# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

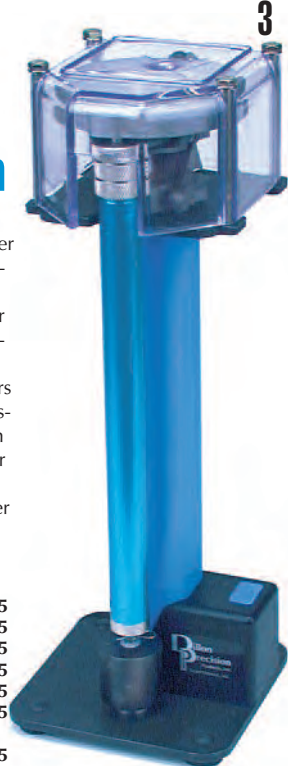

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

# We READ Our Mail!

It's a shame that there is a great picture of a CZ 83 with this article! ["Self-Defense Shooting: Considerations for Seniors" Feb. 2015] that says the gun is discontinued. Only sort of true.

The CZ 83 is the commercial version of the military/police CZ 82. While the 83 came in three chamberings - .32 auto, .380 and 9mm Makarov; the CZ 82 only came in 9mm Makarov. The good news is the CZ 82 is a milsurplus handgun easily found in the USA, and commercial self-defense ammo is available. So maybe a quick note to your customer base...options are available in spite of the demise of the CZ 83 - buy a CZ 82!

Mike Nagengast

Thanks so much for the beautiful photo of the CZ 83 in 7.65 Browning/.32 ACP in the February 2015 issue. I'm a serious handgun enthusiast and collector and have an extensive and eclectic inventory, which fortunately includes the .32 CZ 83 that I ordered in 2008. I've always relished the panache of calibers a little outside the herd-mentality mainstream that's steadily getting worse. It's particularly sad that the versatile and once-flourishing .32 has virtually disappeared or been redacted to a couple of embarrassing mini-gun options by the bigger-is-better crowd. Even the .380 version disappeared when CZ-USA dropped the CZ-83 altogether after 2012. We're already getting closer than you think to having any new pistol you want in your favorite caliber - as long as it's 9mm Luger.

Joseph J. Maxwell - Oxford, MS

Thanks, guys! If I'd known my little CZ 83 was going to generate such a buzz, I'd have put it in the catalog long ago. I've always liked CZ 82/83s and thought they were severely overlooked. It's nice to know I'm not the only one who appreciates them.

I have been the proud owner of a RL 550B for a couple of years now. It wasn't until last week that I was introduced to your case lube and polish. The case lube is amazing. It's so much simpler to use when doing quantities of 5.56 and it doesn't dent the shoulders! The polish cleans up even suppressor-fired brass in about 5 hours as opposed to 12 and they look like new!

M. Neely - Southern Oregon

# Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our commercial-grade reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# NINE IS THE NEW.

## Reviewed by Peter Caroline

It wasn't that many years ago when I could walk into my local Walmart and pick up a 525-round bulk-pack of Federal .22 LR for all of \$8.88. And I could buy as many as I wanted...there was a whole pallet of the stuff sitting out back.

That was then and this is now. Now, I can go to the gun show, and some charitable soul will allow me to buy a brick of who-knows-what .22 LR at the bargain price of fifty bucks. There are many reasons for this shortage, ranging from plausible to total Bravo Sierra, but it appears that the days of cheap plinking, target practice or varmint control with .22s are over, gone, finito.

There is hope, however, for us budget-minded (i.e., cheapskate) shooters. Mark Pixler now informs me that 9mm Luger is the new .22 LR, and he's the Editor for Lord's sake, and an authority to be reckoned with. When you figure that most .22 ammo nowadays goes for 10 cents or more per round, reloadable 9mm starts to look pretty good as plinking fodder...at least until Dillon comes out with a .22 LR progressive press, but don't hold your breath.

While my .22s are gathering dust in the gunroom, I've been testing out Mark's theory with an interesting 9mm carbine, the CMMG Mk9 T. Like everything else nowadays, this carbine looks like your basic AR-15/Modern Sporting Rifle. It has a dull black finish, 16" barrel, a six-position adjustable buttstock and a free-floating aluminum KeyMod handguard, which is slimmer and more easy on the hands than the traditional Picatinny configuration. There is a full-length Picatinny rail topside for flexible sight installation. CMMG even

includes a short length of rail that you can attach, so you can hang on all sorts of tactical things as you choose. What you won't find under the handguard is a gas system, because the Mk9 T has a simple blowback action. This is A Good Thing... straightforward and easy to take down and clean. Just pull out the captive rear takedown pin, pull out the bolt/carrier assembly and the charging handle, and you're good to go. It's caveman simple, with no other plumbing to mess with. The gun weighs a bit over six pounds and, with the adjustable buttstock, goes from 31.5" to nearly 35" in length.

Another nice feature of the Mk9 T is a magazine well that was actually designed for a 9mm magazine, in this case the Colt-pattern 32-round stick. I initially tried loading the two mags that came with the gun, using my Uplula magazine loader. For some reason, the magazines didn't like that tool, so I switched to the old tried-and-true stuff 'em in by hand method, which was surprisingly easy.

The Mk9 T comes without sights, so I installed a bargain basement red dot sight with a 1" riser and headed for the range. I got a variety of 9mm Luger ammo...Winchester PDX1 Defender 147-grain JHP, Winchester Value Pack 115-grain FMJ, Winchester Defender 147-grain JHP, Italian-made Perfecta 115-grain FMJ, Corbon +P 125-grain JHP and some odd NATO-surplus FMJs with a "VPT" headstamp. I set up my portable benchrest and sandbag, and a 14" metal gong with a stick-on fluorescent dot at 25 yards. I also brought along a bag of used golf balls, always fun targets.

I'm happy to report that the Mk9 T performs like a champ. Trigger pull measured 5-1/2 to 6

# 22: CMMG Mk9 T

11

The CMMG Mk9 T could be very useful as a training rifle...it's not in the least bit intimidating for beginners. It's certainly a fun plinker, and it's compact

enough to be quite appropriate for indoor home defense, with enough power, but little likelihood of over-penetration.

I do like this little carbine. It's accurate, reliable, very pleasant to shoot, and finding affordable ammunition poses no problem. And, it's made right here in the USA. MSRP is \$1,149; real-world prices will vary.

*CMMG Inc.  
P.O. Box 369

*Customer Service: 660-248-2993  
Email: [SALES@CMMGINC.COM](mailto:SALES@CMMGINC.COM)*

pounds on my RCBS scale. The gun happily ate everything I fed it without any hesitancy. And the recoil – or lack thereof – makes this an ideal training carbine for everyone in the family. Think of .22 LR, only louder. Once I got the red dot sight zeroed in, I could tear up the center of the fluorescent orange dot with great regularity. Golf balls simply disappear into another dimension when hit squarely. This is dandy fun.

# BL 550 Dillon's Basic Loader

**\$259<sup>95</sup>**

**L11-15399**

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount L11-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing / Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**L11-16627, \$82.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**L11-20302, \$25.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**L11-20251, \$87.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**L11-21353, \$29.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**L11-22120, \$30.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: L11-16629, \$19.95**

**OverSize Die: L11-16626, \$19.95**

**Plastic Funnel: L11-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

**L11-20029, \$22.95**

**RL 450 Powder Die:**

**L11-20308, \$21.95**

# RL 550B

**RL 550B DVD**  
**Instruction Manual**  
 L11-19483 \$19.95

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial Period!**

*All for ONLY...*  
**\$439<sup>95\*</sup>**

**L11-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

Total Price as pictured here with optional accessories: **\$737.60**

.45 ACP Die Set	L11-14404	\$64.95

Cartridge Case Bin/Bracket	L11-11185	\$24.95

# RL 550B ACCESSORIES

## A. RL 550B CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

L11-RL550B CON-

VERSION \$45.95 (Exotic calibers, \$55.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure L11-20782, \$76.95 ea.  
Magnum Rifle Powder Bar L11-21353, \$29.95 each  
X-Small Powder Bar L11-20780, \$29.95 each

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, L11-22058, \$103.95

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

L11-20064, \$11.35 each  
Three or more, \$10.25 ea.

