# 2 **Dillon's New-Reloader**

**Stock #NEW 650 PACKAGE 9 (Pictured above) \$1331.35**  
**Stock #NEW 650 PACKAGE 556 1363.30**  
**Stock #NEW 650 PACKAGE COMBO 1704.50**

*(If you'd like a similar package in a different caliber, please call.)*

# er XL 650 Package

**You've made the decision that loading your own ammunition is right for you. You're ready to pull the trigger, but uncertain of exactly what you need. Dillon has taken the work out of this. We have assembled a New-Reloader Package, featuring our most popular reloader, the XL650, with the most popular machine options, along with the accessories you'll need to begin reloading immediately. This package is available in 9mm, .223/5.56mm, or BOTH.**

## 9mm 650 Package Includes:

- XL 650 in 9mm
  - 9mm Die Set
  - Bench Wrench
  - Small Pistol Casefeeder
  - 650 Strong Mount
  - Bullet Tray Kit
  - Roller Handle
  - 9mm Case Gage
  - D-Terminator Digital Scale
  - Primer Flip Tray
  - 4 Small Primer Pickup Tubes
  - Digital Calipers
  - The Complete Reloading Manual for the 9mm Luger*
- Total: \$1331.35**

## .223/5.56mm 650 Package Includes:

- XL 650 in .223/5.56mm
  - .223/5.56 Die Set
  - Bench Wrench
  - Small Rifle Casefeeder
  - 650 Strong Mount
  - Bullet Tray Kit
  - Roller Handle
  - .223/5.56 Case Gage
  - Dillon Case Lube
  - D-Terminator Digital Scale
  - Primer Flip Tray
  - 4 Small Primer Pickup Tubes
  - Digital Calipers
  - The Complete Reloading Manual for the .223 Rem.*
- Total: \$1363.30**

## Combo Package (.223/5.56 Conversion Pictured at Right) Includes the 9mm Package Above, Plus:

- .223/5.56 Conversion Kit
  - .223/5.56 Die Set
  - XL 650 Quick Change
  - .223 Case Gage
  - Dillon Case Lube
  - Small Rifle Casefeed Plate
  - The Complete Reloading Manual for the .223 Rem.*
- Total w/9mm Pkg.: \$1704.50**

**A**s a token of our appreciation for new reloaders who purchase one of these packages – while supplies last – we're going to include one of these **Tactical Tailor** Operator Caps and our Dillon Precision morale patch. The Tactical Tailor cap is an incredible value: a high-quality product that's made in...wait for it...the USA, by a company that prides itself on hiring veterans. The hat in the photo is MY hat, and I've lost track of how many times it's been washed – IN the washing machine! It STILL looks great! If you're the kind of person who not only wears hats, but also WEARS THEM OUT, you're going to love this hat.

**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

# We READ Our Mail!

I have been a Dillon customer since 1985. Besides great products, here is another reason why. I bought my RL 550 in May 1985 and finally had to send it in for refurbishing January 2019 after I don't know how many tens of thousands of rounds. The tech rep said that there would be a service charge, to which I replied, "Sounds fair." Several weeks later I received a brand new RL 550C with a bill of lading stating \$0.00 charge. I would have gladly paid a fee. There are four reasons that I will always be a Dillon customer: 1. The finest reloading equipment, 2. Service, 3. Service and 4. Service. I recommend Dillon products to all my shooting friends and will continue to do so. Thank You for going above and beyond.

Jeff King – East Peoria, IL

The March 2019 *Blue Press* showed up today. Wife handed it to me and said, "Now here is an acceptable cover photo." She has commented before about the age and attire chosen for the cover photo. Just wanted you to know your cover photo in March of 2019 was a home run.

David Hansen – DHansen@StinsonAutomotive.com

I received some replacement equipment for my RL 550B today. After packing it away for almost 10 years and then getting it out again to show my two 16-year-old sons about proper use of handguns and reloading, I knew when some of the parts were missing or damaged I was going to have serious problems. But thanks to your staff and technical support I was able to get everything cleaned up and properly working again.

Guy Robbins – gar.1950@icloud.com

As a Square Deal "B" owner for over 25 years, I just wanted to drop a note and say thanks for the best customer support I have ever had with any product I have ever owned!

William McDaid – Mcdaid1@comcast.net

Just a happy thank you for your article on Gabby Franco! I am an English teacher, in Modesto, California. Gabby's story is perfect! We just covered the American Dream as a unit in literature. Gabby speaks to that issue specifically! Thanks for what you do! You're an American icon! I wish you great and continued success.

# 6 Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W Long to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550C

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# 10 SHOT Show 2019

By Peter Caroline

I have attended the SHOT Show on a fairly regular basis since 1982, and I'm always eager to see what's new. This year, the first thing that's new is a sign posted next to the elevator bank in the subterranean garage level of The Palazzo. It says: "FOR SAFETY REASONS Firearms Prohibited...For the safety and security of everyone, no person, including a firearms licensee or permit holder, is permitted to carry, possess, or store any firearm(s) anywhere in The Venetian, The Palazzo, Grand Canal Shoppes, or Sands Expo (including garages)." Hey, welcome to Vegas and enjoy the Show!

Despite this initial buffoonery, I'm delighted to report that this year's SHOT Show was not a gun-free event. Starting my trek on the first level of the Show, I found that Standard Manufacturing Company ([stdgun.com](http://stdgun.com)) was displaying an approximately 3/4-scale .22 LR Thompson sub-machine gun replica, semiauto-only, and a bizarre "volleyfire" .22 Win. Mag. revolver. This latter contraption, entitled the S333, features two side-by-side barrels which simultaneously fire two rounds with each pull of the elongated trigger. By alternating bullet and birdshot loads in the eight-round cylinder, you can deliver a double-whammy of pain and suffering with each pull of the trigger. You can't make this stuff up!

Next on my list was the Super Vel ([supervelammunition.com](http://supervelammunition.com)) booth. These are the folks that invented the jacketed hollow point bullet back in 1963. This year, they're displaying their Hush Puppy Subsonic 147-gr. 9mm ammo, which expands to over .70 caliber. What was particularly interesting were a pair of semiauto pistols fitted out with slide locks for single-shot operation...no noise from slide motion. Very sneaky.

Iver Johnson Arms ([iverjohnsonarms.com](http://iverjohnsonarms.com)) was displaying its new Pocket Ace, a neat little 4-barrel .22 LR derringer, very reminiscent of the 19th-century Sharps derringers that once spread annoyance and sepsis throughout the land.

It appears that Colt ([colt.com](http://colt.com)) is once again in the double-action revolver business. Last year, they brought back the Cobra 6-round snubby, albeit in a stainless steel format. This year, they've added a Night Cobra in black finish with a bobbed hammer, a Bright Cobra in bright polished stainless, and a Cobra Classic with matte frame and polished cylinder...all of the above in .38 Special +P. New for 2019 is the King Cobra, a .357 Magnum 6-round revolver with 3" barrel and brushed stainless steel finish. Despite not being laboriously hand-fitted like the Colt snakes of old, these appear to be very nice indeed.

The Kel-Tec ([KelTecWeapons.com](http://KelTecWeapons.com)) booth was crowded as usual, and displayed a couple of interesting new toys. The KS7 is a compact bullpup 12 gauge shotgun with a 7+1 round capacity with 2.75" shells, 6+1 with 3" shells. It's only 26.1" long and weighs a scant 5.9 lbs. unloaded, and 6.6 lbs. loaded. Helluva neat car- or truck gun. The new CP33 pistol is 33+1 round .22 LR pistol that looks like a baby AR with a full-length Picatinny-style rail, adjustable fiber optic sights, M-LOK™ slot and threaded muzzle. If you didn't buy the Kel-Tec's PMR30 because .22 Win. Mag. ammo was too pricey, here's your hi-capacity plinker for budget-priced ammo.

Hi-Point ([hi-pointfirearms.com](http://hi-pointfirearms.com)) has always been notable for eminently affordable, if somewhat aesthetically challenged, firearms that can be relied upon to go "Bang" when needed. On display, however, was a 9mm concept model that was actually approaching aesthetic acceptability...complete with grip safety and threaded muzzle. Wonders never cease!

Many years ago, when I was just out of the Army and toiling through graduate business school, I bought a Mossberg Brownie, a tiny little break-open 4-shot .22 derringer with a rotating firing pin. It was a Prohibition-era piece and, as far as I know, Mossberg's only commercial handgun offering...until now. The new Mossberg

Standard Manufacturing Co. .22 LR Thompson

Iver Johnson .22 LR Pocket Ace

MC1sc 9mm subcompact pistol is a pleasant surprise. It fits the hand quite comfortably, weighs only 22 ounces loaded (it comes with both 6- and 7-round magazines) and has a very nice trigger pull. Unlike some other striker-fired pistol we won't mention, takedown does NOT require the user to pull the trigger during the disassembly process. ([mossberg.com](http://mossberg.com))

Never let it be said that GLOCK ([glock.com](http://glock.com)) does not offer a wide variety of new 9mm pistols. Leading the pack is the crossover G19X, with GLOCK 17-sized frame, GLOCK 19-sized slide, GLOCK Multiple Back Strap System, Marksman barrel, Tritium night sights and Coyote finish. The new Glock 48 and 43X feature a slimline compact frame, 10+1 round capacity and a new silver colored slide, with a shorter (3.41") barrel on the G43X. The new G45 features the 17-round magazine capacity of the G17, plus the 4.02" barrel length of the G19. A veritable Alice's Restaurant of polymer delights.

While I had heard and read a great deal about Sig Sauer's ([sigsauer.com](http://sigsauer.com)) new micro-compact P365 9mm, I'd never actually seen or handled one. It is indeed impressive. Holding it, you'd never imagine it carries 10+1 rounds, and an optional 12-round extended mag is available. Dimensions are 5.8"L x 4.3" H x 1.0" W. Weight, unloaded, is 17.8 ounces. Definitely an EDC worth considering.

For many years, I had hoped to find an original SIG P210 9mm pistol in its original military form. Definitely a grail gun, it was probably a good thing that I never did find one...I couldn't have afforded it. SIG is now offering an American-made target-oriented P210 at a street price about half

that of its European predecessor. It is built like the proverbial Swiss watch and incorporates a number of upgrades on the original, including a beavertail and an American-style frame-mounted magazine release. My only complaint was the grip was a bit too large for my hand, but the sales rep said they would be offering a reduced-size grip option later this year.

I stopped by the Kimber booth ([kimberamerica.com](http://kimberamerica.com)) to check out their new striker-fired EVO SP 9mm subcompact carry pistol. The appearance of the basic model is reminiscent of the classic Colt Model 1903 hammerless, which is a good thing. Kimber has had some background in the striker-fired pistol field, and hopefully has learned from the experience. Also, I was gratified to see that they have added a double action/single action version to their excellent K6 .357 Magnum revolver line.

