Dillon Teams

Eric Grauffel – 7-time IPSC Handgun World Champion – wearing Dillon’s TechwearUSA AirFlex Shooting Jersey.

In response to everyone who has been asking us for Dillon Precision shooting jerseys, we’ve teamed up with **TechwearUSA** – Your Official Provider of Custom USPSA Gear! The TechwearUSA AirFlex (\$70) is the ultimate performance layer and their lightest weight jersey. Whether aiming your PCC or bow and arrow, the last thing you need is heavy gear holding you down. AirFlex is designed to keep you cool, dry and unencumbered on the range. Superior breathability with a slim, athletic cut ensures a smooth fit. This versatile all-purpose layer can be utilized as a base layer or stand alone. Its high tech fabric features extreme moisture protection, body temperature management and odor resistant properties. Superior wicking and highly breathable qualities makes this jersey fast drying and easy care. Great stretch and silk-like softness promotes comfortable and free movement.

The TechwearUSA Premier Polo (\$95) is made of proprietary Techstatic fabric and is the ultimate competition polo. From its classic cut, added length to make sure it stays tucked in, fold-

over collar, zipper front and side panels made from extra breathable mesh, every detail of this garment has been thought through to help you look, feel and perform at your best.

To order TechwearUSA’s Dillon Precision men’s and women’s shooting jerseys, go to techwearusa.com and look for Branded Jerseys. By the way, the “USA” in TechwearUSA signifies that their apparel is **MADE HERE!**

ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

Dillon's Bill of Rights for Reloaders

All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

Editor's Note: The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered. We constantly strive to live up to his standards. Please let us know if we're not succeeding.

HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

CP 2000^A

Dillon's First DEDICATED Case-Processing Machine!

- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Higher Throughput, Lower Cost Per Case
- Heavier Frame for Greater Rigidity
- Seven Threaded Stations for More Flexibility
- Upgraded Primer Pocket Swager
- Primer Pocket Swage Available in Two Stations
- User-Replaceable Swage Rod Tip
- Reinforced Toolhead Bolt & Washer
- Improved Shellplate Indexing System
- Processing Speed up to 2000 Cases Per Hour

Designed to complement our RL 1100 and Super 1050, the CP 2000 offers higher speed, greater versatility and added case processing capability...all at a much lower cost than dedicating a RELOADING machine to prep brass! If you're loading mass quantities of ammo, the CP 2000 will make your task MUCH easier.

Rapid Trim 1500 Case Trimmer[^]

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P70-62164** is **\$349.99**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P70-13141**, are **\$20.99** each. Upper lock rings, **P70-13559**, are **\$6.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Case Preparation Equipment

Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator [^] P70-20675 \$81.99
 CM-500 Case/Media Separator [^] P70-21045 \$49.99

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works

great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290
 8 oz. bottle. P70-13804 \$9.99
 Case (20 pc.) P70-20255 149.99

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle P70-13733 \$14.99
 Case (20 pc.) P70-20256 209.99

10 bottles of polish/10 of lube [^]
 Case (20 pc.) P70-21375 \$179.99

Don't Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass. 15-pound bag P70-13287 \$23.99

Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new! 10-pound bag P70-13496 \$15.99

 Proudly Made in the U.S.A.

One of ASI's rules is that shooters need not draw from the holster; they can start with the gun held at Low Ready if they choose, as demonstrated by Andrew Hermer.

Action Shooting International's Single Stack Championship

By Duane Thomas

I recently shot Action Shooting International's (asi-usa.org) annual Single Stack Championship. This is a match built around the idea of firing the 1911 autopistol in a "combat" pistol match. You could, of course, shoot a non-single-stack non-1911, it's not like they were going to turn you away at sign-in. The vast majority of people did show up with a single-stack 1911.

Strange how most serious shooters do tend to own at least one of those.

ASI is built around the idea of the four-stage match, so matches won't take that much time to shoot. This one was no exception, we started at 10 AM and finished at noon. The stages were all close range and fast paced, which I love. It's hard to come up with stages that are fair and fun for everyone. Make them more

10 **Blue Press**

800-223-4570 • 480-948-8009 • bluepress.com

complex in order to challenge the stronger shooters and newbies will be completely overwhelmed. ASI is geared toward new shooters; in my opinion ASI stages should always be biased toward being something a person who's never shot a match before could shoot, feel competent while doing it, and finish the match maybe not having set the world on fire but feeling good about themselves. The ASI Single Stack Championship was a pristine example of that. The truth is, if you make the stages simple, the stronger shooters are just going to put the hammer down (pun intended) and shoot them faster. So they're still being tested, just in a different way.

The top five single-stack shooters at the match got certificates. When all was said and done, Marcin Pawlina shot the hell out of this match, into a solid first place. The 2nd place Single Stack Championship certificate went to, well, me actually. We had a really solid squad; eight of the top 10 shooters at the match came off our squad.

In ASI, shooters are allowed to start with the gun held at Low Ready, or you can start from the holster. Assuming there's not some weird mandatory start position, gun lying on a table or whatnot. But normally you have the option of starting from the draw. I understand the advantages of going from Low Ready, it allows a faster first shot, but my testosterone level simply will not allow me to do that, I always go from the holster if possible.

We did have one stage that required starting with the gun laid on a "table" next you, and a bag over your master hand. At the start signal strip off the bag, grab the gun and go. Stages like this, where you begin with something in or over your master hand, or you have to draw the gun from a briefcase, or you have to shoot with something held in your offhand, whatever, basically you have to do "something else" other than just shoot, are what I call "novelty stages" (a term I picked up from USPSA/IDPA Master Tim Bacus). The dirty little secret of novelty stages is that the "novelty" is only there to distract you from the shooting. Once you real-

ize that, and refuse to be distracted, novelty stages lose their power to bother you.

These days we're seeing a lot of 1911s being sold in 9mm, and there were a fair number of those in evidence. I have, in recent months, been getting back into shooting the 1911 .45 after years away from it, and I was running my trusty old Wilson 30th Anniversary Model which I've fitted with a set of those fully checkered wooden grips off a Les Baer. Yes, I put a set of Les Baer grips on a Wilson 1911, and the gun didn't blow up or anything!

Fellow *Blue Press* writer Connie Bowlby was also on my squad. She'd just bought her first 1911 and was running that. None of that weenie 9mm stuff for Connie, she went .45. I said to her, "I can't even tease you about shooting 'a manly cartridge' since you're a lady." She replied, "It is a manly cartridge. But I just love it. This gun is SO easy to shoot, it's so fun, I plan on doing a lot more of it in the future." At least her 1911 does have really pretty blue grips on it.

I will say, one thing I've found irritates me about the single-stack 1911, either .45 or 9mm. If you go to reload the gun with rounds still in the magazine, frequently the magazine won't drop free because the top cartridge in the mag has drifted far enough forward to pin the

mag in the gun – you have to strip it out by hand. This is assuming the proportions of a pet peeve with me. That actually happened once to me at this match. Fortunately I was moving and I was able to get the reload mostly completed before I reached the next shooting position. It cost me some time, but not much. I think I understand now one reason why, when IDPA was started by a bunch of 1911 .45 guys, initially there was such an emphasis on forcing shooters to run the gun to slidelock before reloading.

In all, this was a great match, shooting the gun design on which the entire sport of "combat" pistol match shooting really was built. This match was F-U-N, folks. I can't wait to do it again next year!

Duane's website is self-defense-handguns.com

Connie Bowlby's gun for ASI Single Stack Championship was a recently purchased 1911 in .45 ACP.

PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package. **P70-13606, \$23.99 ea.**

Dillon Die Sets

Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Crimp Die (Pistol)

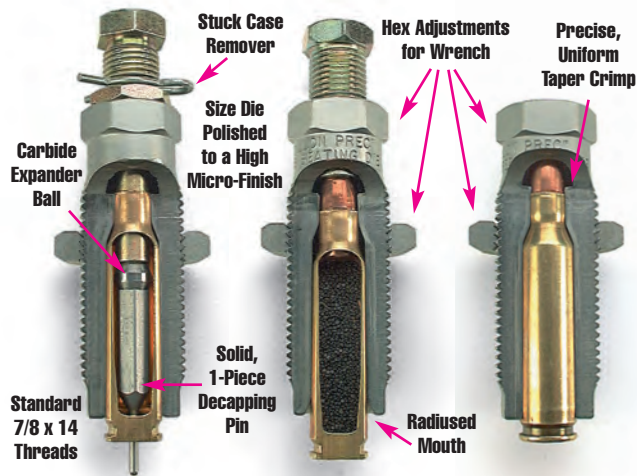

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

Dillon Carbide Pistol Dies (Three-Die Sets)

.32 S&W Long/.32 H&R Mag.	P70-14426	\$75.99

Spare Decapping Pins

Package of 10	P70-21528	\$7.99
---------------	-----------	--------

Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Mr. Bulletfeeder[®]

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

Keith Garcia @keithgarcia_3gun

1. First gun you ever fired?

Keith: Ruger Mini 14.