X-Large Powder Die, L11-21253, \$19.95 each

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

L11-13909, \$22.95 each  
Three or more, \$20.95 ea.

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

L11-22055, \$20.95 each  
Three or more, \$18.95 ea.

## G. 1" BENCH WRENCH

L11-10842, \$7.95 each  
Two or more, \$7.10 ea.

## H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol L11-14450

Small Pistol L11-14451

\$264.95 (110v US Model)

Large Pistol L11-14453

Small Pistol L11-14454

\$274.95 (220v Euro Model)

## CASEFEEDER CALIBER CONVERSIONS (Page 17)

\$23.95 each

## K. 550 SPARE PARTS KIT

- 1 Seating Punch, Small
- 1 #10 Tinnerman Insert
- 1 Primer Cup, Large
- 1 Primer Cup, Small
- 1 Bellcrank Cube
- 3/8" Index Ball
- 1 550 Brass Tip Set Screw
- 1 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 1 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)
- 1 Seating Punch, Large
- 1 550 Index Ball Spring
- 2 Pickup Tube, Small, Yellow Tips
- 2 Magazine Orifices, Large
- 1 Toolhead Pin

## I. PRIMER FLIP TRAY

L11-13606, \$20.95 each

## J. PRIMER PICKUP TUBES

- 1 Lg. tube L11-22029 \$7.99
- 1 Sm. tube L11-22028 7.99
- 2 Sm., 2 Lg. L11-20056 23.95
- 4 Lg. tubes L11-20050 23.95
- 4 Sm. tubes L11-20049 23.95

- 2 Pickup Tube, Large, Green Tips
- 2 Magazine Orifices, Small
- 1 550 Primer Cup Spring
- 2 Retaining Clips
- 2 Dispensing Tip, Large
- 2 Dispensing Tip, Small
- 1 Failsafe Bushing Rev. B

L11-20048, \$18.95

## L. MACHINE MAINTENANCE KIT

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

Maint. Kit & RL 550B Spare Parts Kit L11-97016, \$32.95

## M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

L11-16306, \$41.95

## N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550B Cover, L11-13795, \$23.95

(O.) Master lock, L11-

13083, \$3.95

Quick-Change Cover (for use with powder measure) L11-11143, \$14.95

## P. UNIVERSAL MOUNTING HARDWARE KIT

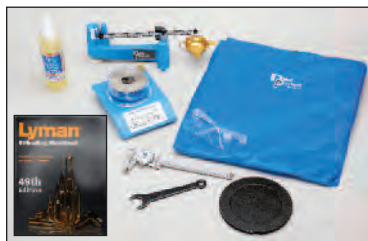

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

L11-14355, \$5.49

# Dillon Reloading Accessories

**Dillon's Reloading Accessory Package Deals** include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

SDB (Balance Beam Scale)	L11-14482	\$182.95
SDB (Electronic Scale)	L11-14483	251.95
RL 550B (Balance Beam Scale)	L11-21143	181.95
RL 550B (Electronic Scale)	L11-22117	250.95
XL 650 (Balance Beam Scale)	L11-21430	197.95
XL 650 (Electronic Scale)	L11-22118	266.95

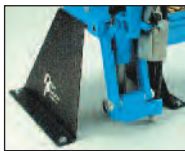

**Dillon's Toolholders** are available for your RL 550B, XL 650, SL 900, and Square Deal B, and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650/SL 900 with Wrench Set	L11-11555	\$29.95
XL 650/SL 900 w/o Wrench Set	L11-11554	18.95
RL 550 with Wrench Set	L11-11541	28.95
RL 550 w/o Wrench Set	L11-11543	17.95
Casefeed 550, with Wrench Set	L11-11540	28.95
Casefeed 550, w/o Wrench Set	L11-11542	17.95
Square Deal B with Wrench Set	L11-19441	26.95
Dipped Ball-End Hex Wrenches	L11-11483	17.95
One-Inch Bench Wrench	L11-10842	7.95
Square-Deal-Only Wrench	L11-19970	8.95

## Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	L11-22051	\$48.95
XL650-only	L11-22052	45.95
Square Deal "B"	L11-22223	64.95

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	L11-22214	\$41.95
RL 1050 Tray Kit	L11-22215	41.95

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-thirds of a grain.

Magnum Powder System  
L11-97126 \$142.95

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

L11-16306 \$41.95

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	L11-17950	\$45.95
Plastic Roller	L11-22183	40.95

**Quick-Change Cover** for use with powder measure. L11-11143 \$14.95

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

### RL 450 Upgrade Components

Frame Change	L11-20094	\$94.95
Powder Failsafe	L11-20251	87.95
Auto Prime	L11-20055	85.95
Auto Eject	L11-20002	59.95
Primer Warning	L11-20302	25.95

## Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge and Bullet Comparator

(Caliper not included)

### Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy.

Straight L11-14622 \$38.95

Curved (use for auto, lever and pump rifles) L11-14862 \$39.95

### Modified Case (required)

\$6.99 each

.223 Rem. L11-14627

.22-250 L11-14628

# Dillon's Case Preparation Equipment

**CV-2001**  
**L11-20493**  
**\$188.95**

**CV-750 L11-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator L11-20675 \$75.95**

**CM-500 Case/Media Separator L11-21045 \$47.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 L11-22047 \$213.95**

**Euro CV-750 L11-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle. **L11-13804** **\$8.95**  
Case (20 pc.) **L11-20255** **135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle **L11-13733** **\$8.95**  
Case (20 pc.) **L11-20256** **135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **L11-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **L11-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **L11-13496** **\$15.95**

This month's cover features Erin with an Armi San Marco SA revolver in .45 Colt. To see more photos of Erin and other **Blue Press** cover models, you can "follow" us on **Instagram@bluepress** on your smart phone, or go to **www.instagram.com/bluepress** and click "follow."

# Dillon's New Rapid Trim 1500 Case Trimmer <sup>23</sup>

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer Assembly **L11-62164** is **\$327.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, **L11-13141**, are **\$19.95** each. Upper lock rings, **L11-13559**, are **\$4.99** each.

## RT 1500 & 1200B Size/Trim Die Calibers

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	L11-62124	\$20.95
9mm Adaptor	L11-62168	14.95

# Packin' Dillon's Way

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

L11-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop or tablet, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, smart phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

## Mernickle Holsters' Conceal-Carry Performance Series

If Cowboy Action Shooting is your game, why not CARRY the gun you shoot the most? These holsters can be worn strong side, appendix carry or cross draw and are fully molded. Now also available for J-Frame S&Ws.

## "Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

# SAFARILAND Holsters<sup>29</sup>

**Safariland Custom Fit 567**

**Safariland Model 6377 ALS™**

## Safariland Custom Fit 567 Holsters

The Model 567 Custom Fit holster is one of the lightest, thinnest, best fitting concealment holsters available. True to its name, it adjusts to a wide variety of popular handguns, giving each a "custom fit" in this holster.

**Safariland Model 5188**

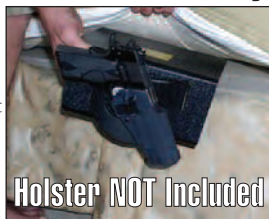

## Safariland Model 5188 Open Top Concealment Paddle Holster

This is a compact and lightweight concealment paddle holster that features an injection molded paddle design offering a comfortable, close to the body fit. IDPA approved, and with a tough STX finish.

