# Dillon's RF 100 Automatic Primer Filler

**Eliminates the need for primer pick-up tubes!**  
**Fills the primer tube while you reload!**  
**Clear polycarbonate shield and protective housing**

Dillon's RF 100 Automatic Primer Filler<sup>^</sup> eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$50.95 each.

**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

# We READ Our Mail!

I have been a customer of yours for a long time; own a Square Deal "B" and an XL 650. I have been loading for a LONG time and have an almost unlimited amount of brass available to me. I have a .308 so have accumulated a LOT of .308 brass, which with steel dies will tire you out after 500-600. I called your Tech Support and talked about the .308 Carbide dies, which are a substantial investment. After some discussion I decided to take the plunge and order them. They arrived today and what a surprise. The amount of force needed to full-length size a .308 using the .308 carbide dies is about that of sizing a .357 Magnum or .38 Special. WHAT A RELIEF! Thanks again to Dillon for an excellent customer service/tech service experience. I've never been given any wrong dope from ANY of your people and I'll continue to be a customer of yours as long as I can load. Thanks Dillon!

Steve Johnson – pixxharley47@hotmail.com

**R**e: *The Blue Press*, Sept 2018 issue with Lena Miculek. Hi, I'm a woman shooter and was delighted to finally see a cover with a person who's the real deal. I liked the "My First GSSF Match" story [by Connie Bowlby], too. I always look forward to my issue of *The Blue Press*. Thanks!

JY – batmite@juno.com

*Thank you, JY! You're right about Lena, she IS the real deal, as are Julie Golob, Kenda Lenseigne, Jessie Harrison and Maggie Reese, who have also graced our cover.*

I want to take time to acknowledge the fast expediting of my part. I spoke to Gary [Kieft, Sales Manager] on the phone. Gary noticed I lived in North Carolina and asked if I was in any danger of hurricane Florence. Great customer service from Gary and Dillon Precision! Thank you!

Waverly Epes – wepes15@yahoo.com

**D**ear Dillon, I wanted to write a note of appreciation for your efforts to make *The Blue Press* the thing of beauty that it is. Much more than just a catalog, it actually allows one to sense the character of the Dillon family and Dillon Precision – thank you for this insight. I am grateful for my sense of kinship with you and all other freedom-loving Americans. May God Bless You.

Highest Regards, Mike Willard

*Words fail me, Mike. Thanks!*

# 6 Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W Long to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550C

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

## Dillon's Basic Loader

**\$287<sup>95</sup>**

**098-15399**

Reloading Dies and Caliber  
Conversions sold separately  
(see the back of the order blank in  
the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount **098-22051 \$50.95**

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.45 each, or \$24.45 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM<sup>^</sup>

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**098-16627, \$89.95**

### PRIMER SYSTEM EARLY WARNING<sup>^</sup>

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**098-20302, \$26.95**

### AUTO POWDER SYSTEM<sup>^</sup>

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**098-20251, \$95.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**098-21353, \$32.95**

### AUTO EJECT SYSTEM<sup>^</sup>

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**098-22120, \$33.95**

### BL 550 POWDER DIE<sup>^</sup>

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: 098-16629, \$19.95**

**Oversize Die: 098-16626, \$20.95**

**Plastic Funnel: 098-16617, \$6.49**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (*Requires the use of an RL 450 powder die – see below.*)

**098-20029, \$23.95**

**RL 450 Powder Die:**

**098-20308, \$22.95**

# RL 550C<sup>^</sup>

## STANDARD FEATURES:

- Made in the USA
- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

# RL 550C ACCESSORIES

## A. RL 550 CALIBER CONVERSION KITS<sup>▲</sup>

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**O98-RL550 CONVERSION \$47.95**  
(Exotic calibers, \$57.95<sup>▲</sup>)

## B. AUTO POWDER MEASURE SYSTEMS<sup>▲</sup>

Additional powder measures stay on the toolhead. Never change powder measurements again! RL 550 Powder Measure **O98-20782, \$84.95 ea.** Magnum Rifle Powder Bar **O98-21353, \$32.95 each** X-Small Powder Bar **O98-20780, \$32.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY<sup>▲</sup>

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

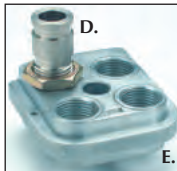

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **O98-22058, \$112.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES<sup>▲</sup>

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**O98-20064, \$12.95 each**  
**Three or more, \$11.95 ea.**

**X-Large Powder Die, O98-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**O98-13909, \$26.45 each**  
**Three or more, \$24.45 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**O98-22055, \$22.95 each**  
**Three or more, \$20.95 ea.**

**G. 1" BENCH WRENCH**  
**O98-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

## H. RL 550 CASEFEEDER UPGRADE<sup>▲</sup>

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol **O98-14450**

Small Pistol **O98-14451**

**\$279.95 (110v US Model)**

Large Pistol **O98-14453**

Small Pistol **O98-14454**

**\$289.95 (220v Euro Model)**

**CASEFEEDER CALIBER CONVERSIONS (Page 17) \$25.95 each**

## I. PRIMER FLIP TRAY

**O98-13606, \$22.95 each**

## Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

|               |                  |                |

| "SDB"         | <b>098-22223</b> | <b>66.95</b>   |

## Dillon's "Belted Magnum" Powder System<sup>^</sup>

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

|                      |                  |                 |

## Hornady's O.A.L. Gauge and Bullet Comparator

### Overall Length Gauge<sup>^</sup>

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy.

Straight 098-14622 \$38.95  
Curved (for auto, lever and pump rifles)

098-14862 \$39.95  
**Modified Case<sup>^</sup> (required)**

# Dillon's Case Preparation Equipment

**CV-2001<sup>^</sup> 098-20493 \$189.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750<sup>^</sup> 098-19455 \$145.95**

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator<sup>^</sup> 098-20675 \$76.95**

**CM-500 Case/Media Separator<sup>^</sup> 098-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers: Case Cleaners are available in 220 volt!

**Euro CV-2001 098-22047 \$214.95**

**Euro CV-750 098-19473 \$170.95**

## Rapid Polish<sup>^</sup>

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle. **O98-13804** **\$8.95**  
Case (20 pc.) **O98-20255** **135.95**

## Case Lube<sup>^</sup>

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

*D.C.L. Dillon Case Lubricant*

8 oz. bottle **O98-13733** **\$11.95**  
Case (20 pc.) **O98-20256** **168.00**

*Half and Half* 10 bottles of polish /10 of lube<sup>^</sup>  
Case (20 pc.) **O98-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **O98-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **O98-13496** **\$15.95**

## Super 1050/RL 1050 Short Trim Die Toolhead ^

**098-62219**  
**\$229.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. *(NOTE: the Blue 1050 toolhead stand – Part Number O98-62200, \$49.95 – is not included.)*

## Lyman Precision Funnel Set

**Lyman's Precision Funnel Set** is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. No more powder clinging to surfaces, which can happen with lightweight plastic funnels. The solid construction and quality of Lyman's Precision Funnel Set will be apparent in its first use. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

**O98-11389 \$39.95**

## Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The **Lyman X-Block** is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

**O98-11390 \$15.95**

# Rapid Trim 1500 Case Trimmer<sup>^</sup> 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **O98-62164** is **\$332.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **O98-13141**, are **\$20.95** each. Upper lock rings, **O98-13559**, are **\$5.99** each.

# MILITARY BRASS?

**Eliminate the "Grunt Work" with Dillon's Super Swage 600<sup>^</sup>**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# by Mitch Rosen!

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products – we're happy to have our name on them.

