# RUGER® COMPACT HANDGUNS

Ruger offers lightweight, compact handguns for every personal protection need.

## 380 AUTO LCP II

The LCP® II features a short, crisp trigger pull with single-action feel, inner trigger safety, improved sights, a larger grip surface and an easy-to-rack slide with an improved slide stop mechanism with a last round hold-open.

## 9MM LUGER LC9s

Chambered in 9mm Luger and sized just slightly larger than the LCP®, the LC9s® is compact, powerful and features a short, light, crisp trigger pull for faster shooting and improved accuracy.

## 380 AUTO LC380

The LC380® provides 7+1 rounds of effective .380 Auto personal protection. Slim and lightweight for easy concealment, the LC380® combines reduced recoil with modern safety features in an easy-to-rack design.

## 22 LR, 22 WMR, 38 SPL +P, 9MM LUGER, 327 FED MAG, 357 MAG LCR

Now available in six calibers, there is a lightweight, reliable and easy-to-shoot LCR® for every need – from personal protection to low-cost practice at the range.

# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$50.95 each.

## We READ Our Mail!

I know you must get many emails such as these about your high standards of service. I very much appreciate a company in this day and age that still keeps this type of integrity in their product. Every time I called about a broken part on my XL 650, there was never a sputter about replacing it. Thank you and your staff! I have loaded close to a half-million rounds on my two 650s in the past five years. I've broken a few major parts due to a maladjustment of a die (link arm) then a (crank). Both were replaced very promptly. I greatly enjoy my presses – they are a joy to use.

Robert Stewart

I have two of your loaders, both are over 22 years old. I enjoy reloading as much as shooting. Thank you for a great product and I enjoy your stories in *The Blue Press*. I'm 84 years old and retired after 34 years in law enforcement.

Louis B. Covill – Chicopee, MA

Upon calling your tech support, I immediately confessed to an inexcusable bone-head move that damaged my Dillon powder measure assembly. I received from your tech an RMA number and assurances that Dillon would attempt to repair the powder measure. Within a few days I received the attached "sales order" and a brand new powder measure at no charge. I was amazed and pleased, of course, but have felt entirely undeserving ever since. If this was an error, please send an invoice.

John M. Draper – Littleton, CO

*That was no error – it's the way the Dillon "No B.S. Warranty" is supposed to work. And, as far as bone-head moves go, none of us are immune. See below.*

You might want to remind John Marshall that S&W's Springfield plant is in Massachusetts not Connecticut!

John Stasnek – A *Blue Press* reader and gun enthusiast in exile in Philadelphia. LOL. *You'd think that between John Marshall and I – who both went to grade school when they actually TAUGHT geography – one of us would have caught that mistake. I think what we have here is the perfect example of a compound brainfart.*

**Dillon Precision Products, Inc. now offers a smartphone app for both Apple and Android phone systems. Search for "Dillon Precision" at either the iPhone App Store or Google play.**

# 6 Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550C

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- *Protection Rating NRR 21*
- *External battery compartment*
- *Auto shut off extends battery life*
- *Extra-deep, replaceable ear pads*
- *Separate volume controls for each ear*
- *TRUE stereophonic sound*
- *Collapsible for ease of storage*
- *One-year warranty on electronics*

**D**illon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

- O28-20778, \$22.95**

### DON'T FORGET ONE OF THESE!

Universal Mounting Hardware Kit

**O28-14355 \$5.49**

# Make the 1

## By Oleg Volk

Almost nothing makes better converts for the right to keep and bear arms than time at the range – unless that first experience is bad. Most of us are willing to take on novice shooters. How many have a coherent plan for making the most of the opportunity to impress new participants favorably? Shooting a gun is simple, but it does involve more dexterity and simultaneous actions than we perceive, having got used to the experience through repetition. Think of riding a bicycle, intuitive but often not to the beginner. I'd like to summarize my teaching experiences into guidelines that would help you make the best of the next occasion to add another marksman to our ranks.

Explain the reasons for gun ownership before you get to the range. The main two are fun and utility. Promise to show the fun side. Also, before the actual range trip, go over the four safe handling rules and insist on the trainee being able to explain them back to you and to demonstrate them. A stock without an action in it, an inert gun or an airsoft clone would be suitable for this stage. Next, explain

# First Range Trip a Good One <sup>11</sup>

the specific firearms you plan for them to use. Pick the simplest actions you have available to illustrate how guns work, such as bolt, break-open, falling or rolling block. Again, while a basic semiauto pistol or rifle might seem simple enough to you and me, they can add an intimidating level of complexity to the new shooter. At this point, I generally use a lightweight single-shot .22 rifle because almost everyone can physically handle them. Manual actions also work fine with standard and subsonic velocity ammunition, reducing the distracting blast. If you have a sound suppressor available, use it to minimize the muzzle signature and to introduce the learner to its utility. Verify which eye and hand are dominant for your trainee. If the person is cross-eye dominant, consider using a red-dot sight to simplify the aiming experience. While iron sights are basic, remember that the goal of the first range trip is to make the person eager to return. Competency with a variety of sights and actions can be achieved later. If your shooter has poor eyesight and has problems with irons or red dots, look into unmagnified prismatic scopes.

For the first range trip, it's paramount to ensure maximum safety and comfort. Have properly sized eye and ear protection ready. If possible, use a private range such as a farm or public land to avoid the distraction of other people's reports. If that isn't possible, try to time the range visit for off-peak hours, and station yourself away from other visitors with particularly loud guns. Using plugs and muffs combined is reasonable. If shooting outdoors, remember water, insect repellent when in season, and consider bringing a pop-up tent or shoot from existing shade. There's no benefit to hosting a range day that your guest remembers mainly for the dehydration, sunburn or bug bites!

A good rifle will group under an inch at a hundred yards from a rest. A good shooter can group under an inch at 25 yards standing. A new shooter however, might miss a doorway from three feet away through the combination of nervousness, ignorance of sighting or lack of coordination. The ideal target for the first shot is large and close in. For example, a sheet of printer paper taped or stapled to a 4'x6' cardboard backer gives both a clear aiming area and a diagnostic background to spot misses. A forend-mounted laser aimed far below the shooter's sight picture can help the instructor identify flinching or other technique problems without intruding on the consciousness of the trainee. Three feet for a pistol and five feet for a long gun are perfectly reasonable starting ranges. If a hit is achieved, praise the competency and move the target a couple of feet back. Repeat

the process until the shooter begins to miss, then save the original target as a memento and replace it with a fresh sheet of paper. Starting up close almost guarantees some centered hits, so the memento will look impressive when pasted up at home. Take pictures of your students with the target and the gun for them to share.

When coaching about the second target, try to use supported positions, such as sitting at a bench or leaning with elbows on a bench. This is where consistent sight picture, breath and trigger control are explained but not stressed to the detriment of the enjoyment of plinking. This entire stage takes no more than 50 rounds. A featureless sheet of paper makes learning front sight focus easier than starting with a detailed target competing for the focus. Range rules permitting, use reactive targets next. Steel, if far enough away, gives the certain confirmation of impact, as do sporting clays. The pass-fail nature of those targets reinforces successes as every hit, no matter how peripheral, counts. Provide praise and other positive reinforcements.

If – and only if – your friend is very comfortable with the basics, bring out other guns to try. I would recommend keeping it to rimfire and pistol calibers, as unsuppressed rifles can be intimidating the first time. I have seen first-time shooters enjoy very large bore weapons competently, but they were not typical. Since perfect technique cannot be expected on the first range trip, using low-recoil arms also guarantees lack of bruising. Especially with rimfire autoloaders, try to use the best ammunition available to reduce the likelihood misfeeds, jams or misfires. Inexperienced shooters tend to find malfunctions intimidating. Explain ahead of time how to handle them, but try to keep a very close watch on the process just in case.

When taking kids to the range, it's best to have their parents along and hovering in the background. That way, you can teach one kid at a time and not have the siblings wander off or get bored. Be very aware of the reduced strength and reach compared to adults – most firearms would have to be used from a rest, a sandbag or a bipod. That teaches only a small subset of proper stances and holds, but does allow learning proper sighting and trigger control without the distracting wobble or muscle fatigue. Again, you aren't training troops for the battle due later the same day. The goal is to make the range trip fun and memorable, and to share the joy of shooting. We can all crawl through thorns and red ants to make that one sniper shot on the enemy commander another day. The first range trip is for making future allies in the common cause.

# BL 550 Dillon's Basic Loader

**\$287<sup>95</sup>**

**028-15399**

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount **028-22051**  
\$50.95

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (Page 15) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.45 each, or \$24.45 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (bottom right photo) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM

#### Includes:

- Primer Housing /Shield
- Primer Slides, Large/Small
- Pickup Tubes, Large/Small
- Pickup Tube Tips, Large/Small
- Magazine Tubes, Large/Small
- Mag. Orifices, Large/Small
- Operating Rod
- Primer Track Bearing
- Housing Screws
- Ret. Spring Retaining Pin

**028-16627, \$89.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**028-20302, \$26.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**028-20251, \$95.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**028-21353, \$32.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**028-22120, \$33.95**

### BL 550 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: 028-16629, \$19.95**

**Upsize Die: 028-16626, \$20.95**

**Plastic Funnel: 028-16617, \$6.49**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.)

**028-20029, \$23.95**

**RL 450 Powder Die:**

**028-20308, \$22.95**

# RL 550C

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

*All for ONLY...*  
**\$479<sup>95\*</sup>**

**028-14261**

Reloading dies sold separately.  
 \*Prices vary on exotic-caliber machines.

