammer allowed firing either the upper or lower barrel. There was no manual safety, as the

rebounding hammer and the rather heavy trigger pull were deemed sufficient. The pivot pin for the break-open action could be totally removed so the halves could be separated for packing. There was no forearm on the gun, and pilots were advised if downed, to wrap a section of the barrels with paracord from their parachutes to avoid burning the hands with frequent use, and the paracord could serve in other emergency roles. In practice, depending on the tightness of the wrapping, the point of aim could be affected. These M6 weapons are no longer issue arms; most pilots now carry just a sidearm. With GPS technology, it's not expected that a downed pilot will be on his or her own for an extended period of time.

The first .22 Hornet ammunition issued was pulled directly from civilian manufacture. The soft-point cartridges were made by Winchester and this was marked on the top of the box. The stern warning on the bottom of the 50-round brown paper box read, "Under no circumstances is the ammunition to be used for offensive or defensive measures against enemy personnel. This ammunition is provided for use with your emergency survival rifle for the killing of game for food under emergency survival conditions only." This soft-point ammo was officially designated as the "Cartridge, Caliber .22 Hornet, ball, soft point, M39." The warning on the box was basically to avoid problems with the Hague accords that proscribed the use of soft-point ammo against humans. This initial ammo was later replaced by the "Cartridge, Caliber .22 Hornet, ball, M65." This ammo was specially loaded with jacketed bullets and could presumably be used for game or against enemy personnel. The bullet had a gilding metal jacket over a lead-antimony slug, and weighed nearly 35 grains. Military publications claimed that this round had "improved wounding

M6 Aircrew Survival Weapon

“Collectors desiring to own an original issue weapon have some bureaucratic niceties to observe. First, if one of these is not currently registered, there is no way to own it legally.”

power” over the M39 soft-point ammo. Specifications called for an average extreme group spread of not greater than 2-1/2” at 100 yards. The older M39 loads were authorized to be issued until the supplies of it were exhausted.

There were three types of 3” .410 shotgun shells that were issued. The first used an all-aluminum case and had sealed primers for water resistance. It was loaded with number 6 copper-coated shot, and was designated as the M35 .410 gauge cartridge. This aluminum round was manufactured by Olin-Winchester. The second was a commercial paper-hull cartridge loaded with number 6 chilled shot, and the third was another commercial paper cartridge loaded with number 7-1/2 chilled shot.

There was some demand for a civilian version of this arm, and in the early 80s, Springfield Armory, Inc. (the private company in Geneseo, Illinois) took up this task and imported a very similar gun made for them by CZ in the Czech Republic. This was called the M6 Scout. It was made very durably. The illustration shows one of these, made in 1984.

The main difference between this gun and the issue version is the length of the barrels, which are a civilian-legal 18-1/4”. The upper barrel is chambered in .22 LR, although some Hornet and .22 WMR barrels have been made. The lower is in .410 3”. The buttstock carries 15 .22 LR rounds and four .410s. Later versions of this gun had a long trigger guard over the palm trigger and a crossbolt safety, both lawyer-friendly devices not in keeping with the original design. The trigger guard prevented folding the gun as tightly as it could be before. Some all-stainless steel guns were made in lieu of the original Parkerized tool-steel configuration. A small number of experimental guns were made as pistols. These had the lower barrel chambered for

.45 Colt cartridges, with the chambers made extra long to also accept .410 shotgun shells. The bore was rifled, making for a greater spread with the .410 ammo. Springfield Armory quit importing all M6 models in 2004, and they are no longer made.

Collectors desiring to own an original issue weapon have some bureaucratic niceties to observe. First, if one of these is not currently registered, there is no way to own it legally. The original M6 issue weapons with 14” barrels have been classified as “curios or relics” for the convenience of collectors subject to the provisions of 18 U.S.C. Chapter 44 and 27 CFR Part 478. However, they are still subject to all the controls under the National Firearms Act, and are still “firearms” as defined in both 18 U.S.C. Chapter 44 and 26 U.S.C. Chapter 53.

Collectors who want to own one of the Springfield Armory M6 guns with legal 18-1/4” barrels will have no problems other than finding a pre-owned specimen on the open market. Since the discontinuance of these guns, they have been in high demand among collectors, survivalists and civilian aircraft pilots. Today, they sell on the used-gun market for between \$400 and \$1,200 depending on the model, caliber and condition. The original guns without triggerguards or crossbolt safeties command higher prices as do the stainless guns and those where the upper barrel is chambered for either .22 WMR or .22 Hornet.

