**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

## We READ Our Mail!

I started reloading in 1990 with a red anniversary kit but soon realized that with four kids, I no longer had time with them. So I bought my RL 550 in 1992 and have been happy ever since!

Recently I was debating on getting an additional powder measure or a scale, so I called and talked to Steve at customer service.

He told me that while an additional powder measure is always nice, knowing that I was getting accurate powder weights was more important. So I bought the Dillon powder scale. It is so much easier to read and adjust, it's amazing! I'm not even going to keep the old one as a back-up. I'm kicking myself for not getting it sooner. Many of us have to reload on a budget, but when it comes to equipment, having the best tools is the best policy! This is just one of the reasons I am a customer for life!

Doug - themutt36@yahoo.com

I recently drove from Yakima, Washington, to Arizona and brought in a well-used Dillon press to the store for refurbishing. Eight days later it was at my doorstep and in BETTER THAN NEW condition. While at the store Clint trouble shot some issues with my other two Dillons back home and gave me a bag of parts to take home for FREE. If you ever want to get a slice of heaven, visit the Dillon store for unbelievable customer service and a "kid in a candy store" experience!

Gerald Hino - brushnfloss@gmail.com

Thank you more than I can say. Bill and the rest of the Dillon staff, you provide unbelievable service!

Opening up that Dillon package was like Christmas day.

John Felix - Pueblo, CO

I just wanted to thank you for your great service. I recently sent in my broken powder measure for repair. It was well worn and cracked. I didn't expect to have it replaced at no charge. I have been a customer for over 25 years and have always had great service from your company. Thank you again for your great service.

Gregory P. Williams - Elkhart, IN

# 6 Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W Long to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550C

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# The Gentleman's EDC

## Smith & Wesson Performance Center Model 442 .38 Special +P

**Reviewed by Peter Caroline**

Prior to 1992, I didn't carry on an everyday basis. I carried on those occasions when I thought I might need a gun, which in retrospect was pretty damn dumb. In 1992, a good friend of mine, the president of our gun club, was shot to death in his own kitchen by a random acquaintance. Bob was sitting at the table, six feet away from his nearest gun, which was in a kitchen drawer. It was, for me at least, a wakeup call.

In the years that followed that tragedy, I've carried during every waking hour. While I was still living in a high-humidity New England climate, I carried an S&W Model 60 Stainless Chief's Special or a Secamp .32. When I moved to southern Arizona in 1995, I carried a Para-Ordnance P12-45, or an early H&K P7, then a Secamp .380 and more recently, a Ruger LCP .380. All are perfectly adequate for everyday carry; all have their own advantages and disadvantages.

While I have been accused, justifiably, of taking in strays, I do appreciate a truly elegant handgun. I have several, but I don't carry them, except on special occasions. One of my heroes, Roy Huntington, has a number of fancy engraved, custom-crafted handguns that he does carry. It wasn't until several weeks ago that I discovered a new revolver that qualified in terms of size, weight, caliber, mechanical excellence and panache as the ideal EDC.

Sorting through my email, I spotted a press release from Smith & Wesson. Their Performance Center was introducing a new .38 Special +P J-frame snubby. It is double-action-only, with a concealed hammer, no internal lock or accursed hole thereof, and a lightweight aluminum alloy frame. The frame and 1.875" barrel are finished in a dull black; the 5-round cylinder is matte stainless with polished flutes, and the screws and trigger and cylinder release are polished steel. The gun is

equipped with compact Crimson Trace red laser grips, which are activated by a button under one's middle finger. The overall appearance is one of serious purpose and understated elegance. MSRP is \$742. I had no choice but to order one.

When my Performance Center Model 442 arrived, I had no time to take it to the range. The next day, I was scheduled to head north to hunt for a feral hog to fill my freezer. I would stay overnight with my friend in Pinetop-Lakeside. Bill is an experienced hunter with an impressive array of international trophies decorating his walls. There's even a full-mounted, deceased lion guarding his entryway. He would accompany me on my pig hunt, to make sure I didn't do anything stupid.

We drove up to Woodruff, Arizona, and I did manage to locate and shoot the desired piggy, and drop it off at a local game butcher back in Lakeside. Afterwards, we drove out to a secluded area in the woods. I had brought along the Performance Center 442, and Bill supplied me with a box of 158-grain police standard .38 Special ammo. We set out a yellow tennis ball and a half dozen grapefruit-sized pink balloons at 15-20 yards. The sights on the revolver are what you'd expect on a J-frame...black, fixed, with a squared notch in the

rear and a black, squared blade on the front. I aimed at the tennis ball, squeezed the trigger and the ball went flying. I successfully deflated all the balloons. What surprised me the most, besides actually hitting all the targets, was the relatively mild recoil. I have owned a number of J-frames. They were no real fun to shoot, except with 148-grain wadcutter target loads. This new lightweight, even with nasty old police loads, was an actual pleasure to shoot. The trigger pull is long, smooth as can be, and conducive to good accuracy. I don't plan any testing with paper targets; that's not what this gun is all about. I will plan some practice under low-light conditions... daylight in Arizona totally negates the use of a laser sight.

Smith & Wesson's Performance Center states that this pistol weighs 15 ounces; my postal scale says 14.2 ounces. Go figure. Although the gun is rated for continuous +P use, I'll stick with the police loads, and I'll buy some more Speed Strips. I think this is the beginning of a beautiful friendship.

Smith & Wesson

## The Original M1 Buddy®

**The Original M1 Buddy Service Rifle Cleaning Port** fits all models of M1 Garand and M1A rifles. Unlike other service rifle cleaning ports on the market today, the M1 Buddy allows you to use either the ratcheting GI Chamber Brush or GI Combo Tool while the cleaning port is in place! No need to worry about those fingers anymore! The Original M1 Buddy is covered by a lifetime warranty and will be replaced free of charge if it fails under normal use.

The Original M1 Buddy

P43-13447 \$12.95

**The Original Carbine Buddy Cleaning Port**

enables you to clean your M1 Carbine chamber without worrying about pinching your fingers. The Original Carbine Buddy is covered by a lifetime warranty and will be replaced free of charge if it fails under normal use.

The Original Carbine Buddy

P43-13452 \$9.99

## The Lever Loader

**The Speed Beez Lever Loader**

gives you the mechanical advantage you're looking for! Works with double-stack Glock 9mm mags with or without magazine extensions. A must have for Pistol Caliber Carbines using Glock mags.

P43-12337 \$24.95

# BL 550<sup>^</sup>

## Dillon's Basic Loader

**\$289<sup>95</sup>**

**P43-15399**

Reloading Dies and Caliber  
Conversions sold separately  
(see the back of the order blank in  
the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount **P43-22051 \$52.45**

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.95 each, or \$24.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM<sup>^</sup>

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**P43-22120, \$33.95**

### BL 550 POWDER DIE<sup>^</sup>

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

**Powder Die: P43-16629, \$20.95**

**Oversize Die: P43-16626, \$20.95**

**Plastic Funnel: P43-16617, \$6.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.)

**P43-20029, \$24.95**

**RL 450 Powder Die:**

**P43-20308, \$23.95**

# RL 550C<sup>^</sup>

## STANDARD FEATURES:

- Made in the USA
- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for **ONLY...**

Square-Deal-Only Wrench	<b>P43-19970</b>	<b>9.95</b>

## Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	<b>P43-22051</b>	<b>\$52.45</b>
XL 650-only	<b>P43-22052</b>	<b>49.45</b>
"SDB"	<b>P43-22223</b>	<b>68.45</b>

## Dillon's "Belted Magnum" Powder System<sup>▲</sup>

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>P43-97126</b>	<b>\$158.95</b>
----------------------	------------------	-----------------

## Dillon's Roller Handle<sup>▲</sup>

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	<b>P43-17950</b>	<b>\$48.95</b>
------------------------	------------------	----------------

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>P43-22214</b>	<b>\$45.95</b>
1050 Tray Kit	<b>P43-22215</b>	<b>45.95</b>

## Dillon's Low Powder Sensor<sup>▲</sup>

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	<b>P43-16306</b>	<b>\$43.95</b>
--	------------------	----------------

Quick-Change Cover <sup>▲</sup> for use with powder measure.	<b>P43-11143</b>	<b>\$14.95</b>
--	------------------	----------------

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550!