Chiappa Firearms ([chiappafirearms.com](http://chiappafirearms.com)) can always be counted on for something new and different, and sometimes totally bizarre. And this year, they certainly did not disappoint. Behold, a new 6" .357 Magnum Rhino revolver, resplendent in an iridescent gold coating with blue laminate grips!

There is a wide range of dining choices in the Venetian/Palazzo complex...almost all mind-numbingly overpriced. I did enjoy a reasonably priced dinner at the Grand Lux Café in the Palazzo, and a Skinner Sights-sponsored buffet breakfast at the Grand Lux Café in the Venetian. As is our custom, Mark Pixler and I returned to Lawry's Prime Rib for their eponymous specialty. This restaurant is an American classic...a time tunnel to a more relaxed and gracious age.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM<sup>^</sup>

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**P22-16627, \$90.95**

### PRIMER SYSTEM EARLY WARNING<sup>^</sup>

Allows you to focus on loading  
instead of worrying about failing to  
seat a primer, and is an easy slip-on  
attachment to the auto prime system.

**P22-20302, \$27.95**

### AUTO POWDER SYSTEM<sup>^</sup>

Accurate to within 0.1 grain,  
our Automatic Powder Measure is  
world renowned for its charge-to-  
charge consistency.

**P22-20251, \$96.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**P22-21353, \$33.95**

### AUTO EJECT SYSTEM<sup>^</sup>

Greatly increases your  
ammo production capabilities  
and adds a Cartridge Chute/  
Bracket and a Cartridge Bin to  
your reloader.

**P22-22120, \$33.95**

### BL 550 POWDER DIE<sup>^</sup>

Extra powder dies for your BL 550  
make it easier to set up additional  
toolheads for loading different calibers.

**Powder Die: P22-16629, \$20.95**

**Upsize Die: P22-16626, \$20.95**

**Plastic Funnel: P22-16617, \$6.95**

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.95 each, or \$24.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

### POWDER MEASURE ADAPTER

If you load rifle cartridges  
with long-grain extruded  
powder, you can now use any  
manufacturer's powder measure  
with 7/8" x 14 threads on your  
RL 450, AT 500, BL 550 or RL  
550. (Requires the use of an RL  
450 powder die – see below.)

**P22-20029, \$24.95**

**RL 450 Powder Die:**

**P22-20308, \$23.95**

# RL 550C<sup>^</sup>

## STANDARD FEATURES:

- Made in the USA
- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

## Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	<b>P22-22051</b>	<b>\$52.45</b>
XL 650-only	<b>P22-22052</b>	<b>49.45</b>
"SDB"	<b>P22-22223</b>	<b>68.45</b>

## Dillon's "Belted Magnum" Powder System<sup>^</sup>

System<sup>^</sup> features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>P22-97126</b>	<b>\$158.95</b>
----------------------	------------------	-----------------

## Dillon's Roller Handle<sup>^</sup>

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	<b>P22-17950</b>	<b>\$48.95</b>
------------------------	------------------	----------------

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>P22-22214</b>	<b>\$45.95</b>
1050 Tray Kit	<b>P22-22215</b>	<b>45.95</b>

## Dillon's Low Powder Sensor<sup>^</sup>

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	<b>P22-16306</b>	<b>\$43.95</b>
--	------------------	----------------

<b>Quick-Change Cover<sup>^</sup></b> for use with powder measure.	<b>P22-11143</b>	<b>\$14.95</b>
--	------------------	----------------

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550!

# Dillon's Case Preparation Equipment

**CV-2001<sup>^</sup> P22-20493 \$191.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part.

Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750<sup>^</sup> P22-19455 \$146.95**

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator<sup>^</sup> P22-20675 \$78.95**

**CM-500 Case/Media Separator<sup>^</sup> P22-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers: Case Cleaners are available in 220 volt!

**Euro CV-2001 P22-22047 \$216.95**

**Euro CV-750 P22-19473 \$171.95**

## Rapid Polish<sup>^</sup>

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

Case (20 pc.)	<b>P22-20255</b>	<b>135.95</b>

## Case Lube<sup>^</sup>

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

*D.C.L. Dillon Case Lubricant*

8 oz. bottle	<b>P22-13733</b>	<b>\$11.95</b>
Case (20 pc.)	<b>P22-20256</b>	<b>168.00</b>

<i>Half and Half</i> 10 bottles of polish /10 of lube <sup>^</sup>

# 22 Dillon's RF 100 Automatic Primer Filler

**Eliminates the need for primer pick-up tubes!**  
**Fills the primer tube while you reload!**  
**Clear polycarbonate shield and protective housing**

Dillon's RF 100 Automatic Primer Filler<sup>^</sup> eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$52.95 each.

## Super 1050/RL 1050 Short Trim Die Toolhead<sup>^</sup>

**P22-62219**  
**\$230.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. **(NOTE: the Blue 1050 toolhead stand – Part Number P22-62200, \$49.95 – is not included.)**

# Rapid Trim 1500 Case Trimmer<sup>^</sup> 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P22-62164** is **\$337.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P22-13141**, are **\$20.95** each. Upper lock rings, **P22-13559**, are **\$5.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600<sup>^</sup>

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# Dillon's Concealed Carry Tote<sup>^</sup>

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for

quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle

### Conceal-Carry Performance Series

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

## Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

# “Plan B”<sup>▲</sup>

## Very-Bad-Day Planner Holster

Dillon’s “Plan B” Very-Bad-Day Planner Holster<sup>▲</sup> holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won’t draw undue attention. It looks like a typical day planner, but inside there’s a holster that’s adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels. “Plan B” Holster **P22-10252 \$24.95**

# 5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

## BLADE-TECH™ Ultimate Carry Belt by Nexbelt

The Blade-Tech Ultimate Carry Belt by Nexbelt is specifically designed for those who carry a firearm daily for personal defense. The PreciseFit ratchet system allows you to quickly tighten or loosen the belt in 1/4" increments up to 6" for the perfect fit – no matter how you carry. Rest assured, this will be the most comfortable and fastest adjusting belt you will ever own. The Ultimate

Carry Belt has a water-resistant backing that helps prevent moisture from penetrating the outer surface and allows for extra strength and durability. **One size – adjusts to fit all.**

## K. MACHINE MAINTENANCE KIT<sup>^</sup>

Everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit.

**Maint. Kit & 1050 Spare Parts Kit P22-97018, \$51.95**

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# Range Bag<sup>^</sup>

Dillon's Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 64). The Main Compartment is 12.5" long x 7" wide x 10" high, the End

Pockets are 8.5" tall x 6.5" wide x 2" deep and the Front Pocket is 9" tall x 6" wide x 2" deep.

Range Bag, Black	<b>P22-19366</b>	<b>\$89.95</b>
Pistol Pouch, Black <sup>^</sup>	<b>P22-17027</b>	<b>10.95</b>

## 'Border Shift' Ammo Bag<sup>^</sup>

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

**I.D. Card Holder**  
**P22-14575 \$2.95**

**Black Ammo Bag**

**P22-13755**

**\$25.95**

## Dillon's Shooting Mat<sup>^</sup>

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*

**P22-18146 \$65.00**

<sup>^</sup> **WARNING:** The products offered for sale in this catalog can expose you to chemicals, including DEHP, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# Mr. Bulletfeeder<sup>®</sup>

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

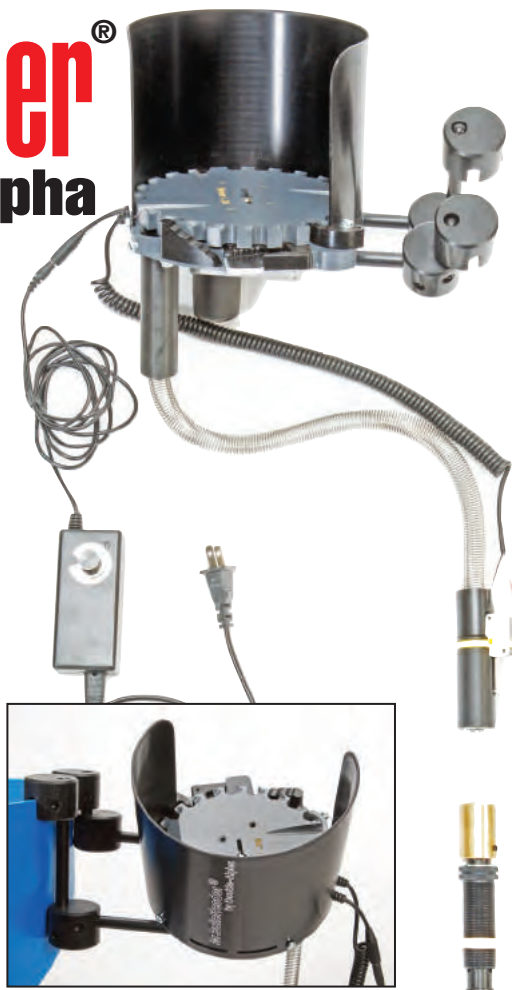

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

## Mr. Bulletfeeder<sup>®</sup> Replacement Parts & Spares

**H**aving separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

**T**he Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collar to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

**L**ose a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

# Dillon's Pistol Die Sets

## Size Die

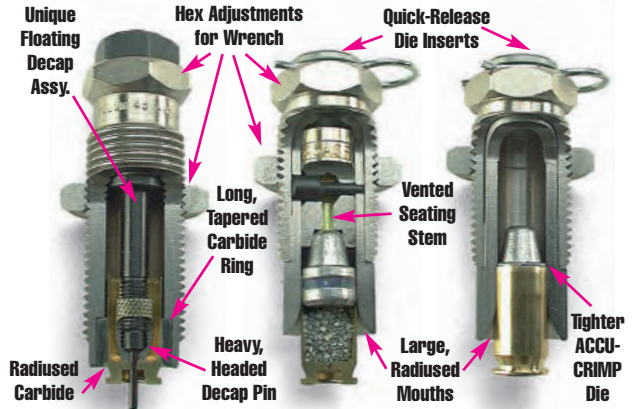

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)<sup>^</sup>

.223 Remington	P22-10839	\$80.95

Nick Saiti of Team POF shooting fast from the Stage 10 tank turret.

By Mark Johnson-Barbier & Richard Bhella

“Not those targets,” he said, pointing to the steel plates stacked on my trailer, “Those targets are waaaaay too big.”

