# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

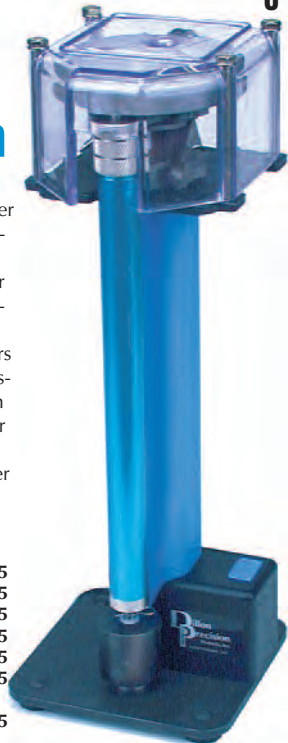

***Clear polycarbonate shield and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

## We READ Our Mail!

Duane Thomas' article in the July *Blue Press* was favorable regarding his experience with Xtreme Bullets. His description of the bullet plating thickness vs. other plated bullets led me to make an order. I had tried other brands of plated bullets in several different calibers and I had experienced variable success. I ordered Xtreme's .410 FP bullets for my .41 Mag reloading. Their pricing was very reasonable and their shipping cost was the lowest I've experienced for other bullet orders I've made. The order arrived in short order, and the bullets themselves were bright and clean. They even included a cannellure groove for crimping. Shooting is the test, so I loaded up a batch for trial and went to the range. Accuracy was on par with jacketed bullets, so Xtreme will be my source for all my target bullets in the future. Thank you Duane for the article, you have made a believer out of me.

Mike Leow – Rogers City, MI

I just loaded the first 500 rounds with my XL 650. I love my wife more but the Dillon is high on my list of good things.

Eric van Tassell – evt@texelsoft.com

I received my repaired Square Deal press today – essentially a new press. I am a Vietnam vet who is watching the systematic destruction of my beloved country by a Marxist administration. What encouragement to know there are still American businesses that operate with the integrity and honesty of Dillon Precision. It gives one hope for America's future survival. We who love this Republic must hold on and fight for what began as a truly righteous cause. God bless you and America. I write because my phone call of thanks was not enough.

Barry Billings – Portage, PA

I called you on Monday April 6th because I needed replacement parts. I was very skeptical as the part I was looking for was for a 30-year-old machine, and who in this day and age stocks parts with that rare a frequency of usage? Your Customer Service Team was very professional and extremely helpful. They went out of their way to make sure you had the part in stock, and that it was available for immediate shipping. The part arrived at my home on April 8th. I want you to know how truly appreciative I am to your organization, and the exceptional experience I had dealing with Dillon Precision. Word of mouth is the best form of advertising, and I have been telling everyone about my experience with your company. Thank you for holding to your values, and putting the customer first!

Donald Cohen – Boynton Beach, FL

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# THE .380, DONE RIGHT:

## Reviewed by Peter Caroline

I own, or have owned, a number of .380 ACP semiautomatic pistols, all compact and eminently concealable. The majority suffered from one or several of the following unfortunate characteristics: 1. Too small and snappy; 2. Inadequate sights or no sights; 3. Not enough grip surface; 4. Difficulty working the slide; and 5. Limited magazine capacity...usually six rounds.

The only exceptions I've noticed were the old Colt "hammerless" .380 and the Llama or Star pistols, which are now no longer made and are pretty much collector's items. This situation became evident when I was looking for a carry gun for my wife. Sally's "house gun" is a Taurus Judge, which she shoots very well indeed. But it's not a model of concealability, and tends to make a petite individual list to starboard. When I visited the Glock booth at the SHOT Show, I checked out their Model 42 .380. Size-wise and sight-wise, it seemed ideal, but then I hauled back the slide... way too heavy. So on we go.

At the 2015 SHOT Show, I checked out Browning's new 1911-380, a 7/8-scale rendition of the classic 1911, and in Goldilocks fashion, said, "This one is just right!" It is reasonably compact and concealable, yet I could wrap my whole hand

around the grip. It has a 4.25" barrel, the sights are highly visible with a drift-adjustable rear sight and, best of all, the slide can be easily manipulated, even with just one's thumb and forefinger. I liked the ambidextrous safety, although that would probably be of no interest to my right-handed better half. The magazine holds eight rounds, plus one in the chamber. The 1911-380 has the same grip safety and thumb safety as its full-sized counterpart. In addition, it has a magazine safety, which for whatever reason, some people like. The front of the grip, mainspring housing and grip safety "memory bump" are nicely checkered. The pistol comes with just one magazine, although the sturdy hardcase has slots for two.

I ordered a 1911-380 for testing (let's face it, I ordered it because I liked it), and took it up to the NRA Whittington Center in Raton, New Mexico, for Shootists Holiday [see Page 48]. The Whittington Center is a shooter's dream; its motto should be "Seventeen ranges...no waiting!" Just for the hell of it, I tried the 1911-380 from the bench on the Handgun Silhouette Range, at metallic pigs at 50 meters. Not surprisingly, I managed to knock down just one pig (probably by accident) out of nine shots. On a smaller, informal range nearby, I easily shot a number of tight groups offhand at 7-

# Browning Black Label 1911-380

10 yards, a far more realistic venue for this type of gun. The sights are perfect for this kind of shooting, and the trigger pull is in the six-pound range, which I suspect will lighten up with more use. The gun is omnivorous...it happily scarfed up whatever I fed it: Winchester Value Pack 95-gr. FMJs, PMC 90-gr. FMJ, Federal Personal defense Hydra-Shok 90-gr. HPs, Speer Lawman 95-gr. TMJs, Federal Range Target Practice 95-gr. TMJs plus mixed bag of ancient and nondescript .380s. Overall, a very pleasant and enjoyable gun to shoot.

The Browning 1911-380 is a pistol you just can't help but like. For the traditionalist, it com-

bins two of John M. Browning's most lasting designs: the Model 1911 pistol and the .380 ACP cartridge, in a compact and lightweight (17.5 ounces, unloaded) format. The recoil is mercifully light and controllable, and the 4.25" barrel takes much better advantage of the .380 cartridge's potential for accuracy and defensive capability. MSRP is \$699.99, which

of course will vary in the real world. This one is, indeed, a keeper!

# BL 550 Dillon's Basic Loader

**\$259<sup>95</sup>**

**L47-15399**

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount L47-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (Page 15) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (bottom right photo) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

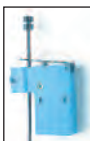

L47-16627, \$82.95

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

L47-20302, \$25.95

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

L47-20251, \$87.95

### OPTIONAL MAGNUM RIFLE POWDER BAR

L47-21353, \$29.95

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

L47-22120, \$30.95

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die:** L47-16629, \$19.95

**Oversize Die:** L47-16626, \$19.95

**Plastic Funnel:** L47-16617, \$5.95

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (Requires the use of an RL 450 powder die – see below.)

L47-20029, \$22.95

**RL 450 Powder Die:**

L47-20308, \$21.95

# RL 550B

**RL 550B DVD**  
**Instruction Manual**  
 L47-19483 \$19.95

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial Period!**

*All for ONLY...*  
**\$439<sup>95\*</sup>**

**L47-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

Total Price as pictured here with optional accessories: **\$737.60**

.45 ACP Die Set	L47-14404	\$64.95
Strong Mount	L47-22051	\$48.95
Alum. Roller Handle	L47-17950	\$45.95
Low Powder Sensor	L47-16306	\$41.95
Aluminum Bullet Tray	L47-22214	\$41.95
RL 550 Toolholder with Wrench Set	L47-11541	\$28.95
Cartridge Case Bin/Bracket	L47-11185	\$24.95

# RL 550B ACCESSORIES

## A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**L47-RL550B CON-**

**VERSION \$45.95** (Exotic calibers, \$55.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **L47-20782, \$76.95 ea.**  
Magnum Rifle Powder Bar **L47-21353, \$29.95 each**  
X-Small Powder Bar **L47-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **L47-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**L47-20064, \$11.35 each**  
**Three or more, \$10.25 ea.**

**X-Large Powder Die, L47-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**L47-13909, \$22.95 each**  
**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**L47-22055, \$20.95 each**  
**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

**L47-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

## H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol L47-14450

Small Pistol L47-14451

4 Sm. tubes **L47-20049 23.95**

## K. 550 SPARE PARTS KIT

- 1 Seating Punch, Small
- 1 #10 Tinnerman Insert
- 1 Primer Cup, Large
- 1 Primer Cup, Small
- 1 Bellcrank Cube
- 3/8" Index Ball
- 550 Brass Tip Set Screw
- 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)
- 1 Seating Punch, Large
- 550 Index Ball Spring
- 2 Pickup Tube, Small, Yellow Tips
- 2 Magazine Orifices, Large
- 1 Toolhead Pin

