ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

We READ Our Mail!

I just got the new catalog for June and as always scan quickly, look for new products and read the articles. The article on the RL 550C caught my eye and after looking at the author...Anyone who is involved in sport shooting knows the name Julie Golob. I was fortunate enough to meet and chat with her at the SHOT Show in Las Vegas. Particularly admiring the introduction video with the S&W Shield where she successfully hit a steel plate at 100 yds. Very Impressive. I have had my RL 550 for 25 years and it hasn't failed me. I reload two rifle and five pistol cartridges. When I did have a problem, I called customer service, parts are in the mail NO CHARGE. Also VERY IMPRESSIVE. Keep up the good work and the great articles. A Dillon fan for life,

Leonard from Las Vegas, NV

I wanted to complement you on my recent purchase of your Super Swage 600. I had a pile of recently fired 5.56 ammo with crimped primers. I ran them through your swage and the reloading went smooth as glass. This was a vast improvement over grinding the primer pocket with traditional tools. I have also been very fond of your model RL 550 that I purchased several years ago. Works good.

David A. Boone - dboone01@yahoo.com

Please inform Connie Bowlby that she can legally take her handguns to California as long as they are unloaded and locked in a box of some sort - attendance at a shooting match isn't a requirement. The CA "Roster of Handguns Certified for Sale" only applies to handguns one intends to leave in the state. These two CA government websites explain it succinctly:

<https://oag.ca.gov/firearms/travel>, and

<https://www.oag.ca.gov/firearms/certguns>.

Her handgun can be loaded in her hotel room, friend's home, etc. This is far from ideal for self-defense, but her article gave the impression that one cannot legally enter CA with a handgun that's not on the state's roster, and that's not true.

Keith Collins - sunsetrim@hotmail.com

Just finished up the week in Indy at the NRA convention. My children were the first and second ones at your booth during family day and they were both excited about making their first bullet. I just wanted to say thank you for being a supporter of the event.

REPUBLIC FORGE

RECON LONG SLIDE 1911

THE EPITOME OF BARBEQUE GUNS?

By Doug Larson

Readers of *The Blue Press* are probably some of the most tuned-in people in the modern gun culture, but not all – especially those who have not been involved long – know what a barbecue gun is. Stories about the origins vary, but in general, a barbecue gun is a handgun that is usually not carried everyday and is something out of the ordinary. Most often, a barbecue gun is especially good looking and sports characteristics that make it stand out as a special gun.

Most in the gun culture agree that the tradition started many years ago down on the US-Mexico border, probably in Texas, which has a long tradition of social occasions built around a barbecue. Ranch owners or hands, law-enforcement officers and others would come to those barbecues wearing their best clothes and carrying a barbecue gun. It was a special occasion, so people wanted to look their best, and wearing a special gun, usually carried in a holster reserved for dressy occasions, was just part of the fun.

Today, the tradition lives on, but sadly, the social events where one can carry a gun openly

are not as common as they used to be. But why wait for a special occasion? Some people just like the idea of owning a functional work of art, and a well-made barbecue gun is truly a work of art. While not every gunsmith can make one, Republic Forge can, and these guns truly stand apart from the crowd.

So just what makes Republic Forge 1911s special? To find out, we will look at the model RO431 Recon Long Slide. This one happens to be chambered in 9mm, but other chamberings are available. The sample gun has a retail price of \$5,620, but a customer can spend more or less depending on his or her desires and pocketbook weight.

Republic Forge (republicforge.com) makes custom guns with features selected by the customer. Options are listed on the website where the gun can be “built.” But if a feature is not listed, Republic Forge will work with the customer to build the gun to the buyer’s specifications. Before work is started on any custom gun, someone from Republic Forge has a conversation with the customer so that there is no mistake about what the customer wants. Only after that conversation is work begun.

All Republic Forge guns are hand-fitted 1911s with parts made to Republic Forge standards. No metal injection molded or cast parts are used and everything is machined from tough tool steel. For example, Republic Forge sights are made of S7 tool steel, which is shock resistant and wears well. Slides and frames are manufactured from 4140 steel, which contains chromium, molybdenum and manganese, making it tough and resistant to fatigue, abrasion and impact.

And these guns are tightly fitted, perhaps so tight that they may not be the best choice for a serious fighting gun. Many will tell you that if a gun is fitted too tightly, dirt and debris can more easily stop the gun from functioning, something that is not acceptable in a gunfight. But Bob Maw, President of Republic Forge, disagrees with that view and says that a properly fit gun with small tolerances does not allow debris and dirt to get into the working parts in the first place. He has a point, so it's up to the customer to make a decision. However, after discussing a number of things with Maw, it appears that his number one concern is customer satisfaction. So I'll bet if the customer asked for slightly more tolerances in key areas, Republic Forge would honor the customer's request.

To get acquainted with Republic Forge 1911s, at a recent writer's event held at Gunsite (gunsite.com), I shot a Republic Forge 1911 extensively. That gun had checkering on the front and back straps that was so fine and sharp, it left little puncture marks on my hand. While fine checkering shows the skill of the gunsmith and is very slip resistant, if it is too sharp, it abrades skin and can actually draw blood after the many draws a student makes in a five-day Gunsite class. But in keeping with Maw's commitment to customer satisfaction, Republic Forge offers other grip treatments that are less abrasive.

Bobby Tyler of Tyler Gun Works (tylergun-works.com) located in Texas does the metal finishing for Republic Forge. And Tyler is a genius with metal finishes, something that is difficult and has a steep learning curve. Tyler specializes in color case hardening, although he offers a number of other finishes as well. The test gun's frame was beautifully color case hardened by Tyler and it blended well with the highly polished blued slide. Again, the customer specifies the finish wanted and a number of options, as well as engraving, are available.

One of the stand out features of the test gun is the stocks or grips which are made of petrified mammoth ivory. The material is about 8,000 to 10,000 years old and is extremely rare, which adds to the cost of the gun. Although other stocks are offered, it would be hard to pass up the beautiful natural blue colors sported by these particular mammoth stocks.

Another feature of the test gun is the long slide, which is one inch longer than the standard Government 1911 slide. That makes for a 6 inch instead of 5 inch long barrel. Why a longer barrel? If you have never fired one, you owe it to yourself to try it. Not only does the longer slide provide a longer sight radius making it easier to aim, but the added mass at the front really helps reduce felt recoil and muzzle flip. It is very noticeable. The 9mm chambering and the long slide make recoil extremely light and pleasant.

This is an accurate gun, capable of better accuracy than I could wring out of it. The best groups off a bench rest at 25 yards were about 1.5 inches, but a younger shooter with better eyes could undoubtedly get better results. And during testing there were no malfunctions of any kind.

If you want a barbeque gun that will turn heads and function, check out Republic Forge.

