THE RUGER® BX-25®

GENUINE RUGER® FACTORY MAGAZINE

We've Taken a **NEW ANGLE** on the 25-Round 10/22® Magazine.

The Ruger® BX-25® magazine offers all of the rimfire autoloading reliability of the original Ruger® rotary magazine, the gold standard in rimfire autoloading magazines. The BX-25® is designed to present cartridges into the action at a 30° angle, the same way the 10/22® action is designed to accept them, increasing feed reliability. BX-25® magazines work with any factory original .22 LR Ruger 77/22® Rifle, 10/22® Rifle, SR-22® Rifle and Ruger American Rimfire® Rifle.

Stainless steel feed lips are designed to present cartridges into the action at a 30° angle for better feed reliability.

Stainless steel, constant-force spring provides feed consistency round after round.

Easily disassembled for cleaning by removing two stainless steel screws.

Anti-tilt follower is injection molded from a high lubricity polyacetal for consistent reliability.

Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I just finished reassembling my XL 650 powder measure. I Much to my consternation, it had been throwing some very erratic and light charges. It usually is spot-on for the Winchester 231 loads I use in my .45 ACP, but suddenly, the charges were very erratic. I made sure the powder bag was moving all the way to the rear, then all the way forward. I took the powder measure off the toolhead, thinking maybe the powder funnel was plugged up. It wasn't. I poured the powder into a jar so I could work the mechanism a few times. It worked fine. I looked inside the hopper. No obstructions, nothing in the hopper. Baffled, I started to pour the powder back into the hopper, and discovered a .45 ACP case in the powder. When I start loading, I throw a few charges and weigh them, pour the powder back into the hopper. If I find a bad case that I missed on inspection, I dump the powder from it back into the hopper. Being basically a lazy guy, I don't put the lid back on the powder hopper until I finish the loading session. At some time, when I refilled my casefeeder, one case bounced out and landed unnoticed in the powder hopper. It took a while for the powder to empty out, and for the case to move to the bottom, where it interrupted the flow of powder into the powder bar. It's a good idea to keep that lid on the powder hopper!

Warner Dixon - wdixon@cableone.net

I thought "1899: Grandpa Dillon Pulls the Lion's Tail" by B.D. Dillon, was an excellent and well-written article. I enjoyed it and learned a lot. I'll have to get more info on that time in history.

Thanks - pseverson@kc.rr.com

Nearly 20 years have passed since I was actively reloading ammunition. Life got busy and I had a family. I recently decided to begin reloading again and bought what I thought was a new-in-the-box Dillon RL550B. I ordered some quick-change kits and discovered that the new powder measures were different than what came with my kit. I called your customer service and was met with a very educated person who took the time to educate me and help me understand what I had and what had changed. I didn't feel rushed or stupid. In addition, the customer service rep on the other end offered to send me the parts to update my machine at no cost. The parts arrived today and I am so completely blown away by the high-quality service and employees you have. Although I started with a competitor's machine 20 years ago, I am most certainly a Dillon customer for life. Please tell Mr. Boyd thank you!

Which Dillon is Right for YOU?

Page 8

SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

SUPER 1050

Our commercial-grade reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

When Size Matters.

Reviewed by Peter Caroline

Sometimes less is more. In the case of your Everyday Carry Gun, the less your gun weighs, and the less conspicuous, the more likely you are to carry it. The problem with that theorem is, the smaller and lighter the gun, the more likely it is to be chambered for a round that will be less effective in deterring a potential threat. There are exceptions, such as the late and unlamented Downsizer WSP, a tiny .45 ACP single shot that was equally destructive on both ends, and the new Taurus View.

I first saw the View at the 2014 SHOT Show, and my first reaction was, "Are they [redacted] serious?" Here was a .38 Special revolver weighing just a bit more than 9 ounces, with a 1-1/4" barrel and a grip slightly larger than my thumb. It had a matte stainless finish, titanium barrel and cylinder, with a chrome-like trigger and thumb piece, and a gold-finished spurless hammer. The extractor rod protrudes about 1/4" from the front of the cylinder crane. Adding to the entertainment value was a transparent Lexan® sideplate, so you could watch the inner parts at work, presumably while you weren't trying to shoot at something.

Because the gun was tethered to the display table by a strong wire, I couldn't determine how it would feel in my pocket, but it was certainly small and light enough to be suitable for summer carry. The question was, how would it shoot? I ordered a

writer's sample, and waited several months.

When the View arrived, I showed it to my wife. Sally is not into pocket guns. Her house gun is a Taurus Judge, which she shoots very well indeed. "You're going to shoot this?" she asked. Of course, that's what I do. And I'm still here to tell of it. I checked my current inventory of .38 Special ammo, and selected one box each of Remington Target 148-grain TMWC Match, Remington .38 Special 158-grain lead RN and some handloads with 3.0 grains of Bullseye behind 148-grain lead HBWC bullets, seated flush. This is a target load that I've used successfully over the years for my S&W Model 52 semiauto pistol.