# Dillon's Concealed Carry Tote<sup>^</sup>

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for

quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle

### Conceal-Carry Performance Series

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

## Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

# 5.11 Tactical® *ALWAYS BE READY* 27

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

## K. MACHINE MAINTENANCE KIT<sup>^</sup>

Everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit.

**Maint. Kit & 1050 Spare Parts Kit**

**O98-97018, \$48.95**

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# Range Bag<sup>^</sup>

Dillon's Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 64). The Main Compartment is 12.5" long x 7" wide x 10" high, the End

Pockets are 8.5" tall x 6.5" wide x 2" deep and the Front Pocket is 9" tall x 6" wide x 2" deep.

|                                  |                  |                |
|----------------------------------|------------------|----------------|

| Pistol Pouch, Black <sup>^</sup> | <b>O98-17027</b> | <b>10.95</b>   |

## 'Border Shift' Ammo Bag<sup>^</sup>

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

**I.D. Card Holder**  
**O98-14575 \$2.95**

**Black Ammo Bag**

**O98-13755**

**\$25.95**

## Dillon's Shooting Mat<sup>^</sup>

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*

**O98-18146 \$65.00**

# Mr. Bulletfeeder<sup>®</sup>

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

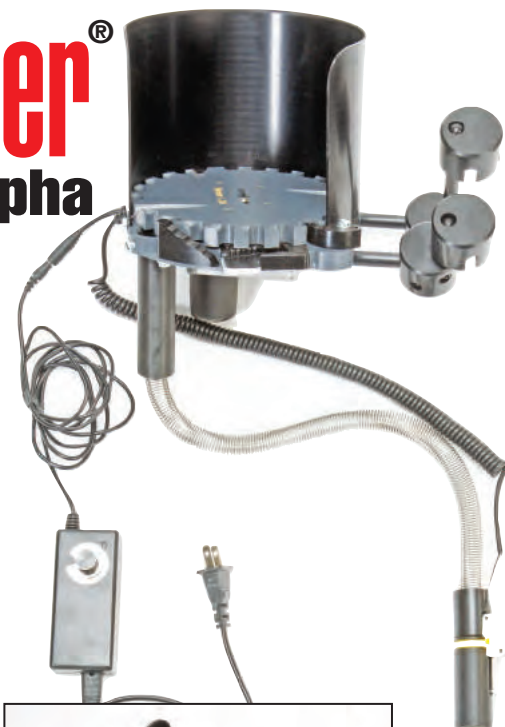

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

## Mr. Bulletfeeder<sup>®</sup> Replacement Parts & Spares

**H**aving separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

**T**he Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collator to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

**L**ose a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

# Dillon's Pistol Die Sets

## Size Die

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### By Doug Larson

Lever-action rifles and carbines have been around for well over 100 years, and some have been chambered in some fairly powerful cartridges. Carrying a rifle or carbine chambered in the same round as the handgun strapped to the hip has always appealed though, so most levers have been lower powered with pistol-caliber cartridges being very popular. For a long time though the only magnum cartridges that were chambered in both a lever-action gun and a handgun were the .357 Magnum and .44 Magnum. But that changed when Big Horn Armory ([bighornarmory.com](http://bighornarmory.com)) introduced the Model 89.

Most anyone who has fired the .500 Smith & Wesson revolver has found it to be less than comfortable to shoot. Recoil is heavy, so heavy that it can injure the shooter as well as the target. While the Model 89 lever action carbine moderates recoil with added weight and a one-inch Pachmayr Decelerator recoil pad, the recoil generated with heavy loads is still substantial and can be uncomfortable, if not bruising. Still, heavy loads in the Model 89 have their place and have taken some large, tough, dangerous game including Kodiak bear, African lion and Cape buffalo.

For the hunter who wants or needs a heavy-hitting load, a lever gun like the Model 89 can be a good choice for several reasons. Generally, ammunition for the .500 S&W Magnum is easier to find than some of the traditional dangerous-game loads for which rifles like single shots, doubles or turn-bolts are chambered. And the Model 89 carries seven rounds in the tubular magazine in addition to one in the chamber for eight rounds on hand. That capacity significantly exceeds the capacity of dangerous-game singles, doubles or turn-bolts. Getting off repeat shots is also very fast, maybe not as fast as the second shot with a double, but then again there are more rounds on

board. And if eight rounds are not enough, a single round can be dropped into the open action and fired rapidly.

There is no doubt that the Model 89 is expensive, but then quality generally is. The gun reviewed here has an 18-inch carbine-length octagonal barrel, but a round barrel is also available as is a 22-inch rifle version. The crown is recessed and the twist rate is 1:24. The buttstock and forend are made of absolutely beautiful fancy walnut with a satin finish. The metal components are stainless steel with a black nitride finish that is evenly applied and which is extremely hard and slick. There are sling swivel attachments both front and rear, and the lever is oversize to accommodate gloved hands. Up front is a white bead sight and the rear is one of the excellent Skinner apertures ([skinersights.com](http://skinersights.com)) that becomes a ghost ring when the screw-in aperture is removed. The MSRP of the test gun is \$3,849.

But you can spend more if you want, and plenty of people save up the dough to get features like a laminate stock, color-case finish, scout-scope mount, red-dot mount and sight, threaded muzzle, or MagnaPorting. Other features are also available. Not everyone can afford one of these beauties, but it's nice to have something to strive for and to know that something like this is available.

The Model 89 is based on the Winchester Model 1892 and 1886 with modifications to strengthen the design and make it work with the .500 S&W Magnum cartridge. Generally the external appearance follows that of the 1886 and the inner workings the 1892. While Big Horn Armory is quiet about exactly what those internal modifications are, in general they include 416 stainless steel for the barrel, salt bath nitride finish for most of the metal parts to increase hardness and lubricity, glass bedding of all wood to metal, a crisp 4-to-5-pound trigger – the test gun meas-

# MONSTER MAGNUM LEVER ACTION

## LOADING DOWN FOR BIG HORN ARMORY'S 500 S&W MAGNUM LEVER GUN

ured just over 3 pounds with a crisp break and no overtravel, and a reverse comb angle to help reduce felt recoil.

If you are reading this, you are most likely a reloader so you have a huge advantage over those shooters who shoot only factory ammunition. You can make reduced-power loads for the .500 S&W Magnum, which make this gun very pleasant to shoot. Use the light loads for practice and plinking and then either load your own high-power loads or buy factory ammunition when you have the need for it.

Since I've got some miles on me and do not appreciate heavy recoil, I worked up – or down as the case may be – some lower-power loads for testing. I got my fill of the factory high-power loads pretty fast, but with some of the lighter loads, the Model 89 was a lot more like shooting a .22 than a .470 Nitro Express. And developing the loads was easy to do, because Big Horn Armory has already done the testing and will provide load data so that you can make light – or heavy – loads yourself.

When developing loads, be careful and follow the recipes. Load five or six cases, then test fire them watching for signs of high pressure. And don't think that light loads mean you can't have high pressure. If you don't follow the published recipes and just use less powder, the powder may detonate instead of burn which could blow up your gun and hurt you badly.

And keep in mind that most published load data for .500 S&W Magnum is for handguns. So when shooting those loads from a carbine or rifle length barrel, velocity and energy are going to be significantly greater. Big Horn did some experimenting and found that with a variety of factory loads, muzzle energy increased an average of 85 percent with an 18-inch barrel compared to a 4-inch handgun barrel.

For comparison, 275-grain Doubletap Barnes XPB Lead Free ([doubletapammo.com](http://doubletapammo.com)) and 300-grain Hornady FTX Flex Tip loads ([hornady.com](http://hornady.com)) were fired. These loads do not generate the greatest recoil, but it is still substantial. Also tested was the 500-grain Hornady FP XTP flat point, which generated very heavy recoil. Feeding with each load was less than optimal, though, and shooting those cartridges was not pleasant.