While the original-issue guns are scarce and fraught with legal red tape to obtain, the civilian versions are still out there in some quantity. Their present owners do tend to hang on to them for their place in U.S. military history and for their still-excellent utility as survival tools. If you find one in good condition, it’s definitely worth consideration.

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K84-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

Concealed Carry Tote⁴⁷

\$45⁰⁰

K84-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

A Dynasty Recharged: Lena Miculek

By Robin Taylor, www.taylorfreelance.com
 Photos by 3GN (above) and Jody Lewis (right)

In two years, 19-year-old Lena Miculek Afentul has won more prize money than any other female 3-Gun shooter in history. She's beating the "tactical-cool" shooting wizards of either sex at matches across the country, and television appearances and sponsorships have followed. She's the new star in the 3-Gun shooting universe.

In two years? How did that happen!

Lena Miculek Afentul descends from Jerry and Kay Miculek, two legends in the shooting world. You could say she was "born into it" – that she's part of the Clark "dynasty" – but that over-simplifies her story. For quite a while, Lena wanted nothing to do with shooting.

"When I was 15, 16, I decided to totally leave (shooting) behind," she says.

Lena grew up a few hundred yards from her mother's family business – the famed Clark Custom Guns. You drive by her house, her uncle's house, and her grandparents' house (all famous gunsmiths) to get to Clark Custom. Past that, you're on the Shootout range, owned jointly by the Clarks and the Miculeks. She'd been immersed in "shooting culture" from the day she was born and wanted "something else."

"Something else" turned out to be pretty dull, so in 2010, Lena "came back" and started experimenting with different pistols.

"Nothing wowed me," she says, until she tried a revolver.

"That was challenging," she says. She drove a S&W 625 for a year, winning some titles before

catching the 3-Gun bug.

"I tried 3-Gun, and that blew me out of the water," she says.

Lena loves the challenges of 3-Gun. As she talked about it, her words started coming faster, with increasing intensity. This was obviously "her thing."

"USPSA is so refined, you're looking to take off tenths of a second. 3-Gun you show up and every stage is like three USPSA stages put together. The shots are long, you have to shoot offhand rifle, shoot on the run, shoot at point-blank, one time I had a 117-yard shot with a pistol. Overall it's a lot more intriguing."

On The Range

Lena brings her father's speed and her mother's precision into one fearsome package. Jerry Miculek (a regular on "Impossible Shots") is one of the fastest, most well rounded masters ever to grace a range. Kay (Clark) Miculek knew no rival in 3-Gun when USPSA ran the game.

Since then the game has expanded – no, scratch that – *exploded* into life thanks to the 3 Gun Nation (3GN) television program. Four years ago you'd have been hard-pressed to find a dozen

3-Gun events of any size. This year, Team Miculek will hit 26 major events from coast to coast, many of which are sold out.

Lena placed third overall in "tac optics" division at the Hornady "Zombies in the Heartland" shoot in June. That's third overall against every man and woman in the division – at a match drawing 470 people.

"It's amazing," says Lena. "There's giant interest in (3-Gun). I hope it does nothing but grow!"

On The Road

I caught up with the Miculeks as they drove the "Team Miculek" motor home toward the CMMG 3-Gun in Boonesville, Missouri. Together, Jerry, Kay, Lena and her husband Brock will spend most of 2014 on the road. Their longest "away" will span 28 days.

"I started counting matches the other day and lost count at 26," says Lena. "It really scares you when you look ahead at how many there are. I can only look ahead two weeks at most, or it scares me."

With each match lasting an average of three days, plus travel, there's not a lot of "home life" left.

"It's an amazing amount of work just planning. Plus we have to do all the normal people things too, like mow the grass."

And when that's done?

She had to think about that.

"Doing nothing is really nice," she said. "I enjoy that in a weird way. Plus working on the house."

Once they've had a chance to recharge, the team breaks out the video cameras to do YouTube videos. Look up the "miculek dotcom" YouTube channel, and you'll see all the members of the Miculek traveling road show.