Not many can afford a finely crafted 1911 that catches the eye like this Republic Forge Recon Long Slide in 9mm, but for those who can – or are willing to save until they can – there is a certain satisfaction in ownership. The rare mammoth stocks are very appealing, and the long slide combined with the 9mm chambering dramatically reduces felt recoil making the gun not only attractive, but also easy to shoot.

Doug Larson photo.

Dillon
Precision
Products, Inc.

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.95 each, or \$24.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

One-Inch Bench Wrench	P36-10842	8.95
Square-Deal-Only Wrench	P36-19970	9.95

Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	P36-22051	\$52.45
XL 650-only	P36-22052	49.45
"SDB"	P36-22223	68.45

Dillon's "Belted Magnum" Powder System[▲]

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	P36-97126	\$158.95
----------------------	------------------	-----------------

Dillon's Roller Handle[▲]

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	P36-17950	\$48.95
------------------------	------------------	----------------

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	P36-22214	\$45.95
1050 Tray Kit	P36-22215	45.95

Dillon's Low Powder Sensor[▲]

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	P36-16306	\$43.95

Dillon's Case Preparation Equipment

CV-2001[^] P36-20493 \$191.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

CV-750[^] P36-19455 \$146.95

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

CM-2000 Case/Media Separator[^] P36-20675 \$78.95

CM-500 Case/Media Separator[^] P36-21045 \$47.95

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers: Case Cleaners are available in 220 volt!

Euro CV-2001 P36-22047 \$216.95

Euro CV-750 P36-19473 \$171.95

Rapid Polish[^]

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **P36-13804** **\$8.95**
Case (20 pc.) **P36-20255** **135.95**

Case Lube[^]

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **P36-13733** **\$11.95**
Case (20 pc.) **P36-20256** **168.00**

Half and Half 10 bottles of polish /10 of lube[^]
Case (20 pc.) **P36-21375** **\$152.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **P36-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **P36-13496** **\$15.95**

This month's cover model is Rachel. The rifle, appropriately named "America," was built by Shane Player for 3Gun competition. It features a 2A Armament receiver set and handguard, JP trigger and bolt carrier group, Vltor A5 buffer system, SJC titanium comp, special tuned White Oak Armament 170 barrel, and a custom Cerakote paint job. Our thanks to Shane for loaning us his rifle for this photo shoot! To see more photos of Rachel and other **Blue Press** cover models, you can "follow" us on **Instagram@bluepress** on your smartphone, or go to **www.instagram.com/bluepress** and click "follow."

22 Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!
Fills the primer tube while you reload!
Clear polycarbonate shield and protective housing

Dillon's RF 100 Automatic Primer Filler[^] eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$52.95 each.

Super 1050/RL 1050 Short Trim Die Toolhead[^]

P36-62219
\$230.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. **(NOTE: the Blue 1050 toolhead stand – Part Number P36-62200, \$49.95 – is not included.)**

Rapid Trim 1500 Case Trimmer[^] 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P36-62164** is **\$337.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P36-13141**, are **\$20.95** each. Upper lock rings, **P36-13559**, are **\$5.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600[^]

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed for the Single Action Shooting Society's "Wild Bunch" category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

"Plan B"[^]

Very-Bad-Day Planner Holster

Dillon's "Plan B" Very-Bad-Day Planner Holster[^] holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels. "Plan B" Holster **P36-10252 \$24.95**

5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

Mr. Bulletfeeder[®]

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

Mr. Bulletfeeder[®] Replacement Parts & Spares

Having separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

The Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collator to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

Lose a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

Dillon's Pistol Die Sets

Size Die

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)[^]

.223 Remington	P36-10839	\$80.95
.308 Winchester	P36-15574	80.95
.30-06 Springfield	P36-10840	80.95

Dillon Carbide Rifle Dies (Three-Die Sets)[^]

.223 Remington	P36-10096	\$176.95

Happy (belated) Anniversary!

Ruger 10th Anniversary Limited Edition LCP

Reviewed by Peter Caroline

On the first day of the 2008 SHOT Show in Las Vegas, I stopped by the Ruger booth. It was crowded, as usual. Most of the crowd was packed around one new handgun on display. I got in line, and finally was able to check out the miniscule .380 ACP pocket pistol that was drawing all the attention. Ruger's LCP (Lightweight Compact Pistol) was the hit of the Show, and the folks at Ruger informed me that their planned first year's production was sold out on the first day! Now, it's not like this was a revolutionary new caliber or concept. The .380 ACP cartridge had been around for nearly a century, and there were numerous easily concealable pistols...Kel-Tec, North American Arms and Seecamp, *et al.*...in that caliber. It may well be that the entry of Ruger into that category gave the whole genre a new validity. Shortly afterward, Kahr, Taurus and SIG followed with their own mini-.380 iterations. There was even a short-lived Micro Desert Eagle in that caliber. The LCP received some notable press in 2010 when Texas's then-Governor, Rick Perry, shot a coyote with his laser-equipped LCP.

Moving forward 10 years, in September of 2018, Ruger announced the introduction of a 10th Anniversary Limited Edition LCP. I visited the Ruger booth at the 2019 SHOT Show, but they didn't have one on display. They suggested that I check at several of their distributors' booths. No luck there, either. When I got home from the show, I ordered one from Lipsey's, a Ruger distributor and always a great source for interesting Ruger variations.

The 10th Anniversary LCP is easily distinguishable from the original. It features a stainless steel

slide with both forward and rear cocking serrations in a chevron pattern, an aluminum skeletonized trigger and special "Tenth Anniversary" laser engraving. One very welcome improvement is a set of fixed sights that are actually usable; the original LCP sights were very subtle, to put it mildly. In all other respects, the 10th Anniversary version is identical to the original: 6+1 capacity, 2.75" barrel, black high-performance glass-filled nylon grip frame, 5.16 length, 3.6" height, 0.8" width, 9.6 oz. weight. I'm delighted to say, it does not have a magazine disconnect safety. The pistol comes with both a finger grip extension floorplate for the magazine, in addition to the standard floorplate, a cable lock and an ambidextrous pocket holster. The manual (always read the manual!) is quite clear and well detailed.

I took the new LCP out to a makeshift shooting area in the desert and set up an adhesive-backed 5" target at 10 yards. Shooting offhand with a mixed bag of loads, both FMJ and JHP, I could reliably stay on the target with every shot. This duplicated the results I had obtained nearly 11 years earlier. As might be expected from a gun with that combination of caliber, size and weight, it is not a fun little plinker. It is, however, eminently suited to situations where recoil is the least of your worries.

Back in 2008, the original LCP had an MSRP of \$330. The MSRP of today's 10th Anniversary Model is \$299, with real world prices \$70-90 less. Who says there are no more real bargains?!

