**Dillon's
New-
Reloader
XL 650
Package**

See Page 2

er XL 650 Package

You've made the decision that loading your own ammunition is right for you. You're ready to pull the trigger, but uncertain of exactly what you need. Dillon has taken the work out of this. We have assembled a New-Reloader Package, featuring our most popular reloader, the XL650, with the most popular machine options, along with the accessories you'll need to begin reloading immediately. This package is available in 9mm, .223/5.56mm, or BOTH.

9mm 650 Package Includes:

XL 650 in 9mm
9mm Die Set
Bench Wrench
Small Pistol Casefeeder
650 Strong Mount
Bullet Tray Kit
Roller Handle
9mm Case Gage
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers
The Complete Reloading Manual for the 9mm Luger
Total: \$1331.35

.223/5.56mm 650 Package Includes:

XL 650 in .223/5.56mm
.223/5.56 Die Set
Bench Wrench
Small Rifle Casefeeder
650 Strong Mount
Bullet Tray Kit
Roller Handle
.223/5.56 Case Gage
Dillon Case Lube
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers
The Complete Reloading Manual for the .223 Rem.
Total: \$1363.30

Combo Package (.223/5.56 Conversion Pictured at Right) Includes the 9mm Package Above, Plus:

.223/5.56 Conversion Kit
.223/5.56 Die Set
XL 650 Quick Change
.223 Case Gage
Dillon Case Lube
Small Rifle Casefeed Plate
The Complete Reloading Manual for the .223 Rem.
Total w/9mm Pkg.: \$1704.50

As a token of our appreciation for new reloaders who purchase one of these packages – while supplies last – we're going to include one of these **Tactical Tailor** Operator Caps and our Dillon Precision morale patch. The Tactical Tailor cap is an incredible value: a high-quality product that's made in...wait for it...the USA, by a company that prides itself on hiring veterans. The hat in the photo is MY hat, and I've lost track of how many times it's been washed – IN the washing machine! It STILL looks great! If you're the kind of person who not only wears hats, but also WEARS THEM OUT, you're going to love this hat.

We READ Our Mail!

I just finished setting up my new Dillon Super Swage 600 and ran 200 military .308 cases through this tool. What a pleasure to use, and I was amazed on how quickly I completed this unpleasant chore. I've been reloading for over 30 years and hate to think of how many hours I've wasted doing removing the GI crimps by hand. The Super Swage 600 is a great tool...keep up the great work Dillon Precision!

Mike Comroe – pennstateblue@verizon.net

I greatly enjoy reading the articles found in *The Blue Press* and have several times started to write but never seemed to finish and send. However, reading the write-up on the Rex Zero 1 by Peter Caroline I couldn't help but notice a problem he and most likely a great many people have: small hands. It is really nice to have a double-stack magazine that holds a box of 50 shells, but that requires us small-handed folks to wrap both hands around the grip and use a finger extension to reach the trigger. Anyway, thank you Mr. Caroline for mentioning us small-handed shooters. I will add here that it was a write in about a mishap with .45 ACP cases that have small primer pockets that alerted me to check my brass. Thank you for great stories and the reloaders alerts.

James Newill (a 550B user) – jlnewillseven@yahoo.com

I always look forward to the monthly copy of *The Blue Press*.

Among other reasons are the interesting firearms you feature.

The January edition showcased the PPS43-

C, which is a great addition to any collection. The 7.62x25 is a great, flat-shooting round that really hums along. I found that it isn't that easy to sight, even with a sling. Hence, I obtained a picatinny rail and purchased a Crimson Trace green laser. Holding the weapon securely and placing the green dot on the target really enhances the accuracy and fun.

Dillon Precision
Products, Inc.

All the electrical and/or electronic components of Dillon equipment and all Dillon textiles are covered by a one-year warranty from date of purchase. Any modifications performed to Dillon machines, or the addition of any unapproved equipment, including automated or mechanical add-ons from other manufacturers, is expressly not recommended and will void the Dillon warranty.

ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

HERDING CATS,

OCTOBER 2018 GUNS

By Peter Caroline

I'm one of those people who have to make lists before hitting the road. Prior to any trip, I make a detailed list of clothing, guns, ammo, accessories and even snacks for the trip. And just as important...GPS, radar detector, a full tank of gas and an empty bladder. The distance to Gunsite from Green Valley, AZ is 247 miles, which should take four hours, barring any Sunday traffic jams and accidents. Thankfully, I did not take part in the latter. I checked in at the Days Inn in Chino Valley shortly after 1:00 p.m., and headed up the road for a late lunch at Danny B's, where they serve generous drinks and excellent fish & chips.

Later in the afternoon, I found my way to Rob Leahy's Simply Rugged Holsters shop where he was hosting a meet-and-greet for 20-some members of the gun writing profession. In keeping with the company name, the road was...simply rugged. The food was plentiful, and adult beverages were provided. We got the shop tour and checked out all the fancy equipment Rob and his crew use to perform leather magic.

The next morning, at 7:30, we started assembling in the classroom at Gunsite, filling out all the usual legal releases and, more important, selecting our lunch choices for the next three days. We viewed several tables covered with our sponsors' products...Simply Rugged Holsters, Ruger, Republic Forge, Tyler Gunworks, Lipsey's Guns, Skinner Sights and DoubleTap Ammo. After partaking of all this sensory overload, we were invited to head

for the range and put these treasures to work. We started with an exercise that involved learning the proper sequence of draw positions, and shooting at Gunsite's totally disorienting camo silhouette targets from varying distances. All ammo was supplied gratis by DoubleTap. We had a tour of the Fun House, where one is challenged with a series of room entries, recognizing possible threats and responding appropriately (i.e. attempting to avoid shooting hostages, etc.). After a satisfying catered

lunch, we were back on the ranges for more shooting. The range safety procedures at Gunsite are truly impressive, and consistently maintained. Gunsite's safety rules are conspicuously posted wherever you go, and instructors watch you every move. This constant observation is actually quite reassuring, and corrective comments are offered in a polite and friendly manner...not at all reminiscent of boot camp.

Dinner that evening was at Murphy's Steakhouse, an elegant 19th century establishment in downtown Prescott. We had our own upstairs dining room. I opted for an escargot appetizer, followed by lightly seared Ahi tuna, and both were excellent. I reached for my wallet at the end of the meal, and was told that Ruger was footing the whole bill. Thank you, Brandon Trevino!

On Tuesday morning, we assembled in the classroom again and then proceeded to the North Range, where we split into different groups for the Fun House and the Donga. "Donga" is the Afrikaans word for ditch. You stumble through a rocky gully and engage steel silhouette targets at unannounced locations, and attempt to knock

Notorious Gunsite silhouette target.

GUNSITE STYLE

Writers' EVENT

them down while presumably avoiding hitting hostage-designated targets. Dandy fun! At the North Range, there was an impressive display of new and custom guns from Republic Forge, Tyler Gun Works, Ruger and Skinner Sights. In addition to sights, Skinner also offers some very nice shooting accessories and a unique selection of customized lever-action rifles. Later in the afternoon, when we'd had a chance to clean up a bit, we formed our vehicles into a caravan and drove up the hill to Gunsite owners Buz and Sonja Mills' castle (yes, a real castle!) for cocktails and hors d'oeuvres. There was a generous array of treats and beverages, plus a genuine tripod-mounted brass Gatling gun that somehow blended subtly into the overall décor (don't try this at home). It was a beautiful setting and a grand evening, thanks to our gracious hosts.

Wednesday turned out to be somewhat of a do-what-you-want day. Normally, during the regularly scheduled Gunsite 5-day classes, students happily adhere to a rigid schedule. They've paid several thousand dollars for the class, the ammo, plus travel expenses, lodging and meals, and they want to get the full benefit of the Gunsite experience. gun writers, on the other hand, are getting the instruction, the ammo and meals at the expense of the sponsors. They also are among the last of the independent operators, and tend to resist any attempt at organization; trying to keep them in some semblance of order is a task on a par with herding cats. Ed Head, Gunsite's genial Chief

Instructor, has the patience of a saint and deserves high marks for his efforts. That said, I spent most of Wednesday trying out a number of guns that interested me, including some incredibly crafted Republic Forge custom 1911s and some of Bobby Tyler's engraved and/or color casehardened works of art. One gun that really rang my chimes was a takedown .44 Magnum/.44 Special lever-action carbine that included a case with a matching-numbered hunting knife and a small survival kit.