Beware The Gators

Lena looks like any other 19-year old. Average height, average weight, modest, pretty, with a heart-shaped face and a trace of a Louisiana accent. There's nothing "intimidating" about the way she looks or behaves. Like her parents, she's pretty laid back.

Like alligators, the Miculeks blend into the background until the proper moment. When that timer goes off, the laid back part disappears and "something else" makes a sudden, dramatic appearance.

Today Lena has a supreme set of shooting skills – even her mother struggles to beat her.

"Maybe when I was in my prime, I would have given her trouble, but I don't think so," says Kay. "She's wicked fast with a long gun."

STC Background

I asked Lena about her flair for long guns.

"Shotgun has been something I'm known for since I won the IPSC shotgun World Shoot in Hungary," she says.

For that, she credits the little-known sport of Sportsman's Team Challenge. Lena joined an "STC" team as an 8-year-old, and its lessons paid off.

"The hardest rifle target (in STC) is a one inch by one inch star at 90 yards, shot with a .22 rifle," says Miculek. "There's a diamond also. It's one inch on each side."

That's a DIFFICULT shot from the bench, yet 8-year old Lena took on that star shooting offhand – under time pressure. Difficult aerial shotgun targets also appear in STC for 12-year-olds and up, again under time pressure.

"That (training) definitely helped, same with shotgun," says Lena.

Today she shoots a Mossberg 930 "JM" (for Jerry Miculek) with a Nordic Components mag tube underneath. Reloads come from Carbon Arms twin loaders – the same ones she took to Hungary for the World Shoot. She's customized her S&W M&P 15 rifle with a Hyperfire trigger, 16" Barnes barrel and Barnes handguard. It's loaded with 77-grain Nosler hollowpoints courtesy of Freedom Munitions. Her pistol isn't stock either. Her M&P Pro in 9mm wears Hi-Viz sights, a tungsten guide rod, steel mag well and extended basepads.

Growing Up A Miculek

While Lena was raised in the game, her 3-Gun skills didn't "just happen."

"My first year, I was really bad, I mean terrible. Ask anyone, I was really horrible."

Kay Miculek is one of the more sought-after ladies' trainers in the country, so when you're "Kay's daughter" and you don't shoot well, people ask awkward questions. It wasn't fun, says Lena, but "because of that family dynasty pressure, I'm a much better shooter now."

Most people, when put side-by-side with a better shooter will make the mistake of trying to shoot faster than their opponent – whether or not they actually have the skills to do so.

Lena grew up shooting with faster shooters, often in front of an audience. As a result, she's immune to the desire to match her opponent's pace. That's a huge advantage when it's time to shoot for the money in a head-to-head 3GN shootoff.

Facing A Bright Future

Lena won the first 3GN ladies shootoff 18 months ago in Las Vegas, beating her mother and a list of who's who to earn the \$5,000 ladies' prize. She did it again this year (at SHOT Show) with the live TV cameras rolling – only now the prize was \$25,000, the crowd was huge and the competition better. She's been racking up regional wins ever since.

With Lena now fully "in the game" the Clark/Miculek dynasty faces a bright future. If you'd like to learn more about them, look up their YouTube channel titled "miculek dotcom."

K84-12297 \$34.95

Deluxe Set: 510.5 grains for bullets, cases and powder.

K84-12458 \$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Armorer's Block **K84-19536 \$29.95**

Grace USA⁵³ Gun Care Tool Set

This custom designed 12" x 9" x 1-1/2" case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

Note: These Come in Assorted Colors

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

K84-19538 \$13.95

The **TACCOM Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

K84-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The **TACCOM Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

Galco's Origin

Galco's original Jackass Rig normally has a holster on one side, a double mag pouch on the other. The heart of the OJR system is its X-shaped Spider Harness.

The standard OJR double mag pouch is upside-down, flapped and snapped.

Thomas practices a speedload on the range from the OJR mag pouch.

By Duane Thomas

In 1969, Richard Gallagher, owner of the Jackass Leather Company, designed the first truly practical concealment shoulder holster. Called, logically enough, the Jackass Rig, it was the first of what today we term "horizontal shoulder holsters." Eventually the Jackass Rig was phased out of production. Also eventually, Gallagher's company, today known as Galco, reintroduced the original Jackass Rig.