I drove out to my improvised range in the desert, and set up an NRA Police Silhouette target at 10 yards. After filling the 5-round cylinder with Remington Target 148-grain wadcutter, I took a firm grip on the View, extended my arms and immediately noticed that the front sight naturally pointed quite a bit higher than the top of the rear sight. I had to make a conscious effort to bring the front sight down to a normal sight picture. The DAO trigger pull is long and smooth and beyond the range of my 8-lb. trigger pull scale...I'd guess about 10 or 11 lbs. Much to my surprise, the recoil was not bothersome. The main challenge was to maintain the correct sight alignment, because the gun tends to point high, at least in my hands. The 148-grain HBWC handloads per-

Taurus Model #85VTA .38 Special View ¹¹

formed exactly the same. Groups were 3"-5" off-hand, and recoil was moderate. Next, I fired the Remington 158-grain lead RN, which was the everyday police duty load for many years. It was exceedingly unpleasant, and five rounds were more than enough. The stubby extractor rod did a surprisingly effective job of punching out the empties. Even with the fixed sights lined up properly, however, the gun shot about 6" high regardless of ammo selection. A higher front sight might be a good idea.

Now...a note of caution. The Taurus instruction manual states that the Model 85, which includes the View, should use only standard .38 Special ammunition, not +P. The spec page in the 2014 Taurus product catalog, however, rates the View as +P. Believe the instruction manual, and avoid +P. Your hands and your nervous system will thank you.

The View has a slight righthand bias. The grip

frame appears to be canted vertically almost imperceptibly to the left, and the righthand grip has more of a swell than the one on the left. This was apparently done to contour the gun more closely to the body for righthand carry.

Judging from the promotional photos, the View was intended primarily for a female market. It is extremely light, and definitely the most concealable .38 Special revolver on the market. That's the plus side. On the minus side, loads more potent than the 148-grain target loads produce a level of recoil that will discourage practice. Taurus might well consider offering their excellent Ribber Grip® as an option.

The Taurus View is available in matte stainless finish or pink. MSRP is \$599, but real-world

prices will be less.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K82-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K82-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

RL 450 Powder Die:

K82-20308, \$21.95

RL 550B

STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty

All for ONLY...
\$439^{95*}

K82-14261

Square Deal B with Wrench Set	K82-19441	26.95
Dipped Ball-End Hex Wrenches	K82-11483	17.95
One-Inch Bench Wrench	K82-10842	7.95
Square-Deal-Only Wrench	K82-19970	8.95

Dillon's Strong Mounts

increase your machine's "footprint" to over 10",

spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL650	K82-22051	\$48.95
XL650-only	K82-22052	45.95
Square Deal "B"	K82-22223	64.95

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050.

Bullet Tray Kit	K82-22214	\$41.95
RL 1050 Tray Kit	K82-22215	41.95

Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-thirds of a grain.

Magnum Powder System
K82-97126 \$142.95

Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

K82-16306 \$41.95

Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Alum. Roller	K82-17950	\$45.95
Plastic Roller	K82-22183	40.95

Quick-Change Cover for use with powder measure. **K82-11143 \$14.95**

With Dillon's RL 450 Upgrade components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550B!

Dillon's Case Preparation Equipment

CV-2001
K82-20493
\$188.95

CV-750 K82-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K82-20675 \$73.95

CM-500 Case/Media Separator K82-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K82-22047 \$213.95

Euro CV-750 K82-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K82-13804** **\$8.95**
Case (20 pc.) **K82-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **K82-13733** **\$8.95**
Case (20 pc.) **K82-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **K82-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag **K82-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag **K82-13496** **\$15.95**

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport - and no more - so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

 Mag Pouch **K82-19946** 44.95

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with

a quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K82-22080** is \$267.95. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below). Replacement carbide cutting blades, **K82-13141**, are \$19.95 each. Upper lock rings, **K82-13559**, are \$4.99 each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K82-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

Dillon's Pistol Die Sets

Size Die

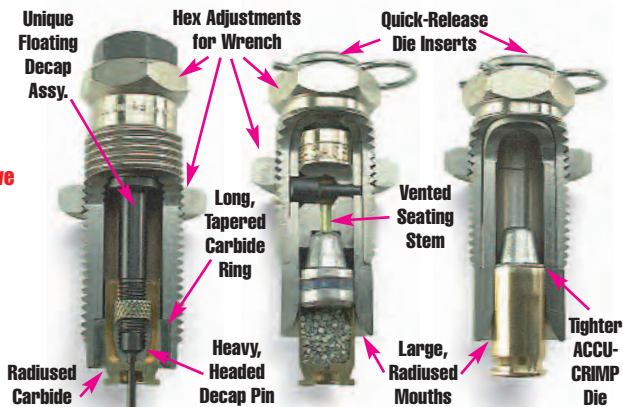

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

"Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, K82-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use.

Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Feeding Three

37

By Chris Cerino

I'm relatively new to reloading – at least when it comes to reloading metallic cartridges. When I was a young man, I loaded 12 Gauge shells like crazy on a single-stage press in my parents' basement. Sporting clays had just arrived on the scene and I was shooting every chance I got. Back then, being single and young, it was hard to spring for four or five boxes of double As every weekend, so I had to learn to be resourceful. Reloading was easy and substantially less expensive. These days it seems so many manufacturers are making affordable shotshells that I don't believe you could load them for that cost. Especially after you figure in your time to do it.

My time of shooting sporting clays has passed. Now that I'm older, I've moved on to more expensive hobbies, like shooting 3-gun. A round of sporting clays was 50 shotshells, maybe one or two more if necessary. At the time, that seemed like a lot. A weekend of 3-gun requires substantially more, and I don't just mean shotshells.