# Dillon's Case Preparation Equipment

**CV-2001<sup>^</sup> P43-20493 \$191.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750<sup>^</sup> P43-19455 \$146.95**

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator<sup>^</sup> P43-20675 \$78.95**

**CM-500 Case/Media Separator<sup>^</sup> P43-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers: Case Cleaners are available in 220 volt!

**Euro CV-2001 P43-22047 \$216.95**

**Euro CV-750 P43-19473 \$171.95**

## Rapid Polish<sup>^</sup>

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle. **P43-13804** **\$8.95**  
Case (20 pc.) **P43-20255** **135.95**

## Case Lube<sup>^</sup>

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

*D.C.L. Dillon Case Lubricant*

8 oz. bottle **P43-13733** **\$11.95**  
Case (20 pc.) **P43-20256** **168.00**

*Half and Half* 10 bottles of polish /10 of lube<sup>^</sup>  
Case (20 pc.) **P43-21375** **\$152.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **P43-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **P43-13496** **\$15.95**

# 22 Dillon's RF 100 Automatic Primer Filler

**Eliminates the need for primer pick-up tubes!**  
**Fills the primer tube while you reload!**  
**Clear polycarbonate shield and protective housing**

Dillon's RF 100 Automatic Primer Filler<sup>^</sup> eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$52.95 each.

## Super 1050/RL 1050 Short Trim Die Toolhead<sup>^</sup>

**P43-62219**  
**\$230.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. **(NOTE: the Blue 1050 toolhead stand – Part Number P43-62200, \$49.95 – is not included.)**

# Rapid Trim 1500 Case Trimmer<sup>^</sup> 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P43-62164** is **\$337.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P43-13141**, are **\$20.95** each. Upper lock rings, **P43-13559**, are **\$5.99** each.

# MILITARY BRASS?

**Eliminate the "Grunt Work" with Dillon's Super Swage 600<sup>^</sup>**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

## Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed for the Single Action Shooting Society's "Wild Bunch" category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

1911 Holster	<b>P43-19947</b>	<b>\$139.95</b>

# Mr. Bulletfeeder<sup>®</sup>

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

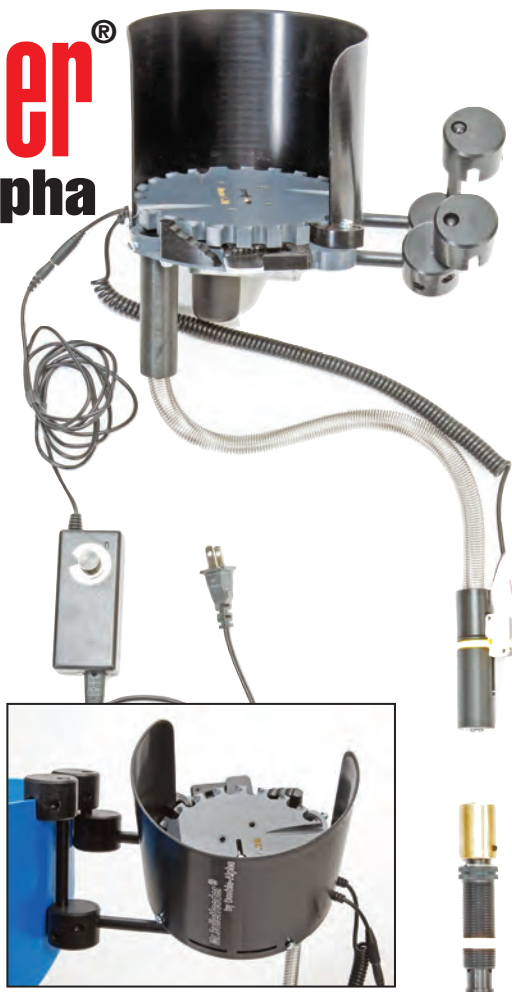

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

## Mr. Bulletfeeder<sup>®</sup> Replacement Parts & Spares

**H**aving separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

**T**he Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collar to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

**L**ose a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

# Dillon's Pistol Die Sets

## Size Die

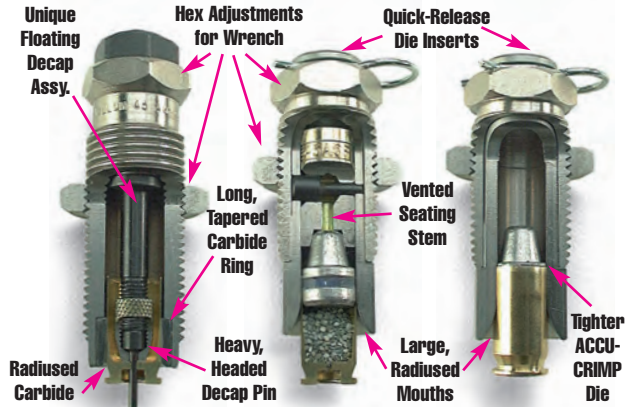

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)<sup>^</sup>

.223 Remington	P43-10839	\$80.95

 Brown **P43-66695 \$15.00**

# ODIN Ready Bag (ORB)

ODIN Works introduces the new ODIN Ready Bag<sup>^</sup> (ORB) featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease. Whether you're going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

- Quick-release compression straps
- Four D-ring attachment points

- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: *Can remain in bag as a pocket or extend up through the zipper to fit longer barrels*
- Available in black or coyote brown
- Dimensions: 28" x 7" x 6"

ORB Black **P43-66696 \$99.00**  
 ORB Brown **P43-66697 \$99.00**

## California Competition Works Six-Magazine Pouch for PCC Magazines

California Competition Works' magazine storage pouch<sup>^</sup> for PCC magazines is the easy way to protect, store, organize and transport your PCC magazines. Easily holds six 30-round factory or aftermarket pistol-caliber carbine magazines.

**P43-39921 \$29.95**

# Black Aces Tactical Pro Series S

By D. K. Pridgen

An interesting evolution in firearms development was the birth of a new category of “firearm” that skirts bureaucratic definitions – in this case, one that’s short enough to be highly maneuverable but not classified a short-barrel shotgun, which requires NFA paperwork. Classified as a “firearm” – not a shotgun or Any Other Weapon (AOW) – these small “shotguns” don’t require any of the pesky NFA paperwork because their overall length exceeds 26 inches, nominally 26.5 inches, and they don’t have pistol grips.

A few years ago, non-registered shotguns this genre’s size would have resulted in conversations with a federal employees including a judge! If one of this genre is carried concealed, the ATF says they become an AOW; NFA paperwork is required and judges may also get involved.

Don’t modify an existing shotgun into one of these. The efforts of a number of folks with the ATF, established a shotgun’s receiver, which since birth was never attached to a full-size stock, can be assembled as one of the current versions of shorty shotguns.

My first contact with NFA Short Barrel Shotguns was years ago, in the hands of trainer, LEO, and friend Steve Moses. His Class 2 shooter had a shorter stock and a significantly reduced barrel. I lusted for one but couldn’t justify the expense.

With the introduction of the first shrunk pump shotguns that were non-NFA regulated, I could see the handwriting on the wall – I wanted one – or two! I acquired one of each brand available and liked both. At the same time I really hoped a semi-auto was on the horizon. When one appeared, the price was steep enough to keep those pumps at home but...

## Black Aces Tactical Pro Series S Semiautomatic

The Black Aces Tactical ([blackacestactical.com](http://blackacestactical.com)) Pro Series S Semiautomatic, priced not far from the MSRP of Remington’s TAC-14 and Mossberg’s Shockwave pumps, looked very attractive from the get-go. It is touted to have reduced recoil and

increased control compared to pumps; certainly logical for a semiautomatic. The Pro S can subsist on a diet of any 2-3/4-inch or 3-inch 12 gauge shotshell. With an overall length of 26.5 inches, its barrel is 14 inches.

When it arrived, I drug the Pro S from its box and found a really nice looking, well balanced, diminutive smoothbore. It had darkish checkered, nicely figured, walnut wood on forend and Raptor bird’s-head grip (poly available), black anodized aluminum receiver and black matte finished barrel. Trigger guards are textured polymer with chrome-plated triggers.

The lifter is slotted and appears to be chrome plated, as do the safety and magazine cutoff. The bolt, charge handle and bolt release are nickel-plated. The barrel has no sight but the receiver is drilled and tapped for Mossberg mounts with a Mossberg rear flange. The magazine cap is nicely knurled and arrives with the only sling attachment present.