Using a Dillon RL 550 progressive reloading machine, I developed several light loads. Bullets used were 370- and 440-grain Cast Performance ([grizzlycartridge.com](http://grizzlycartridge.com)) wide flat nosed gas checked, 350-grain Hornady XTP, and 500-grain Hornady JSP/XTP. Two Hodgdon ([hodgdon.com](http://hodgdon.com)) powders, Trail Boss and Titegroup, were used along with Starline ([starlinebrass.com](http://starlinebrass.com)) brass and Winchester Magnum Rifle primers ([winchester.com](http://winchester.com)). I followed the loading data provided by Big Horn Armory and found loads that were very easy on the shoulder and fed well. The loads generating the lowest felt recoil were those using Trail Boss, which is not surprising. In fact, the lightest load was Trail Boss behind the 370-grain Cast Performance WFNGC. That load could be fired all day long.

With Dillon's loading equipment and the right load data, heavy-recoiling rifles or handguns don't have to intimidate those who are adverse to stout recoil. Light loads can make otherwise painful guns pleasant to shoot.

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

O98-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

O98-19972 \$39.95

## Berry's Manufacturing Pan Sifter

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter O98-17519 \$9.99

## Outers 51-Piece Screwdriver Kit

Includes a form-fitted case, a magnetic-tip driver, 15 flat head, 10 inch hex, 9 metric hex, 4 Phillips, 9 Torx, 2 extra long Phillips bits and 1 hex-to-square adapter.

O98-10281 \$19.95

## Dial Caliper<sup>^</sup>

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

O98-13462 \$28.00

# 40 Why I Reload:

By John Bibby

It can be summed up in one word, versatility. Reloading gives the shooter the option to customize. Each aspect of the cartridge can be tailored. One aspect that I adjust is the recoil. Some who shoot certain pistol competitions might call it power factor.

For more than a decade, I've been making reduced-recoil loads for my parents' bedside pistol, a Colt Trooper Mark III with a 4-inch barrel. My father likes full-house loads; but my mother's arthritis no longer allows her to shoot those. Like most folks, they compromise. When he is out hunting, it gets the hard-hitting load with a 125-grain pill traveling at about 1300 fps. When it sits by the bedside, it holds .38 Special loads with a 90-grain bullet at about 1200 fps. A quick double tap will likely stop most robberies even with those light bullets.

As a younger woman, my mother enjoyed shooting full-power 158-grain loads. She was able to handle the recoil and shoot faster and more accurately than most of the men she shot with. I should explain. My father was fairly high up in the prison system and many "company" events centered around a BBQ and a shooting competition. When the new corrections officers came to their

first BBQ, they would enjoy the food and the shooting. Normally they would be broken into four groups and the top two shooters from each group would progress to the next round. My mother got to skip the first bracket. This always made for grouching from the new guys who got eliminated. She normally placed 4th or above out of the winners, so that grouching was pretty short lived. At the next competition, they sat tight-lipped until they too could laugh at the newest guys.

Her days of running the Colt Mark III with fire-spitting loads (158-grain projectiles at 1250-1300 fps) are well past her. She has a pretty good amount of arthritis and has had the bones in one of her thumbs replaced with titanium because of it. She now greatly prefers as little recoil as possible. She still has that .357 as the bedside gun, but runs a much lighter load these days.

The progression has taken a while; but she has gone from the 158-grain hot .357 loads to 90-grain loads on the low end (recoil wise) of .38 Special. She's still quite capable of shooting one round of the hotter load, but her recovery time is measured in minutes and the pain factor is quite high and lasts well into the next day. With the light .38 Special loads, she's able to get off slightly better than one round per second of accurate aimed fire and

# Reason #2145<sup>41</sup>

not have any flinch after two consecutive cylinders. This is a very important consideration as far as follow-up shots, but also for practicing. If you can't fire at least a few dozen rounds per practice session, you really aren't doing much practicing.

Hornady produces a light-bullet/light-recoiling round for .38 Special. This takes the form of a 90-grain FTX bullet in their Critical Defense line. This combination produces 1200 fps and 288 foot pounds of energy at the muzzle. It isn't close to even standard .357 loads in knockdown power; but it is something she can use and train with easily. Not to mention, no one is going to be happy about being hit by it. The bullet is essentially a .380 round going 30-50 percent faster than a .380 ACP.

My goal was to duplicate that load with ball or lead bullets so her practice expenses would be \$0.20 per trigger pull instead of \$1.00+. With some research and fiddling around with a few powders, she now has that load in a polymer-coated lead bullet running over a moderate amount of Titegroup. The chronograph and my not-so-finely tuned hand agree they are within 20 feet per second of each other and generate about the same recoil. More importantly, my mother has been able to shoot 50+ rounds in a practice session with zero pain.

For "on person" carry, the Colt revolver is too heavy and bulky for her, so she carries a "pocket" .380, in the form of a Ruger LCP. This is her primary EDC, while I carry a similar gun as a BUG (back-up gun) or as my primary when societal pressure means I need as close-to-zero chance as possible of someone noticing my carry pistol.

She would like to run the ammunition as hot as it will go; but her arthritis does not allow that. She realizes the .380 is less than optimal, but it's the only gun light enough to carry EVERY DAY. I ran two load tests with her doing the shooting. We kept notes on her perception of recoil, time for the follow up shot and accuracy. Those ladders began at the low end of the curve with Unique and finished out just below max (I don't like compressed pistol loads) on a Hornady 90-grain XTP. Yes, the same bullet used in her Hornady 90-grain .38 Special round.

The short story on the process: after doing the complete ladders, she decided she liked the factory Hornady 90-grain load well enough for social work and she chose a lighter-recoiling lead load for her practice ammo. She did this for two reasons. The first was to avoid having to bother me for self-defense loads, as she does not reload; and secondly, because my parents travel a lot and she didn't want to have to deal with "DA roulette" in gun-unfriendly areas of the country.

The listed velocity in a gun with a 1-inch longer barrel is 900 fps, so I assume she is getting roughly 850 fps from her load. That means her carry gun gives up 375 fps versus her bedside gun and just over 100 foot pounds of energy. But she fulfills the first rule of a gunfight: Have a GUN. We also found a 90-grain lead practice load that reliably cycles on a light load of Unique and gets somewhere around 725 fps with negligible recoil.

In running the .380-load test, I had no pain and no significant time penalty all the way up to max load. Considering the listed velocity for the longer barrel is 985 fps, by dropping the charge a tiny bit, I figure I am getting roughly 920 fps from this load and it is similarly accurate in my gun as the lighter load was in her gun. I practice with the strong load and my actual self-defense loads seem to be low recoil and I have no concern with flinch at all. But that's a large difference between someone who has a confirmed disability from arthritis and someone who is still fully able bodied.

One thing that should be noted in the cost savings between practice ammo and self-defense ammo is in regards to the amount of work associated. For the manufacturing companies, they churn out the practice ammo without much concern for absolute reliability. If one in 200 is a dud, no one is really going to complain. The same thing goes for accuracy effects of slightly different bullet or powder weights.

In self-defense or match-grade ammo, the components are screened more carefully. The process for loading is done with much greater attention to detail. By definition, the extra time and quality control checks add to the cost for the factory ammunition. In reloading, this is built into the process. For example, I run a tighter ship with my match ammo, in that I check powder throw weight on every 10th round instead of at every 100 rounds for plinking ammo. The COAL is checked on every round instead of on every 50th...and the list goes on.