The OJR (as I call it) has always been made of tough, durable horsehide. A clever harness consisting of four independently articulating straps held together between the shoulder blades with a four-leaf-clover shaped connector allows it to constantly adjust itself on the body, and makes the OJR the only shoulder holster I can wear comfortably. Adding to the comfort level, the rear strap on the holster side attaches to the *bottom* of the hol-

ster, not the top as on many other designs. This pulls the gun into the body, as opposed to having both front and rear straps attached at top of the holster which allows the gun to bounce left and right as you move and beat you in the side.

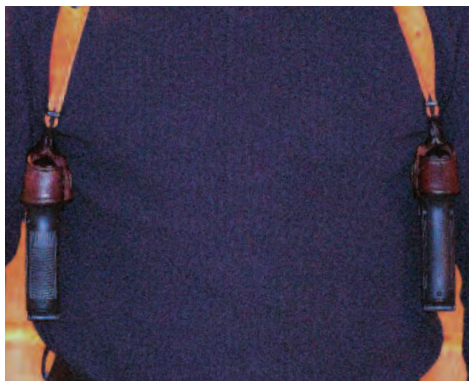

The OJR comes standard with an upside down, snapped and flapped double mag pouch somewhat balancing out the gun on the other side. While this allows carrying spare ammo easily, I can tell you from experience, that pouch is not the fastest thing in the world from which to draw a spare mag during a speedload.

Galco offers left hand holsters for the OJR, and I've always been fascinated by the concept of the double shoulder holster, carrying duplicate guns, one on each side, to totally balance out the rig. Recently Galco sent me such a system set up for two Glocks. I went to the range and tested how fast I could dump one gun and draw a fully loaded

al Jackass Rig

Thomas' double OJR system carries two Gllocks.

Carrying a Glock 17 on each side, the double shoulder rig balances perfectly.

Galco's open-front HCL mag pouch performed well in Thomas' testing.

Thomas goes for a spare magazine in the HCL during a slidlock reload.

spare (what the late Jim Cirillo dubbed the "New York Reload") from the offside holster, Border Shift it over into my master hand and continue firing, measuring from the last shot out of Gun #1 to the first shot from Gun #2. For five reps, the answer was, on average, 3.24 seconds.

Galco also produces a very interesting mag pouch called the Horizontal Carrier Leather aka HCL. As the name indicates, this is a horizontal mag pouch (actually, like the holster itself, the way I wear it, it's diagonal), open at front, the mags retained with a friction fit. Be aware, since the HCL is not technically a part of the OJR rig (it's part of the Miami Classic system) if you mix 'n' match an OJR with an HCL, your holster/mag pouch will be two different colors. The OJR's darkest color is a deep Havana Brown, the Miami Classic is not available in Havana Brown, its darkest color is black.

Well, that's a bummer...I guess. But that's why God invented concealed carry permits. So if you ever have to shoot someone in self-defense, they won't just stand there and say, "Don't you know your holster and mag pouch are different colors? I am COMPLETELY unimpressed." Galco also sent me an OJR/HCL combo.

Five slidlock reloads with the HCL averaged 2.57 seconds. By comparison, during the same range session, five slidlock reloads from my normal, belt mounted mag pouch averaged 2.26 seconds. All the foregoing times were from concealment, from underneath a baggy green hoodie I wear on a regular basis.

The mirror image shoulder holster system is a great idea, and I'm glad I now have one in my bag of tricks. But if I actually wore a shoulder rig, it would have a Galco OJR holster on one side, and an HCL mag pouch on the other.

64 *Get your "stuff" together, then keep it that way!*

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Freedom Standalone LLC is proud to offer the first and only true full-size torso target on a standalone base. Simply slide the torso into the base wedges for a sturdy and durable fit; then move dirt, sand, etc., onto the base to hold in place even in the wind. There's no more need for heavy, cumbersome target stands. With our 100% recycled targets and bases, sport shooting is simpler than ever.

E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth	K84-18613	\$6.99
-----------------	------------------	---------------

Snake Oil is a derivative of an FDA certified medical lubricant used in high-speed medical drills.

- Provides a film that separates and protects moving parts, for smoother operation and increased efficiency.
- Contains no evaporants and has a film affinity in excess of two years.
- Reduces the collection of dirt, dust and other contaminants.
- Performance in extreme conditions is unparalleled.