Black Aces’ Eric Lemoine advised first run Pro Series S guns used Remington 1100 receivers and were very well received but subsequent versions are using Black Aces’ own improved CNC receivers. New receivers include bolt releases on the side, unlike the 1100’s bottom location.

## Range Time

Because the Pro Series S had been fired prior to arrival, I cleaned it for photos. Following the studio photos, I reassembled the Pro S, applying oil everywhere. Black Aces recommends a 25-round break-in of a well-lubricated Pro S using Remington’s 9-pellet 00 buckshot.

My first range trip and subsequent ones were disappointing, even after the 25-round break-in. I fruitlessly cleaned and re-lubricated the Pro S after each trip but reliability sucked. Back it went to Black Aces, who took one look at the Pro S, lubricated it more generously than I ever did, test fired on video and returned it to me post-haste!

Weather and range conditions forced me to impatiently delay a range trip. When the rains cleared long enough for the range to drain (yes

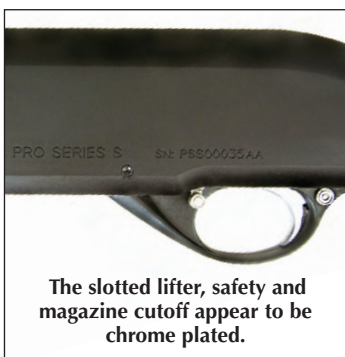

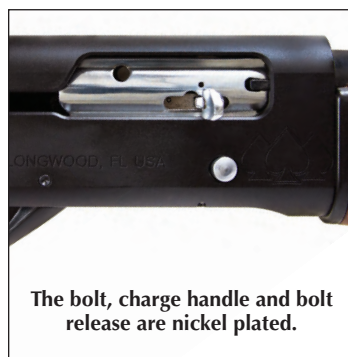

# S Semiautomatic "Firearm"

The supplied Pro Series S had nice, effective checkering patches on its walnut wood forend and Raptor bird's-head grip.

The slotted lifter, safety and magazine cutoff appear to be chrome plated.

The bolt, charge handle and bolt release are nickel plated.

drain), I seized the opportunity for the trip. Results were excellent with perfect functioning, just like the video. Unsurprisingly, the Pro S had noticeably less recoil than pumps of the same size. Unfortunately, a gremlin stole my birdshot boxes from my supplies. (Of course I didn't forget them!) Another range trip was needed. Never a bad thing!

I managed to shoot patterns with the Pro S at 7 yards, typical home encounter distances. Most 00 buck loads produced one ragged hole for 8 or 9 pellets. However, through the cylinder-bore barrel, Estate Cartridge's discontinued S.W.A.T. reduced-recoil loads hovered between 4 and 5-inches; great improvement. (I'm saving the remainder!) Remington's 00 Reduced recoil managed a noteworthy 3- to 4-inch pattern. (I plan another excursion to see how 0 and #4 Buck loads pattern.)

Inexpensive birdshot boxes securely in hand, I returned to the range. There for a practice session, Steve jumped at the chance to shoot the diminutive blunderbuss. Inexplicably, the second shot failed to feed. From that point, slow or fast, pinned against the hip or fully extended, the Pro S never bobbed. Initially dubious of the Pro S, following our shooting spree, Steve grinned and offered, "That dog will hunt!" I couldn't disagree!

## Final Shots

What role do I see for the Pro S? Well, it handles well in close confines, including vehicles,

and is compact enough to travel well. In confines it's less cumbersome than a long gun and as Steve Moses mentioned, with a light it'd be great for looking for a wounded pig in brush. We disagreed on its utility in a house search, something I always warn folks not to do. I think it could work well but he has a lot more real-life experience and house-clearing training than I. We did agree it would be excellent in saferooms.

So what would I change? I'd like the Pro S to arrive with a bead front sight, to provide a visual reference point and perhaps accommodate an XS Sights Big Dot. (Don't shoot defensively from the hip!) Eventually, for walnut and polymer furniture versions, I'd like to see: light mounts, because light is a good thing; Sidesaddle shell carriers, because there is no such thing as too much ammunition; and, sling adapters, because users may need both hands free. In that order. I suspect Black Aces will offer solutions to most, if not all, of my "I'd like a" list.

(This info just in. Black Aces has a brace for the Pro Series S!)

Final word on the Black Aces Pro Series S Semiautomatic? Based on my experience, I think Black Aces Tactical did a heck of a job! I like the Pro Series S and have a spot for it in my defensive-armor battery!

# CLASSIC FIREARMS: The Remington Nylon 66

**By John Marshall**

These were the only lever-action rifles ever produced by the Remington Arms Company. There were only a very limited number made, and today one version is considered so rare that it's worth thousands of dollars on the collector market. This is the story of these unusual .22 rifles.

The more widely known Remington Nylon 66 semiautomatic rifles chambered for .22 Long Rifle were a smash hit on the marketplace, with over a million of all variations made and sold from 1958 to 1991. This rifle, designed by Remington's Wayne Leek and his team of research and development engineers, pioneered the extensive use of a plastic material for its construction. In fact, the entire frame of the rifle was made from a blended DuPont Nylon formula, "Zytel 101." It had high tensile, impact and flex strength, was virtually indestructible, and provided a self-lubricating framework for the moving metal parts of the gun. Encouraged by the evident early success of the Nylon 66, Remington authorized a number of spin-off rifles using the same Nylon material. These included both bolt-action rifles and a lever action that somewhat resembled the parent Nylon 66 in outline.

The standard lever model, outfitted in a "Mohawk Brown" color that mimicked real wood, was introduced as the Nylon 76 Trail Rider in early 1962. This .22 Long Rifle repeater had a blued receiver cover and barrel.

The lever had a very short stroke of only 30 degrees, and was billed as the fastest-operating lever action in the world. It opened and closed the locked-action repeating design, using a substantial number of the components already being manufactured for the semiauto Nylon 66. Like that parent design, this one had a capacity of 14 rounds in a tubular magazine located in the buttstock. This

was accessed from the rear of the stock for loading. Removal of an inner spring-loaded tube from its outer housing allowed cartridges to be dropped nose-first into the magazine. Replacing the inner tube and locking it with a clockwise twist readied the arm for action, and operation of the lever loaded the first cartridge into the chamber. Like the Nylon 66, the forestock of the rifle had a white diamond-shaped insert on each side. The adjustable open rear sights and the racy-looking front sights were identical and interchangeable with the ones on the Nylon 66. The barrel length was nominally 19-1/2 inches. It was exactly the same barrel as the one used on the Nylon 66. The ambidextrous safety button was located on top of the stock, just to the rear of the receiver cover, same as on the Nylon 66. It was pushed forward for fire and back for safe. Pushed forward, a red dot was exposed to indicate that the rifle was ready to fire. 25,312 of these brown-stocked rifles were made. The original price for one was \$59.95.

The "Apache Black" version came out in late 1962. It had a black stock with white "diamond" inlays on each side. The receiver cover, finger lever and barrel were chromed. This was sometimes called the "presentation" model. Only 1,615 of these were ever made, making it extremely rare when found today.

An enigmatic version turns up now and then. It has a black stock, blued barrel, and a receiver cover with a rough matte finish. I've seen enough of these to suspect that Remington did a clean up of leftover parts once production of the two official models was finally halted. I owned one once, but sadly let it go, not realizing that this "ghost rifle" has become a collectable in its own right. I have seen individual matte-finish Nylon 76 receiver covers come up here and there; enough to make me suspect that they were re-fin-

# Nylon 76 "Trail Rider" Lever Rifles

“Although the Trail Riders were slick and handy, they could not compete with the popularity of the...Nylon 66.”

ished overruns used to make a very few of these oddball rifles. No one at Remington today can confirm that they ever existed, but they are definitely out there.

The gear-driven Nylon 76 action, while innovative, was somewhat complex and subject to being misassembled and possibly damaged thereby. A word to the wise – you need to be very observant and careful when removing and then cautiously replacing the receiver cover correctly. It retains a number of parts on both sides of the nylon framework. In particular, the gear and rack need to be properly re-seated and retained in position by partially replacing the receiver cover before fully seating it. Such esoteric techniques have to be learned by trial and error in order to reassemble the gun without incident. Although categorized as “hammerless,” the action does incorporate an internal hammer, which is actually a spring-loaded sliding metal block.

