# Dillon's RF 100 Automatic Primer Filler

**Eliminates the need for primer pick-up tubes!**

**Fills the primer tube while you reload!**

**Clear polycarbonate shield and protective housing**

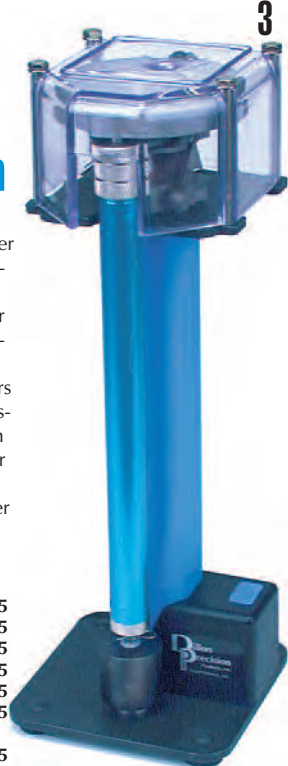

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

# We READ Our Mail!

When I packed up my Square Deal "B" that was destroyed when Super Storm Sandy hit us, I didn't expect it would be covered under your warranty. I was just hoping I could pay for the repair and save few bucks over the cost of a new machine. When a package from you showed up on my doorstep less than three weeks later I figured that no news was bad news and that it couldn't be fixed and it was a total loss. When I opened the box and saw a brand new Square Deal "B" inside I was shocked! When I read "Paid in Full" on the invoice I thought my eyes were playing tricks on me. After many months of dealing with insensitive and uncaring insurance companies, banks and governmental agencies, I guess I wasn't prepared for such a generous act of kindness! This doesn't fall under the "doing the right thing" umbrella, you folks went "way above and beyond" what anyone would expect you to do! You don't get that kind of support from many companies these days! I just wanted to personally "Thank You Very Much" for making an outstanding product and standing behind it the way you do.

Sincerely,

Pete Mikoleski - Freeport, New York

Re: "Protecting the Second Amendment - Why All Americans Should be Concerned" [May issue]. Great article! Concise and to the point. I am an Army veteran (not a Green Beret), and I can remember taking the oath, and what it meant. The sad thing is that our President and the members of Congress repeat those same words "to protect and defend the Constitution" when they take the oath of office, AND THEN PROMPTLY IGNORE THEM AND DO WHAT THEY WANT. Shame on us for continually electing professional politicians.

Lou Patti - Auburn, NY

Sir, I have six different Dillon presses. Obviously, I like them - well maybe not the 450 Jr. so much - but my three SDBs in 9mm, .38 Special and .45 ACP, plus two 650s with large and small primer systems...YES! I also like *The Blue Press*. The May 2013 issue has an outstanding article starting on page 20 about "Protecting the Second Amendment..." I wish that other magazines would also publish it. Other magazines *outside* of the gun culture, which is like a preacher talking to the choir.

Terence Marion aka Lue Dee Kriss SASS #5422 - luedeeekriss@comcast.net

Thanks, Terence! You're right about us preaching to the choir. However, sometimes it's the folks in the choir who really need to hear the message. Once they have, it's up to them to decide whether or not to pass it on. That's why I published the Green Berets' statement in its entirety.

# FROM THOSE WONDERFUL FOLKS WH

## By Peter Caroline

Colonel Townsend Whelen once said, "Only accurate rifles are interesting." Well, maybe so, maybe no. Traditionally, the AK-47 rifle is not known for its accuracy. That's not its purpose in life. But with more than 70 million AKs and variants out there, it must have at least a few redeeming features.

My first AK-47 was a Chinese Polytech folding stock model. I recall that I bought it just days after the announcement of the Bush ban in 1989. It cost me \$225, which included two cases of Chinese ammo. The ammo, as it turned out, was highly corrosive, something I discovered after I'd put the gun away without cleaning it and, several weeks later, tried to pull back the bolt. It was stuck tight. So I applied my BRM (Big Rubber Mallet) tool to the bolt handle. Once the bolt was freed, I disassembled, cleaned and lubricated the gun, and it worked perfectly. As well it should. The AK was designed for use by vast armies of people unencumbered by mechanical sophistication. It is impervious to heat, cold, wet or dry climates, sand, mud, crud, blood and abuse. It is a bullet hose, plain and simple. Minute of angle, no. Minute of enemy, absolutely. Ask any Vietnam combat veteran about the relative merits of the AK-47 and the M-16; you may learn some interesting new words.

Shortly after the Clinton "assault weapon" ban in 1994, I traded in my Polytech AK. A local dealer

had a Leupold-scoped lefthand Remington 700 .30-06 that had been custom-built for a local police department marksman. AKs were fetching stupid prices, and I swapped it and my remaining case of ammo for the Remington.

After that, my only contact with AKs was in the role of indulgent host. I have a friend in Boston who regards the Kalashnikov as the Alpha and Omega of weapons. When he and his wife come to visit, I borrow an AK from my buddy, Jim, who

"In the 1950s, the Soviet Union offered to build an AK-47 factory in Egypt, so the Egyptians might go forth and smite the Israelites. Probably not the greatest idea as it turned out...."

gained a great deal of respect for the weapon in Vietnam. While Jim was crouched in a mudhole, trying to get his M-16 to function, he was taking fire from AK-47s. So, my Boston friend, who uses his Norinco folding stock collector's item for firing salutes from his sailboat, gets to play with a real one here in America. We're like the Odd Couple: I'll happily shoot anything that goes bang; Dave will shoot only AKs.

Anyway, I never thought I'd ever own another AK. Why bother, when I have any number of other centerfire semi-autos that are far more accurate? Well, recently

[that is, prior to the current episode of panic buying] I was made an offer I couldn't refuse. On the bulletin board at my shooting range, someone was selling an Egyptian Maadi AK, actually designated a Type ARM, for \$350. It sounded like a more than reasonable price, so I called the number on the board, and went to look at the gun. It was pristine, unfired and had the original 1991 factory certificate and the owners manual. I bought it.

# SO BROUGHT YOU KING TUT: MAADI ARM

A bit of history. In the 1950s, the Soviet Union offered to build an AK-47 factory in Egypt, so the Egyptians might go forth and smite the Israelites. Probably not the greatest idea as it turned out, but the Egyptian government wasn't about to refuse a freebie. The Soviets built a factory in Egypt, and staffed it with their own technicians. They cranked out a large number of AKs, many of which, in semiauto configuration, were shipped to the U.S.A. Unlike some of the Eastern European iterations, the Egyptian product was considered to be of high quality.

I had my own reservations about the virtues of my new Maadi, based on my experiences with my former Polytech's accuracy, which was non-exis-

tent. But, if I buy a gun, I shoot that gun, so off to the range I went. As it turned out, it shot very well indeed, even with those odd lacquered-case, Berdan-primed rounds. I had a great time punching golf balls into the next county, and then I took the Maadi home and cleaned it.

There was still one issue to be dealt with. The Maadi was a post-ban import and had the federally prescribed "no-pistol grip" stock. That stock looked like the illegitimate offspring of a prosthesis and a bagel. It was just plain gawdawful ugly. Once again, my friend Jim came to the rescue with a conventional pistol grip and stock. Okay, it's not original, but at least now I can take the gun out in public.