**K.**  
2 Pickup Tube, Large, Green Tips  
2 Magazine Orifices, Small  
1 550 Primer Cup Spring  
2 Retaining Clips  
2 Dispensing Tip, Large  
2 Dispensing Tip, Small  
1 Failsafe Bushing Rev. B  
**L47-20048, \$18.95**

## L. MACHINE MAINTENANCE KIT

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

**Maint. Kit & RL 550B Spare Parts Kit L47-97016, \$32.95**

## M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

**L47-16306, \$41.95**

## N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550B Cover, **L47-13795, \$23.95**  
(O.) Master lock, **L47-13083, \$3.95**  
Quick-Change Cover (for use with powder measure) **L47-11143, \$14.95**

## P. UNIVERSAL MOUNTING HARDWARE KIT

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

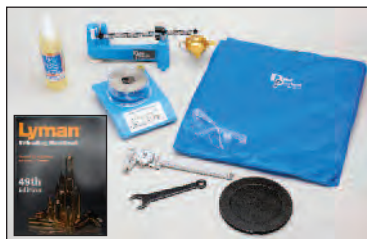

**L47-14355, \$5.49**

# Dillon Reloading Accessories

**Dillon's Reloading Accessory Package Deals** include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

SDB (Balance Beam Scale)	<b>L47-14482</b>	<b>\$182.95</b>
SDB (Electronic Scale)	<b>L47-14483</b>	<b>251.95</b>
RL 550B (Balance Beam Scale)	<b>L47-21143</b>	<b>181.95</b>
RL 550B (Electronic Scale)	<b>L47-22117</b>	<b>250.95</b>
XL 650 (Balance Beam Scale)	<b>L47-21430</b>	<b>197.95</b>
XL 650 (Electronic Scale)	<b>L47-22118</b>	<b>266.95</b>

**Dillon's Toolholders** are available for your RL 550B, XL 650, SL 900, and Square Deal B, and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650/SL 900 with Wrench Set	<b>L47-11555</b>	<b>\$29.95</b>
XL 650/SL 900 w/o Wrench Set	<b>L47-11554</b>	<b>18.95</b>

One-Inch Bench Wrench	<b>L47-10842</b>	<b>7.95</b>
Square-Deal-Only Wrench	<b>L47-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	<b>L47-22051</b>	<b>\$48.95</b>
XL650-only	<b>L47-22052</b>	<b>45.95</b>
Square Deal "B"	<b>L47-22223</b>	<b>64.95</b>

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	<b>L47-22214</b>	<b>\$41.95</b>
RL 1050 Tray Kit	<b>L47-22215</b>	<b>41.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System  
**L47-97126 \$142.95**

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

**L47-16306 \$41.95**

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	<b>L47-17950</b>	<b>\$45.95</b>
Plastic Roller	<b>L47-22183</b>	<b>40.95</b>

**Quick-Change Cover** for use with powder measure. **L47-11143 \$14.95**

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

### RL 450 Upgrade Components

## Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge and Bullet Comparator

(Caliper not included)

### Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy.

Straight L47-14622 \$38.95

Curved (use for auto, lever and pump rifles) L47-14862 \$39.95

Modified Case (required)

\$6.99 each

# Dillon's Case Preparation Equipment

**CV-2001**  
**L47-20493**  
**\$188.95**

**CV-750 L47-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator L47-20675 \$75.95**

**CM-500 Case/Media Separator L47-21045 \$47.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 L47-22047 \$213.95**

**Euro CV-750 L47-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle. **L47-13804** **\$8.95**  
Case (20 pc.) **L47-20255** **135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle **L47-13733** **\$8.95**  
Case (20 pc.) **L47-20256** **135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **L47-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **L47-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **L47-13496** **\$15.95**

This month's cover features Staci with a Taurus 92. To see more photos of Staci and other **Blue Press** cover models, you can "follow" us on **Instagram@bluepress** on your smart phone, or go to **www.instagram.com/bluepress** and click "follow."

## Super 1050/RL 1050 Short Trim Die Toolhead

L47-62219  
\$224.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the 1050 toolhead stand is not included.)

# Dillon's New Rapid Trim 1500 Case Trimmer <sup>23</sup>

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **L47-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **L47-13141**, are **\$19.95** each. Upper lock rings, **L47-13559**, are **\$4.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# Dillon's NEW Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access,

has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

\$59<sup>95</sup>

\$79<sup>95</sup>

## "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

## UM Tactical Universal Sight Mount and Holster System

UM Tactical has created a universal sight mount that will fit all pistols with a 1913 picatinny rail. Although many sight mounts exist; what makes the unit produced by UM Tactical unique, is that it will mount and dismount from your firearm in under 30 seconds with no tools or gunsmithing. Once set up with your favorite scope or red dot sight, the mount and optic can be taken on and off your firearm and still hold the zero. This high quality mount is constructed from CNC machined aluminum and is finished in Mil-Spec Type III anodizing.

UM Tactical's UMH3 Universal Holster attaches to the UM3 sight mount and not your handgun. This unique design is hand made and is constructed of thermoformed plastic (Boltaron).

UM Tactical RH Holster L47-43272 \$64.95  
UM Tactical LH Holster L47-43273 \$64.95

# BLADE-TECH™

## “Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

# Dillon's Pistol Die Sets

## Size Die

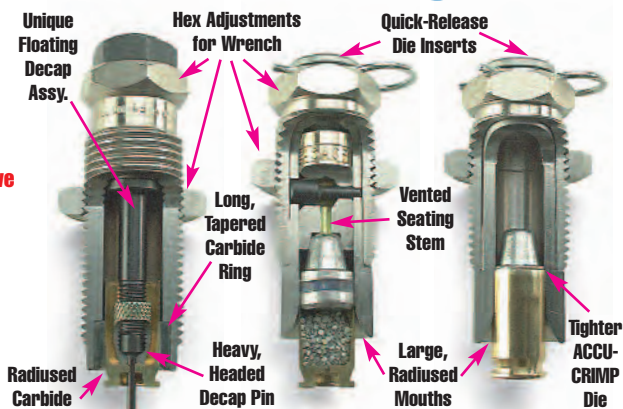

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	L47-10839	\$67.95
.308 Winchester	L47-15574	67.95
.30-06 Springfield	L47-10840	67.95

# Walther .22 X-ESSE IPSC

By Robin Taylor, [www.taylorfreelance.com](http://www.taylorfreelance.com)

"THAT's cool," gushed Ron Elliot, the new head honcho for the speed steel program at Northwest Washington's Custer Sportsmens Club.

I'd brought a Walther .22 X-ESSE IPSC to the range for a little T&E with the steel shooters there, and Ron (among many others) couldn't stop asking me questions about it.

The X-ESSE changes your image of what a .22 "Steel Gun" should be. It's low to the hand, long in the barrel, and rigged to race in ways that most of the other guns on the field just aren't.

Like anyone involved with the Scholastic Pistol Program, as a volunteer coach I've been more-or-less forced to study the various .22 autos on the market, searching for one that will not just run, but race right out of the box.

For us (Team Gotta in Custer, Washington) the Browning Buckmark has become our go-to pistol – followed closely by the Ruger Mark II/III and S&W 22A. Each design (including the Buckmark) has its weaknesses, and none were built for the high-round-count quick-and-dirty action required by speed steel competition.

Every time the buzzer sounds, we shoot five steel plates as fast as we can, ending on a designated stop plate. If your gun jams, too bad. The timer keeps running until you fix the problem and the last target goes "ding!" You'll repeat that

process on different patterns of steel plates until you've shot at least 100 targets. Unreliable guns/ammo have always plagued the game, but when the .22 ammo shortage hit full pitch, teams were winning/losing based on who could find quality ammo. Eventually SPP chief Scott Moore gave up and passed a "Mulligan" rule, giving the rimfire shooters a "do-over" on every course if they needed it.

With that sad situation in mind, my eyes landed on the X-ESSE IPSC at SHOT Show. Here was a .22 rigged to race in rimfire IPSC matches – matches that demand reliability. A 1911-esque extended safety paddle stood boldly out from the left side, rising almost even with the adjustable rear sight. Instead of black-on-black target sights, the X-ESSE sports a 3-dot system, crowned by a variable-width front. (Yes, variable WIDTH.)

Walther's .22 X-ESSE IPSC pistol and the assortment of ammunition the author fed it. "The Bag" of leftover .22 ammo from "who knows where" is at the lower left of the photo. The X-ESSE ate most without choking.

# Breaking Boundaries In Steel <sup>37</sup>

The X-ESSE IPSC's front post is cut like a 30/60/90 triangle. Each "face" is different than its neighbor, with crisp, sharp edges cut from solid steel. Turn the sight, and you change its width.