# RL 550C ACCESSORIES

**A. RL 550 CALIBER CONVERSION KITS**  
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**O28-RL550 CONVERSION \$47.95** (Exotic calibers, \$57.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!  
 RL 550 Powder Measure **O28-20782, \$84.95 ea.**  
 Magnum Rifle Powder Bar **O28-21353, \$32.95 each**  
 X-Small Powder Bar **O28-20780, \$32.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

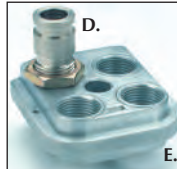

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **O28-22058, \$112.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**O28-20064, \$12.95 each**  
**Three or more, \$11.95 ea.**

**X-Large Powder Die, O28-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**O28-13909, \$26.45 each**  
**Three or more, \$24.45 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**O28-22055, \$22.95 each**  
**Three or more, \$20.95 ea.**

**G. 1" BENCH WRENCH**  
**O28-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

## H. RL 550 CASEFEEDER UPGRADE

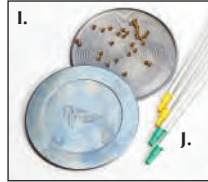

Available for most pistol cartridges – will not work with rifle cartridges.  
 Large Pistol O28-14450  
 Small Pistol O28-14451

**\$279.95 (110v US Model)**

Large Pistol O28-14453  
 Small Pistol O28-14454

**\$289.95 (220v Euro Model)**

**CASEFEEDER CALIBER CONVERSIONS (Page 17) \$25.95 each**

## I. PRIMER FLIP TRAY

**O28-13606, \$22.95 each**

## J. PRIMER PICKUP TUBES

1 Lg. tube	O28-22029	\$7.99
1 Sm. tube	O28-22028	7.99
2 Sm., 2 Lg.	O28-20056	25.95

4 Sm. tubes	O28-20049	25.95

## K. 550 SPARE PARTS KIT

- 1 Seating Punch, Small
- 1 #10 Tinnerman Insert
- 1 Primer Cup, Large
- 1 Primer Cup, Small
- 1 Bellcrank Cube
- 1 3/8" Index Ball
- 1 550 Brass Tip Set Screw
- 1 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 1 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)
- 1 Seating Punch, Large
- 1 550 Index Ball Spring
- 2 Pickup Tube, Small, Yellow Tips
- 2 Magazine Orifices, Large
- 1 Toolhead Pin

- 2 Pickup Tube, Large, Green Tips
- 2 Magazine Orifices, Small
- 1 550 Primer Cup Spring
- 2 Retaining Clips
- 2 Dispensing Tip, Large
- 2 Dispensing Tip, Small
- 1 Failsafe Bushing Rev. B

**O28-20048, \$19.95**

## L. MACHINE MAINTENANCE KIT

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

**Maint. Kit & Spare Parts Kit O28-97016, \$33.95**

## M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

**O28-16306, \$42.95**

## N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550 Cover, **O28-13795, \$23.95**

(O.) Master lock, **O28-13083, \$3.95**

Quick-Change Cover (for use with powder measure) **O28-11143, \$14.95**

## P. UNIVERSAL MOUNTING HARDWARE KIT

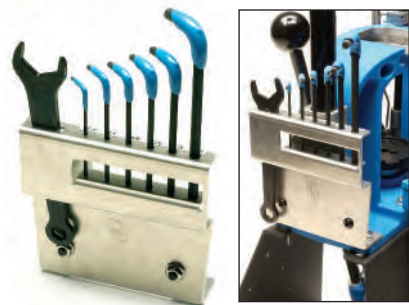

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

**O28-14355, \$5.49**

# 16 Dillon Reloading Accessories

**Dillon's Reloading Accessory Package Deals** include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

SDB (Balance Beam Scale)	<b>O28-14482</b>	<b>\$192.95</b>
SDB (Electronic Scale)	<b>O28-14483</b>	<b>251.95</b>
RL 550 (Balance Beam Scale)	<b>O28-21143</b>	<b>191.95</b>
RL 550 (Electronic Scale)	<b>O28-22117</b>	<b>250.95</b>
XL 650 (Balance Beam Scale)	<b>O28-21430</b>	<b>207.95</b>
XL 650 (Electronic Scale)	<b>O28-22118</b>	<b>266.95</b>

**Dillon's Toolholders** are available for your RL 550, XL 650, SL 900, and Square Deal B, and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650 with Wrench Set	<b>O28-11555</b>	<b>\$30.95</b>
XL 650 w/o Wrench Set	<b>O28-11554</b>	<b>19.95</b>

One-Inch Bench Wrench	<b>O28-10842</b>	<b>7.95</b>
Square-Deal-Only Wrench	<b>O28-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	<b>O28-22051</b>	<b>\$50.95</b>
XL 650-only	<b>O28-22052</b>	<b>47.95</b>
"SDB"	<b>O28-22223</b>	<b>66.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>O28-97126</b>	<b>\$154.95</b>
----------------------	------------------	-----------------

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	<b>O28-17950</b>	<b>\$47.95</b>
------------------------	------------------	----------------

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>O28-22214</b>	<b>\$44.95</b>
1050 Tray Kit	<b>O28-22215</b>	<b>44.95</b>

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Low Powder Sensor	<b>O28-16306</b>	<b>\$42.95</b>
-------------------	------------------	----------------

Quick-Change Cover for use with powder measure.	<b>O28-11143</b>	<b>\$14.95</b>
---	------------------	----------------

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550!

# Dillon's Case Preparation Equipment

**CV-2001 028-20493 \$189.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750 028-19455 \$145.95**

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator 028-20675 \$76.95**

**CM-500 Case/Media Separator 028-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 028-22047 \$214.95**

**Euro CV-750 028-19473 \$170.95**

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners now have a **Five-Year Warranty** on the electric motor.

## Rapid Polish

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle. **O28-13804** **\$8.95**  
Case (20 pc.) **O28-20255** **135.95**

## Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

*D.C.L. Dillon Case Lubricant*

8 oz. bottle **O28-13733** **\$8.95**  
Case (20 pc.) **O28-20256** **135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **O28-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **O28-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **O28-13496** **\$15.95**

## Super 1050/RL 1050 Short Trim Die Toolhead

**O28-62219**  
**\$229.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. *(NOTE: the Blue 1050 toolhead stand – Part Number O28-62200, \$49.95 – is not included.)*

We're  
Glad to  
See

You're

# Dillon's New Rapid Trim 1500 Case Trimmer

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **O28-62164** is **\$332.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **O28-13141**, are **\$20.95** each. Upper lock rings, **O28-13559**, are **\$5.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# 26 Dillon's Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle

### Conceal-Carry Performance Series

## Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

- 1911 Holster **028-19947 \$139.95**

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original. This belt is a favorite with law enforcement, military personnel, fire-

fighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

# 32 Range Bag

Dillon's Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 64). The Main Compartment is 12.5" long x 7" wide x 10" high, the End

Pockets are 8.5" tall x 6.5" wide x 2" deep and the Front Pocket is 9" tall x 6" wide x 2" deep.

Range Bag, Black	<b>O28-19366</b>	<b>\$89.95</b>
Pistol Pouch, Black	<b>O28-17027</b>	<b>10.95</b>

## 'Border Shift' Ammo Bag

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

**I.D. Card Holder**  
**O28-14575 \$2.95**

**Black Ammo Bag** **O28-13755** **\$25.95**

## Dillon's Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*

**O28-18146 \$65.00**

# ANNOUNCING: Mr. Bulletfeeder® by Double-Alpha

**M**r. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

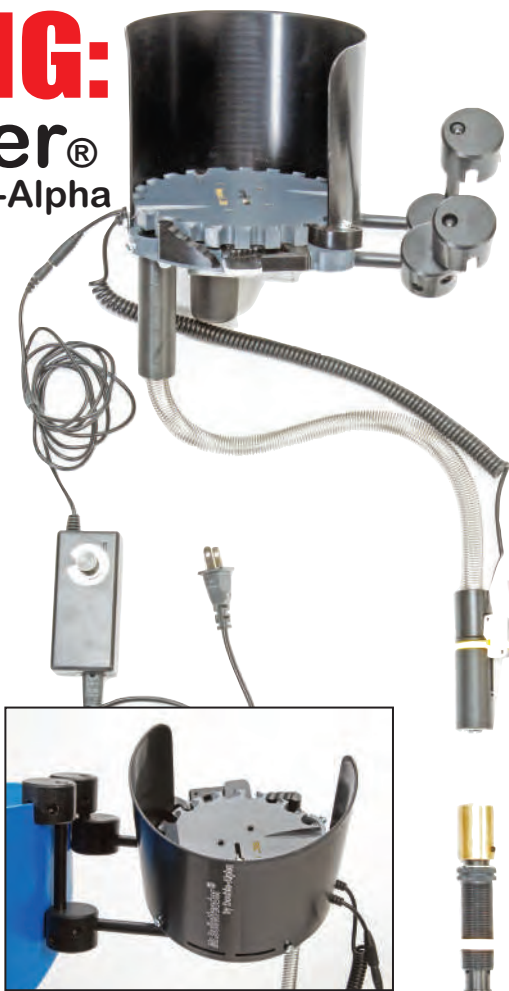

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the case-feeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