40 The Left Can Be Turned (B

By Alan Korwin

After a long exhausting joust with one of those “I support the Second Amendment but...” guys, I discovered a way to turn them, with ease. Agree with them instead of arguing against them.

No, you don’t have to sell out, compromise on principle or even give an inch. Yes, it surprised me too. Watch. “We should ban/modify/restrict/limit/control/confiscate the really bad guns (or all the guns) by taking these limited common-sense rational simple measures; why wouldn’t that work?” he says. We had started by trying to figure out how to save schoolkids from being slaughtered by their sociopathic classmates, a discussion motivated by the murderer at Parkland high school.

He couldn’t see it, and no amount of reasoning or cajoling on my part moved him an inch past any specific idea he had, all of which were aimed at guns. Several external anecdotes seemed to have impact: 6,000 inner-city murders for the past few years but virtually no murder trials – “Well that ain’t right,” he admits, and it’s not exactly a gun thing. We endure two-thirds of all gun-related deaths as suicides, a medical issue getting inadequate medical attention (and he’s a doctor, OK, this raises his eyebrows). But he remains clinging to a hope that mandatory gizmos to stop guns from firing will be a solution. Later it occurs to me, he has classic “Ungun Disease” – guns are OK as long as they don’t work.

I reach a breaking point, ready to give up, so I do. OK, Doc, let’s say you get all your wishes, every “bad” gun is removed, Americans are only left with, well, what exactly? Aha! He doesn’t know. We’re both surprised. It’s a turning point.

We fill in the blanks together. First though, we take this side trip down the “who takes the guns” road. “They should take all the guns away,” becomes uncomfortably clear. It is paralyzing. Government takes them. Now, the current administration is compared by the gun-grabbing opposition party to Nazis. That irony stops even hard-core leftists in their tracks when it strikes home: They want to take the dangerous guns from citizens and give them to...Nazis?

By agreeing on their adamantly held positions, their positions collapse of their own weight. Who’d a thunk it? We went through it step by step. It was a piece of cake not a tiresome no-winner debate. Check it out – his proposals, one by one, when accepted and explained back to him, fell apart.

Somehow removing all the no-good guns left 100 million Americans armed in their homes with only maybe revolvers, or hunting rifles, maybe shot-guns. This will stop children (or jihadis) from committing mass murder, how, exactly? It doesn’t even address the problem. It just flatly violates the Fourth Amendment. And the Ninth. And the Tenth. Why even mention the Second? Or the fact that attempting such

monstrous acts exceeds the bounds of anything politically possible (a point he’s not willing to concede). We agree it’s a boiling point for revolution. Like last time more than two centuries ago. That won’t do. This is almost too easy.

So let’s concede that point too. As a fan of “democracy,” something our Founders recognized as an aberrant precursor to mob violence and end to freedom, we face the fact that we the people could vote ourselves into slavery. If the culture, the electorate and mass media (well, the media is

“I’m technically a utopian pacifist, in favor of no weapons of any kind on the entire face of the Earth, in an era of enduring peace, prosperity, abundance and harmony. Until then, disarm everyone, CRIMINALS FIRST. Then maybe I’ll talk to you about MY guns — while I’m fully armed.”

But You Should Stay Armed) ⁴¹

already there), get to the point where they ban guns period, how does that disarm the inner-city gangs that are committing all those murders? Once again it doesn't even address that problem. EVERY gun criminals hold is ALREADY banned. And the rational approach – start with the gangs and the illegal guns first – oh, that's never part of any of the rationing, locking, paperwork-enhancement schemes, as good as they are (or aren't).

This is now hanging by its own petard, in its own special light. I raise the strictly rhetorical point that I'm technically a utopian pacifist, in favor of no weapons of any kind on the entire face of the Earth, in an era of enduring peace, prosperity, abundance and harmony. Until then, disarm everyone, CRIMINALS FIRST. Then maybe I'll talk to you about MY guns – while I'm fully armed. I did say it's utopian (loosely translated, "utopian" means nowhere).

And that can't happen until we somehow manage to eliminate what I call The Four Horsemen of Human Havoc: Angry, Hungry, Stupid and Wicked. No one has ever proposed a way to do that. Hungry can theoretically be eliminated but so far little progress has been made, so neighbors are at neighbors' throats. Stupid is genetic, deeply imbedded in much of humanity, not much hope there. Angry is deep inside almost everyone, with a few "Mother Teresa" types and the rest acting out as they see fit. And Wicked – deny it if you must – but evil exists in the world my friends, so to paraphrase our former president, cling tightly to your guns and your religion.

Award-winning author Alan Korwin has written 14 books, 10 of them on gun law, and has advocated for gun rights for nearly three decades. See his work or reach him at GunLaws.com.

The Original M1 Buddy®

The Original M1 Buddy Service Rifle Cleaning Port fits all models of M1 Garand and M1A rifles. Unlike other service rifle cleaning ports on the market today, the M1 Buddy allows you to use either the ratcheting GI Chamber Brush or GI Combo Tool while the cleaning port is in place! No need to worry about those fingers anymore! The Original M1 Buddy is covered by a lifetime warranty and will be replaced free of charge if it fails under normal use.

The Original M1 Buddy

P36-13447 \$12.95

The Original Carbine Buddy Cleaning Port

enables you to clean your M1 Carbine chamber without worrying about pinching your fingers. The Original Carbine Buddy is covered by a lifetime warranty and will be replaced free of charge if it fails under normal use.

The Original Carbine Buddy

P36-13452 \$9.99

The Lever Loader

The Speed Beez Lever Loader

gives you the mechanical advantage you're looking for! Works with double-stack Glock 9mm mags with or without magazine extensions. A must have for Pistol Caliber Carbines using Glock mags.

CLASSIC FIREARMS: The C-93 Bo

By John Marshall

It's a very large and ungainly-looking pistol. Almost all who view it for the first time remark that it looks a lot like a Luger. They would be right, as the Borchardt pistol was actually the direct predecessor of the Luger. Many of the Luger's design principles, particularly the toggle (or knee) action, were in fact first utilized successfully in a pistol with the C-93 Borchardt. The story of how the famous Luger pistol itself came about is inextricably intertwined with this invention of Hugo Borchardt.

Even the name of the 1893 pistol's originator is often misunderstood. While most folks would pronounce his Teutonic last name "Bor-SHART," the actual pronunciation was "Bor-KART." In the German language, the combined written letters "ch" sound like a "k" when articulated.

Hugo Borchardt was an interesting guy with a very active and inventive mind. Although he was born in Magdeburg, Germany on June 6, 1844, he immigrated to the United States in 1860 and became a naturalized citizen. In 1872, he became Superintendent of Works for the Pioneer Breech-loading Arms Company in Trenton, Massachusetts. After that, he might be regarded today as a "job hopper." He quickly became a foreman for the Singer Sewing Machine Company. He then took a job with Colt's Patent Firearms Manufacturing Company. Next, he went on to be employed with Winchester Repeating Arms Company, and then, on June 1, 1876, he became Superintendent and Treasurer for the Sharps Rifle Company.