## TACCOM, LLC Tactical and Competition Accessories

**QUICK CADDY...** light, easy, simple! Made from Delrin, TACCOM's Quick Caddy holds the shot shell by the rim only, allowing for easy access to the shells for simple and fast removal. Holds four 12 gauge shells, any length! Comes with a belt strap to attach to your belt, but allows you to use the TEKLOK or ELS systems and is adaptable to MOLLE system as well.

K33-19537 \$24.95

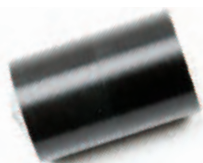

**TACCOM's Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions will ignite your .22 rounds, whether you use a GI trigger or a three-pound match trigger. This direct-replacement firing pin is made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many, many firings. Every inside corner is radiused to eliminate stress points. The tip of the pin has been reduced in area to help give you a deeper dent in the primer. You can use the stock spring, yet the return pressure will be reduced by about two pounds, helping promote reliable ignition. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

K33-19538 \$13.95

**The TACCOM Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you the reliability of consistent extraction during live fire. Up till now, your rounds have been coming out of the ejection port erratically! Install the Extreme Extractor and your rounds will come out looking like they are being put thru a garden hose! Consistent extraction is KEY for a reliable firearm. This extractor will help with your live round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut. TACCOM, LLC has seen and has been told by their testers that leaving a round in the chamber all but went away with the Extreme Extractor.

K33-19539 \$10.95

**Does your .22 Long Rifle insert** move back and forth in your AR upper? Did you know that the very top of your lower receiver takes all the recoil of your .22 LR insert? Simply insert the TACCOM **22 Insert Pressure Plug** in front of your buffer eliminates those problems. The Pressure Plug will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. Being about an inch and a half long, this plug gives an added cushion, utilizing your recoil spring to reduce the battering your lower takes on recoil. You can install and remove the pressure plug in seconds with no tools.

K33-19533 \$7.95

# 12 WANT TO RELOAD? SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K33-21894 \$44.95

## THE SHELLSORTER

...is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting.

The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time.

The **SHELLSORTER** is made of ABS, a strong plastic which will give a lifetime of service.

K33-19972 \$39.95

## FROGLUBE CLP

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products. Frequent use will keep firearms running at optimal performance and not harm the FrogLube coating.

# BL 550 Dillon's Basic Loader

**\$259<sup>95</sup>**

**K33-15399**

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:  
Strong Mount K33-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing / Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**K33-16627, \$82.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**K33-20302, \$25.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**K33-20251, \$87.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**K33-21353, \$29.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**K33-22120, \$30.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: K33-16629, \$19.95**

**Oversize Die: K33-16626, \$19.95**

**Plastic Funnel: K33-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550B. (*Requires the use of an RL 450 powder die – see below.*)

**K33-20029, \$22.95**

**RL 450 Powder Die:**

**K33-20308, \$21.95**

# RL 550B

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty

All for ONLY...

**\$439<sup>95\*</sup>**

**K33-14261**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

**RL 550B DVD**  
**Instruction Manual**  
 K33-19483 \$19.95

Total Price as pictured here with optional accessories: **\$736.60**

.45 ACP Die Set	K33-14404	\$63.95
Strong Mount	K33-22051	\$48.95
Alum. Roller Handle	K33-17950	\$45.95
Low Powder Sensor	K33-16306	\$41.95

RL 550 Toolholder with Wrench Set	K33-11541	\$28.95
Cartridge Case Bin/Bracket	K33-11185	\$24.95

# RL 550B ACCESSORIES

**A. RL 550B CALIBER CONVERSION KITS**  
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

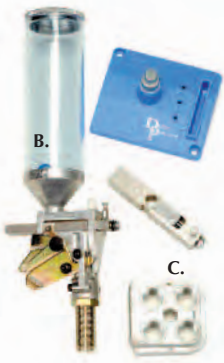

**K33-RL550B CON-**

**VERSION \$45.95 (Exotic calibers, \$55.95)**

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **K33-20782, \$76.95 ea.**  
 Magnum Rifle Powder Bar **K33-21353, \$29.95 each**  
 X-Small Powder Bar **K33-20780, \$29.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **K33-22058, \$103.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "bellling" adjustment.

**K33-20064, \$11.35 each**  
**Three or more, \$10.25 ea.**  
**X-Large Powder Die, K33-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**K33-13909, \$22.95 each**  
**Three or more, \$20.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**K33-22055, \$20.95 each**  
**Three or more, \$18.95 ea.**

## G. 1" BENCH WRENCH

**K33-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

## H. RL 550B CASEFEEDER UPGRADE

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol K33-14450  
 Small Pistol K33-14451  
**\$254.95 (110v US Model)**

Large Pistol K33-14453  
 Small Pistol K33-14454  
**\$264.95 (220v Euro Model)**

## CASEFEEDER CALIBER CONVERSIONS (Page 16)

**\$23.95 each**

## K. 550 SPARE PARTS KIT

- 1 Seating Punch, Small
- 1 #10 Tinnerman Insert
- 1 Primer Cup, Large
- 1 Primer Cup, Small
- 1 Bellcrank Cube
- 3/8" Index Ball
- 1 550 Brass Tip Set Screw
- 1 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 1 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)
- 1 Seating Punch, Large
- 1 550 Index Ball Spring
- 2 Pickup Tube, Small, Yellow Tips
- 2 Magazine Orifices, Large
- 1 Toolhead Pin

## I. PRIMER FLIP TRAY

**K33-13606, \$20.95 each**

## J. PRIMER PICKUP TUBES

- 1 Lg. tube **K33-22029 \$7.99**
- 1 Sm. tube **K33-22028 7.99**
- 2 Sm., 2 Lg. **K33-20056 23.95**
- 4 Lg. tubes **K33-20050 23.95**
- 4 Sm. tubes **K33-20049 23.95**

- 2 Pickup Tube, Large, Green Tips
- 2 Magazine Orifices, Small
- 1 550 Primer Cup Spring
- 2 Retaining Clips
- 2 Dispensing Tip, Large
- 2 Dispensing Tip, Small
- 1 Failsafe Bushing Rev. B

**K33-20048, \$18.95**

## L. MACHINE MAINTENANCE KIT

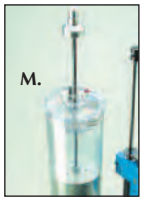

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

Maint. Kit & RL 550B Spare Parts Kit **K33-97016, \$32.95**

## M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

**K33-16306, \$41.95**

## N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550B Cover, **K33-13795, \$23.95**  
 (O.) Master lock, **K33-13083, \$3.95**  
 Quick-Change Cover (for use with powder measure) **K33-11143, \$14.95**

## P. UNIVERSAL MOUNTING HARDWARE KIT

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

**K33-14355, \$5.49**

# A Casefeeder UPGRADE for YOUR RL 550B

# Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K33-22080** is **\$254.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below). Replacement carbide cutting blades, **K33-13141**, are **\$19.95** each. Upper lock rings, **K33-13559**, are **\$4.99** each.

# MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

**K33-20095**  
**\$100.95**

# Dillon's Case Preparation Equipment

**CV-2001**  
**K33-20493**  
**\$187.95**

**CV-750 K33-19455 \$144.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

**CM-2000 Case/Media Separator K33-20675 \$72.95**

**CM-500 Case/Media Separator K33-21045 \$46.95**

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 K33-22047 \$212.95**

**Euro CV-750 K33-19473 \$169.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle. **K33-13804** **\$8.95**  
Case (20 pc.) **K33-20255** **135.95**

## Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

*D.C.L. Dillon Case Lubricant*

8 oz. bottle **K33-13733** **\$8.95**  
Case (20 pc.) **K33-20256** **135.95**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **K33-21375** **\$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.  
15-pound bag **K33-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.  
10-pound bag **K33-13496** **\$15.95**

# Which Dillon is Right for YOU?

## Square Deal 'B'

Page 6

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

## RL 550B

Page 14

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

## XL 650

Page 22

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

## Super 1050

Page 30

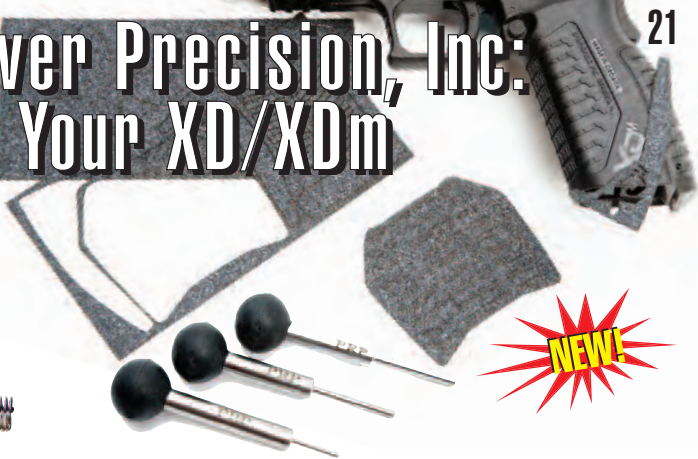

Our commercial-grade reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

**K33-29026 \$29.95**

## Cavalry Arms Medical Trauma Kits

**N**obody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	<b>K33-19220</b>	<b>\$29.95</b>
Advanced Trauma Kit (A.T.K.)	<b>K33-19322</b>	<b>69.95</b>

- Buy two or more Bench Wrenches for \$7.10 each

# Dillon Leather b

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

## Stylemaster-DL \$150

A superior shoulder rig made of best-quality leather with solid brass fittings — no cheap plastic, no soft suede or other low-quality leather.

# The Safepacker

**THE WILDERNESS' SAFEPACKER™ HOLSTER** is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

**Mark Pixler, editor**

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K33-11703 \$89.95**  
*"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.*
- "Commander" Safepacker, RH **K33-11702 89.95**  
*"Commander" Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.*
- "Officers" Model" Safepacker, RH **K33-11701 89.95**  
*"Officers Model" Fits: Colt Officers' Model, GLOCK 19/23/30/32/36, Para P-12, etc.*

## THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

Measured Waist	1.5" Belt	1.75" Belt

## Uncle Mike's Kydex Holsters

Michaels of Oregon's injection-molded Kydex holsters have a level of detailing, quality and affordability unmatched by other manufacturing methods. The almost-vertical rake allows for behind-the-hip carry, and for some applications, the holster can function as a crossdraw. Smaller-size holsters can also be used for "appendix" carry. To aid concealment and to assist in the draw, the holster rides close to the body at a mid-level height. The injection-molded belt loop is designed to accept and support a variety of belts from 1" to 1.75" wide.

# BLADETECH INDUSTRIES

## holsters, magazine/speedloader pouches

### "Revolution" Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

## "Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

# Dillon Range Bag

Dillon's Modular Range Bag features a MOLLE-style fastener system to make it easy to reconfigure the bag to fit your individual needs. The end compartments and side compartments are removable, and extra end compartments are available.

The Range Bag comes with a removable, open-topped Stage Bag, so you can carry your ammo to shoot a stage

without having to take the entire bag. The main compartment is designed to hold the Stage Bag or a Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 36).

Range Bag, Black 17"x11"x10"	<b>K33-19258</b>	<b>\$99.95</b>
Extra Stage Bag (inset, top right)	<b>K33-19259</b>	<b>29.95</b>
Extra End Compartment (inset)	<b>K33-19260</b>	<b>14.95</b>
Pistol Pouch, Black	<b>K33-17027</b>	<b>10.95</b>

## 'Border Shift' Ammo Bag

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

**I.D. Card Holder**  
**K33-14575 \$2.95**

**Black Ammo Bag**

**K33-13755 \$25.95**

## Dillon Pistol Cases

Protect your handguns with Dillon's rugged, padded nylon pistol cases. These cases feature a pouch on one side for cleaning gear or other accessories and magazine/speedloader pouches on the other. The "Small" Dillon Pistol Case will

accommodate most "Limited" class autos and the "Large" case will accept pistols with scopes and extended compensators.

Small - 7.5" x 11.5"	<b>K33-10161</b>	<b>\$18.95</b>
Large - 9.5" x 12.5"	<b>K33-10162</b>	<b>21.95</b>

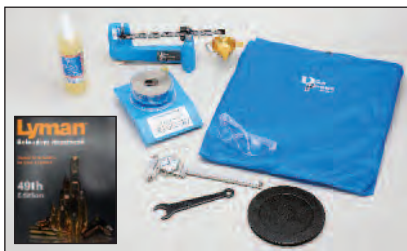

# Dillon Reloading Accessory Package Deals! 33

Dillon's Package Deals include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

Package Deal for:	Stock No.	Price
SDB (Balance Beam Scale)	<b>K33-14482</b>	<b>\$182.95</b>

XL 650 (Electronic Scale)	<b>K33-22118</b>	<b>266.95</b>

## Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

SDB Mount	<b>K33-22223</b>	<b>\$64.95</b>
RL550/XL650	<b>K33-22051</b>	<b>48.95</b>
XL650-only	<b>K33-22052</b>	<b>45.95</b>

## Bullet Tray Kits

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the "feel" of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550B/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

Bullet Tray Kit	<b>K33-22214</b>	<b>\$41.95</b>
RL 1050 Tray Kit	<b>K33-22215</b>	<b>41.95</b>

## RL 550B/XL 650 Toolhead Stands

This all-metal stand provides a place to store your complete caliber conversions: toolhead, reloading dies, powder measure, shellplate and locator buttons. The mounting system makes it possible to secure the toolhead stands to your bench, keeping them from getting knocked over by your well-meaning-but-clumsy shooting buddies.

Dillon's new toolhead stands are finished with a high-quality, durable powder coating designed to meet the needs of even the highest volume, commercial reloading operation. They are available individually or in packages of three, and are packaged with reloading data labels to help you record your favorite loads.

550/650 Stand	<b>K33-22055</b>	<b>\$20.95 ea.</b>
<b>Three or more, \$18.95 ea.</b>		

## Low Powder Sensor

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light.

This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Sensor	<b>K33-16306</b>	<b>\$41.95</b>
--------	------------------	----------------

## Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel."