I do not seal primers like some people do for their ammo. I have accidentally run several cartridges through the washer and dryer. After discovering my error, I fired them. They seemed to suffer no ill effect from the process. I do put a light crimp on all my match loads. That is as much to combat recoil setback as it is to weather-proof the case. My hand-rolled match loads cost 60-75 percent less than factory choices. I spend about 25 percent more time making them compared to plinking ammo; but I can customize the product to a specific shooter's needs. And that is one of many reasons I handload.

# CLASSIC FIREARMS: The SIG

## By John Marshall

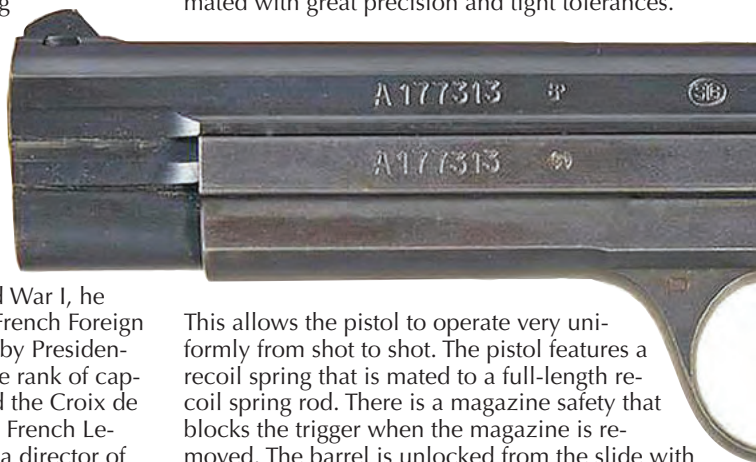

This classic pistol (chambered primarily for the 9x19mm Parabellum cartridge) is often referred to as the Rolls Royce of military pistols. Reliable, accurate and finely machined to exacting tolerances, its standing is solid with those who really know and appreciate fine firearms. You are familiar with the reputation that is held by fine Swiss watches, and that high regard for the watches is mirrored by the appreciation given to this Swiss pistol. The words "impressive quality" certainly apply here. The regard in which this pistol is held is confirmed by the current substantial prices being asked for good examples.

The origin of the pistol goes back to a design by Charles Gabriel Petter (March 26, 1880 – July 7, 1953). He was a Swiss citizen, born in Lavey-Morcles. Petter studied mechanical engineering in Bern, and later was an infantry lieutenant in the Swiss Army. He then became employed by the industrial giant *Friedrich Krupp AG* in Essen, Germany. During World War I, he fought for the French, serving in the French Foreign Legion, obtaining French citizenship by Presidential decree in 1916, and achieving the rank of captain. During the war, he was awarded the Croix de Guerre and became a member of the French Legion of Honor. He subsequently was a director of the French branch of the Belgian company *Armes Automatiques Lewis* and did consulting work for the *Societe de Constructions Alsacienne Mecaniques* (SACM) in Cholet.

Petter's noteworthy firearms design, developed at SACM, was his Model 1935A pistol, which combined elements of Browning's tilting-barrel locking system and Tokarev's TT-33 pistol, which used a removable hammer/sear/mainspring module. In 1937, the Swiss company SIG (*Schweizerische Industrie Gesellschaft*) in Neuhausen Rhinefalls negotiated a license for Petter's design from SACM. They were looking for a more modern gun to potentially replace the Parabellum (Luger) pistols, which had been standard in Switzerland since 1900. SIG made a number of design changes from 1942 through 1944, generating a number of prototypes that were sometimes equipped with high-capacity magazines. However, a decision was made to limit the magazine capacity to eight rounds in order to maintain a slimmer frame. Progress was slow, complicated by World War II, but in October of 1948, the result was the Pistole 49 (for 1949). This final product was then formally adopted by the Swiss military. The Danish Army also accepted it as the Pistol M/1949. The civilian model designation was changed from "SP47/8" (which stood for

the year of design completion and magazine capacity) to P210 in 1957, in accordance with SIG prevailing standards at that time. This model could easily change out from 9x19mm ammo to 7.65mm Parabellum with a barrel swap, or .22 rimfire with a special conversion kit.

The Pistole 49 and the P210 are single-action pistols. They have several interesting features aside from the removable modular fire control system. The slide operates with its sides inside the grip frame, rather than outside it, and rides in long grooves in the grip frame. The slide and frame are mated with great precision and tight tolerances.

This allows the pistol to operate very uniformly from shot to shot. The pistol features a recoil spring that is mated to a full-length recoil spring rod. There is a magazine safety that blocks the trigger when the magazine is removed. The barrel is unlocked from the slide with an integral cam having a kidney-shaped hole, interfacing with the slide-stop pin. SIG designed this to replace the link system that Petter had originally borrowed from the American 1911 pistol. This gives the Swiss pistol a very repeatable and precise lockup. The extractor is spring-loaded, placed on the right side of the slide. Dropping the slide on a chambered round has a lessened chance of damaging the extractor compared to extractors that also act as leaf springs. The thumb-actuated rotating manual safety is mounted at the top edge of the left grip panel, and when engaged, prevents movement of the trigger. The frame is marked in the up position with a white "S" for safe, and in the down position with a red "F" for fire. The pivoting trigger has a two-stage feel that will be familiar to users of the U.S. M1 or M14 rifles. There is a long initial take-up, and the second stage is crisp. The first stage actually moves the hammer a bit to the rear before second stage letoff. Both the slide and frame are precision machined from solid blocks of steel – certainly much more expensive to fabricate, but insuring near-perfect interaction. Barrels have ranged in length from 4.73 to 5.1 inches, depending on the particular version. The long cartridge feed ramp on the barrel is mostly external from the chamber and helps a great deal with reliability and blowout

# SIG P210/Pistole 49 Pistols

protection. There is no 1911-style barrel bushing, but the muzzle opening in the slide is mated with great precision to the barrel, ensuring consistency and optimum accuracy. The firing pin is spring-loaded and is slightly shorter than its channel, similar to the 1911 Browning design. This requires the firing pin to be struck a sharp blow by the hammer in order to fire a cartridge. There is a last-shot hold-open feature in which the magazine follower activates the slide stop. The pistols have a lanyard loop at the lower left rear of the grip frame, and a heel-mounted magazine release.

Swiss Pistole 49 military production pistols have serials from A100001 (September 1949) to A213110 (sometime around 1975 when the P220 double/single-action pistol became standard). The range from A120501 through A213110 reflects the most common and final variation, where there were numerous small changes along the way prior to this number range. Released military pistols are usually stamped with a letter P on the left side of the trigger guard to indicate private ownership was authorized. The pistol illustrated is one of these decommissioned Swiss military pistols. Danish M/49 pistols have separate serial numbers, ranging from 0001 to 16607 HTK, from 16608 to 25513 FKF, and from 35025 to 36441 HTK. Quite a few were imported around 1998 into the U.S. from Hammerli, which had purchased most of the Danish contract pistols when they were released from government service. In addition to Switzerland and

Denmark, the nations of Finland, Kazakhstan, Latvia, Monaco, and West Germany have also used the Pistole 49/P210.

Commercial production of the P210 was suspended for a while beginning in the late 1970s. SIG then started a new production series of the pistol in 1983 and 1984; these newer pistols used CNC-produced parts to lessen the need for hand fitting. Later on a stepped reinforcement rib was implemented behind the slide stop hole to ensure against however unlikely frame cracking. The matching fitted slide stop cannot be used in the older pistols.

In 1997, the firearms division of SIG was, after restructuring, named SIG ARMs Hammerli AG. Following that, in 2000, SIG divested SIG Arms, which moved all production to SIG Sauer GmbH, in Eckenforde, Germany. SIGARMS Inc. began in the U.S. in 1985, and started importation of SIG Sauer firearms. Now stateside production of many of the SIG Sauer parts and guns has become a fact. None of the newer imported or U.S.-produced guns now sport the old SIG oval trademark or designation.