Although the Trail Riders were slick and handy, they could not compete with the popularity of the then-running-strong Nylon 66. Accordingly, production of them was discontinued in 1964, and the last ones were sold in 1965. The grand total of both the Mohawk Brown and Apache Black versions came to 26,927. None of these guns were serial numbered, as this was not required prior to the Gun Control Act of 1968.

Now as to collector value. Many of these rifles were knocked about and scuffed up. Others were damaged and discarded when the owners screwed up in their attempts to disassemble and reassemble them. Some parts, when lost or damaged, have become virtually irreplaceable today, available usually only by cannibalizing other rifles. Some guns have been stowed away in attics, gun vaults or closets, only discovered when the heirs of their deceased owners found them. In

short, the numbers produced were small, and surviving examples in any condition have become increasingly hard to find. From the low end, “scuffed up but serviceable” Mohawk Brown rifles have been seen on auction going from \$750 to over \$1,000. Better condition examples go for more, and if accompanied by an original factory box, the value jumps considerably.

The elusive Apache Black versions, with their very small production run, command premium prices in virtually any condition. Perfect condition examples in their factory boxes with papers are priceless to Remington Nylon collectors and are now available only to the very lucky or very well heeled. Excellent stand-alone guns (such as illustrated above) have been sold for as much as \$5,000 or more at auction and through private sales between collectors.

Remington collectors prize these rifles because they are the only lever actions ever manufactured under the Remington banner. Nylon collectors salivate when they find one or more. These collectors have motives like filling a void in a collection, or re-selling a gun at even higher prices to other collectors. With each passing year, I see these lever-action nylon rifles garnering amazing and ever-increasing asking prices and these guns are often sold for those asking prices. Limited production and decreasing availability make for more value on the market.

Years ago, brand new Remington Nylon 76 rifles were sold for reasonable prices during a brief period of a little over three years, but never became really popular. I wish I had bought a barrel full when they were actually somewhat available. Too early we get old and too late we get smart. If you are on the hunt for one of them, I sincerely wish you luck! Keep your eyes peeled. I hope this article will be helpful in your quest.

## Lyman Precision Funnel Set

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. No more powder clinging to surfaces, which can happen with lightweight plastic funnels. The solid construction and quality of Lyman's Precision Funnel Set will be apparent in its first use. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

P43-11389 \$39.95

## Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The Lyman X-Block is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

P43-11390 \$15.95

# The SCCY CPX-3 .380 Pistol

By J. B. Wood

When writing about the excellent 9mm SCCY pistols, I usually mentioned that a .380 version was coming. Well, it's here! And, it's just slightly smaller than the 9mm versions. It's not one of those hard-to-handle "micros." In pistol-size terminology, it would be called a "compact."

The most important difference in the new SCCY .380 is designer Joe Roebuck's "Quad-Lock" system. Before I tell you about it, a little background is necessary. Pistols that use the classic Browning tilting-barrel lock system have some form of engagement between the barrel and slide. In many of the modern ones, this is simply a squared-off barrel at the rear, locking into the ejection port.

The SCCY CPX-3 .380 uses this system, but with a big difference. The "Quad" reference means there are four precisely-fitted contact points, two at the front, two at the rear. At the muzzle, there are two below the barrel. At the rear, the engagement at top rear of the barrel, and the tilt-track in the barrel underlug.

This feature (a patent is pending), ensures that after every shot, when the slide closes, the barrel is in exactly the same position every time. The effect on accuracy is amazing. I tried the CPX-3 with several .380 loads from a casual rest at 15 yards, and several of the groups averaged 2 inches, all well-centered.

Some might say that in a compact personal-defense pistol, this sort of accuracy is less important. My take on this is that it could ensure you hit the bad guy, and not the hostage. The sights, by the way, are excellent, square-picture, three white dots. The rear is laterally adjustable in its dovetail.

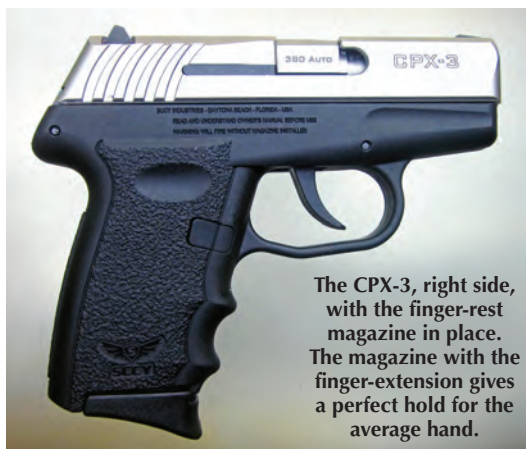

I'll admit that for those tiny groups I was "staging" the trigger, a thing that most instructors warn against. In a slow pull of the CPX-3 trigger, you can easily feel the let-off hesitation point. In a straight-through pull, it's not there. The DA-Only pull on my pistol is around 8 pounds, silky-smooth. The wide-faced trigger helps, and there's no "flipper" safety on it.

Unlike many of today's polymer-and-steel pistols, the CPX-3 is not striker-fired. It has a pivoting internal hammer that is always in safety-rest position. Only a full-through Double-Action trigger-pull will fire it. There is no manually operated safety lever, and it is not needed.

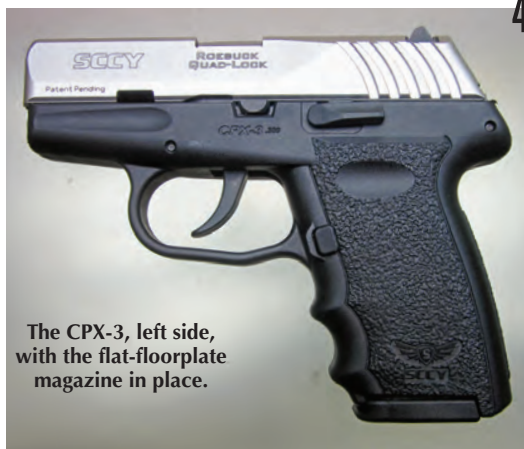

Also, there is no magazine-disconnect safety. If the magazine is lost in a scuffle, you can still fire a chambered round. The slide locks open after the last shot, and the slide latch is perfectly positioned and easy to operate. Sorry, left-handers, but the latch and magazine release button are only on the left side.

With the CPX-3, you get magazines with a finger extension and a flat floorplate. While the

The CPX-3, right side, with the finger-rest magazine in place. The magazine with the finger-extension gives a perfect hold for the average hand.

The CPX-3, left side, with the flat-floorplate magazine in place.

The controls: Trigger, slide latch, and magazine release button.

Above: The SCCY CPX-3, field-stripped. Takedown is easy. Left: On the right side of the slide, a really neat design touch. The ejection port is extended forward, so live rounds can be easily removed.

flat one makes the pistol slightly more concealable, the other one mates nicely with the finger recesses on the front of the gripframe, with ample room for all three fingers. A deep in-curve at upper rear completes a superb grip. Magazine capacity is 10 rounds.

As mentioned at the start, the CPX-3 is just a little smaller than the 9mm versions. This applies only to the length of the slide and barrel, the other numbers being practically the same. The empty weight is 15.3 ounces. Overall length is 5.7 inches, and the barrel is 2.96 inches.

The cross-thickness is 1.1 inches everywhere but at the slide latch. There, it's 1.25 inches. With the flat-floorplate magazine in place, height is 4.5 inches, and 4.9 inches with the one having a finger-rest. Overall, it's small, light, and very concealable. The magazine floorplate difference is

so small, I'd recommend finger-rest for primary carry, and flat for the spare.

There is one neat little design point that deserves special mention. In many pistols, when you need to eject a live round, the bullet tip will catch on the front edge of the ejection port. In the CPX-3, this won't happen. The port in the slide has a rounded forward extension, and the bullet of a loaded round easily clears.

In summary, we have here a .380 pistol made of top-grade materials, beautifully engineered, and precisely made, with a suggested-retail price of just \$305. And, don't forget the "Quad-Lock" accuracy.