A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

# Dillon's Pistol Die Sets

## Size Die

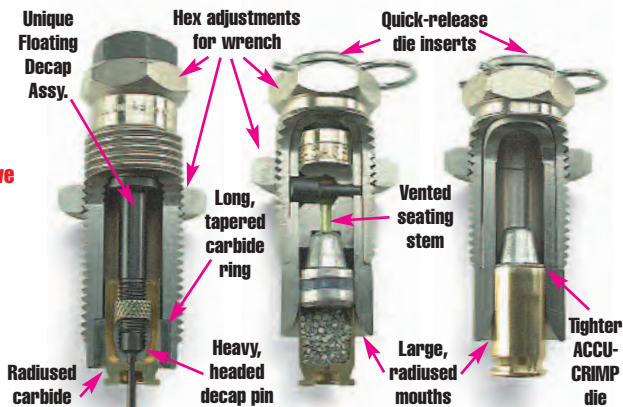

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

---------------	-----------	--------

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

Extra Loading Data Labels, K33-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# 'Belted Magnum' Powder System

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder.

Like all of Dillon's powder measures, the Belted Magnum Powder System is case-activated and can be used with your RL 550B, XL 650 or AT 500 reloader. It's ideal for loading large-caliber magnum rifle cartridges. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

The "Belted Magnum" Powder System is based on our SL 900 Shot Dispenser, so the Maximum Charge Bar won't work in our standard powder measures – you'll need to buy the entire system. The good news is that the "Belted Magnum" Powder System has an integral drain, so it's easy to empty the hopper in order to change powder types; so, if you load several big calibers with various powders, it's easy to switch from one to another.

Keep plenty of extra powder on hand, because when you're dispensing 100-plus grains into every cartridge, you're gonna need it! Magnum Powder System **K33-97126 \$137.95**

## PROTEKTOR MODEL

### The Original Leather Sandbag\* Rifle Rests

All Protektor Model leather bags are made with the best top grain cowhide available. The welded steel rest is strong enough to stand on and won't break if dropped (*Owl Ear Front Bag sold separately*).

## Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

### Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

# HARRY WHEELER

By John Marshall

The State of Arizona, since its territorial days, has had its share of legendary lawmen. Most folks have heard of Wyatt Earp, and maybe William Owen "Buckey" O'Neill and John Slaughter, early badge-bearers who fought hard against criminals in that rough and tumble region. But fully equal in stature to these brave men was another stalwart I want you to know about. His name was Harry Wheeler, and as I write these lines, one of his guns sits on my desk. This is the incredible story of the man and a gun he once owned.

Harry Cornwall Wheeler was born on July 23, 1875 in Jacksonville, Florida, son of an Army Lieutenant. Growing up on Army posts, he fell naturally into riding and shooting and inherited a strong streak of patriotism from his father. In 1897, the young man enlisted in the U.S. Cavalry and was assigned to Fort Sill, Oklahoma. He became extremely proficient with the 1896 Krag-Jorgensen carbine and the .45 and .38 Colt issue revolvers, gaining a reputation as a crack shot.

Harry managed to find time for romance, and in his first year in the service, he married Mamie Olivia Stafford, a California girl. She and Harry soon became parents to a boy, William Allyn Wheeler. Following the explosion of the battleship Maine in Havana Harbor, the U.S. became embroiled in the Spanish-American War. Much to Harry's disappointment, he was not sent into battle. His unit, Company H of the 1st Cavalry, remained in reserve at Fort Sill, where Harry was promoted to Chief of Scouts. He finished his enlistment in 1901 and mustered out, only to find that he was not well suited to civilian life. He soon rejoined with the newly-formed 14th Cavalry, where he was recruited to serve as a sergeant in Company M. This unit was assigned to Fort Grant, in Arizona, and this was where Harry suffered a life-changing accident. While grooming a horse, he received a vicious kick in the stomach from that animal. This caused massive internal problems, and his recovery was painful and slow. Receiving a medical discharge, Harry waived assignment to a soldier's home. He toughed it out on his own, and he and his wife and son moved to Tombstone, Arizona Territory.

Harry took up employment as a miner in Tombstone, but quickly discovered that he could not get riding and shooting out of his system. Fate provided the answer for him. The governor of Arizona had formed a new mounted law enforcement unit that used military organization and methodology. This was the famed Arizona Rangers. The Rangers' top dog at the time was Captain Thomas Rynning, a former lieutenant in Teddy Roosevelt's First Volunteer Cavalry "Rough Riders." He was impressed with Harry's service background and quickly accepted the young man's offer to join the Rangers as a private in July of 1903. Harry became a lawman, and was quick to learn and excel in his new and dangerous trade. With keen attention to duty and incredible skill in marksmanship, Harry was promoted to sergeant in four months.

Harry was stationed by the Rangers in Willcox, but in October of 1904, he had traveled on duty to Tucson. It was there that he had his first man-to-man shootout. A holdup was in progress in a saloon close to where he was eating in a restaurant, and an excited man informed him. He was warned not to go in to the establishment, as there might be possible gunplay. "All right, that's what I'm here for!" replied the Ranger sergeant. Harry was confident that he could outshoot anyone in the territory, and burst into the saloon, his .45 Colt single action revolver in his hand. One of the two holdup men made the mistake of pointing his

gun at the cool-headed lawman, but Harry got off the first shot. This grazed the head of his now-unnerved adversary, and Harry's quick second shot plowed into his chest, mortally wounding him. Although one of the man's accomplices fired a shot at Harry, in the excitement he missed. The man wisely lit out of the saloon and was never found.

In 1905, the lieutenant of the Rangers had resigned in a political dispute, and Captain Rynning, impressed with Harry's record of dedicated achievement, appointed him to fill that slot. The new lieutenant moved to Ranger headquarters in Douglas, and often took over Rynning's duties as chief of the Rangers for extended periods while the Captain was on inspection trips, conferring with the governor, or venturing into Mexico on official business. Harry himself and a couple of his

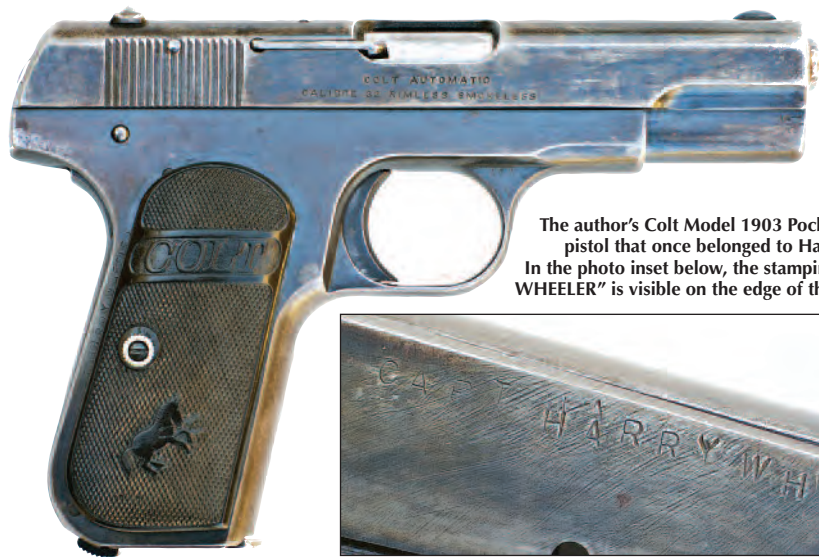

# ER AND HIS GUN <sup>41</sup>

men made a long and harrowing journey into Mexico in pursuit of a couple of vicious murderers. After scrapes with Mexican officials and long periods of hardships, the Rangers returned empty-handed. Still, Harry was dogged in his pursuit and eventually found the men in Willcox, where they pulled knives on him. It's never good to bring a knife to a gunfight, and Harry with his big .45 soon had them disarmed and in custody.