### Mr. Bulletfeeder (Comes Set Up in One Caliber)

## Mr. Bulletfeeder® Replacement Parts & Spares

**H**aving separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

**T**he Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collator to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

**L**ose a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

# Dillon's Pistol Die Sets

## Size Die

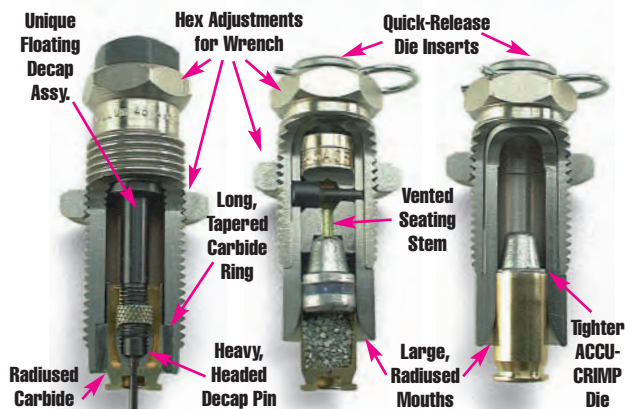

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

*NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)*

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	O28-10839	\$69.95
.308 Winchester	O28-15574	69.95

# SENSORY OVERLOAD

## Gunsite Writers' Event

By Peter Caroline

It is part of one's sworn duty as a gun writer never to turn down a free anything. In August I got an email invitation from Simply Rugged's Rob Leahy to attend a two-day writers' event at Gunsite Academy in mid-November. Of course, I accepted.

I arrived at the Days Inn in Chino Valley shortly before dinnertime. The folks at the front desk recommended a new restaurant, Danny B's Fish & Chips, just up the road. The fish and chips surpassed my expectations...big slabs of tender cod, with a crunchy fried panko crust and a surfeit of fries, washed down with Jack on the rocks.

The next morning at 0730, I showed up at the Gunsite classroom. Our sponsors, Simply Rugged Holsters, Republic Forge, Doubletap Ammo, Tyler Gun Works, Ruger and Lipsey's, gave us an introduction to their respective companies and products. There was an incredible array of firearms on the tables. Bobby Tyler had done the finish on many of the firearms displayed. Color casehardened stainless steel is a Tyler specialty...I don't

believe anyone else has mastered this skill. Bobby Tyler's wicked sharp tomahawks were on display, with color casehardened stainless blades in various configurations. I was quite impressed with a .50 AE Desert Eagle, with a beautiful color casehardened finish, and walnut grips with a gold Desert Eagle logo. It had a very understated, classic look, a welcome departure

from the usual Deagle décor, a la Saddam Hussein or Central American drug lord. The Tyler Gun Works offerings were unique... some featuring New York style (Louis D. Nimschke) engraving or gold and silver inlays. There were a couple of modern replicas of

the 1868-1882 Reid's "My Friend" Knuckle-Duster revolver, rendered in .22 WRM and .22 Short, and a blued, engraved, ivory-gripped Colt model 1908 .380 ACP pocket pistol; a modern color casehardened Baby Browning and a cased Pedersoli .45 Colt/.410 double-barreled howdah pistol. There were Ruger revolvers in 10mm/.40 S&W, .327 Federal Magnum, .44 Special and .480 Ruger. Simply Rugged was showing off a number of

**"IT IS PART OF ONE'S

**DESERT EAGLE .50 AE WITH TYLER GUN WORKS COLOR CASEHARDENED FINISH AND CUSTOM GRIPS**

**TYLER GUN WORKS TOMAHAWK - COLOR CASEHARDENED STAINLESS STEEL**

impressive leather holsters and accessories featuring rattlesnake skin inlays. The Republic Forge guns are 100-percent American-made from American steel on American machinery. Republic Forge could not find any screwdrivers made in USA, so they made their own! These are some of the most aesthetically unusual 1911s to be found anywhere, with such features as Damascus slides and exotic antler, horn or mammoth tooth grips...all at a price, of course, and worth every penny. But I figure, if you can afford everything you want, life must eventually get pretty damn boring.

What does one do after ogling and handling

such a dazzling array of gun goodness? You go out and shoot them, of course. Doubletap Ammo supplied the fodder for all these lovelies, and we used up a lot of it. I particularly enjoyed Lipsey's blued, wood-gripped GP100 .44 Special, a really sweet shooter. I even sampled the .50 AE Desert Eagle. Lured by its more subdued, conservative exterior, I loaded and fired five rounds, all of which actually hit the metallic targets downrange. Looks notwithstanding, the gun was an ergonomic nightmare, constantly threatening to wrench itself out of my hands and into earth orbit every time I pulled the

## SENSORY OVERLOAD... *Continued from Page 37*

trigger. Oh, well. If you have the hands of Andre the Giant, I heartily recommend this pistol.

Much later in the afternoon we formed a caravan of cars and proceeded along a long road through the woods up to the castle (yes, a real castle) of Buz Mills, the owner of Gunsite. We were treated to cocktails and a generous buffet dinner in an elegant setting...it's the only place, in my experience, where a polished brass Gatling gun in the living room was neither out of place nor conspicuous.

Wednesday morning, we drove out once more to the North Range for more shooting. This time, we were treated to a display of bullet penetration for our edification and entertainment. The .50 AE Desert Eagle threw an enormous muzzle flash, and penetrated nearly to the very end of the first gel block. The .480 Ruger Bisley, with a good deal less drama, drilled right through all three gel blocks (about 4 ft.) and buried its projectile in the berm. The yardstick that was lying next to the gel blocks went airborne.

After lunch, we enjoyed a session at the Donga, a narrow steep-sided ravine with an uneven, rocky bottom. Concealed along its length were a number of heavy gray steel pepper-popper targets, which one was supposed to not only spot and hit but also knock down. The "knock down" part was

the most problematic. We were offered the use of any of the many guns on the tables, but a caliber beginning with "4" or more was preferable. In a rare moment of good judgment, I opted for the one gun I had brought with me, a Ruger SR1911 lightweight Commander-style .45, fitted with an ambidextrous safety and a 4-1/2-lb. trigger, and charged with Doubletap's formidable .45 ACPs. Every one of the pepper poppers went down with one shot apiece. Not wishing to press my luck any further, I spent the rest of the day watching others shoot. For dinner, I returned to the aforementioned Danny B's, this time enjoying a platter of fried oysters, scallops, shrimp and frog legs.

Thursday morning, I packed up my Tyler tomahawk and other souvenirs, loaded up the car, finished off my Days Inn's complimentary Belgian waffle with sausages and eggs, and headed home. Being an eternal optimist, I stopped off at J&G Sales in Prescott, but found nothing I couldn't live without. Maybe next time.

# CLASSIC FIREARMS: The Heckler

By John Marshall

It's probably the most prolific submachine gun on the planet. It's in use by more than 80 countries and has been in production by Heckler & Koch and other manufacturers for over half a century. Its proven roller-delayed blowback action is smooth and reliable, making it a prime choice for close-quarters use by both military and police organizations. It's the German MP5 submachine gun. This is its story.

The Maschinenpistole 5 was first put to use by West German police and border guard units in 1966. However, most folks probably first viewed it on TV as it was employed by the British Special Air Service (SAS) to break the Iranian embassy siege in 1980. Not as widely known is that it was used earlier in rescuing the hostages of Lufthansa flight 181 in 1977. Since those days, it's been in routine use by an incredible list of elite units such as Germany's GSG-9, the aforementioned British SAS, London's Metropolitan Police, U.S. Navy SEALs,

The fixed-stock standard version of the MP5 is known as the MP5A2, which is illustrated here. It measures 27" in overall length. Variants include collapsible stock-equipped guns (MP5A3s), and short-barreled stockless versions (MP5A1s or MP5Ks) for concealment in close quarters. Most of these have "SEF" trigger groups. The S-E-F markings stand for *Sichert*, *Einzelfeuer*, and *Feurstoß* (safe, single fire and full automatic). Some in the U.S. would translate these initials for the selector lever as *Safe*, *Economical* and *Fun!* In many cases, pictographs substitute for the S-E-F markings. These "bullet images" are readily understood in any language. A special type of trigger group, once used by our Navy (MP5-N variant), incorporates an additional marking for a 3-round burst, giving four options for

the U.S. Secret Service, the FBI Hostage Rescue Team and the U.S. Army's Delta Force.

Even Russia's FSB Alpha Group and SWAT police units in China have chosen to use it.

The history of the MP5 goes back to World War II. The roller-delayed blowback mechanism it uses originated in German machine guns of that era, and was used in 1945 German prototypes of the never-adopted Mauser StG 45(M) assault rifle. Following the war, former Mauser technicians went to Spain to develop the CETME rifle in 1946 – 1949 from its principles. Engineers at Heckler & Koch GmbH, located in Oberndorf am Neckar, Germany, in collaboration with CETME engineers, further developed the G3 7.62x51mm NATO automatic rifle in 1958. These rifles used the roller-delayed system and fluted chambers to aid in case extraction. Encouraged by the potential of this basic arrangement, H&K expanded the concept into a family of arms. The four types chambered 7.62x51mm NATO, 7.62x39mm M43, 5.56x45mm NATO and 9x19mm Parabellum. A 9mm submachine gun first known as the HK54 was crafted in 1964. The MP5 was a refinement of this arm, and was finalized in 1965.

selection. The selector lever on any version may be left side only or ambidextrous.