While at Sharps, Borchardt filed some U.S. patents. He designed the Sharps-Borchardt Model 1878, a single-shot hammerless falling-block rifle. It was somewhat like the earlier hammer-equipped Sharps rifles, but used a coil spring-powered striker rather than a hammer-struck firing pin. In spite of relatively poor sales, this rifle was lauded for its strength and accuracy, and it is ardently sought after by today's collectors. The Sharps Company folded in 1881, and Borchardt went looking for yet another job. He returned to Europe, and took a position with Fegyver es Gepgyar Reszvenytársaság (FeG) in Budapest, Hungary. He gained the title of works director there in 1890, but then from 1890 to 1892 he had a short return to the U.S. when he served as a consultant to Remington Arms to help develop the magazine on the Lee rifle for U.S. Army trials. During this time, he is

believed to have first met Georg Luger, who was then submitting a rotating-bolt magazine rifle for those trials.

It's probable that Borchardt conceived the design of the C-93 semiauto pistol while in America, and it appears that at least one early prototype of the C-93 was crafted at FeG in Budapest. An example exists with a chamber inscription of Waf-fenfabrik Budapest. By 1893, Borchardt had secured an association with Ludwig Loewe & Company in Berlin, Germany. That firm was at the time mainly a manufacturer of machine tools, and had a link with FeG, having helped them set up operations. He then convinced Lowe to manufacture his new pistol. Borchardt had adapted the Maxim toggle-lock principle to work in this radically new firearm. In the process he also developed the bottlenecked 7.63x25mm Borchardt cartridge that was used in his pistol, spawning the later nearly identical 7.63x25mm Mauser, 7.65x21mm Parabellum (.30 Luger), and 7.62x25mm Tokarev cartridges. Although Borchardt spent most of the rest of his life in Germany, he maintained his U.S. citizenship.

Ludwig Lowe enthusiastically began production of the new pistol and put it on the market in 1893. The designation "C-93" was German shorthand for "Konstruktion 1893." The gun is credited with being the first commercially successful semiautomatic pistol in the world. It was noted for its excellent workmanship and finish. In the fall of 1894, Georg Luger, who was then employed by Lowe as a consultant designer, demonstrated the Borchardt pistol to the U.S. Naval Ordnance Board, and had become intimately familiar with how it worked. In 1896, Ludwig Lowe merged with the German ammunition firm of Deutsch Metallpatronenfabrik in Karlsruhe (DMK), and formed Deutsch Waffen und Munitionsfabriken (DWM). Although his pistol had notable handling deficiencies, Borchardt was reluctant to come up with more than cursory improvements to his original design. DWM therefore turned to Georg Luger to completely re-design the pistol to make it more compact, ergonomic and manageable. He filed patents for what became the Model 1900 Parabellum pistol in 1898.

As a side note, it was well known that Herr Borchardt and Herr Luger (then chief engineer at DWM) did not get along very well professionally

Borchardt Semiautomatic Pistol

Above, the Borchardt pistol fitted with a detachable shoulder stock, making it “a carbine for the cavalry.”

for whatever reason. Perhaps it was because in spite of the obvious similarity of the Borchardt design to the workings of the Luger pistol, Borchardt's name appeared nowhere on the 1898 Luger patents. This was certainly a slap in the face to Borchardt. By the same token, Borchardt and Luger's dwellings in Berlin-Charlottenburg were in close proximity, and they seemed to get along reasonably well socially. In spite of the patent controversy, the cover of the first English-language manual for the Model 1900 Parabellum pistol referred to that arm as the “Parabellum/Automatic Pistol/Borchardt-Luger's System.” Ludwig Lowe and DWM made a grand total of approximately 3,000 C-93 pistols.

The toggle-joint action worked well. The positioning of the magazine within the grip was arguably a first for a semiautomatic pistol. A magazine release button was located just behind the trigger on the left side of the piece. As the cartridge fired, the barrel, upper frame and bolt/toggle combination moved to the rear together. Unlike the Luger, which used ramps on the frame to break the knee joint, the Borchardt used two roller wheels on an extension of the rear toggle link. These rollers worked against a camming surface inside the oval recoil spring housing at the rear of the pistol to break the knee joint. This allowed the bolt/toggle assembly to flex and continue to the rear, while the barrel/upper frame stopped in its rearward move-

ment. A fixed ejector beneath the bolt knocked the expended case off the bolt vertically at the end of the bolt's rearward movement. A curved leaf spring in the recoil spring housing then returned the toggle/bolt assembly forward to strip another round from the magazine into the chamber. A disconnecter mechanism required the release of the trigger before another round could be fired. A sliding safety on the left of the pistol blocked the sear when pushed upward so the pistol could not then be fired. The action does not remain open following the last shot from the 8-round magazine. In order to hold the action open, a dummy wooden magazine about an inch longer than the working magazine was provided with each pistol. It also housed an oil container and a three-section cleaning rod. When this wooden piece was inserted into the grip with the action open, it protruded in front of the bolt to keep it in the retracted position. This was a bit awkward, and a feature often criticized. Other awkward features were the nearly vertical orientation of the grip, the size and weight of the gun, and its balance. The pistol was heavy, weighing 2 pounds 12-1/2 ounces, and it measured a lengthy 11 inches. The barrel length was 6.5 inches.

The Borchardt pistol could be fitted with a provided 14-inch detachable shoulder stock, making “a carbine for the cavalry” as illustrated here. It weighed 14.5 ounces, making the overall weight of the combination about 3.5 pounds with an overall length of nearly 2-1/2 feet. The stock incorporated a long tightening thumbscrew, making the whole assembly very tight and solid.

Lyman Precision Funnel Set

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. No more powder clinging to surfaces, which can happen with lightweight plastic funnels. The solid construction and quality of Lyman's Precision Funnel Set will be apparent in its first use. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

P36-11389 \$39.95

Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The Lyman X-Block is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

P36-11390 \$15.95

The size of the 7" 5.56 NATO Reformation is surprising. It's easy to transport, house and store with only a little space.

By Jonathan Kilburn

Franklin Armory is manufacturing all sorts of cool, unique firearms in an effort to defend our Second Amendment rights. With the recent surge of popularity in "other" classified firearms, Franklin Armory has also jumped on the bandwagon. While they are known to push the limits of the legal "gray" area, the Reformation offers a unique spin – or lack thereof – on the abilities of an "other" firearm.

What is the Reformation?