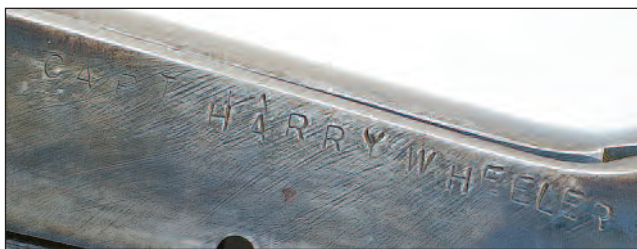

The Rangers were racking up numerous successful arrests and were gaining a fearsome reputation in Arizona. Harry was at the forefront in many scrapes. In 1907, he faced down a man with a gun at the train station in Benson. The man was part of a lovers' triangle, and had threatened to gun down the other man and the woman involved. As Harry advanced to disarm him, the

In March of 1907, Thomas Rynning resigned the captaincy of the Rangers to accept a position as superintendent of the Yuma Territorial Prison. Harry Wheeler was the hands-down choice to fill his shoes. In less than four years, the 32-year-old former cavalryman had held every rank in the Arizona Rangers and with immense respect had become its third Captain.

Harry proved to be a firm and principled leader, holding the Rangers to high standards. The words "duty" "integrity" and "gentlemen" were prominent in the general orders he issued. He moved the Ranger headquarters to Naco, on the Arizona-Mexico border, to better address border problems. Amusingly, a couple of Army deserters from Fort Huachuca approached Wheeler asking directions to Mexico, stating that they wanted to

The author's Colt Model 1903 Pocket Hammerless pistol that once belonged to Harry Wheeler. In the photo inset below, the stamping "CAPT HARRY WHEELER" is visible on the edge of the right grip frame.

man got off a shot at him. Undeterred, Harry advanced, emptying his Colt at the man, hitting him three times. The man cried out that he was done for and out of ammo. He lied. As Harry moved towards him, the man got off two more shots, hitting Harry in the heel. In desperation, Harry started to throw rocks at his antagonist. The man leveled his revolver carefully once more, but the hammer clicked on an empty chamber. The bleeding Wheeler and two other men managed to subdue the gunman, who was found to have two more rounds of ammo in his pocket. Harry gamely shook hands with the man, who told him "I'll get you yet." When the man died, a reward of \$500 was found to be due, as he was wanted for two murders in Nevada. Harry turned down the reward and donated the money instead to the widow of one of the men who was killed, a former Arizona Ranger.

avoid Naco and "those damned Rangers." Wheeler obliged them by pointing the way, but informed them that they had made a big mistake by approaching a Ranger for such information. They were soon in custody.

The dedicated Rangers were achieving an excellent reputation, as was Harry, who was generally regarded as a top law enforcement officer. He was approached to run for Sheriff of Cochise County, on the border with Mexico, but refused, saying he didn't want to get involved in politics.

However, circumstances were to dictate otherwise. In 1908 it was decided by the Arizona Legislature that having achieved their objective of pacifying the lawless element in the territory, the Rangers should be disbanded. Their duties would be turned over to the respective County Sheriffs. Accordingly, the Rangers closed up shop on Feb-

## \*FAQ About Berry's Preferred Plated Bullets

### 1. What is "DS?"

"Double Struck." Double-Struck bullets go through an extra sizing process after being plated. This makes the bullet 100 percent symmetrical. This can give you an edge in competition, but most shooters won't notice the difference.

### 2. What is the difference between Plated/Jacketed/Cast bullets?

Berry's Preferred Plated bullets begin as a swaged lead core. The plating process works through electrolysis. The swaged lead cores are tumbled in an electrically charged cyanide bath containing high-grade copper ingots. The copper clings to the lead and the longer the bullets remain in the bath, the thicker the plating.

### 3. How do I load Berry's Preferred Plated Bullets?

Plated bullets occupy a position between cast bullets and jacketed bullets. They are soft lead, but have a hard outer shell on them. When loading plated bullets we have found best results using low- to mid-range jacketed data in the load manual. You must use data for a bullet that has the same weight and profile as the one you are loading. Do not exceed mid-range loads.

### 4. How fast can I shoot these bullets?

Velocities depend on the caliber, but as a rule of thumb, we recommend you don't shoot our plated bullets over 1200 fps (feet-per-second). Our 44s actually shoot best around 1150 fps. 45s are generally good at 850-900 fps. Our bullets are NOT recommended for magnum velocities.

### 5. Can I shoot your plated bullets in my GLOCK?

Yes. We have a large contingent of loyal GLOCK shooters using our bullets. The plating is thick enough that you will not get lead fouling in your bore, which is the nemesis of polygonal barrels.

\*DS = Double Struck, TP = Thick Plate, HB = Hollow Base, RN = Round Nose, FP = Flat Point, SWC = Semi Wadcutter, WC = Wadcutter

**A**bout SNS Casting: SNS Casting, Inc. is a family owned and operated business located in rural Flanagan, Illinois and was officially founded by Jim Stinar in the winter of 2008. Jim's casting history actually began in the mid 1980s as a hobby. This supplied not only himself but a group of friends and fellow avid shooters who were tired of paying too much for inferior products. Eventually, word was spreading throughout the surrounding states of his bullets, which were priced right for the quality.

Today, SNS Casting features four of Magma Engineering's Mark VIII casters and two Lube Master luber/sizers fitted with M-A Systems Collators. **Our lead is a certified factory alloy of 92 percent lead, 6 percent antimony and 2 percent tin, which is purchased in 44,000-pound lots to ensure consistent quality. The lube we use is Magma blue lube.**

We have two full-time employees at SNS Casting. Jim Stinar and son Ryan are avid USPSA (A30909, A63666) shooters, SASS members and NRA members.

**NOTICE: There is a \$20.00 minimum 'Hazardous Material' (HazMat) handling fee for shipping PRIMERS. This fee is assessed in increments of 10,000 primers. Primer orders MUST be shipped separate from other items, and require a separate shipping and handling charge. Shipping and HazMat fees are not included in prices.**

# 46 Dillon Precision Calendar

Dillon Precision's 2013 calendar measures 15.5" x 26.5" with a calendar pad that's about 14" x 4" and the photos are generously sized at 14" x 20". As always, we hope you'll enjoy looking at this calendar as much as we did putting it together for you!