A P210-8 model came about in 2001. It has a button magazine release similar to the 1911 pistol, dispenses with the magazine disconnect safety, has a heavier frame, a wider safety lever and an extended tang. This last feature helped to prevent "hammer bite," which was a problem with some shooters using earlier guns. Many different types of civilian models, including target versions, have become available, with variations way to numerous to be covered here.

Now, the original SIG-produced P210s are history, and their connection with the present-day companies is gone. The days of careful machining and fitting of all-steel components are now ruefully over, replaced today in most firearms companies with CNC or injection molded components and/or easier-to-manufacture and cheaper plastic and stamped metal parts. The classic SIG P210s and Pistole 49s can now only be found on the collector market. If one is willing to pay the tab though, they can still be had, wonderful remnants of long ago and far away in "Quality Land." Some still believe, and justifiably so, that the fabulous older Swiss pistols can never be equaled in quality or status now or in the future.

# 46 SAFARILAND Equipment Locking System

## ELS Quick Attachment Accessory System

Sorry, but the shotshells and magazine pictured do not come with these ELS System components.

# CCW Tactical Shotgun Strippers<sup>47</sup>

**California Competition Works'** Tandem Tactical Strippers can be used to hold either shotshells or AR-15/M4/Mini 14 magazines, or a combination of both by installing or removing the aluminum spacers provided with each stripper. The Tandem Tactical Stripper holds a maximum of eight rounds of 12 Gauge (10 rounds of 20 Gauge) shotshells or two AR-15/M4/Mini 14 magazines. Each Tandem Tactical Stripper features a **BLADETECH Tek-Lok™** Universal Belt Clip, four removable aluminum spacers, and the screws and Allen wrench required to install them.

Tandem Tactical Stripper **O98-00303 \$55.00**

**California Competition Works'** Tactical Strippers are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum\* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84 attachment device (C. & D.) that will accommodate up to a 2-1/4" duty belt.

- A. Six-Shell Tactical Stripper **O98-18606 \$23.95**
- B. Four-Shell Tactical Stripper **O98-18605 \$22.95**
- C. Three-Shell Aluminum Stripper\* **O98-19475 \$34.95**
- D. Six-Shell Covered Tactical Stripper **O98-19225 \$33.95**

\*Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.

The new Super Vel. Hotter. Faster. Better.

The original Super Vel Cartridge Company forever changed "police ammunition" with a new style of bullet, the jacketed hollow point. Now, 40 years later, Super Vel is back!

Advertised velocity figures from Super Vel's website are as follows: .380 ACP 80 Gr. Solid Copper Hollow Point **1,100** fps (Walther PP); 9mm 90 Gr. JHP **1,473** fps (GLOCK 43) to **1,632** fps (GLOCK 17L); .38 Special 90 Gr. JHP **1,318** fps (S&W Model 642) to **1,652** fps (S&W Model 27); and .45 ACP 185 Gr. JHP **1,085** fps (S&W M&P) to **1,127** fps (Springfield 1911).

- .380 ACP "Pocket Rocket" 80 Gr. SCHP (20) **O98-10270 \$24.95**
- 9mm +P 90 Gr. JHP (50) **O98-10023 \$39.95**

# Long Name, Short Gun

## Smith & Wesson Performance Center® SW1911 Pro Series® 9mm

### Reviewed by Peter Caroline

1911s are like potato chips; you can't have just one...or at least I can't. Recently, I realized that I've managed to accumulate twenty-some assorted 1911s, or clones thereof, in calibers ranging from .22LR to .50GI. Each was purchased for a very good reason, or so it seemed at the time. Maybe it's time for me to look elsewhere. No...probably not as long as new 1911 temptations arise.

Conveniently enough, Smith & Wesson is now offering a new compact 3-inch-barrel 1911 version in 9mm Luger. There are, indeed, several other "Officers Model" sized 1911s on the market, but this one has some interesting features...an ambidextrous safety, rounded butt and scandium alloy frame, which cuts the unloaded weight to 26.1 ounces. It is promoted as the "Performance Center® SW1911 Pro Series® 9mm." It does not, however, have the Smith & Wesson Performance Center logo on it, which probably accounts for the \$1,330 MSRP, a more affordable price point than the usual Performance Center offering.

The Pro Series 9mm features a dull black finish with black stippled synthetic grips. The beavertail grip safety has an effective but not intrusive mem-

ory bump, and the mainspring housing is nicely checkered. The sights are very visible 3-dot units, with a windage-adjustable rear and dovetail front. The external extractor is surprisingly large for the 9mm chambering. The only jarring note is the warning "CAUTION - CAPABLE OF FIRING WITH MAGAZINE REMOVED" in bright white lettering on the left side of the frame. Well, thank you for reminding us, Legal Department. Really!

The trigger is the popular 3-hole variety with an overtravel adjustment. Trigger pull is a crisp 4-1/2-lbs. with about a 1/16" of slack. One complaint I've had in the past with Officers Model 1911s is that the shortened grip results in the pointy end of the mainspring housing digging into the palm of my hand. Not so with the rounded butt of the SW1911 offering. It's a nice touch. The thumb safety requires a concerted push to apply, somewhat less to deactivate. This, however, will most likely improve with use. Pushing down the thumb safety results in a loud "clack," which certainly announces your intentions.

Smith & Wesson supplies two 8-round magazines with the Pro Series 9mm. They are reasonably easy to load by hand; I prefer to use my

**"1911s are like  
potato chips;  
you can't  
have just one."**

trusty UpLULA mag loader, Israel's greatest gift to mankind since the Decalog. On several range trips, I brought along a mixed bag of ammo: Aguila 124-grain FMJ, DoubleTap 80-grain Barnes TAC-XP lead-free, BlazerBrass 115-grain FMJ, G2 Research Civic Duty of unspecified weight, Browning BXP Personal Defense 147-grain JHP and some odd NATO VTP/58 FMJ. All fed, fired, extracted and ejected with no fuss or drama. This pistol is a pleasure to shoot. The slide runs back more easily than my other 1911s. I had expected, given the reduced weight, that the recoil might be a bit snappy. Not so; you could fire several hundred rounds in one shooting session with no undue hand fatigue. Although not designed for Bullseye competition, this pistol is quite capable of tight little groups, thanks to its sharply defined sights and low recoil.

While taking down the Pro Series 9mm, I noticed that there was no barrel bushing, despite the fact that a bushing wrench was included in the hard case. Nice gesture, anyway. To disassemble, you go through the usual procedure of removing the magazine, making sure the chamber is empty, moving the slide back until the take-

down notch is aligned with the slide stop, removing the slide stop pin, and then moving the slide forward and off the frame. The full-length guide rod and recoil spring can then be removed, followed by the recoil spring and barrel. Checking out the slide, I noticed that the pistol is equipped with a Series 80 firing pin safety, which comes in handy if you tend to drop your gun on hard surfaces. The included owners' manual is exemplary; it is clearly illustrated, easy to follow and tells you everything you need to know. It is highly advisable to read it, even if an admonition to read it is not printed on the gun.

This is one highly appealing little pistol. It has everything you like about Old Slabsides, in a very compact, comfortable package. It is eminently shootable, and has a bunch of custom features, at a considerably lower price than a name-brand custom. Definitely a winner.

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY<sup>^</sup>

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**098-50050, \$399.95**

### B. 50 BMG CARBIDE SIZE DIE<sup>^</sup>

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**098-50075, \$969.95**

### C. 50 BMG POWDER MEASURE ADAPTER<sup>^</sup>

For use with the RCBS .50 BMG powder measure.