The whole feel of the X-ESSE is long and lean

up top, short and curvy down below. The narrow 6" barrel underpinned by an adjustable barrel weight offers fantastic control. It hardly moves in recoil – yet the gun's light overall weight lets you drive it target to target easily.

"Man, that's really quick," commented Dan Harris (one of the top SPP athletes in the country), "You could really get used to that."

"It's just solid," added teammate Max Rosser.

This is NOT the gun for every hand. The slide rides so low that the slide will rub fleshy hands raw after a few dozen shots. Depending on what stocks (grips) you have on the gun, and how you grip the pistol, your thumbs may rub the slide. Like all .22s, the X-ESSE has its weaknesses, but its strengths (practical accuracy, control, speed) are bold enough to make a person wonder just how fast you could drive it.

As we shot the gun, our little cabal of steel shooters had to resist the urge to start cutting and wrenching on the gun like crazed racecar mechanics. Could we build a Swenson-style shield plate to keep the hand from touching the slide? What about a fiber optic front sight? The big safety isn't necessary for speed steel, which means standard grips could reduce "slide bite...."

The \$1,100 price tag stopped us just shy of disaster.

## Where Did It Come From?

The pistol itself is made by Hammerli, one of the absolute top-tier manufacturers of Olympic-level target pistols worldwide. Sig-Sauer imported

a basic version called the "Trailside." Walther is importing the "X-ESSE" models. Both use the same 10-round all-polymer mags. Both have a pedigree for accuracy.

This speed-shooting angle, that's new.

## Reliability is Job 1.

"Olympic accuracy" and "absolute reliability" rarely fit in the same sentence. I explained as much to Walther's Janet Raab, who seemed well aware of that concern.

"Just ask for the reliability specification when you order," she said.

I have no idea what "the reliability specification" is – but apparently Walther has different chamber specs depending on what you plan to do with the gun. I dutifully asked for the

"reliability spec" and waited. When the pistol arrived, I started throwing everything I had at it. Reliability spec, eh? We'll see....

Starting at the top of the reliability scale, I loaded hundreds of precious CCI Mini-Mags and took turns blasting them away with Ron and two of my top-scoring team members. Each ripped

through sets of steel targets as fast as they could go. As expected, the CCI Mini-Mags flowed through like water.

As we burned up box after box of ammo, we worked our way down in the expected reliability scale, through CCI Blazer, to milder CCI Standard, into Fiocchi Super Match, and on into the "cheap stuff." American Eagle 40-count boxes started disappearing, as did Federal Bulk Pak (a load some guns flatly refuse to swallow).

Remington Golden Bullet holds a place of

ignominious glory locally, being unreliable in a large number of guns. My Rugers will run it just fine, but the only round good enough to be sold

The X-ESSE IPSC's front sight post is cut like a 30/60/90 triangle. Each "face" is different than its neighbor, with crisp, sharp edges cut from solid steel. Turn the sight, and you change its width.

Over the course of most of a brick of Remington Golden Bullet ammo, the author had a few nose-dives in the plastic mags. They were few and far between, however.

## AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

**AP** Custom USA's Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

## TACCOM, LLC Tactical and Competition Accessories

**T**ACCOM, LLC's Dualload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a BLADETECH Tek-Lok™ Universal Belt Clip (included) that can be attached at various angles. The Dualload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE	L47-19530	\$9.95
4Up w/Tek-Lok™	L47-19531	29.95
6Up w/Tek-Lok™	L47-19532	34.95

**T**ACCOM, LLC's Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holer and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder	L47-19543	\$39.95
8Up Quaload Shotshell Holder	L47-19544	69.95

# CLASSIC FIREARMS: The Ja

By John Marshall

One of the lesser-known firearms used during World War II was the Japanese Type 26 revolver. In spite of being obsolete at that time and officially superseded by semiautomatic pistols, it was still used in considerable numbers during the war. It is seldom seen in America today, and almost never actually fired due to the scarcity of its ammunition. Significantly, this gun borrowed excellent features from a number of other firearms, yet it had a singularly glaring design fault that sometimes made it frustrating and dangerous to its users during combat. Pulling back the obscuring curtains of time and a general lack of detailed information, we'll take a closer look at this unique firearm.

It was named the Type 26, or *26 Nen Shiki Kenju*, by the Japanese because it was first issued in the 26th year of the Meiji emperor. By our calendar, that was in 1893. This was the first indigenous Japanese handgun to be adopted by the Imperial Army. It was developed and exclusively produced at the Koishikawa Arsenal in Tokyo, and this is reflected in the arsenal's emblem on its right side, which represents four stacked cannonballs. Below the emblem on that side are stamped five Japanese characters, which can be translated as "26 year type." Under that, the serial number was sequentially stamped on each gun from the beginning to the end of formal production. Approximately 59,300 were made from 1893 through the early 1930s. Specific yearly production data is no longer available, so it's only through rough interpolation of the serial number that an estimate of a manufacturing year for any specific revolver can be made. For the gun illustrated, an educated guess would be that it was made in the early 1920s.

The Type 26 replaced Japan's aged stock of Smith & Wesson Model 3 revolvers, and the Smith & Wesson heritage is easily seen in its topbreak design. Like the S&W topbreak revolvers, the gun is opened for loading and unloading by lifting the checkered knob above the rear of the cylinder with the thumb, and pulling down on the barrel. Rotating the barrel down causes the central extractor in the 6-round cylinder to rise and then snap back, ejecting any shells or cartridges in the cylinder all at once. Lacking speed loaders in those days, the cylinder could then be loaded one at a time and the barrel/cylinder assembly could then be snapped back into place. This readied the arm for firing.

The cartridge used is the unique Japanese 9x22mmR round. The bullet diameter was actually a bit larger than 9mm and it had an anemic velocity in the 650-700 feet per second range. The slightly bottlenecked case had a rim that was quite thin, and it fit flush with the rear of the cylinder when chambered. The chambers were counter-bored for the cartridge rims very much like the later S&W magnum revolvers. In truth, this cartridge is quite similar to the .38 S&W round used in early S&W top-break revolvers and in the British Webley, Enfield and S&W

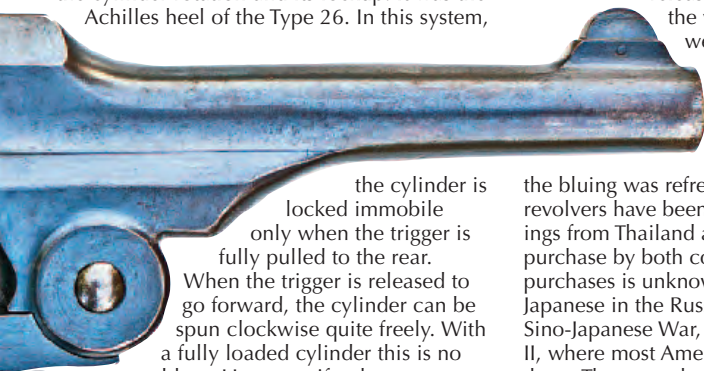

Victory revolvers as made for the United Kingdom during WWII. Some Type 26 revolvers have been encountered that can actually chamber and fire .38 S&W rounds, although this is not recommended for either safety or accuracy.

The Type 26 is double action only, very much like many of the British Webleys and Enfields. The hammer has no cocking spur, but only a knob to give it some inertia. The hammer can't be manually cocked at all. This makes it a bit difficult to fire accurately. Its action is almost identical to the French *Modèle 1892* revolver, which could be fired either single or double action. The Type 26, not needing a single action mechanism, consequently has slightly simpler lockwork. A single leaf mainspring powers the hammer, the pawl, and the trigger with its integral cylinder-locking bolt. A really useful aspect of the gun is that the sideplate on the left of the piece can be hinged back to completely expose the lockwork for cleaning, lubrication or parts replacement. This is accomplished by pushing the checkered rear of the trigger guard forward and rotating it down. Then the forward part of the sideplate can be lifted up and rotated back to the rear of the gun. A fingernail slot in the frame and check-

# Japanese Type 26 Revolver

ering on the bottom of the sideplate at that location makes it a snap to do. This feature (and the same French lockwork) is also used in the Austro-Hungarian Rast & Gasser Model 98 revolver. It's debatable who first came up with the hinged sideplate concept, but the Japanese propensity for copying other designs was well known in the waning years of the 19th Century.

The ball was really dropped when it came to the cylinder rotation and its lockup. It was the Achilles heel of the Type 26. In this system,

the cylinder is locked immobile only when the trigger is fully pulled to the rear. When the trigger is released to go forward, the cylinder can be spun clockwise quite freely. With a fully loaded cylinder this is no problem. However, if only one or a

“bang” in combat could prove fatal. Otherwise, it was a generally satisfactory weapon.