It's imported from Italy by Skinner Sights and is fitted with a Skinner aperture rear sight and red fiber optic front, a combination that offers a sight picture resembling a miniature red-dot. The gun is an absolute delight to shoot. Later in the day, I was privileged to spend some time chatting with Sheriff Jim Wilson, a gentleman of the old school, with a refreshingly realistic view of the world.

Our final activity at Gunsite was a very satisfying barbecue dinner with all the fixings, then back to the Days Inn, where I met up with a number of old and new friends and then to bed. It just doesn't get any better than that.

RL 450 Powder Die:

P09-20308, \$23.95

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form - Dillon's BL (Basic Loader) 550 - adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers - just like the RL 550 - it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.95 each, or \$24.95 each if you buy three or more - if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy - you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

WARNING: The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

RL 550C[^]

STANDARD FEATURES:

- Made in the USA
- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

Square-Deal-Only Wrench	P09-19970	9.95

Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	P09-22051	\$52.45
XL 650-only	P09-22052	49.45
"SDB"	P09-22223	68.45

Dillon's "Belted Magnum" Powder System[^]

System[^] features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System
P09-97126 \$158.95

Dillon's Roller Handle[^]

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle
P09-17950 \$48.95

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	P09-22214	\$45.95
1050 Tray Kit	P09-22215	45.95

Dillon's Low Powder Sensor[^]

Sensor[^] provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

P09-16306 \$43.95

Quick-Change Cover[^] for use with powder measure.

P09-11143 \$14.95

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550!

Dillon's Case Preparation Equipment

CV-2001[^] P09-20493 \$191.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part.

Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

CV-750[^] P09-19455 \$146.95

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

CM-2000 Case/Media Separator[^] P09-20675 \$78.95

CM-500 Case/Media Separator[^] P09-21045 \$47.95

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers: Case Cleaners are available in 220 volt!

Euro CV-2001 P09-22047 \$216.95

Euro CV-750 P09-19473 \$171.95

Rapid Polish[^]

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **P09-13804** **\$8.95**
Case (20 pc.) **P09-20255** **135.95**

Case Lube[^]

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **P09-13733** **\$11.95**
Case (20 pc.) **P09-20256** **168.00**

22 Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!
Fills the primer tube while you reload!
Clear polycarbonate shield and protective housing

Dillon's RF 100 Automatic Primer Filler[^] eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$52.95 each.

Super 1050/RL 1050 Short Trim Die Toolhead[^]

P09-62219
\$230.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. **(NOTE: the Blue 1050 toolhead stand – Part Number P09-62200, \$49.95 – is not included.)**

Rapid Trim 1500 Case Trimmer[^] 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P09-62164** is **\$337.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P09-13141**, are **\$20.95** each. Upper lock rings, **P09-13559**, are **\$5.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600[^]

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Dillon's Concealed Carry Tote[^]

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for

quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

Mernickle

Conceal-Carry Performance Series

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

“Plan B”[^]

Very-Bad-Day Planner Holster

Dillon’s “Plan B” Very-Bad-Day Planner Holster[^] holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won’t draw undue attention. It looks like a typical day planner, but inside there’s a holster that’s adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels. “Plan B” Holster **P09-10252 \$24.95**

5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

Mr. Bulletfeeder[®]

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

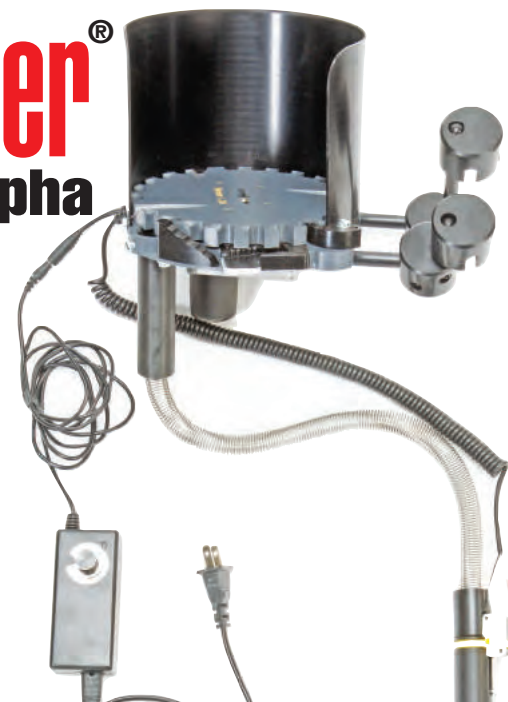

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

Mr. Bulletfeeder[®] Replacement Parts & Spares

Having separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

The Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collator to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

Loss a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

Dillon's Pistol Die Sets

Size Die

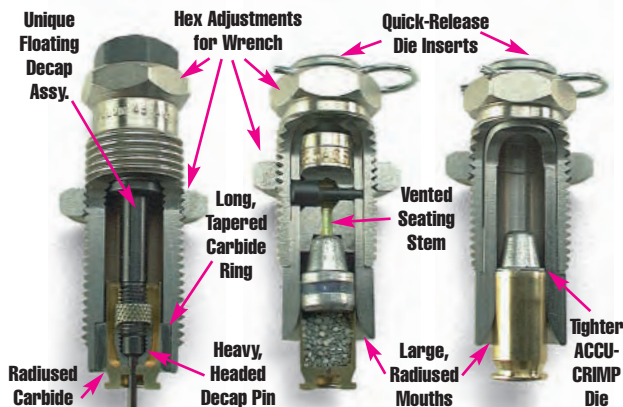

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)[^]

.223 Remington	P09-10839	\$80.95

36 THE ONE-GUN SOLUTION OF

By Barrett Tillman

We've long heard the wisdom, "Beware the man who owns one gun. He probably knows how to use it."

But ask any shooter how many guns he/she owns, and you immediately encounter frosty reality. The first response, of course, is "None of your damn business."

The second response, equally valid, is "Idunno." Serious shooters buy, sell, and trade guns almost constantly. I've always suspected that one of my longtime friends, a retired policeman, has owned about 8 percent of the firearms in Maricopa County.

But regardless of how many guns you own – or estimate you own – you can only use one at a time unless you shoot SASS Double Duelist category. (One single-action revolving pistol in each hand, buckaroo.)

The subject arose when dining with my shooting partner who's also my attorney and a financial planner. (Cue Warren Zevon: "Lawyers, Guns and Money.") We got musing about theoretical

ballistics – not velocities and trajectories, but the rhetorical question. If you could only keep one gun – or had to grab one gun and run out the door – what would it be?

Obviously there's no "right" answer. Priorities and circumstances are different for most people, and those factors are liable to change.

But there are common denominators to consider. Very few Dillonites will limit themselves to one gun, but many of us probably know people interested in the subject. "What gun should I buy?" So here's some thoughts to share.

Sidearms

Pistols and revolvers have inherent advantages. They're small and light, highly portable and easily concealed. Double-column pistols provide 15 or more rounds without a reload. But Deputy Rick Grimes has survived eight seasons of "The Walking Dead" with his .357 Python and a couple of speed loaders. If a wheelgun gets you through the Zombie Apocalypse, maybe that's all you need. In TV land.

A word about reloads: they hardly ever occur in real-world confrontations. Of the many gunfight winners/survivors I've known, only one reloaded and that was simply because he could, not because it was necessary. But for our theoretical purposes, after you've solved your problem with the handgun you hefted, then what? Is the fight really over or was that Round One? Is the emergency that drove you out the door resolved? What's the prospect for Round Two or Three?

Rifles

There are rifles and there are rifles, from .22 LR to .300 Blackout or better. But keep in mind that a Ruger 10-22 has some advantages – small, light, reasonably accurate, and adaptable to accessories including optics. Offhand 50-yard precision shots are fairly easy for a competent shooter.

A great deal depends on where you live. Out in the wild, a lever action or boltgun could meet your needs. The scout rifle concept popularized by Jeff Cooper has much to commend it, especially with detachable box magazines and a glass with backup iron sights.

In urban environs, extra ammunition makes enormous sense for obvious reasons. Therefore, some shooters might want a semiauto .30 caliber for penetration of various barrier materials, whether automotive or structural.