The roller action in this closed bolt system is unique – two vertical rollers on the sides of the bolt assembly are mechanically forced into adjacent cavities as the bolt closes. An internal hammer strikes the firing pin. On firing, the rollers are allowed to retract as the bolt begins to move to the rear. This in effect is a "hesitation lock" and it's quite effective. The chamber is fluted, permitting some gas to move around the cartridge case when the arm is fired to aid in easier and more positive extraction. Firing from a closed bolt may make air cooling less effective, but definitely aids in accuracy, particularly when taking precision semiautomatic shots. This method gives a very short time interval between trigger pull and discharge, and causes virtually no disturbance to the gun compared to a slam-fire open-bolt system. The full-automatic rate is 800 rounds per minute.

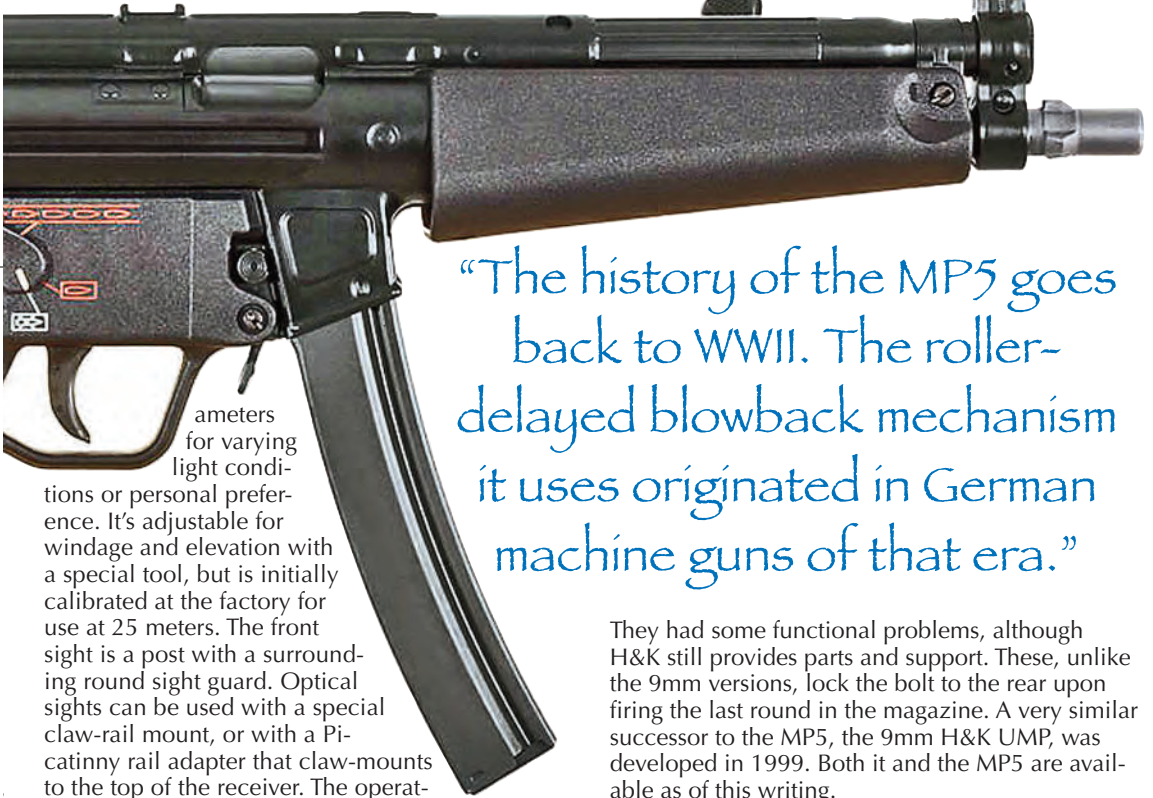

Early 30- and 15-round double-column magazines were straight, while those made since 1977 are slightly curved to better accommodate the somewhat-tapered 9mm cartridges and lessen the

# er & Koch MP5 Submachine Gun

chance of feeding jams. The standard magazine release is a paddle device located behind and below the opening for the magazine. An MP5SD model originating in 1974 utilized an integral suppressor ("SD" stands for Schalldämpfer or sound suppressor). More recent guns can be had with a three-lugged barrel for attachment of a quick-detachable suppressor. The standard free-floating fixed barrel measures 8.9" and is pinned in the receiver. Special threaded barrels work with muzzle devices. These include flash suppressors, blank firing adapters, rifle grenade launchers (used with special grenade cartridges), and a cupped attachment for launching tear gas grenades. The rear peep sight on almost all MP5 variants is a rotatable slanted drum that offers four different aperture di-

while as the SP89, from 1989 to 1994. It did not have a vertical foregrip, in compliance with our National Firearms Act. The HK94 was exported to America from 1983 to 1989. It was a semiauto with a 16.5" barrel and could be had with either fixed or retractable stocks. A more recent twist to the older SP89 "pistol" is the SP5K, which was announced in 2016 and is now available for sale in the U.S. It's semiauto only, and has a Picatinny rail for mounting optics.

The MP5 series components can be "mixed and matched" to provide many more 9mm variants than can be covered here. It's worth noting that even 10mm Auto and .40 S&W versions were made from 1992 to 2000 as the MP5/10 and MP5/40.

ameters for varying light conditions or personal preference. It's adjustable for windage and elevation with a special tool, but is initially calibrated at the factory for use at 25 meters. The front sight is a post with a surrounding round sight guard. Optical sights can be used with a special claw-rail mount, or with a Picatinny rail adapter that claw-mounts to the top of the receiver. The operating handle, which projects on the left side at about a 45-degree angle, is non-reciprocating during firing. It can lock the bolt in the rear position by pulling it fully back and rotating it a bit clockwise, which hooks it into an indent. Common procedure in order to release the bolt to go forward is to slap it down with the palm of the hand.

A semiautomatic-only variant (MP5SFA2) appeared in 1986, in response to a request by our FBI. It's identical otherwise to the MP5A2. A no-stock "pistol" civilian semiauto was produced for a

"The history of the MP5 goes back to WWII. The roller-delayed blowback mechanism it uses originated in German machine guns of that era."

They had some functional problems, although H&K still provides parts and support. These, unlike the 9mm versions, lock the bolt to the rear upon firing the last round in the magazine. A very similar successor to the MP5, the 9mm H&K UMP, was developed in 1999. Both it and the MP5 are available as of this writing.

Many licensed and unlicensed manufacturers have also manufactured the MP5 family. Countries of origin include Turkey, the Philippines, Pakistan, India, Luxembourg, China, France, Greece, Mexico, Saudi Arabia, Sudan, Switzerland and the United Kingdom.

In short, the MP5 submachine guns and semiautomatic spinoffs have become nearly universally used around the globe. They have become true classics, and the civilian-legal guns here in America are highly sought after.

# SAVE YOUR BRASS!

**P**ick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

O28-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

O28-19972 \$39.95

## Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter O28-17519 \$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mm.

Made in the USA and comes with a lifetime warranty.

Berry's Mfg. Clear Ammo Can O28-17518 \$9.99

## My Funny Valentine

By Peter Caroline

Under normal circumstances, I wouldn't go shopping for a Valentine's Day gift at the SHOT Show...but Sally and I had a significant anniversary coming up, and the usual Hallmark card somehow didn't seem appropriate. I was looking for something a bit extravagant, attractive but useful and, above all, fun. At the North American Arms booth, I found what I was looking for...a tiny, gold-plated .22 Short revolver with a spur trigger, 1 1/8" barrel and synthetic white pearl grips. The official designation was NAA-22S-GE and it was a special limited production offering from NAA's "Custom, Curious & Collectibles Shop."

I will readily admit, .22 Short is no one's idea of the perfect defensive round. It might well suffice in a "Stick it up their nose and pull the trigger" last ditch situation, it's potentially more effective than car keys or a small can of pepper spray, and the gun is eminently concealable. Besides, Sally's everyday "house gun" is a Taurus Judge loaded with .45 Colt, and she's quite proficient with it.

As a former ad agency person, I understand full well that presentation is important, and the pack-

aging supplied by North American Arms simply would not do. The tiny gold revolver was ensconced in a substantial black crackle-finished steel lockbox with a large NAA logo on the cover. The box itself would comfortably fit a Commander-size 1911. It was just too damn serious for a festive occasion. I found the solution at our local Walmart...a heart-shaped Valentine's Day tin of Whitman's Sampler chocolates. I very carefully removed the wrapper, took out two chocolates and replaced them with the revolver, then rewrapped the box.

Valentine's Day arrived, and I presented Sally with the Whitman's Sampler. I got a quizzical look in return. Sally has never really been into sweets. I've known that for years, and she knows that I know it. I said, "Open it...open it!" She opened it, and said, "I should have known!" It was the best Valentine's Day ever.

# 48 Semper Paratus Arms

William Larson of Semper Paratus Arms explaining how the hammer spring should be installed on the hammer.

## By Cameron Benz

I've built a number of AR15s in my life. I started like many do, by finding books and, later, scouring YouTube. While this can cover a lot of material, you do have to sort through a fair amount of garbage information. A local Sheriff's deputy decided to host William Larson of Semper Paratus Arms ([semperparatusarms.com](http://semperparatusarms.com)) to teach his AR15 Armorer's Class. I immediately thought it would be a great opportunity to study the AR15 platform on a deeper level.