Sweet's Australian 7.62 Solvent

easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

K84-13128	\$12.95
------------------	----------------

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is used in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	K84-15571	\$7.95
Slide-Glide Lite	K84-15572	7.95

Micron UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

K84-18599 \$14.95

drymate™

Bore-tips® Bore Cleaning Foam Swabs

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ **K84-11313 \$19.95**

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar steel stock and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

K84-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,

30mm tube and

bright illumination of the reticle are just a

few of the many features of the DMS-1. Bright

red illumination of the reticle adds to the quick-

ness of the sighting system in day and low-light condi-

tions. At one power it works well as a reflex sight and at

longer ranges the four-X magnification gives increased ac-

curacy.

K84-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

77

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

TRS-25 HiRise with base (Pictured)	K84-16227	119.95

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

1895: Winchester

By **Brian Dervin Dillon, Ph.D.**

No rifles conjure up the mystique of the American West better than Winchester lever-actions.

Oliver F. Winchester (1810-1880) was an investor who took over the failed Volcanic Arms Company in 1857. The .36 caliber Volcanic rifles and pistols pioneered both the lever action and the underbarrel magazine tube. The latter also dictated the bullet shape: since the rounds were stored nose-to-primer, inadvertent discharges would have been inevitable with anything other than a flat-nosed design. The caseless Volcanic rounds, essentially just hollow lead bullets filled with black powder and a primitive central primer, were unfortunately anemic and erratic. Five years later, Winchester promoted the 1862 Henry 16-shot, lever-action rifle. The Henry, with its more reliable .44 Rimfire cartridge, was carried in small numbers by a few Union troops in the Civil War, and by a few more civilians and lawmen immediately afterwards.

The first lever action marketed under Winchester's own name, like its Henry predecessor, was also a .44 Rimfire. It appeared in 1866, the year also providing the model number. The Model 66 rifle held 17 .44 Rimfire rounds, the carbine 12. Amongst its most important improvements was the loading gate on the side. Now the magazine tube was permanently enclosed. Just over 170,000 Model 1866 Winchester .44 Rimfire rifles were made.

But the .44 Rimfire cartridge had serious shortcomings. The rounds could go off if dropped or if anything heavy were dropped on them, individually or in their boxes. Conversely, they did not always fire when supposed to. Their primers were so chancy that double firing pins opposite each other at 90 and 270 degrees were necessary. The frequent misfires could often be cured with a slight rotation, re-cocking the hammer, and giving the round a second try, a method still familiar to modern .22 rimfire shooters. Worst of all, with only 28 grains of powder, the .44 Rimfire was, in the words of one authority, "laughably underpowered" with correspondingly low velocity for its 200-grain bullet. Its range was short and its ballis-

tic curvature closer to that of a mortar shell than to a straight line. The rifle design was sound; it just deserved a better round.

The new cartridge came in 1873, along with a new model Winchester to shoot it in. Still a .44, the 200-grain bullet was now held by a much stronger, and for the first time, reloadable, center-fire casing. Its powder charge was upped to 40 grains, almost twice that of the rimfire. The new round was designated the .44 W.C.F. (Winchester Center Fire) but quickly became known as the **.44-40**. Colt soon chambered its revolvers for the Winchester rifle round. The concept was extended to a second caliber, .38-40, in 1878, and then, in 1882, to a third, .32-20. Folks out west who thought that the same cartridge in both rifle and pistol was the best idea since the saddle horn now had three chamberings to choose from. The Model 1873 Winchester was made for exactly 50 years, with just over 700,000 produced.

In 1876 another new model rifle appeared, bigger, heavier and designed for a more powerful round, the .45-75 Winchester Center Fire. This was the civilian answer to the .45-70 government round, standard in the U.S. Army's single-shot trapdoor Springfield rifles and carbines. The Winchester round was a bottleneck, and used a much lighter bullet (350 grains) than the 405-grain .45-70 carbine cartridge or the 500-grain long rifle behemoth. Fans of the new round and the gun chambered for it were as diverse as Dakota rancher Teddy Roosevelt and the R.C.M.P., which issued it to its Mounties.

A decade later, the new Winchester Model 1886, with a very strong action designed by John Browning for long casings, was finally chambered for the .45-70 Springfield round. Then it became available for a bewildering array of cartridges like .38-56-255, .38-70-255, .40-65-260, .40-70-330, .40-82-260, .45-90-300, .45-110-300 and .50-110-450, the largest of them very bad medicine for big game like Elk and Grizzly Bear.