Frank: The first gun I remember firing was my Dad's Marlin lever action .22, still one of my favorites.

2. What's your favorite gun?

Keith: POF USA Revolution rifle.

Frank: My favorite shotgun is my K80 Parcours, which makes sense. I shoot it almost daily and know it better than any firearm I own. I do a lot of hunting and plinking most days too, right now I've been having a lot of fun with a semi-custom 6CM I had built from Patriot Valley.

3. Do you have any rituals before you shoot?

Keith: At major matches I video record the stages. I watch those videos until I can close my eyes and visualize all the shots on all the stages I will shoot the next day.

Frank: I have a set process that gets more detailed up until the shot, but also it's very important to keep it simple. 20-15 minutes before a round I take time to get focused and

Get 2

find my drive for the round. Once I'm on the field I have a very simple, but precise and specific three steps I go through on every station that sets me up for my best chance of success.

4. How many rounds a year do you shoot on average?

Keith: 25 to 30k.

Frank: About 30,000 the last few years. I've shot as many as 80,000 in a year, that was nearly every day on the field for 3-5 hours really trying to hone my skills, and learn myself more and more every day until I finally started to get a good grasp on what was going on. It got exhausting but I learned a lot, I wouldn't say it is necessary for everyone, but it was what I needed at the time.

5. Most useless thing you own?

Keith: The wedding ring from a failed marriage.

Frank: Throw pillows!

6. What else do you do for fun?

Keith: Binge watch on Netflix.

Frank: I do a lot of hunting in the winter and fall, some ice fishing. I try to plink a little almost everyday with my rifle or pistol. I get a lot of enjoyment out of shooting something for fun out of my main discipline.

7. Favorite place on Earth?

Keith: Silver Lake in California.

Frank: Home on the ranch. I get to be outside everyday and see a lot of animals in my travels. There's no place I'd rather be.

8. Most annoying thing about you?

Keith: I lack tact when I train with friends at the range. I call it "tough love" but

Keith Garcia

Know

apparently, it's also called being "an a**hole"; who knew?

Frank: I like to plan and observe a lot, so I have to be pretty disciplined some days to get a project started and finished.

9. Craziest thing you've ever done?

Keith: 5-week 6,000-mile motorcycle ride... it was 25 years ago, and my butt still has flashbacks.

Frank: I tend to live crazy. It's just a matter of perception.

10. Dream job?

Keith: Retiring from law enforcement and getting a job in the firearms industry. I love talking all things guns, gear, training and tactics; I would be very happy to do that for a second career.

Frank: Ranching, and specifically I like the grazing side and learning about how to make the land better. It's fun to see what you can do and how much improvement can be made to the soil just by timing and herd impact.

11. Who has inspired you the most?

Keith: My father, he taught me how to be a welder and machinist. He created amazing things and it was inspiring to watch.

Frank: There has been a ton of people along the way who have helped me. A lot of people who gave me an opportunity and their time to go out of their way to help me get better; friends, family and neighbors, helping out while I'm traveling; coaches and competitors on the field. I'm very thankful for that.

12. Who would play you in a movie?

Keith: Someone who looks good with gray hair.

Frank Thompson @frankthompsonusa

Frank: Clint Eastwood.

13. If you could have a conversation with anyone from the past, who would it be?

Keith: God, and I would have a list of questions ready!

Frank: Nikola Tesla, he had a lot of crazy experiments and ideas. It'd be neat to get in his mind and see how it worked.

14. Who's in your regular crew?

Keith: Kalani Laker, Rick Birdsall, Ed Espinoza and Brandon Schilling.

Frank: Our dogs Rowdy and Su-gar, as in "No Country for Old Men," they go with me pretty much everywhere.

15. Words to live by?

Keith: Just shoot the sights.

Frank: Be willing to explore and try something new out of your comfort zone. Don't be held back by the views of the people around you, be willing to believe, and dream. Work hard and they can come true. It's not luck, it's a choice.

ASI Match for a Fallen Deputy Sheriff's Family

By Duane Thomas

As this is written, I just finished up competing in an Action Shooting International (asi-usa.org) match set up to benefit the family of a fallen sheriff's deputy. On December 21, 2019, deputies of the Pierce County Sheriff's Department responded to a domestic violence call, stating in part a six-year-old disabled child had been attacked, and there were multiple weapons inside the house. Within seconds of arriving, deputies radioed they were under attack, the fight was ongoing, and they believed the offender was trying to access a shotgun inside his home.

The first unit to respond was driven by Deputy Cooper Dyson. Only 25 years old, a military veteran, he'd joined PCSD less than two years before. It's believed his car hydroplaned on wet streets, went airborne, barrel-rolled, slammed into a building and burst into flame. Trapped inside his vehicle, Deputy Dyson was killed. The suspect was eventually subdued and arrested.

A horrible tragedy. On top of that, at home his wife was pregnant with their second child. Because Cooper had been a police officer for less than two years, he had no pension, and very little in the way of survivor benefits. Obviously things have been hard for his wife and her two young children.

Of course, when local Washington state shooter Jackie Russo, a woman with a heart as big as all outdoors, heard about this, she figured she should do something to help. She went to the higher-ups at Action Shooting International, and asked them, "Can I do an ASI match where all the proceeds go to Mrs. Dyson and her kids? Even the part of the money that would normally have gone to ASI?" Their response was, "Well, YEAH."

ASI decided to kick in some money, on top of the match fees, straight from the organization. They also had three "goodie bags of ASI stuff" at the match, only instead of raffle tickets you wrote your name on a piece of paper money, of whatever denomination you chose, threw it into a jar and that was what got picked out to determine winners. The Paul Bunyan Ladies Shooting League also kicked in a donation. In all, they raised \$1,440. Polymer80 has donated two build kits – each of which contains the P80 frame and all the parts necessary to build the entire gun – which will be raffled off in a more conventional fashion, with actual raffle tickets.

And while all that is great – wonderful, in fact – when it comes to helping support two little kids whose dad has died, there's only so much ASI can do. I'm sure a lot of people would want to help, they just haven't been aware of it. Well, we'll see what happens when this issue of *The Blue Press* goes out to 300,000 people.

There are two ways to help out with a financial donation. For those who don't like the Internet, you can mail a check, money order or whatnot, made out to "TAPCO PCSD Cooper Dyson Legacy Fund" at the address "TAPCO Credit Union, 5303 112th Street East, Tacoma WA 98446." For those comfortable with PayPal, you can go online to the Tacoma/Pierce County CrimeStoppers (tprimestoppers.com) website, click on the DONATE button at the top of the page, and specify "Deputy Cooper Dyson Legacy Fund" for your donation.

There has historically been a bond between serious shooters and our police officers, our military members. Hell, the entire sport of "combat" pistol match shooting was started by guys many of whom were military veterans and cops. We take care of our own.

Duane's website is self-defense-handguns.com

New Products from

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. *This one happens to be filled with once-fired, processed 9mm cartridge cases (sold separately below) prepared at Dillon Precision on our new CP 2000 Case-Processing Machine.* The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the **WHOLE** stack to find what you're looking for.

Dillon's Basic Loader

\$299⁹⁹

P70-15399

Reloading Dies and Caliber Conversions sold separately

Pictured with optional accessories:

Strong Mount P70-22051 \$59.99

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of

versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 25) makes it quick, easy and inexpensive to change calibers. The additional toolheads are \$27.99 each, or \$25.99 each if you

buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them. A powder measure adapter is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

AUTO PRIME SYSTEM[^] P70-16627 \$94.99

PRIMER SYSTEM EARLY WARNING[^]
Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. P70-20302 \$29.99

AUTO POWDER SYSTEM[^]
Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. P70-20251 \$99.99

OPTIONAL MAGNUM RIFLE POWDER BAR
P70-21353 \$34.99

AUTO EJECT SYSTEM[^]
Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. P70-22120 \$35.99

BL 550 POWDER DIE[^]
Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

Powder Die: P70-16629 \$21.99

Oversize Die: P70-16626 21.99

Plastic Funnel: P70-16617 7.99

POWDER MEASURE ADAPTER
If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.) P70-20029 \$26.99
RL 450 Powder Die P70-20308 25.99

AGI Armorer's Courses on DVD are the ULTIMATE 2020 Firearms Protection Videos!