I'm sure some are wondering what qualifies William Larson to teach such a class. William started out in the U.S. Army Infantry. Later he would serve in the U.S. Coast Guard as a Gunner's Mate. This left him with almost 10 years of active-duty service. After that, he left and went to the private sector working in Afghanistan and Iraq as an armorer/instructor and security team member for various private military companies on various D.O.D. and D.O.S. contracts. The companies have included Triple Canopy, Blackwater USA, Olive Group, and SOC-SMG. In addition to this, he has completed a number of factory armorer courses from companies including Beretta, Barrett, Colt, FN-USA, GLOCK, Knight's Armament, Remington, SIG Sauer and others. In addition to this, he spent time building guns at Bravo Company USA. It is this experience that helped him put together his own curriculum and start Semper Paratus Arms.

I already owned most of the tools I needed for the class, so it was mostly a matter of gathering

them from my toolbox. The Semper Paratus Arms website outlines what you need and most of it is available from Brownells ([brownells.com](http://brownells.com)). Even if you own them, I recommend making a checklist to check off as you load things. I didn't, and managed to forget a couple tools as a result. Learn from my mistakes.

Day one started with William giving a more in-depth background on himself. Shortly thereafter we plunged into the presentation William refers to as "Death by PowerPoint." It was worth it, though, because he covered many aspects of the AR15 during the PowerPoint, beginning with its history. This was followed by the myths we've all heard, like, "The gas ring gaps have to be staggered."

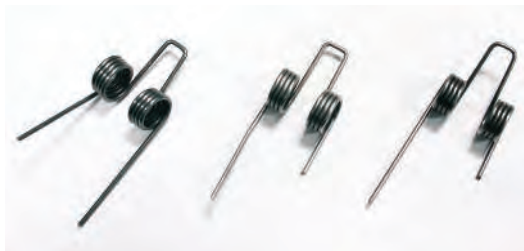

During the PowerPoint portion, William made sure we understood the cycle of operation for the AR15. Understanding the cycle of operation is critical if you want to be able to troubleshoot your AR15. Throwing parts at a problem can get expensive if you don't manage to diagnose the problem correctly in the first attempt.

There are a couple of differences between a MILSPEC receiver extension and a commercial lower receiver extension that he pointed out to us. One is that the MILSPEC version is 1.14 inches in diameter in the round section, versus the commercial unit being 1.17 inches in diameter. Another thing William covered was that the MILSPEC should have a dry lube coating on the inside.

Later, we had a discussion about selecting components for our AR15s, whether building, retro-

**Three failed hammer springs. From left to right, uneven hammer spring leg tension, one bent leg and one broken leg, and one with one broken leg. All can result in malfunctions.**

**Above Left: A proper gas tube flare for sealing against the gas key on the bolt carrier group.**

**Above Right: Note the lack of flare remaining on the end of this gas tube. This gas tube needs replacement.**

**Left, Bottom Photo: William Larson demonstrates staking of the receiver end plate. This is perhaps not necessary on a recreational AR, but highly recommended for serious-use ARs.**

fitting, or buying, based on the intended purpose for the carbine or rifle in question. This led into talk about what buffer weights were appropriate for what standard AR15 configurations.

We finished day one with an education on the appropriate torque specifications and buffer spring lengths.

Day two kicked off with more PowerPoint and a discussion on proper gas key staking. Troubleshooting various malfunctions came next. Mention was made of an individual who had ordered a mid-length gas tube from a vendor. He figured that since it was a Colt factory part, he was in the clear. What he didn't realize is that there was a Colt model in existence with a non-standard mid-length dimension. He ended up with the gas tube for that version. The gas tube was about a quarter of an inch too long and that prevented the bolt carrier group from going fully into battery. He had to return the gas tube and get the appropriate one, as cutting it would have resulted in losing the plug from the gas block end or the sealing rib on the gas key end.

William also made sure to cover the difference between a rifle upper receiver and an M4 feed ramp cut upper receiver. This also meant educating us on the corresponding barrel extension cuts.

After all this, we spent the afternoon going through our own carbines. The results of this got

interesting quickly. The guy sitting next to me discovered that his gas key screws only looked staked. They didn't engage the screw heads nor were those screws properly torqued as he broke them loose with very little effort using a hex wrench. This was despite it being a "name brand" carrier.

Some students in class found their gas tubes were due for replacement. Spotting the worn out gas tubes was easy. The flare on the end of the gas tube was almost nonexistent. A couple students found their barrels had not been dimpled for the gas block set screw. Without the dimple, the gas block can be indexed improperly. If the gas block is indexed wrong, then the gas block can partly obstruct the gas port and cause malfunctions. Also, the gas block can shift and cause the carbine to short stroke or not cycle at all. I don't have enough room here to cover all the issues we saw.

After taking the Semper Paratus Arms AR Armorer Course, I have a much greater appreciation for properly made products. I also now anticipate that I'll be more carefully inspecting ANY completed AR I purchase. You can more than save yourself the cost of the class with the knowledge gained. I highly recommend William's course to AR enthusiasts who find themselves working on their own guns frequently or who just want a greater depth of knowledge about the platform. Now, if you'll excuse me, I have a couple AR-15s to build.

# 50 "Big Fifty Reloader"

## STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2" -12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for **ONLY...**  
**\$1119<sup>95</sup>**  
**028-50000**

**Now Available!**  
**.408 CheyTac Conversion**  
**028-50204 \$149.95**  
*(Dies NOT Included)*

Total price as pictured here with optional accessories: **\$2689.75**

.50 BMG Carbide Size Die	028-50075	\$869.95
.50 BMG Case Trimmer	028-50050	\$399.95
BFR Mounting Post (50.5" High)	028-50150	\$289.95
BFR Mounting Hardware Kit	028-50140	\$9.95

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**028-50050, \$399.95**

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**028-50075, \$869.95**

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

**028-50125, \$77.95**

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**028-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

**028-50001, \$334.95**

### E.(1) PRIMING CONVERSION

Converts Swager to Priming System.

**028-50003, \$79.95**

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

**028-50002, \$334.95**

### F.(1) SWAGER CONVERSION

Converts Priming System to Swager.

**028-50004, \$79.95**

### RCBS .50 BMG LOADING ACCESSORIES

.50 BMG Powder Measure	<b>028-21896, \$114.95</b>
.50 BMG Seat/Crimp Die	<b>028-21895, \$139.95</b>

**EXTRA "BFR" TOOLHEADS** **028-19831, \$189.95**

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner **O28-10252 \$24.95**

## Dillon's Bench Wrench Fits 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	O28-14067	\$1.60
5-Pack of Die Lock Rings	O28-10669	4.95
1" Dillon Bench Wrench	O28-10842	7.95
<i>(Buy two or more 1" Bench Wrenches for \$7.10 each)</i>		
Wrench/Lock Ring 5-Pack	O28-10668	9.95

# Grace USA Gun Care Tool Set 53

This custom designed 12" x 9" x 1-1/2" case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

Grace USA Gun Care Tool Set **O28-10680** **\$99.95**

## More Great Tools From Grace USA!

The **9-Piece Ball-End Allen Head Screwdriver Set** includes the following sizes: 1/16", 5/64", 3/32", 7/64", 1/8", 9/64", 5/32", 3/16", and 3.5 mm. Each is constructed of US 8650 Chromium-Vanadium steel alloy and is proudly Made in USA!

Ball-End Allen Set **O28-15063** **\$49.95**

The **7-Piece Steel Roll Pin Punch Set** includes the following sizes: 1/16", 5/64", 3/32", 1/8", 5/32", 3/16", and 7/32". Each is proudly Made in USA!

Roll Pin Punch Set **O28-15065** **\$39.95**

### Bondhus Hex Key Sets

## Comtech's STINGER

**T**HE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master - instantly! There's really nothing like it for easy carry and access. It passes unnoticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

## Arredondo Accessories' Multi-Gun Chamber Flags

**M**ade of tough nylon with a melting point of 480 degrees. Kit includes one shotgun chamber flag and one for your AR-15.

O28-15485 \$11.95

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

The ERGO Grip Delta Grip™ is the first truly ergonomic grip for J Frame revolvers. Designed for the most important part of the gun, the shooter, the Delta Grip was engineered to fit the natural point of aim and mechanics of the human hand, wrist and arm. The result is a grip with a superior natural point of aim, comfort and control. Fits round butt J-Frames. Will not fit on Smith and Wesson Bodyguard 38 Model (sku 103037 and 103038).

# The Case for the Sti

By Duane Thomas

Look at the concealment holsters worn by really serious shooters, you'll see a preference for the straight drop holster worn in a true strongside, 3 o'clock position. Why is that?

Let's begin by defining our terminology. For holster orientation, granted we're talking a belt rig, we have basically three choices: negative cant, positive cant, or straight drop. Negative cant means the gun is angled rearward, with the rear sight further to the rear than the front sight. This is really only appropriate for non-concealable race rigs. Then we have positive cant, typified by the popular FBI tilt, which means the gun is angled forward with the rear sight ahead of the front sight. Then there's straight drop, sometimes called neutral cant, where the gun is straight up-and-down, with the front and rear sights right above each other.