Others will play the .223 card, most often in an AR-15 platform. There's much to be said for a CAR-15 with a Boonie Packer Redi-Mag attachment, holding a spare magazine. That permits two mags on the rifle all the time, or one on the gun with the magwell empty. No need to look around for more feed devices or ammo. Remember that the NRA member who ended last year's Texas church shooting had to finger-load his AR mag before responding. That's a crucial factor when seconds count toward survival – your own or someone else's. Additionally, the CAR's telescop-

DR: THE GRAB-AND-GO GUN 37

ing stock enhances portability and hide-a-bility. With variable-power scopes, and with red-dot sights, rifles can be used up close. And in the urban jungle a rifle covers the down-the-block distance of 1/8 of a mile, or more than 200 yards. An optic with a quick-detach mount to unmask iron sights is yet another advantage.

Shotguns

Shotguns are similar to rifles: usually too long for concealment but bringing desirable options to the fight, whether a pump or semiauto, or even a double barrel.

The first advantage of course is a variety of ammunition, whether bird shot, buckshot or slugs.

Secondly, a 12 gauge strikes with authority. As a rule, buckshot patterns spread by an inch every

trouble you do not need. Absent a stock, the pistol grip transfers the considerable recoil to your hand rather than to the pocket of your shoulder. Pistol-grip-only shotguns have been called “one trick ponies” for a reason. They are only useful when single-digit seconds count toward survival in emerging from a tight spot or vehicle.

The Bugout Bag

Rather than focus on just grabbing a gun in an emergency, consider a “bugout bag” containing the weapon of choice. A zipper case for a long gun can include extra ammo, magazines, even spare parts. That gives you more options than the

three feet (“An inch per yard”). So you should invest in some test ammo and range time to determine what’s optimum in your scattergun, but generally buckshot is effective to 30 yards – sometimes more.

How dense a pattern do you want? Double 0 buckshot holds eight pellets; number one holds 16; number four has 21, all in diminishing caliber of balls, of course. All have their advocates.

Today’s slugs can be shot accurately at 100 yards and beyond, depending on specifics. Availability of sabot rounds presents even more options for consideration. If slugs are your prime ammo, you can invest in a rifled barrel to enhance down-range accuracy.

A folding/collapsible stock may be an advantage for your shotgun, assuming optimum portability and semi-concealability are factors. But a shotgun with only a pistol grip – no stock – is

bare-bones rifle or shotgun by itself. Additionally, a “ready box” containing a variety of ammunition can provide what survivalist pioneer Mel Tappan called “ballistic wampum” for trading purposes.

There’s another aspect of firearms choice. It’s conceivable that some people only want one gun, or perhaps can only afford one. In that case, conditions likely will dictate the selection. In military terms of “Clausewitz 101,” define the mission-purpose. Does the individual want a gun for plinking, defense, or “Whatever”? A .22 revolver probably wouldn’t be many peoples’ choice but it could be adequate for some.

And there’s another aspect related to age. If you’re entering an assisted-living facility, you probably won’t have a gun rack on the wall (though maybe that’s an untapped market). In that instance, a handgun is the obvious choice. Securing the weapon is a vital concern, so investigate methods of storing it safely while permitting reasonably fast access. A small lock-box with a two- or three-digit entry code stored out of sight has much to offer.

In any case, give some thought to the one-gun option, for yourself or for others.

Photo: The editor’s approach to the “one-gun solution” (although he carries a sidearm as well) is a minimalist AR pistol chambered in .300 BLK, carried chamber empty with the safety off in a messenger bag. The 20-rd. magazine, thread-protector muzzle device and foam sleeve on the buffer tube help make this “modern mare’s leg” as compact as possible for easy carry in an unobtrusive (i.e. not overly large) bag that doesn’t look out of place in an urban setting.

Gun Laws We Need, Part II a

By Alan Korwin

Sure, you're really upset your rights are infringed. Even with your carry permit there are countless places you can't go – and that's within your home state. Cross the invisible line to the state next door, and you can't guess what the rules and make-believe gun-free zones are. You know if you violate one, you'll be in as much trouble as an unlicensed schoolteacher with a pocket pistol. Lord knows if you're forced to use your gun in legitimate self-defense, you'll face a world of hurt – ruinously expensive with media assault dogs probably attached.

This is why our laws have to change. Leftist radicals have been screaming we need to change our gun laws, make them stronger and better. Let's agree! It's time to join their chorus – and take the offensive. We need to fix, upgrade and change our gun laws, so Americans are safer, our rights are restored, and the chances that good people are caught between rocks and hard places, and the days of defenseless, gunless or facing deadly enemies without our safety tools come to an end. Move the culture itself to a more common sense, rational place, reflected by our laws. The media – who may not change in the short term – will face rational legislation and proposals that will be hard to ignore.

First, some perspective. Even the vaunted Cato Institute, steeped in a tradition of libertarian freedom, but constantly dunned with left-wing anti-rights hype about firearms, unfortunately misses the mark with its Freedom Index. When ranking states for gun freedom Cato mainly tallies for gun-control laws, assigning tiny percentages as part of their massive legal overview:

Local gun bans, initial permit cost, firearms licensing index, waiting period for purchases, initial permit term, stricter minimum age, assault weapons ban, open carry index, no duty to retreat, any other weapon, dealer licensing, built-in locking devices, restrictions on multiple purchases, background checks for private sales, registration of firearms, design safety standards, machine guns, ammo microstamping, large-capacity magazine bans, sound suppressor, short-barreled shotguns, short-barreled rifles, .50 caliber ban.

This provides some measure of the lack of freedom a state has with respect to its gun policy. Imagine how different the result if a state were measured for its defense or support of gun-freedom laws by tallying:

Permit recognition and reciprocity; protection for and actual gun education in public, private,

and higher education schools; shooting-range protection; Constitutional Carry; self-defense-law strength; possession protection; prohibited place limits; statewide sponsored competitions; Olympic sponsorship; tax credits available for gun safes, classes, sales days, accessories and ammo; guns at State Fairs; periodic range days; sponsored public safety classes and educational seminars; rights-enhancing laws in play, model legislation enacted, awards and recognition; civilian self-defense review boards; presumption of innocence statutes; RICO protection laws; gun-destruction ban; requirement-to-reveal protection; frivolous lawsuit protection; range-use protection for foreign tourism; local gun rights v. gun-control media assessment; corporate and retail gun-rights discrimination; civil-rights denial under color of law; due-process protection from "red-flag" abuse; and let's pause here.

Wrap your mind around this idea: Laws and society must embrace firearms and gun law as an asset to civility. Crime control is a completely different subject. And neither one is so-called gun control, a euphemism for "disarm the public." America and gun owners do not need "gun control" at this point. The media's constant drumbeat is pure Pravda. More "gun control" and laws reducing your freedom will not accomplish the false-flag purpose constantly bleated.

Crime rises, criminals are empowered and your ability to resist is reduced as "gun control" grows. Crime control is good, but missing from the narrative. Good gun laws are needed. OK, with the stage properly set, let's get on with it.

Frivolous Lawsuit Protection

You cannot fairly be put in legal jeopardy when you legitimately use a firearm, or anything, to harm a person committing a felony, in an honest effort to stop the person(s), defend yourself or other innocent people, or prevent a serious crime. This is basic law, reason, common sense, and has been so since Biblical times. Objecting to this is irrational, indefensible and dangerous.

Socialists and left-wing reformers would have you be the criminal, or at least share blame in such scenarios and that must unequivocally end, by statute. No crime attaches to you if you did nothing to create the situation, and only acted while the crime was taking place. The bad guy, or the person's kin, can't come after you even with civil charges (a lawsuit), if you're innocent and the criminal was doing or attempting to do wrong. Yes, it can be difficult to establish the facts. You're on the hook while that takes place. But your state

and How Freedom is Affected 41

must ban lawsuits by real criminals and their kin against you. Use Arizona's language as a model (Art. 18, Sec. 6, State Constitution). If legislators, lawyers or pundits object they are evil, support crime and don't be afraid to say so.

Repeal Impediments to Arming Teachers

Here is a novel approach to beating the resistance to freedom America faces from internal domestic adversaries. Instead of enacting a law with loud voices arrayed against it – repeal some bad ones. Remove any laws (basically unconstitutional anyway) that prevent or limit the right and ability of law-abiding schoolteachers from exercising their rights to arms while working.