- You will learn **detailed step-by-step** Design, Function, and Operation of your specific model.
- AGI Armorer's Courses use **cut-away guns to provide close-up views inside the firearms.**
- Learn how to completely disassemble and reassemble ALL your guns with confidence.
- Advanced Training** on DVD by Master Gunsmiths. *This is NOT just basic field stripping. This is information "THEY" don't want you to have.*
- Training on DVD so they can't block you!** Have this information available when you need it.

Become an Expert on every gun you own!

Each AGI Armorer's Course DVD runs 90 minutes to 2 hours in length, covers the entire "family" of that particular model of firearm, and includes a free printable schematic.

66 different courses available! Here are just a few ...

AKS47 Semi-Autos • AR-15 Rifles • Beretta 92 Pistols • Glock Pistols • Colt 1911 .45 Auto Pistols
SKS Rifles • M1 Garands • Remington 870 & 1100 Shotguns • S&W Revolvers • Mossberg Shotguns
Ruger® Revolvers • Ruger® 10/22® Rifles • Ruger® LCP®/LC9® • Ruger® Mini-14® • Ruger® MKI, MKII & MKIII, .22 Pistols • S&W M&P Pistols • Springfield Armory XD Pistols • **NEW! SIG P320**

48 other titles available - go find your guns at: \$39.95 each plus s/h

AmericanGunsmith.com

Over 25 Years!

AGI has trained more professional and hobby gunsmiths than any other school! Call a Student Advisor today at **1-800-797-0867** to learn more and order.

Range Bag[^]

Dillon's Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 45). The Main Compartment is 12.5" long x 7" wide x 10" high, the End Pockets are 8.5" tall x 6.5" wide x 2" deep and the Front Pocket is 9" tall x 6" wide x 2" deep.

Range Bag, Black **P70-19366 \$89.99**
 Pistol Pouch, Black[^] **P70-17027 10.99**

"Border Shift" Ammo Bag[^]

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

Border Shift Ammo Bag, Black **P70-13755 \$25.99**
 I.D. Card Holder (Inset, Left)[^] **P70-14575 2.99**

Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

Dimensions: 66" x 27.75"

Dillon Reloading Accessories

A Strong Mount increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come

with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 750/650	P70-22051	\$59.99
XL 750/650-only	P70-22052	57.99
"SDB"	P70-22223	72.99

Our Bullet Tray is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 750/650 when equipped with the RL 550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	P70-22214	\$47.99
1050 Tray Kit	P70-22215	47.99

The Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

P70-16306	\$44.99
------------------	----------------

Our Toolholders are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

- P70-20049 29.99**

Dillon's **"Belted Magnum" Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

P70-97126 \$169.99

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

P70-21044, \$71.99 each
Three or more, \$65.99 ea.

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

P70-17950 \$49.99

Dillon's **1" Bench Wrench** fits our 1" Die Lock Rings which give you more space on the toolhead.

P70-10842, \$9.99 each
Two or more, \$8.99 ea.

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications.

Available alone or in combination with a spare parts kit for your machine.

- Nylon Dust Cover[^] **P70-11143 14.99**

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

RCBS Trim Pro 2 Manual Case Trimmer

The RCBS Trim Pro-2 manual case trimmer features a spring-loaded "universal" shell holder that will accommodate case head diameters from .250" to .625". Comes with pilot calibers: .22, .24, .25, .27, .28, .30, .35, .44 and .45.

RCBS Trim Pro-2™ Case Trimmer P70-43231 \$139.99

Lyman Products

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with

the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon's 1" Bench Wrench

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you're setting up a "naked" machine, there's plenty of room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead. We've addressed this in two ways. We offer 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our 1" wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. All our lock rings fit any standard 7/8" x 14 dies.

AMMO BOXES ARE COVERED BY DILLON'S LIFETIME WARRANTY

Dillon AkroBins[^]

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Blue Press 41

John Marshall on Classic Firearms:

Amazingly, John Browning's first invention is still with us today in modern versions. For the collector, originals will bring multiple thousands of dollars when found in any decent shape.

Can you imagine a 23-year-old man, just a few years out of his teens, designing and patenting an epochal rifle and then selling it for manufacture to a major firearms company? And can you believe that over 130 years later, that rifle is still in demand and still being made? Sure, it's hard to believe, but that man was incredibly exceptional. His name was John Moses Browning, and it was his very first design, the forerunner of many more to come. It was a single-shot falling block underlever rifle – strong, smooth-acting, quick to operate and versatile enough that was eventually chambered in over 91 calibers!

Browning designed the gun in 1878, and in the age of notable single-shot rifles such as made by Remington, Sharps, Stevens, Maynard and others, it was a standout. In those days, competitive rifle target shooting was very popular, and some of Browning's single shots, hand-made in his shop in Ogden, Utah, began to appear on the firing lines. They proved to be a hit with competitive shooters. The gun had some noteworthy features. The hammer retracted downwards so as to be out of the way as the action was opened, allowing quick and easy loading and unloading. The falling breechblock was robust and locked up like a bank vault, enhancing accuracy and allowing heavily loaded cartridges to be fired safely. The trigger was crisp. The receiver was made of premium steel, with two sizes of sidewalls available. The self-cocking hammer was of the traditional three-position type (down, half-cock, and full cock). Either open sights or tang-mounted vernier aperture types could be used.

The Browning shop, operated by John and his brothers, was hard-pressed to keep up with demand for this rifle, as they were only geared for laborious one-at-a-time manufacturing. Fortuitously, Thomas G. Bennett,

then V.P. and general manager of Winchester Repeating Arms Company in New Haven, Connecticut, became aware of the Browning single shot. At that time, Winchester did not have a single-shot rifle in its lineup, and needed one badly that could be more than viable for competition in that category. Accordingly, in 1883, Bennett traveled to Utah to meet with John Browning. While there, he negotiated the purchase of the single-shot patent, and also acquired the prototype of what was to become the Winchester Model 1886 lever-action rifle. John Browning's falling-block design became a production item at Winchester in 1885, and became known as the Model 1885 single shot rifle. Browning and Winchester continued to enjoy a mutually beneficial relationship for a 19-year period, with a number of other notable and popular long arms coming to fruition.

There were two main types that evolved for the Model 1885. The "low wall" version showed a mostly exposed hammer, and was designed for less-powerful cartridges. The "high wall" style was more appropriate for higher-powered rounds. Its frame covered most of the hammer when viewed from the side. It should be noted that some high walls were occasionally chambered for .22 rimfire and pistol-type centerfire cartridges. Both were Browning innovations, and both were designated and marketed by Winchester as the "Single Shot Rifle." Both low and high wall were available with two frame profiles: thick side and thin side. The thick side frame has flat sides that do not widen out to match the stock. The thick side is found more commonly on low wall rifles and it's somewhat rare on high walls. The thin side frame has milled sides that widen to match the stock.

The new Winchester took the competitive shooting market by storm. Major Ned Roberts, a noted "gun

The Winchester Model 1885 Single Shot Rifle

An original "low wall" Model 1885 rifle.

guy" of that era (and the originator of the .257 Roberts round), described the Model 1885 as *"the most reliable, strongest, and altogether the best single shot rifle ever produced."* Many today would argue that it still is. The Model 1885 has been replicated (notably by Uberti), and the Single Shot is still being manufactured for Winchester in Japan.