A completely new rifle, the model 1892, was an intentionally scaled-down version of the big Model 86, chambered, at first, for all three of the

Goes Smokeless

79

Figure 1: Uncle Jack Dillon's 12th birthday present, an octagon-barreled Model 1894 Winchester. The rifle was made in 1895, the first year of chambering for the new, smokeless, .30-30 cartridge.

Grandpa Dillon, Jack's father, bought the gun used, in good condition, off the wall of a Sausalito, California, barbershop in 1927 for \$2.00. Pre-teenage gunsmith Jack cut down the magazine tube, made his own handloads, and went hunting. The first deer he killed with it was where, eight years later, the Golden Gate Bridge would be built.

old rifle/pistol cartridges that had made the Model 73 so popular. The 92 was lighter, yet stronger, than the venerable model 1873, and more shooters bought it than the older gun. Forty years into its run, the one-millionth Model 1892 was made. They continued to be sold until 1941.

By the early 1890s, however, the handwriting was on the wall for black powder cartridges. European military applications, especially in Germany, had completely changed over to smokeless propellants as early as 1888. Winchester's first venture into smokeless technology was in 1894, when it began making the new .30-40 Krag-Jorgensen round to satisfy a federal contract. Winchester realized that to maintain its market position new rifles taking advantage of the high pressures generated by smokeless powder should be offered. Two different designs pursued this goal: the Model 1894, and the Model 1895.

Winchester's Model 1895, its first lever gun with its tube replaced by a box magazine, could safely handle round-nosed and even the new Spitzer bullets, both much more aerodynamic than the old flat-noses. The Model 95 was chambered for the .30-40 Krag, not a true Spitzer, but at least a round-nosed smokeless cartridge. Many Spanish-American War volunteer officers, who had to purchase their own rifles or carbines in 1898, opted for the Model 95 in .30-40; Teddy Roosevelt was one of them. Eventually, the Model 1895 was chambered for more powerful cartridges, like the .30-06 and .405 WCF. In the latter it became the favored saddle gun of the Texas Rangers, who used it into the 1920s. But the Model 95 would never be even remotely as popular as the other Winchester smokeless lever action, its contemporary, the Model 1894.

The Model 1894 Winchester was another John Browning design, similar to the Model 92 in size, weight, and external dimensions, but employing much stronger steel in its receiver and action. A conventional lever gun like every Winchester repeater since the 1862 Henry, the Model 94's tubular magazine still dictated a flat-nosed bullet. Just under 15,000 1894 Winchesters were made

during its first year of manufacture, but these were only chambered in the old .32-20 and the newer .38-55 black powder rounds, because production problems had delayed the arrival of the more powerful smokeless cartridges.

The Model 94 first went "smokeless" in 1895, its second year of production. Once again, fewer than 15,000 were made. The Winchester 94 was now offered in two brand-new, smokeless calibers, .25-35 and .30 Winchester Center Fire. The smaller caliber never caught on, but the harder-hitting larger round grew more popular year after year. Its flat-tipped, 170-grain bullet was backed up by 30 grains of smokeless powder inside a bottleneck casing. The very first guns chambered in this new round were stamped .30 W.C.F.; before too long they were being called **.30-30s**. In 1902 a slightly larger cartridge, the .32 Winchester Special, a bottleneck like its little brother, was introduced, but it could never hold a candle to the .30-30 in popularity. The .32 Special nevertheless offered a "fix" for .30-30s that had been "shot out," or fired once too often. These could be re-bored and re-chambered for .32 Special, and enjoy a second lifetime.

Cowboys, farmers and *bandidos* alike loved the .30-30. It became the most popular gun of the Mexican Revolution from 1910 to 1923, and even had a song written about it: *Carabina Treinta-Treinta*. The millionth Model 94 came in 1927, the five millionth in 1981. A very great difference, however, exists between early and late Model 94s. All 2,600,000 guns produced before 1964 were high-quality, American-made products. Later rifles were made with less attention to fit, finish and materials. The last were manufactured overseas, in a country whose government prohibits private gun ownership, where the people making them cannot legally own them. Most serious shooters and *all* collectors, consequently, avoid post-1964 Model 94s.