The Reformation, at first glance, is an SBR. Looking closer, it's an SBR. Taking a deep, thorough look into the form and function, you'll find it's a unique beast that is perfect for restrictive states. Essentially, the Reformation is a straight-rifled firearm. Here's how:

A firearm is considered a rifle if it has standard, traditional rifling which spins the bullet as it passes through the barrel.

A firearm is considered a shotgun if it has a smoothbore barrel under 1 inch. It can consist of a rifled barrel as well.

The Reformation has straight rifling, which does not allow the bullet to rotate and stabilize over long distances. Therefore, it is not a rifle. It does have grooves inside the barrel and therefore is not a shotgun. Consequently, the Reformation is considered an "other" category firearm, as it doesn't satisfy the conventional definition found in laws surrounding the explanation of a rifle or a shotgun.

In addition to this unique barrel, the Reformation comes with an option for the Binary Trigger System, which fires a bullet when the trigger is pulled and released. The system has been proven and is effective – even if not foolproof.

Why the Reformation is Important:

The Reformation serves two purposes. The first is like a tool. It's meant to be used as an excellent "home-defense" firearm. Its compact size, adjustable stock, and hefty muzzle velocity would

prove that to be true. The second purpose is like a statement piece. The Reformation's "statement" is in response to lawmakers who establish laws grossly infringing upon our Second Amendment rights. While it still isn't 50-state legal, it's pretty darn close.

Those individuals living in restrictive states will be able to choose between two variations of the firearm – 7" 5.56 NATO and 11.5" .300 BLK. [Editor's Note: I'd be VERY interested in seeing performance results of the .300 BLK variant.] While states that have bans on any firearm based on the AR15 may be out of luck, the majority of citizens will have the ability to purchase the Reformation, and without the need of a tax stamp.

Performance:

There were three tests performed. The first for general accuracy and performance, the second for speed and reliability, and the third for muzzle velocity.

Accuracy and Performance:

This is where the Reformation starts to take a hard-left turn from acceptable firearms. While a straight-rifled barrel possesses some advantages legally and politically, it suffers considerably with effective range. From our tests, Winchester white box 55-grain .223 performed well, but only out to 50 yards before we saw significant keyholing.

We used several magazines in the test. Amend2, Hexmag and KCI 100-round drum. Though all magazine types accuracy was the same. It would strike a target within 2 MOA at 50 yards with 55 grain. About 30 percent of all shots displayed signs of keyholing. Moving out to 75 yards we moved to a 4 MOA with nearly 90 percent of all shots showed signs of keyholing.

Speed and Reliability:

The Binary Trigger is a common option with the Reformation. Franklin Armory offers vanilla lowers and charging handles on the Reformation, but the bolt carrier itself is lightened. With rapid firing the

The BSFIII Binary Trigger system from Franklin Armory is an addition to the Reformation. It's not 50-state legal but makes an excellent addition to the overall function of the Reformation. Inset: At only 50 yards, the Winchester 55-grain .223 started tumbling when shot out of the reformation. Even in a tumble it may still have a devastating amount of force behind it.

Reformation performed well in smaller test firing groups. When we attached the KCI drum mag it would function well for the first 50 rounds or so, then it would begin to jam up and fail to feed. With some oil on the BCG, the issue was resolved, but only for a short time. However, speed is insane. With the lightened BCG the rate of fire was extraordinary.

Muzzle Velocity:

On a 7" barrel firing 55-grain Winchester white box .223 no one was expecting great results. We did a 10-round test with four failures to capture velocity. We are speculating that is may have something to do with bullet stability, but cannot guarantee.

Our six velocities were read as: 1) 2045, 2) 2045, 3) 1983, 4) 1996, 5) 1984, 6) 2039, with an average of 2015. This isn't exceptional but it's not "that bad" either. At 50 yards the bullet would still have a velocity around 1854. Even if it's keyholing, it's going to pack a punch.

For comparison: a 9mm 16" carbine firing Federal 115-grain JHP would have a muzzle velocity around 1295. At 7" that muzzle velocity is 1223. At 50 yards the 16" carbine will have a velocity of 1120. At 50 yards the 7" will have a muzzle velocity of 1073.

A 357 Magnum 16" carbine firing Federal 125 JHP would have a muzzle velocity around 2051. At 7" the muzzle velocity is 1784. At 50 yards the 16" carbine will have a velocity of 1771. At 50 yards the 7" will have a muzzle velocity of 1532.

Potential Applications and Price:

Franklin Armory hasn't done a lot of marketing on this rifle. It is possible they're hoping to keep its existence under the radar for as long as possible. But with a 50-yard keyhole I think it'll stay under the radar for quite some time. Regardless, it would make for an exceptional short-range defensive tool, home-defense weapon, hall gun or even private-security rifle. The small size and concealability are surpassed only by AR pistols and true Short Barreled Rifles (SBR). Adding a large drum magazine can also provide an excellent range of suppressive cover fire to tactical applications.

When you break it down, the ballistic advantage of the .223 the Reformation is negligible compared to a large pistol-caliber carbine. The advantage to the Reformation is in accessories and attachments. All M-4, AR15 and M16 optics, grips and magazines can be utilized by the Reformation. In addition, the ability to have a singular ammunition type is something of convenience.

The Reformation comes in between \$1180-\$1895 depending on caliber, length, and BSFIII Binary Trigger upgrades. It's a steep price for a hall gun. However, it's also going to remain a part of American firearms history.

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user.

The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet

to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon's Bench Wrench Fits 1" Die Lock Rings

Dillon Precision has addressed this in two ways. We offer 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our 1" wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. All of our die lock rings fit any standard 7/8" x 14 dies.

1" Die Lock Ring (Zinc Alloy)	P36-14067	\$1.75
5-Pack of Die Lock Rings (Zinc)	P36-10669	5.50
1" Dillon Bench Wrench	P36-10842	8.95

(Buy two or more 1" Bench Wrenches for \$8.10 each)

Wrench/Zinc Lock Ring 5-Pack	P36-10668	10.95
New Steel 1" Die Lock Rings		
1" Die Lock Ring (Steel)	P36-62422	\$2.25
5-Pack of Die Lock Rings (Steel)	P36-62423	8.95
10-Pack of Die Lock Rings (Steel)	P36-62424	14.95
Wrench/Steel Lock Ring 5-Pack	P36-62425	17.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Grace USA Gun Care Tool Set ⁵³

This custom designed 12" x 9" x 1-1/2" case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master - instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

P36-19495 \$9.95

Elzetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!
P36-21894 \$46.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

P36-19972 \$39.95

Dial Caliper[^]

- .100 per revolution.