From 1885 to 1920, Winchester manufactured almost 140,000 single shots. The action proved to be so tough that Winchester used it even after production ceased to test fire new rifle cartridges loaded to very high pressures. It was a versatile platform, and was made in more calibers than any other Winchester rifle. Numerous single shots in .22 caliber were made and shipped to the U.S. Army for marksmanship training. These "Winder muskets" were distinguished by nearly full-length stocks. They were informally named for Col. C. B. Winder, who liked the idea of using rifles about the same size as service guns, but chambered for .22 rimfire. The Winder musket had a 26" barrel, a Lyman receiver sight and was chambered in either .22 Short or .22 Long Rifle

Over its years of production, several styles of the rifle were offered. These included Plain Sporting Rifle, Special Sporting Rifle, Special Single Shot (competition) Rifle, Schuetzen Rifle, Musket, Carbine, and (20 gauge) Shotgun. In actuality, Winchester could provide about anything a customer could desire. Barrels as short as 14" (trapper style) and as long as 38" could be ordered. The barrels could be round, octagonal, or half-round (most often seen on Schuetzens). Color casehardened frames were available until August 1901. Other options were fancy wood, set triggers, special sights, takedown styles, and cartridges as small as .22 CB to as large as .577 Eley. Both rimmed and

rimless cartridges could be accommodated, and were. Telescopes, nickel, silver and gold plating, checkered and carved stocks and custom engraving could all be provided by the factory. The versatility of this gun allowed virtually any combination of features, and the factory was very busy with special orders.

Winchester's modern line of 1885 rifles, made by Miroku in Japan and initiated in 2005, was dubbed the "Limited Series." These fire present-day smokeless rounds, including .17 Remington, .243 Winchester, and .30-06 Springfield. The newer guns are equipped with rubber recoil pads and straight butts as standard equipment. The "Traditional Hunter" group is reminiscent of 19th Century styles with crescent butt plates and folding tang peep sights. They are made in .38-55, .405 Winchester (Teddy Roosevelt's favorite African chambering), .45-70, and .45-90. The Low Wall can be chambered in .22 Hornet, .222 Rem., .223 Rem., .22-250 Rem., .243 Win., .204 Ruger and 6.5x55 Swede. A Low Wall Hunter is offered in .22 LR, .22 WMR, .17 HMR, as well as .17 WSM.

The rifle is operated as follows: Swing the lever down and fully forward to lower the breechblock and the hammer. If a fired case or loaded round is present in the chamber, it will be backed out or ejected. Manually insert a cartridge into the chamber. It should be fully inserted to prevent interference with the breechblock when it closes. The top front surface of the breechblock is channeled to help load a cartridge that protrudes a bit from the chamber, but it's best to be sure to push the round all the way in. Then close the lever. This locks the action and leaves the hammer at full cock. The gun is then ready to fire. If shooting is not imminent, the correct position of the hammer should

BLADE-TECH™

The Blade-Tech Ultimate Carry Belt by Nexbelt is specifically designed for those who carry a firearm daily for personal defense. The PreciseFit ratchet system allows you to quickly tighten or loosen the belt in 1/4" increments up to 6" for the perfect fit – no matter how you carry. Rest assured, this will be the most comfortable and fastest adjusting belt you will ever own. The Ultimate Carry Belt has a water-resistant backing that helps prevent moisture from penetrating the outer surface and allows for extra strength and durability. **One size – adjusts to fit all.**

This holster/mag pouch combination was designed for the Single Action Shooting Society's "Wild Bunch" category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no

more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

ODIN Ready Bag

ODIN Works introduces the new ODIN Ready Bag[®] (ORB)

featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease.

Whether you're going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

- Quick-release compression straps
- Four D-ring attachment points
- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: *Can remain in bag as a pocket or extend up through the zipper to fit longer barrels*
- Available in black or coyote brown
- Dimensions: 28" x 7" x 6"

"Plan B"[^]

Very-Bad-Day Planner Holster

Dillon's "Plan B" Very-Bad-Day Planner Holster[^] holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Holster

2020 SHOT SHOW

By Peter Caroline

It's a good thing that I don't believe in omens. As my editor, Mark Pixler, and I neared Las Vegas, my ancient Garmin Nuvi GPS malfunctioned, directing us to exits that no longer existed. Fortunately, Mark's smartphone provided us with proper directions. When we arrived at our hotel, we discovered that our usual entrance was under construction, necessitating a lengthy subterranean detour. While checking in, I was handed a printed sheet, informing me that firearms were *streng verboten* and had to be checked in and locked up at the property security office. Welcome to the LINQ Las Vegas!

The next morning at 0830 hours, when we Media personnel were allowed entrance to the showroom areas, I began my tour. My first stop was the Tandemkross booth (tandemkross.com) that features a nearly limitless variety of accessories to improve the performance, ergonomics and appearance of Ruger, Browning and Smith & Wesson semiauto pistols and rifles.

Next stop, and the exact opposite on the accessorizing spectrum, was Seecamp (seecamp.com). As always, simplicity itself, and your choices are simple: .25, .32 or .380 ACP caliber, and polished stainless or flat black finish. Sights, none...as the late Louis Seecamp once told a customer, "Ya stick it up their nose and pull the trigger!"

I always enjoy chatting with the folks at North American Arms (northamericanarms.com). They have a new longer-barreled (a full 4"!) Ranger II break-open model with both .22 LR and .22 Magnum cylinders, plus a dazzling range of custom options. For years, God bless them, they have been politely putting up with my useless suggestions ("How about a miniature stainless Webley-Fosbery in .22 LR?").

One great feature of GLOCK (us.glock.com) is that you never have to wonder what the latest model will look like; it will look exactly like a GLOCK. The new GLOCK G44 looks like a 9mm G19, but in .22 LR. It's a perfect understudy for the G19 and, best of all, a threaded barrel is available!

Last year, I reviewed (and bought) a SIG SAUER P210 9mm (sigsauer.com). With one exception, the

50 **Blue Press**

800-223-4570 • 480-948-8009 • bluepress.com

lack of an ambi safety, it is my dream EDC. This year, SIG improved on the EDC concept with a shorter barreled P210 with a matte finish. I am sorely tempted. Maybe someone (Cylinder & Slide?) can fabricate an ambi safety for us sinistral types.

The big news this year is Colt's (colt.com) reintroduction of the legendary Python .357 Magnum revolver. A secret test of the new Python was conducted at Gunsite in the autumn of 2019, and the reports were highly favorable. Externally, the gun appears unchanged, but the internal mechanism has been highly simplified for greater longevity of peerless performance. This will be available in 4.25" and 6" barrel lengths. I'm holding out for a 2" snubby, to replace one I foolishly sold back in the early 1990s.

Speaking of guns I can't afford, I stopped by the Nighthawk Custom (nighthawkcustom.com) booth, to chat with Sheriff Jim Wilson. Their 1911 iterations are the stuff that dreams are made of, and they also offer Korth revolvers (if you have to ask the price, you can't afford one). Nighthawk offers a very affordable custom drop-in 1911 trigger assembly, which even a klutz such as yours truly can easily and successfully install.

Kimber (kimberamerica.com) was displaying several new 2" and 3" additions to their K6S DASA (Double Action Single Action) .357 Magnum and .38 Special revolvers. These look and feel quite nice indeed and, although a bit pricey, should offer some serious competition to Colt, Ruger and Smith & Wesson.

I can always count on Ruger (ruger.com) for a number of new product introductions every year, and this year is no exception. The new Ruger LCP II Lite Rack™ .22 LR adds a useful additional caliber to the LCP stable, and the Ruger-57™ pistol is chambered for the FN-developed 5.7x28mm cartridge which offers high performance, low recoil and a 20-round magazine capacity. It should be dandy fun on varmints!

I became better acquainted with Chiappa Firearms (chiappafirearms.com) this past year by way of their takedown .44 Magnum Model 92 carbine, a superlative choice for small game hunting and home defense. Now they're offering a wide range of lever actions that rival the classic originals in quality of construction and finish. They also were showing a beautifully constructed 6mm airsoft Rhino target revolver with an MSRP of \$150, as I recall...a very tempting indoor marksmanship accessory.

Some years ago, I bought a beat-up Israeli-surplus 9mm Browning Hi-Power on Gunbroker. With the addition of some fancy sights, and a trigger tune-up and removal of the magazine safety by Gunsite's skilled gunsmith, it became a practical EDC. I recently heard that Brownells (brownells.com) would be offering the Turkish-built Tisas Regent BR9, an exact copy of the original Hi-Power. Brownells did not have an example

to show, but directed me to the nearby LKCI, Ltd. booth, where they had several samples, both in blue and stainless. As far as I could see, the quality of the gun was easily equal to, or in some respects superior to the Belgian original, and at a far lower price. Trigger pull, even with the magazine safety, was about 5-1/2 lbs. and not at all creepy. Brownells should have them in stock by the time you read this. Very tempting.