Serious shooters, serious gun carriers, tend to gravitate to straight drop strongside for a number of reasons. To start with, it allows a faster, simpler draw stroke. With FBI tilt, since it cants the rear of the gun forward, in order to be concealable the gun/holster must be worn behind the midline of the body. Wear them strongside and, with the top/rear of the gun tilted that far forward, it would print hideously through a concealing garment.

You'll commonly hear this called the 4 o'clock position, though really it's more like 3:30. This requires, on the draw, the shooter reach around behind their body, then bring the gun back out around the torso in a semi-circle. Also, this requires bending the shooting hand wrist on the draw, then straightening it out again as the gun comes up. While neither of these movements might seem to cost any apparent time, the truth is, they do.

By contrast, with a straight drop holster worn strongside, it's not necessary to reach around the body to access the gun, instead the hand goes straight to the shooter's side, and the gun can

begin moving toward the target as soon as it clears the holster. Also, there's no movement of the wrist required; the orientation of the hand, wrist, forearm, all remains the same once the hand closes around the gun butt. This greatly simplifies the draw stroke.

I have been told, lectured, actually, by someone at a particular holster company, "If you practice hard enough, a GOOD shooter can be just as fast with FBI tilt behind the hip as they can with straight drop strongside." Every good shooter to whom I've recounted that statement has literally laughed at it. Simplicity, excising extra movement, equals speed. Period. It's worth noting this particular holster company is no longer in business.

Straight drop strongside is also immensely more comfortable than FBI tilt behind the hip when seated in a car. Carry your gun behind the hip, the seat cushions will push the gun butt up uncomfortably into your body. It feels like it's trying to become one with your internal organs, a sensation with which I became very familiar in the years I carried behind the hip. With a true strongside carry, the gun sits comfortably along your side, and doesn't get pushed into your body at all.

This also makes the gun hugely more accessible should you ever need to draw it while seated in a car. Carry your gun behind the hip, you're literally sitting on the gun. This leads to a very slow draw. With straight drop strongside, you just reach down and draw the gun. Easy.

If you've been trained on how to draw a gun with your support hand, while it's being carried in a holster on the master hand side of your body, straight drop is much more accessible than FBI tilt behind the hip. There are two common techniques for the off hand draw: go behind the back or across the belly. Neither of these works terribly well with FBI tilt behind the hip. Go behind the back, the gun butt is angled away from your hand. Go over the belly, with the gun behind your hip, you probably can't

**A good example of straight drop holster worn strongside would be the Blade-Tech Standard Belt Holster, here shown carrying an STI VIP 9mm.**

# Straight Drop Holster

With straight drop strongside, the orientation of the shooter's hand, wrist and forearm remains the same from first hand contact to the gun butt through the entire draw stroke.

When accessing the gun with the off hand, with a straight drop strongside holster the gun is easily reachable going either behind the back or across the belly.

get to it at all. With straight drop strongside, by contrast, going behind the back, the gun butt isn't angled away from your hand, and going across the belly, the gun is far enough forward on your body you can actually reach it.

For all these reasons, serious shooters, serious gun carriers, once they get in enough experience to really understand what they're doing, gravitate toward the straight drop holster worn in a true strongside, 3 o'clock position.

## SnapSafe® Pistol Racks

Store guns in your safe or display them anywhere with these handy gun racks made in four different widths. The rack helps maximize storage space while offering a secure and balanced rack designed for compact pistols, full-size handguns, revolvers and semiautos. Their PVC coating prevents scratches or marring. Store guns right side up or upside down, depending on your preference.

- Two-gun Rack measures 4.5" x 7" x 5.75"**
- Four-gun Rack measures 9" x 7" x 5.75"**
- Six-gun Rack measures 13.5" x 7" x 5.75"**
- Eight-gun Rack measures 18" x 7" x 5.75"**

SnapSafe Two-gun Rack	O28-33127	\$8.00
SnapSafe Four-gun Rack	O28-33128	10.00
SnapSafe Six-gun Rack	O28-33129	12.00
SnapSafe Eight-gun Rack	O28-33130	15.00

SnapSafe's 30 LED Cordless Motion Sensor Light is ideal for large gun safes. 25.75" x 0.7" x 0.6"

**O28-10019 \$25.99**

SnapSafe's 20 LED Cordless Motion Sensor Light is ideal for small-to-medium gun safes. 13" x 0.7" x 0.6"

**O28-10018 \$20.99**

SnapSafe's Vehicle Headrest Gun Rack secures long guns behind headrest and doubles as storage for range bags, etc. Coated wire won't mar firearms.

**O28-10020 \$7.99**

"Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, O28-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are ideal for Reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em - you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.
"Square Deal" Bin	O28-13756	\$2.95	\$15.30	\$24.84

"SL 900" Bin	O28-17125	10.50	56.94	106.92

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools - the list is endless.

# Swab-its – A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Slide-Glide Lite	<b>O28-15572</b>	<b>7.95</b>

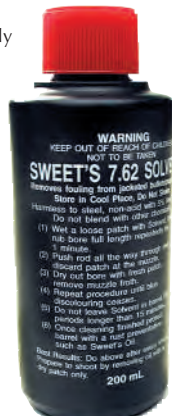

**Microlon UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

	<b>O28-75125</b>	<b>\$9.95</b>
--	------------------	---------------

## Sweet's Australian 7.62 Solvent

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

<b>O28-13128</b>	<b>\$12.95</b>

----------------------	-----------	--------

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

# SnapSafe Modular Vaults LOCKBOX

The SnapSafe® Modular Vaults LOCKBOX is a pry-resistant 16 gauge steel container that provides secure storage for handguns and other valuables. Meets TSA airline firearm guidelines. Dimensions: 9.5" x 6.5" x 1.75".

O28-01044 \$19.95

## Arredondo Multi-Function Squib Rod

Magazine Base Pad Tool/  
Scope Battery Cap Remover

Scope Windage  
Adjustment Tool

This is a MUST-HAVE range-bag accessory. It's a squib rod (for removing stuck bullets), magazine base removal tool, and scope windage adjustment and battery cap removal tool.

O28-15250 \$12.95

## Lyman Pick & Brush Set

Lyman's Pick & Brush Set is an indispensable item for your cleaning supplies and range bag.

O28-40160 \$3.99

## The Larry™ Pocket Work Light

The Larry™ 8 LED Pocket Work Light is the essential handyman light. 8 powerful LEDs provide 60 lumens of bright white light. The rotating magnetic clip gives you convenient hands-free lighting. The reinforced plastic body design is shock-proof and water-resistant, making the Larry™ basically indestructible.

O28-15432 \$9.99

## Barrel-Lite®

O28-10529  
\$4.95

**Poppy™** – A combination 300 Lumen C•O•B lantern and 120 Lumen LED spot light. Poppy is the ideal light for indoor or outdoor use when versatility and powerful lighting are critical. Poppy easily changes from spot light to lantern with just a slide of its top, revealing a full 360° C•O•B lantern. The handle is designed to easily adjust to serve both light modes. Assorted Colors.

O28-00116  
\$16.99

## Ammo-Burr Cartridge Deburring Sets

SHAVIV is – and has been – the leader in precision hand-deburring solutions since 1960, and now brings its experience to the ammo-reloading market.

The Ammo-Burr Inner/Outer Cartridge Deburring Sets feature ergonomic comfort-grip handles for fast and accurate hand deburring. The .47" diameter inner chamfering

and deburring blade allows for chamfering and deburring cases from .17 to .45 caliber, and the outer-diameter chamfering blade will accommodate case mouth openings as large as 1.02".

A. Inner Chamfering Starter Set  
O28-62270 \$39.95

B. Outer Chamfering Starter Set  
O28-62269 \$59.95

# Taylor Freelance Magazine Extensions

**Taylor Freelance Magazine Extensions**  
AR-15/Tavor 9mm SMG +10 O28-12377 \$39.95  
This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many "stock" mag springs.  
NOTE: Colt SMG mags come from many different manufacturers. Colt offered at least two major types - one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.  
CZ Skorpion +10 O28-12378 \$49.95  
• Extra length/strength spring included

- Thumbscrew-and-gasket retention system allows for quick, easy disassembly.

GLOCK +10 O28-12379 \$59.95  
Transforms Glock 31-round magazines into 41+1 round mags.  
• Extra length/strength spring included.  
SIG MPX +10 O28-12376 \$29.95  
• Works with stock mag spring.  
• Angled floor stands the magazine straight up on a table for easier loading.  
SIG P320 +5 O28-12375 \$39.95  
• Extra length/strength spring included.

## 5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

### 5.11 Tactical All Hazards Ammo Mule

Sometimes, you just need more ammo. The All Hazards Ammo Mule is lightweight, durable and weather resistant. It features a secure wraparound zipper with a molded pull and measures 10.12" wide x 3.88" deep x 8" high. It'll hold 10 5.56 AR mags or six 25-rd. boxes of shotgun shells.