When did this entire class of people lose their Second Amendment rights anyway? Lawyers note: a huge aggrieved class, many with specific articulable harms, potential litigants in class-action lawsuits, you think? The state and local statutes preventing these good people from

keeping and bearing arms are as intolerable acts as a ban on having Bibles or dictionaries would be. These specific civil-rights bans cannot stand, have been ignored far too long.

Drop, or at least add to "Arm the teachers!" efforts, parallel efforts to "Stop School Teacher Discrimination!" Increase the size and color of your tool kit.

Next edition you'll see more principles behind positive gun legislating, and specific bills the legal community can start adopting and pressing forward. The narrative must shift away from stopping rights denial, in favor of rights enhancement.

Alan Korwin, a national columnist, award-winning author of 14 books and veteran of more than 1,000 radio and TV interviews, has been writing as a journalism ombudsman since 2006. He can be reached at GunLaws.com where you can read more common sense like you just read.

Lyman Precision Funnel Set

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. No more powder clinging to surfaces, which can happen with lightweight plastic funnels. The solid construction and quality of Lyman's Precision Funnel Set will be apparent in its first use. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

P09-11389 \$39.95

Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The **Lyman X-Block** is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

CLASSIC FIREARMS: The

By John Marshall

Is it possible that the use of a single firearm could change the course of global history and result in millions of lives being tragically lost in the century that followed? It's not only possible, it actually happened! You are looking at a nearly exact twin to the Fabrique Nationale pistol that launched World War I and subsequently set up World War II. Those conflicts resulted in the reorganization of numerous national boundaries and even further regional struggles. The "butterfly effect" is the theory that a single somewhat insignificant happening (such as a butterfly's flapping wings) could result in a chain reaction of weather or other events. That theory was proved true by the assassination of an Austrian official and his wife in the year 1914. Here is the true story of that incident and the pistol that was used.

The pistol itself was yet another invention of master gun designer John Moses Browning. In the year 1900, his somewhat awkward-looking Model 1900 .32 ACP pistol was produced by F.N. in Belgium and became a commonly encountered handgun in Europe. Its less-than-svelte appearance was partly due to the fact that the recoil spring was mounted in a tube above the barrel. It worked well enough, but it was definitely not sleek. The gun Browning developed in 1908 and patented in Belgium in 1909 changed all that. In this design, the recoil spring was placed around the barrel, making for a slender, streamlined appearance. It was a lighter, more concealable and more ergonomic weapon. Browning offered it to both Colt in the U.S. and Fabrique Nationale in Belgium. Colt declined to adopt it, but F.N. decided to manufacture it. It was first offered in Europe in October of 1912. Browning and F.N. initially referred to it as Le Nouveau Modele (the New Model), but sometime after World War I, it was renamed as the Model 1910. It was imported into the U.S. until 1968, and a longer-barreled variation, the Model 1922, was made until 1983 and sold in the U.S. as late as 1985.

The pistol was a blowback striker-fired design, and was chambered in two calibers, the 9x17mm Browning (.380 ACP), and the 7.65x17mm Browning (.32 ACP). It featured a grip safety that blocked the sear until depressed, a manual safety on the left side that locked both the grip safety and the slide, and a magazine safety. The magazine safety made the grip safety impossible to press when the magazine was removed. The slide did not lock back after the last round was fired, although pushing the manual safety up into the slide's forward notch would lock it back for cleaning or inspection. John Browning had specified that the case length of the .380 round be exactly the same as that of the .32.

It thus became easy enough to change the caliber of this gun by swapping only the barrels. Although marked and "port holed" differently, the magazines for both calibers were identical dimensionally. The magazine could hold seven rounds of .32, but only six .380 cartridges. The magazine release was at the heel of the frame. The concept of the recoil spring being placed around the barrel started with Savage pistols of that era and lived on with the German Walther PP series, the Mauser HSc, the Soviet-designed Makarovs and quite a few others. The gun measured 6.02 inches in length and weighed 1.3 pounds. Total production quantity has been estimated as 704,247.

Early Model 1910s had checkered animal horn grips with a small image of the Model 1910 at the top of the grips. These grips were used for just a few months. Later ones, still checkered horn but with the F.N. intertwined logo in an oval at the top, were used until the beginning of World War II. From that point on, black plastic was used, and after that war some wood grips were utilized. Guns produced in the first full year of manufacture (1912-1913) had the forward slide scallops extending to terminate back beyond the forward lip of the frame. The pistol illustrated, which is estimated to have been made in early 1913, has this slide configuration. Later slides terminate the scallop ahead of the frame.

Now let's turn to the events of 1914 which are forever linked to the Browning Model 1910. A

The F.N. Model 1910 Pistol

group of seven students, members of a political group called Mlada Bosna (Young Bosnia), crafted a plan to assassinate the acknowledged heir to the Austrian throne, Archduke Franz Ferdinand. The plan was to kill him during his visit to Sarajevo, the Bosnian capitol. Austria-Hungary had annexed Bosnia-Herzegovina in 1908, and resentment of that act in Bosnia ran high, particularly among young students. Many wanted a merging of Bosnia with Serbia and Montenegro. The seven ranged in age from 16 to 27, and had attended high school in Sarajevo. They had been recruited by a covert military society called "Unification or Death," which was more commonly called the

"Black Hand." They had especially indoctrinated three young men, Gavrilo Princip, Nedeljko C'abrinovic and Trifun Grabez. These three had visited Serbia and became familiar there with the Browning Model 1910. They practiced shooting that pistol at a park in Belgrade. They were then given four new pistols, six bombs, some cyanide capsules and money in May 1914 before returning to Sarajevo.

On June 28, 1914, Franz Ferdinand visited Sarajevo to attend military maneuvers. Although he had been warned by anonymous threats, he disdained protection, and his security was quite light. His motorcade from the train station to city hall included four open convertible automobiles. He and his wife, Duchess Sophie Chotek, were seated in the second car. The seven young conspirators spaced themselves some distances apart along the planned route. The motorcade first reached the position occupied by C'abrinovic. He threw his bomb at the second car, which bounced off and exploded under the third car, injuring its occupants. C'abrinovic ran, but was almost immediately caught and arrested. Franz Ferdinand ordered the convoy to continue in spite of this event. Although the convoy drove past three other conspirators, they could not act in the confusion and chaos generated by the crowd. The procession arrived at city hall, but the stay was shortened. The convoy then continued on, passing in front of Grabez, who somehow failed to shoot. Although the motorcade was officially re-routed, the driver unknowingly followed the old route. When he was informed of his mistake, he stopped and started

backing up. This placed the Archduke's car a mere five feet away from Gavrilo Princip. He quickly fired at the Archduke and Duchess. Each was hit; he in the neck and she in the stomach. Both died before reaching the hospital. Princip was immediately caught and arrested.

The four pistols, purchased in Belgrade by the Black Hand, were all chambered for the .380 cartridge. When they were traced, links were indicated between the Serbian government, the Black Hand, and the conspirators. Because a Serbian official was intimately involved, the assassination was then considered an act of war.

The Serbian government was accused of plotting the assassination, and diplomatic relations between Serbia and the Austrian-Hungarian Empire were cut. The Austrian-Hungarian army was mobilized, and war was declared on Serbia exactly one month after the assassination, July 28, 1914. This initiated World War I (then known as "the Great War"), resulting in widespread catastrophic destruction and an estimated 37 million casualties until it ended in November 1918.

The first trial of the conspirators started in Sarajevo on October 12, 1914, with 26 defendants. Most of those actively involved, including Princip, were minors and thereby escaped the death penalty. Princip died in prison from tuberculosis on April 28, 1918. A second trial, mostly involving members of the Black Hand and other pertinent Serbian suspects, was held in the spring of 1917 in Salonika. Nine received the death penalty and were executed.

Only one pistol was presented as evidence during the first trial. Its serial number was 19075, but it has been reported that Princip's pistol was number 19074. The remaining pistols of the conspirators carried numbers 19120 and 19126. Princip's pistol is now on display in the Heeresgeschichtliches (Military history) Museum in Vienna, Austria. Badly corroded, it was recovered from a Jesuit monastery formerly in Sarajevo, but relocated to Vienna as WWI started. The .380 pistol illustrated here was manufactured in the same time frame as the four pistols involved, making it a very close duplicate of each of them.