BFR Mounting Post (50.5" High)	P43-50150	\$309.95
BFR Mounting Hardware Kit	P43-50140	\$9.95

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY<sup>^</sup>

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**P43-50050, \$419.95**

### B. 50 BMG CARBIDE SIZE DIE<sup>^</sup>

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**P43-50075, \$984.95**

### C. 50 BMG POWDER MEASURE ADAPTER<sup>^</sup>

For use with the RCBS .50 BMG powder measure.

**P43-50125, \$87.95**

### EXTRA "BFR" TOOLHEADS

**P43-19831, \$207.95**

### D. 50 BMG PRIMER SEATING DIE<sup>^</sup>

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**P43-50200, \$169.95**

### E. 50 BMG PRIMER POCKET SWAGER<sup>^</sup>

Makes it easy to remove the military crimp.

**P43-50001, \$354.95**

### E.(1) PRIMING CONVERSION<sup>^</sup>

Converts Swager to Priming System.

**P43-50003, \$89.95**

### F. 50 BMG PRIMING SYSTEM<sup>^</sup>

Allows off-the-machine primer seating.

**P43-50002, \$354.95**

### F.(1) SWAGER CONVERSION<sup>^</sup>

Converts Priming System to Swager.

**P43-50004, \$89.95**

### Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user.

The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet

to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

.22 Caliber Neck	P43-48962	\$26.50
6mm Neck	P43-48966	26.50
6.5mm Neck	P43-48965	26.50

.30 Caliber Neck, Long	P43-48963	26.50

## Dillon's Bench Wrench Fits 1" Die Lock Rings

Dillon Precision has addressed this in two ways. We offer 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our 1" wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. All of our die lock rings fit any standard 7/8" x 14 dies.

1" Die Lock Ring (Zinc Alloy)	P43-14067	\$1.75
5-Pack of Die Lock Rings (Zinc)	P43-10669	5.50
1" Dillon Bench Wrench	P43-10842	8.95

(Buy two or more 1" Bench Wrenches for \$8.10 each)

Wrench/Zinc Lock Ring 5-Pack	P43-10668	10.95
<b>New Steel 1" Die Lock Rings</b>		
1" Die Lock Ring (Steel)	P43-62422	\$2.25
5-Pack of Die Lock Rings (Steel)	P43-62423	8.95
10-Pack of Die Lock Rings (Steel)	P43-62424	14.95
Wrench/Steel Lock Ring 5-Pack	P43-62425	17.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

# Grace USA Gun Care Tool Set

This custom designed 12" x 9" x 1-1/2" case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

Grace USA Gun Care Tool Set<sup>^</sup> **P43-10680** **\$99.95**

## More Great Tools From Grace USA!

# Comtech's STINGER

**THE STINGER:** Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master - instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

P43-19495 \$9.95

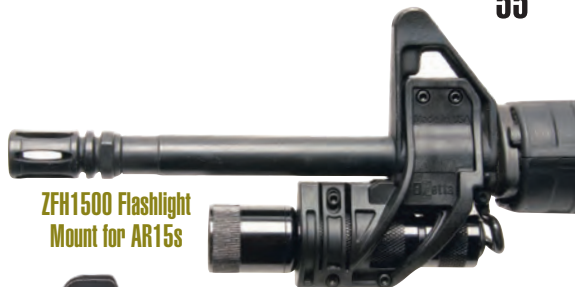

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

Engineered to carry up to 3" magnum shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with a belt clip that will accommodate up to a 2-1/4" duty belt.

Six-Shell Tactical Stripper **P43-18606 \$23.95**  
Four-Shell Tactical Stripper **P43-18605 22.95**

# SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

**P43-21894 \$46.95**

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

**P43-19972 \$39.95**

## Dial Caliper<sup>^</sup>

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

**P43-13462 \$28.00**

## High Tech Digital Caliper<sup>^</sup>

**Accurate,  
Easy to Read!**

**P43-17171 \$39.95**

Nobody's perfect. A bullet puller makes it easy to recover all your components.

Bullet Puller<sup>^</sup> **P43-17999 \$29.95**  
 Puller Cap<sup>^</sup> **P43-17948 4.95**  
 Collet Set **P43-17947 5.99**

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including BPA's, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# Loading .45 ACP

## By Duane Thomas

The sad truth is the .45 ACP cartridge is not nearly as popular as it used to be, for either competition or self-defense. I view this as sad on any number of levels, but one of the main reasons I hate to see the .45 ACP's popularity wane is because it's such an easy cartridge to handload. There are certain cartridges – 9mm Parabellum comes instantly to mind – that can be a nightmare to make shoot accurately. By contrast, .45 ACP is dirt simple.

There was a time I was a .45 ACP kinda guy, for both carry and competition, loading tens of thousands of rounds in the process. But that was long ago. Recently, for the first time in years, I decided to dust off my old Dillon Square Deal set up for .45 ACP, and load some ammo on it. Let me talk you through the process.

## Cartridge Cases

Unlike other, more high-pressure cartridges, where case life is a serious concern from a standpoint of longevity, and even safety, in the low-pressure .45 ACP “load it til the case splits at the bullet seating station” is the rule of thumb. Nor, unless you happen to be a bull's-eye shooter, do I see any need to sort cases by headstamp in .45 ACP. So I fired up the Dillon vibratory case tumbler, and for the first time in, well, a long time, loaded it up with those big, beautiful .45 cases and a bit of Rapid Polish 290. In short order, I had a bunch of mixed, pretty, clean cases to load. [Editor's Note: Be sure to sort out cases with small primers. They ARE reloadable, but you'll want to save up enough to justify switching primer sizes on your reloader.]

### Resizing

When I handload 9mm, its tapered case makes resizing considerably easier than when running a true straight-walled casing like .45 ACP. With 9mm, actually I very rarely use case lube. With .45 ACP, case lube is not optional. Some people complain of “Dillon elbow” after long loading sessions. Just the way my body works, it doesn’t hit me in the elbow, it hits me in the wrist. Case lube plus .45 ACP equals no Dillon wrist. I’m a fan.

### Bullet

Bullet weight in .45 ACP can be a topic of debate. Some folks opine anything less than 230 grains isn’t a “full-weight” .45 ACP bullet, therefore unsuitable for a true manly-man. I tend to base my choice of bullet weight on factors other than that, such as the quality of recoil impulse. Assuming we’re loading to Major power factor, I like 200 grains. (Of course, I reserve the right to change my mind tomorrow.) Loaded to just above Major, 230-grainers make the gun feel a bit sluggish and slow-cycling to me. On the other hand, 185-grainers have to be driven hard enough to make Major the recoil impulse is a bit harsh. So, 230 grains is too slow, 185 grains is too snappy, 200 grains is jussst right.

Unlike supersonic handgun cartridges – again, the classic example being 9mm Parabellum – with plated bullets we don’t need double-plating in the low-velocity, subsonic .45 ACP. Thus my choice of bullet was the Rainier 200-grain round nose, a single-plated bullet.

### Primers

What can I say, call me a snob, I like Federals. There are primers out there that are cheaper or harder, but nothing that works better.

### Powder

200 grains in .45 ACP is heavy enough to take advantage of the heavy bullet/fast powder concept, i.e. that a heavy bullet running a fast-burning powder will tend to have softer recoil than a lighter bullet with a slow-to-medium burn rate powder at the same power factor. My choice of fast-burning powder in .45 ACP is VihtaVuori N320. This is a single-base powder, it only contains nitrocellulose compared to a double-base powder which has nitrocellulose and nitroglycerin, so it’s both notably quiet and soft-shooting.

Also, it’s a ball powder where the “balls” are notably small so it meters superbly.

Standard deviation (SD) is a measurement of consistency, it tells us how close we can expect the velocity of any random bullet fired from a particular gun, with a particular load, to be to any other bullet fired. Without jumping down a really deep rabbit hole here, let’s just say that in SD-land, a small number is better than a high number. With 200-grain bullets and N320, I have seen SDs as low as 5 or 6 feet per second for a 20-shot string. That is excellent.

Against N320 is that it costs about twice what cheaper powders do (worth it for the performance, in my opinion) and that, at least in Tacoma, Washington where I reside, you don’t tend to find VihtaVuori powders down at the local gun shop, so I have to order in. I get my VihtaVuori N320 (and N310, too, for that matter) from Brownells.

I picked a mid-range load for a 200-grain bullet with N320 out of the VihtaVuori manual and I was down the road.