Magnum Research (magnumresearch.com) is best known for their obscenely large, beautifully crafted pistols and revolvers. Their "Build Your Own" program lets you create the handgun of your dreams, tailored to your specific needs and budget (think Big). They were displaying an imposing stainless BFR Elmer Keith .41 Magnum single-action revolver with an octagonal barrel and a number of Keith No. 5 features. A superlative revolver, chambered for a cartridge not known for being a wrist-breaker.

At a SHOT Show 14 years ago, I stopped by the CZ-USA booth (cz-usa.com) and got a super deal on a year-old CZ-75 30th-year Commemorative 9mm. It was a high-polish blue, gold-inlaid gun, and one hell of a good shooter. At this year's Show, CZ was displaying a 45th Anniversary CZ-75, also with high-polish blue, gold controls, engraving and fancy grips. Odds are, it shoots just as pretty as it looks.

KelTec (keltecweapons.com) may have a real winner here, if they can keep up with the demand. Their new P17 .22 LR pistol comes with three 17-round magazines, adjustable sights, a threaded barrel, and weighs just under 14 ounces. Best news is, MSRP is \$199.

In my opinion, the hidden jewel of the show was at the Midland Arms (shootmidland.com) booth. They were displaying a wooden case full of beautifully crafted .22 LR single-shot miniature Mosin military rifles made by Keystone Sporting Arms (keystone-sportingarmsllc.com) the same company that makes the Chipmunk and Cricket .22s, but built to a far higher standard. This is a limited edition and, as a further teaser, they even displayed a carbine version with a threaded barrel.

Some fine after-Show dining mitigated our annual endurance march through 15 acres of exhibits. Mark and I made our yearly pilgrimage to Lawry's Prime Rib, a time machine voyage back to a place of Gilded Age elegance. The prime rib was, as usual, incomparable, and their crême brulee dessert a testament to the existence of a Higher Power. At the other end of the price spectrum, Gordon Ramsay's Fish & Chips, the best I've ever enjoyed, was only \$15.95 for a most generous portion. On our last night in Vegas, we visited Virgil's Real Barbecue. I had their Memphis Style Pork Spare Ribs, with cheddar cheese grits, pickled beets and a glass of sweet tea...a real diet-buster, but worth every calorie!

SnapSafe Modular Vaults LOCKBOX

The SnapSafe® Modular Vaults LOCKBOX is a pry-resistant 16 gauge steel container that provides secure storage for handguns and other valuables. Meets TSA airline firearm guidelines. Dimensions: 9.5" x 6.5" x 1.75".

HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack

is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rack will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rack also means that two or more racks can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P70-10208 \$19.99

Hornady Security Dehumidifiers DESI®PAK Desiccants

Absorb humidity and prevent rust or mildew in gun safes or other enclosed areas.

Moisture-control crystals change color when unit needs recharging. Recharge by plugging into 110V electrical outlet.

P70-66702 \$19.99

Protect your valuables against rust and corrosion.

When the moisture control crystals turn pink, recharge unit by placing it in the oven. Unlimited recharges ensure a lifetime of use.

P70-66701 \$19.99

These 532 gram DESI®PAK desiccants absorb moisture better than silica gel. It's an industrial grade material that exceeds the requirements of Mil Spec MIL-D-3464E. Now available in smaller packages for other applications (ammo cans, long-term storage containers, etc.).

What's in Your Range Bag?

By Clayton Walker

Life can be complicated. A new email might tell you all hell has broken loose in your professional life and hours of work need to get done yesterday. There are the thousands of little things that break or deteriorate around the house that become new entries into a “honey do” list. Less urgently, there’s still the administrative drudgery of paying bills and running errands that functions as a black hole on your free time.

For all of those reasons, I look forward to a weekly range trip. It’s my own mini-vacation where I turn off the phone, put aside my personal and professional obligations, and focus entirely on doing something that brings me happiness.

There’s been only one constant companion for each of these small adventures: my range bag. Over the last couple years, I began to look a little more critically about the function of this piece of kit not simply as a vessel for all of my shooting crap, but as the facilitator of a fun and leisurely blasting session. Let’s talk about what I have in mine that you might want to throw into yours.

First and foremost, I like variety, and planning for variety begins with the guns. As primarily a handgun shooter, I always try to bring two or three guns, each of which satisfy a different niche. I usually rotate between guns I can shoot accurately, guns that keep my tactical or defensive-oriented skills sharp, and guns that are purely for fun – even those that are a little bizarre. What made the cut on my last trip? A S&W K-22 and a Steyr Hahn. Not a lot of category overlap! I find having a distinct purpose and feel for each firearm keeps me interested in shooting for longer.

Prepping a good bag means you can fit everything in there without all of your shooting irons flopping around and getting scratched up, so zippered pouches are a must. It’s also a good time to think about how your bag helps or hinders legal compliance, assuming you’re in one of the many areas that regulates how you may transport your guns. Here in California (groan), I like double zippers with padlock-capable, interlocking rings. Would this protect against a thief with a garden-variety box cutter? No. However, it would keep me in

good standing should I encounter an overzealous officer of the law.

You'll also need ammo and a place to put it. Personally, I like the security and geometry of ammo holders. Make sure to bring more than you think you'll need (and for the right guns), otherwise you risk putting an artificial ceiling on your time. Since you're reading *The Blue Press*, it also helps to think about a good system for getting fired brass back home.

The next items to go into the bag are practically non-negotiable: eye and ear protection. I always make space for good electronic ear protection, a few extra "foamies" for guests or if I want to double-up at an indoor range, and a set of prescription glasses that are now permanently devoted to living in my bag. These things always come out of the bag at the range, and they always go back in, so there's no forgetting.

It might also help you to make a list of all of the things that are so firmly in the "nice to have" category that they may as well be essentials. A set of gloves allows me to work designs that would otherwise chew my hands up, or to deal with otherwise bad ergonomics. If hammer or slide bite is a thing you've ever experienced, this should be a mandatory addition. I also have a Lula mag loader in my bag. Always. If you haven't experienced how easy this makes loading magazines to full capacity, you're missing out. You could muscle every last round into place, but why introduce unnecessary fatigue?

I like targets that don't take up much space, so I'm a big believer in stickers. If you have a stack in your bag, you can basically quadruple the life of any new target, or even re-purpose otherwise shot-up targets scrounged from range wastebaskets. A tennis ball and some string also makes for a fantastic (and surprisingly hardy) reactive pistol target that can be secured to just about anything.

Additionally, it didn't take me long as a reloader before I realized one of the best things I could have in my range bag was a cheap pen. Notes placed on a target are essential for adding context. It's worth keeping track of the conditions under which you shot a group, what particular bullet and powder was used, and any other general musings with respect to recoil, consistency, or performance.

Here's another important tip: you want to plan not just for fun, but for the most likely contingencies that will prevent you from having fun. For that reason, I have a limited-but-effective supply of tools on hand. A small bottle of CLP or something similar will get sluggish moving parts behaving once again, and a few disposable shop towels are great to wipe up the messes that come with applying said lubricant.

I also have a couple small screwdrivers in my bag. Not only do these guys see frequent use adjusting

sights and tightening screws that inevitably back out under recoil, but they're also a hell of a lot better than trying to use a knife or your car keys to remove stuck cartridge cases. I also like having one of those breakdown cleaning rods. The obvious use is for brushing out crud before it has a chance to cool and harden, but it's also a great squib checker. If you're shooting light loads and want a way to investigate a "pfft" without looking down the barrel of your gun, you'll be happy to have it.

Note that at a well-stocked range, you can usually beg or borrow a lot of this stuff from fellow shooters or the guys working the counter, but those who like to shoot in the middle of deserts and forests and other places where it's hard to get a cell signal will probably appreciate having essential kit close by.

To that end, if you are out in the middle of nowhere, fuel becomes an important consideration. Staying hydrated and snacked-up will do wonders to keep your range trips long and enjoyable. Sometimes, one of the best things you can do to tighten your groups is to take a break. An energy bar and a hot beverage might also do wonders to reset any bad habits that are creeping in.

Remember, though, that the key to a good bag is finding the balance between what you're likely to need or want and what will just take up space. Do you need to take more than an extra magazine per gun? Maybe if you're explicitly going to practice reloading in advance of a competition, otherwise leave the rest at home. Do you need a 44-piece screwdriver kit and a hammer? Probably not. Should you bring a bucket of spare parts? Not if you're fine addressing a critical (but rare) failure back at home, and especially not if you have at least one other gun to shoot if a breakdown does occur.