The Type 26 was officially replaced and became a substitute standard when the Nambu Type 14 semiautomatic pistol – an update of previous similar Nambu designs – came into use in 1925. The horribly-conceived Nambu Type 94 was also used by Japanese forces, beginning in 1934. A lot of Type 26s were arsenal reworked and

released back into service through the years. Many of these reworks were done at the Nagoya arsenal and are marked accordingly. When this was done, later-style horizontally grooved wood grips often replaced the previous checkered ones, and

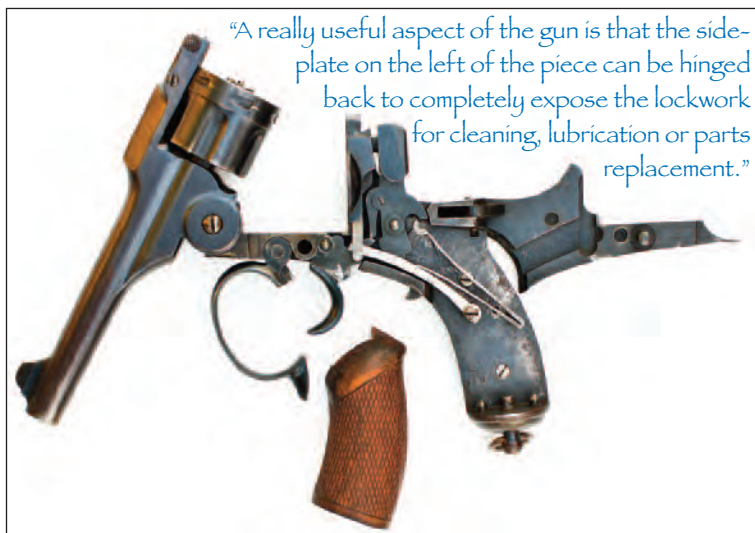

the bluing was refreshed. Some reworked Type 26 revolvers have been encountered that bear markings from Thailand and Siam, indicating official purchase by both countries. The extent of these purchases is unknown. Type 26s were used by the Japanese in the Russo-Japanese War, the Second Sino-Japanese War, World War I, and World War II, where most Americans were first exposed to them. These revolvers were most commonly issued

to cavalymen and non-commissioned officers. They could also be bought privately by officers for service use.

“Clamshell” holsters similar to those used for the Nambu Type 14 were issued for the Type 26. These were similarly made of either leather or rubberized fabric. Most had loops for 18 rounds of ammunition in an internal packet in the holster, as well as a pocket along the forward edge for a cleaning rod.

Although a belt loop was usually provided on the holster, most were carried using a shoulder strap. As original holsters are now rare and becoming expensive, modern reproductions have been made.

The intriguing Japanese Type 26 revolver, a strange conglomeration of borrowed designs, has become a desired collector item today. As more about it becomes known, it has developed into a “must have” classic for any WWII firearms collection.

“A really useful aspect of the gun is that the sideplate on the left of the piece can be hinged back to completely expose the lockwork for cleaning, lubrication or parts replacement.”

few rounds are fired, the cylinder can then be inadvertently rotated through inertia, brushing against something or twisting within its holster. Then it was anybody's guess whether a live round would come under the hammer when the trigger was pulled – or not. The only precaution against this was to fully load the cylinder right after any rounds were fired from the gun. Otherwise, it could be a kind of reverse “Russian roulette” for the user. Experiencing a “click” instead of a

# 46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

L47-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

## SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

L47-21894

\$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

L47-19972

\$39.95

## Stainless Steel Dial Caliper

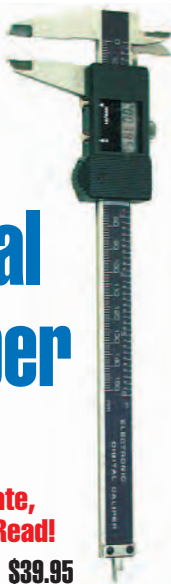

- .100 per revolution.
- Covered track for longer caliper life - keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

Collet Set

L47-17947 5.99

in a "Bucket O Bullets" was the first round to give us trouble.

Over the course of most of a brick, we had a few nose-dives in the plastic mags. They were few and far between, so we moved on down to "the bag."

"The Bag" holds leftovers. Odds-and-ends from who-knows-where, including at least one police seizure, blended with stuff that wouldn't work in a friend's CZ Cadet. It's the island of misfit toys.

The X-ESSE emptied half "The Bag" (200+ rounds) without a hitch.

It wasn't until I sat down a week later to shoot groups that I finally found something the X-ESSE wouldn't eat – Wolf. Although accurate, Wolf 40-grainers wouldn't cycle the action. I don't blame the gun. The lot we were using was noticeably less powerful than every other load we'd tried to date.

### Accuracy On Tap

Shooting from the bench (arms supported, pistol not), the X-ESSE drove home 10-shot 1.5" groups at 15 yards with monotonous regularity using most of the aforementioned loads. The best performer was CCI Standard Pistol, which shot seven of the 10 into one ragged hole. I'm certain my eyes were the limiting factor that day. Six loads in a row shot nearly identical 1.25 to 1.5" circles. None strayed beyond 2 inches, no matter how ugly the ammo.

**This is NOT the gun for every hand. The slide rides so low that the slide will rub fleshy hands raw after a few dozen shots. Depending on what stocks (grips) you have on the gun, and how you grip the pistol, your thumbs may rub the slide.**

I haven't had enough time on the gun to tell you how well the gun will hold up, but our limited experience with this (and a SIG Trailside or two) has us cautiously optimistic.

### A Cheaper Option?

The X-ESSE IPSC has a Euro-cool factor like a BMW sports car. However, an X-ESSE "long" offers most of the features, without some of the challenges of its high-class twin.

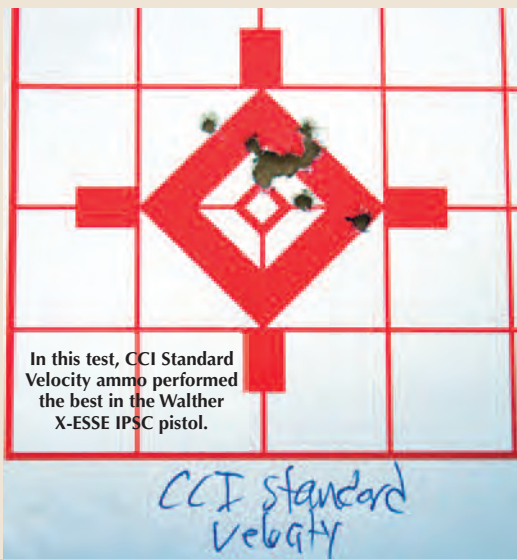

As I said earlier, the fancy safety isn't needed in the U.S., and the cutaway grip (to let your thumb reach the safety) lets the web of a fleshy hand crawl too far up behind the slide. At minimum I'd expect a serious steel shooter to buy a standard left grip panel and carve it to suit.

Similarly, if you're shooting steel, black sights with white dots against a white target with black dots doesn't work well. The gun itself rocks, but not the dots.

Buy what if you didn't have to bother with that?

The X-ESSE "long" or "standard" sells for \$250 less, and may actually be a better place to start. Larry's Guns will sell you an all-wood 1911-grip-angle conversion grip for less than that, leaving money for sights and mags.

The X-ESSE IPSC is a .22 for the discerning shooter – someone who appreciates something different, something special. For the serious racer, there's a lot to like about Walther's warp-speed .22.

**In this test, CCI Standard Velocity ammo performed the best in the Walther X-ESSE IPSC pistol.**

# BACK TO RATON: SHO

A Shootists' 11-year-old grandson shooting the author's Dan Wesson .445 SuperMag.

Sighting-in Range at the NRA Whittington Center.

An Australian Martini Cadet rifle.

The Model 1917 Enfield discarded by Alvin York as "ain't accurate" (just kidding).

## By Peter Caroline

"What did you bring for me to shoot this year?" was the first thing I heard from the 11-year-old grandson of a fellow Shootist only minutes after I arrived at the range at the NRA Whittington Center. The year before, this youngster had surprised me by shooting – not once, but several times – my 12-pound 1886 Bullard .50-95 Winchester Express buffalo gun. Offhand, no less. This year, I figured I'd let him try something a bit more challenging, a custom Dan Wesson .445 SuperMag revolver. Before someone calls Child Protective Services, I have to tell you, this is the shootin'est kid I've ever known. He fired off two cylinders worth of hot-loaded .445, and would have shot more if I'd let him. A couple of days later, I let him shoot my new Inland M1 Carbine. Six steel pigs, at 50 meters distance, went down in six consecutive shots.