Super Vel's "Pocket Rocket" .380

By Duane Thomas

After its resurrection just a few years ago, Super Vel Ammunition has continued to add new loads to its lineup. Most interesting to me among the newer offerings is their self-defense-oriented .380 ACP ammo. Super Vel owner Cameron Hopkins is very good at coming up with witty nicknames for loads. His company's 80-grain .380 Solid-Copper Hollowpoint is called the Pocket Rocket.

I was very fortunate to be able to interview Cameron Hopkins for this article. My first question was, "Why? Why make the .380 Pocket Rocket?" His answer was, "The .380 is a popular caliber, more people are carrying them today. It's simply a matter of demand. People were carrying .380s; I needed to make a good .380 load. The recent popularity of the .380 really started with the Ruger LCP, then the Smith & Wesson Bodyguard, and now we have the GLOCK 42. All popular guns. Popular gun equals popular cartridge equals 'Let's add a new load.'"

The Pocket Rocket was Super Vel's first load to feature a solid-copper hollowpoint (SCHP) instead of a conventional brass-jacketed lead-core hollowpoint. My next question was, "Why the solid-copper hollowpoint?" Cameron Hopkins replied, "The .380 is such an anemic cartridge to start with, and there's no such thing as a SAAMI-compliant, non-standard pressure, +P .380 load. The pressure ceiling is so low because of all the old guns available

in the caliber; therefore velocities are so slow you can't get reliable expansion with a conventional hollowpoint. A solid-copper hollowpoint opens more consistently at lower velocities. It was really the only way to get consistent expansion, within SAAMI pressures, at .380 velocities.

"In order to get reliable expansion, you need the bullet to be going over 1,000 feet per second. The only way you're going to get over 1,000 fps in .380 with standard-weight .380 bullets is from a service duty-sized gun like a Walther PP. Not a PPK – a PP with a full 4" barrel. You drop down to the 2.75" barrel of a Ruger LCP or Smith & Wesson Bodyguard, velocity drops to down around 930 fps, and that's not enough to get reliable expansion.

"By dropping the bullet weight, from the common 90-to-95 grains, depending on whether you're going hollowpoint or hardball, down to 80 grains, we can get higher velocities, and by going to a solid-copper hollowpoint, we can have a bullet that opens up more easily at lower velocities, at the same time.

"Even the Pocket Rocket won't give you reliable expansion out of something with a super-short barrel like a Ruger LCP. That's the truth with any ammo; it's just that other ammo companies won't admit it. In our testing, out of an LCP with a 2.75" barrel, the Pocket Rocket was going 967 fps. The Smith & Wesson Bodyguard also has a 2.75" barrel, that gave us 960 fps. A Glock 42 has a 3.25"

barrel, that gave us 1,018 fps. And I don't know how important this would be to your readers, but just in the interest of completeness I'll mention that an FN 1910 with a 4" barrel gave us 1,051 fps, and out of the Walther PP, also with a 4" barrel, we got 1,102 fps."

So, what are we looking at for expansion and penetration? "In bare gelatin, out of a GLOCK 42, the solid-copper hollowpoint gives us double-caliber expansion. We're looking at around .69" to .79". When it expands, the Pocket Rocket deploys six cutting petals. And they do deploy consistently. I don't know if you want to mention it, but expansion-wise we're getting the same recovered diameters, and the same penetration, as with 9mm. It's just that in 9mm, with higher velocities, the temporary stretch cavities are larger.

"Barriers don't seem to make much difference to solid-copper hollowpoints. We've tested the Pocket Rocket – well, all our ammo, really – in bare gelatin, and after passing through denim, and in barrier testing through sheet rock. The performance is the same, and penetration runs between 10" to 12" no matter what. That's with me shooting from about 15 feet. The material was Clear Ballistics 'Clear Gel' which duplicates 10-percent ordnance gelatin. Ordnance gelatin is a mess to make, stinks to high heaven AND melts at room temperature, so I use Clear Gel; it's much easier to work with, and gives valid results."

When Super Vel introduced its first lineup of ammo, all with conventional hollowpoints, one of the goals was to offer pistol ammunition for sale in the traditional 50-round boxes. A 50-round box of Super Vel loaded with conventional hollowpoints costs \$39.95, which is shockingly affordable for what can be considered specialty ammo. Bottom line, the solid-copper hollowpoints cost more. Thus the 80-grain SCHP Pocket Rocket .380 load is only available in 20-round boxes, at \$24.95 a box. Which is also shockingly affordable, compared to some other loads out there attempting to fill the same tactical niche.

The 80-grain SCHP bullet has a feed-friendly, rounded, hardball-like ogive. I have fired the

.380 Pocket Rocket out of the Ruger LCP and GLOCK 42, and also, believe it or not, a Beretta M1934, and I've yet to have a malfunction. I'm sure there may be guns out there in the world that hate the Pocket Rocket from a standpoint of feed reliability, I just haven't found them yet. The search continues!

Cases are nicked. Traditionally, nicked cases have been factory shorthand for "higher than standard pressure load" which is not the case here, though eventually it's come to indicate among shooters, in a completely informal, non-official fashion, "serious self-defense ammo." A lot of the higher-end manufacturers put their top-shelf ammo in nicked casings to capitalize on this perception. Whatever, it does make for a pretty cartridge.

I will mention, just based on my own shooting experiences, you do not want to fire the Pocket Rocket out of a Ruger LCP for more reasons than velocity. How heavily recoiling guns hit a person's hand is a very individual thing. For some people, the gun butt hits the web of their hand hard, for some people the bottom/interior of the trigger guard whacks the underside of their trigger finger. I am one of the trigger guard/index finger people. Folks, firing a Ruger LCP is, for me, a pretty miserable experience, even with more-conventional ammo; with the Pocket Rocket it's absolutely brutal. While this is a standard-pressure load, with a bullet that's lightweight for the cartridge, when you pull the trigger on this stuff there's no doubt you're firing something other than "normal" .380. When I shoot a full seven-round gunload

of Pocket Rocket out of a Ruger LCP, it feels like my trigger finger is being hit repeatedly with a hammer, and it aches for days afterward. With the all-steel Beretta M1934, with a gun butt long enough I can get a full three-finger grip, it's the difference between night and day.

Likewise with a GLOCK 42, which is a notably soft-shooting, amazingly pleasant gun to fire, the Pocket Rocket is quite easily controllable, and not at all abusive. My current backup gun is a GLOCK 42, running an ETS 7-round magazine, and loaded with eight rounds of Super Vel Pocket Rocket. 

Above: The Pocket Rocket .380 puts an 80-grain hollowpoint machined from solid copper into a nicked case. Below: The solid-copper hollowpoint expands reliably to double-caliber size, in the process deploying six cutting petals.