Past that, remember what my military buddies say: ounces make pounds. Once again, it's best to think critically about the smallest and lightest object that can go into your range bag that is likely to make your shooting session more enjoyable, or will effectively solve an issue that is likely to occur. When your range bag becomes a giant pain in the ass to haul out to the car or truck, it has become yet another obstacle that stands between you and a fun, leisurely time. Reflect and downsize.

I read something from businessman and humorist Arnold Glasow recently that seems a fitting point to end on. He said, "Happy is the person who knows what to remember of the past, what to enjoy in the present, and what to plan for in the future." Think of your range bag as this balance point of happiness: a plan for your next trip, assembled with the experiences and wisdom gained from past adventures, and designed to keep you enjoying the moment for as long as possible.

The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location. The result: **NO MORE BROKEN BOLTS!** The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.

HMB Bolt **P70-66680 \$99.99**

Young Manufacturing's **Upper Receiver Vice** holds any AR15 upper receiver regardless of the manufacturer. Since it supports the receiver from the inside, the outside dimensions are of no concern. Made from aircraft-grade 6061 T6 aluminum and anodized to MIL-A-8625 Type 3 Class 2.

YM Upper Receiver Vice

P70-66679 \$34.99

This tool makes it simple to remove or install a new ejector and spring into the AR-15 bolt. Anyone who has tried to do this without a tool will be amazed at the reduction in the number of cuss words needed to perform the task. Comes with alignment and roll pin punch.

YM Bolt Assembly Tool **P70-66678 \$39.99**

Special Purchase! A.R.M.S. Rear Sight

The A.R.M.S.® Stand Alone Flip Up Sight utilizes the same well-proven concept as the rear sight on the Swan® Sleeve System. The initial elevation zero utilizes the standard M16/M4 front sight bead.

The Winchester Model 1885 *Continued From Page 43*

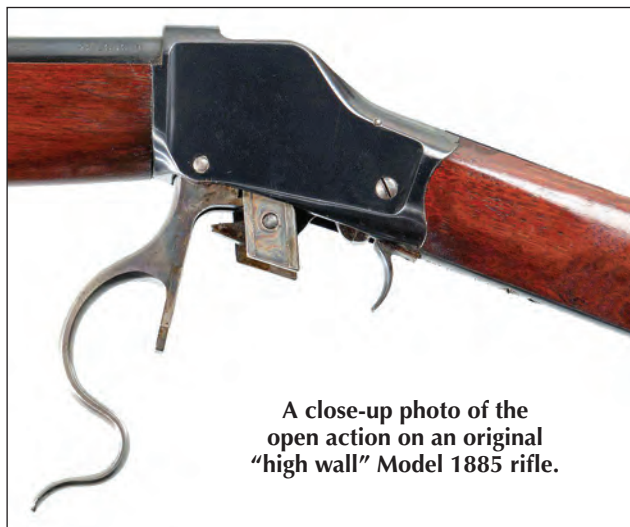

be at half cock; it only takes a moment to cock the hammer to make it ready to fire again. If several shots are anticipated, many users will hold a few cartridges between the fingers of the support hand for quick grasping and insertion by the firing hand.

The rifle requires little or no disassembly for cleaning or lubricating purposes, as the action virtually exposes itself when the lever is moved down and forward. For low wall versions in .22 rimfire, the firing pin channel in the breechblock may require cleaning after maybe 10,000 or so rounds are fired. In the top of the breechblock there is a firing pin retaining screw offset a bit to the left. With an appropriately fitted screwdriver, it can be unscrewed and removed carefully, while intercepting the spring-

loaded firing pin with a finger. Once the firing pin and its spring are removed, the channel can be cleaned with a pipe cleaner and solvent and lightly lubed. The firing pin and spring can then be replaced, pushed forward with an appropriate probe, and the retaining screw re-inserted and tightened.

Amazingly, John Browning's first invention is still with us today in modern versions. For the collector, originals will bring multiple thousands of dollars when found in any decent shape. Prices vary widely depending on the options present on the gun and condition. Modern Winchesters can be found and purchased for

less than two thousand dollars each, while overseas reproductions are a bit more affordable. This rifle is a prized classic collectible for many, and fun to shoot. 

A close-up photo of the open action on an original "high wall" Model 1885 rifle.

Tactical Shotshell Strippers

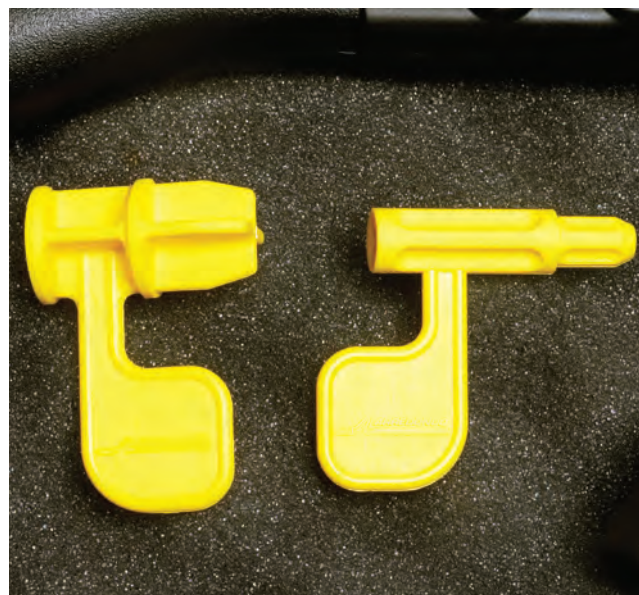

California Competition Works' Tactical Strippers are available in four- or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with a belt clip that will accommodate up to a 2-1/4" duty belt.

Real Avid Gun Tools & Cleaning Gear

Smart Mats™ are cleaning mats on steroids. The no-slip backed Spadded mat features an oil-resistant surface. It allows you to properly clean your gun without ruining the kitchen table and is large enough to handle field-stripped guns. The ingenious magnetic parts tray ensures your pins, screws and springs are never lost again. This is real world gun cleaning taken to the next level.

AR-15 Smart Mat	P70-29041	\$24.99
1911 Smart Mat	P70-29040	19.99
Handgun Smart Mat	P70-29042	19.99

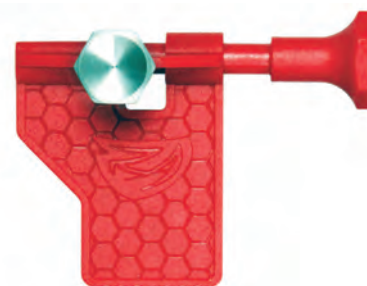

The Master Bench Block™ is most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

P70-29033 \$34.99

This advanced kit includes every standard and roll pin punch needed to build or work on an AR15.

P70-29032 \$39.99

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

P70-29034 \$9.99

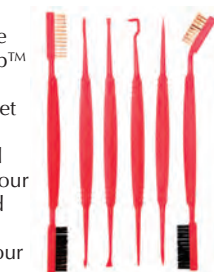

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

P70-29039 \$29.99

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm.

Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

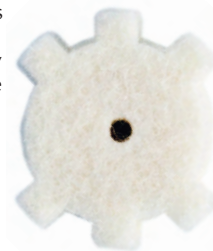

P70-29036 \$9.99

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

P70-29037 \$9.99

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

- 12 Gauge (3 ea.) **P70-15325 8.98**
- Multi Pack:** (6) .22/5.56, (6) .30/7.62, (6) .357/9mm, (5) .40/10mm, (5) .45 **P70-43312 26.99**

Gun-tips® Extended Reach Firearm Cleaning Swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package. **P70-12583 \$9.99**

Bore-Whips™ .17 and .22 caliber (*pictured*) by Swab-its® are ideal for air rifles, rim-fires or any other .17 or .22 caliber firearm that's difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator. **P70-12689 \$9.99**
P70-12690 9.99

Star Chamber Cleaning Foam Swabs™ are for AR-15, M4 and similar MSRs. 3-pack **P70-10056 \$13.99**

The **Swab-its® Handgun Cleaning Kit** for 9mm/.357 caliber handguns contains four Bore-Sticks™, a three-in-one tool that replaces the cleaning rod, jag, and patch; a nine-piece Multi-Surface Gun-Tips® package for internal and external cleaning requirements; and a 0.4 ounce bottle of **BREAKTHROUGH®** Battle Born HP Pro lubricant and protectant. As with all Swab-its products, the Bore-Sticks and Gun-Tips are made of reusable, lint-free foam that is washable with degreasing soap and water or mineral spirits. **P70-11907 \$19.99**

BALLISTOL
SINCE 1904
Multi-Purpose
LUBRICATES • PENETRATES
CLEANS • PROTECTS • PRESERVES
FIREARMS • LEATHER • KNIVES • TOOLS
LOCKS • MARINE • WOOD • METAL • RUBBER
The world's most useful & environmentally friendly lubricant!
Eco Friendly • Skin Safe • No Carcinogens

For more than 100 years, consumers have trusted Ballistol to lubricate, penetrate, clean, protect, and preserve their firearms, leather gear, wood, metal surfaces, and more. With an astonishingly wide range of applications, this environmentally friendly multi-purpose oil has become an essential tool for shooters, hunters, fishermen, and handymen all over the world.