When I speak of high-round-count 3-gun matches, I'm not talking about a small club match held in shooting bays. Those matches are fun no doubt, but there are not many near my home. I'm speaking of the matches 3 Gun Nation is made of: Pro series, Regional series and those larger matches that qualify or are similar. We're talking 150 shotshells, including buckshot and slugs. Then there are the 200 rifle rounds and 250 pistol rounds between steel and paper targets. That count is only correct if you get all your hits the first time. Generally, you take the round count for a match and add 25 percent of what they tell you to bring. So that 200 rifle rounds turns out to be 250 and possibly more!

For me, 3-gun has been a great sport. As a trainer, law enforcement officer and marksman, it offers a lot. As a grown man with enough jobs to pay for the habit, it works for me. That was until "The Great Ammo Panic of 2013." Ammo became a scarce commodity. Even if you could find it, the price made you cringe. Shooting sports definitely suffered. Especially 3-gun. I for one can tell you that I was planning on more first round hits to save on ammunition costs.

You think the ammo panic was bad for my ammo availability and costs? It got worse. My 16-year-old son, Colton, has always shot with me when he could. A match here, a match there, but not every one I shot. He came when his school schedule allowed. That alone, doubled what I would take to a match. A respected junior shooter, Colton began to shoot more and more with me. It really ramped up when his mother – my wife Michelle – started shooting 3-gun. How do you feed three?

Shotshells are not an issue this day and age, but .223 Remington and 9mm Luger are hard to get. It looked like we'd have to try reloading.

My wife has often used the quote, "I wish today I had the bread I once gave away," on me several times through the years, but never with shooting sports in mind. Over the years, as a trainer, I have watched tens of thousands of pieces of once-fired, factory brass left on range, swept into buckets and

traded, or just thrown away. Never did I think I'd regret letting that brass be wasted. You have no idea how much Federal Gold Match brass I have seen left lying in the gravel – enough to make me sick these days! Collecting brass the last couple years has not been easy, but I have amassed a substantial amount.

The past couple years I've tried to become a "reloader" and it hasn't been easy. There are many machines on the market. Unfortunately, human nature is to find the best deal, or the cheapest machine to meet (what you think are) your needs. We had three machines in our basement set up

to load metallic cases, none of which were very much fun or relaxing to use. I'd been satisfied with those machines until a co-worker purchased a Dillon Super 1050. Watching him load round after perfect round – effortlessly – made me wonder, "What's MY time worth?" I was jealous of that machine clicking like a fine Swiss watch and spitting out rounds that looked like jewelry.

Now, my mission was to get a Dillon and actually learn how to use it. Even my wife wanted in on this deal! She had never liked the idea of reloading and had no desire to do it, but after seeing the Dillon and all that brass we had socked away in the basement, she was ready to try. She's so frugal that the idea of it actually got her a little excited. After all, she knows how we go through ammo.

We've since acquired two Dillon Reloading machines. One brand-spanking-new Super 1050 and one heavily used XL 650. Both of which are in the process of being set up and dedicated to .223 Remington and 9mm Luger. We're going to start reloading like rabbits in the near future. So, watch for a full report on what it's like to set up, configure and load for your favorite rounds using the 1050 and the 650. That 650, by the way, cleaned up like new. We converted it from .40 S&W to 9mm Luger. Both machines will soon be ready to start pumping out 3-gun life's blood.

**Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.*

AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

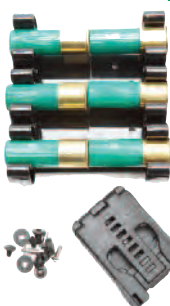

AP Custom USA's Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of a two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

TACCOM, LLC Tactical and Competition Accessories

TACCOM, LLC's Duaload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a BLADETECH Tek-Lok™ Universal Belt Clip (included) that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE	K82-19530	\$9.95
4Up w/Tek-Lok™	K82-19531	29.95
6Up w/Tek-Lok™	K82-19532	34.95

TACCOM, LLC's Quaload Shotshell Holder is a serious game changer! It's so radical that they're patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shells come out of the holder and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder	K82-19543	\$39.95
8Up Quaload Shotshell Holder	K82-19544	69.95

A close-up photograph of several brass bullet casing heads, arranged in a cluster. The casings are illuminated with a strong red light, creating a dramatic, high-contrast effect. The focus is sharp on the central casing, showing its primer and the texture of the brass. The background is blurred, showing more casings in the same red glow.

CLASSIC FIREARMS: The

By John Marshall

The Savage Model 99 rifle, the design of which had its beginnings back in 1892, was produced with very few changes for nearly 100 years. It has been described as one of the finest running game rifles ever produced. It was one of only two lever actions designed around the turn of the 20th Century that could accommodate spitzer (pointed) bullets. It was hammerless, giving a very fast ignition time, and it was way less prone to catching on clothing or brush. Unlike its only spitzer-usable lever-action competitor at the time, the Winchester Model 1895, there was no projecting magazine to complicate fast handling, portability and balance. Its cock-on-closing action made for fast, slick operation. A novel feature was a built-in cartridge counter that showed the number of rounds remaining in its internal rotary magazine. It even had an indicator that showed when the action was cocked. These were all very modern features for a rifle of that era. Over one million were produced, and even years after manufacture finally ceased in 1998, these rifles will still be found in the hunting fields and treasured by their owners. They are also increasingly popular as valued collector items.