**2013 Calendar K33-19440 \$12.95**

*1-2 Calendars, \$12.95 each; 3+ Calendars \$9.95 each*

## Stainless Steel Dial Caliper

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

K33-13462 \$28.00

## High Tech Digital Caliper

**Accurate,  
Easy to Read!**

**K33-17171 \$39.95**

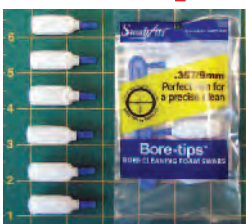

The Otis Technology, Inc. Breech-to-Muzzle Cleaning System cleans rifles .22 to .50

cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal.

The system includes three memory-flex rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

K33-18174 \$39.95

## Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!"

The Bore-tips Swabs REALLY DO work. What you can't see under the foam is a plastic jig sized for a tight bore fit

which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

# Concealed Carry Tote<sup>47</sup>

\$45<sup>00</sup>

K33-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged nylon fabric, with heavy-duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5"x11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

## 'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner

## Comtech's STINGER

THE STINGER:

Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

K33-19495 \$9.95

Arredondo Accessories' Magazine-Cleaning Brush is ideal for that little job we all dread (avoid?!). No excuse, Sir!

K33-19257 \$11.95

## DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**K33-50050, \$374.95**

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**K33-50075, \$849.95**

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

**K33-50125, \$74.95**

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.

**K33-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

**K33-50001, \$299.95**

### E. (1) PRIMING CONVERSION

Converts Swager to Priming System.

**K33-50003, \$74.95**

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

## RCBS EQUIPMENT

## Dillon's New Bench Wrench Fits new 1" die lock rings

### Trim Pro™ Case Trimmer Kit K33-15021 \$119.95

Includes: RCBS Trim Pro manual case trimmer, plus an assortment of shell holders and pilots for most popular calibers. Shell holders 2, 3, 4 and 10. Pilot calibers: 22, 24, 25, 27, 28, 30, 35, 44 and 45.

### RCBS Scale Check Weights

Standard Set: 60.5 grains for powder charges.	K33-12297	\$34.95
Deluxe Set: 510.5 grains for bullets, cases and powder.	K33-12458	\$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	K33-14067	\$1.35
5-Pack of Die Lock Rings	K33-10669	4.15
1" Dillon Bench Wrench	K33-10842	7.95
<i>(Buy two or more 1" Bench Wrenches for \$7.10 each)</i>		
Wrench/Lock Ring 5-Pack	K33-10668	9.95

## Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Armorer's Block

K33-19536 \$29.95

# Grace USA<sup>53</sup> Gun Care Tool Set

This custom designed 12" x 9" x 1-1/2" case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

# 58 Performance Parts for Your GLOCK® Firearm

## Ghost 3.5 Trigger Stop Connector

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

3.5 Trigger Stop **K33-14760 \$24.95**

## Ghost Bullet and Forward Slide Release

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the "modern technique" (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forefinger of left-handed shooters.

B. Bullet Slide Release **K33-18630 \$14.95**

C. Bullet Forward Slide Release **K33-18629 19.95**

## GLOCK® Factory Original Parts:

D. Extended Mag Release (Small Frame) **K33-18569 \$9.95**

E. Extended Slide Release **K33-18570 19.95**

F. Striker Cups (The ones you always lose.) **K33-19325 4.95**

G. Striker Channel Liner **K33-18881 9.95**

## Lone Wolf Parts for GLOCK firearms:

H. Extended Mag Release (Large Frame) **K33-19115 4.99**

I. Extended Take-Down Lever **K33-19114 9.95**

J. 3.5# Trigger Stop Connector **K33-16501 14.95**

Extended Slide Stop **K33-22299 15.99**

## Wolf Spring Co. Parts for GLOCK firearms:

Recoil Spring, 15# **K33-11419 7.99**

## Lone Wolf Distributors' Match-Grade Barrels for GLOCK Pistols

These replacement barrels are manufactured from the highest grade mill-select 416 stainless forgings. Standard land-and-groove rifling makes these an excellent choice if you wish to shoot lead, plated or jacketed bullets. Can be used in factory ported or stock pistols. Ready to use, pre-fit drop in. No gunsmithing required.

GLOCK 17 9mm Barrel **K33-19167 \$99.95**

GLOCK 19 9mm Barrel **K33-19326 99.95**

GLOCK 20 10mm Barrel **K33-19241 99.95**

GLOCK 20 .40 S&W Conversion Barrel **K33-19805 99.95**

# 60 HARRY WHEELER AND HIS GUN

bruary 15, 1909. As the best-known lawman in Arizona at the time, Harry quickly found a job as a deputy Sheriff in Cochise County, and then as a mounted inspector for the U.S. Customs Service. Finally giving in to popular requests, he ran for the office of Cochise County Sheriff, and won. On February 14, 1912, as Arizona entered Statehood, Harry was sworn in to that post.

Harry and his family took up residence in Tombstone, and he had his office in the County Courthouse there. He was a very successful Sheriff, and was re-elected in 1914. And then tragedy struck. His 16-year-old son Allyn was severely injured in an automobile accident, and never recovered from his injuries. He was buried in Tombstone's City Cemetery. Alcohol may have played a part in his son's death, and during Prohi-

bee, which was located in Harry's jurisdiction. As a side note, my maternal grandfather was a foreman there for the Copper Queen mine at the time, and my mother was a toddler of five years old. In the summer of 1917, tempers flared high, with pro-union and pro-company people nearing direct conflict. As my mother later distinctly recalled, my grandfather holstered a revolver on his way to work every day at that time, ensuring that no harm would come to him or his family.

Harry Wheeler was a red white and blue patriot, and he was determined not to let things get out of hand in his county, particularly when copper was so vital to munitions and communications equipment for the war. Accordingly, he and the management of the mines devised a plan which has become known in U.S. history as the Bisbee Deportation.

Captain Wheeler scrawled his name inside each of the two gutta percha grip panels. The meaning or intent of the five-digit number scratched into the left grip panel is subject to conjecture.

bitation, Harry was relentless in enforcing the law against bootleggers. He was handily re-elected for a third term as County Sheriff in 1916.

Harry became a very active rifle and pistol competitor, and today he would be regarded as a prime "gun guy." In a match in Tucson in 1917, he won the state rifle championship and a gold medal. His personal collection of firearms was substantial, and guns became his prime hobby. He used rifles effectively on the job, and few crooks resisted him. In 1917 though, he had to wound a bootlegger severely before he could put him behind bars.

That year, 1917, was an eventful one for him. The U.S. had entered the First World War, and the copper mines in Bisbee were working overtime to produce enough copper for the war effort. The International Workers of the World labor union (the IWW, or "Wobblies") were threatening to disrupt the operation of the mines in the town of Bis-

Knowing that he did not have the resources to put all the labor dissidents in jail, Harry decided to do the next best thing. He prepared by deputizing large numbers of foremen and other loyal company employees. He also identified as many of the labor people as possible in advance. Then, early in the morning of July 12, 1917, Harry and his deputies, wearing white arm bands and carrying rifles, rounded up about 1,300 IWW men, often rousting them right out of their beds. One mine foreman and a "Wobbly" were killed in the confrontation. The union men were first assembled in front of the Bisbee town post office/library. Then they were escorted and marched several miles to the nearby Bisbee district of Warren, where they were corralled in the local ballpark under armed guard. There they were told that if they would renounce allegiance to the union and cause no further trouble, they would be released.