Interestingly, in Serbia and Sarajevo, Princip has often been considered a hero. There is an official Gavrilo Princip day, and some patriotic plaques have been placed on site of the assassination. A medal was minted to commemorate Princip's act, and his grave is routinely decorated with flowers. Regardless of opinion, Princip proved that one person (armed with an F.N. Model 1910) could and did alter world events for more than a century. The "butterfly effect" is now conclusively proven by history.

CCW Tactical Shotgun Strippers⁴⁷

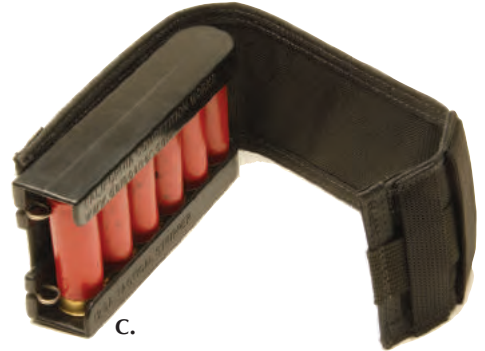

California Competition Works' Tandem Tactical Strippers can be used to hold either shotshells or AR-15/M4/Mini 14 magazines, or a combination of both by installing or removing the aluminum spacers provided with each stripper. The Tandem Tactical Stripper holds a maximum of eight rounds of 12 Gauge (10 rounds of 20 Gauge) shotshells or two AR-15/M4/Mini 14 magazines. Each Tandem Tactical Stripper features a BLADETECH Tek-Lok™ Universal Belt Clip, four removable aluminum spacers, and the screws and Allen wrench required to install them.

Tandem Tactical Stripper **P09-00303 \$55.00**

California Competition Works' Tactical Strippers are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84

attachment device (C.) that will accommodate up to a 2-1/4" duty belt.

A. Six-Shell Tactical Stripper **P09-18606 \$23.95**
 B. Four-Shell Tactical Stripper **P09-18605 \$22.95**
 C. Six-Shell Covered Tactical Stripper **P09-19225 \$33.95**

The new Super Vel. Hotter. Faster. Better.

The original Super Vel Cartridge Company forever changed "police ammunition" with a new style of bullet, the jacketed hollow point. Now, 40 years later, Super Vel is back!

Advertised velocity figures from Super Vel's website are as follows: .380 ACP 80 Gr. Solid Copper Hollow Point **1,100** fps (Walther PP); 9mm 90 Gr. JHP **1,473** fps (GLOCK 43) to **1,632** fps (GLOCK 17L); .38 Special 90 Gr. JHP **1,318** fps (S&W Model 642) to **1,652** fps (S&W Model 27); and .45 ACP 185 Gr. JHP **1,085** fps (S&W M&P) to **1,127** fps (Springfield 1911).

THE SIG-SAUER

By **J. B. Wood**

The model number is clever. It's an instant reminder that you can comfortably carry this subcompact 9mm every day of the year. It's a little smaller and lighter than all of the other little nines. And, there is another very important difference. With one exception, the other 9mm sub-compacts have single-stack six-round magazines. The P365 holds 10 rounds.

The exceptions mentioned above, the S&W Shield, has a seven-round mag. They did this by making it a little wider, with a semi-staggered effect, to get in that extra round. The SIG designers took this a bit farther to achieve 10-round capacity. It's still not a true "double row" type; so let's call it "semi staggered."

And, they did this while keeping the width of the grip-frame at one inch. According to the SIG factory people, the P365 was, essentially, designed around the magazine. Looking at the magazine, you will notice that a straight taper begins about one inch from the top. I can imagine the designer trying several angles and lengths before finding this exactly right slant.

You get two 10-round magazines with the P365. One has a flat floorplate, and the other is slightly extended to form a rest for the small finger. I would recommend using that one as primary magazine, and the flat one as the spare. Available as a separate accessory is a mag with just a little more protrusion that holds 12 rounds.

The other numbers: Unloaded weight is 18.6 ounces. Overall length is 5.8 inches. Height, with the flat-floorplate magazine, 4.3 inches. Width, 1

inch, and barrel-length, 3.1 inches. As previously mentioned, it is smaller and lighter than all other little 9mm pistols.

The frame is high-tech polymer, and everything else is good steel, with a Nitron-black finish. The locking system is falling-barrel, and it is striker-fired. The trigger position would suggest Double-Action, but this is not the case. When the slide is cycled, it is fully cocked. This forward-trigger arrangement makes the distance from the deep incurve at upper rear just right.

There is an automatic internal striker-block. This is canceled only in the last fraction of the trigger-pull, so there's no need for a manual safety. However, there is a version offered with bilateral manual levers. The slide latch is on the left side only, at the top of the grip. The magazine release button is reversible.

There are two welcome design omissions – no silly flipper-safety in the wide, smooth trigger, and no "hook" at the front of the nicely rounded trigger guard. At the front of the frame, there's a groove on both sides for mounting a light or laser. It's not a standard rail, though. You'll have to go with a SIG tactical unit.

The shape of the grip-frame is excellent. A deep incurve at upper rear, and a stippled effect all the way around. At the top, a shallow curved recess on both sides makes a good thumbrest. At the front, very slight finger recesses that will fit, regardless of your finger size. For easy operation, the slide has good retraction grooves at both front and rear. Slide cycling is also helped by the double concentric recoil spring unit.

ER P365 PISTOL

49

Photo 1: The controls: Takedown latch, slide latch, and magazine release. Photo 2: Simple design prevents problems. The sear and disconnecter are shown. Photo 3: A beautiful trigger. No “flipper” safety, no ridges, wide and smooth. Photo 4: A small opening at the rear edge of the barrel lets you see a chambered round. Photo 5: The magazine with the extension accommodates all three fingers.

And now, a nice little surprise: The P365 comes with a set of SIG X-Ray3 night sights as standard equipment. They are square-picture, both dovetail-mounted. The front has a large luminous green circle with a tritium dot at center, and the rear notch has tritium dots on each side. Both are very visible, in daylight or pitch dark.

On my sample P365, the trigger pull was a little scratchy at first. New-gun syndrome, I think. With a bit of use, it settled in to a clean let-off. There's about a quarter-inch of easy take-up, when you're just compressing the trigger spring. Then, the trigger bar engages the sear. On the Lyman electronic scale, the average weight of pull was 7 pounds, 4 ounces. For personal defense, quite acceptable.

When I go to the range with a small, deep-concealment pistol of this type, I don't do seated, casual-rest, and five-yard stuff. I just want to know if it will do well-centered groups in an 8-inch target black at 7 and 15 yards, and whether it will function with several types of ammo. In the case of the P365, the answers were yes, and yes. The ammo ranged from ordinary solids to serious stuff, from Black Hills, Winchester and SIG. It ate them all, no problems.

All shooting was done standing, with a two-hand hold. Two of the best groups, at the 7-yard distance, were 3.5 inches, with no “flyers.” One of those was with the SIG ammo, labeled “365” to match the pistol. The felt recoil, especially with the high-performance ammo, was quite brisk, but not painful. Hey, in a pistol of this size and weight, with full-power ammo, you expect some force.

For the after-shooting clean up, takedown is easy. It is covered in the well-written user's manu-

al, but I have a couple of comments. Don't be offended by the 10 pages of lawyer-ly warnings, and others throughout. They have to do that. Okay, you've locked the slide open and removed the magazine. Now, you turn the takedown latch all the way down until it stops, slightly forward of vertical, restrain the slide, trip the slide latch, and ease it off.

However, unless you have the hand strength of a young Arnold Schwarzenegger, you may not be able to turn down that takedown lever. The full force of the compressed recoil spring unit is bearing on it. To avoid marring the slide, do what I did. Use the plastic handle of a screwdriver to push it down.

The other point refers to reassembly, and this is not in the manual. If, during cleaning, the takedown latch has been rotated back to its locked position, the slide latch will drop down. This will prevent turning the takedown lever back to its fully open position, where it has to be when the slide assembly is put back on the frame. Remedy: Push the slide latch back upward while turning the takedown lever.