### Overall Length

The classic OAL for .45 hardball is 1.250”. My Square Deal was still set up for .45 ball from the last time I used it, I didn’t even have to adjust the seating die. I did check the OAL with a set of dial calipers to make sure, of course.

### Crimp

I set the crimp using the procedures set forth in my article, “Loading Plated Bullets” from the June 2017 *Blue Press*. Well, THAT was fast and easy.

### Shooting

Took the ammo to the range, out of a Wilson 1911 from the bench at 50 feet, the

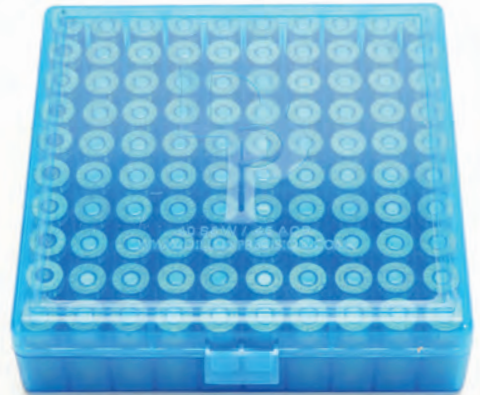

maximum distance possible on the indoor range where I do most of my shooting, BOOM! first group: one-inch. I have put a lot – I mean, a LOT – of time and effort into learning how to load 9mm Parabellum so it will shoot accurately. And I have learned. The great news here is that, once you’ve mastered 9mm, something like .45 ACP is EASY. Think about it: I picked a bullet, picked a powder charge out of a manual, and had accurate ammo. Just how easy it is to load ammunition in .45 ACP that will shoot accurately is one of its major charms, and one reason why, even though its days of greatest popularity are behind it, it will always be a grand old cartridge.

**“Think about it:  
I picked a bullet,  
picked a powder  
charge out of a  
manual, and had  
accurate ammo.  
Just how easy it is  
to load ammunition  
in .45 ACP that will  
shoot accurately  
is one of its major  
charms...”**

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# Swab-its – A Swab for Every Job! <sup>65</sup>

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

## Gun-tips®

Gun-tips® Extended Reach Firearm Cleaning swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

**P43-12583 \$9.99**

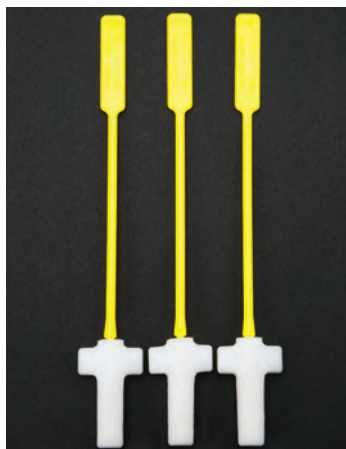

## Bore-Whips™

Bore-Whips™ .17 and .22 caliber (pictured) by Swab-its® are ideal for air rifles, rimfires or any other .17 or .22 caliber firearm that’s difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator.

.17 Cal. **P43-12689 \$9.99**  
 .22 Cal. (Pictured) **P43-12690 9.99**

## Star Chamber

Star Chamber Cleaning Foam Swabs™ are for AR-15, M4 and similar MSRs. 3-pack **P43-10056 \$13.99**

## Handgun Cleaning Kit

The Swab-its® Handgun Cleaning Kit for 9mm/.357 caliber handguns contains four Bore-Sticks™, a three-in-one tool that replaces the cleaning rod, jag, and patch; a nine-piece Multi-Surface Gun-Tips® package for internal and external cleaning requirements; and a 0.4 ounce bottle of BREAKTHROUGH® Battle Born HP Pro lubricant and protectant. As with all Swab-its products, the Bore-Sticks and Gun-Tips are made of reusable, lint-free foam that is washable with degreasing soap and water or mineral spirits.

**P43-11907 \$19.95**

## MSR Cleaning Kit

The Swab-its® Modern Sporting Rifle Cleaning Kit contains 6 .223/5.56 Bore-tips® for bore maintenance; a nine-piece Multi-Surface Gun-Tips® package for internal and external cleaning requirements; three Star Chamber Cleaning Foam Swabs™; and a 0.4 ounce bottle of BREAKTHROUGH® Battle Born HP Pro lubricant and protectant. As with all Swab-its products, the Bore-Sticks, Gun-Tips and Star Chamber Swabs are made of reusable, lint-free foam that is washable with degreasing soap and water or mineral spirits.

**P43-11908 \$24.95**

# 66 New Products from Slip 2000

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks!

**NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P43-19237 \$21.99

Slip 2000 Carbon Killer provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

**NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P43-19234 \$21.99

Slip 2000's Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P43-11652 \$25.99

Slip 2000's AR Cleaning System contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P43-11676 \$19.99

## Slip 2000 Extreme Weapons Lubricant (EWL)

was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P43-11644 \$18.99

## Slip 2000 EWL30

has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P43-11645 \$18.99

## Slip 2000 Copper Cutter

is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing!

**NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P43-11646 \$11.99

## Each Slip 2000 Gun Wipe

packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube.

Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P43-11674 \$14.99

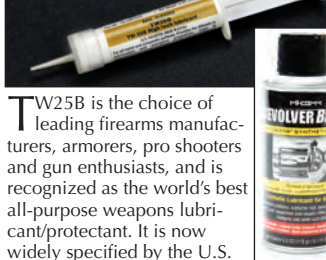

## Lyman Pick & Brush Set

Lyman's Pick & Brush Set is an indispensable item for your cleaning supplies and range bag.

P43-40160 \$3.99

## MIL-COMM Extreme Performance Lubricants

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe P43-15732 \$10.99

1.5 Ounces P43-15731 14.50

Revolver BLAST with TW25B is an all-synthetic lubricant/protectant specifically designed for revolvers.

4.2 Oz. Aerosol P43-66677 \$11.95

## E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth P43-18613 \$7.99

**B**rian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).  
 Slide-Glide Standard **P43-15571 \$7.95**  
 Slide-Glide Lite **P43-15572 7.95**

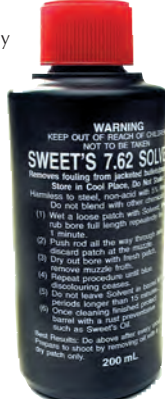

**M**icrolon UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

**P43-75125 \$9.95**

**S**weet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

**P43-13128 \$12.95**

# 70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

Elite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature

special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

This is a **MUST-HAVE** range-bag accessory. It's a squib rod (for removing stuck bullets), magazine base removal tool, and scope windage adjustment and battery cap removal tool.

**P43-15250 \$12.95**

# The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location.

The result: **NO MORE BROKEN BOLTS!** The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.  
HMB Bolt

P43-66680 \$99.00

This tool makes it simple to remove or install a new ejector and spring into the AR-15 bolt. Anyone who has tried to do this without a tool will be amazed at the reduction in the number of cuss words needed to perform the task. Comes with alignment and roll pin punch.

YM Bolt Assembly Tool

P43-66678 \$39.95

Young Manufacturing's Upper Receiver Vice holds any AR15 upper receiver regardless of the manufacturer. Since it supports the receiver from the inside, the outside dimensions are of no concern. Made from aircraft-grade 6061 T6 aluminum and anodized to MIL-A-8625 Type 3 Class 2.

# 72 KNS Precision, Inc. AR ACCESSORIES

KNS Precision, Inc. AR-15 Bolt Catch Retainer Pin. **P43-33390 \$9.00**

Perma-Pin Firing Pin Retainer for M-16 and AR-15 replaces the standard cotter pin found in the bolt carrier to retain the firing pin (as in original Stoner rifles). Made of tool steel. No modification to gun required. **P43-19927 \$9.00**

Gen 2 Mod 2 Non-Rotating Trigger/Hammer Pins .154 Diameter. **P43-33391 \$33.00**

Gen ST Non-Rotating Trigger/Hammer Pins .154 Diameter. **P43-33392 \$38.00**

## M-14 Bolt Roller Greaser

So THAT'S how you grease that little S.O.B. (Slick-Operating Bolt, that is.) M-14/M1A Bolt Roller Greaser **P43-18531 \$8.99**

## Adjustable M1/M1A Gas Systems

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

## Taylor Freelance Magazine Extensions

- AR-15/Tavor 9mm SMG +10 **P43-12377 \$39.95**  
This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many "stock" mag springs. *NOTE: Colt SMG mags come from many different manufacturers. Colt offered at least two major types - one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.*
- TF/Wolff Spring for above **P43-12213 \$10.00**  
Some Colt/Tavor/UZI magazines ship with strong springs capable of powering +10 extensions. Others don't. This spring eliminates the problem.