Springfield 1911 w/Picatinny Rail L11-19451 \$39.95

## Close & Ready Bedside Holster Caddy

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

**Holster NOT Included**

L11-18046 \$29.95

## Comp-Tac: Holsters Dedicated to Your Victory

### Comp-Tac International

The International features a modular mounting system that offers the versatility of different mounting options, combining a belt holster, belt drop offset holster, paddle holster and paddle drop offset holster into one.

# 101 Classic Firearms by John Marshall <sup>33</sup>

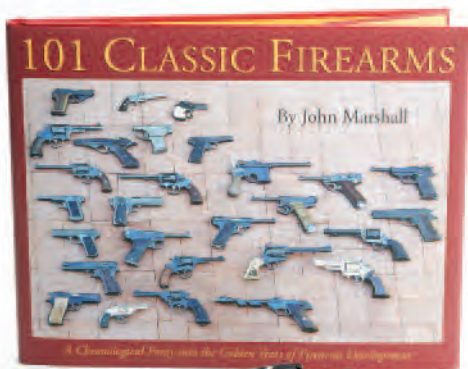

Dillon Precision announces the release of John Marshall's new book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, a compilation of the author's popular articles appearing in *The Blue Press* since 2007.

**101 Classic Firearms** is sure to be a welcome and prized addition to the library of any serious firearms aficionado.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on

some of the world's most important firearms.

About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. He is also an endowment member of the National Rifle Association.

**Price: L11-40133 \$29.95, Autographed L11-97130 \$34.95**

Scope Windage Adjustment Tool

Magazine Base Pad Tool/  
Scope Battery Cap Remover

This is a MUST-HAVE range-bag accessory. It's a squib rod (for removing stuck bullets), magazine base removal tool, and scope windage adjustment and battery cap removal tool.

L11-15250 \$12.95

# Dillon's Pistol Die Sets

## Size Die

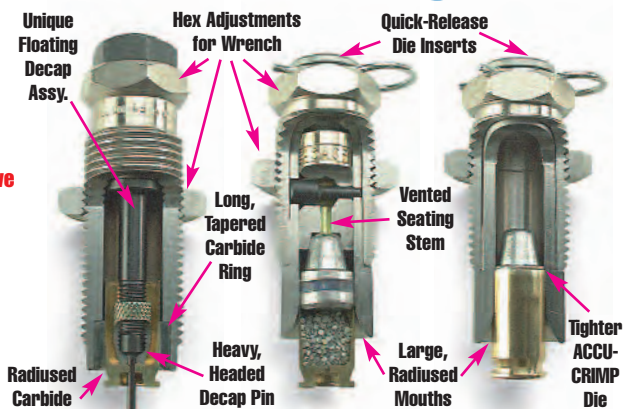

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	L11-10839	\$67.95
.308 Winchester	L11-15574	67.95
.30-06 Springfield	L11-10840	67.95

# Comp-Tac's Trojan Horse Long Gun Case 39

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Standard Trojan Horse Long Gun Case **L11-19388 \$75.00**  
 Heavy Rated Trojan Horse Gun Case **L11-16229 100.00**

## ADCO SUPER

**ATHUMB®** offers models for popular centerfire pistols and 10/22 style magazines.

**ST1** is for 9mm and .40 caliber Beretta, Browning, Ruger, SIGARMS, S&W, etc. In addition, the

**ST1** has interior rails and grooves to accommodate Colt Government magazines. **L11-18607 \$7.95**

## AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

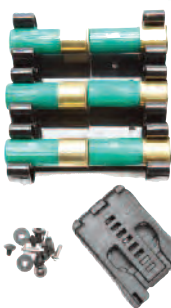

**AP Custom USA's** Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

## TACCOM, LLC Tactical and Competition Accessories

**TACCOM, LLC's** Dualload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip (included)** that can be attached at various angles. The Dualload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE	L11-19530	\$9.95
4Up w/Tek-Lok™	L11-19531	29.95
6Up w/Tek-Lok™	L11-19532	34.95

**TACCOM, LLC's** Quaload Shotshell Holder is a serious game changer! It's so radical that they are patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holer and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder	L11-19543	\$39.95
8Up Quaload Shotshell Holder	L11-19544	69.95

# CLASSIC FIREARMS: The Smith

By John Marshall

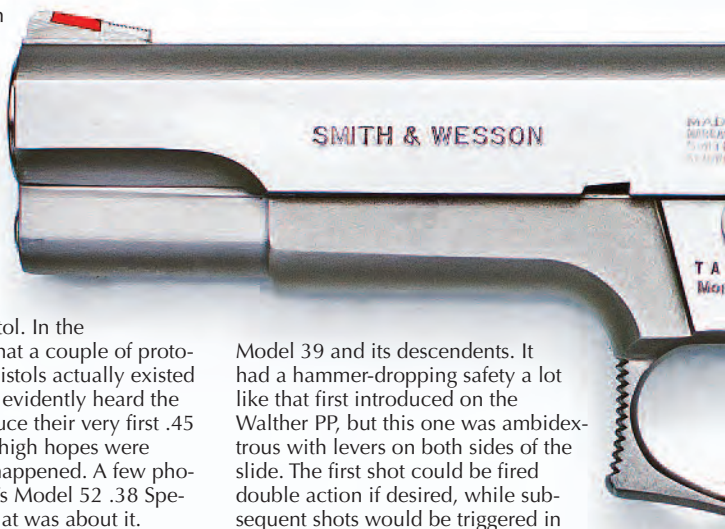

Once upon a time, not long ago, guns were made of steel. The plastic on them, if it existed at all, was confined to the grip panels. Many really robust examples of both revolvers and pistols were made to last a lifetime – maybe several lifetimes. Just to name a couple of them, the Model 1911 pistol and the S&W .357 Magnum revolver were around well before the middle of the 20th Century. Both of these guns were well regarded, and most of them are still around, functional as ever today. Back when Smith & Wesson first introduced its groundbreaking 9mm double-action Model 39 in 1954, gun writer Elmer Keith began calling for them to make a similar all-steel gun chambered for .45 ACP. He thought a scaled up Model 39 would be just the ticket as an ideal handgun for the military, the police, and civilians wanting a really effective defense gun.

Sadly, it took Smith and Wesson a number of years to begin work on just such a pistol. In the late 1960s, rumors surfaced that a couple of prototype .45 ACP double-action pistols actually existed at Smith & Wesson. They had evidently heard the call and were going to introduce their very first .45 ACP self-loader! The public's high hopes were dashed when nothing much happened. A few photos of a .45 resembling Smith's Model 52 .38 Special target gun surfaced but that was about it. Although the calls continued for a .45 double-action pistol, it was not until 1984 that the ball really got rolling at S&W in earnest.

What came out of the development shop at S&W turned out to be an enlarged version of its 9mm Model 639 stainless steel pistol. It was big and it was heavy, but tests showed that not only was it incredibly reliable, but it could handle powerful loads like the .45 Super without a problem. For the fans of .45 ACP autoloaders, Smith's first chambering in that caliber was state of the art. The only other double-action .45 ACP pistol at the time was the Sig Sauer P220 – a good gun, but very expensive to acquire and foreign made. The P220 also had an aluminum frame, a ramp in the chamber and a stamped heavy-gauge blued slide. Although it was a quality item, these were factors that did not give a lot of confidence in its reliability or longevity. Although 100 prototypes had investment cast stainless steel receivers, S&W's production guns had traditional forged receivers. This gave strength and as well as rust resistance. The cast receiver guns were later offered to S&W employees. Twenty-five guns in the first production run

were engraved as "first editions." The new gun had an externally ramped barrel with full chamber support. This made it very resistant to case blowouts when hot loads were used. An added benefit of that barrel ramp was that the gun would even feed empty cases out of the magazine – an impressive demonstration of feeding reliability. The word was out that if you could fit square bullets into the cases, that gun would feed them!