We were constructing a stage that had a tank turret and a lot of novel targets. When the shooter inside the turret opened the hatch, it would activate a confusing array of moving targets sprinkled amongst reactive targets that broke, fell or spun according to the hits. The *pièce de résistance* was an MOA Targets Polish Plate Rack with clay targets nestled INSIDE no-shoot plates... you had to break the clays cleanly or you set the evil contraption spinning wildly. It was a devilish design – devilishly fun, that is! Just like every stage at the Quarter Circle 10 2018 Arizona State Pistol Caliber Carbine Championship.

The Rio Salado Sportsman’s Club in Mesa, Arizona is arguably the Mecca of action shooting, and has earned a well-deserved reputation for hosting innovative and popular matches. In support of their mission, they have amassed an enviable collection of exotic props and targetry. This unique event exploited these many resources to push the capabilities of the PCC platform to the max. In only its second year, the match has secured must-not-miss status with top in-state and out-of-state competitors. Dillon Precision was a major match contributor for the event, and I was privileged to participate in building it, running it and documenting the excitement.

In 2018, participants had the option to shoot the entire match in one day (Friday) or over two days (Saturday/Sunday). The list of competitors read like a Who’s Who of top action long-gunners from across the Western US – Neal, Saiti,

McCamish, Williams, Kitzmiller, D’Angelo, and many more. The overall winner for the second year running was PCC-Supremo Max Leograndis of Utah.

## Equipment Divisions

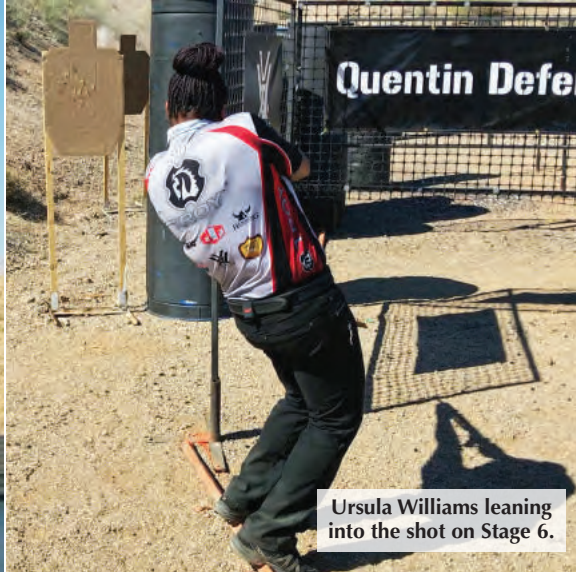

The equipment divisions for this match accommodated a diverse range of guns and gear, with a venue for virtually every type of PCC to be competitive. Even with targets out to nearly 200 yards, iron sights and red dots were popular in their respective divisions (Irons and Limited). At the top of the technology and price spectrum, Open division guns were festooned with magnified optics, bipods and all the other go-fast upgrades you’d expect to find on a racing thoroughbred.

Perhaps the most interesting division was Modern Classic, which required a PCC based on “a submachine gun designed and commercialized prior to January 1st 1980.” As the only division not dominated by the AR15/9-platform (an 80s baby), we were treated to the spectacle of Uzis, Tommy guns, even a Falklands War-era Sterling reweld, battling it out. When the smoke had cleared, this division was won with an MP5. I can say from firsthand experience that there are few things more humbling than you with your modern race rifle being beaten by a gun conceived before your parents were born.

## Stage Highlights

Space and time don’t allow a detailed description of every stage so we’ll focus on the aspects that seemed to generate the most buzz.

Two helicopters, a car, an elevated tower and the aforementioned tank turret adorned the stages and kept the competitors on their back foot. As

Ursula Williams leaning into the shot on Stage 6.

Diana Brafford moves fast on Stage 6.

well as crowds of traditional IPSC-style paper targets and falling steel, reactive rifle targets normally seen only in 3-Gun matches were scattered out to nearly 200 yards. On one stage there was even a flying clay target (which I missed). On another was a “William Tell” arrangement with a golf ball target sitting atop a no-shoot Popper that set a Texas Star spinning... without doubt the most clutch shot of the match. As befits a PCC-only match format, the round count was high enough to drain even the largest of magazines, forcing almost everyone to fumble through speed-reloads.

In addition to the prodigious quantity of shooting, what really made the match stand out was the quality of the shooting. Most stages presented genuine options for tackling them in different ways, making the challenge as much cerebral as physical. Should I go through the helicopter or around it (I went through so I could impress my kids)? Which order to shoot the movers? Where do I reload? Semi-hidden targets were easy to run past, incurring a hefty “target not engaged” time penalty.

The mid-range targets were new to many competitors, and required them to bring with them a sound understanding of external ballistics – when you run the numbers, it is amazing just how much pistol bullets drop and blow around in the wind at three-figure distances.

### Equipment

As the popularity of PCC competition has grown, the search for the Goldilocks Gun – fast-handling, flat-shooting, reliable and accurate – has been frantic. Most of us are not there yet. As we experiment, we are starting to discover just how

fragile these guns can be. Most are blowback designs, which is a brutally hard operating system. Gas-operated systems are softer, but are vulnerable to ammo variability. Delayed blowback has its own set of issues.

At this match, I saw numerous PCCs go down, some in spectacular ways. I saw people borrowing equipment, hammering and wrenching on what they had, and clearing jams of every conceivable type. Magazine failures were common. The Range Master reported approving an unusually large number of gun changes – he estimated close to 10 percent of the shooters had to switch to a backup or borrowed gun. One unfortunate competitor brought two guns, both of which became unserviceable – in the end he bought a Quarter Circle 10 gun from the demo area so he could finish the match. My biggest take away was that equipment DOES matter when it comes to PCC competition. Buy from one of the established vendors like the ones who sponsored this match – they’ve already worked out the kinks and their products work.

In addition to the guns, we are discovering the importance of handloading PCC-specific ammunition for optimal ballistics, accuracy and sight recovery in our PCC platform of choice. Most of us are loading on a blue machine to ensure our ammo is the one thing we don’t have to worry about.

### Sponsors

The shooting schedule gave competitors a dedicated time slot in a vendor demo area “stage” where they could rest, refuel, consult with the vendors, and play with vendor demo guns. The

Max Legrandis goes through the helicopter on Stage 3.

fine folks from QC10, Gibbz, KE Arms, Quentin Defense, VLTOR and Riton have a huge amount of experience making equipment that works, and even the short time I spent talking with them gave me insights that no amount of internet forum discussion or YouTube viewing could have matched. Had I discovered this same wisdom two years ago when I started my PCC Odyssey, I am sure I would have saved a lot of time and money.

Unlike similar events, the generous prizes at the AZ PCC Championship were distributed by random draw during the match as each squad rotated through this vendor demo area. By eliminating the need for everyone to attend a post-match award ceremony, this approach enabled some participants to complete the match in one day without losing out on the prize table. Most

folks were pleasantly surprised to find their prize bags contained cool PCC-related gear of at least the value of their entry fee. The feedback on this way of doing things was overwhelmingly positive.

Of course none of this would be possible without generous industry support. Sponsors of the AZ PCC Championship included Quarter Circle 10, Gibbz Arms, Riton Optics, VLTOR Weapon Systems, Elftmann Tactical and Dillon Precision. Stage sponsors were MOA Targets, KE Arms, Luth-AR, Springfield Armory, Vortex Optics, Quentin Defense, Speed Beez, Ballistic Advantage, Aero Precision, VG6 Precision and Safariland.

If you're interested in shooting this match in 2019, watch the "Arizona State PCC Championship" group on Facebook or monitor the multigun match announcements forum at [brianenos.com](http://brianenos.com).

# Gun Laws We Need, Part IV: “Re

By Alan Korwin

Officials promoting so-called “red-flag laws” should be evaluated for fitness to serve. Why? Because their so called “extreme protection orders” are blatant constitutional violations and have no place in an American system of justice. This much is obvious.

Empowering your neighbors, roommates, former lovers, relatives or people who have a grudge against you to use armed police to attack you, without warning or probable cause, does you serious criminal harm and must be stopped cold. Encouraging the public to “red flag” each other is what dictators did in the Soviet Union, communist China and elsewhere. Leftist sympathizers in America are attempting it here. It cannot be allowed to proceed.

If people are too dangerous to keep and bear their own arms, they are too dangerous to be out in public, period.

Proposing to take a person’s rights by armed force, without a trial or even a hearing, is such a violation of our laws, such an affront to the principle of innocent until proven guilty, and such a misuse of armed might, that anyone suggesting it should be subject to at least the psychiatric evaluation they would impose on us.

Legitimate methods already exist for intervening with truly dangerous people. Reluctance to do so reflects the extraordinary nature of taking such action against a person. Red-flag laws on the other hand are a casual workaround and a “clear and present danger” to public liberty. Proposing due-process removal by flagging is as bad as proposing racism by statute. The advocates must be stopped.

Using mass media to whip the public into a mass frenzy to support this paranoid delusion is a harbinger of the end of our peaceful Republic. It signals a desire to overturn centuries of righteous law-making with mob violence, turning neighbor

against neighbor in a vain effort achieve safety. Ben Franklin framed it perfectly: “Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety.” Shouldn’t we all be flagged? Isn’t everyone potentially dangerous?

## Criminal Penalties for Voiding Due Process

The dilemma: How do we structure a new bill so “officials” who stand in the way of full and free exercise of a given right face a penalty, or some deterrent to their actions? Like the Civil Rights Act of 1964 aimed to do?

The left in its fury is ignoring whether bills can pass legal muster. They push the envelope: “We’ll examine your Google search history before we’ll grant a carry license.” Preposterous of course, a product of one dimwit Brooklyn, N.Y. legislator. What would they do with what they find? Who does the looking, and who could possibly pass? They don’t say, but they push it, then “news” media bathes in it, and next thing you know, it’s part of the social fabric – “the narrative.”

We must do the same, force them back on their heels, even the odds. Should we seek Google checks for politicians and police before they’re hired? Let them gripe. Officials who examine “bad” Google histories, maybe they’ve been corrupted by reviewing disqualifying histories

(whatever that may be, it’s undefined). Officials who promote grotesque civil-rights violation into laws should face repercussions. Why would honest people object?

Fortunately, we don’t have to invent new laws. We simply need to resurrect existing ones, and enforce them. The U.S. Attorney’s Office has been remiss in failing to enforce critical laws on the books: 18 U.S.C. §242. Deprivation of rights under color of law.

Discriminating against civil rights is illegal. The right to keep and bear arms is and has always

**“Your right to defend your life against anyone or thing that unjustly threatens you has historic precedent going back to before the Bible.”**

# “Red Flag Laws” Raise Red Flags <sup>41</sup>

been a basic civil and human right. Your right to defend your life against anyone or thing that unjustly threatens you has historic precedent going back to before the Bible. It is enshrined in the earliest written law, the Code of Hammurabi in 1700 B.C., and it was restated by the U.S. Supreme Court in the Heller Case as a “specific, enumerated right” (District of Columbia v. Heller, 554 U.S. 570, 628 n.27 (2008)).