Uncle Jack Dillon (1915-2001) is already familiar to readers of *The Blue Press* from earlier issues. As a youngster in the 1920s his life, lived largely out-of-doors, was so rough and tumble that he made Huck Finn look like a city kid by compari-

son. Jack hunted and fished in the mountains and on the shoreline of Northern California's Marin and Sonoma Counties, first when only four or five with his dad, then, from the time he was eight years old, by himself. Jack wanted to be a gunsmith, so, from a very young age he was surrounded by rifles, pistols and shotguns of all kinds, all degrees of decrepitude and all stages of disassembly. Most of what little money he had was used to buy gun parts. At age 10 Jack found a drowned sailor on one of the local beaches. Two years later he talked the U.S. Navy at Mare Island into giving him and his buddies a WWI surplus, 40-foot whaleboat. This became their plaything on San Francisco Bay and along the rocky Northern California coast. The kids would row or sail to hunting and fishing spots only reachable by boat, sometimes even out through the Golden Gate to the Farallone Islands and back again, far from any parental constraints.

Sausalito, California, was a hick town in the 1920s, and a bootlegger's paradise. It was the nearest place with plenty of anchorages just across the water from thirsty San Francisco, yet outside the jurisdiction of that town's law enforcement. Building and repairing rumrunners was a good business in the many small shipyards that dotted the Sausalito waterfront. Still only 12, Jack got a part-time job in one of these shipyards. He was hired while grown men were turned away because he came highly recommended by the captains of the local fishing fleet.

The Sausalito fishing fleet was blessed once a year by the priest at the Star of the Sea Church, but secular protection of the catch was provided by Jack Dillon, the young Irish kid with the rusty old rifle. Jack made money as a pint-sized market hunter beginning in 1925 when he was only 10 years old. He shot seals and sea lions on San Francisco Bay and along the shoreline of the Golden Gate years before the famous bridge was built there. The Salmon fishermen were constantly getting the marine mammals tangled in their lines or

losing their catches to them at the last minute. So, a bounty of a buck a flipper was paid. "Right flipper only" was the rule set by the mostly Portuguese and Italian fishing boat captains. Young Jack shot the waterdogs with an old, .30-40, Spanish-American War Krag-Jorgensen carbine, the first bolt-action gun available as surplus to the general public. Jack's dad had carried a Krag in the Philippines, China and in California before the U.S. Military moved on to the .30-06 Springfield, so there was nothing unusual about the gun or the round. Jack handloaded his own .30-40 rounds for the Krag; the cost was carefully calculated at 18¢ each. With luck, he earned 82¢ each time he squeezed the trigger, a king's ransom for a 10-year-old kid in 1925. The trick was to hit the animals close to shore so that they would not sink, precluding flipper removal. After each shot, a dunking in the waves, knife in hand, and a battering against the rocks of the shoreline, pounded by the breakers, was often a necessary part of the deal.

But the Krag was a beater with none of the cachet of the "Old West" guns seen in the nickel Saturday matinees at the Sausalito theater, in the hands of William S. Hart and other, less famous stars of the silent "horse operas." The rifles and carbines shot by these sagebrush heroes were, of course, Winchester lever-actions, Model 92s or 94s. Jack didn't really *need* a Winchester since he already had the rusty, beat-up, boxcar Krag, but he *wanted* one nonetheless. His dad and brothers were told to be on the lookout for a Model 94 at the right price.

Jack Dillon's hometown was too small to have a gun store, although there were plenty of these across the water in San Francisco. The local hardware store could order new rifles, pistols or shotguns from the tattered catalogs behind the counter, but then, as now, few people were willing to buy something sight-unseen, not already handled and personally inspected. And, of course, the best deals were up on used guns, none of which ever showed up in a catalog. Fortunately, the

Figure 2: The big buckhorn rear sight on the first-generation Model 94 Winchester. The .30-30 rifles made in 1895 were the first to be designed for smokeless powder, as proudly proclaimed on their barrels.

local barber was also a firearms aficionado and he had a sideline as a used-gun dealer. His stock was up on the wall opposite his barber's chairs. People getting haircuts, consequently, were a captive audience, staring at the guns for sale only a few feet away.