The new Model 645, announced and demonstrated in April of 1985, was a "traditional double action" hammered design, similar to the original

Model 39 and its descendents. It had a hammer-dropping safety a lot like that first introduced on the Walther PP, but this one was ambidextrous with levers on both sides of the slide. The first shot could be fired double action if desired, while subsequent shots would be triggered in

"It was well-publicized when Don Johnson 'Sonny Crockett' on the *Miami Vice*, used it conspicuously on the show's third and fourth seasons. In the fifth (and final) season, he started using its cosmetic successor, the mod-

single-action mode. The barrel was locked and unlocked with the slide by an integral cam similar to that employed on the Browning High Power pistol. Except for an aluminum backstrap, a plated

# Smith & Wesson Model 645 Pistol

tool steel hammer and high-impact plastic grip panels, the entire gun, including springs, was made of stainless steel. Even the magazine followers were stainless. Weighing in at 38 ounces, other stats included a 5" barrel and an overall length of 8.75 inches. Fixed high-visibility front and rear sights were employed. While the very early front sights had a black insert, most had the classic S&W red one. The rear sight had a white outline. A magazine safety was provided, and the gun could not be fired if the magazine was removed. There was also an automatic firing pin safety to prevent firing

era, the front of the trigger guard was recurved and grooved aggressively. This gave great purchase for those whose two-handed grip style included an index finger wrapped around the trigger guard.

Smith & Wesson's first .45 ACP autoloader was an immediate hit with the press. However, no new gun is without its perceived faults. The main one noted in reviews was that the safety lever on the right side tended to come loose from firing. A few drops of locking compound on its central screw easily and quickly took care of that. While it was admittedly heavy, its built-like-a-tank construction also gave it very manageable

recoil and made it a pleasure to shoot.

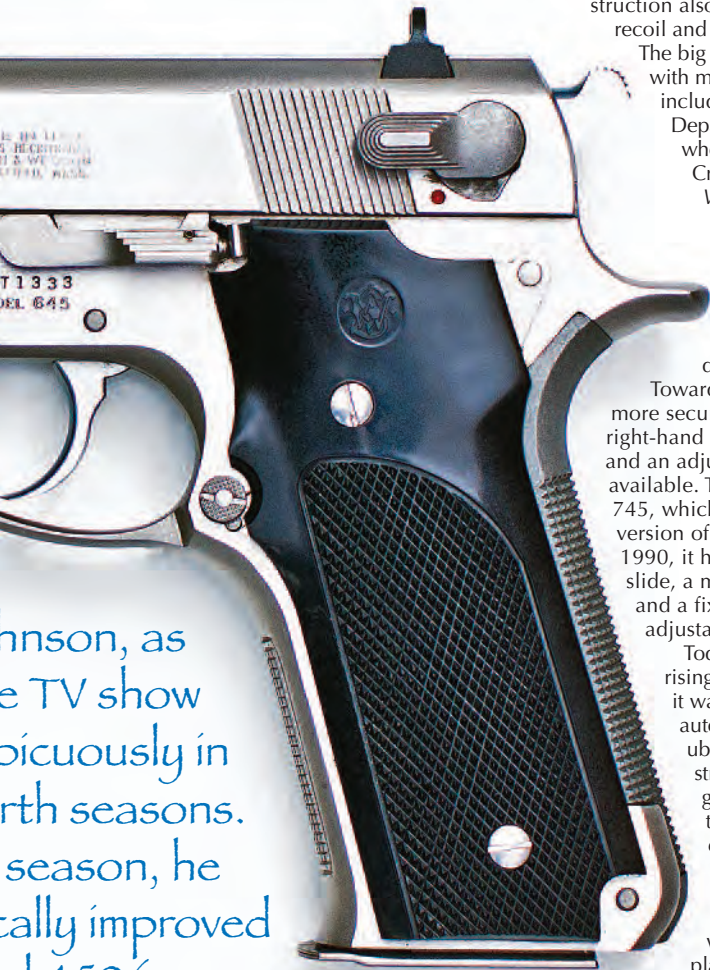

The big gun sold well and found favor with many police organizations, including the Los Angeles Police Department. It was well-publicized when Don Johnson, as "Sonny Crockett" on the TV show *Miami Vice*, used it conspicuously in the show's third and fourth seasons. In the fifth (and final) season, he started using its cosmetically improved successor, the Model 4506.

The original 645 was produced until 1988.

Towards the end of production, a more secure fastening system for the right-hand manual safety was devised, and an adjustable rear sight became available. There was a spinoff Model 745, which was a single-action target version of the 645. Built from 1986 to 1990, it had a stainless frame, a blued slide, a match barrel, walnut stocks and a fixed Novak or optional adjustable rear sight.

Today, the Model 645 is a rapidly rising collectible, not only because it was the very first S&W .45 ACP autoloader, but because it was uber-reliable and nearly indestructible. Although it has many good modern-day descendants, the original is noted for being exceptionally well built. The pistol illustrated was shipped in December of 1986. It still looks as good and works as well as the day it left the S&W plant in Springfield. There is just something about a tough steel-

framed .45 pistol that reeks of timeless quality and that makes it a pleasure to have and to use. Black polymer-framed handguns can be made cheaper and lighter, but I am yet to be convinced that "better" is a word that can be applied.

Johnson, as  
the TV show  
conspicuously in  
fourth seasons.  
In the fifth season, he  
started using its  
cosmetically improved  
Model 4506.

unless the trigger was fully to the rear. The single-stack magazine held 8 rounds, one up on the chamber, this made it a 9-shot machine. In the style of that

# 46 Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

L11-17519

\$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms. Made in the USA and comes with a lifetime warranty.

## SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

L11-21894

\$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

L11-19972

# Concealed Carry Tote<sup>47</sup>

\$45<sup>00</sup>

L11-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

## 'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

## Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

L11-19495 \$9.95

## Baschieri & Pellagri 12 Ga. Target Slug

Reduced recoil, 1200 fps  
25 per box

L11-19214 \$21.00

Streamlight's Nano Light® LED flashlight is super bright (10 lumens), can be seen a mile away, is made of virtually indestructible machined aluminum with an anodized finish, is weatherproof, nearly weightless and fits on your keychain or zipper pull tab!

L11-19942 \$11.95

# INSTINCT COMBAT SH

By Chuck Klein

**[Editor's Note:** I'm aware that "point shooting" is anathema to the "modern technique," just as I'm aware that some swear by the Weaver stance and others prefer the isosceles; and that there are IPSC/USPSA shooters, IDPA shooters, and others who believe EITHER discipline "will get you killed in the real world." However, having studied *Shooting to Live* by Fairbairn & Sykes, *Kill or Get Killed*, by Applegate, as well as Chuck's book, *Instinct Combat Shooting*, *Defensive Handgunning for Police*, I believe it's worth considering instinctive shooting as an alternative practice technique, particularly for those of us with presbyopic vision, i.e. "I can see the target or (through my bifocals) I can see the sights, but I can't see them both at the same time."]

**WARNING:** For these "Tricks" to be successful, the shooter must be practiced in the subject field and is thus advised to read the book, *Instinct Combat Shooting*, *Defensive Handgunning for Police* (Third Edition) or other publications of similar expertise.

The act of causing a bullet to impact the target where you intend is akin to throwing a baseball, dart, beanbag or other similar eye/hand/mind events. The challenges encountered while acquiring any of these skills can be overcome when instinct and practice are combined. The technique – the trick – is to not only look at the target, but to look at the smallest part of the target while devoting full concentration just before and during release of the shot/throw. This focus on the target is more than a visual knowledge of the target; it is total attention to the target-within-a-target. You don't have to stare at the target, only see it and focus on a small portion of it while the body/hand is moving to point of fire.