Let's see, have I forgotten anything? Ah, yes. On top, at the rear edge of the barrel, there's a small rectangular opening that lets you see the rim of a chambered round, a “loaded” indicator. The MSRP for the P365 is \$600, but as you know, it can be found for less. Also, remember that night sights are included. And, you'll have the smallest, lightest, 9mm that presently exists. And, SIG quality.

Dillon's Bench Wrench Fits 1" Die Lock Rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to

re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

P09-19495 \$9.95

Elzetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

Open up your mind and your perceptions, read the sights, know where every shot is going as you fire it. This ability comes with – you guessed it – practice.

By Duane Thomas

Occasionally I run into people who, after they watch me shoot, say to me, “Well, you *PRAC-TICE*.” And man, they are *accusatory* about it. Like I’m engaging in some sort of deceitful, underhanded practice. Pun intended. The subtext being, “Well, I could do the things you can do if I *PRACTICED*, too.” They may well be right. Yes, it’s true, folks, I am one of those dirty, nasty, sneaky *Practicers*.

The sport and martial art of “combat” pistol shooting is built around the concept of “performance on demand.” So many people, when they’re practicing (assuming they ever do), will try to do something, and fail, time after time, then if they succeed *ONCE*, they’ll count that as their skill level. “I can do this.” No. It’s not enough to be able to “do” something. You have to be able to do it on demand. I call this “What you have in the bank.” On a basic level, combat pistol matches measure what you have in the bank. That’s why, except under extraordinary circumstances, we don’t allow reshoots. It’s not “What can you do if we let you try, over and over again, then count only your best performance when you got lucky once?” It’s “What can you do if you have to grab the gun and go, and every bullet that exits your gun muzzle counts?”

It’s important to realize, however, “performance on demand” is not code for “Never practice.” It means, “Practice intensely and improve your skill

level while you can, so it will be there, and be strong, when you actually need it.”

Recently I was shooting a stage an ASI (Action Shooting International) match. Very simple drill, as stages at ASI matches tend to be. Two USPSA targets at, oh, eight or nine yards, with about five yards distance between them. There was a no-shoot target stapled over everything to the left of the lower A-zone on Target 1, the left target. On Target 2, the right target, it was a mirror image, a no-shoot stapled over everything to the right of the lower A-zone. Stage procedure was: draw from the holster or start with the gun sitting on a 55-gallon drum in front of you (I went from the holster), fire at least six shots on Target 1, move to another 55-gallon drum designating the second shooting position, fire at least six rounds on Target 2. You had to do a reload somewhere before the last shot.

I’m watching other people run the stage before me. No one is shooting for the lower A-zone on either target, they’re doing head shots because they’re scared of hitting the no-shoots.

It’s my turn. “Do you understand the course of fire?” “Yep.” “Load and make ready. Stand by...” BEEP! I draw and Bill Drill the first target, six shots into the A-zone as fast as I can pull the trigger and track the sights. Nice, tight group in the center of the A-zone, didn’t even come close to the no-shoot. I’m moving out of position 1, doing my reload, I’ve got the new mag in the gun, I’m reacquiring my two-handed grip, I extend the gun

Shooting Tip: Practice!

while still moving into position, I'm at the second 55-gallon drum, I settle in, Bill Drill the second target. On one of my shots, I see the front sight is slightly misaligned left, but my read of the sights says to me, "That was still a good shot, it was to the left but it was right on the line, probably bisecting the line." I focus through the sights, check my group, I'm ready to take another shot if necessary, but then I say, "No, that was good," I let it go after six shots.

"If you are finished shooting, unload and show clear." So I'm not really thinking too much about it, I head back behind the line to reload magazines. Peripherally I'm aware of what's going on, I'm thinking, "Why did every single other person on the squad go downrange with the scorer, why are they all clustered around that second target?" It was because they wanted to see if I'd done it; they wanted to see if that one shot to the left was an A-hit. It was. And it wasn't just touching the line, it was bisecting the line, right where my read of the sights had said it would be.

My final score was 8.something seconds, down-0. Now, I'm not putting that forth as being great, awe-inspiring, jaw-dropping performance, because I'm well aware it wasn't. There are certainly people in the world who could do that far better than I. But it's not the shooting equivalent of being a 98-pound weakling, either.

As they all walked back uprange, one of them looked at me and said, "Wow, you actually did it.

I guess all that 'practice' stuff you do really pays off after all, huh?"

Then my new friend Justin Baker ran the same stage, a few shooters later. He did the exact same thing I had: draw, six shots into the A-zone, reload on the move, six shots into the second A-zone. Also down-zero, only a few tenths slower than me. I was like, "DUDE. Well-done." He said to me, "Well, I was doing to do head shots. But then I thought, 'Duane just made that look really easy. Maybe I should approach it myself like it's really easy.'"

SUMMARY

There's an idea floating around that competing in matches will make you a better shooter. Honestly, the more I've thought about it, the more I'm convinced that's not really true. There's nothing about being a match shooter, by itself, that's going to magically make your skillset improve. The match is how we check where we are. It's how we test our ability to perform on demand, under stress. Yes, shooting matches will get you used to performing under stress, on demand, with a gun in your hand. Yes, that stress level will do its bit to make those skills permanent much faster. But so much of the actual improvement occurs during practice sessions, before the match even starts. To paraphrase Grand Master Brian Enos, When you look at a stage, and you already know, before ever shooting it, there's nothing there you can't do really well, you've already won.

64 Dillon Ammunition Boxes[^]

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Extra Loading Data Labels, P09-10446, Package of 100, \$6.95

Dillon AkroBins[^]

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes[^]

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Swab-its – A Swab for Every Job! ⁶⁵

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	P09-15310	\$4.98

66 New Products from Slip 2000

725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks!

NOTE: To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P09-19237 \$19.95

Slip 2000 Carbon Killer provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

NOTE: Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P09-19234 \$19.95

Slip 2000's Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P09-11652 \$22.95

Slip 2000's AR Cleaning System contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P09-11676 \$18.95

Slip 2000 Extreme Weapons Lubricant (EWL)

was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P09-11644 \$16.95

Slip 2000 EWL30

has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P09-11645 \$19.95

Slip 2000 Copper Cutter

is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing!

NOTE: It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P09-11646 \$10.95

Each Slip 2000 Gun Wipe

packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube.

Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P09-11674 \$11.95

Lyman Pick & Brush Set

Lyman's Pick and Brush Set is an indispensable item for your cleaning supplies and range bag.

P09-40160 \$3.99

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe P09-15732 \$10.99
1.5 Ounces P09-15731 14.50

Revolver BLAST with TW25B is an all-synthetic lubricant/protectant specifically designed for revolvers.

4.2 Oz. Aerosol P09-66677 \$11.95

E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).
 Slide-Glide Standard **P09-15571 \$7.95**
 Slide-Glide Lite **P09-15572 7.95**

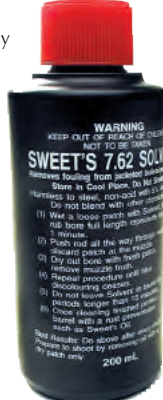

Microlon UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

P09-75125 \$9.95

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

P09-13128 \$12.95

70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

Elite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature

special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

Made in USA With a Lifetime Warranty!

74 "The Perfect Small Parts Cleaning Accessory"

P09-10209 \$15.95

The HYSKORE Degreezer consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. As anyone who has cleaned a gun is aware, cleaning small parts is a major challenge. Given the available technology and fixtures, the standard procedure is to use some kind of cup or similar vessel, pour in a quantity of cleaning solvent, and then pick up the parts one by one and brush them clean. The Degreezer changes all of that. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. As a bonus, the set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline. The Degreezer will quickly become an indispensable fixture on your workbench.

HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P09-10208 \$19.99

Pachmayr Pac-Mag Gun Storage Magnet

Holds handguns, rifles or shotguns!
Overmolded non-marring rubber protects your gun!

P09-10098 \$19.99

The Pachmayr Pac-Mag™ Holds up to 30 pounds and the three-magnet design gives the Pac-Mag more strength than any other gun magnet on the market. Secure almost any gun – pistol, rifle or shotgun – practically anywhere!