In plain English, federal criminal code says anyone who, under color of any law, statute, ordinance, custom or regulation, willfully deprives any person of any rights, privileges, or immunities secured or protected by the Constitution or laws of the United States, shall be fined or imprisoned for up to one year, or both.

It continues that, if bodily injury results, or if the violation includes the use or attempted or threatened use of a dangerous weapon,

explosive or fire, the prison term rises up to 10 years. If death results, or if such acts include kidnapping, attempted kidnapping, aggravated sexual assault, attempted aggravated sexual assault, or an attempt to kill, the violator may be fined, imprisoned for any term of years up to life, or put to death. That’s sufficient. It needs enforcement.

The left is screaming for new laws, let’s give them some! Tax credits for gun-safety classes, encouraging a responsible citizenry, anyone? We must also look at repeals of the most onerous ones. Do you agree?

*Alan Korwin, a national columnist, award-winning author of 14 books and veteran of more than 1,000 radio and TV interviews, has been writing as a journalism ombudsman since 2006. He can be reached at [GunLaws.com](mailto:GunLaws.com) where you can read more common sense like you just read.*

## The Original M1 Buddy®

**The Original M1 Buddy Service Rifle Cleaning Port** fits all models of M1 Garand and M1A rifles. Unlike other service rifle cleaning ports on the market today, the M1 Buddy allows you to use either the ratcheting GI Chamber Brush or GI Combo Tool while the cleaning port is in place! No need to worry about those fingers anymore! The Original M1 Buddy is covered by a lifetime warranty and will be replaced free of charge if it fails under normal use.

P22-13447 \$12.95

**The Original Carbine Buddy Cleaning Port** enables you to clean your M1 Carbine chamber without worrying about pinching your fingers. The Original Carbine Buddy is covered by a lifetime warranty and will be replaced free of charge if it fails under normal use.

P22-13452 \$9.99

## The Lever Loader

**The Speed Beez Lever Loader** gives you the mechanical advantage you’re looking for! Works with double-stack Glock 9mm mags with or without magazine extensions. A must have for Pistol Caliber Carbines using Glock mags.

P22-12337 \$24.95

# CLASSIC FIREARMS: The Ger

## By John Marshall

During World War II, it was, next to artillery, the most feared weapon on the battlefields. It spit death at up to 1500 rounds per minute. The sound of its firing mimicked that made by ripping canvas (but way louder). Its astonishing rate of fire made it impossible to distinguish the sound of individual rounds as they were fired. This was at a time when Allied machine guns managed only 450 to 600 rounds per minute. The German Maschinengewehr 42 (MG42) garnered quite a few nicknames – notably among them “Hitler’s buzzsaw.” It simply outclassed every other machine gun that existed at the time.

It had several other notable features. Its framework was mostly stamped sheet steel, making it quite lightweight; just 25.6 pounds with bipod but without ammunition drum. Its barrel could be easily and quickly replaced in a few seconds, and this was important because its barrel could and did get red hot in extended firing. It operated simply with an ingenious roller lock, which has been copied and is still being used today in numerous firearms. Its generous component tolerances allowed continuing operation in dust, mud, sand, rain and snow. It was treasured by the German Wehrmacht and respected immensely by the U.S. and its allies. Our soldiers were trained to flank it or frontally attack it only when it was out of ammo or temporarily down for barrel changing. To do otherwise was virtual suicide.

The gun was a huge improvement over its predecessor, the rotating-bolt MG34. That machine gun pioneered some of the features that were perfected in the MG42, but was very expensive to manufacture, requiring many intricately machined parts. Even its exterior was polished and carefully blued – nice to look at, but not in any way useful under the incredible manufacturing demands of all-out warfare. It fired at a fairly fast rate of about 850 rounds per minute, but still quite slower than

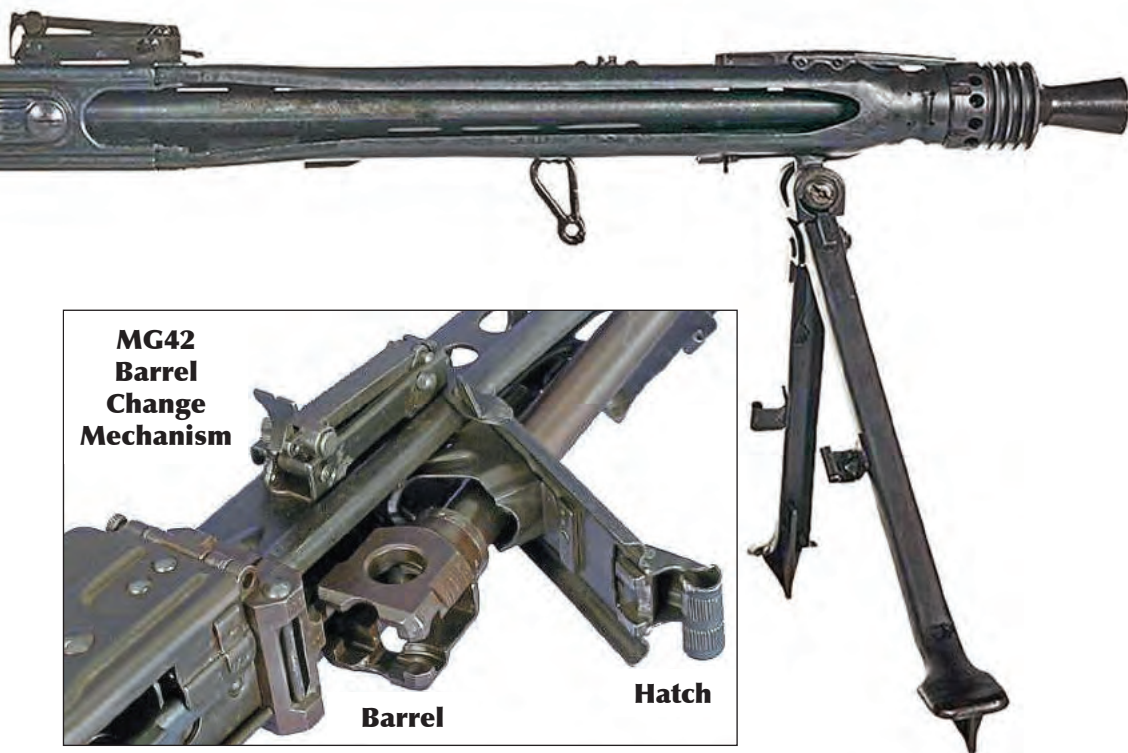

the MG42. Manufacturing tolerances were tight, and that could be quite troublesome under adverse field conditions.

The German high command wanted a substantial improvement over the MG34, and a contest was launched to find a replacement for it. Three companies were chosen to compete. These were Metall und Lackierwarenfabrik Johannes Großfuß AG of Döbeln, Rheinmetall-Borsig of Sommerda, and Stübgen of Erfurt. Of the three, Großfuß AG’s design proved to be the most promising. While the two other designs were gas-operated, the Großfuß concept used a recoil-actuated roller lock. Interestingly, this company had zero weapons experience, but excelled in pressed and stamped-steel manufacturing. Dr. Werner Gruner was one of its leading designers. He attended an Army machine gunner’s course, and talked with many soldiers for ideas. He decided to use already-existing Mauser roller-locking principles and integrated that style of lock into a largely stamped-metal gun. As it turned out, while it took about 150 man-hours to make an MG34, the new prototype MG39 took only 75. Also the cost was about 24 percent less for the newer gun.

The prototypes, under testing, turned out to be considerably more rugged and reliable than the MG34. A small run of about 1,500 was finished in 1941 and this type of gun was designated as the MG39/41. These successfully completed field trials in actual combat. The weapon was officially accepted as the MG42 in 1942. Contracts were immediately initiated with Mauser Werke AG, Wilhelm-Gustloff-Stiftung, Steyr-Daimler-Puch, Großfuß AG, and MAGET (Maschinenbau und Gerätebau GmbH, Berlin-Tegel). Over 400,000 MG42s were produced during the war (17,915 in 1942, 116,725 in 1943, 211,806 in 1944 and 61,877 in 1945).

Specifications for the MG42 were impressive. It fired the full-power 7.92x57mm Mauser (8mm

# German MG42 Machine Gun

“It spit death at up to 1500 rounds per minute.”

Mausler) cartridge used in standard German rifles of that era. Muzzle velocity was 2,428 feet per second. Its overall length was 48 inches, and the barrel measured 20.9 inches. The rate of fire could be adjusted with different bolts and recoil springs to be from 900 rpm to 1500 rpm. It was fully automatic only, fired from an open bolt, and had a practical rate of fire (with cooling pauses) of 153 rounds per minute. The adjustable iron sights were calibrated from 200 to 2,000 meters. Its maximum effective range was 3,500 meters with a tripod and scope sight. Maximum range was 4,700 meters. It was usually fed from an open 250-round ammo box or a 50-round drum. Both used non-disintegrating linked belts that were also employable in the MG34. As mentioned, it had a quick-change barrel mechanism.

While Allied tactics keyed on riflemen, German tactics during the war were based around the general-purpose machine gun, with the objective of laying down as much firepower as possible on their enemies. Riflemen were essentially in support roles such as carrying ammunition and spare barrels, while also providing cov-

ering fire for the machine gunners. A German infantry squad (Gruppe) consisted of 10 men. There was a non-commissioned officer squad leader (Unteroffizier), a deputy squad leader, and a three-man machine gun team consisting of a gunner, assistant gunner (loader), and an ammunition carrier. These were supported by five riflemen. Spare barrels for the machine gun were distributed for carrying by members of the squad. Machine gunners were trained to fire in short bursts to prevent overheating of the barrel, but in intense combat, the barrel would need replacing often. While the MG42 was most often fitted with a folding bipod, tripods were also used, as well as anti-aircraft sights. While the MG42 was light enough to be hand-carried in combat, firing it standing up would be punishing.

The MG42 is still being used by many entities well after the war. It morphed into a number of successor machine guns used by Germany, and was copied in its principles worldwide. Some of its design elements were used in the U.S. M60 machine gun. It was an epochal development in the tools of war, and is still a classic and respected device.

## Lyman Precision Funnel Set

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. No more powder clinging to surfaces, which can happen with lightweight plastic funnels. The solid construction and quality of Lyman's Precision Funnel Set will be apparent in its first use. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

P22-11389 \$39.95

## Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The Lyman X-Block is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

P22-11390 \$15.95

# Magnum

## By D. K. Pridgen

In 1971, Clint Eastwood's super-cop movie, "Dirty Harry" was released and immediately drove every red-blooded American male (and a number of females) to salivate for their own blued S&W DA Model 29 .44 Magnum revolver sporting a 6-1/2 inch barrel. (Even though an 8-inch barrel appeared in some posters.)