O28-19661 \$27.99

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 as pictured w/o riser **O28-11643 \$89.95**  
TRS-25 with riser **O28-31318 \$119.95**

## Scout Scope Mounts for AK, SKS Rifles

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **O28-25374 \$79.99**  
Scout Scope Mount for SKS Rifle **O28-25373 78.99**

## The Wilson Combat EDC X9

By Duane Thomas

I've thought for decades the perfect self-defense/carry gun would be a 4/5th-size 1911 built around a conventional 9mm doublestack magazine. The problem with all previously existent 9mm 1911 doublestacks has been mag tubes, width-wise, originally designed around .45 ACP. When such mags were "rechambered" to the narrower cartridge, magazine makers left the tubes' external width the same but decreased available interior width by applying multiple grooves to either side. This resulted in magazines way larger than they needed to be in 9mm, also gun grips too fat for a normal human hand. With a standard doublestack 9mm mag, by contrast, we'd have a 1911 carrying a high-cap level of ammo but the grip could be considerably smaller. Well, a gun company finally produced such a piece, and it's Wilson Combat with their EDC X9.

"EDC" stands for Every Day Carry. The goal was to create a concealed carry gun the same size, and close to the same weight, as a GLOCK 19, with the same 15-round mag capacity but 1911 trigger pulls. Overall size G19 vs. EDC X9 is very similar. With its aluminum alloy frame versus the G19's polymer, the EDC X9 weighs 5.5 ounces more. (Unloaded

weights per their respective makers: G19, 23.6 ounces; EDC X9, 29.1.) This required designing and building a brand-new frame, called by Wilson Combat their X-frame. Since Wilson already had a gun called the EDC 9, a compact singlestack, "X9" refers to the higher magazine capacity.

The EDC X9's standard sight setup is a fiber optic front; rear sight is a Wilson Tactical Adjustable Battlesight, drift adjustable for windage in its dovetail, with a built-in elevation screw. The front sight is retained by a screw through the slide à la GLOCK. The slide is tri-topped, i.e. its top is a half-hexagon, for a distinctive, attractive appearance. More to the point, this is part of what makes the EDC X9's slide considerably lighter than a typical 4" barreled 1911. 9mm 1911s have historically been very unreliable feeders; a lot of that was slides too heavy to cycle well with light 9mm recoil. Anything done to make that more easily accomplished falls under the category of "good thing." Wilson advertises the EDC X9 as fitting in any holster for a 4" 1911, or 4-1/4" Commander. In my experience this is true, though tweaking adjustment screws in a Kydex holster may be necessary.

The slide is 416-R stainless steel. Early guns had the slide blackened using a PVD process;

current production like my article sample piece features Wilson's Armor Tuff polymer. The rear of the slide has been checkered 40 lpi. The frame is T6-7075 aluminum.

There are no locking lugs on top of the EDC X9 barrel. This is what I've heard called a "low friction barrel." Wilson found a key to making their gun work was decreasing barrel-to-slide friction by doing away with the locking lugs.

However, the EDC X9 retains the 1911's classic swinging link. The muzzle crown has been countersunk, theoretically protecting it from accuracy destroying damage. Honestly, I think it mostly just looks cool. There's no bushing, the barrel locks directly into the slide. Because there's no bushing to retain the recoil spring plug, the EDC X9 uses a reverse plug held in place by having a ring of metal at the rear of the plug fit into a corresponding recess in the slide portion of the dust cover. Feed ramp/barrel throat treatment is one-piece, fully supported. The barrel tube, and hood, have been grooved longitudinally. Touted as "grit grooves" allowing fouling to build up and extend reliability when dirty, while it's tempting to say, again, this mostly just looks good, I think anything potentially decreasing friction in a 1911-ish 9mm is good. Also to lessen friction, the frame's slide rails, to either side of the mag well, have been cut away. Wilson Combat realized that portion of the rails wasn't necessary, only serving as more slide-to-frame friction points. In a 9mm 1911, removing excess friction points translates to improved function.

The guide rod is not quite full-length, and beveled at front. The slightly shorter than full-length approach, and front bevel, means that, unlike the "paper clip" disassembly required in many short 1911s with full-length guide rods, the EDC X9's can be simply lifted out from the rear like a normal autopistol. The guide rod does feature a hole for paper clip disassembly, should you prefer. The great advantage of the full-length guide rod, it makes recoil springs last much longer. Since the spring compresses in a linear fashion along the guide rod, it doesn't snake around inside the dust cover, thus doesn't get worked nearly as hard. After 2,809 rounds fired, quite a few of them hot

9mm +P, comparing the factory spring in the EDC X9 to a brand-new spring also sent me by Wilson Combat revealed the old spring had only been compressed one coil. I look to get approximately 5,000 rounds, if not a bit more, before the spring's been compressed two coils, at which point I'll replace it.

The recoil spring, instead of the traditional music wire, is flat wire, again à la GLOCK. This allows fitting more coils into the EDC X9's short dust cover, in effect putting more spring into the same space, without going to the complicated "double spring/guide rod" system found in some compact 1911s. At first, examining that spring, and measuring its coils' thickness with a dial caliper, I assumed this was simply Integrated Systems Management Inc.'s (ISMI's) 13-pound GLOCK 17/34 spring, trimmed short. According to Wilson Combat, while "very similar" to the ISMI 13-pound GLOCK spring, this is actually a proprietary part made specifically for the EDC X9. Having said that, I whipped out Mr. Dremel and cut down one of my ISMI 13-pounders to 27-1/2 coils like the EDC X9 spring, and stuck it in the gun. As this is written, I've fired another 1,138 rounds, on that spring, and the gun has worked flawlessly with both hardball and hollowpoints.

Slide cocking grooves front and rear, and the front- and backstrap, all feature Wilson's X-TAC treatment, a series of crosshatched bands. The slide stop has an extended shelf which, when the EDC X9 is laid on a flat surface, lifts the gun up far enough the mag button won't accidentally depress. The frame narrows in around the slide stop area, on both sides; the slide stop pin is the same diameter, and the same length, as a normal 1911 part, however a standard 1911 slide stop won't work in the EDC X9. Because the mag well is much wider on the EDC X9 than a sin-

glestack 1911, the position of the plunger tube, therefore the contact point between plunger and slide stop, is considerably different.

Standard thumb safety treatment is single-sided, extended, though an ambi is available. My gun has the ambi. A standard 1911 thumb safety, either single-sided or ambidextrous, will not work in an EDC X9, you need the EDC X9 specific unit.

**The barrel crown is recessed, the tube fluted with grit grooves, and the front of the guide rod has been beveled for easy removal without tools.**

**The top of the EDC X9's "low friction barrel" has no locking lugs.**

**The design does retain the 1911's traditional swinging link.**

**The recoil spring is flat wire and "very similar" to the ISMI 13-pound Glock spring.**

**80** Rather than the traditional internal extractor, a notorious trouble spot in 1911s, the EDC X9 uses a spring-loaded external extractor retained, and pivoting on, a screw-in-place pin through the slide. Frankly I could have stood to see my sample gun's extractor a bit more dehorned and radiused. Out-of-the-box, when hand cycling ammo through the gun, I experienced a distinctive failure to feed, with numerous bullet profiles including hardball: the round went most of the way into the chamber then stopped, held there at a slight angle. Then on my first range session I had the same thing happen, with hardball, live fire. I said to myself, "This gun is acting a lot like a 1911 that needs to have its extractor radiused." Wilson Combat had a new extractor in my hands within days, but examining that part disclosed more sharp edges than I liked, too. Finally I simply radiused the extractor, myself. During my next range session, the EDC X9 burned through 656 rounds without a single problem.

Once I got the extractor sorted out, I only experienced one more malfunction. It's important to me to know how many rounds I can put through a particular gun before it begins choking because it's dirty. Thus I held off cleaning the EDC X9 until I had an answer. Which was "a bit over 1,500." As editor Mark Pixler put it, "Clean the gun every case of ammo and you'll be fine." Those two malfunctions, one traced to a factor since corrected, one when I deliberately didn't clean the gun, were the only ones experienced in 3,947 rounds fired during this evaluation.

There's been a fine attention to detail on this gun in many areas, it was obviously designed by and for serious shooters. For instance, the bottom of the slide has been thoughtfully beveled all along its length, on both sides. If you shoot resting your thumbs against the side of the gun, you don't have to worry about sharp edges on the bottom of the slide, especially in the area of the slide stop notch, chewing up your support hand thumb with an EDC X9.

Trigger pulls are pure 1911. Yes, this is a classic 1911 sliding-straight-to-the-rear trigger. Wilson literature specs EDC X9 trigger pulls between 3-1/2 to 4-1/2 pounds. My sample piece came in

toward the low end of that at 3-3/4 pounds, which for my shooting technique is perfect. Short, medium and long triggers are available; medium is standard. Given the wider mag well, a normal 1911 trigger will not fit an EDC X9, again you need the correct part.

The grips are two side panels held in place with a removable, aluminum backstrap. Both small and large backstraps are available. My sample came with the small, the standard setup, which fits my hand nicely. Since the side panels require no grip screws or bushings, they can be very thin, not bulking up the grip wrapped around a standard configuration 9mm doublestack mag very much at all. Grip panels are G10, textured with Wilson Combat's Starburst pattern, inset with Wilson medallions. The G10 may be had in a variety of colors; mine is a reddish-brown called by Wilson "Black Cherry" that actually does look a lot like rich hardwood.

This is a shockingly comfortable grip. Almost everyone I let handle and fire the EDC X9 commented, "It feels like a Browning Hi-Power." Since the Hi-Power has long had the reputation of possessing the single best-feeling grip of any handgun, that'll give you some idea what a good job Wilson Combat did in this area.