The story of the Model 99 has to begin with its inventor, Arthur William Savage. His life story is so incredible that it would make a terrific adventure novel. Born on May 13th, 1857, to Welsh parents in Jamaica, young Arthur studied in England, and later joined his mother in Baltimore, Maryland. There, he had his first glimpse of the opportunities for achievement possible in the United States. His mother then moved to Glasgow, Scotland, where 16-year-old Arthur sadly lost her to complications from minor surgery. He then moved in with an uncle in London to study art. Hearing a Charles Darwin lecture about the wonders of the natural world, he talked his uncle into getting him passage to see Australia. While there, he actually lived with a band of aborigines for a couple of years. After returning to his own people, Arthur married and fathered eight children. The family then moved to England, and then back to Jamaica, where Arthur managed a banana plantation. In

1886, bored with this life, he and his family moved to New York, where he took employment with a patents publisher. Inspired by this environment, Arthur showed a talent on his own for inventing. He designed a falling-block rifle with a tubular magazine and submitted it to the British government for trials, but it lost to the Lee bolt action. He sold the patent to Hartley & Graham, and with the \$10,000 proceeds, he moved to Utica, New York, to manage a railroad and then a streetcar line in Saratoga Springs. In his free time he designed a new military rifle with an 8-round rotary magazine. Two prototypes were made by Colt and submitted to U.S. Army trials in 1892, where his rifle lost to the Krag-Jorgensen system. It was felt that the rifle submitted was too slow to load and would require too much space to operate the lever for a military arm. Undeterred, Savage formed the Savage Repeating Arms Company in 1894 and contracted with Marlin to produce what was known as the Savage Model 1895. With its enclosed action, rotary 5-shot magazine and obvious advantages over tubular magazine lever actions, it sold well on the sporting market for four years. Savage then decided to open his own manufacturing facility, and upgraded the rifle with minor improvements to the Model 1899, which subsequently was known as the Model 99.

Ever the restless adventurer, Savage sold at least part of his interest in the company in 1905. He moved to California and dabbled in orange growing. Then, in 1911, he patented a radial tire in San Diego and formed the Savage Tire Company, selling it in 1919, about the time his wife died. Still fascinated with guns in this time period, he formed a new gun company in 1917 with his son, Arthur John Savage – the A.J. Savage Company. It is best known for producing a quantity of Model 1911 .45 automatic slides that were eventually used on reworked 1911 pistols. Arthur then involved himself with oil drilling, gold mining, and pipe, brick, and tile manufacture. He also found time to manage the San Gabriel Water Company. His incredibly active and productive life came to a sad end when, after being diagnosed with a painful and terminal form of cancer, he committed suicide on September 22, 1938 with a single pistol shot. He was 81.

Savage Model 99 Rifle

“The Savage 99 was an enduring design, but sadly, it may never be re-introduced.”

The name of the company was changed in 1917 to the Savage Arms Corporation. Arthur Savage's Model 99 continued to be manufactured way beyond the time he left the company he founded. The cocking indicator was changed from a hinged bar at the front of the breech bolt to a small pin on the tang of the receiver, which could be felt or seen easily. While the initial cartridge for which it was chambered was the .303 Savage (virtually a .30-30 clone), subsequent chamberings included but were not limited to .30-30, .25-35, .32-40, .38-55, .300 Savage, .22 High-Power, .250-3000, .308 Winchester, .243, .358, .284, .250 Savage, 7mm-08, and .375. In 1922, .410 shotgun barrels were offered for takedown models. These were discontinued in 1934.

As originally designed, the Model 99 ejects its shells to the right side, which makes it particularly suitable for scope mounting. By the same token, most were not drilled and tapped for scope mounts until the late 1950s. The rifle illustrated here was made in 1951 in Chicopee Falls, Massachusetts. It has an open folding rear sight on the barrel, and mounting holes for a tang peep sight if desired. With a 24" barrel, it's chambered for the .300 Savage, a 1920 design that almost rivaled the .30-06 in power. This was an efficient and popular choice that eventually was modified to become the .308 Winchester cartridge. With a rounded receiver bottom to accommodate the rotary magazine, the rifle grasps easily and naturally there, as that is also the balance point. This accounts for so many receivers where the bluing is faded underneath. The lever itself is almost always case hardened, and its mottled colors make for a nice contrast with the other blued parts. The sliding safety is just behind the trigger on the right side, and locks the lever in place as well as blocking the trigger from functioning. The rotary magazine follower with its built-in cartridge counter numbers was originally made of brass, then aluminum due to brass shortage during WWII, and then steel on a random basis. Some can be found casehardened. The receiver and action was lengthened in the 1950s at approximately serial number 900,000 so as to accept the longer cartridges in the .308 family. The millionth 99 came off the line in 1960.

Many standard pre-war and post-war models were offered, each with slightly different configurations of barrels, stocks, checkering, buttplates, and

finish. Almost all had letter designations; for example, the rifle illustrated was built on the "EG" pattern, which was the longest running. Quite a number were factory engraved. In 1960, the model F marked the introduction of a tang-mounted safety. The legendary rotary magazine gave way to a removable staggered-stack 3- or 4-round magazine in 1965. This was the Model 99C.