*INSTINCT COMBAT SHOOTING: The act of operating a HANDGUN by focusing on the target and instinctively coordinating the hand and mind to cause the HANDGUN to discharge at a time and point that ensures interception of the target with the projectile.*

In the stay-alive world, if you see the "threat" (target) advance toward you with deadly intent, you will most likely be looking at him with your undivided attention. That is not enough. Having decided to engage in a close-quarter firefight, you should – while in the process of going from that point of decision to battery – focus on a small point (button, stain, shirt pattern). This intensity of vision and concentration – at the instant just before firing – will allow your natural mental powers to coordinate the hand and trigger finger to cause the firearm to discharge at the most opportune moment.

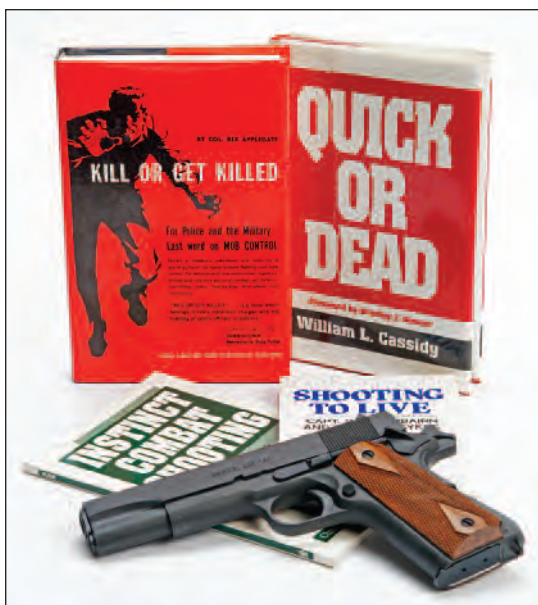

All of this needs to happen in a very small timeframe, e.g., just short of simultaneous.

- 1) See the target;
- 2) Decide to shoot;
- 3) Start the gun moving toward battery (the point where the gun is at its shooting position – usually when the support hand contacts the shooting hand);
- 4) Focus on a small target-within-the-target; and
- 5) Pull the trigger at the instant the firearm reaches battery.

Some might call this intense focus "tunnel vision." It is. Though tunnel vision has been projected as a no-no, it is mandatory during

the brief moment when you transition from deciding to shoot to the completion of that shot(s). Of course, you have to be aware of additional threats and the background (innocents), but only before the decision to shoot. Once the timeframe of decide-to-shoot to completion-of-the-shot(s) has begun, full concentration – oblivious to all else – is required. This timeframe during which you are engaged in tunnel vision is only a matter of milliseconds. Perhaps world champion racecar driver Phil Hill said it best: "True concentration is not aware of itself." (*Car and Driver*, November 1962)

Many articles, columns and books have espoused the virtues of "watching the front sight" while engaged in combat shooting. If these reports are studied closely, it is evident that the writers are, in almost all cases, relating to shooting

# OOTING – THE TRICKS 49

contests at inanimate targets. During real life/death scenarios survivors seldom have the luxury of taking their eyes off of the threat to focus (adjust point of aim) on the front sight much less seek a perfect sight picture.

Shooting for score/time during a close-quarter combat match is a recreation where the danger lies in forming negative survival skills/habits. Shooting to survive should be a self-mandate. Practice what you need to survive and save the fun stuff for your retirement years. It is my suggestion that during close-quarter police-style matches the sights be taped (covered) on all competitors' handguns. In addition, aerial targets (using paintball, Simunition or pellet/BB gun) should be included in the contests.

Timing, as they say, is everything. And in instinct shooting nothing could be more critical. This is the hard part. You can have all the basics down pat, be an expert at mechanical exercises, stare intently at a pinpoint on the target, but ignore the body/mind instinctive reflexes. Having the timing as second nature will allow hits on non-prearranged targets from non-standard body positions. It's not only about staring at the target or even the target-within-the-target. It's also about timing, e.g., a series of motions and actions where the mind's computer – from visual input – instructs the arm and trigger finger when and how to act. The mind computes much faster than the body can react. Thus, it is not necessary to stare or spend more than an instant focusing on the target-within-the-target. This is especially important if the target is moving. To be successful during a close-quarter firefight, you must be conditioned to instinctively override your pre-set want to look at the sights.

The human brain has an uncanny ability to adjust trigger pull, arm motion/angle and other related tactics – all without consciously thinking about it. That's why it is possible to hit a moving target – even with a handgun. As the eyes follow the target, the mind almost instantly computes and directs the course and speed of the firearm as it moves toward the focal point giving the trigger finger the command to act at the instant of battery. From another perspective, if the mind is forced (ingrained teaching) to focus and adjust for a sight picture, it takes more time and throws the timing off.

Another part of timing is firing the shot at the instant the gun comes to battery. If you've identified the target, decided to fire, focused on a pinpoint, but wait even an instant longer, you will have a greater chance of a miss. This is due to the

body's inability to react to the mind's change of plan in a timely manner. If the brain is instinctively conditioned to shoot when the gun reaches battery, but you consciously override this function you will not be able to readjust to the added conditions. This is because the gun is always moving. Skeet and bird hunters, who shoot instinctively, practice this technique. On the clay bird or hunting field, a shot-gunner shoots the instant his gun contacts his shoulder and cheek – his body moving with the target and eyes having locked on to the bottom edge of the target or head of the bird while the gun comes to battery.

Flash sight picture, front sight only or aimed fire defeats real-time instinct shooting. Body parts can't react to the mind's ability to make changes at the same speed. Trying to focus on a mechanical sight, look at the target, and then make a decision to adjust or not adjust the alignment takes time. In other words, in that nanosecond where:

- 1) Your eyes have picked the target-within-the-target;
- 2) Your firearm is moving toward battery;
- 3) Your mind is coordinating the exact instant to send the message to pull the trigger; if the eyes send an additional message to realign/confirm the sight picture the timing will be off and though it might only take a split second to do so, that split second could cause a miss.

*Every day as part of my exercise routine, I practice instinct combat shooting, albeit, sans a gun. With my hands in the chest ready defensive position, I begin by scanning the room. When I locate a target, I start my simulated draw while focusing on a target-within-the-target and pull-the-trigger as my hands come together at battery. On the range (I live on a 125-acre farm), I toss wood blocks out in front of me and, using a handgun, try to hit them while they're airborne. Great challenge! If you have room to try this be sure your misses and deflected hits don't go over/around the backstop.*

Just like making a pitch or basket, shooting-to-survive requires conditioned reflexes that are best accomplished by practice, commitment and familiarity with the task. However, to successfully and instinctively place your strikes/baskets/shots, the player must be conditioned to trust his or her instincts. Instinct combat shooting is not trick shooting, it's practicing the "tricks."

*Chuck Klein, an active member of IALEFI, is the author of **INSTINCT COMBAT SHOOTING, Defensive Handgunning for Police** (now in its third edition) and other police and firearm related books and articles. He may be reached through his website: [www.chuckklein.com](http://www.chuckklein.com).*

# 50 "Big Fifty Reloader"

## STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...  
**\$1019<sup>95</sup>**

*(Dies NOT Included)*

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

L11-50050, \$384.95

B.

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

L11-50075, \$869.95

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

L11-50125, \$76.95

C.

D.

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

L11-50200, \$149.95

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

L11-50001, \$299.95

### E. (1) PRIMING CONVERSION

Converts Swager to Priming System.

L11-50003, \$76.95

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

## Dillon's New Bench Wrench Fits new 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	L11-14067	\$1.35

## Sun Devil Mfg. AR-15/10 ADIGS

Sun Devil Manufacturing's Adjustable Drop In Gas System for AR-15 and AR-10 rifles allows you to adjust your rifle's gas system for best performance.