Those who would not would have to face consequences. The Warren ballpark was adjacent to a railroad line, where cattle cars were placed in a line and waiting. The contrite few were released, but the unrepentant majority of rabble rousers were placed on these cars and locked in. The locomotive was fired up and the train pulled out to the east. It only finally came to a stop in the middle of the New Mexico desert near the town of Columbus, where the "passengers" were disgorged. Told never to return to Cochise County, very few ever did. To his dying day, Harry defended the deportation and professed sole responsibility for it. He maintained that it was the right thing to do for peace in his county and for the good of the nation. Was it extra-legal? Most probably. Did it work? Yes.

Harry was determined to go the extra mile for his country, and volunteered himself for the service to fight in France. He was refused out of hand. He was then 43 years old, and had a medical discharge on his record, which also worked against him. Still, he pulled a number of political strings and in March, 1918 secured a commission as an Army captain. Resigning as Sheriff, he immediately took a train east to join the U.S. Army Expeditionary Force headed by General John "Black Jack" Pershing.

On the way, he bought a small pocket pistol for self protection. The Colt factory records show it was originally shipped to a hardware store in Baltimore, Maryland on August 29, 1917. Whether Harry bought it from that store on the way to New York, or from an individual is not known. It was a Model 1903 Pocket Hammerless in .32 ACP caliber. Harry caused his name to be stamped on the edge of the right grip frame, and in addition, he scrawled his name inside each of the two gutta percha grip panels. The stamping reads "CAPT HARRY WHEELER" and "H Wheeler" was inscribed in cursive on both of the grips. A five-digit number was also scratched inside one of the grips. The meaning or intent of this number is subject to conjecture. With this pistol tucked in a pocket, Harry arrived in France to be confronted with a discouraging and unwanted surprise.

He was assigned, not to the infantry, which he wanted, but to the Army's Signal Corps, where he was put in charge of training 350 reserve soldiers who would go into the newly-formed Aviation Section. Harry protested forcefully, pleading with his superiors to let him go to the infantry where he could fight on the front lines. Just as his request

was finally approved, he was ordered to return to Arizona to face possible charges and an inquisition into the circumstances of the Bisbee deportation. Crushed, Harry returned to serve out the war commanding a machine gun company on the Arizona-Mexico border. In the meanwhile, the pending charges against him were officially dropped.

Resigning from the Army, Harry took a number of law enforcement jobs in Southern Arizona. He divorced his first wife and in 1919 married young Jessie Leona Wills, a waitress in a café in Douglas. He continued to compete in rifle and pistol matches, and traveled to the National Matches in Camp Perry, Ohio in both 1920 and 1921. A son, William J. "Jack" Wheeler, was born in 1921, and a daughter, Jessie Jacqueline Wheeler, in 1923. A boy, Robert W. "Bobby" Wheeler, was born in 1924, but died in infancy. Harry and Jessie also engaged in ranching for a while. In December, 1925, Harry contracted pneumonia, and died before his time at age 50 at the Calumet and Arizona hospital in Bisbee. He was buried in Evergreen Cemetery, near Lowell, a district of Bisbee. His remains rest not far from where my own grandfather was buried 19 years later. Jessie did remarry, but divorced after six years of marriage. She never again married, and died at age 77 in 1976. At her request, never losing her love for Harry, she was buried beside him and their little son Bobby.

Harry had numerous firearms, and these were kept in the family for years. One of his descendants disposed of three of them at a gun show in Wichita, Kansas in 2011.

They were a martially marked trench shotgun, an engraved hammer shotgun, and the little .32 Colt he bought on the way to France. The Colt pistol was the only one marked with his name. It has since passed through two collectors before I became aware of its existence, and, anxious to have the gun return to Arizona, I negotiated successfully to purchase it. Pictures are included with this article. It is my intention that someday it may find a home in the Tombstone Courthouse museum as a tangible object once belonging to a genuine Arizona hero. Harry Wheeler, in his brief life, was an exceptional lawman. I'm proud to be the curator of one of his guns.

If you are interested in learning more about the life of Harry Wheeler, I highly recommend the book *Captain Harry Wheeler – Arizona Lawman* by Bill O'Neal, published by Eakin Press, a Division of Sunbelt Media, Inc. I am deeply indebted to Bill for much of the information in this article.

# Steve Anderson: "It's All About The Shooting" 63

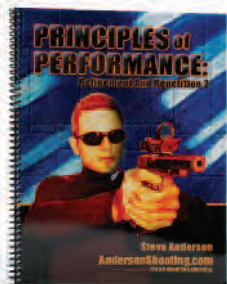

By Steve Anderson

**Refinement and Repetition: Dry Fire Drills for Dramatic Improvement** is made up of 38 dry fire drills, including the exact drills I used to achieve the rank of Grand Master in one year after buying my first Open Gun. I'm obviously a huge believer in the power of dry fire practice to make all of the skills required to fire a pistol accurately at high speed truly subconsciously controlled. When the basic gun-handling skills are subconsciously controlled, you're no longer drawing, aiming, pulling the trigger and firing the gun. You're simply shooting.

I analyzed the USPSA classifiers and realized that most of them involved shooting six rounds, reloading, and then shooting six more rounds at various target arrays. From there it was simple to devise drills to address those challenges. These became the first 12

**K33-14730 \$23.99**

**K33-14733 \$26.99**

drills in *Refinement and Repetition*. The others came after a similar analysis of the skills that are needed in common USPSA stages.

**Principles of Performance: Refinement and Repetition 2** is the logical continuation of *Refinement and Repetition*. The new book places a heavy emphasis on match consistency and the mental qualities required for solid USPSA match performance. It's designed to take a good shooter with sound fundamentals and basic skills to a place where he or she can better utilize those basic skills in the world of high-stress competition.

There are drills designed specifically to improve field course skills, as well as drills designed to isolate the challenges a shooter begins to see at larger matches. *Principles of Performance* also covers the common mistakes seen at every USPSA match, as well as their solutions.

## VIKING TACTICS' TRAINING DVDS, BOOKS

Viking Tactics, Inc. brings you battle-proven tactics and weapon-handling techniques. All primary instructors have Special Operations backgrounds as well as extensive real-world experience.

**3GM** "Shooting Techniques of the Grand Masters" brings you the experience and know how of three of the top Grand Masters in the sport today: Max Michel, Saul Kirsch, and Angus Hobdell. Each shares with the viewer his technique in skills like stance and balance, recoil control, accuracy, the draw, specialty draws, reloads and transition between positions. This production highlights the differences between the techniques used by these champions. Watch, learn and choose which technique works best for you. Run time: 160 minutes.

**K33-11630 \$49.95**

**U**ltimate Advanced Revolver with Jerry Miculek – The World's Greatest Revolver Shooter Jerry Miculek is recognized as the fastest and most accurate revolver shooter in the world. His speed and skills are, in one word... Amazing! They've been verified in hundreds of local and national competitions. In this program, he shares with you some of the techniques and secrets he has mastered over the past 25 years to become the shooter he is today. And, you'll see an incredible display of revolver shooting and reloading. 100 min.