- CZ Skorpion +10 **P43-12378 \$49.95**
  - Extra length/strength spring included
  - Thumbscrew-and-gasket retention system allows for quick, easy disassembly.
- GLOCK +20 Pictured **P43-12148 \$69.99**  
Transforms Glock 31-round magazines into 51+1 round mags. **Legal for PCC competition!**
  - Extra length/strength spring included.
- SIG MPX +10 **P43-12376 \$29.95**
  - Works with stock mag spring.
  - Angled floor stands the magazine straight up on a table for easier loading.
- SIG P320 +5 **P43-12375 \$39.95**
  - Extra length/strength spring included.

# 74 "The Perfect Small Parts Cleaning Accessory"

**P43-10209 \$15.95**

The HYSKORE Degreezer consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. As anyone who has cleaned a gun is aware, cleaning small parts is a major challenge. Given the available technology and fixtures, the standard procedure is to use some kind of cup or similar vessel, pour in a quantity of cleaning solvent, and then pick up the parts one by one and brush them clean. The Degreezer changes all of that. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. As a bonus, the set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline. The Degreezer will quickly become an indispensable fixture on your workbench.

## HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

**P43-10208 \$19.99**

The Pachmayr Pac-Mag™ Holds up to 30 pounds and the three-magnet design gives the Pac-Mag more strength than any other gun magnet on the market. Secure almost any gun – pistol, rifle or shotgun – practically anywhere!

**P43-10098 \$19.99**

## D•WIPE Towels & D•LEAD Hand Soap by ESCA TECH, INC.

D•WIPE Towels were specially designed for immediate clean up of most contaminants without water. The soft 5.5" x 8" towels are saturated with a unique cleansing formula and aloe vera, and will remove heavy metals from skin and other surfaces.

40 Soft Towels **P43-19916 \$4.95**

Original D•LEAD Hand Soap quickly cleans heavy metals as well as paint dust and firing range residue from the skin and fingernails. Removes lead, nickel, cadmium, arsenic, mercury, silver, zinc and most other heavy metals.

8 Oz. Bottle **P43-19915 \$2.95**

# Kershaw®

**TRUST YOURSELF. TRUST YOUR TOOLS. BE READY FOR EVERYTHING.**

**K**ershaw Volt II opens one-handed and with an authoritative "twack" thanks to Kershaw's SpeedSafe® assisted opening system. A simple pull back on the flipper and the Volt II opens smoothly and easily.

*Blade length: 3.25" Closed: 3.9" Open: 7.1"*

**P43-66698 \$55.95**

**D**esigned by RJ Martin, the Volt II has the same versatile blade and handle style as the original Volt, but with a hardworking 8Cr13MoV stainless steel blade and textured, black glass-filled nylon scales.

*Blade length: 3.25" Closed: 3.9" Open: 7.1"*

**P43-66699 \$49.95**

**K**ershaw Pub looks like nothing you've ever seen. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip.

*Blade length: 1.6" Closed: 3.1" Open: 4.5"*

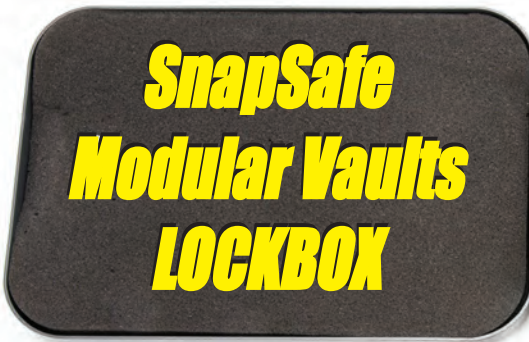

**P43-31323 \$24.95**

**T**he Kershaw Method opens quickly, easily, and manually with Kershaw's KVT ball-bearing system and a built-in flipper. The handle is black – of course. The G10 handle features an unusual machined pattern reminiscent of an architectural truss.

*Blade length: 3" Closed: 4.25" Open: 7.25"*

**P43-66700 \$39.99**

**SnapSafe  
Modular Vaults  
LOCKBOX**

**T**he SnapSafe® Modular Vaults LOCKBOX is a pry-resistant 16 gauge steel container that provides secure storage for handguns and other valuables. Meets TSA airline firearm guidelines.

*Dimensions: 9.5" x 6.5" x 1.75"*

**P43-01044 \$19.95**

# 76 C-MORE SYSTEMS

**RTS2R**

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

## J. Dewey Mfg. Co. AR-Link Cleaning Pin<sup>^</sup>

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. **P43-18599 \$14.95**

## Emergency AR(epar) Kit

*Crucial Parts for Your AR-15*

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring. **P43-19460 \$19.95**

## Tac Latch

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/AR-10 charging handle. It works especially well for "flat-top" rifles equipped with low-mounted optics. **P43-10379 \$18.95**

## Jerry Miculek AR-15 Compensator

Jerry Miculek's three-chamber AR-15 Compensator fits threaded-barrel rifles and may be "clocked" for left- or right-handed shooters. Used by many top three-gun competitors. **P43-11328 \$49.95**

## EGW Chamber Checkers

- Speed up the round-checking process when you're getting ready for a match!

# Bushnell TRS-25<sup>^</sup>

## Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 (Includes riser, not pictured.) **P43-31318 \$119.95**

## Scout Scope Mounts for AK, SKS Rifles

*Sorry, the optic pictured here is NOT included with the Scout Scope Mount.*

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **P43-25374 \$79.99**  
Scout Scope Mount for SKS Rifle **P43-25373 78.99**

## Evolution Gun Works Picatinny Rail Scope Mounts

**\$39.99**

# Ashley Hlebinsky

## Master of Arms History

A photograph of Ashley Hlebinsky, a woman with long, wavy blonde hair and bangs, wearing a red sleeveless top and a blue denim jacket tied around her waist. She is holding a long, dark rifle vertically in front of her. The background is a rustic, wooden structure with warm, golden light filtering through, creating a bokeh effect. The overall mood is historical and professional.

Ashley is Curator of the Cody Firearms Museum – one of the largest collections of firearms in the country – and wants us to let you know it's getting an extreme makeover. The new museum reopens July 6, 2019. It boasts over 10,000 artifacts on display, four firearms simulators, several high-quality videos, as well as mechanical- and media-interactives. The exhibits span more than 800 years of history, interpreting the many ways firearms have been used in the history of human endeavor. For more information about the grand opening, visit [centerofthewest.org/new-cfm](http://centerofthewest.org/new-cfm).

Here with Ashley are the rest of the cast of the Discovery Channel's "Master of Arms," from left: Trenton Tye, Zeke Stout and Nicholas Irving.

### By Kimmie Dillon

This month's cover model is as fascinating as she is dazzling. Ashley Hlebinsky earned her master's degree in American History and Museum Studies from the University of Delaware where she studied the perception of firearms in culture. For our *Blue Press* shoot, we met Ashley at MacDonald's Ranch ([macdonaldsranch.com](http://macdonaldsranch.com)) in Scottsdale. Still fresh from her long flight, she even brought a few rare gems from private collections for us to photograph: a Beretta BM 59 rifle with an attached bayonet and a Winchester Model 1894. This is the rifle you see on our *Blue Press* cover and it's rare because it's a first-year-production gun with a silencer from Maxim Silencer Co. After we wrapped our shoot, Ashley shared more about her enthusiasm for firearms and gave us a peek into her life as an expert in the field.

**KD** – Ashley, you have a magnificent knowledge of firearms. Just hearing you speak shows how passionate you are about guns and their history. What got you interested in the firearms industry?

**AH** – I got interested in firearms history through ballistics and battlefield medicine. I spent my whole life wanting to be a doctor, but during my first semester freshman year of college, I went on a Civil War medicine tour. The guide talked about how the advancements of weapons technology altered medical technology, specifically referencing the Minié ball – an early conically shaped projectile. After that, I changed my major to history and basically did everything I could to learn about firearms – I did internships,

my own research, and learned to shoot a range of firearms from historic to modern.