- 1.5 oz. Aerosol Can **P70-30147 \$4.99**
- 6 oz. Aerosol Can (*pictured*) **P70-30145 9.99**
- 16 fl. oz. Non-aerosol Can **P70-30146 19.99**

The **HYSKORE Degreazer** consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. The set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreazer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline. **P70-10209 \$15.99**

Ram Rodz Barrel & Breech Cleaners

- .22 Caliber/5.56mm, 300 count **P70-43289 \$12.99**

Slip 2000 Products

725 Gun Cleaner Degreaser should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE: To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.**

Slip 2000 **Carbon Killer** provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE: Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.**

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

16 Oz. P70-19237 \$21.99

16 Oz. P70-19234 \$21.99

P70-11652 \$25.99

P70-11676 \$19.99

Slip 2000 **Extreme Weapons Lubricant (EWL)** was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P70-11644 \$18.99

4 Oz. P70-11645 \$18.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE: It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.**

4 Oz. P70-11646 \$11.99

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P70-11674 \$14.99

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

66 Blue Press

0.5 Oz. Syringe P70-15732 \$12.99
1.5 Ounces P70-15731 17.99

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard P70-15571 \$7.99
Slide-Glide Lite P70-15572 7.99

Sweet's 7.62

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The **Lyman X-Block** is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

P70-11390 \$15.99

Things Are Better

Itching for armed-battle headlines, the absence of any shooting forced CNN to invent some! They portrayed the peaceful Lobby Day gathering in Virginia as a “gun fight.” To enhance their deception, they listed an unrelated event 1,200 miles away in Kansas as a subhead.

By Alan Korwin

When in the course of American events freedom has generated such stunning prosperity and abundance that people lose sight of what’s right and what’s wrong, a U.S. Bill of Wrongs may be needed to clear up the malaise and fog.

Coming soon to your mailbox, in *The Blue Press* is a proposal for a Bill of Wrongs, to codify and clarify just what is going awry in our country. It begins with people so misled and confused they are actually proposing socialism as a cure, without recognizing that system destroys everything it touches. We even have candidates running for office on a platform of straight-out communism/socialism, who if elected could not honestly take the oath of office. The oath requires them to preserve, protect and defend the Constitution. Most of them and their supporters could not possibly have read the document.

For now however let’s clarify what’s right, and why the hands of the Gun-Rights Confiscation Clock are not racing to midnight, as you might fear. That clock, being managed by one the most ardent gun-rights groups, Jews for the Preservation of Firearms Ownership (jpfo.org) – they know first-hand how much we have to lose – has been static and may remain so,

70 Blue Press

until at least the 2020 election. If you don’t get out and vote next time around, you personally might be responsible for tragedy.

Despite the noise in the “news” media, and their total violation or abandonment of every ethical principle they’re supposed to follow, our gun rights are robust, largely intact and getting better. The constant yelling has a negative impact on your psyche; I won’t deny that for a moment. But don’t let the propaganda make you think the sky is falling.

Gun ownership is growing. That’s just basic truth. Americans are waking up by the tens of thousands. The greatest growth is among women, traditionally left out of this. Next are marginalized groups, a former stronghold of leftists, who are losing their grip on them. African Americans, Latinos, other minorities and LGBTQ people are forming gun groups, shooting clubs, and their business is welcomed nationwide.

Gun and ammo sales are huge. A few gun outlets have dropped some products. Media morons cheer – everyone else makes money. Anti-rights forces want you to believe guns are so evil no one wants one. That’s totally wrong. Think – have you personally had friends or relatives ask you to educate them about guns, or take them to the range? How about your religious lead-

800-223-4570 • 480-948-8009 • bluepress.com

Than You Think!

ers? That's happening everywhere. Contrast that with how many people you know who've asked you (personally) to give up your arms. Sure, media screams about it. But they live in vacuums of their own making, disconnected from reality.

Instructors have no shortage of clients. They'd all like more students, but what free-market businessperson doesn't want more business. New trainers keep popping up. I don't have to belabor that, just search (not "Google," that's a left-wing-biased usurper of public trust, try duckduckgo.com or some other competitor gaining strength, with better images too).

Where states have become abusive, Sanctuaries are springing up. Freedom has a way of finding a way. In Virginia, where the leftist-socialist party took control of both houses and the executive, they rammed through illegal unconstitutional gun bans and infringements. These are so bad – on paper at least – that the public rose up, armed in protest, and the state's sheriffs banded together to refuse enforcement of such outrageous usurpations of power. More than 100 counties, cities and other jurisdictions followed suit, giving the governor conniptions.

No one will dare try and enforce those monumentally bizarre attempts to do what the British did back in the 1700s. You can't quash rights by edict, not when the public is heavily armed. The media, in typically hostile lying fashion, called "Lobby Day" – a peaceful gathering at the state capitol – "Gun Fight in Virginia"

(see image) yet not a single shot was fired. Media nationwide was livid that there was no gunfire, so pretended there was. This is what we face – peace called warfare by Orwellian reporters.

The *50-State Traveler's Guide* summary page is beautiful. While a few states have introduced new infringements, some now being litigated, many states have improved (national media suppresses such news). For example: District of Columbia's effort to ban shall-issue permits has failed; Idaho Constitutional Carry extended from 21 to 18 years of age and

vehicle carry expanded; Indiana civil-immunity protection for self defense enhanced, plus church carry exceptions; Kentucky got Constitutional Carry; North Dakota vehicle carry for permittees; Ohio self-defense burden-of-proof on prosecutors where it belongs; there are others, I've run out of editorial space, get the book and please understand, it's not all great, I'm making a point here.

The governor cordoned off the capitol, and with metal detectors, created a so-called "gun-free zone" where people stripped of their right-to-arms gathered, surrounded by police who weren't "gun-free." Reporters claimed confederate flags were present, but no one attending saw any. Beyond flimsy fencing, crowds were estimated at up to 100,000, with people openly carrying everything from sidearms to full battle gear. One observer noted both groups were equally safe.

"Confirmation bias" is the effect of seeing what you want to see, and media plays Herr Goebbels' card a lot – lie enough and people begin to believe. Both sides get the feeling they're losing, but it just isn't true. Stay awake, pay your dues to the liberty groups, stay informed, make sure you vote (the right way), and freedom will prevail.

Award-winning author Alan Korwin has written 14 books, 10 of them on gun law, and has advocated for gun rights for nearly three decades. See his work or reach him at GunLaws.com.

Bushnell TRS-25[^] Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot.

TRS-25 (Includes riser, not pictured.) P70-31318 \$119.99

Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

- Scout Scope Mount for AK Rifle P70-25374 \$79.99
- Scout Scope Mount for SKS Rifle P70-25373 78.99

Blue Press 75

By Oleg Volk

Maxim 9 by SilencerCo is a groundbreaking design: it is the first mass-production American pistol with sound suppression integrated from the start. While designed around GLOCK magazines, it uses an entirely original cam-delayed blowback operation to permit a stationary barrel. Introduced in 2016, it captured the imagination of the shooting public from the start. The name is a tribute to Hiram Percy Maxim, the inventor of the firearm silencer and developer of mufflers for internal combustion engines. Many of the early sound suppressors were asymmetric to allow the use of the standard sights, just like the suppressor on this pistol.

Up until recently, integral sound suppression in pistols had been confined to .22 rimfire. Integrating the sound suppressor improves the silencing effectiveness, and also permits far longer sight radius than thread-on cans. The disadvantage in the US is primarily logistical, as the entire firearm would be unavailable until the tax stamp is approved by BATFE sometime around a year after the submission of the application.