OPSol Mini-Clip™

Allows the use of 12 Ga. 1.75" Birdshot, Buckshot and Slug shells. Fits 12 Ga. Mossberg 500, 590, 590A1 and Maverick 88 models

The OPSol Mini-Clip™ was designed to give "well seasoned" and "recoil sensitive" shooters the capability of shooting the trusty Mossberg 12 Ga. platform without the usual recoil response. By using The OPSol Mini-Clip™ in conjunction with 1.75" shotgun shells, shooters stay in the game without all of the pain. The Mini-Clip enables owners of Mossberg 12 Ga. shotguns to use Aguila Minishells reliably for training, practice, recreational or home-defense applications.

JP ENTERPRISES

TACTICAL PERFORMANCE GEAR

**JP Enterprises .308
High Pressure Enhanced Bolt
P09-11301 \$199.95**

these rifles. Unfortunately, these issues will persist until the manufacturers of ammunition realize that an AR platform requires a unique pressure curve to allow for both accuracy and reliability.

Manufactured to the exacting standards of JP Enterprises' standard bolt offerings, the High Pressure Enhanced Bolt™ design represents a giant leap forward in alleviating the problems traceable to over-pressured loads – namely primer flow, ejector smear, extraction issues, and ignition reliability. In combating these problems, this new bolt design opens up a much broader range of ammunition compatibility and load density in the AR .308/7.62 and other variants such as 6.5mm or 6mm calibers in this platform.

Among its other enhancements, the .308HP bolt features an improved ejector pin hole and modified ejector to mitigate case head extrusion and frequent brass shavings. The JP Enhanced Extractor eliminates virtually all extractor-related failures while the JP Enhanced Gas Rings provide a more reliable, lower friction gas seal with longer lifespan.

While ultimately every end user needs to be aware of the ammunition limitations of their large-frame AR, the JP .308HP bolt offers multiple advancements to vastly increase the ammunition and operational abilities of the platform.

For anyone using .308/7.62 AR-type rifles, it's common knowledge that many factory rounds exhibit excessive primer flow and/or ejector smear. At its core, this is a result of ammo development being done by manufacturers only for manual platforms without testing in semiauto platforms. Some rifle manuals even record the maximum recommended load data beyond the functional range of

J. Dewey Mfg. Co. AR-Link Cleaning Pin^

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. **P09-18599 \$14.95**

Emergency AR(epar) Kit

Crucial Parts for Your AR-15

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring. **P09-19460 \$19.95**

Tac Latch

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/AR-10 charging handle. It works especially well for "flat-top" rifles equipped with low-mounted optics. **P09-10379 \$18.95**

Jerry Miculek AR-15 Compensator

Jerry Miculek's three-chamber AR-15 Compensator fits threaded-barrel rifles and may be "clocked" for left- or right-handed shooters. Used by many top three-gun competitors. **P09-11328 \$49.95**

Your basic, generic, strap-on-with-Velcro™ AR-15 brass catcher. **P09-15478 \$14.95**

Bushnell TRS-25[^]

Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 (Includes riser, not pictured.) **P09-31318 \$119.95**

Scout Scope Mounts for AK, SKS Rifles

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **P09-25374 \$79.99**
Scout Scope Mount for SKS Rifle **P09-25373 78.99**

Long Guns

By Oleg Volk

The United States of America has been the only large-scale user of .45 ACP since its introduction in 1905. While other users of .44/.45 caliber pistol cartridges largely phased them out following World War One, we doubled-up by chambering commercial and, later, military submachine guns for the .45 ACP. The 1918 Thompson, originally designed for hotter proprietary ammunition, went on the market in 1921 in .45 ACP. As the rest of the world adopted .35 and .30 caliber submachine guns and machine pistols, Thompson introduced a 1928 model adopted by USMC and FBI, along with many private users. Heavy and expensive, priced like a mainstream car, the classic Thompsons with superfluous Blish locks providing theoretical retardation of the bolt unlocking were not what the wartime army needed. M1 and M1A1 submachine guns of the 1940s were cruder and simpler, but still launched 230-grain projectiles. Given the short intended range and the saturation of the US Infantry with longer-range self-loading firearms, the steep trajectory of the relatively slow bullet was not viewed as a

problem. As the war progressed, M3 “grease gun,” a cheaper and more compact stamped supplement to the Thompson was made in large numbers. Made with non-adjustable sights and a wire stock, M3 was nonetheless controllable and effective to the same 50-yard range as most of the Thompson variants. The US Army’s love affair with .45 ACP lasted through the 1980s when general issue M1911 pistols and tank crew M3 were finally phased out to further 9mm standardization with NATO allies.

On the commercial side, the 1934 National Firearms Act took the wind out of submachine gun sales. By the 1960s, some small numbers of Ingram .45 ACP submachine guns became available, both in Thompson and Uzi-like form factor, along with a rare semiautomatic carbine. Several models of Fox carbines, externally resembling a crude Thompson, were made during the 1970s. Those open-bolt guns used a form of friction-retarded blowback with radial bolt movement, foreshadowing the later CMMG radial-delayed design. That permitted the weight to be brought under 8 pounds, but the carbines were not all

s in the Mighty .45 ACP

79

"Accurate, lightweight, and reliable with all ammunition, CMMG Guard is the clear winner in the category."

that popular. With numerous corporate changes, a variety of models were made up to the late 1970s and then discontinued. The same fate befell the .45-ACP Beretta variant of the Storm: while the gun itself was well designed, it was limited to 8-shot magazines. Belatedly, 16-shot extended magazines are now available, but the \$120 price limits sales. The briefly available HK USC variant of the UMP submachine gun also suffered from 10-round magazine capacity and high asking price.

In closed-bolt blowback carbines, .45 ACP generates noticeable recoil, while gaining little ballistic advantage over pistol-length barrels, especially with the most common 230-grain loads. In the 165- and 185-grain +P variants, the cartridge produces noticeably higher muzzle velocity, but it decays quickly, and the practical range remains limited to about 100 yards. Fortunately, the vast majority of non-military encounters happen well within that distance. Being a good threat-stopper for a pistol cartridge popular with many individual pistol users and some institutions, .45 ACP retains a modest but consis-

tent long-gun niche in the United States. That niche is filled with several options, from the luxurious semiauto Thompson variant to the purely utilitarian Hi-Point, with several original options in-between.

Kahr Arms produces semiauto Thompsons under the resurrected Auto-Ordnance (auto-ordnance.com) trademark. Shipped with a 16-inch barrel and closed-bolt semiautomatic mechanism to conform with NFA regulations, M1927 is necessarily even heavier than the original, outwardly resembling the 1918 light machine gun variant. Feeding from 20- and 30-round double-row stick magazines, most variants also accept the massive wind-up 50- and 100-round drums. The full-up weight of the M1927 loaded with 100 of the fat .45 ACP cartridges is around 21 pounds. Military surplus stick magazines require slight modification to lock in the 1927. The gun doesn't have much felt recoil, but holding it up to the shoulder for the mag dump can be taxing. As a fashion prop, the Thompson is superb, but it falls short of amazing in use. For one, the twin recoil springs necessary to return the massive breechblock and

Above: Handy and easy to shoot, BAZ45 was picky about ammo and not very accurate.
Right: Hi-Point 4595TS carbine proved reliable with a wide variety of ammunition. The least expensive of the available models, it represents an excellent value.

drive the striker add up to nearly 40 pounds, and the slotted charging handle is oriented to present all the sharp edges to the user's hand in the exact direction of the required effort. While the rear sight is graduated for drop all the way to 500 yards, there's absolutely no provision for any windage adjustment. The carbine cannot be zeroed by design. Mechanical accuracy of my 1927 was poor despite the long sight radius, landing somewhere in the 12-MOA range and several inches right of the point of aim even at 25 yards. Other people reported much better accuracy, up to 4 MOA and shooting to point of aim at 25 yards. Due to the requirement for the bolt to be locked back for the insertion of drum magazines, a removable, easily lost "third hand" device amounting to a non-integral bolt hold open is required. Reliability has been spotty with all examples I've tried, averaging a malfunction in 15-20 rounds. All in all, the carbine can be described as beautifully made but awkward and nearly unusable for any serious purpose.