Shootists Holiday 2015 marked the 30th anniversary of The Shootists, a group founded by the noted gun writer, John Taffin. It comprises gun people of all descriptions...doctors, lawyers, writers and artists, musicians, clergy, teachers, farmers, ranchers, law enforcement personnel, judges, computer programmers, and those in the firearms industry, to name a few. Membership is by invitation only. In the words of the founders, "We look for people of integrity, who have character and conviction and whose word can be

trusted. Those who would 'stand in the gap' or who could be described as someone you could 'ride the river with.'"

On a number of milestone years, Shootists have been able to purchase specially commissioned firearms to mark the occasion. For this 30th Anniversary, the gun of choice was a custom-crafted Ruger SR1911 with distinctive laser-carved grips and Trijicon® sights. These guns are shooters, not "safe queens," and many were in evidence at the range. I broke mine in with a variety of ammo, including some 1944-vintage GI metal-cased corrosive primer stuff, and got a lecture from the learned Dr. Murbach on the futility of using Hoppe's No. 9 to dissolve corrosive deposits.

Shootists Holiday is the ultimate show & tell event for People of The Gun. An amazing variety of both old and new firearms are on display and in active use. Single actions of every age and description abound, along with modern full-auto and silenced guns and classic military and sporting arms. I spotted a Model 71-84 Mauser rifle and an Australian Martini Cadet rifle on the line, plus any number of museum-quality ivory-handled Colts and Smith & Wessons. On one table was a superbly engraved .470 Nitro Express double rifle with wood that would make the angels weep.

While the Pistol Silhouette Range was our primary gathering place, the Whittington Center

Special Bisley.

does offer a choice of 17 ranges for every shooting discipline on its 33,000 acres. Shooting buddy Bill Berlat and I spent much time at the Sight-in Range, getting our guns to shoot where they were supposed to. I had particularly good luck with the Inland M1 Carbine that, with no adjustment whatsoever, shot to point of aim at 25 and 50 yards. My M1917 rifle, built by Remington in the first week of production, was also surprisingly on target with battle sights. A 1920s-vintage Winchester 52 that I have owned for at least 30 years suddenly developed problems with its windage adjustment, and will have to be looked at by a gunsmith.

At lunchtime, we were left to our own devices, as this year there was no concession stand at the range. Bill and I drove the few short miles back to beautiful downtown Raton, where we found a Chester's Chicken concession at the local Super Save supermarket, along with booths where we could consume our purchases. Wonderful fried chicken, by the way. On the subject of food, Raton and some nearby towns offer an excellent choice of cuisine. Raton's China Garden has a substantial and delectable buffet. For ten bucks, you can eat yourself into a coma. Alfonso's Mexican restaurant is right next to a Conoco station. It looks a bit sketchy from the outside, but the lengua, tripa and chicharron dishes are a gift from the gods. We dis-

covered a truly phenomenal Mexican restaurant, Tequila's, in Trinidad, Colorado, just 20 miles up the road on Route 25. In Cimarron, New Mexico, about 30 miles from Raton, we dined at the St. James Hotel, once a haven for some of the Old West's most notorious bad guys and lawmen. The ribeye steak was excellent and accompanied by fried okra. Good-sized portions, and some day I may learn to go easy on the complimentary chips and salsa before the meal.

As in years past, Bill and I stayed at the Melody Lane motel in Raton. It's a handy and comfortable place to stay, with high-pressure showers, and some rooms even have steam baths, which are a welcome treat. Evenings, we'd sit outside on the lawn and enjoy drinks, cigars and guitar music. As a special courtesy to those Shootists who still have some vestige of hearing left, I did not sing.

Finally, no pilgrimage to the Whittington Center would be complete without a visit to the NRA gift shop. Along with the usual souvenir coffee mugs, clothing and other paraphernalia, this store also has an impressive selection of new and used guns and ammo. I even managed to score a 500-round bulkpack of Remington .22 Thunderbolt ammo for \$29.95 (only one to a customer). Later, at the week's final banquet and raffle, I won a brick of Winchester Dynapoint .22s. My cup runneth over!

EXTRA "BFR" TOOLHEADS L47-19831, \$179.95

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner **L47-10252** **\$24.95**

## Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	L47-14067	\$1.35

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

# BERRY'S

This 1.5" group was fired with the Berry's 115-grain HBRN-TP out of a Glock 17.

## By Duane Thomas

Berry's Bullets produces plated and hard-cast lead pistol bullets. In this article we'll discuss their plated bullet offerings, marketed under the name Preferred Plated Pistol Bullets. The great attraction of plated bullets is they cost less than jacketed, but without all the smoke, potential barrel fouling and airborne heavy metal dust of shooting bare lead. However, as many of you already know, the challenge with plated bullets can be to extract good accuracy. Many people have had so many problems trying to get plated bullets to shoot they've given up on the concept. This is unnecessary, and in a future article I will be discussing how to load plated bullets. But for now, let's discuss one part of the equation: choosing a good bullet. Which brings us to Berry's.

Achieving good accuracy with plated can be made much easier with bullet choice. I've recently been working up some loads in both 9mm and .45 ACP using Berry's projectiles, and I can say from experience, with this brand the potential accuracy is there. One problem with many plated bullets is the thickness of the plating. The thickness of a typical jacketed bullet's jacket is .012"; for a typical plated bullet the plating will go .003"-.004". In other words, a mere 1/4 to 1/3 as thick as a true jacket.

Apply jacketed auto pistol bullet loading procedures, a large part of which is taper crimping the case mouth, to plated bullets and it's quite easy to cut through thin plating with the case mouth where it crimps into the bullet wall. Not only does this deform the bullet and degrade accuracy, it can even cause the portion of the plating behind the "ring" impressed into the bullet to separate in either the chamber or the bore. Not

only does this cause accuracy problems, if it happens in the chamber it can even tie up the gun. I say this as someone who had that happen, back when my plated bullet loading technique was less – ahem! – refined than it is today.

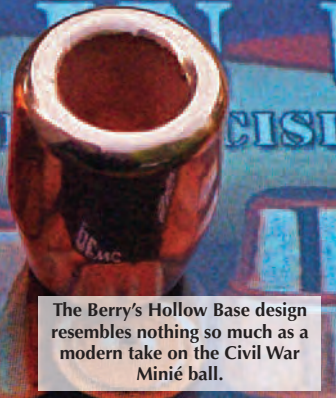

Berry's does make some thin plated bullets, but they also sell what they call Thick Plate bullets, designated with a "TP" suffix to the bullet type abbreviation, where the plating goes .007"-.008" i.e. twice that of a typical plated bullet. This is more critical in higher velocity cartridges like 9mm Parabellum; in lower velocity cartridges like .45 ACP, not so much. In fact, checking out the photos that accompany this article, you will see a nice 0.9" group fired with Berry's 200-grain Hollow Base Flat Point .45 ACP bullets, and that's a thin plated design.

A key to accuracy with any bullet, especially in weights light for the caliber, is increasing the bearing surface, how much of the bullet, as it travels down the bore, actually touches the barrel. The classic solution to this problem is to make the bullet a hollowpoint. For a particular bullet weight, this gives a fatter ogive since so much of the interior area of the bullet is taken up with empty air. Berry's does make hollowpoints, however they

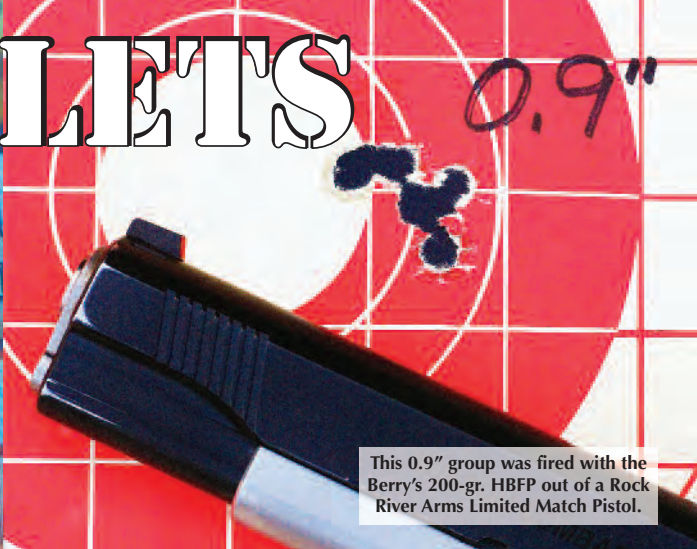

also have a more unusual take on how to deal with this problem, as well, their Hollow Base bullets, designated by an HB in the bullet abbreviation. (Berry's bullets tend to wind up with some long abbreviations, for instance HBRN-TP stands for Hollow Base Round Nose-Thick Plate.) Think in terms of something that looks for all the world like a modern take on the Civil War Minié ball with a deep hollow cavity coming up from the BOTTOM of the bullet and a "skirt" of bullet metal surrounding it. This not only makes the bullet fat-

**THE GREAT

BARE LEAD.**

# BULLETS

The Berry's Hollow Base design resembles nothing so much as a modern take on the Civil War Minié ball.