L11-19674 \$59.95

## EGW AR-15 Forward Assist Plug

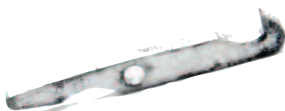

Evolution Gun Works' AR-15 Forward Assist Plug is for use on competition rifles that do not use the forward assist. It's anodized for long life, matted to match most uppers.

L11-18991 \$9.99

TACCOM's Enhanced Firing Pin for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

L11-19538 \$13.95

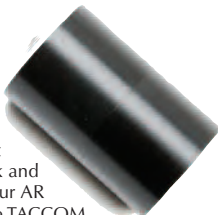

The TACCOM Extreme Extractor is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

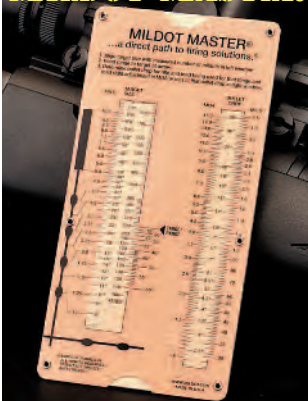

L11-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The TACCOM Pressure Plug will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

L11-19533 \$7.95

## MILDOT MASTER

You can become a master at using a Mil Dot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

Mildot Master® L11-14762 \$29.95

## The Larry™ 8 LED Pocket Work Light

The Larry™ 8 LED Pocket Work Light is the essential handyman light. 8 powerful LEDs provide 60 lumens of bright white light. The rotating magnetic clip gives you convenient hands-free lighting. The reinforced plastic body design is shock-proof and water-resistant, making the Larry™ basically indestructible.

# IDPA'S NEW COMPACT CARRY PISTOL

By Duane Thomas

IDPA has recently introduced a new division called Compact Carry Pistol (CCP). It's based on Enhanced Service Pistol (ESP) in the sense that it allows things like the various aftermarket trigger systems that are illegal in Stock Service Pistol (SSP) but legal in ESP, only the guns must be considerably smaller. Legal size will be measured by placing the gun in the "IDPA box" with a 1/4" spacer inserted into the bottom of the box to reduce box size. Barrel length may be no more than 4.1 inches.

Basically, they're limiting shooters to guns the size of the Glock 19 or smaller. The number of rounds loaded into any magazine in CCP is eight, the same as Custom Defensive Pistol (CDP). The power floor is 125,000, the same as SSP and ESP.

I was really glad to see CCP adopt the same trigger system rules as ESP, instead of the more restrictive rules of SSP. I've recently been shooting a GlockTriggers "The Edge" trigger system in my carry Glock 17, and I consider it so superior to the stock system, if I was carrying a Glock 19 instead of a 17, I guarantee you it would also have The Edge in it. The advantages there are just too large to ignore.

I am really amped about this new division. A great complaint from certain IDPA shooters over the years has been that they didn't like the people shooting what they perceived as unrealistically large handguns, instead of "the sorts of guns people really carry." CCP does away with that argument. You think it's unfair you have to shoot your Glock 19 against a guy armed with a Glock 34? Shoot CCP where the Glock 34 – the Glock 17, for that matter – is illegal.

Having said that, although I like this division a lot, and I predict it will swiftly become the most popular division in IDPA, honestly I do think its basic premise is a bit flawed. In my opinion and experience – and I am well away these are just my opinions, my experiences – (a) there are actually a lot of serious gunmen and woman carrying and concealing full-sized guns on a daily basis, (b) the full-sized guns aren't as much easier to shoot than smaller versions of the same design as a lot of people think. Or in some cases any easier, for that matter.

In Washington State where I reside, for some reason the full-size, steel frame 1911 .45 auto is a very popular carry gun. I believe it has something to do with this state's rich history in the "combat pistol" games. I have been told the Renton Fish & Game Club is one of the oldest IPSC clubs in the United States. With only single-digit exceptions, every person I have ever known in Washington State who carried a 1911 daily carried a full-size Government Model. When famous firearms instructor John Farnam taught here several years

ago, he commented, "I haven't seen this many cocked and locked 1911s in one place since the last time I visited Gunsite."

You're talking here to a guy who's just come off six years carrying a Glock 34 concealed on a daily basis (before downsizing to a Glock 17). Dur-

ing that timeframe, I did get a kick out of occasionally running into the people at an IDPA match who, when they saw me carrying a full-size gun, while they were carrying what I call a middleweight (Glock 19, SIG P228, HK P30, etc.), wanted to pull this sort of more-tactical-than-thou attitude. You'd think the person carrying the larger gun would be seen as more serious, but nooooo....

I remember having a conversation at an IDPA match with a guy who carried an HK P30 in an inside-the-waistband holster, giving me a hard time because I was carrying a Glock 34 in an on-the-belt holster. "Well," he said, "I guess it depends on what you want to get out of this. I'm doing this with my carry gun and holster." Like I cared more about winning than being "tactical," I suppose. Because, y'know, that extra 1.3" barrel length of a Glock 34 versus, say, a Glock 19 makes ALL the difference. (4.01" G19 versus 5.31" G34, according to Glock.) My reply was, "I know what I want to get out of this. I'm getting better with my carry gun. This is my carry gun, and this is how I carry it. Y'know, carrying and concealing a full-sized gun is not as hard as those who've never done it think it is."

Ah, well. I kicked his butt in the final standings, anyway. Must have been the gun, right? As a matter of fact, I think we should just all stay home and let the guns shoot the matches, and defend our lives, because the human element, how much we

The author's well-worn Glock 17, though it has given him yeoman service as a carry gun, would be illegal in Compact Carry Pistol division.

# L DIVISION "Things Just Got REAL!" 63

practice, how grooved-in we are on our equipment, how hard we've worked, obviously has nothing to do with it.

In reality, I can shoot a Glock 19 better than I can a 17 or 34. I know this because I have taken all three gun types and pitted them against each other shooting the IDPA classifier, on multiple occasions. My performance was pretty much identical with the 17 and 34. I was consistently eight seconds faster in my overall, final score with the 19. There's just something about that model

Glock, the way it feels in my hand, the way it balances, the way it points, the way it acts in recoil, that has always worked really well for me, from a shooting performance standpoint.

Having said all that, let's be realistic. Truth is, there are a lot more people carrying Glock 19s concealed than Glock 34s. CCP gives those folks a venue to compete against other shooters also armed with middleweights (i.e. guns that are essentially cut-down versions of service pistols, like the Glock 19 is basically a cut-down Glock 17), without having to compete against other people who have the perceived advantage of shooting larger, theoretically more capable weapons, no matter how illusory that perception may be.

From my very first exposure to handguns, from the time I first started handling them, this whole "a longer barrel equals greater, or at least more easily attainable, accuracy" thing has, on a basic level, never made sense to me. The first time I ever handled a 6" revolver, I hated it. It just seemed ungainly, muzzle heavy, you've got that huge, heavy tube way out there, the front sight is waving all around. It just sucked. I find shorter guns, where the weight of the gun sits further back in your hand, balance

and point and transition and, well, everything for me much better.

The only reason I don't carry a Glock 19 is that I have not, historically, had great luck with them from a standpoint of long-term durability. I know there are people who will argue with me on that, "I've got 57 million rounds through my Glock 19 and it still works fine." I'm happy for you. Seriously. But I've always figured I had to go to with my own experiences.