Bazooka Brothers' BAZ45 carbine (bazookabrothers.com) is a radical departure from the Thompson, a direct impingement gas operated upper mated to an AR lower dedicated to "Grease Gun" magazines. Since a long barrel isn't necessary for .45 ACP, most uppers came with an 11-inch rifled portion and a long CAR-15 style flash hider for the balance of the mandated 16 inches. Light and handy, BAZ45 has almost no felt recoil and stays well on target during rapid fire. Full power or +P ammunition must be used for the gun to cycle reliably. Relatively light-weight bolt carrier group sometimes struggles to strip cartridges from the single-feed M3 magazines. Once available cheaply as surplus, M3 magazines are no longer common. Aftermarket magazines usually work if loaded right before firing but spread under pressure if stored long-term,

not even fitting in the magazine well. Besides the ammunition sensitivity, favoring loads with more and faster powders, BAZ45 is not particularly accurate despite the capacity to accept optics: 12 MOA has been typical with all loads. That's decent for a submachine gun, but not impressive for a closed-bolt carbine.

The Hi-Point 4595TS carbine (hi-point-firearms.com) is a distinctly odd-looking clamshell design that's surprisingly sophisticated on the inside. An Uzi-like enveloping bolt permits shorter length and neutral balance. Some models come with lasers or scopes pre-installed, and adding a red dot sight is pretty easy. The stock has a riser to accommodate different sights, which is helpful but also tends to catch on the facial hairs under recoil. The gun comes with very good iron sights, but also a fairly heavy and gritty trigger. The carbine uses the same single-stack 9-shot magazine as the Hi-Point .45 ACP pistol. Accuracy varies, but seems to be around 7-8 MOA with the default iron sights for most ammo brands. With match ammunition, such as SIG, Black Hills and HPR, and an optic, the Hi-Point turned in respectable 4 MOA. All samples I've seen had stellar reliability. Felt recoil is sharp but not painful, helped a bit by the thick buttpad and spring-loaded stock. Takedown is slow and awkward, requiring removal of the front sight. High Tower Armory makes a bullpup conversion stock that simplifies maintenance greatly, and makes the trigger feel lighter by widening it considerably. That and the further improved balance make accurate off-hand shooting very easy. Being relatively inexpensive and reliable, the Hi-Point is a pretty good deal if you can live with 9+1 capacity. [Editor's Note: Redball 20-round .45 ACP magazines (redballsports.net) for Hi-Point carbines, introduced at the 2018 SHOT Show, are reliable, inexpensive and approved by Hi-Point.]

While featuring minimal recoil and good ergonomics, Alpha PCC45 fell short in reliability.

Lone Wolf PCC45 (lonewolfdist.com) is an original gas-operated design using 13- and 25-round GLOCK magazines. With the long, extensively skeletonized forend and AR furniture, this gun has excellent ergonomics, especially once the basic ATI buttstock is swapped for something more durable. Left-side charging handle does reciprocate on firing. Felt recoil is negligible, and factory threaded barrel supports sound suppressors. Thanks to locked breech design, it has minimal ejection port pop, and racking the bolt takes minimal effort. Maintenance is also quite simple, though it requires regular piston ring replacement. Accuracy is in the 8-10 MOA range, depending on the ammunition brand. Sadly, two of the three samples I use were quite unreliable. They wouldn't feed wide hollow points, and further had issues with feeding, extraction and ejection even with ball ammunition. The longest shot string between malfunctions was 10 shots, and usually no more than four. The sample carbine went back to the factory for repairs, and returned working no better. Much as I like the concept of this handy, nearly recoilless gun, it's just not reliable enough in its present form.

CMMG Guard (cmmginc.com) developed the radially retarded blowback with an elegant variation on the AR-15 bolt: the backs of the bolt lugs are angled and slide out of the barrel extension once the chamber pressure drops. This design is simple and easy to maintain, permitting reliability with every type of ammunition thrown at it, from 150-grain zinc alloy high velocity to anemic 200-grain match to 230-grain +P hollowpoints. Feeding from GLOCK magazines as well, Guard proved unfailingly reliable and easy to shoot well. Having

no gas system, it gets away with a thinner handguard than its gas-operated competitor. A standout for accuracy thanks to a good trigger and quality barrel, it delivered consistent 2-3 MOA results. The muzzle brake, at first glance superfluous on a pistol-caliber long gun, proved effective as a compensator. With a 1-6x Trijicon VCOG, Guard allowed reliable 100-yard headshots, which is an outstanding achievement for this caliber. For suppressed use, the bolt carrier may be fitted with additional weights to delay the bolt opening while the pressure dissipates. By contrast with extra-short gas system necessarily robbing the projectile of some of the available gas, this retarded-blowback method retains closer to full power, meaning a 20-25 percent velocity increase over pistol-length barrels. The improvement is usually greatest with lighter weight bullets, giving a relatively flat trajectory out to 150 yards or so but greater wind drift further out. In terms of handling, this fairly light – under six pounds – carbine proved the favorite of all testers, delivering precision fire with minimal kick to the shoulder.

.45 ACP might not be the ideal long-gun cartridge, being pretty well optimized for pistol barrels, but it does gain some energy and a great deal more accuracy when shot from the shoulder. With very low muzzle pressure, it also gives a mild report and dim flash, all useful in case of use for home defense. For people who already carry .45 ACP GLOCK or Hi-Point pistols, these companion carbines permit an extra efficiency of magazine and ammo procurement. And it's just plain fun to shoot against steel, moving the targets much more visibly than a smaller caliber would.

84 Wise Company's "Grab & Go" Emergency Food Kits

Wise Company's **18 Wise Favorites 72-Hour Kit** includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.

Wise Company's **60 Serving Gourmet Entrée Only "Grab and Go" Food Kit** includes two servings per day (entrées only) for one adult for one month or four adults for one week. **Product within this Bucket is:** Savory Stroganoff (8 servings), Chili Macaroni (8 servings), Pasta Alfredo (8 servings), Creamy Pasta and Vegetable Rotini (8 servings), Cheesy Lasagna (4 servings), Teriyaki and Rice (8 servings), Creamy Ala King and Rice (8 servings), and Creamy Tomato Basil Soup (8 servings).

Wise Company's **60 Serving Gourmet Freeze Dried Meat "Grab & Go" Food Kit** includes 60 servings of assorted gourmet-seasoned freeze dried meat and a 20-serving bonus of long-term emergency rice, for a total of 80 servings. **Product within this Bucket is:** Roasted Chicken (12 servings), Teriyaki Style Chicken (8 servings), Cheesy Beef (8 servings), Southwest Style Chicken (12 servings), Savory Roasted Ground Beef (12 servings), Stroganoff Style Beef (8 servings), and Long-Term Instant Rice (20 servings).

Wise Company's **120 Serving Breakfast Only "Grab & Go" Food Kit** includes 120 servings of breakfast assortment (no entrées). **Product within this Bucket is:** Apple Cinnamon Cereal (40 Servings), Crunchy Granola (40 Servings), and Brown Sugar and Maple Multi-Grain (40 Servings).

Wise Company's **120 Serving Freeze Dried Vegetable and Sauce "Grab & Go" Food Kit** includes 120 servings of vegetable and sauce assortment. **Product within this Bucket is:** Corn (24 servings), Peas (16 servings), Broccoli (24 servings), Green Beans (24 servings), Butter Sauce (8 servings), Cream Sauce (8 servings), Cheese Sauce (8 servings), and Mushroom Sauce (8 Servings).

Wise Company's **120 Serving Freeze Dried Fruit and Snack "Grab & Go" Food Kit** includes 120 servings of fruit and snack assortment. **Product within this Bucket is:** Bananas (16 servings), Strawberries (16 servings), Peaches (16 servings), Apples (16 servings), Caramel Sauce (16 servings), Yogurt (16 servings), and Pudding (16 Servings).

Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

Tripod	P09-18126	42.95
2-Ft. Skyscreen Mounting Bracket	P09-18120	14.95
Replacement Skyscreens	P09-18124	21.95
Replacement M2 Sensor	P09-18877	36.95

The **M2 Chronograph** comes with sensors, screens and one two-foot mounting bracket. A nylon carrying case and tripod are available options. The **CED7000 Shot Timer** is a breakthrough in technology. No other timer to date offers this combination of advanced features, compact size and light weight. This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

Adjustable Target Pistol Sight

This **Adjustable Target Pistol Sight** is precision machined and fits in a standard 1911 "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your pistol already has a Bomar cut) but the results are worth it.