This 0.9" group was fired with the Berry's 200-gr. HBFP out of a Rock River Arms Limited Match Pistol.

ter thus increasing bearing surface, it also moves the point of greatest weight of the bullet forward, which theoretically at least can increase accuracy.

Firing Berry's bullets in both 9mm Parabellum and .45 ACP, in Glocks and 1911s respectively, gives me accuracy at 50 feet (the maximum distance possible at the indoor range where I do most of my shooting) from the bench of 1.5" to 2" typi-

cally in either caliber, occasionally better. By plated bullet standards, that's pretty darn sweet. I have fired many, many factory loads over the decades that would not group so well. I look forward to shrinking those not exactly huge groups in the future, with more experimentation in powder types and charge weights.

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mouser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag., .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, L47-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

"RL 1050" Bin	L47-13484	6.95	34.92	61.92
"SL 900" Bin	L47-17125	10.50	56.94	106.92

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

L47-15316 \$4.99

# Bore-tips® Bore Cleaning Foam Swabs

**N**o s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

## Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

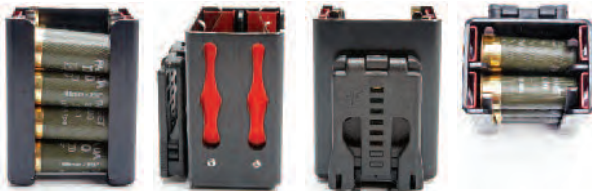

L47-18599 \$14.95

# California Competition Works' Tandem Tactical Stripper

Sorry, Baschieri & Pellagri target slugs not included.

California Competition Works' Tandem Tactical Strippers can be used to hold either shotshells or AR-15/M4/Mini 14 magazines, or a combination of both by installing or removing the aluminum spacers provided with each stripper. The Tandem Tactical Stripper holds a maximum of eight rounds of 12 Gauge (10 rounds of 20 Gauge) shotshells or two AR-15/M4/Mini 14 magazines. Each Tandem Tactical Stripper features a BLADETECH Tek-Lok™ Universal Belt Clip, four removable aluminum spacers, and the screws and Allen wrench required to install them.

# RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

## TARAN TACTICAL INNOVATIONS

The **TTI Magazine Extension** for MagPul AR-15 5.56 PMAGs is constructed of machined aluminum.

L47-15770 \$39.99

The **TTI Benelli Extended AccuGuide Carrier** is the first extended carrier ever manufactured from one solid piece of SAE 304 Stainless Steel, which eliminates the need for welding. It is heat-treated and polished, providing optimal performance. The Carrier features an extended guided rail on each side to assist in centering the round while reloading. It will provide you the speed and comfort of not having your thumb torn up after reloading. Compatible with: Benelli M1/M2/M3/SBE, Versamax.

L47-15769 \$79.99

\$17.95

FOR MAGPUL MAGS ONLY

## MAGPUL QD SLING SWIVEL

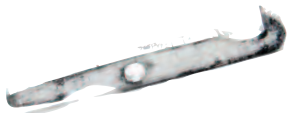

L47-43239  
\$14.95

## TACCOM, LLC .22 Rimfire AR Components

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

L47-19538 \$13.95

The TACCOM **Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

L47-19539 \$10.95

Does your .22 Long Rifle insert

move back and forth in your AR upper? The TACCOM **Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

L47-19533 \$7.95

## M-16/AR-15 BUTTSTOCK CLEANING KIT

In "MIL-SPEC Speak," this is a KIT, CLEANING, BUTT STOCK M16A2 RIFLE, which contains: ROD, CLEANING, SMALL ARMS; M11E3; CASE, SMALL ARMS ACCESSORIES; BRUSH, CLEANING SMALL ARMS; BRUSH, CLEANING SMALL ARMS; BORE; BRUSH, CLEANING SMALL ARMS; CHAMBER; AND BOTTLE ASSEMBLY LSA 5 OZ. It just doesn't get much more MIL-SPEC than that.

L47-15383 \$14.99

Adjustable  
M1/M1A  
Gas Systems

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

## Emergency AR(eparir) Kit

Crucial Parts for Your AR-15

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring.

**L47-19460 \$19.95**

## Tac Latch

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/AR-10 charging handle. It works especially well for "flat-top" rifles equipped with low-mounted optics.

**L47-10379 \$18.95**

## Jerry Miculek AR-15 Compensator

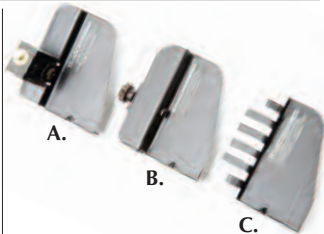

Jerry Miculek's three-chamber AR-15 Compensator fits threaded-barrel rifles and may be "clocked" for left- or right-handed shooters. Used by many top three-gun competitors.

**L47-11328 \$49.95**

## TRUGLO Tactical Sights

AR15  
Tritium/Fiber Optic  
Front Sight

**L47-18626 \$69.95**

TC-Accessories' AR-15/M-16 Brass Deflectors are CMP/NRA approved for service-rifle competition. Now you can pile your spent brass at your feet instead of wasting time hunting it down.

A. Standard AR-15	<b>L47-12541</b>	<b>\$19.95</b>
B. Flat-top	<b>L47-12542</b>	<b>19.95</b>
C. Removable Carry Handle	<b>L47-12543</b>	<b>19.95</b>

## KNS Precision, Inc.

Perma-Pin Firing Pin Retainer for M-16 and AR-15 replaces the standard cotter pin found in the bolt carrier to retain the firing pin (as in original Stoner rifles). Made of tool steel. No modification to gun required.

**L47-19927 \$9.00**

## AccuWedge

The AccuWedge fits between the upper and lower receiver on your AR-15, removing excess movement.

AccuWedge  
**L47-19122 \$4.95**

## AR-15 Extractor Upgrade

The AR-15 Extractor Upgrade increases the tension on the extractor, pushing it deeper into the cartridge extractor groove.

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.  
TRS-25 **L47-11643** **\$89.95**

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **L47-25374** **\$79.99**  
Scout Scope Mount for SKS Rifle **L47-25373** **78.99**

## Tactical Sports 45°-Offset Auxillary Optics Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Auxillary Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)  
45° Offset Optic Mount **L47-14472** **\$14.99**

## Winchester Twist Leg Bi-Pod

Winchester's Twist Leg Bi-Pod is

compact, light-weight, easily attaches to your rifle's sling swivel stud, and features twist lock legs for unshakeable prone and bench shooting. Legs adjust from 7.5" to 11.75" height.

**L47-19671** **\$29.95**

# 1898: GRANDPA DILLON IN THE BOONDOCKS

**Figure 1:** Company "A" of the 1st California Volunteer Infantry, armed with .45-70 Springfield rifles, Manila, Luzon, Philippines. Grandpa Dillon is seventh from the left, back row, with his hat brim upturned. The 1st California's regimental motto was "First to Fight." All-Irish Company A was the "First of the First" to enlist. Dillon was fighting his first war of many. *From Detrick, 1899, Page 42.*

## By Brian Dervin Dillon, Ph.D.

Every American high school kid in 1965 knew the lyrics to the hit song "Down in the Boondocks" by rockabilly singer Billy Joe Royal. It was a ballad about the poor boy from across the tracks in love with the rich girl in the mansion high on the hill. Listeners understood that *boondocks* meant the back of beyond. If you were from the *boondocks*, you were a *Dogpatch Denizen*, a *Hick* from the *Sticks*, and *Lil' Abner* was your most sophisticated neighbor.

That same year, now a half-century ago, shortly after LBJ sent the first Marines to Vietnam, the term took on a different, and more ominous, meaning. *Uncle Sam's Misguided Children* were soon joined by thousands of Regular Army draftees, and before too long both were calling any jungle patrol a *trip to the boondocks*. G.I.s and Jarheads alike laced up their *boondockers* (jungle boots) before squishing through the rotting tropical ooze to do battle with the VC and then, later, the NVA. Some Vietnam Vets know how "boondocks" first entered the American vernacular, but few members of the post-Vietnam generations have a clue about the word's origin. Fewer still are familiar with the historical forces that made it first a common military term, then one familiar throughout the rest of America.