Maybe it's time I give the G19 another shot. It

**At one time the Commander (today commonly called the Lightweight Commander) was considered "the ultimate martial artist's carry gun." Today, realistically, that title belongs to the Glock 19. Due to barrel length rules, of the two guns in this photo, the G19 would be legal in CCP, the Commander would not.**

**Expect to see compact, 3" barreled 1911s, like this Kimber Ultra CDP II 9mm, have a presence in CCP.**

may well be that Glock was having quality control problems in the early/mid-2000s when I had the slide rails delaminate in the frame of my Glock 19 carry gun after 10,000 rounds, and every sample Glock 19 I had them send me thereafter – and it was more than one – wouldn't work worth a damn out-of-the-box. (Of course, at that time, the then-current production Glock 17s weren't working either, in my experience.) I was so soured by my previous experiences with the Glock 19 I have pretty much ignored it for the past 15 years or so, and that may not be fair.

Considering I currently have over 43,000 rounds through my Glock 34, and 25,000-plus through my Glock 17, and exactly zip reliability/durability problems with either, I'd say those earlier problems have been cured big time. I

would feel kind of silly switching at this point, given the reliability track record of my larger Glocks, and how well they're withstanding the high round count guff, but if the Glock 19 is currently up to speed...why not? Why not make it my match/carry gun? For one thing, it would allow me to be ever-so-much-more "tactical". And that is SO important.

NOTE: ".38" series cases fit .38 Super, .32-20, .30 Carbine and .30 Mouser; "9mm" series cases fit .30 Luger, 9 x 21 and .380; ".44" series cases fit .41 Mag., .44-40 and .45 Colt; and ".45" series cases fit 10 mm and .40 S&W. "Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, L11-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dewey's AR-Link Cleaning Pin

utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

# drymate™

# Bore-tips® Bore Cleaning Foam Swabs

The **drymate™** Gun Cleaning Pad protects your table and firearms from scratches and spilled cleaning fluids. Machine washable, durable, stain resistant and long lasting. Gun Cleaning Pad™ L11-11313 \$19.95

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (thinking fast), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

## Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar steel stock and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless L11-18600 \$49.99  
Blued L11-18601 49.99

California Competition Works' Magazine Storage Sleeves make it easy to organize your pistol magazines. The optional I.D. Tag/Hanger makes it less likely that you'll show up at a match with the WRONG magazines!

Four-Magazine Storage Sleeve L11-19226 \$14.95  
Six-Magazine Storage Sleeve L11-19227 17.95  
Magazine Sleeve I.D. Tag/Hanger L11-19476 1.95

## Adjustable Target Sight for 1911s

This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Pistol Sight L11-18210 \$53.95

Secure Firearms Products' Universal Spring Tester will help you determine if the recoil spring in your pistol needs replacing, and you'll save time and money by testing and organizing loose recoil springs in your shooting bag.

Recoil Spring Tester L11-15305 \$39.95

MAGPUL 1911 Grip Panels feature reinforced polymer construction and a unique diamond-shaped cross section to prevent twisting in the hand. They also have an aggressive mag-release cut out and are compatible with ambidextrous safeties.

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

 B. Rifle Rest **L11-10883 49.95**  
 C. Std. Front Bag **L11-10881 22.95**  
 D. Rear Bag **L11-10882 26.95**

\*Sand not included.

## The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

L11-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

L11-15384 \$29.95

# TARAN TACTICAL INNOVATIONS

The **TTI Magazine Extension** for MagPul AR-15 5.56 PMAGs is constructed of machined aluminum.

L11-15770 \$39.99

The **TTI Benelli Extended AccuGuide Carrier** is the first extended carrier ever manufactured from one solid piece of SAE 304 Stainless Steel, which eliminates the need for welding. It is heat-treated and polished, providing optimal performance. The Carrier features an extended guided rail on each side to assist in centering the round while reloading. It will provide you the speed and comfort of not having your thumb torn up after reloading. Compatible with: Benelli M1/M2/M3/SBE, Versamax.

## Adjustable M1/M1A Gas Systems

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot. TRS-25 **L11-11643** **\$89.95**

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

*Sorry, the optic pictured here is NOT included with the Scout Scope Mount.*

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **L11-25374** **\$79.99**  
Scout Scope Mount for SKS Rifle **L11-25373** **78.99**

## Winchester Twist Leg Bi-Pod

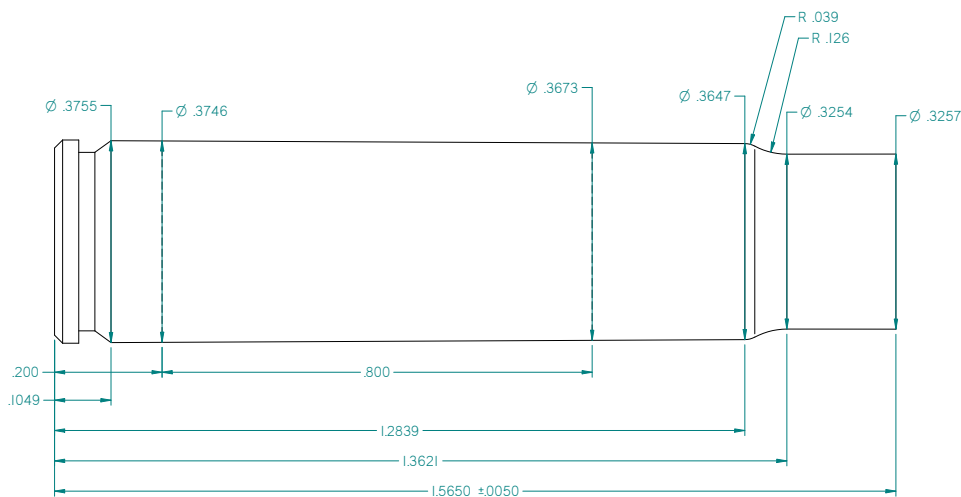

Winchester's Twist Leg Bi-Pod is

compact, light-weight, easily attaches to your rifle's sling swivel stud, and features twist lock legs for unshakeable prone and bench shooting. Legs adjust from 7.5" to 11.75" height.

**L11-19671** **\$29.95**

# THE WILSON 7.6

The above drawing of the 7.62x40 Wilson Tactical cartridge is available for download on Wilson Combat's website, [www.wilsoncombat.com/new/762x40WT-cartridge-case.pdf](http://www.wilsoncombat.com/new/762x40WT-cartridge-case.pdf).

## By Mark Pixler and Tim Richards

Now that I'm a born-again AR fan, sitting on the front pew in the Amen corner of the 7.62x40 WT congregation, I'm here to preach the gospel of this not-really-all-that-new cartridge. In Part One, I mentioned that Wilson Combat introduced the cartridge in 2011 and their website credits Kurt Buchert for the early 7.62x40 development work. In short, I think it's one hell of a cartridge that punches WELL above its weight, and my thanks to both Mr. Buchert and Mr. Wilson for giving me a reason to love the AR!

To me, the really "Good News" about the 7.62x40 is that the parent case – the 5.56x45 NATO – is both comparatively cheap and readily available. Making cases amounts to trimming the 5.56 case to 1.560" and then re-sizing it to .30 caliber. There are any number of ways to accomplish this, but the simplest one, according to Bill Wilson, is to use a 2" Mini Bench Top Cut-Off Saw (available for about \$33 at your local Harbor Freight store) to make the initial cut, then run the case through the Hornady size die custom made for Wilson Combat. The tapered expander on the Hornady die opens up the case in one operation. Once sized, the overall case length should be 1.565" and if necessary, final trimming can be done with any case trimmer.

My preferred method for making the case, naturally, is going to include the Dillon Rapid Trim 1500 Case Trimmer. As of yet, Dillon isn't tooled up to make trim dies for the 7.62x40, but the folks at CH4D make trim dies designed to work with our Case Trimmer. Dave, the owner, was nice enough to send trim dies to use for our project. In addition, CH4D makes a file trim die and reload-

ing dies for the 7.62x40, and just about any other cartridge you can imagine!

With the help of our engineering department, Tim and I plan to set up an old RL 1050 to process a bulk quantity of brass for the project.