It's very hard to pin down a manufacturing date on any particular 99. Rifles were seldom shipped in serial number order. After the receivers were serialized, they would go into a bin and be randomly selected for eventual completion. This dating problem was partially alleviated starting in 1949 and continuing through 1970, where a letter was stamped on the front of the boss where the lever is attached. It's a code for the year of manufacture. The following letters were utilized: A=1949, B=1950, C=1951, D=1952, E=1953, F=1954, G=1955, H=1956, I=1957, J=1958, K=1959, L=1960, M=1961, N=1962, O was skipped, P=1963, Q was skipped, R=1964, S=1965, T=1966, U=1967, V=1968, W=1969, and X=1970. Any number also stamped with this code on the lever boss would be an inspector's stamp, and is of no particular importance.

Collectors tend to favor the pre-war models made in Utica, New York, in uncommon calibers, and then those made in Chicopee Falls, Massachusetts (beginning circa 1946), followed by those made in Westfield, Massachusetts (beginning in 1960). Most of the extensively engraved models with fancy wood were made during the 1960s, and these have significant collector interest. It's generally agreed that quality control went downhill after the 1950s, hence the greater interest in the earlier guns.

As a footnote, the modern-day Savage Sports Corporation is being sold with its parent Caliber Company to the ATK Corporation, which is otherwise involved in commercial and security ammunition, shooting sports and security related accessories.

The Savage 99 was an enduring design, but sadly, it may never be re-introduced. It became too expensive to manufacture and sell at anywhere near an acceptable retail price. It remains as one of the classic lever action sporting rifles, with innovative features that are still special today.

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K82-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

Concealed Carry Tote⁴⁷

\$45⁰⁰

K82-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

TUFF PRODUCTS MAG POUCHES

Front view with flap.

Front view without flap.

Rear shows loops and Molle fasteners.

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system; for instance, the Dillon Range Bag, a tactical vest or body armor carrier. Available in black or coyote brown.

Christopher Oosthuisen:

By Robin Taylor, www.taylorfreelance.com

Photo by Leighton Oosthuisen

Much has been said about the “culture of exceptionalism” in the United States. Christopher Oosthuisen personifies that tradition.

Son of South African immigrants, Oosthuisen was recently named captain of the USPSA Junior Open team. Oosthuisen will represent the United States at the World Shoot later this year, flanked by three equally-spectacular young athletes.

At just 16, Oosthuisen has rocketed to stardom within USPSA, securing a “Grand Master” classification in less than three years. He’s one of the youngest “Grand Masters” in the history of the sport, rivaling previous young American phenoms like KC Eusebio and Chris Tilley.

Christopher must step into their giant-sized shoes, and fast. USPSA did everything right three years ago at the last World Shoot (in Rhodes, Greece). The Americans won gold in every team contest except one. To prepare, he and his father are travelling a lot, looking for matches that use the international-style rules and course designs.

Product of Two “Success Cultures”

As many *Blue Press* readers know, practical shooting took root here thanks to Jeff Cooper and the clubs in Southern California. Running in parallel on the other side of the globe, contributing to Cooper’s efforts, were practical shooters and clubs in South Africa. To this day the South Africans remain serious students of the art.

Christopher Oosthuisen is a child of both worlds. Although coached by his South African father, he applies typically American flexibility. As Bruce Lee drew “that which was useful” from many martial arts, Oosthuisen is blending the South African, American, and French styles of play with tips from everything from baseball to pro tennis.

“I’m so lucky to be where I am,” says Oosthuisen. “The biggest reason I progressed so quickly is because I have all these amazing shooters around me that have helped so much.”

When Christopher’s father, Leighton came to the United States, he ranked among the top shooters in South Africa. He chose to settle near the famed Rio Salado Sportsman’s Club outside of Phoenix, Arizona – the epicenter of American practical shooting at the time.

Rio Salado was (and still is) the home club for Rob Leatham (one of shooting’s all-time greats), and many other shooting luminaries. The sheer depth of power players coming through “Rio” can’t be over-emphasized.

“Every weekend, I’m seeing guys like Eddie Garcia, “Nick” Saiti, Rob Leatham, Raymond Witham, Tim Smith, Bill Drummond...” says Christopher.

I stopped him. “Wait, Bill Drummond? From North Carolina?”

The All-American Boer

49

"Yeah, I met him at the U.S. Nationals and we've been friends since. He's been really cool because he trains a lot with (French World Champion) Eric Grauffel. I try to copy him and Eric," answered Christopher. "He is one intense competitor, and I love that about him!"

Christopher works with a friendly local tennis pro, and pro football player to gain insights into the physical and the mental sides of his game. "They have great ways of staying focused on the road, and that's huge," says Christopher.

On the range, "he's like a coiled spring," says Nick Saiti. "(Christopher) is anxious and wants to be good NOW."

Loving the Open Gun

If you haven't tried it, shooting an Open gun will change your concept of what pistols can do. Shooting an Open gun feels like driving a racecar.

"It's amazing," says Christopher. "When we teach people, we always teach them on an Open gun because it's so much easier."