**098-50125, \$77.95**

### EXTRA "BFR" TOOLHEADS

**098-19831, \$189.95**

### D. 50 BMG PRIMER SEATING DIE<sup>^</sup>

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**098-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER<sup>^</sup>

Makes it easy to remove the military crimp.

**098-50001, \$334.95**

### E.(1) PRIMING CONVERSION<sup>^</sup>

Converts Swager to Priming System.

**098-50003, \$79.95**

### F. 50 BMG PRIMING SYSTEM<sup>^</sup>

Allows off-the-machine primer seating.

**098-50002, \$334.95**

### F.(1) SWAGER CONVERSION<sup>^</sup>

Converts Priming System to Swager.

**098-50004, \$79.95**

Dillon's "Plan B" Day Planner<sup>^</sup> holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

## Dillon's Bench Wrench Fits 1" Die Lock Rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to

re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

## Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes unnoticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

O98-19495 \$9.95

## Arredondo Accessories' Multi-Gun Chamber Flags

Made of tough nylon with a melting point of 480 degrees. Kit includes one shotgun chamber flag and one for your AR-15.

O98-15485 \$11.95

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

## California Competition Works<sup>57</sup> .22 LR Speedloader

**C**alifornia Competition Works' 10-Round Speedloader for S&W Model 617 .22 LR Revolvers is ideal for Steel Challenge or Ruger Rimfire Series competition. The speedloaders are machined from 6061 T6 aluminum, then black anodized. The Loading Block (inset photo) is CNC machined from polymer and holds 120 rounds of .22 LR ready for insertion into speedloaders.

# THE 2018 HAND-SIZED

**By Duane Thomas**

I've just returned from shooting the most recent Hand-Sized Handgun Championship at the Renton Fish & Game Club in Washington State. Now in its third year, this is a "combat" pistol match in which the size of the guns used is severely restricted. Allowable barrel length is 3" for a revolver, 3.5" for an autopistol. There's no power factor standard; so-called mousegun cartridges like .380 ACP or even smaller are allowed. I really wanted to shoot this match with a recently purchased GLOCK 42 .380, however ignition reliability issues, with no time left to sort things out before the match, led me to use instead my daily carry gun, a 9mm Wilson EDC X9. This was, of course, not a legal Hand-Sized Handgun since its 4" barrel was one-half inch over the limit.

This match was built around the idea of the 5-shot handgun, so people could fire it with a Smith & Wesson J-frame .38 if they desired. Personally, I'd never want to suffer that much, to fire an entire match with one of those little hand-pounders. But, if you're that into pain, you certainly could, at the Hand-Sized Handgun Championship. Most stages only required five shots; some were 10. This assumed, of course, you hit everything you aimed at, and never took a make-up shot. The absolute highest-round-count stage at the match was 12 shots, but two of those were from a 9mm carbine before switching to a handgun to complete.

If a stage had more than five shots, a mandatory reload was required sometime before stage completion. Under Hand-Sized rules, shooters were only allowed to load six rounds into the

gun to start, with six rounds max in every spare ammunition device (speedloader or magazine). There were nine stages. This was not a high-round-count match: I completed it, myself, having fired 70 shots.

In addition to my EDC X9 having a barrel one-half inch over the match-legal limit, I was also running those evil doublestack high-capacity assault magazines, which I did in fact load with more than six rounds. Of course, since I never actually fired more than six rounds on any target array, that made absolutely no difference to my match performance – it was more a political statement.

Stages at this match were pretty basic: a small number of targets per stage shot at fairly short range. The longest shot was around 10 yards, the shortest about two yards, the vast majority in the five-to-seven yards range, I would say. But there was always something in there to prevent the stages from being just a series of simple standards exercises: you had to engage a swinging target, master hand only; you had to fire head shots; you had hard cover targets where only a small amount of the target counted for score, hits "in the black" didn't count; you had to shoot on a laterally moving target; lots of no-shoot targets partially covering shoot targets; and so forth. This was, after all, a championship. They couldn't make it too easy.

This match was run under the rules of Action Shooting International, in other words, very few rules. Match Director (MD) Rick Breneman said, during the pre-match shooters briefing, "For those of you used to competing in other sports, you'll

# HANDGUN CHAMPIONSHIP

find in ASI we're very gentle on the procedural penalties." ASI is intended to be a low-intimidation-factor feeder system into other shooting sports, like USPSA and IDPA, thus the emphasis is less on hitting people with penalties if they don't do everything just-so, and more on making sure they have a fun time, within the bounds of range safety, of course.

An excellent example of that occurred on the mover stage. In addition to being the MD, Rick Breneman just happened to also be the Safety Officer (SO) for my squad. This particular stage required engaging an array of two targets, best two hits to count (the head box of one target serving as a separate, third target on which only your best one hit counted) with a no-shoot in-between, then it was a short move, say one yard, to step on the activator for a moving target system, which contained a single IDPA target, your best five hits on-target to count, and a mandatory reload performed sometime before stage completion. Obviously, we needed to reload the gun between engaging the first 5-shot target array and activating the mover.

I watched one of my squad-mates shoot this stage; he engaged the 5-shot array, took an extra shot, ran the gun to sidelock, moved to the side...and stepped on the activator with his gun still empty, before reloading. This meant, of course, by the time he had the gun up and reloaded, the mover had completely disappeared; he got off zero shots at it.

In other shooting sports, this would have been a disaster. In IDPA, for instance, he would have had five points (read: seconds) added to his score for

all five hits not on-target. That's 25 seconds. Well, that's a mood-killer. Instead, SO Rick Breneman said, "Well...I think everybody's entitled to one major brain-fade during a match. Set it up again, folks, we're going to give him a reshoot." I've told that story to people used to competing in other shooting sports, their reaction was, "Wow." But that's ASI. They're there to ensure shooters have a good time, not to penalize anyone who makes a rookie mistake.

Of 76 shooters at this match, 63 fired a Hand-Sized handgun. Only a few reprobates like me shot "something else." Therefore our scores didn't count for awards; instead of being put in "Hand-Sized" division, we were listed in "ASI" division. Had my own score counted, I would have been 5th Overall, and 1st in ASI division. Really, I think this match should have an award titled First-Place Guy Whose Score Didn't Actually Count. But strangely, I can find no one else to agree with me on that.

All joking aside, this was a fun match, with basic but interesting stages, run by mellow, laid-back SOs, where the emphasis was on allowing shooters to use guns that are – I don't want to say "less-sophisticated" than at other matches, because the truth is that, say, a GLOCK 26 is actually a pretty sophisticated device – but a very competition-oriented device it's not. The Hand-Sized Handgun Championship allows shooters of varying skill levels to come out and have one whole helluva lot of fun with the sorts of compact handguns most people actually carry.

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mauer; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag, .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, O98-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

| Description         | Stock #   | Each   | 6 ea.   | 12 ea.  |
|---------------------|-----------|--------|---------|---------|
| "Square Deal" Bin   | O98-13756 | \$2.95 | \$15.30 | \$24.84 |
| "RL 550/XL 650" Bin | O98-13839 | 2.95   | 15.30   | 24.84   |
| "RL 1050" Bin       | O98-13484 | 6.95   | 34.92   | 61.92   |
| "SL 900" Bin        | O98-17125 | 10.50  | 56.94   | 106.92  |

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

| Description       | Stock #   | Each   | 5 ea.   |
|-------------------|-----------|--------|---------|
| Small Utility Box | O98-13636 | \$2.65 | \$10.95 |
| Large Utility Box | O98-17195 | 5.75   | 23.95   |

# Swab-its – A Swab for Every Job! <sup>65</sup>

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

# 66 New Products from Slip 2000

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks!

**NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. O98-19237 \$19.95

Slip 2000 Carbon Killer provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

**NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. O98-19234 \$19.95

Slip 2000's Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

O98-11652 \$22.95

Slip 2000's AR Cleaning System contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

O98-11676 \$18.95

## Slip 2000 Extreme Weapons Lubricant (EWL)

was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. O98-11644 \$16.95

## Slip 2000 EWL30

has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. O98-11645 \$19.95

## Slip 2000 Copper Cutter

is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing!

**NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. O98-11646 \$10.95

## Each Slip 2000 Gun Wipe

packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube.

Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack O98-11674 \$11.95

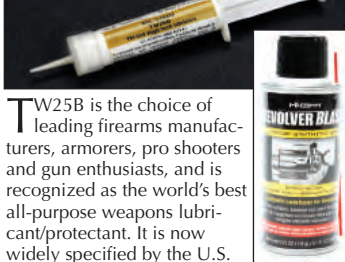

## Lyman Pick & Brush Set

Lyman's Pick & Brush Set is an indispensable item for your cleaning supplies and range bag.

O98-40160 \$3.99

## MIL-COMM Extreme Performance Lubricants

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe O98-15732 \$10.99  
1.5 Ounces O98-15731 14.50

Revolver BLAST with TW25B is an all-synthetic lubricant/protectant specifically designed for revolvers.  
4.2 Oz. Aerosol O98-66677 \$11.95

## E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth O98-18613 \$7.99

**B**rian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).  
Slide-Glide Standard **098-15571** **\$7.95**  
Slide-Glide Lite **098-15572** **7.95**

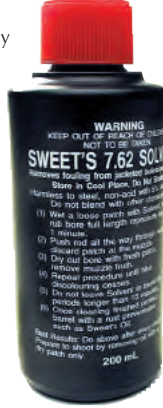

**M**icrolon UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

**098-75125** **\$9.95**

## Sweet's Australian

**S7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

**098-13128**  
**\$12.95**

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# 70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

**E**lite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature

special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

## Taylor Freelance Magazine Extensions

### Taylor Freelance Magazine Extensions

- AR-15/Tavor 9mm SMG +10 **O98-12377 \$39.95**  
 This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many "stock" mag springs. *NOTE: Colt SMG mags come from many different manufacturers. Colt offered at least two major types - one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.*
- CZ Skorpion +10 **O98-12378 \$49.95**  
 • Extra length/strength spring included

- Thumbscrew-and-gasket retention system allows for quick, easy disassembly.
- GLOCK +10 **O98-12379 \$59.95**  
 Transforms Glock 31-round magazines into 41+1 round mags.  
 • Extra length/strength spring included.
- SIG MPX +10 **O98-12376 \$29.95**  
 • Works with stock mag spring.  
 • Angled floor stands the magazine straight up on a table for easier loading.
- SIG P320 +5 **O98-12375 \$39.95**  
 • Extra length/strength spring included.

# 74 "The Perfect Small Parts Cleaning Accessory"

098-10209 \$15.95

The HYSKORE Degreezer consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. As anyone who has cleaned a gun is aware, cleaning small parts is a major challenge. Given the available technology and fixtures, the standard procedure is to use some kind of cup or similar vessel, pour in a quantity of cleaning solvent, and then pick up the parts one by one and brush them clean. The Degreezer changes all of that. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. As a bonus, the set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline. The Degreezer will quickly become an indispensable fixture on your workbench.

## HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

098-10208 \$19.99

## 5.11 Tactical All Hazards Ammo Mule

Sometimes, you just need more ammo. The All Hazards Ammo Mule is light-weight, durable and weather resistant. It features a secure wraparound zipper with a molded pull and measures 10.12" wide x 3.88" deep x 8" high. It'll hold 10 5.56 AR mags or six 25-rd. boxes of shotgun shells.

098-19661 \$27.99

## OPSol Mini-Clip™

Allows the use of 12 Ga. 1.75" Birdshot, Buckshot and Slug shells. Fits 12 Ga. Mossberg 500, 590, 590A1 and Maverick 88 models

The OPSol Mini-Clip™ was designed to give "well seasoned" and "recoil sensitive" shooters the capability of shooting the trusty Mossberg 12 Ga. platform without the usual recoil response. By using The OPSol Mini-Clip™ in conjunction with 1.75" shotgun shells, shooters stay in the game without all of the pain. The Mini-Clip enables owners of Mossberg 12 Ga. shotguns to use Aguila Minishells reliably for training, practice, recreational or home-defense applications.

TRS-25 with riser

**O98-31318 \$119.95**

## Scout Scope Mounts for AK, SKS Rifles

*Sorry, the optic pictured here is NOT included with the Scout Scope Mount.*

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle

**O98-25374 \$79.99**

Scout Scope Mount for SKS Rifle

Grand Power's Q100 is the striker-fired variant of the K100 pistol issued to the Slovakian Army.

# The Grand Power Q100

By Oleg Volk

The Q100 is a striker-fired rotary-breech pistol that evolved from the standard Slovak military service sidearm. The full-size Q100 and its compact Q1S variant are the latest in the handgun family that now numbers a dozen models with a high degree of interchangeability between frames and slides. Designed by Jaroslav Kurachina in the early 1990s and first manufactured in 1996, this pistol has been progressively refined into an extremely reliable, accurate and easy-to-shoot design. Out of 200,000 pistols built, about 15,000 went to America and Canada and are currently sold by Eagle Imports ([eagleimportsinc.com](http://eagleimportsinc.com)).

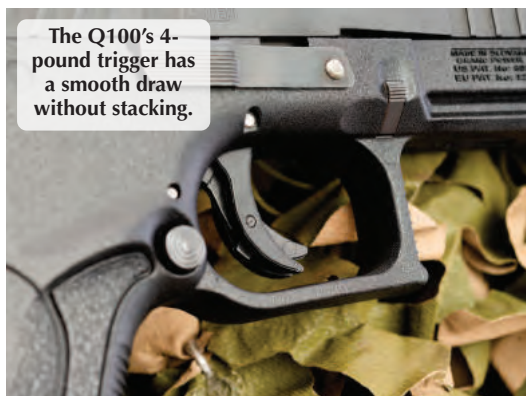

The first Browning patent for a rotary-breech handgun dates back to 1897. The first serious application of similar technology was with the Austrian 1907 Steyr pistol, a clip-fed 8mm army sidearm. Further developed as a 9x23 model 1912, this type of pistol saw extensive use in World War One. The next widely produced rotary action didn't show up until the limited-use 9mm

French MAB15 in the late 1966. While Beretta and SIG-Mauser both came out with rotary breech pistols, they were relatively bulky and expensive, limiting commercial sales. Most recently, the subcompact Boberg XR9S used a rotary barrel with improved geometry, yet still suffered from the bane of rotary actions – the need for extensive lubrication. It wasn't until the 2016 Bond Arms re-design of the XR9S – now Bond Bullpup – with slick barrel metal coating that this issue was fully solved.

Grand Power's K100 was different from the start, with simpler and more compact solution to the barrel and frame interaction. The smoothly contoured track in the outside of the barrel rides on a simple cylindrical pin built right into the steel frame. With the barrel travel prior to unlocking from the slide being 10mm compared to Glock's 3mm, the cycle is slower. The K105 machine pistol has a cyclic rate around 850-900 rounds per minute, again showing a more sedate cycle compared to the 1400-rpm G18. A lot of the recoil

Slide stop lever and magazine release buttons are duplicated on the right for the true ambidextrous experience.

The Q100's 4-pound trigger has a smooth draw without stacking.