I'm not sure how long it took the scalpers' prices for the 29 to double and triple, but not long! (Gun shops requesting a Model 29 were reputedly told by distributors to purchase a number of much-less-desirable S&W firearms as well as accessories to get a 29 included in their shipment.)

We "working guys" were quickly priced out of owning 29s, unless we had a large savings account or started one – and saved for quite a while before the purchase. I waited a few years and bought a .44 Magnum Ruger Super Blackhawk, satisfying my .44 Magnum and single-action craving at the same time, and a Bianchi shoulder holster. (You've got to have a shoulder holster to get into the Dirty Harry persona!) This saved me time and cash – cash for more cases, bullets, powder and primers.

Dirty Harry's cartridge and S&W revolver originated from the efforts of famed gun writer Elmer Keith, who was instrumental in birthing the .357 Magnum. He began his quest for the perfect big caliber handgun-hunting cartridge using a .44 caliber Colt SAA. At some point Elmer switched to a double-action .44 Special S&W N-frame revolver. He seemed to have little concern about the SAA's or the S&W's topstrap's durability. (In fact, he seemed at times to completely disregard SAAMI.)

Even S&W Triple Lock Target Revolvers chambered in .44 Special just did not cut it for Elmer, who stoked the cartridges with every powder he could find looking for something that would zip a big bullet effectively into heavy game at distance across canyons. He finally settled on Hercules (now Alliant) 2400. Unfortunately, the .44 Special case usually just did not cut it. Not enough case capacity for all the powder Elmer wanted to safely burn reaching out and touching mule deer or such.

I suspect, although history doesn't say it, S&W finally tired of hearing Elmer (and dedicated readers), discuss the merits of this type shooting the souped-up .44 Special and the need for a mag-

# Reloading

num cartridge and revolver. In July of 1955 S&W began offering a beefed up N-frame revolver in a new cartridge too long for a .44 Special cylinder – called the .44 Magnum.

In 1975 the shooting world's usual cast of then movers and shakers experienced shooting steel game shaped silhouettes (ram, boar, turkey and chicken) at 200 yards with handguns. They liked the concept and in 1975 the International Handgun Metallic Silhouette Association (IHMSA) popped up. Powerful handguns, like the .44 Magnum, shooting heavy bullets to knock over those silhouettes reigned.

Whenever the local IHMSA match coincided with our late-1970s IPSC "run and gun" matches, a few of us would meander over and join in. Hard cast bullets were just the ticket and we all cast bullets and were already aware of the need for gas checks.

I found few actual complications in reloading the .44 Magnum, except the need for a *really* heavy crimp on the 240-grain bullet to keep recoil from ejecting bullets and jamming a cylinder up. Powders were usually a hat-full of Elmer's favorite 2400.

Of course, in the absence of carbide dies, there was the interminable case preparation dance – lube the cases up, de-prime, resize and flare the case mouth. Then wipe the lube off with a solvent or tumble them clean in walnut shell or corncob media, and check primer pockets for walnut

pieces that were known to hide there! I found the solvent route the quickest and easiest for my relatively small number of cases.

Between everyone loading for the .38 Special/.357 Magnum, .45 ACP, and .44 Magnum (9mm users were somewhat scarce back then), eventually there was not a smidgen of wheel weights to be easily found within 50 miles of my Texas coastal home. With the need to clean the lead before using it and adding tin especially for the .44 Magnum, casting was really not that much fun.

The same rounds we used on steel worked pretty well on live game, just as Elmer predicted. What he dropped mule deer with, effectively harvested white tail deer and the occasional feral pig in my area of Texas. (Swarms of feral pigs did not really make themselves known for a number of decades.)

For me, the .44 Magnum cartridge was never a high-volume reloading project, unlike with other cartridges we've covered. I didn't spend untold hours at the range beating my wrists and elbow unmercifully. A single-stage press was adequate.

Despite that fact, once I had gotten my Dillon Precision fix for all the cartridges I called high volume, and had been spoiled by the speed, convenience and how Dillon loaders simplified reloading, I just had to have Dillon equipment for the .44! I really did not want to consider that single-stage press again.

# 50 "Big Fifty Reloader"™

## STANDARD FEATURES:

- Made in the USA
- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

## BFR Accessories

### A. .50 BMG CASE TRIMMER ASSEMBLY<sup>^</sup>

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**P22-50050, \$419.95**

### B. .50 BMG CARBIDE SIZE DIE<sup>^</sup>

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**P22-50075, \$984.95**

### C. .50 BMG POWDER MEASURE ADAPTER<sup>^</sup>

For use with the RCBS .50 BMG powder measure.

**P22-50125, \$87.95**

### EXTRA "BFR" TOOLHEADS

**P22-19831, \$207.95**

### D. .50 BMG PRIMER SEATING DIE<sup>^</sup>

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**P22-50200, \$169.95**

### E. .50 BMG PRIMER POCKET SWAGER<sup>^</sup>

Makes it easy to remove the military crimp.

**P22-50001, \$354.95**

## Dillon's Bench Wrench Fits 1" Die Lock Rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to

re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	P22-14067	\$1.75
5-Pack of Die Lock Rings	P22-10669	5.50

# Comtech's STINGER

**THE STINGER:** Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

P22-19495 \$9.95

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

ZFH1500 AR15 Flashlight Mount	P22-12020	\$29.95
ZSM Tactical Shotgun Mount	P22-18050	39.95

## The ERGO Grip Delta

Grip™ is the first truly ergonomic grip for J Frame revolvers. Designed for the most important part of the gun, the shooter, the Delta Grip was engineered to fit the natural point of aim and mechanics of the human hand, wrist and arm. Fits round butt J-Frames. Will not fit on Smith and Wesson Body-guard 38 Model (sku 103037 and 103038).

P22-19684 \$19.95

# Tactical Shotshell Strippers

California Competition Works' Tactical Strippers are available in four- or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with a belt clip that will accommodate up to a 2-1/4" duty belt.

Six-Shell Tactical Stripper P22-18606 \$23.95  
Four-Shell Tactical Stripper P22-18605 22.95

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

P22-21894 \$46.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

P22-19972 \$39.95

## Berry's Manufacturing Pan Sifter

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter P22-17519 \$9.99

## Outers 51-Piece Screwdriver Kit

Includes a form-fitted case, a magnetic-tip driver, 15 flat head, 10 inch hex, 9 metric hex, 4 Phillips, 9 Torx, 2 extra long Phillips bits and 1 hex-to-square adapter.

P22-10281 \$19.95

## Dial Caliper<sup>^</sup>

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

P22-13462 \$28.00

## High Tech Digital Caliper<sup>^</sup>

**Accurate,  
Easy to Read!**

P22-17171 \$39.95

Nobody's perfect. A bullet puller makes it easy to recover all your components.

Bullet Puller<sup>^</sup> P22-17999 \$29.95  
 Puller Cap<sup>^</sup> P22-17948 4.95

# A Training Session With Action Shooting

Sandy Wylie teaching the author the technique for proper sight alignment.

## By Connie Bowlby

As Andrew and I celebrated the end of 2018, we reflected on what an incredible year it has been for us both. We started dating in January after having shot ASI (Action Shooting International, [asi-usa.org](http://asi-usa.org)) matches together for almost two years. Shortly after Christmas, we took the big step of moving in together. I wrote and published three articles. We traveled to three out of state GSSF (GLOCK Sport Shooting Foundation) matches. We finished the ASI year both in the top ten. Andrew finished 2nd and I ended the year with my first Top Lady award and 10th place overall. This was a direct result of how hard we worked in 2018 to improve our skills. For me, that was quite an accomplishment considering in the 2017 ASI rankings I didn't place high enough to receive points.

Now, as I set my focus to the year ahead and what I would like to accomplish, I of course have many goals for 2019 because of my Type-A nature. I want to continue to improve my speed and accuracy to place higher on the ASI scoreboard. I plan to design a practice routine that includes dry fire drills and works on movement to increase my speed between shooting positions and transitioning between targets. I have set a challenging goal to reach the top five in the ASI annual top shooter rankings. I know this will mean more practice and pushing myself outside my comfort zone.

I have always looked forward to the beginning of the year because it feels like a gift. A clean

slate. A chance to make the time before you into something incredible. It is always flush with excitement and possibility.

Andrew and I have talked at length about taking some training classes to help improve our skills. There are many ways to do this. A number of professional shooters offer classes. Local ranges have many training classes to choose from. YouTube is a great place to find training videos. We have watched too many to count. Then I realized we have one of the most experienced shooters around right here at our ASI matches. Sandy Wylie is the Founder and Chairman of ASI. He has a long and impressive resume in the shooting sports. He has won many championships in Washington and Canada. He has also been a very active volunteer and executive on several Associations and Boards. The shooting sports in our area have been very lucky to have Sandy.

Involved for years in higher levels of competition, Sandy saw the need for a unique platform that focused on safety and inclusiveness. He hoped to delevage some of the higher-level skills and athleticism to allow new shooters to practice safe gun handling, enjoy the experience, and not feel intimidated. That is how ASI was started.

I asked Sandy if he would be willing to help Andrew and me with a few fundamentals. He graciously agreed to spend some time with us after the January Renton ASI match. We met with Sandy and his son Dustin about a week before to discuss what Andrew and I were looking to accomplish

# g International's Founder, Sandy Wylie

with this training session. Dustin is responsible for the majority of the ASI stage design and planning. We all decided to shoot together on the same squad at the Renton ASI match so Sandy could evaluate specifically what he felt Andrew and I needed to work on.

That evening Sandy touched on something I never expected but know is very important. Mindfulness. I consider myself a Buddhist and understand the concept of mindfulness but have not made the time recently to practice it. Mindfulness is a practice that allows you to observe everything without becoming attached to a specific outcome. This can be very helpful as a shooter progresses into higher levels of competition. It's often talked about as part of any sport we do at a high level. It can be described as being in the zone or the flow. Your body knows what to do and time seems to slow down as you perform the motions you have practiced so many times. I consider it an incredible gift that flows through you. You do not get to take credit for it. You cannot make it happen when you want to or control it. When you find yourself in that state, there is nothing else like it.

Sport Shooting can be an ego-driven pursuit. However, in my experience the ego has never been my friend. It only ends up distracting me by fanning my insecurities and putting me in an unsettled mental state. I find I often do much better at a match when I feel like I am not ready. Occasionally, I will say "I'm just not feeling it tonight, this is gonna be ugly." Andrew tells Sandy, "That's when she's dangerous and ends up having really good match." When I feel this way I think it helps me to let go of any expectations I have to do well. I just do what I trained to do and that little voice stays quiet. It feels more like I am watching myself shoot the stage.