Christopher drives a Cameron Custom Gun-built STI 2011 in .38 Super Comp – a "racegun" that lets Christopher pour on the speed. His father drives an identical pistol, and they're having a third one built to serve as a spare. Both draw their pistols from the popular Rescomp CR-Speed holster (from South Africa).

"It feels like 'anything goes'," says Christopher, "and I like that. I worked all Summer to get my first Open gun...I had problems with it, so I shot my dad's gun for a while. Then I got one from Cameron Custom and I loved it."

The .38 Super Comp uses a rimless, heavy-walled version of the .38 Super case, designed to handle high-gas-volume, high-pressure loads. It generates power halfway between 9mm+P and .357 Magnum. (The Oosthuisens use Vihtavuori Oy 3N37 to drive a 124-grain Rainier Ballistics hollowpoint to 1330+ feet per second.)

Instead of iron sights, their guns wear Ultradot L/T red dot scopes. Forget lining up the sights, just put the red dot on the target and go.

As with all racing gear, there are challenges. Everything has to be perfect to run well. For example, prior to the last Area 6 one of the dies worked loose on one of their Dillon 1050s (they have five 1050s). The resulting ammo would still drop into a go/no-go gauge, but it was "off" just enough to cause trouble. The result? 40 seconds of jams – in a game where 1/10th of a second matters.

Off The Range

Chatting with Christopher, you get a sense of his confidence, and how accustomed he is to hanging out with adults. It took me a few tries to get him to NOT talk about shooting, and tell me about his life.

He's a junior at Scottsdale Christian Academy – where he started in the 6th grade. "My family really wanted me to grow up in Christian roots and in a small school where everyone knows each other," says Christopher. "I feel free to share my faith there, which is really cool."

Christopher faces his college entrance exams soon, with an eye toward qualifying for The W.P. Carey School of Business at Arizona State University. His GPA is good, but not excellent, so he's hoping for strong math and science scores to get him in. Oddly enough, languages have been his undoing, "...which is kind of funny because my whole family is South African and my dad speaks four languages."

Like most 16-year-olds, he plays video games – "probably too much" he laughs. (Favorites include "Call of Duty" and "Halo.")

"I just got my drivers' license about three months ago," says Christopher, and he eagerly makes use of a hand-me-down 1991 Bronco 2 to get back and forth to the range.

Getting there he'll listen to anything on the radio, but he's "not really into it," like other kids. "I like house music – not dub step, but stuff with more singing in it." His choices include songs by *Showtek* – and one or two from *Mumford and Sons*.

Some shooters use intense "metal" music as a way of pumping themselves up. Christopher's already "pumped up" when he gets there – he uses beat-heavy techno "house" music to calm himself back down. To give you an idea of his energy level, Christopher does breakdance for fun and exercise. He's good enough that he's been performing on stage for years.

Going forward, maturity and control will be the tickets to his success. According to Saiti, Christopher behaves like most teenage men: he's "rarin' to go for whatever," all the time. It's common for Saiti and groups of high-skilled shooters at Rio to "hang out" and shoot courses over and over again after local matches. That's where he sees Christopher most often, soaking up tips on shooting – and on the etiquette of the sport.

"He's working really hard lately," he says.

Underlying it all is the constant support of his father. "He's been my coach and mentor, and marketing guy, and everything under the sun. He's the only reason I'm in shooting," says Christopher. At Worlds, Christopher will do what he can to honor the investment that so many people have made in supporting him along the way – but none more so than dad.

For more about the World Shoot, go to www.IPSC.org.

50 "Big Fifty Reloader"

STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...
\$1019⁹⁵

RCBS Scale Check Weights

Standard Set: 60.5 grains for powder charges.	K82-12297	\$34.95
Deluxe Set: 510.5 grains for bullets, cases and powder.	K82-12458	\$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	K82-14067	\$1.35

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

TACCOM, LLC Accessories for .22 LR AR-15 Conversions 55

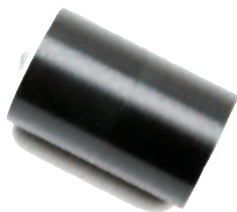

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

K82-19538 \$13.95

The TACCOM **Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is KEY for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

K82-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The TACCOM **Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

K82-19533 \$7.95

TARGET SPORTS® TACTICAL

AR-15 Super Tool

K82-19549 \$24.95

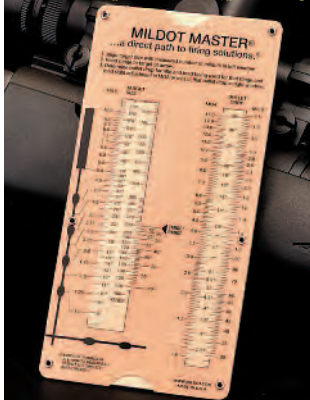

\$52.99

The De Santis **Elastic Belly Band** accommodates small autos and revolvers with one reload and a pair of handcuffs. Fastest when worn under an un-tucked shirt, but can be used with a tucked-in shirt for deep concealment.

24" - 28" waist **K82-18557 \$18.95** 30" - 34" waist **K82-18558 \$18.95**
36" - 42" waist **K82-18559 \$18.95** 44" - 50" waist **K82-18560 \$18.95**

MILDOT MASTER

You can become a master at using a Mil Dot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

Mildot Master® **K82-14762 \$29.95**

Schuster Mfg. Inc.
Adjustable M1/M1A Gas Systems

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

Above: Right side of the SCCY CPX-2.
Right: Takedown and reassembly are easy. The captive recoil spring is a nice touch.