**KD** – At what point did you know that you wanted to turn your love for firearms into a career?

**AH** – It actually all happened at the same time. I didn't grow up around guns; in fact, I had never even held a gun until I was 18 at my first museum internship. During that internship, I had to identify over 200 firearms and I got hooked.

**KD** – You really did! Did you have a mentor or did anyone inspire you along the way?

**AH** – Very much so! I have had many in my career. The first would be Mike Kraus from my first internship. He really took me under his wing, especially since the institution had already selected their intern for the year, and he was able to squeeze a spot in for me. And then also David Miller, for whom I worked for about three years at the Smithsonian.

**KD** – You also assisted the Smithsonian as a firearm historian. Please take our *Blue Press* readers behind-the-scenes and describe what this experience is like?

**AH** – It's probably not quite what people think. When I was doing research for the Smithsonian, I was also still finishing up college and then graduate school. I had a desk in the same area as the curator and our office was inside the gun vault. We worked surrounded by thousands of firearms and edged weapons. Actually the first time I was introduced to Dillon was because we had the calendars and *The Blue Press* at the office.

**KD** – That's awesome! Tell us about your appearances on the Discovery Channel's "Master

**80** of Arms.” ([discovery.com](http://discovery.com)) What are some of the most memorable highlights?

**AH** – That was a really fun experience. I enjoyed it because even though there’s long hours in filming, it was very much a routine – not something I get running the Cody Firearms Museum ([centerofthewest.org](http://centerofthewest.org)) and the renovation project. It was also really awesome getting to watch real craftspeople develop a firearm from start to finish. I’m a book nerd and even though I get out shooting, I haven’t yet had the opportunity to build something like our contestants did. It’s kind of like watching history come to life.

**KD** – The show features some incredible reconstructions of armaments that changed the course of history. Tell us about some of the specific weaponry from the show that made the biggest impression with you?

**AH** – I think I really enjoyed the episode on the American long rifle. The long rifle in and of itself is an iconic American firearm, but our show had a twist. The long rifle is always associated with the American Revolution. While it was used during the War, it didn’t see as much use as people may think. It was used by rifleman units for specialized purposes. Rifling was invented in 1498, but

because the projectile until the 1800s was a round ball, in order for rifling to work, it had to fit snugly, which slowed the reloading process. As a result, it was used in sport and for specific purposes in war. The “slow to load” pitfall of the rifle actually proved fatal for some units because muskets had the ability to fit a bayonet and be used in

charges. In our episode, we made the craftsmen affix a bayonet to the long rifle. The most difficult part of that? It’s hard to fit a round socket on an octagonal barrel.

**KD** – You also appear on some other shows with the Travel and Outdoor Channels. What’s been a TV moment that didn’t go quite as expected?

**AH** – I think honestly it was the Discovery channel’s “Master of Arms” crossbow episode. Not to give away many spoilers, but crossbows are

incredibly difficult to make and we had two people from different disciplines of craftsmanship. They had great looking bows, but we were definitely biting our nails during the testing to see how they would work. And if you saw the episode, you can fill in the rest....

**KD** – We are enjoying your stories! In your mind, what are some of the most underrated historical firearms?

**AH** – The most underrated early mechanism in my opinion is the wheellock. The wheellock was invented around 1509 and it was almost too advanced for its time. It was fickle but had a faster lock time that many early flintlocks. It was developed in a handgun form for cavalry warfare. However, it was used more for sport because

when it broke, you needed a highly specialized person to fix it. The way it fires is this: there is a serrated disc. The disc gets wound up by an external tool called a spanner. When getting ready to fire, you lower the cocking mechanism that is holding pyrite onto the pan with the exposed disc. When ready to fire, the user presses the trigger,

**In Her Element** – Ashley tries on authentic armor at the Art Institute of Chicago, measures herself against a 7-foot-long punt gun from the 1800s and examines the Winchester Model 1873 found leaning against a tree at Great Basin National Park.

causing the disc to spin enough to create a spark with the pyrite.

**KD** – Such sophistication for an early time period! Ok, I have another historical question about your opinion on early firearms and their influence. It's kind of a tough one and I want to get your take. If you were to pick three arms that had the biggest impact on our American history, what would be your three and why?

**AH** – It's really tough! There are so many that impacted American history and I know people are gonna be so mad at me for leaving stuff out but here are three that really impacted our history:

1. Charleville Musket – This musket was basically the French version of the British Brown Bess. Without French intervention during the American Revolution, we would have had trouble winning the war. And that firearm served as the basis for the first guns produced by the first federal armory, Springfield.
2. Colt Revolver – While I must reference Colt's influence and proliferation on the American West and in western popular culture, it also revolutionized mass production, not just for the gun industry but also for other industries. Samuel Colt's early production lines and precision machinery and efforts for interchangeable parts set the stage for the mass carrying of Colt revolvers and ultimately other firearms.
3. Thompson Submachine Gun – The Tommy gun is significant for its use on the battlefield and also by law enforcement agencies; however, it was its infrequent use by criminals coupled with the popular culture sensationalism that made it synonymous with crime and gangsters. The image of the Thompson as a "crime gun" makes it one of many to influence the most significant firearms regulatory act of the 20th century, the National Firearms Act of 1934.

**KD** – Very, very interesting. For fans of western and firearms history, the Buffalo Bill Center of the West in Wyoming is a must see. The gem inside of the museum is the Cody Firearms Museum where you are the Curator. Girl power, my friend! What can our *Blue Press* readers expect to experience at your museum?

**AH** – There is pretty much something for everyone in the Cody Firearms Museum. People assume, because we are part of a western institution, that we only have western guns, but that is definitely not the case. We have an encyclopedic collection of firearms and ammunition dating as early as the 1200s and continuing to modern day. Right now we are renovating the museum, reopening in July 2019. In the new museum, visitors will learn about 800 years of history in 10,000-plus objects in 40,000 square feet. The museum will have many new videos and mechanical and media interactives as well as four firearms simulators, including a Browning M2 Machinegun!

**KD** – For all of us loaders out there, you're probably guessing what my next question is: What

does the Cody Museum have in the way of reloaders?

**AH** – The museum has a lot of 19th-century reloading tools, but we also have this really cool loading machine from the Winchester factory.

**KD** – Your museum sounds like a must-see destination to me! How much time should we allow to visit the entire Buffalo Bill Center of the West?

**AH** – That's a tough one. Admission to the Center is for two days. There will be over 10,000 artifacts, firearms and ammunition, to explore, so some people may need more than two days to really spend time with the collections. We did create a fast-track gallery for those who don't have a ton of time but still want to get a good overview of firearms history.

**KD** – We look forward to visiting the museum in the future. Tell us about your business, The Gun Code ([theguncode.com](http://theguncode.com)).

**AH** – About six or seven years ago, I realized that there was a dearth of information on guns in museum collections, so I began freelancing for other museums. I did workshops and training and even guest curated for other peoples collections. My consulting continued to grow, so I created an umbrella company, The Gun Code, for all of my work outside of the museum. Right now, I continue to consult for museums, freelance write, guest speak, serve as an expert witness, am a certified firearms instructor, and then do TV both on camera and behind the scenes as a producer.

**KD** – What are some of your hobbies outside of firearms?

**AH** – With this renovation, it seems like my whole world is firearms, but I'm actually a whiskey and cigar lover. I'm also a new hunter, and I have gotten very into creating elaborate meals from the animals I've harvested to share with my family and friends.

**KD** – What is your favorite firearm to shoot? Do you shoot competitively?

**AH** – I do not shoot competitively. My husband is a professional shooter, but my passion before I moved to Wyoming was ballroom dance. I was competitive ballroom dancer in NYC and while I love shooting, if I had the time to get back into competition, it would be ballroom.

My favorite gun to shoot? Hands down, a matchlock musket. I got to shoot one a few months ago for filming and it was one of the most interesting experiences. The matchlock was developed in the 1400s and it operates by using the trigger to lower a burning match cord into a pan full of powder to fire the gun. I'm just glad I didn't use hairspray that day.

**KD** – Ha ha! The matchlock musket sounds absolutely fascinating and now you have me wanting to shoot one! Thanks for hanging out with us, Ashley. We enjoy getting to know you and passing along your knowledge and insight with our *Blue Press* readers.

## Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.