The next Saturday at the Renton ASI match, I tried to practice mindfulness and forget that Sandy was watching me. In spite of the extra attention, Andrew and I both did well, finishing in the top 10 that day.

Sandy worked with us both for a couple hours after the match. He started specifically with having us keep the gun higher before pressing out to the sight-picture. Holding the gun steady, closer into the body and bringing the magazine up to the gun during reloads. Although it feels awkward now, with practice it will save time by allowing me to get on target faster. Using a higher retention position at the start of a shooting stage instead of arms extended out at a 45 degree angle at low-ready (many ASI stages start in the low-ready position), allows me to press right out to the target versus bringing the gun up to the target. When coming up to the target, there is a brief hesitation as the

gun settles. It may only be a fraction of a second, but it's wasted time.

Next was transitioning between targets. Sandy explained my eyes should be on the next target as soon as my last shot breaks. Trusting that I made my shots in the A-zone and not reading my shots or, as Sandy says, "leaving your shots behind" also saves valuable time. Watching my videos after a match is very useful because it shows specifically where I seem to hesitate. I am looking to see if I made my shots before engaging the next target. This really slows me down. I have to trust my accuracy and just go for it.

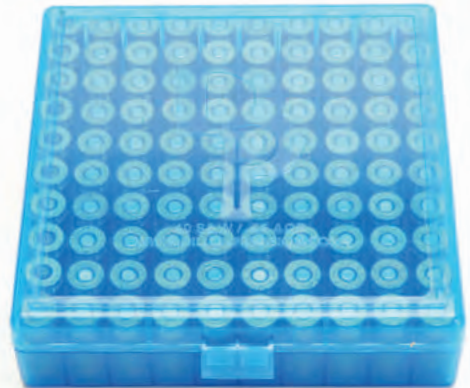

We worked on movement last. As soon as my shot breaks, my body should be leaning in the direction I need to travel. My feet will catch up. Knees bent, feet close together, moving quickly but softly, heel hitting the ground first, then toes with legs close together as if I am walking on a balance beam. Sandy explained that shooting faster is really about leveraging time. You only have so much time and you must use it to your advantage. For example, Sandy showed us a technique when moving into a shooting box. I should be extending my gun towards the target and as soon as one foot is in the shooting box I can take my shot before my second foot actually comes down. When that second foot comes down it can slightly disturb my gun, making my shot less accurate. Subsequently, when I leave the shooting box I am already pressing out to the next target. I can see on my videos this is something I really need to work on. I spend too much time getting into the shooting box, then settling into my stance and then pressing out to the target. Changing my technique here will help me save a lot of time. Andrew did very well. Many of the concepts we worked on, he has already been practicing. He has become a very good shooter and continues to improve.

I was initially worried about incorporating these new skills, knowing it could throw me off. I tried to focus on some of the techniques at the next ASI match in Arlington, Washington a couple weeks later. It takes time and consistency to change muscle memory. I was only able to use the new techniques for two of the six stages and it felt pretty awkward. I know it will take time and repetition to fully incorporate these changes. However, if I want to be more competitive, I have to be willing to try new things and trust that in the long run I will be better for it. I need to get out of my comfort zone and be willing to take risks. Luckily, I am not in the running for a World Championship title yet...so now is the time to take some risks and try new things. Find what works for me. Thanks Sandy! Hope to see you all out there.

**AMMO BOXES ARE COVERED BY DILLON'S LIFETIME WARRANTY**

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# Swab-its – A Swab for Every Job! <sup>65</sup>

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

# 66 New Products from Slip 2000

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks!

**NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P22-19237 \$19.95

Slip 2000 Carbon Killer provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

**NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P22-19234 \$19.95

Slip 2000's Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P22-11652 \$22.95

Slip 2000's AR Cleaning System contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P22-11676 \$18.95

## Slip 2000 Extreme Weapons Lubricant (EWL)

was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P22-11644 \$16.95

## Slip 2000 EWL30

has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P22-11645 \$19.95

## Slip 2000 Copper Cutter

is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing!

**NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P22-11646 \$10.95

## Each Slip 2000 Gun Wipe

packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube.

Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P22-11674 \$11.95

## Lyman Pick & Brush Set

Lyman's Pick and Brush Set is an indispensable item for your cleaning supplies and range bag.

P22-40160 \$3.99

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe P22-15732 \$10.99  
1.5 Ounces P22-15731 14.50

Revolver BLAST with TW25B is an all-synthetic lubricant/protectant specifically designed for revolvers.

4.2 Oz. Aerosol P22-66677 \$11.95

## E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth P22-18613 \$7.99

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

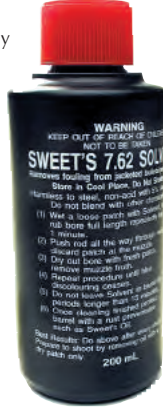

Slide-Glide Standard is for use in warm weather (F60+), Lite is a thinner viscosity for lower temperatures (F30+).  
 Slide-Glide Standard **P22-15571 \$7.95**  
 Slide-Glide Lite **P22-15572 7.95**

**Microlon UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.  
**P22-75125 \$9.95**

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

**P22-13128 \$12.95**

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

P22-19257 \$11.95

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# 70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

Elite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature

special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

## TAYLOR FREELANCE MAGAZINE EXTENSIONS

**Taylor Freelance Magazine Extensions**  
AR-15/Tavor 9mm SMG +10 P22-12377 \$39.95

This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many "stock" mag springs. *NOTE: Colt SMG mags come from many different manufacturers. Colt offered at least two major types – one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.*

- CZ Skorpion +10 P22-12378 \$49.95
- Extra length/strength spring included
  - Thumbscrew-and-gasket retention system allows for quick, easy disassembly.

**NEW!** GLOCK +20 Pictured P22-12148 \$69.99  
Transforms Glock 31-round magazines into 51+1 round mags. **Legal for PCC competition!**

- Extra length/strength spring included.
- SIG MPX +10 P22-12376 \$29.95
- Works with stock mag spring.
  - Angled floor stands the magazine straight up on a table for easier loading.

# 74 "The Perfect Small Parts Cleaning Accessory"

P22-10209 \$15.95

The HYSKORE Degreezer consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. As anyone who has cleaned a gun is aware, cleaning small parts is a major challenge. Given the available technology and fixtures, the standard procedure is to use some kind of cup or similar vessel, pour in a quantity of cleaning solvent, and then pick up the parts one by one and brush them clean. The Degreezer changes all of that. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. As a bonus, the set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline. The Degreezer will quickly become an indispensable fixture on your workbench.

## HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P22-10208 \$19.99

### Pachmayr Pac-Mag Gun Storage Magnet

Holds handguns, rifles or shotguns!  
Overmolded non-marring rubber protects your gun!

P22-10098 \$19.99

The Pachmayr Pac-Mag™ Holds up to 30 pounds and the three-magnet design gives the Pac-Mag more strength than any other gun magnet on the market. Secure almost any gun – pistol, rifle or shotgun – practically anywhere!

### OPSol Mini-Clip™

Allows the use of 12 Ga. 1.75" Birdshot, Buckshot and Slug shells. Fits 12 Ga. Mossberg 500, 590, 590A1 and Maverick 88 models

The OPSol Mini-Clip™ was designed to give "well seasoned" and "recoil sensitive" shooters the capability of shooting the trusty Mossberg 12 Ga. platform without the usual recoil response. By using The OPSol Mini-Clip™ in conjunction with 1.75" shotgun shells, shooters stay in the game without all of the pain. The Mini-Clip enables owners of Mossberg 12 Ga. shotguns to use Aguila Minishells reliably for training, practice, recreational or home-defense applications.

## TACTICAL PERFORMANCE GEAR

**JP Enterprises .308  
High Pressure Enhanced Bolt**  
P22-11301 \$199.95

these rifles. Unfortunately, these issues will persist until the manufacturers of ammunition realize that an AR platform requires a unique pressure curve to allow for both accuracy and reliability.

Manufactured to the exacting standards of JP Enterprises' standard bolt offerings, the High Pressure Enhanced Bolt™ design represents a giant leap forward in alleviating the problems traceable to over-pressured loads – namely primer flow, ejector smear, extraction issues, and ignition reliability. In combating these problems, this new bolt design opens up a much broader range of ammunition compatibility and load density in the AR .308/7.62 and other variants such as 6.5mm or 6mm calibers in this platform.

Among its other enhancements, the .308HP bolt features an improved ejector pin hole and modified ejector to mitigate case head extrusion and frequent brass shavings. The JP Enhanced Extractor eliminates virtually all extractor-related failures while the JP Enhanced Gas Rings provide a more reliable, lower friction gas seal with longer lifespan.

While ultimately every end user needs to be aware of the ammunition limitations of their large-frame AR, the JP .308HP bolt offers multiple advancements to vastly increase the ammunition and operational abilities of the platform.

For anyone using .308/7.62 AR-type rifles, it's common knowledge that many factory rounds exhibit excessive primer flow and/or ejector smear. At its core, this is a result of ammo development being done by manufacturers only for manual platforms without testing in semiauto platforms. Some rifle manuals even record the maximum recommended load data beyond the functional range of

# Bushnell TRS-25<sup>^</sup>

## Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 (Includes riser, not pictured.) **P22-31318 \$119.95**

## Scout Scope Mounts for AK, SKS Rifles

*Sorry, the optic pictured here is NOT included with the Scout Scope Mount.*

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **P22-25374 \$79.99**

# 78 The Firearms Academy of Sea

By Duane Thomas, Photos by Belle McCormack

I'm one of the first people to ever be awarded the Firearms Academy of Seattle's Handgun Master rank. My "number" the first time I passed this test was #13. Numbers 1-10 were actually reserved for FAS head man Marty Hayes and his instructors, and hadn't even been all filled-in yet when I pitted myself against this test for the first time; among FAS students I am, *de facto*, Handgun Master #3. Currently the number of Handgun Master rank recipients sits at 279.

Marty has continued to evolve the Handgun Master Test over the decades. A few years ago he told me that, other than him, I'm the only person to have ever passed the Handgun Master Test in all its various configurations. It would be more correct to say I'm the only student to do so. FAS instructors must re-certify on the Handgun Master Test on a regular basis.

FAS instructor Rick Bressler, back in his student days, was actually Handgun Master #12, right in front of me.

There have been four versions of the FAS Handgun Master Test. Prior to yesterday as this is written, I'd passed the Handgun Master Test four times: once on version #1, once on #2, and twice on #3. When Marty introduced version #4, well, you know I had to take a run at that. As we'll soon see, it actually wound up being "runs," plural, before I was done.