AMMO BOXES ARE COVERED BY DILLON'S LIFETIME WARRANTY

Dillon AkroBins[^]

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes[^]

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Swab-its – A Swab for Every Job! ⁶⁵

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/.56mm (6 ea.)	P36-15310	\$4.98
.243/6mm (6 ea.)	P36-15311	4.98

.40/10mm (5 ea.)	P36-15314	4.98
.45 Caliber (5 ea.)	P36-15315	4.98
12 Gauge (3 ea.)	P36-15325	8.98
Multi Pack: (6) .22/.56, (6) .30/7.62, (6) .357/9mm, (5) .40/10mm, (5) .45	P36-43312	26.99

Gun-tips®

Gun-tips® Extended Reach Firearm Cleaning swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

P36-12583 \$9.99

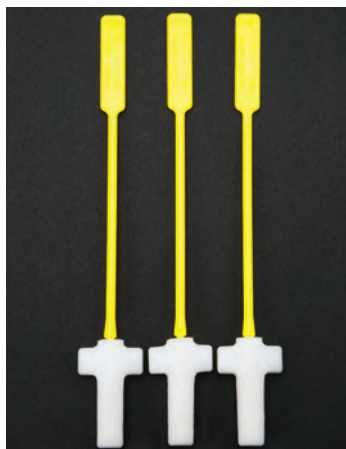

Bore-Whips™

Bore-Whips™ .17 and .22 caliber (pictured) by Swab-its® are ideal for air rifles, rimfires or any other .17 or .22 caliber firearm that’s difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator.

.17 Cal. **P36-12689 \$9.99**
 .22 Cal. (Pictured) **P36-12690 9.99**

Star Chamber

Star Chamber Cleaning Foam Swabs™ are for AR-15, M4 and similar MSRs. 3-pack **P36-10056 \$13.99**

Handgun Cleaning Kit

The Swab-its® Handgun Cleaning Kit for 9mm/.357 caliber handguns contains four Bore-Sticks™, a three-in-one tool that replaces the cleaning rod, jag, and patch; a nine-piece Multi-Surface Gun-Tips® package for internal and external cleaning requirements; and a 0.4 ounce bottle of BREAKTHROUGH® Battle Born HP Pro lubricant and protectant. As with all Swab-its products, the Bore-Sticks and Gun-Tips are made of reusable, lint-free foam that is washable with degreasing soap and water or mineral spirits.

P36-11907 \$19.95

MSR Cleaning Kit

The Swab-its® Modern Sporting Rifle Cleaning Kit contains 6 .223/5.56 Bore-tips® for bore maintenance; a nine-piece Multi-Surface Gun-Tips® package for internal and external cleaning requirements; three Star Chamber Cleaning Foam Swabs™; and a 0.4 ounce bottle of BREAKTHROUGH® Battle Born HP Pro lubricant and protectant. As with all Swab-its products, the Bore-Sticks, Gun-Tips and Star Chamber Swabs are made of reusable, lint-free foam that is washable with degreasing soap and water or mineral spirits.

P36-11908 \$24.95

66 New Products from Slip 2000

725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks!

NOTE: To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P36-19237 \$21.99

Slip 2000 Carbon Killer provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

NOTE: Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P36-19234 \$21.99

Slip 2000's Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P36-11652 \$25.99

Slip 2000's AR Cleaning System contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P36-11676 \$19.99

Slip 2000 Extreme Weapons Lubricant (EWL)

was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P36-11644 \$18.99

Slip 2000 EWL30

has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P36-11645 \$18.99

Slip 2000 Copper Cutter

is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing!

NOTE: It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P36-11646 \$11.99

Each Slip 2000 Gun Wipe

packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube.

Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P36-11674 \$14.99

Lyman Pick & Brush Set

Lyman's Pick & Brush Set is an indispensable item for your cleaning supplies and range bag.

P36-40160 \$3.99

MIL-COMM Extreme Performance Lubricants

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe P36-15732 \$10.99

1.5 Ounces P36-15731 14.50

Revolver BLAST with TW25B is an all-synthetic lubricant/protectant specifically designed for revolvers.

4.2 Oz. Aerosol P36-66677 \$11.95

E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth P36-18613 \$7.99

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60⁺), Lite is a thinner viscosity for lower temperatures (F30⁺).
Slide-Glide Standard **P36-15571 \$7.95**
Slide-Glide Lite **P36-15572 7.95**

Microlon UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

P36-75125 \$9.95

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

P36-13128 \$12.95

70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

Elite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature

special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

Made in USA With a Lifetime Warranty!

This is a **MUST-HAVE** range-bag accessory. It's a squib rod (for removing stuck bullets), magazine base removal tool, and scope windage adjustment and battery cap removal tool.

P36-15250 \$12.95

The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location.

The result: **NO MORE BROKEN BOLTS!** The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.

HMB Bolt **P36-66680 \$99.00**

This tool makes it simple to remove or install a new ejector and spring into the AR-15 bolt. Anyone who has tried to do this without a tool will be amazed at the reduction in the number of cuss words needed to perform the task. Comes with alignment and roll pin punch.

YM Bolt Assembly Tool

P36-66678 \$39.95

Young Manufacturing's Upper Receiver Vice holds any AR15 upper receiver regardless of the manufacturer. Since it supports the receiver from the inside, the outside dimensions are of no concern. Made from aircraft-grade 6061 T6 aluminum and anodized to MIL-A-8625 Type 3 Class 2.

74 "The Perfect Small Parts Cleaning Accessory"

P36-10209 \$15.95

The HYSKORE Degreezer consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. As anyone who has cleaned a gun is aware, cleaning small parts is a major challenge. Given the available technology and fixtures, the standard procedure is to use some kind of cup or similar vessel, pour in a quantity of cleaning solvent, and then pick up the parts one by one and brush them clean. The Degreezer changes all of that. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. As a bonus, the set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline. The Degreezer will quickly become an indispensable fixture on your workbench.

HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P36-10208 \$19.99

The Pachmayr Pac-Mag™ Holds up to 30 pounds and the three-magnet design gives the Pac-Mag more strength than any other gun magnet on the market. Secure almost any gun – pistol, rifle or shotgun – practically anywhere!

P36-10098 \$19.99

D•WIPE Towels & D•LEAD Hand Soap by ESCA TECH, INC.

D•WIPE Towels were specially designed for immediate clean up of most contaminants without water. The soft 5.5" x 8" towels are saturated with a unique cleansing formula and aloe vera, and will remove heavy metals from skin and other surfaces.

40 Soft Towels **P36-19916 \$4.95**

Original D•LEAD Hand Soap quickly cleans heavy metals as well as paint dust and firing range residue from the skin and fingernails. Removes lead, nickel, cadmium, arsenic, mercury, silver, zinc and most other heavy metals.

8 Oz. Bottle **P36-19915 \$2.95**

Kershaw®

**TRUST YOURSELF. TRUST YOUR TOOLS.
BE READY FOR EVERYTHING.**

Kershaw Pub looks like nothing you've ever seen. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip.