The SCCY Industries

By J.B. Wood

Most of today's nice polymer-frame 9mm pistols are available in two sizes. There is the "full-sized" duty pistol, and the "sub-compact" version for concealed-carry. Some of the latter, when using serious 9mm loads, are a little difficult to control. Then, there are a very few in regular "compact" size, and these are perfect. The SCCY CPX is in this category.

The numbers are just right. Overall length is 5.7". With the finger-rest magazine, height is 5", and with the flat floor-plate, it's 4.37". Width is 1.1", and barrel length is 3.1". That last figure is important. It means you get the full power of any 9mm load, a factor lost in some of the sub-compacts. The empty weight is 15 ounces.

It feels good in the hand. The front of the grip-frame has finger recesses, with room for all three fingers of the average hand. The sides and the back-strap have a stippled surface for a good hold. There

is a small thumb-recess at the top, on both sides. At the front, above the trigger, there are recesses to the finger, in ready position. There is no silly "hook" on the nicely rounded front of the trigger-guard. This is a well-designed grip-frame.

The trigger has vertical serrations, a feature that I usually complain about, but these are shallow and not annoying. The DA-Only trigger pull is

smooth and quick, with re-strike capability if you encounter a European hard primer. The locking system is a classic falling-barrel type, and the dual concentric recoil springs are captive on the steel guide.

The slide stays open after the last shot, and the slide latch is perfectly positioned on the left at the top of the grip. The push-button magazine

release is located at the rear terminus of the trigger guard. The double-column magazine holds 10 rounds, giving you a total of eleven, more than adequate for most serious social situations. The

There is no silly "hook" on the nicely rounded front of the trigger-guard. This is a well-designed grip-frame.

Above: Left side of the SCCY CPX-2.

Left: Recesses on the front of the grip frame fit all three fingers of the average hand.

SCCY CPX-2 9mm Pistol

sights are square-picture, with three white dots, and the rear can be laterally moved.

There are two versions available. The CPX-2, shown here, has the slide finished in black Nitride, and there are no external safety levers.

With the DA-Only trigger, really not necessary. The all-black version is the CPX-2 CB. The CPX-2 TT is the same, but the slide finish is non-reflective satin stainless. Note that the slide and barrel are machined from 416 stainless-steel bar stock.

For those who prefer an ambidextrous manual safety, the CPX-1 CB and CPX-1 TT have it, and the cost is only \$20 more, at \$334. Suggested retail for the one shown here is \$314. For the features and quality you get, both are an amazing bargain. And, they come with two 10-round magazines, flat end-pieces included. Also, there is a well-designed trigger lock that springs open, and two keys.

I tried out the SCCY with loads from Black

Hills, CorBon, and GECO of Germany. Some of them were "Plus-P", and even with those, the felt-recoil was not unpleasant. For testing personal-defense pistols, I use the Champion VisiShot target that is actually made for 100-yard sight-in.

Its 8" black corresponds with center-of-mass on a combat silhouette.

At the classic 7-yard encounter distance, standing, with a two-hand hold, the CPX-2 kept all rounds in the black, groups well-centered, most of them measuring around four inches. With the exception of the GECO loads, all of the cartridges were hollow-points, and the pistol

had no problem with these. Overall, a flawless performance.

Finally, I will note that the CPX pistols come with a no-questions-asked lifetime guarantee. If there's any other question, here's the contact data:

RANGE TIME. ANYTIME.

Our Pistol Perfect bullet traps make range time, anytime a real possibility.

Available in 3 different sizes, each trap can handle handgun calibers up to .44 Magnum, and rifle calibers up to .223/5.56mm.

Our patented bullet trap technology ensures the shooter of a safe, clean, virtually maintenance free way to target practice. Lead is deposited into a collection pail, which can be recycled or sold. Talk about convenience!

Visit our website to see which Pistol Perfect Trap will work best for you.

Bore-tips® Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform appli-

cation of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

*Sand not included.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

K82-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

Comp-Tac's Trojan Horse Long Gun Case

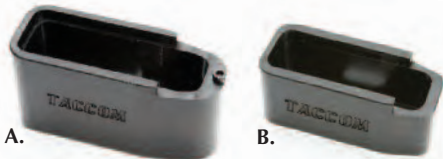

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,

30mm tube and

bright illumination of the reticle are just a

few of the many features of the DMS-1. Bright

red illumination of the reticle adds to the quick-

ness of the sighting system in day and low-light condi-

tions. At one power it works well as a reflex sight and at

longer ranges the four-X magnification gives increased ac-

curacy.

K82-19458 \$249.95

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

77

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Tactical Sports 45°-Offset Auxillary Optics Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Auxillary Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)
45° Offset Optic Mount **K82-14472 \$14.99**

TACCOM, LLC 90° C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE (Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

Browning Buckmark	K82-19534	79.95

THE JUST RIGHT

Above: The Just Right Carbine is a rifle chambered for pistol cartridges, and intended to be convertible between cartridges.

Left: The JRC's major charm, in the author's findings, was its shooting qualities, being very easy to shoot fast and well.

The JRC's barrel is threaded to accept a flash hider or suppressor.

Out-of-the-box the threads are covered by a steel muzzle cap.