HMT version #1 had 13 different drills. Then nine on #2; eight on #3. Currently, it's five. In one sense, that doesn't mean the Handgun Master Test has gotten easier, relative to the skills you must possess to pass it, since a lot of that compression came from folding drills into each other. For instance, there used to be separate drills testing draw speed, reloading skills, and multiple targets work. Now those have been combined into one drill where success in dependent on the ability to do all three. In another sense, it does make things easier because it's lessened the amount of time you have to hold it together mentally and emotionally, and perform to a certain level.

Having said that, in the early years, Marty would let people try to pass the drills for hours on end. The Handgun Master Test actually took up an entire day of a class. Eventually he introduced the rule that you only got two reps at each drill, if you

passed the first you didn't have to do it again, but if you didn't pass the first time, you got one more chance, and that was it. Then came the decision that, if you'd passed every drill but one, they'd give you a third rep, but only on that one drill. So, while the test was made somewhat easier in that students don't have to maintain mental focus for nearly as long, that's been counterbalanced by the fact they don't get nearly as many chances at it, which adds its own sort of stress. These days, the test is over in a few hours. I'd never failed to pass the Handgun Master Test, but also I'd never done it all the way through without having to reshoot at least one drill a second time.

It's become a tradition with me, I do the Handgun Master Test with a different gun every time. First it was a GLOCK 19. Then a GLOCK 17. Then a Rock River Arms 1911 .45. Then a Wilson 1911 .45. This time, I decided to do it with my trusty old GLOCK 34. It had been awhile since I'd shot it, I figured it would be fun to blow the cobwebs off my old carry gun. Besides, historically I've been able to speedload the G34 faster than the Wilson EDC X9 *aka* my current carry gun. Nice to have that on my side.

I reposed to the Firearms Academy of Seattle with my G34 to shoot the FAS-4 Advanced Defensive Handgun course, part of which is the Handgun Master Test. Short form, for the very first time ever, I did not

pass the Handgun Master Test. I know, I was shocked, too.

I knew my G34 wasn't perfectly zeroed, it shot low at distance, however I also knew it was good enough to put six rounds into the A-zone of a USPSA target at 15 yards (Drill #1 on the Handgun Master Test) over and over again, because that's a normal part of my range workout. Okay, all six shots would be in the lower half of the A-zone, but who cared? So I chose to shoot the HMT with the GLOCK 34 even though I knew it shot low; also I knew my Wilson EDC X9 was perfectly zeroed. But again, who cared? Certainly not yer 'umble servant here. The GLOCK 34 was sighted-in "good enough" to do what I needed it to do.

Then I got to FAS, and found that on the Handgun Master Test they were, for the first time ever in my experience, using IDPA targets instead of

**The first drill on the FAS Handgun Master Test is six shots from the holster, all shots must be As (USPSA target) or down-zeroes (IDPA target), time limit is 30 seconds.**

# Seattle's Handgun Master Test 79

USPSA targets. Oops. This could be a problem for a guy whose gun shoots low. I had just assumed it would be USPSA targets. The USPSA A-zone is 11" tall from top-to-bottom; the IDPA down-zero circle is 8" tall from top-to-bottom. Suddenly, "This gun can put all its shots into the bottom half of the A-zone at 15 yards, who cares if it hits low," was not seeming like the smartest thought I'd ever had in my life. I can only assume the switch to IDPA targets was because FAS was about to host the Washington State IDPA Championship a few weeks later, so they had a lot of them.

First rep on the accuracy drill, I fired a nice, tight group.... Unfortunately, five rounds of that group were down low inside the -0 circle, and one just barely outside, right under it. Literally, if it had been ANY closer it would have touched the line. The closest you can get to hitting and still miss. Second rep was the same thing, though my one shot out was a tiny bit lower. Since I had passed everything else on the test, I got a third try, and they even gave me a fourth, "Because we know you can do it." But realizing I suddenly had to use Kentucky windage to try to hit what I was aiming at was not the path to guaranteed success. Not sure how I would've felt about things if I'd passed the accuracy drill after four tries, I'd like to think I would have refused the certificate, because that doesn't sound like "performance on demand" to me. But I didn't pass, so that wasn't a choice I had to make.

Instructor Rick Bressler said to me, "I talked to Marty, and he said, if you can pass the accuracy drill with your EDC X9, he'll consider you passed the Handgun Master Test and give you your certificate." And I did. There's something to be said for having a gun that's zeroed. At which point I said to Rick, "Let me do the entire test with the EDC X9, and if I pass it, then I'll take the certificate."

I passed drills 1-3 then bolomed-out on the mover. By this time I was just thoroughly irritated with myself; I said to Rick, "Okay, I'm going to quit wasting your time. Yeah, I could walk away from the range today with my fifth Handgun Master certificate. But I'd never feel good about it. Because I don't think I've earned it. When's the next class you'll be running the Handgun Master

Test? Two months? I'll be back. I will pass. And when that happens, I WILL feel good about it."

Two months later, I was back. This time, I decided to do the Handgun Master Test with my everyday carry gun – which, honestly, is what I should have been doing to start with – the Wilson Combat EDC X9. Not to say anything bad about the GLOCK 34, the gun was capable of doing what needed to be done. This was all on me. By the way, by the time the next class rolled around, I'd installed a shorter front sight on the G34, it was zeroed. I could have gone back with the G34. But this time, I was a bit more grimly serious. This time, I'd be doing it with my carry gun, and not just for fun.

A week before the test, I ran out of VihtaVuori N320. But I still had a lot of N310 on-hand, and, fortunately, load data I've built-up over the years.

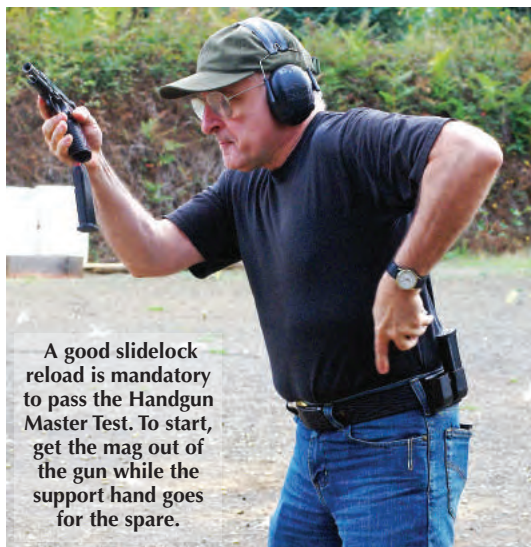

"Great. Now I'm going to have to re-zero the gun with a new load." But it needed to be done. "Good enough" was not going to happen again. Cranked up the ol' Dillon Square Deal and started stuffing Rainier Ballistics bullets into cases. Two days before the class, I was at the wonderful Shelton Rifle & Pistol Club indoor range, zeroing the gun. As those of you lucky enough to own a Wilson EDC X9 know, its rear sight has a lot of positive qualities: easy

adjustability without tools is not one of them. I literally had hammers and punches and Torx wrenches and screwdrivers from three different tool kits spread out over a table at the range, getting this thing zeroed-in. But I did. And let me tell you, there was a fair amount of time put into getting point-of-impact/point-of-aim PERFECTLY regulated. And I did a fair amount of practice at 15 yards on an IDPA target; the fact I wasn't shooting on an "easy" USPSA A-zone wasn't going to trip me up again.

Here are the drills for the current version of the Firearms Academy of Seattle's Handgun Master Test.

## DRILL #1: ACCURACY

Draw and fire six shots at 15 yards, all six shots must be within the A-zone (USPSA target) or down-zero circle (IDPA target), time limit is 30 seconds. This is one of two drills that people most frequently fail, frankly.

**A good slide lock reload is mandatory to pass the Handgun Master Test. To start, get the mag out of the gun while the support hand goes for the spare.**

## 80 DRILL #2: MULTIPLE TARGETS/RELOADING

At seven yards, begin with three rounds in the gun, draw and fire one shot on each of three targets, do a slidelock reload, one shot on each target again, slidelock reload, one more shot on one of the targets. Run twice. Time standard: 12 seconds for an autopistol, 18 seconds for a revolver. All 14 shots must be within the C/-1 zone.

### DRILL #3: MOVING TARGET

Target begins concealed behind barrels, emerges and is visible for three seconds, traveling laterally, approximately six yards. Draw and fire three shots. Two reps, on the second rep the target will be moving in the opposite direction. All six shots must be in the A/-0 zone. This is, beyond any doubt, the hardest drill on the test. It's not that the skills required are really that difficult, it's that we never get to practice them. I mean, seriously, how many of us have access to a range with a moving target system? FAS does occasionally have a Moving Targets practice class, and I have every intention of being in the next one.

### DRILL #4:

#### ONE-HAND ONLY

At four yards, draw and fire master hand only, six shots, time limit is six seconds. Second rep, the same thing but with the support hand from Low Ready. All 12 shots must be As/-0s.

### DRILL #5: LOW LIGHT

Inside one of the FAS dark houses, at five yards, draw and fire one shot on each of three targets. Time limit is 3.5 seconds. Repeat four times. 12 shots total, all must be within the C/-1 zone.

Here's what it was like for me to shoot the FAS Handgun Master test this time.

So, they whip out the targets for the class, and I find that, after all that time I spent practicing on IDPA targets, making sure my sights were good, especially for elevation, for this rep they're running...USPSA targets again. Hi-ho, as Kurt Vonnegut used to say. At least this time I will have ZERO excuse if I pull shots low.

They run you through the entire test once, then you go back and fire anything you didn't get the first time. On the accuracy drill, no doubt about it, I shot too fast. I pulled not just one but two shots to the right, outside the A-zone. When you finish shooting before anyone else on the line, for accuracy work at distance that either means you're awesome or you weren't putting nearly enough time into smoothing out your trigger pulls. I thought, "Well, that was dumb. You know better than that." As you can imagine, I was a bit upset

with myself. But I said, "Okay, BREATHE. Smile. When you smile, you automatically relax. When you relax, you shoot better. Look at the sky. Enjoy this crisp late-Summer day. Think about how beautiful it is. Contemplate how lucky you are, to be out here making your living doing something you love. Think about all the times in the past you've been under stress, and you held it together, and you succeeded."

Drill #2, multiple targets, first time pass. Drill #3, moving target. Ooops! Wanked one shot to the right, outside the A-zone. And I FELT that happen, it was my third shot on the target's first pass, my body bound up at the end as I was tracking from left-to-right. Okay, fine. Hold it together, you'll get it the second time. You know what you did wrong.