**K33-14608 \$19.95**

**C**ompetition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting. Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

**K33-14341 \$19.95**

# 64 Kydex® Has Become a Very Popul

Most Kydex® holsters are offered with straight drop as an option, like this Blade-Tech Standard Belt Holster for an STI VIP 9mm.

A straight-drop holster allows a much simpler and innately faster draw than the FBI tilt, for instance the “hook and pop” technique demonstrated by the author, where the fingertips are “hooked” around the gun’s frontstrap, then the hand is closed, “popping” the gun straight up.

The fast, directional draw allowed by the straight-drop Kydex holster is a great advantage on something like the Handgun Master Test. Here the moving target has not even completely emerged from behind cover and the author has his Wilson 1911 out and already on target.

The stiffness of Kydex allows for IWB holsters that won't collapse when the gun is withdrawn.

This Kydex IWB holds IDPA Safety Officer Chuck Smith's Glock 30 .45 on a daily basis.

## By Duane Thomas

There are numerous reasons that many folks today choose Kydex® instead of the traditional leather for their concealment holster.

(1) Kydex is stiffer than leather, thus more “slick” on the draw. People used to carrying in leather, the first time they ever draw from Kydex, generally say, “Wow! *That* never happened that fast before.”

(2) Floppy leather holsters must hold the gun high; if they held the gun low, unless the belt loop was reinforced, the gun would flop around. Stiff kydex can hold the gun much lower. This allows a faster, smoother draw because you don't have to lift the gun as high before it “clears Kydex.”

(3) Most leather holsters are FBI tilt. Most Kydex holsters offer straight drop as an option, if not the primary treatment. This allows a true strongside carry, thus a faster draw because you don't have to bend your wrist, then straighten it out during the draw, as with FBI tilt. Also you can

carry the gun true strongside instead of behind the hip, so you don't have to reach around behind your back for the gun, then bring it out in a big circle around the body during the draw; instead your hand hits the gun butt, you lift the gun, rotate it toward the target and begin instantly punching it out toward the target.

(4) Strongside carry is hugely more comfortable and accessible when seated in a car, since you're not literally sitting on the gun, having its butt jammed up into your floating ribs. Instead the gun sits by your side.

(5) Most inside-the-waistband holsters are thin leather, with the throat band reinforced with a thin piece of weak sheet metal. The typical IWB holster collapses when the gun is withdrawn. The only IWB materials of which I am aware that will not collapse on you are properly treated horsehide and Kydex.

(6) Leather holsters start out gripping the gun too tightly, break in over time, then with use be-

# ar Holster Material - Here's Why <sup>65</sup>

Kydex's stiffness means the holster body can be positioned much lower relative to the belt attachment without letting the gun flop around. While true even for standard concealment-oriented designs, it's even more so for the dropped and offset (DOH) holsters often recommended for women. (Right) Note how far the DOH holds the gun away from the body. This would be impossible with a leather holster.

The author used this Wilson 30th Anniversary Model, Blade-Tech Standard Belt Holster and double mag pouch, all threaded onto a 1-3/4" wide Kramer black sharkskin and horsehide dress gumbelt, to pass the Firearms Academy of Seattle's Handgun Master test for the third time.

The author is not a fan of sweat shields, believing they interfere with getting a full grip with first hand contact to the gun. The application of a buffing wheel has taken the sweat shields on his own Kydex IWBs down to about a third of their original height.

Kydex may be softened with a readily available, affordably priced heat gun. The belt loops on both these holsters have been modified to snug the gun in tighter to the body, in two different fashions. The Blade-Tech (left) has had both loops pushed-in in a crescent fashion, especially the rearmost loop, the Comp-Tac (right) has had the center of both loops pressed inward.

The best Kydex holster currently available – in the author's opinion – is the Comp-Tac Speed Belt Holster, shown here with Keith Tsang's Smith & Wesson M&P9L.

come so loose they're unusable. Kydex holsters don't stretch, most designs feature tension screws allowing you to adjust the tension where you want it, right off the bat, and then they never stretch out.

(7) Kydex holsters may be heated using a commonly available heat gun (\$24 at your local hardware store), then remolded by hand. I have never found a single Kydex holster the belt loops of which gripped my belt as tightly as I like. With a heat gun I can easily custom adjust the belt loops to my preference.

Nothing is 100 percent great, and Kydex holsters are no exception. There are three shortcomings of Kydex as a holster material.

(1) Kydex is hard on a gun's finish. In my experience, leather and Kydex will both ultimately wear a gun's finish to the same degree, but Kydex gets there much faster.

(2) Kydex makes a very distinctive clattering noise any time you draw or reholster the gun. If you happen to be a ninja, this could be a real concern.

(3) The history of weapon-disarmament training shows us that when two people are struggling over a holstered gun, Kydex holsters simply come apart. Not to downplay the importance of being trained in weapon retention, but I must point out this is a far more likely scenario for a uniformed police officer or armed security guard wearing an exposed gun than for the discreet concealed gun carrier.

## SUMMARY

While nothing is perfect, in my opinion the kydex holster's few shortcomings are far outweighed by its stiffness, low ride, draw speed, straight-drop option, comfort and accessibility while seated in a car, resistance to accidental compression in IWB designs, easily adjustable tension screws, lack of break-in period, resistance to long-term stretching, and moldability. These are the reasons a huge and growing number of serious shooters/gun carriers make their daily concealment rig a Kydex holster.

**Evolution Gun Works**  
 These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.  
 Stainless K33-18600 \$49.99  
 Blued K33-18601 49.99

## Adjustable Target Sight for 1911s

This **Adjustable Target Pistol Sight** is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.  
 Adjustable Pistol Sight K33-18210 \$53.95

# ElZetta

## Tactical Flashlight Mounts

Every ElZetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire®, and of course, the ElZetta® ZFL-M60. (Sizing Adapters are not required when using an ElZetta ZFL-M60 or other 1-inch lights.) The ElZetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular ElZetta ZFH1500.

The NEW ElZetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the ElZetta ZFL-M60. The ElZetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

## Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,  
30mm tube and

bright illumination of the reticle are just a few of the many features of the DMS-1. Bright red illumination of the reticle adds to the quickness of the sighting system in day and low-light conditions. At one power it works well as a reflex sight and at longer ranges the four-X magnification gives increased accuracy.

K33-19458 \$249.95

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

K33-11643 \$89.95

## SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle K33-25374 \$72.95  
Scout Scope Mount for SKS Rifle K33-25373 67.95

Winchester Model 70 Short Action + 20 MOA	K33-19986

## 90 Degree C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE

(Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

A. Ruger MK1	K33-19535	\$79.95
B. Browning Buckmark	K33-19534	79.95

## Tactical Sports 45° Offset Optics Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)

How do you make a Savage rifle even more accurate? Well, as the adage goes, you can't kill what you can't see, so you include a Nikon 3-9x40 BDC reticle scope, mounted and bore sighted. This unique reticle can be ballistically matched to your exact cartridge using Nikon "Spot On" Software. Coincidentally, the price of the New package is "Spot On" too. See your favorite Savage dealer for details.