"Boondocks" was the American military garbling of Bontok (sometimes rendered Bon Tok), the name of an isolated Philippine province on Luzon, north of Manila. As early as 1899, American soldiers ordered out to patrol this unsecured, *insurrecto*-infested, jungle area far from the girls and the bright lights of Manila called such "rough duty" *going off to the boondocks*. One of the soldiers slogging through the original boondocks while the bullets were flying was my grandfather. In 1898-1899 he saw action in the first war of what would be many. Indeed, over the next 20 years, Grandpa Dillon would fight on four different continents, in the Infantry, Cavalry and, finally, the Artillery. First enlisting as a private, he rose through the ranks as a

Mustang, eventually becoming a Lieutenant Colonel in WWI France (*Blue Press* No. 255).

The Spanish-American War of 1898 was largely the creation of William Randolph Hearst, the California newspaper mogul transplanted to New York. Hearst's journalistic ranting against Spain was not altruistic, but a calculated means of increasing the circulation of his papers. The war began with the entire country concentrating on Cuba and the Caribbean Basin, but George Dewey's surprise annihilation of the Spanish Asiatic Fleet on May 1, 1898, stunned and delighted the nation. More importantly, it refocused our attention on the Pacific. Most Americans had no idea where the Philippine Islands were and rushed off to the library to find them in world atlases. Hearst's Cuban contretemps was an East Coast effort, but the new campaign against Spain, far across the greatest of the world's oceans, now became California's War. From the earliest planning stages, no assembly and embarkation point other than San Francisco was ever considered. The San Francisco Presidio, already the primary post for the Army's Western Division, became the headquarters for the invasion and occupation of the Philippines. It remained the nerve center for the Pacific military up to World War II.

In the spring of 1898 the Regular Army was but a fraction of what it had been during the Civil War, limited by the government to only 28,000 men. In times of national emergency the tiny Regular Army could be supplemented by volunteer regiments recruited state-by-state and territory-by-territory. On April 22, three days before the formal declaration of war, Congress increased the "regulars" to 67,000 men. President McKinley asked for an additional 125,000 volunteers, and at the height of "war fever" over 300,000 would be in uniform. The great majority never saw action nor even left the United States. Regular and volunteer units were combined into Army Corps, a legacy from the Civil War, and each Corps was assigned to a different area. The Fifth Corps,

including Teddy Roosevelt's "Rough Riders," went to Cuba, while the brand-new (1898) Eighth Corps sailed for the Philippines. General Nelson Miles approved its badge (Figure 5), a simple "Figure 8."

My grandfather (1869-1938) changed his name, "laundering" it through three successive enlistments, a common practice throughout the American military. He was born William Thomas Dervin but had an irreconcilable falling-out with his father. My great-granddad was a crippled Civil War hero who had survived being shot five times on the final day of 1862 at the Battle of

Stones River. The color bearer of the 16th U.S. Infantry, he was a very convenient target for the Rebels. Consequently, great-granddad had a very low tolerance for anything less than rigid devotion to duty. A precursor of the "Hippies" 70 years later, his son, my granddad, first dropped out of college, then left the wife he had been urged not to marry in the first place, then moved to San Francisco. Words had been exchanged between father and son that could never be taken back. Granddad, in good Irish fashion, now assumed his mother's maiden name – rejecting his father's. But, unlike the later Hippies, he came to San Francisco to make war, not love. He was enlisted not as William T. Dervin, but under his first false name, Tom Dillon.

Grandpa Dillon joined all-Irish Company A of the 1st California Infantry, United States Volunteers (Figure 1). Since companies were enlisted on a "first come, first served" basis, Company A, the earliest to be filled, reflected both normal Hibernian bellicosity and the very large number of Irish-Americans resident in San Francisco at the time. The 1st California was directly descended from the old 1st Infantry, California Militia, first organized on May 8, 1861 for Civil War service. The California Volunteers were sworn in on May 6, 1898, and assembled and did their training at the San Francisco Presidio. They were, essentially, the Pacific Coast Infantry equivalent of the better-known First U.S. Volunteer Cavalry back East. But Roosevelt's Rough Riders were in

combat in Cuba for only a few days, while the 1st California fought the Spaniards, and then the Filipinos, for more than a year.

On May 25, 1898, after only 19 days of training, Tom Dillon and the 1st California Volunteer Infantry, almost a thousand men in all, marched down Market Street, cheered on by jubilant San Franciscans. The regiment was led by Colonel James F. Smith, the "good Smith," not to be confused with the "bad" one, Colonel (later Brigadier General) Jacob Smith, the "butcher of Samar," who ordered

the execution of innocent Filipino prisoners, was court-martialed for doing so, and is still universally reviled throughout the Philippines.

Some of the earliest military moving picture footage ever filmed shows the California Volunteers boarding the SS *City of Peking* in San Francisco with all flags flying. Halfway across the Pacific, the 1st California took liberty in Honolulu. They were the first large body of troops to come ashore in the island paradise, and were welcomed with traditional Hawaiian hospitality. Unfortunately, only a few weeks later, the New York Volunteers landed to take Hawaii away from the Hawaiians, in response to what was almost an afterthought by the U.S. Government.

Grandpa Dillon fought in the "Battle of Manila," on August 13, 1898. This was a pre-arranged showpiece staged primarily so that Spanish troops could salvage some small portion of dignity before surrendering to the Americans, who had already promised to keep them safe from the vengeful Fil-

ipinos. Dewey had brought the Filipino Rebel leader Emilio Aguinaldo back from exile in Hong Kong, yet he was given no part in the surrender. Months passed while dilatory Washington politicians debated what to do with the Philippines. The Americans, at first welcomed as liberators, were now being asked pointedly when they intended to leave, and when they intended to give the Philippines back to the Filipinos. The 1st California's chaplain, William D. McKinnon, a San Francisco

**Figure 2: When the Spaniards conquered the Philippines in the 1500s, they noted that there were "more islands there than days in the year." Grandpa Dillon pulled three tours there, his first as an Infantry private (1898-99), his second as a Field Artillery private then buck sergeant (1900-1902), and his third and final one in 1908-1909 as a Coast Artillery sergeant, then First Sergeant designate. Most of his service time was spent on Luzon and Negros Islands. Bontok province (source of the "Boondocks" slang term) was the home of the warlike Igorot. It lay far to the north of the bright lights of Manila. Grandpa Dillon told his four sons that being sent off to "the Boondocks" in 1899 was "rough duty."**

**80** Irish Catholic Priest, counseled patience and restraint. Dillon, at 29 older than most recruits, and certainly better educated, liked the Filipinos. He learned Spanish (his fourth language) to better communicate with them, and attended McKinnon's Masses, where he was urged to get along with his Filipino fellow Catholics.

But things finally came to a head on the night of February 4, 1899, when an incident between an American sentry and two Filipino soldiers on a Manila bridge ignited long-simmering tensions into an all-out shooting war. The Philippine Insurrection, now called by most historians the Philippine War, broke out, and Aguinaldo and his followers, previously our erstwhile allies, now became our bitter enemies. Dillon and the California Volunteers fought in a series of engagements in and around Manila against the *insurrectos*. The First California also provided infantry support for elements of the 6th Artillery (Figure 3). The California Volunteers were the "First of the First of the First" in the Philippines; the first Regiment of the 1st Brigade of the 1st Division. Their motto, not surprisingly, was *First to Fight*. The 1st Brigade was the only all-volunteer brigade fighting in the Philippines; it both took and inflicted more casualties than any other. And Grandpa Dillon's "fighting Irish" Company A, was always in the forefront, for it truly was the "First of the First of the First of the First."

California Volunteer Tom Dillon was issued a .45-70 single-shot, black powder, Springfield rifle. Most volunteers were not happy about this for all had heard the story that one of the reasons why Custer's 7th Cavalry had been wiped out 22 years earlier was because they were shooting up their ammunition so fast in the carbine versions (.45-55) of their same issue rifles that they didn't have time to clean the storage preservative from it properly. The guns jammed and became inoperable. Many of the troopers had been found, scalped, their knives still in hand, killed while trying to pry stuck casings from the chambers of

their carbines. My granddad, seven years old at the time, was profoundly shocked when Custer bit the big one at the Little Bighorn.

There was much resentment over the issue of obsolete .45-70 Springfields to the volunteers while the regulars got brand-new, smokeless powder Krag's. The Allin "trapdoor" Springfields had first been issued to the U.S. Army in 1873. The .45-70 was deadly at close range, but its 500-grain bullet was so heavy and slow that its ballistic signature at long range more closely approximated a mortar shell than a modern rifle bullet. Compared to the .30 caliber Krag-Jorgensens of the regulars or, more importantly, to the Spanish Mausers in the hands of some of the Filipino *insurrectos*, the Springfield was hopelessly outclassed in both range and rate of fire. And, troops on patrol in the hot, humid, Philippine *boondocks* could carry many more .30-40 Krag rounds for the equivalent weight of the much heavier and bulkier .45-70 cartridges; additional rounds which might mean the difference between life and death in a protracted firefight. When Dillon re-enlisted in the Philippines in 1900 as a regular, he was finally issued a Krag. We still have the 100-round .30-40 Mills cartridge belt that accompanied it (Figure 5).