One day in 1927, while 11-year-old Jack Dillon was at the barber he spotted an old .30-30 Winchester in good shape up on the wall. At the time a haircut cost a dime, but a brand-new Model 94 went for \$20, an astronomical sum for a kid. Once his ears had been sufficiently lowered, Jack checked out the used rifle. When Grandpa Dillon came in for his next trim, the barber mentioned

how taken his son had been with the Winchester. Shortly thereafter the gun came off the wall and was given to Jack for his 12th birthday, a present from his father. The price was right: \$2.00.

Jack customized his 32-year-old rifle by cutting down the magazine tube and by filling the rectangular relief on the barrel's underside with lead, then smoothing it out. His Winchester now looked like a sporter. Then he bought the dies and began handloading for his new gun. Not too long afterwards Jack killed the first Muley

buck with his "new" .30-30, on the Marin headlands, exactly where the North Tower of the Golden Gate Bridge would be built eight years later. The Winchester, young Jack's pride and joy, was never taken out after waterdogs either in the whaleboat or on foot along the rocky shoreline. Instead, the old Krag was exposed to the constant salt spray and occasional dunkings.

Thirty-five years after Jack Dillon got the Winchester as a birthday present, I became aware of the old rifle, and conceived a great desire for it. Uncle Jack had two daughters, but no sons or grandkids, so as his nephew I was the closest thing to a male offspring. Some stress in our relationship developed in the late 1960s, between the young redneck hippie (Figure 3) and the older U.S. Army Colonel, but we both still loved guns, in this case, the same gun. After my own inevitable trip to the barber, Jack gave me the old Winchester, saying that his dad, my grandfather, who died long before I was born, would have wanted me to have it.

Some modern rifle shooters with more money than experience denigrate the old Winchester lever-action design and pooh-pooh the .30-30 cartridge as obsolete. They never fail to tell you that you cannot mount scopes on top-ejecting Winchesters, and that a flat-nosed bullet can never

travel as far or as fast as a same-caliber Spitzer. Both comments are, of course, absolutely true. I would be amongst the first to jump up and cheer for the .30-06 as the premier North American game round and most effective military cartridge of all time, bar none. But I firmly believe that there is still and will always remain a practical use for the old, reliable, .30-30.

Not every gun out there must be a delicate, pampered, ridgeline-to-ridgeline, benchrest, scoped sniper rifle. Not every gun should live in a padded case like a *Stradivarius* 99 percent of the time. Some can just be tossed under the truck seat between outings. And, many of us who have

spent our lives with guns very close to hand truly believe that using scopes is *cheating*. Just try running through the jungle or tall chaparral all day long, day after day for a few months, or – where permitted – try night hunting, and you will find that the scope once considered so essential now just gets in the way, hindering, not helping, most of the time.

With big buckhorn rear sights providing quick acquisition for snap-shooting at running deer or pigs, and rapid follow-up shots coming very easily from

the smooth and fast lever action, a Model 94 beats a scoped bolt-action for moving targets every time, hands down. And, as a brush cartridge, the .30-30 is a winner, and always has been. Over the past 120 years it has killed more deer, certainly in the California chaparral, where few shots are made at over 100 yards, than all other calibers combined. And throughout Latin America, the *treinta-treinta* remains the deer rifle. I have three .30-30s in my gun safe, both Winchester and Marlin, and I love shooting my handloads in all of them. But the most fun to shoot, especially rapid fire at multiple or at moving targets, is Uncle Jack's old 1927 birthday present, a true blast from the past.

About the Author: Brian Dervin Dillon is a fifth-generation Californian, a third-generation handloader, and a regular contributor to **The Blue Press**. He is an archaeologist and historian who earned his Doctorate at UC Berkeley and has done fieldwork in five different countries. Dillon has been a safe shooter for 53 years. He is an NRA Certified Rifle, Pistol, Shotgun and Reloading Instructor, and a BSA Merit Badge instructor who has taught Boy Scouts to shoot safely in four western states. His handloads for the 1895 Winchester .30-30 are made to the same specifications as those made by his Uncle Jack 87 years ago.

RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

The **M2 Chronograph** comes with sensors, screens and one two-foot mounting bracket. A nylon carrying case and tripod are available options. The **CED7000 Shot Timer** is a breakthrough in technology. No other timer to date offers this combination of advanced features, compact size and light weight. This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	K84-19220	\$29.95
Advanced Trauma Kit (A.T.K.)	K84-19322	69.95