Maxim 9 is a large pistol. It's 10.75" long and looks larger because the sound suppressor shell hangs down almost to the bottom of the trigger guard. If a slightly more compact form is required, one of the baffles may be removed from the stack, reducing the overall length to about 9.5" at the cost of increasing the report by

about 3dB. Despite the formidable size, the pistol isn't too heavy at 39 oz., and its balance is far enough back for a very steady hold. That is accomplished mainly by using aluminum for the outside walls of the suppressor, with only the baffles being steel. The individual baffles and shell segments are stacked in place and further aligned with two rods attached to the receiver and to the front plate of the suppressor with hex screws. A set of shorter rods is supplied for creating the compact configuration. The bottom of the suppressor has a Key-Mod interface for attaching lights and lasers, directly or with Picatinny rail sections.

The receiver is polymer with steel inserts. Slide stop levers are provided on both sides, the trigger safety is the usual hinged design. Sights are drift-adjustable white dot post and notch. The grip is fairly slim and fits most hands well. I shot a prototype in 2016 and an early production sample in 2017, so running the current-production pistol was going to answer a lot of the questions I had stored up.

The first impression is that the pistol is easy to shoot well. Early production Maxim 9s had a very gritty, unpleasant trigger that kept me checking for the non-existent manual safety. A few times, I thought I forgot to release it. My sample has an aftermarket MWS trigger in the 5-lb. range, very helpful for accuracy. The trade-off is the inability to ignite hard Russian primers reli-

Blue Press 77

Inset: Two takedown screws on the front plate of the round suppressor provide takedown for cleaning. KeyMod accessory rail is visible below. Above: Streamlined, snagless form of the gun is especially evident in the top view. Maxim 9 is available in FDE and light gray Cerakote. Facing Page: Maxim 9, fieldstripped.

ably. The balance is quite neutral, the grip angle correct for natural pointing, so the red of the Vortex Razor we mounted came into view at once. Accurate shooting was a snap, with lead splashes on steel being a single blob at 15 yards. 50-yard hits on A and B zones of a silhouette were likewise routine.

The pistol can be easily and accurately deployed with one hand, recoil being closer to a .32 pistol than to other 9mm handguns. Sound suppressors dampen recoil well, and the ergonomic grip shape helps control what impulse remains.

Maxim 9 doesn't have a conventional slide but rather a breechblock similar to rimfire pistols. Mechanically, that works fine, but I had to remember to lower the support hand thumb to avoid exposure to gas coming from the chamber. Because of the somewhat brisk delayed blowback

action, the ejection port pop is pronounced, and because of the 180-degree opening around the chamber, it propagates in all directions. After about three magazines fired rapidly, the pistol becomes quite hot.

After five, it is too hot to hold. That's hardly a problem for a carry gun, but noticeable at the shooting range. Fortunately, the aluminum flats radiate heat efficiently, so the pistol cools down quickly.

The pistol is rated as hearing-safe with all 9mm loads in the long configuration, and as hearing-safe with subsonics only in the short. Perhaps due to the ejection port pop, perhaps due to the limitations of the suppressor design,

all shooters who tested this pistol with me using subsonic ammunition only found it too hard on the ears for any extensive practice unprotected. The report was

Maxim 9 is a very practical pistol for home defense and for carry when deep concealment isn't a factor.

78 Blue Press

800-223-4570 • 480-948-8009 • bluepress.com

obviously a fraction of the unsuppressed noise, but louder and sharper than a locked-breech pistol with a conventional muzzle suppressor. The exception to that was the super-quiet 185-gr. Seismic HP ammunition, but the overall length of that round interfered with the internal slide lock lever. It ran perfectly fine from the magazine, but only if the slide was closed before the loading sequence. Numerous brands of 147-gr. and Fiocchi 158-gr. ammunition ran reliably and accurately, but earplugs were desired for a comfortable outdoor range experience. For a carry pistol, that is a reasonable compromise: a couple of magazines fired once wouldn't damage hearing, while the flat integrated sound suppressor is a definite ergonomic and handling improvement on the heavy threaded cylinders unbalancing a conventional pistol. The barrel is 4 inches long, producing velocities similar to regular service pistols. Subsonic ammunition is recommended for the best results, but lighter bullets shoot as accurately if noticeably noisier.

Disassembly is quick and simple. Unscrew the front of the suppressor with the included hex wrench and pull the baffles apart. Depress the recoil-rod retainer button on the back of the slide; lift the recoil-lever rod from the top of slide behind the top of the ejection port. Release the recoil-rod button and pull the slide to

the rear about halfway back, then lift it up. No further disassembly is needed for routine cleaning. The manual suggests cleaning every 500 to 1000 rounds, and the lower number seems correct to me. Sound suppressor blowback is definitely a factor, although the 180-degree ejection port allows most of the unburned powder and carbon deposits to escape rather than gunk up the mechanism.

SilencerCo teamed up with several holster makers to produce carry solutions for Maxim 9. It is obviously an open-carry pistol, though the squared off bottom of its holsters, especially if designed to fit a weapon light, might not be recognized as gun-related by most people if the grip is obscured by clothing. The holsters are usually made to withstand the heat from the suppressor shell, and IWB carry is out for that reason. At \$1500 MSRP and about \$1300 street price, it is no more expensive than any comparable unsuppressed pistol and a separate suppressor combined. It's a very practical pistol for home defense and for carry when deep concealment isn't a factor.

Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

Econo-IFAK (at right in photo) **P70-43379 \$19.99**
 Micro Kit #2 (at left in photo) **P70-43378 39.99**

TRUST YOURSELF. TRUST YOUR TOOLS. BE READY FOR EVERYTHING.

From clearing brush to making kindling, the Camp 10 is the ideal outdoor and survival tool. Cut, slash, hack, split, scrape – just about any task you ask of it, the Camp 10 can handle. The full-tang Camp 10 is made of carbon tool steel for toughness and wear resistance. A basic black powdercoat protects the steel and makes maintenance easier. You'll like the secure, contoured grip of the Camp 10, too. The handle has a built-in hand guard and is drilled in both front and rear so you can attach a lanyard either place – or both – for carrying versatility.

Blade length: 10" Overall Length 16" Weight, with Sheath 1 lb. 8 oz.
P70-55012 \$80.99

Military knives have a lot of history and a lot of fans. Yet they tend to be bulky for everyday carrying and use. Kershaw and custom knifemaker Les George offer a solution by taking inspiration from a U.S. World War II knife design and turning it into the XCOM folder.

Blade length: 3.6" Closed: 4.4" Open: 8"
P70-55009 \$49.99

The Kershaw Faultline is the one you add to your truck box, toss in your go-bag, or slip into the pocket of your tactical pants. Everything about it says, "practical, reliable, and sturdy." Made of quality 8Cr13MoV stainless steel.

Blade length: 3" Closed: 4" Open: 7"
P70-55011 \$46.99

Designed by Dmitry Sinkevich, the Atmos features Sinkevich's characteristic clean and practical design – but enhanced with extra detailing. In addition to the chamfered carbon-fiber, it also has a custom oversized pivot, a backspacer with wide lanyard attachment, and a reversible, deep-carry pocketclip.

Blade length: 3" Closed: 4" Open: 6.9"
P70-55010 \$57.99

The Kershaw Method opens quickly, easily, and manually with Kershaw's KVT ball-bearing system and a built-in flipper. The handle is black – of course. The G10 handle features an unusual machined pattern reminiscent of an architectural truss.

Blade length: 3" Closed: 4.25" Open: 7.25"
P70-66700 \$39.99

Designed by RJ Martin, the Volt II has the same versatile blade and handle style as the original Volt, but with a hardworking 8Cr13MoV stainless steel blade and textured, black glass-filled nylon scales.

Blade length: 3.25" Closed: 3.9" Open: 7.1"
P70-66699 \$49.99

Kershaw Volt II opens one-handed and with an authoritative "twack" thanks to Kershaw's SpeedSafe® assisted opening system. A simple pull back on the flipper and the Volt II opens smoothly and easily.

Blade length: 3.25" Closed: 3.9" Open: 7.1"
P70-66698 \$55.99

The Original GLOCK® Field Knife

Field Knife, GLOCK, with scabbard, 1 ea.
P70-15483 \$35.99