But in 1899, granddad had to lug his ancient Springfield through the *boondocks*. Bontok Province was famous for its fierce Igorot warriors, elusive guerrillas who put punji stakes at the bottom and on the sides of the pits dug alongside the jungle trails the Americans favored. And, when not fighting, grandpa Dillon still had to contend with Bontok mud, bugs, snakes, and malaria. The 1st California Infantry served in the Philippines on both Luzon and Negros until June and July of 1899, when the one-year enlistments of most of its troops were up. No fewer than 86 men of the regiment mustered out in Manila, most to re-enlist in the Regular Army. The rest returned to San Francisco and civilian life. But not Grandpa Dillon, now already on his way to his second war, against the British in South Africa (*Blue Press* No. 263).

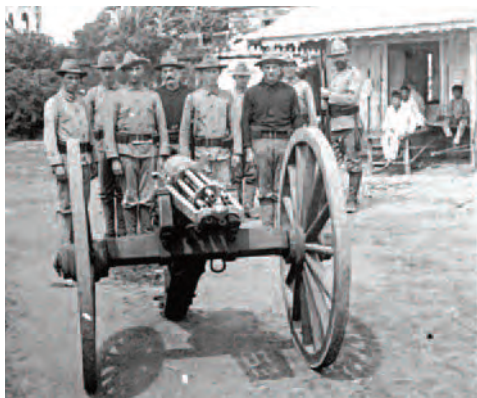

Figure 3 (Left): 6th U.S. Field Artillery .45-70 Gatling gun in action at Pasay, February 5, 1899. Note soldiers at lower left gauging ammunition from large box of loose rounds. Figure 4: .45-70 Gatling gun of the California Heavy Artillery, with friends of W.T. Dillon from this unit posing at rear. This gun was used at the Battle of San Roque on February 9, 1899. Grandpa Dillon's friend and mentor was a Sergeant in the California unit, an Irish deserter from the British Army in Africa. Both had enlisted under false names. He persuaded Dillon to go to South Africa to fight the British after his Philippine service, and then to enlist in the 6th U.S. Field Artillery upon his return.

Both photos from stereo pairs, courtesy of the Dumindin Web Page.

Figure 5: Insignia, decorations, and equipment from William T. Dillon's Philippine service, 1898-1902. Top: Grandpa Dillon's 100-round .30-40 Krag ammo belt, issued in 1900. Far left and right: Dillon's field glasses and case for artillery spotting, 1902. At center are Grandpa Dillon's temporary sergeant's stripes from 1901; the blue background matches the blue shirt regulars had been wearing since the Civil War, and were still wearing in the Philippines. Left of chevrons is the old style field artillery crossed cannons collar badge, circa 1900, right of chevrons is the new style field artillery badge dating to 1901-02, the time of creation of the new, Coast Artillery branch. Medal row, at bottom, left to right: California Volunteer Infantry Medal; Philippine Insurrection Campaign Medal; Philippine Service Cross with 8th Corps Artillery enamel insert; 8th Corps Artillery Enameled medal; Philippine Veteran's Service Cross.

During the most active years of fighting, from 1898 to 1902, more than 70,000 Americans served in the 8th Corps. The shooting continued sporadically in the Philippines until 1913, especially in the Southern, Moslem, islands of the archipelago. There were atrocities on both sides, and the nasty little war on the other side of the globe became the longest in our history, longer even than the "official" span of ground combat years in Vietnam. Grandpa Dillon pulled two more tours in the Philippines. His second was as a private in the Field Artillery, after his return from service with a Boer Commando in South Africa, in 1900. He was just in time to be sent off with his new unit to fight against the Boxers in North China, but that is another story, for a future issue of *The Blue Press*. He had tweaked his name a second time in order to fight against the British in South Africa, enlisting as William Dillon. Then, when he became a U.S. Regular Army Artilleryman, he changed it a third and final time, to William Tarleton Dillon. The Regular Army "Irish Non-Com Mafia" in recognition of his Boer War service, now gave him consideration for time previously served, under a different name. At the end of his second tour in the Boondocks, including short "time outs" for service in both Africa and China, he was made Acting Sergeant (Figure 5). He would now help the new President, Teddy Roosevelt, achieve his dream of creating an entirely new branch of the service, the Coast Artillery, back in California.

Grandpa Dillon's final hitch in the Philippines came in 1908-1909, on detached duty from the 61st Company, Coast Artillery, where he was a First Class Gunner running the largest land-based can-

non (12-inch disappearing guns) in the American arsenal. During this final tour, Sergeant Dillon helped install the big guns on Fortress Corregidor guarding Manila Bay, just as he had helped install similar long-range artillery pieces earlier at the Marin Forts and across the Golden Gate in San Francisco. Then he went back home to California to become First Sergeant of the 61st C.A.C., formed in 1902 out of his old unit, Battery "B" of the 6th Field Artillery. By now the rising star of the U.S. Army was John J. Pershing. President Roosevelt had recognized his talent by promoting him from Captain to Brigadier General, over the heads of more than 800 officers with greater seniority. Pershing would be Grandpa Dillon's commanding officer in the Philippines, at the San Francisco Presidio, on the Mexican Border, and in France.

The Spanish-American War was our very first "World War." Fought on opposite hemispheres, it ushered in our first entry onto the world stage. It led to our acquisition of an "accidental Empire" in the Philippines, and to the new Territory of Hawaii. By doing so, it also made our Pacific WWII participation inevitable 40 years later. By the 1920s, the Filipinos, who for so many years had seemed our most determined and implacable enemies, were now becoming our firm friends and allies. Two decades later, our shared suffering during a completely different Pacific War forged bonds between our two countries and our two people that will never be broken. We were pleased and honored to facilitate Philippine independence on July 4, 1946. Today only dimly remembered are those like Grandpa Dillon who fought America's war in the *Boondocks* more than a century ago.

# 101 Classic Firearms by John Marshall <sup>83</sup>

Dillon Precision announces the release of John Marshall's new book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, a compilation of the author's popular articles appearing in **The Blue Press** since 2007. **101 Classic Firearms** is sure to be a welcome and prized addition to the library of any serious firearms aficionado.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on

some of the world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance

writer whose articles have appeared in **The Blue Press**, **Gun Digest**, **Guns & Ammo's Handguns**, and **American Gunsmith**. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. He is also an endowment member of the National Rifle Association.

**Price: L47-40133 \$29.95, Autographed L47-97130 \$34.95**

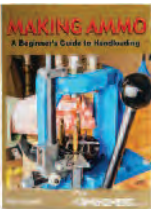

**Competition Reloading with Brian Enos** guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting.

Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

**L47-14341 \$19.95**

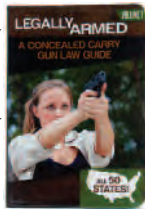

**Making Ammo: A Beginners Guide to Hand-loading** by Kyle Lynch – Ammo shortage? Not anymore! Learn a new hobby that will save you money and ensure that you always have enough of the right ammunition for your shooting needs.

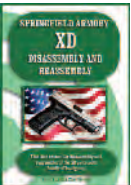

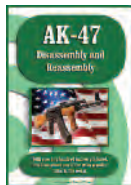

This guide offers you an opportunity for first hand information from an experienced reloader as he takes you through the reloading process. Examples explain what works and what doesn't. If you are new to reloading or want to understand the fundamentals more fully, this guide provides simple step-by-step instructions.

**L47-43270 \$23.95**

**Legally Armed: A Concealed Carry Gun Law Guide** – Learn the basics of concealed carry and the laws associated with this astronomically growing group of self-reliant Americans. If you depend on a handgun for the protection of yourself or your family, arm yourself with knowledge, too. What's inside? What to consider before carrying a firearm • Protecting oneself: discharging a firearm in self-defense • What to do when interacting with Law Enforcement • Gun handling, practice and storage • State-by-state quick reference guide to carry laws where you live and travel.

**L47-43269 \$14.95**

**On-Target Productions, Ltd.** videos are designed to educate enthusiasts about the selection, proper use, cleaning, disassembly/reassembly, and accessorizing of firearms. On-Target Productions' videos are 100 percent digital quality, focused on the details and are entertaining and educational. Every video features clear, close-up photography to enhance the instructional narrative from start to finish.

# Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics. The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll. The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.