Inserting the #185-6/5220 bit from Thomas' Brownells screwdriver kit in front of the bolt held it to the rear with its handle perfectly aligned with the horizontal and vertical legs of the bolt track for removal.

The ejection port does not have a dust cover.

By Duane Thomas

The Just Right Carbine is a pistol-caliber rifle that may be retrofitted with AR-15 aftermarket parts, and feeds off Glock magazines in 9mm, .40 S&W or .45 ACP, 1911 mags in .45 ACP, or Smith & Wesson M&P 9mm/.40 mags.

It's a very good thing the JRC uses easily available pistol mags. Carrying a JRC and a Glock/1911/M&P, feeding both guns off the mags on your belt is a huge selling point over carrying two complete sets of magazines, loaded with different cartridges, with all the bulk and weight that entails.

The JRC's 17" barrel is 4140 steel with a 1/16 right-hand twist. The upper/lower receivers and mag well (a separate part) are black anodized, machined 6061T-6 aluminum. With no optics installed and an empty 15-round mag, my sample JRC 9mm weighs 7 pounds, 3.2 ounces.

The JRC may be switched over to any caliber in which it's available, however this requires the appropriate replacement parts, assorted AR-15 wrenches, three hex wrenches, and a decent level of gunsmithing skill. Likewise field stripping the JRC for cleaning requires disassembly/reassembly with

T 9MM CARBINE ⁷⁹

The bolt reciprocates in a T-shaped track.

The bolt may be manually locked to the rear by aligning the bolt handle with the vertical leg of the "T" then rotating it down.

On the left side, a steel plate covers a second ejection port.

The ejection port cover contains the ejector. Switching the plate to the other side of the rifle changes its ejection pattern.

tools. The JRC manual recommends cleaning every 200 rounds to ensure continued functionality.

The mag release on the JRC is very exposed, there are no built-up "walls" shielding it as on an AR-15. Its spring is quite light. During administrative handling, and several times during live fire, I accidentally depressed the mag button, dumping the magazine from the rifle. Several times, given the button's exposed state, the mag accidentally ejected through hitting another object, not my hand.

The bolt handle is reversible. The ejection pat-

tern is also reversible: disassemble the rifle, switch the extractor from one side of the bolt to the other, also move a metal plate from one side of the rifle to the other; since the plate contains the ejector, this switches the ejection pattern from right to left.

There's no automatic bolt hold-open when the carbine is shot dry. Thumb safety is the AR-15 pattern. Pistol grip is the milspec A2, the collapsible stock a milspec slider. The single stage trigger broke at six pounds even, trigger stroke goes about one-eighth inch, with much creep/overtravel.

The JRC came with two 15-round Glock 19

80 THE JUST RIGHT 9MM CARBINE

The mag release on the JRC is unshielded in any fashion, and placed at front left of the mag well housing.

The pistol grip is the milspec A2 unit.

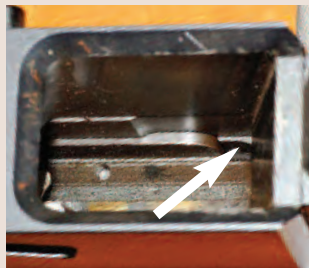

The collapsible stock provided with the Just Right Carbine is a milspec-pattern slider though the buffer tube is of commercial width.

The California Compliant version JRC's stock makes thumb safety manipulation difficult; also it drives the bottom of the receiver plate right into the web of the shooter's hand.

Thomas fitted the JRC with a C-More Tactical Railway Sight that combines a fully adjustable rear aperture sight with a red dot.

The JRC's mag well contains the same overtravel stop found inside Glocks, preventing mags from over-travelling and damaging the firearm.

The JRC came with two 15-round Glock 19 mags. When snapped into place, this is a low-key, out-of-the-way setup.

A 17-round Glock 17 mag fitted with an Arredondo +5 extension gives 22 rounds of 9mm in the mag and is a good length to be used as a field-expedient monopod while shooting prone.

The long 33-round magazine originally designed for the Glock 18 machine pistol will also fit in the JRC, and in Thomas' testing worked perfectly.

mags. I also tested it with a G17 mag fitted with an Arredondo +5 extension for 22 rounds in-magazine, as well as the Glock 33-rounder, all four magazines fully loaded with Black Hills 115-grain Tac-XP +P hollowpoints, each time with a round in the chamber to boot. Reliability was perfect.

I threw a C-More Tactical Railway Sight on the JRC and ran some shooting drills: double tap a single target, transition between targets, speedload, go from Ready/engage a single target, and finally Ready/multiple targets.

I chronoed the Black Hills +P through both my carry Glock 17 and the JRC. 9mm +P through the 17" JRC barrel versus a pistol length tube gives an extra 170-180 feet per second.

The Just Right 9mm Carbine was reliable and easy to shoot. I would like to see it with a dust cover, fewer (i.e. no) sharp edges on the quad rail, an automatic bolt hold-open when shot dry, a field stripping/cleaning procedure not requiring tools, and most importantly a repositioned magazine release button to reach its full potential.

Close & Ready Bedside Holster Caddy

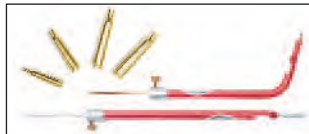

Holster NOT Included

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.