Drill #4, one-hand only, first time pass. Drill #5, dark house, first time pass. Then it was back to the main range for my second rep through the accuracy drill. "Shooter ready? Stand by..." The

One of the skills tested on the FAS Handgun Master test is the ability to fire the gun support hand only. Note the plastic "flowers" planted in the ground to mark various distances on the range.

whistle sounds. I draw the gun. Get it up in front of my face. And I'm talking to myself, "Forget the time limit. You've got all the time in the world. This is all sights, all trigger pull. Smoothly apply pressure to the trigger til the gun fires. The important thing is to make your view of the sights a continuous process. See the front sight lift. See where it was at the instant the gun fired. See it lift straight up. If you can do that, you'll KNOW where every shot went as soon as it

happens." The other shooters on the line are done shooting, gunfire other than mine has stopped, I know I'm taking more time than anyone else, I don't care. I see my front sight drift to the right minutely on a couple of shots, but my read of the sight picture says I still put the bullets into the A-zone, albeit to its right side. I fire the last couple of shots, and before we even walk downrange to check the target, I know I've got it. Yes, I had a couple of shots to the right but still inside the A-zone, and overall the group was a bit vertically strung, but you know what? I'll take it.

Then it's on to the mover. Okay, I was binding up on my left-to-right tracking. This was because I had pointed my body toward the left to start, to get on-target faster on the draw. This caused my body movement to lock up as I tracked to the right. This time I place my feet parallel. I drop my butt toward the ground, all movement will happen at the knees, not my torso. Here comes the target. I

draw, track, fire. It disappears behind the barrels. I know I've hit the A-zone three times. Reholster. Breathe. Consciously relax your arms. Wait. Here it comes again. Draw, track, fire. And even before they bring the target out from behind the barrels to score, I know I've done it. I have my fifth FAS Handgun Master Test certificate. And I did it in a way I can feel good about.

So, I still can't say I've ever passed the FAS Handgun Master test all the way though, with first-time passes on everything, without having to reshoot even one drill. But it can be done. Fellow class attendee Alex Griffin did it, with a double action first-shot Beretta 92. Now THAT'S shooting. I can, however, once again say I'm the only FAS student who's ever passed the Firearms Academy of Seattle's Handgun Master test in all its different versions. The first time I ever passed this test was back in 1995; I was 31 years old. I have to say, I wasn't at all displeased to have pass #5 come a few weeks before my 55th birthday.

It has struck me, as I've entered my 50s, even before that, in my 40s, and even in my late 30s, there do seem to be a fair number of people in a real hurry to age me. "Well, you're getting older, your skill level is going to have to drop." I know I sound like Juba in "Gladiator" but...not yet. Not yet.

#### SUMMARY

So, what did I learn from this experience?

(1) I was very impressed with the level of support that instructors Rick Bressler and Belle McCormack gave students. After I screwed up on the accuracy drill, when Rick checked my hits on the next one, multiple targets, he commented, "All As. We have an over-achiever here!" Then I blew the mover first time through. On the one-hand only drill, probably as compensation for the fact I was still smarting from the accuracy drill and the mover, I really focused on shooting a tight group. All 12 shots went into a group about the size of an egg. The previously taped-up center of the target was actually blown inward and there was a big hole through it, right in the middle of the A-zone. I said to Rick, "Good luck counting 12 bullet holes in that one." He said, "Again, Duane is over-achieving!" In the dark house, when checking my targets, he said, "Annnndddd...again we have an over-achiever, Duane gets all As AGAIN!" After I got the accuracy drill second time through, he commented, "I think Duane is hitting his groove." When I asked Belle to take photos of me with the accuracy target, she said, "Are you sure you want photos now,

or do you want to wait until after you crush the mover?" All that really makes a difference, especially if you're not feeling particularly good about yourself at the moment.

Of course, once you've made it, they tease you unmercifully. Rick: "Am I sensing a certain amount of relief from you, now that you've passed it?" Me: "Oh yeah." Belle: "Well, it's ABOUT TIME!" Me: "No kidding!"

(2) There's really no such thing as "good enough" where potentially life-saving rescue equipment is concerned. Our equipment needs to be perfect, or at least as close to perfect as possible. Get your gear sorted-out. We might say to ourselves (I certainly did), "It's okay my gun's not zeroed, it's good enough to do whatever I need it to do." That approach can actually work, right up until life requires you do something you didn't foresee, at which point "good enough" isn't. There are way too many variables in self-defense, or shooting in general, we can't control. But we can

get our equipment ready first. We might as well control what we can, while we have the luxury of time to do that.

(3) Quit'cher whining about how this one area of your otherwise awesome carry gun isn't as great as some other gun. So, your technique has to be better to speedload a Wilson EDC X9 than it does on a GLOCK 34? Make your technique better. Even I was surprised to find myself, in testing during this class, posting the fastest speedloads on the range, with that teeny little

mag funnel-less carry gun. The longer and harder I've practiced, it's absolutely amazing how much easier that gun has gotten to reload.

(4) I am going to go back, at the next opportunity, which will probably be early next year, and shoot the Handgun Master Test again with my now-zeroed GLOCK 34 and its much shorter front sight, just to totally wash the taste of failure with it out of my mouth. Because, really, why wouldn't I? I still can't say I've done this thing all the way through, without having to reshoot even one drill a second time. One must have goals. Also, I think it would be really cool to shoot the FAS Handgun Master Test with a GLOCK 42, GLOCK's sub-compact .380. But I guarantee you, when I do this again, I will be taking the process much more seriously than I did the first time with the G34, and I will absolutely show up to the range with my equipment squared-away. The FAS Handgun Master Test is not done with me yet.

Duane's website is [Self-Defense-Handguns.com](http://Self-Defense-Handguns.com). 

**The moving-target drill requires putting six shots in the A-zone with the target moving laterally, three left-to-right, three right-to-left.**

# 101 Classic Firearms <sup>83</sup>

John Marshall's book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, is a compilation of the author's popular articles appearing in **The Blue Press** since 2007. **101 Classic Firearms** is sure to be a prized addition to the library of any serious firearms enthusiast.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on some of the

**P22-40133 \$29.95**

world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in **The Blue Press**, **Gun Digest**, **Guns & Ammo's Handguns**, and **American Gunsmith**. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. John is also an endorsement member of the National Rifle Association.

**Kershaw Knives** and **Emerson Knives** have joined forces on a series of knives that combine the precision engineering of Kershaw with Emerson's uncompromising functional design. The CQC-6K features a modified clip-point blade for versatile cutting ability. The blade has two finishes: a satin finish on the upper and a stonewashed finish on the grind. The handle's front scale of textured G-10 offers a secure grip and the handle's stainless steel back has a solid frame lock. The CQC-6K is a manual opener using either the thumb disk or the patented Emerson "wave shaped feature." This opening feature enables the knife to be opened as it is removed from the pocket. The pocketclip is reversible for left- or right-handed carry.

Blade length: 3.25" Closed: 4.5" Open: 7.75"

**P22-31320 \$54.99**

Designed by Belarusian custom knifemaker Dmitry Sinkovich, the new **Kershaw Pub** looks like nothing you've ever seen. Closed, you'd never know there was a handy blade inside – although you would definitely see the equally handy bottle opener. And if you were exceptionally sharp-eyed, you might notice the slotted screwdriver tip right next to the bottle opener. To reveal the blade, just push down on what looks like the key ring attachment. You'll see the blade move out of the compact handle. Keep pushing and the blade will swing all the way out, ready for use. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip. The handle has an anodized aluminum front scale in bright blue and a steel back.

Blade length: 1.6" Closed: 3.1" Open: 4.5"

**P22-31323 \$24.95**

## The Larry™ Pocket Work Light

The Larry™ 8 LED Pocket Work Light is the essential handyman light. 8 powerful LEDs provide 60 lumens of bright white light. The rotating magnetic clip gives you convenient hands-free lighting. The reinforced plastic body design is shock-proof and water-resistant, making the Larry™ basically indestructible. Uses 3 AAA batteries.

**P22-15432 \$9.99**

**Poppy™** – A combination 300 Lumen C•O•B lantern and 120 Lumen LED spot light. Poppy is the ideal light for indoor or outdoor use when versatility and powerful lighting are critical. Poppy easily changes from spot light to lantern with just a slide of its top, revealing a full 360° C•O•B lantern. The handle is designed to easily adjust to serve both light modes. *Note: Assorted colors, no color selection. Uses 3 AA batteries.*

**P22-00116 \$16.99**

# 84 Wise Company's "Grab & Go" Emergency Food Kits

Wise Company's **18 Wise Favorites 72-Hour Kit** includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.

Wise Company's **60 Serving Gourmet Entrée Only "Grab and Go" Food Kit** includes two servings per day (entrées only) for one adult for one month or four adults for one week. **Product within this Bucket is:** Savory Stroganoff (8 servings), Chili Macaroni (8 servings), Pasta Alfredo (8 servings), Creamy Pasta and Vegetable Rotini (8 servings), Cheesy Lasagna (4 servings), Teriyaki and Rice (8 servings), Creamy Ala King and Rice (8 servings), and Creamy Tomato Basil Soup (8 servings).

Wise Company's **60 Serving Gourmet Freeze Dried Meat "Grab & Go" Food Kit** includes 60 servings of assorted gourmet-seasoned freeze dried meat and a 20-serving bonus of long-term emergency rice, for a total of 80 servings. **Product within this Bucket is:** Roasted Chicken (12 servings), Teriyaki Style Chicken (8 servings), Cheesy Beef (8 servings), Southwest Style Chicken (12 servings), Savory Roasted Ground Beef (12 servings), Stroganoff Style Beef (8 servings), and Long-Term Instant Rice (20 servings).

Wise Company's **120 Serving Breakfast Only "Grab & Go" Food Kit** includes 120 servings of breakfast assortment (no entrées). **Product within this Bucket is:** Apple Cinnamon Cereal (40 Servings), Crunchy Granola (40 Servings), and Brown Sugar and Maple Multi-Grain (40 Servings).

Wise Company's **120 Serving Freeze Dried Vegetable and Sauce "Grab & Go" Food Kit** includes 120 servings of vegetable and sauce assortment. **Product within this Bucket is:** Corn (24 servings), Peas (16 servings), Broccoli (24 servings), Green Beans (24 servings), Butter Sauce (8 servings), Cream Sauce (8 servings), Cheese Sauce (8 servings), and Mushroom Sauce (8 Servings).

Wise Company's **120 Serving Freeze Dried Fruit and Snack "Grab & Go" Food Kit** includes 120 servings of fruit and snack assortment. **Product within this Bucket is:** Bananas (16 servings), Strawberries (16 servings), Peaches (16 servings), Apples (16 servings), Caramel Sauce (16 servings), Yogurt (16 servings), and Pudding (16 Servings).

## Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.