The EDC X9 magazine is based on a previously existent magazine, from Walther's PPQ. It made sense for Wilson Combat to build their gun around a magazine of established reliability instead of trying to reinvent the wheel with their own, proprietary magazine. However, a Walther PPQ magazine will not lock into an EDC X9, the mag button is higher up in the X-frame than in a PPQ. Essentially, the EDC X9 magazine is a Walther PPQ magazine, built for Wilson by Mec-Gar, with a repositioned mag catch cutout. It's possible to modify PPQ mags to work in an EDC X9, though that seems more

trouble than it's worth when EDC X9 mags are readily available from Wilson. According to Wilson Combat, "The Walther PPQ magazine, in our testing, was the slimmest and smallest in actual tube size of any doublestack 9mm magazine that was still reliable, and we wanted this to be a gun with a grip not too much larger than a singlestack 1911." Early EDC mags were actually stamped

**The slide rails in the frame, to either side of the mag well, have been removed to decrease friction during cycling.**

**Removing the EDC X9's grips discloses an operating system obviously derived from the 1911, but with significant differences.**

**Taylor Freelance's "+6" floorplates for the Walther PPQ up magazine capacity of the EDC X9 from from 15 to 21 rounds of 9mm.**

**Best accuracy from the EDC X9 came from the Hornady 115-gr. FTX, with four bullets going into a one-hole group measuring half an inch, and a single flier opening up overall group size to a still impressive 1" even.**

with Walther identifying marks, though Walther floorplates were replaced with floorplates marked Wilson Combat. Current production mag tubes are stamped Wilson Combat. Capacity is 15 rounds, just like the Glock 19.

Taylor Freelance makes extra-capacity "+6" aluminum floorplates for the Walther PPQ. To start with, I found an EDC X9 mag fitted with a TF floorplate would insert into the mag well, and snap into place, but wouldn't drop free when I hit the mag release because the Fort Knox retaining plate was sticking on the rear mag well rib. Removing a bit of height from the retaining plate with the kiss of the Dremel cured that problem; now I have magazines holding 21 rounds of 9mm that drop free when I punch the mag release. Considering the EDC X9 didn't even exist when these floorplates were designed, I'd call that a win. Thus far in my testing, this magazine/floorplate combo has been flawlessly feed reliable with both hardball and hollowpoints.

While the fire control system was obviously derived from the 1911, there are numerous differences. For instance, since there's no grip safety, the rear spring has only two leaves instead of three. Also, since there's no external mainspring housing, the mainspring is contained in a rectangular unit, under the grips, held in place through sliding into a series of Picatinny-rail-looking slots on the frame. According to Wilson Combat, "Because we'd gone to the doublestack magazine, and the goal was to keep the gun as slim as possible for concealability, we wanted to do away with the bulk of the mainspring housing. Also, doing away with the grip safety got rid of that bulk, as well."

The Wilson EDC X9 was accuracy and reliability tested with 13 factory 9mm loads, including Black Hills 115-gr. JHP +P and 124-gr. JHP; Federal 115-gr. FMJ RN; Hornady 115-gr. FTX, 124-gr. TAP FPD and 147-gr. XTP; Super Vel 90-gr. and 115-gr. JHP +P; Wilson 115-gr. TAC-XP +P, 124-gr. XTP +P, 135-gr. HBFN, 135-gr. RNFP and 147-gr. XTP. Also I tested five different handloads using the Rainier 124-gr. RN, 147-gr. HP and 151-gr. RN. Accuracy testing consisted of 5-shot groups from the bench at 50 feet, the maximum distance possible on the indoor range where I do most of my shooting. Best In Show was Hornady's 115-gr. FTX putting four rounds into a one-hole group measuring 0.5" with a single flier opening things up to a still-impressive 1". In 2nd place was the hot Super Vel 90-gr. JHP +P at 1.3". The Wilson 135-gr. TAC-XP +P was right behind with 1.4". The rest of the ammo fell between 1.8" and 2.6", with the exception of the Wilson 147-gr. XTP, by far the least accurate ammo tested, actually keyholing on a fairly regular basis.

1911s in general are notorious for not feeding bullets with truncated cone ogives. Unfortunately that translates into the majority of 9mm combat loads today. One big question I had was, "Being built around a conventional 9mm doublestack

magazine, will the EDC X9 feed TC ammo reliably?" The answer turned out to be yes. I didn't have a single failure to feed with 781 rounds of TC ammo fired during my evaluation.

I shot four matches with the EDC X9, and managed to pull out two 1st place finishes, one 2nd place, and a crash 'n' burn that was totally on me. At those matches, I let anyone who wanted to fire the gun, do so. I literally had people lined up to shoot this thing. Everyone was impressed. One comment I heard over and over again, which surprised me, people absolutely geeked out over the fact this was "a 1911 without a grip safety." To me that's no big deal, I learned how to sensitize a grip safety 20 years ago, but apparently there are a lot of people in the world who love 1911s and hate grip safeties.

The most frequent comment when first seeing the EDC X9 was, "That's a really pretty gun." The lines of the EDC X9 remind me a lot of the Smith & Wesson Model 39, which for my money is one of the most beautiful handguns ever made.

Speaking of money, something no one loved about the EDC X9 was its price tag: \$2,895 retail. What can I say, Wilson Combat has built a gun for their clientele. Some people like Timex, some people like Rolex. Obviously there's no shortage of people willing to pay for an EDC X9; according to Wilson Combat, this gun is currently back ordered six to eight months.

The good news is the EDC X9 is simply too good an idea not to copy. I'm not going to mention any names (I'm looking at you, Springfield and Kimber) but I would be absolutely amazed if certain major gun companies were not busily at work, right now, reverse engineering the EDC X9, and within a year we don't see guns clearly inspired by it on gun shop shelves. They won't have the elegance, the refinement, the great out-of-the-box trigger pulls, of a Wilson EDC X9, but like the Wilson they'll probably work. Unlike the Wilson they'll carry a price the average shooter is willing/able to spend. When that happens, Wilson Combat will have changed the face of modern self-defense handgunning. Because the EDC X9 truly is a game changer. Prior to this, we had to choose: high magazine capacity in a 9mm with a grip you could actually wrap the average human hand around OR 1911 trigger pulls. We couldn't have both. Now we no longer have to choose, we CAN have both.

When your job is "self-employed freelance gunwriter," you don't make any money if you're constantly buying your article samples, so I keep that to a minimum. However I did indeed decide to buy my sample EDC X9. If you looked under my concealing vest these days, you'd find a Wilson EDC X9 and two Taylor Freelance floorplate-equipped spare magazines. This gun was simply too good to let go back to the fine folks at Wilson Combat. As I said to start the article, this is the carry gun I've wanted for decades.

# 101 Classic Firearms by John Marshall <sup>83</sup>

John Marshall's book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, is a compilation of the author's popular articles appearing in *The Blue Press* since 2007. **101 Classic Firearms** is sure to be a prized addition to the library of any serious firearms enthusiast.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on some of the world's

**028-40133 \$29.95**

most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. John is also an endorsement member of the National Rifle Association.

## Elftmann Tactical SE Drop-In Trigger

The ELF-SE Drop-In Trigger for mil-spec AR-15s features an extremely short takeup; a clean, crisp break; and a very short, positive reset with a non-adjustable 3.5-lb. pull weight. The total physical weight of the entire trigger unit is 2.3 oz.

**028-10007 \$169.00**

## OPSol Mini-Clip™

Allows the use of 12 Ga. 1.75" Birdshot, Buckshot and Slug shells. Fits 12 Ga. Mossberg 500, 590, 590A1 and Maverick 88 models

The OPSol Mini-Clip™ was designed to give "well seasoned" and "recoil sensitive" shooters the capability of shooting the trusty Mossberg 12 Ga. platform without the usual recoil response. By using The OPSol Mini-Clip™ in conjunction with 1.75" shotgun shells, shooters stay in the game without all of the pain. The Mini-Clip enables owners of Mossberg 12 Ga. shotguns to use Aguila Minishells reliably for training, practice, recreational or home-defense applications.

## New Designs From Kershaw Knives

**Kershaw Knives** and **Emerson Knives** have joined forces on a series of knives that combine the precision engineering of Kershaw with Emerson's uncompromising functional design.

The CQC-6K features a modified clip-point blade for versatile cutting ability. The blade has two finishes: a satin finish on the upper and a stonewashed finish on the grind. The handle's front scale of textured G-10 offers a secure grip and the handle's stainless steel back has a solid frame lock.

The CQC-6K is a manual opener using either the thumb disk or the patented Emerson "wave shaped feature." This opening feature enables the knife to be opened as it is removed from the pocket. The pocketclip is reversible for left- or right-handed carry.

Blade length: 3.25" Closed: 4.5" Open: 7.75"

**028-31320 \$54.99**

Designed by Belarusian custom knifemaker Dmitry Sinkevich, the new **Kershaw Pub** looks like nothing you've ever seen.

Closed, you'd never know there was a handy blade inside – although you would definitely see the equally handy bottle opener. And if you were exceptionally sharp-eyed, you might notice the slotted screwdriver tip right next to the bottle opener.

To reveal the blade, just push down on what looks like the key ring attachment. You'll see the blade move out of the compact handle. Keep pushing and the blade will swing all the way out, ready for use. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip. The handle has an anodized aluminum front scale in bright blue and a steel back.

Blade length: 1.6" Closed: 3.1" Open: 4.5"

**028-31323 \$24.95**