The Q100 comes with 3-dot sights, with a fiber optic upgrade available.

energy goes into rotating the barrel. Finally, the barrel doesn't require a feed ramp and may be placed closer to the grip, reducing muzzle flip. As a result, a mid-size Grand Power firing 10mm Auto kicks much less than even a longslide 10mm GLOCK, feeling closer to the rather less powerful 9mm GLOCK 19. The 9x19 K100 and Q100, very similar guns except for the firing mechanisms, feel closer to .22 WMR pistols than to other 9mm designs. Even better, the recoil spring is about 40 percent lighter than with tilt-barrel designs, making administrative handling easier.

This efficient design helps longevity: K100 has been tested beyond 100,000 shots without wearing out. The Q100, dispensing with external manual safety levers but otherwise very similar, should do as well. With barrel and the lock-pin rolling against each other rather than sliding as with most rotary designs, the wear is minimized along with the need for lubrication. The straight-

line kinematics of the action also help accuracy, making even the basic non-specialized carry pistol close to match accurate. The Q100 comes with basic drift-adjustable 3-dot sights, but red or green fiber-optic front sight and rear sights are also available. Replacement rear sights have an undercut rather than convex sight body, providing better contrast. The longslide variant of this action is accurate enough for consistent silhouette hits out to about a hundred yards, the slightly shorter Q100 gives similar confidence level to about seventy five. The usual 7-15 yard courses of fire are ridiculously easy.

The trigger has smooth 4-pound pull that feels like a revolver, with no perceptible stacking. The reset is long, about 75 percent of the overall travel. An ultra-short-reset trigger just got finalized in Slovakia and should soon be available in the US. Unlike the XCalibur longslide that I carry as my daily sidearm, the Q100 is a more mainstream

Simple and elegant, the Q100 rotary action is extremely durable.

**"The accuracy of this pistol is quite remarkable — at 7 yards, any bullet holes that aren't contiguous are definitely the shooter's fault."**

service model. With an un-ventilated slide, it should be more dust-resistant...although my XCalibur has yet to malfunction in 1000 rounds under all kinds of conditions without cleaning. Based more closely on the military model, the Q100 should be equally reliable. The long-cycle duration means that the action unlocked at lower residual pressure, keeping the chamber area clean. Field-stripping is super simple: pull the twin tabs under the front of the trigger guard, pull the slide all the way back and lift its rear end off the frame. The recoil spring stays on the captured articulated recoil rod. Reassembly is as simple.

The pistol is mainstream in specifications: 4.3" barrel and 15+1 capacity are conventional, as is the 26-oz weight. The gripframe is plastic, with swappable backstraps, the receiver is steel. Most of the parts are finished in surface-hardening Tennifer. The articulated sub-trigger and drop safety are present, but no manual levers. Everything is textured but not abrasive, making intensive range sessions a breeze. Thanks to the rotary action, stan-

Easily swappable backstraps allow fitting to individual hands.

dard and +P ammunition produce only minimal recoil and very slight muzzle flip. The pistol will feed and cycle pretty much any bullet profile and weight, but the overall power level has to be at least close to the standard minimum. An 88-grain range load at 1050 fps won't even unlock the slide, while the same bullet at 1450 fps runs great. On the heavy side, 158-grain subsonics shoot reliably and accurately. 124-grain +P JHP of various makes seem to be the ideal combat load for the Q100 — terminally effective but still easy on the hand.

The accuracy of this pistol is quite remarkable — at 7 yards, any bullet holes that aren't contiguous are definitely the shooter's fault. Moreover, since the kick is minimal and the trigger is smooth, flinching is unlikely. Everyone who has tried my GP handguns has remarked on the ease of shooting them. They are ambidextrous out of the box, with slide stop levers and magazine releases duplicated. To my mind, the Q100 is among the best modern designs for both the army sidearm and the personal-protection roles.

**WARNING:** This product can expose you to chemicals, including Formaldehyde, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

**.30-CAL.-SIZE AMMO CANS, 4-PK.**

**098-11349 \$31.95**

**Kershaw Knives** and **Emerson Knives** have joined forces on a series of knives that combine the precision engineering of Kershaw with Emerson's uncompromising functional design.

The CQC-6K features a modified clip-point blade for versatile cutting ability. The blade has two finishes: a satin finish on the upper and a stonewashed finish on the grind. The handle's front scale of textured G-10 offers a secure grip and the handle's stainless steel back has a solid frame lock.

The CQC-6K is a manual opener using either the thumb disk or the patented Emerson "wave shaped feature." This opening feature enables the knife to be opened as it is removed from the pocket. The pocketclip is reversible for left- or right-handed carry.

Blade length: 3.25" Closed: 4.5" Open: 7.75"

**098-31320 \$54.99**

Designed by Belarusian custom knifemaker Dmitry Sinkevich, the new **Kershaw Pub** looks like nothing you've ever seen.

Closed, you'd never know there was a handy blade inside – although you would definitely see the equally handy bottle opener. And if you were exceptionally sharp-eyed, you might notice the slotted screwdriver tip right next to the bottle opener.

To reveal the blade, just push down on what looks like the key ring attachment. You'll see the blade move out of the compact handle. Keep pushing and the blade will swing all the way out, ready for use. The blade is a modified sheep'sfoot with a straight edge and clipped rather than rounded tip. The handle has an anodized aluminum front scale in bright blue and a steel back.

Blade length: 1.6" Closed: 3.1" Open: 4.5"

**098-31323 \$24.95**

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# 84 Wise Company's "Grab & Go" Emergency Food Kits

Wise Company's **18 Wise Favorites 72-Hour Kit** includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.

Wise Company's **60 Serving Gourmet Entrée Only "Grab and Go" Food Kit** includes two servings per day (entrées only) for one adult for one month or four adults for one week. **Product within this Bucket is:** Savory Stroganoff (8 servings), Chili Macaroni (8 servings), Pasta Alfredo (8 servings), Creamy Pasta and Vegetable Rotini (8 servings), Cheesy Lasagna (4 servings), Teriyaki and Rice (8 servings), Creamy Ala King and Rice (8 servings), and Creamy Tomato Basil Soup (8 servings).

Wise Company's **60 Serving Gourmet Freeze Dried Meat "Grab & Go" Food Kit** includes 60 servings of assorted gourmet-seasoned freeze dried meat and a 20-serving bonus of long-term emergency rice, for a total of 80 servings. **Product within this Bucket is:** Roasted Chicken (12 servings), Teriyaki Style Chicken (8 servings), Cheesy Beef (8 servings), Southwest Style Chicken (12 servings), Savory Roasted Ground Beef (12 servings), Stroganoff Style Beef (8 servings), and Long-Term Instant Rice (20 servings).

Wise Company's **120 Serving Breakfast Only "Grab & Go" Food Kit** includes 120 servings of breakfast assortment (no entrées). **Product within this Bucket is:** Apple Cinnamon Cereal (40 Servings), Crunchy Granola (40 Servings), and Brown Sugar and Maple Multi-Grain (40 Servings).

Wise Company's **120 Serving Freeze Dried Vegetable and Sauce "Grab & Go" Food Kit** includes 120 servings of vegetable and sauce assortment. **Product within this Bucket is:** Corn (24 servings), Peas (16 servings), Broccoli (24 servings), Green Beans (24 servings), Butter Sauce (8 servings), Cream Sauce (8 servings), Cheese Sauce (8 servings), and Mushroom Sauce (8 Servings).

Wise Company's **120 Serving Freeze Dried Fruit and Snack "Grab & Go" Food Kit** includes 120 servings of fruit and snack assortment. **Product within this Bucket is:** Bananas (16 servings), Strawberries (16 servings), Peaches (16 servings), Apples (16 servings), Caramel Sauce (16 servings), Yogurt (16 servings), and Pudding (16 Servings).

## Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.