According to the data Wilson Combat has published on its site, Accurate 1680 appears to be THE powder for this particular cartridge. The folks at Western Powders sent me a pound of 1680 to try, and Tim has purchased an eight-pound container of military surplus 680 – a powder with similar burn-rate characteristics.

Tim is experimenting with various projectiles weighing from 150 to 180 grains in his quest to make IPSC/3-Gun major power factor, while I'm focusing on 110-grain projectiles – Hornady 110-grain V-MAX® projectiles to be exact. Using the data on the Wilson Combat website, it should be easy to come up with a load starting at 2269 fps (with a maximum of about 2534 fps) using the 110 grainers and Accurate 1680. Since I'm not looking to make any particular power factor, the most accurate load I can find within that velocity range will work just fine.

The folks at Wilson Combat sent me some of their factory loads with 125-grain Sierra Pro-Hunter, Speer TNT, and Nosler Ballistic Tip projectiles. We fired all three loads over Tim's chronograph and found that Wilson's listed velocities were – shall we say – conservative.

For example, the Sierra Pro-Hunter load was listed on the box to be 2350 fps out of a 16" barrel. Over Tim's chrono, five shots averaged 2474 fps out of the 16" barrel on the rifle Wilson Combat sent me for testing, with the fastest being 2496 and the slowest being 2438 fps.

# 2X40 WT, PART 2 <sup>79</sup>

**"Making a case for the 7.62x40 WT."** (1.) Start with a once-fired 5.56x45 NATO cartridge case (left), (2.) trim it to length in a size/trim die, (3.) expand the neck, (4.) charge with powder and seat a projectile. (5.) Once the cartridge has been fired, it fireforms to the rifle chamber (note that the shoulder is a bit more well-defined in the cartridge case to the right) and will hold approximately one more grain of propellant.

The Speer TNT load was similar in that the listed velocity on the box was 2400 fps out of a 16" barrel and the average for five shots was 2491 fps, and the extremes were 2411 and 2524 fps respectively.

Finally, the Nosler Ballistic Tip load was listed on the box at 2350 fps out of a 16" barrel and five shots over the chrono averaged 2443 fps, with 2437 and 2452 fps on each end.

My guess is that either the chronographs were calibrated differently, or the elevation/temperature/barometric pressure differences between Arkansas and Arizona are significant enough to account for the differences. I will say that the primers were just a bit flat on the rounds we fired.

Wilson has chosen to offer factory loads with and reloading data for 110- or 125-grain projectiles, however Tim was able to obtain some data from Western Powders that included supersonic loads for 110-, 125-, 150- and 168-grain projectiles. There is also data available for subsonic loads with 210-, 220- and 230-grain projectiles, but you'll need the typical 1:8" twist common with .300 AAC Blackout barrels to utilize that data. Wilson Combat's 7.62x40 barrels have either a 1:12" or 1:11" twist (depending on the manufacturer) in order to stabilize supersonic projectiles.

As to the effectiveness of the cartridge as a hunting round, the following statement is posted on the Wilson Combat website: "A LOT of Texas feral hogs, whitetail deer and predators lost their lives testing the terminal performance of this cartridge! The 7.62x40 WT has proven to be a VERY efficient killer on medium-sized game with the 110-grain Barnes TTSX, 125-grain Nosler Ballistic

**"There's no replacement for displacement."** A comparison of the case-capacity potential between the 7.62x40 WT (left) and the .300 AAC Blackout.

Having heard the reports that a .300 AAC Blackout cartridge can fit in a 5.56x45 chamber, we tried it with the 7.62x40 and it's a "no-go." The dent in the projectile (arrow above) is the result of our attempts. The bolt would NOT close.

Hunter and the 125-grain Sierra Pro Hunter. Any of these three bullets perform admirably on deer and hogs under 150 pounds or so, but we recommend the 110-grain Barnes TTSX for large hogs. The 110-grain Sierra HP is a great bullet in the 7.62x40 WT for varmints and predators, and has proven to be one of the most accurate bullets."

Tim has been working on load development using the following propellants: Accurate LT-32, 1680, 2200, 2230 and 5744; Hodgdon 4198; and surplus 680 from Thunderbird Cartridge Company, Inc. (TCCI, [www.tbirdammo.com](http://www.tbirdammo.com)). Projectiles include Hornady's 110-grain V-MAX, 150-grain FMJBT; Remington's 150-grain and 180-grain Core-Lokt; and Sierra's 168-grain MatchKing. Primers include Wolf, Remington No. 6-1/2, Sellier & Bellot, and CCI 450 Small Rifle Magnum.

By projectile, Tim's results for highest average velocities achieved per load are summarized as follows (sorry, we can't list powder-charge weights):

#### **Hornady 110-grain V-MAX**

Accurate 2200 – 2259 fps

Accurate 5744 – 2440 fps, 2486 fps, 2565 fps (compressed load, no pressure signs w/CCI 450 primers)

#### **Hornady 150-grain FMJBT**

Accurate LT-32 – 1976 fps (compressed load, low pressure)

Accurate 1680 – 2242 fps\*, 2321 fps\* (\*flat primers, some cratering), 2342 fps (no pressure signs w/CCI 450 primers)

Accurate 2200 – 1934 fps, 2004 fps, 2078 fps (mild loads), 2114 fps, 2176 fps (standard primers, no pressure signs), 2231 fps (S&B primers)

Note the tapered expander.

Wilson Combat has Hornady manufacture Custom Series New Dimension™ Dies for their 7.62x40 WT cartridge, and we have a limited number of sets available, Part # L11-00300, for \$79.95. Wilson Combat's 7.62x40 WT Cartridge Case Gage (inset), Part # L11-00301, is also available for \$32.95.

Accurate 2230 – 1882 fps, 1908 fps (mild loads)  
 Accurate 5744 – 2147 fps, 2249 fps, 2329 fps\*  
 (\*blown out primers), 2238 fps, 2282 fps (no pressure signs w/CCI 450 primers)  
 Hodgdon 4198 – 2100 fps (compressed load, normal pressure), 2152 fps (very compressed load)

TCCI 680 – 2267 fps (no pressure signs w/CCI 450 primers)

### Remington 150-grain Core-Lokt

TCCI 680 – 2202 fps (no pressure signs w/CCI 450 primers)

### Sierra 168-grain MatchKing

AA1680 – 1910 fps, 1971 fps (normal primer),  
 2011 fps, 2085 fps (very compressed load)  
 AA2200 – 1934 fps, 2004 fps, 2078 fps (mild loads)

### Remington 180-grain Core-Lokt

AA1680 – 1977 fps (no pressure signs w/CCI 450 primers)

Has Tim "made major?" Nope. But he's not quite ready to give up. Stay tuned.

## XTECH TACTICAL ADJUSTABLE TACTICAL GRIP

17° Angle

25° Angle

33° Angle

When XTech Tactical's design team set out to create the most comfortable AR15 grip they looked at it from every angle. The resulting ATG (Adjustable Tactical Grip) is the new standard for comfort in the industry. Not only does its shape contribute to comfort, so does its position. The team studied the firearms market for standout grips both outside and within the AR platform.

# New From Dillon:

## Square Deal B Toolhead Stand

**H**olds your SDB toolhead, powder measure, dies and caliber conversion components (not included) in an orderly manner.

**L11-62225**  
**\$24.95**

## Super 1050/RL 1050 Short Trim Die Toolhead

**F**or short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too

thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the 1050 toolhead stand is not included.)

**L11-62219**  
**\$224.95**

## Evolution Gun Works Chamber Checkers

**S**peed up the round-checking process when you're getting ready for a match! EGW uses actual Clymer chamber reamers to produce its chamber checkers.

## "Competition Reloading With Brian Enos"

**C**ompetition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

# RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

# Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	L11-19220	\$34.95