Blade length: 1.6" Closed: 3.1" Open: 4.5"

P36-31323 \$24.95

Kershaw Volt II opens one-handed and with an authoritative "twack" thanks to Kershaw's SpeedSafe® assisted opening system. A simple pull back on the flipper and the Volt II opens smoothly and easily.

Blade length: 3.25" Closed: 3.9" Open: 7.1"

P36-66698 \$55.95

Designed by RJ Martin, the Volt II has the same versatile blade and handle style as the original Volt, but with a hardworking 8Cr13MoV stainless steel blade and textured, black glass-filled nylon scales.

Blade length: 3.25" Closed: 3.9" Open: 7.1"

P36-66699 \$49.95

The CQC-7K is a manual opener using either the thumb disk or the patented Emerson "wave shaped feature." This opening feature enables the knife to be opened as it is removed from the pocket. The CQC-7K features a modified tanto blade for both slicing and punching capability.

Blade length: 3.25" Closed: 4.5" Open: 7.75"

P36-31319 \$59.99

The Kershaw Method opens quickly, easily, and manually with Kershaw's KVT ball-bearing system and a built-in flipper. The handle is black - of course. The G10 handle features an unusual machined pattern reminiscent of an architectural truss.

Blade length: 3" Closed: 4.25" Open: 7.25"

P36-66700 \$39.99

**SnapSafe
Modular Vaults
LOCKBOX**

The SnapSafe® Modular Vaults LOCKBOX is a pry-resistant 16 gauge steel container that provides secure storage for handguns and other valuables. Meets TSA airline firearm guidelines.

Dimensions: 9.5" x 6.5" x 1.75".

Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 (Includes riser, not pictured.) **P36-31318 \$119.95**

Scout Scope Mounts for AK, SKS Rifles

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **P36-25374 \$79.99**
Scout Scope Mount for SKS Rifle **P36-25373 78.99**

Czechpoint USA

The Czechpoint USA Sa vz.61 is a great PDW for smaller-statured defenders.

Sa vz.61 Pistol

79

For best reliability, vz.61 definitely favors hot ball ammunition over hollowpoints and exotics.

By Oleg Volk

The original vz.61 Scorpion 7.65x17mm (.32 ACP) machine pistol was a 1960s Czechoslovak PDW meant for self-defense of tank crews and other people operating in confined environments. A closed-bolt blowback design, it uses a sprung rate reducer to deliver controllable 800 rpm in its original select-fire form. Available in the US only as a stockless pistol until now, it was a curiosity more than a viable defensive weapon.

However, recently offered with a threaded muzzle and a brace by Czechpoint USA (czechpoint-usa.com), it has potential as a low-noise, low-recoil car or house gun.

The vz.61 comes with two 20-round and one 10-round magazine, the latter meant to fit into a flap holster. The enveloping bolt makes already short weapon even shorter while maintaining a 4.5-inch barrel sufficient for optimal performance of the classic .32 ACP cartridge with a 71-Gr. fully jacketed bullet. The chart shows both the velocities of several popular cartridges and illustrates that this vintage design does not work well with exotic ammunition. On the plus side, it's been 100-percent reliable with standard ammo.

Ammunition Performance

Geco 73 Gr. FMJ – 910 fps
Sellier & Bellot 71 Gr. FMJ – 1057 fps
Prvi Partizan 71 Gr. HP – 952 fps
Federal Hydra-Shok 60 Gr. HP – 950 fps
Hornady Critical Defense 60 Gr. FTX – 1000 fps (Doesn't cycle reliably.)
Winchester 71 Gr. FMJ – 950 fps (Doesn't feed reliably.)
Lehigh Defense 50 Gr. XC – 1300 fps (Doesn't feed reliably.)

The pistol comes with a decent 4 lb. trigger. Accuracy is determined mostly by the short sight radius and the steadiness of the hold. Kneeling, I got palm-sized groups at 35 yards, which is perfectly reasonable for the PWD role. The factory rear sight markings of 75m (80 yards) and 150m are wildly optimistic, and the white numbers degrade the sight picture contrast. Recoil is nonexistent, muzzle blast is minimal, and the entire combination is ear safe with a Gemtech (gemtech.com) 9mm sound suppressor attached. With the tiny amount of powder used by .32 ACP, the gun doesn't heat up much even on rapid fire. Despite the light weight of 2.8 pounds (not counting attached accessories), vz.61 stays very controllable when shot fast. Hats are recommended, as the symmetrical twin ejectors launch empty cases straight up to a considerable distance.

We tried to test longer-range accuracy with a straight-line struts and Picatinny rail combination by Custom Smith Mfg. (customsmithmfg.com). The struts backed with Gearhead Works (gearheadworks.com) Tailhook brace work very well, and may be adapted to right- or left-hand use. Custom Smith also offers a hooked charging

Custom Smith Mfg's telescoping brace and optic mount improves ergonomics, but the 3D-printed rail lacked necessary rigidity.

The vz.61's enveloping bolt permits a longer barrel and better balance.

Twin ejectors provide energetic vertical ejection which allows left- or right-hand use.

The Custom Smith Mfg. extended charging handle speeds up handling.

A Gemtech 9mm suppressor turns already moderate .32 ACP report into an ear-safe handclap.

handle to replace the low-profile button chargers, making the handling much easier. Their handles are required with the brace struts, as the buttons don't clear when they are collapsed for transport. With all charging handles, care must be taken to keep the support hand thumb out of the path of the reciprocating controls: the collision isn't damaging but unpleasant. Heads-up sights definitely improve vz.61 ergonomics, though also raise the offset from the bore line. Unfortunately, the 3D-printed rail got leveraged out of alignment when braced, causing the point of impact to wander significantly. Hopefully, the more current, denser parts that are becoming available now would work better.

The light weight and minimal recoil make vz.61 an excellent defensive tool for people who aren't able to handle something larger. It can also be wielded competently with one hand, making it a reasonable weapon for confined spaces. The limited power of .32 ACP rounds make it more of a fun, quiet plinker than a front-line weapon, but it's far more reliable than rimfire and delivers greater terminal effect. Even with the 9mm bore opening of the suppressor being loose for the 7.65mm bullet, the extra tube volume more than compensates for that inefficiency. For rural shooters who can plink in their own backyards, this offers a fun experience without disturbing neighbors.

ODIN Ready Bag (ORB)⁸¹

ODIN Works introduces the new ODIN Ready Bag (ORB) featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease. Whether you're going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

Technical Specs

- Quick-release compression straps
- Four D-ring attachment points
- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: *Can remain in bag as a pocket or extend up through the zipper to fit longer barrels*
- Available in black or coyote brown
- Dimensions: 28" x 7" x 6"
