Dillon's RF 100 Automatic Primer Filler

***Eliminates the need
for primer pick-up tubes!***

***Fills the primer tube
while you reload!***

***Clear polycarbonate shield
and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$48.95 each.

We READ Our Mail!

I couldn't find the official LETTERS address. I am sure many of us with aged eyes would appreciate if the writing were larger in some areas. I enjoyed the December 2016 article on the .300 AAC Blackout. I discovered this round not that long ago, read some impressive reviews, and bought a .300 BLK RRA upper for my RRA LAR15. Unmentioned by Mr. Benz is the use of a readily available lower-tension recoil spring. I use one and the function has been flawless and I have no need for exotic magazines.

Martyn Hawkins – Oak Island, NC
Martyn, I hope you enjoy this new, larger-trim-size (and larger-print) version of The Blue Press.

The [December 2016] article describing the evolution of the S&W 3913 outlined Paris Theodore's innovation and talent. That talent was not limited to handguns. He also developed holsters for concealed carry that were effective, comfortable and really well made. The reputation of Seventrees, NYC was so good at the time that this statement was common. "If you find a Seventrees holster, buy it. Then, go buy the gun it was made to fit." I am fortunate enough to own a Seventrees holster that served me well for years.

Walt Hodge – hodgewalt@gmail.com

Thanks for this issue of *The Blue Press* [December 2016], in particular the report on the Century Arms C308. Many decades back when serving in the West German Air Force, the HK G3 was the standard-issue rifle and I have vivid memories of dragging it through mud, sandy forests, swamps etc., during boot camp and NATO exercises, and although it was loaded with weak blank cartridges, one shot would clear it from all dirt and muck and it would never jam. Our American brothers-in-arms used to put duct tape on every "body opening" of their M16s just to keep the dirt out. I also want to report I fired 18,000 rounds from my GLOCK 19 without it ever having been cleaned. Not once. Not a single malfunction. Only the trigger weight increased a lot. And, all those 18,000 rounds were loaded on the excellent Dillon XL650 I use – and recommend to any serious shooter! Keep up the good work!

Which Dillon is Right for YOU?

Page 8

SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

RL 550B

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

BACK TO BASIC: KINGSTON

Reviewed by Peter Caroline

Shortly after my college graduation, I found myself at Fort Dix, New Jersey, engaging in a rite of passage entitled "Basic Training." After several weeks of Zero Week details while we accumulated a full training complement, I became acquainted with my new Best Friend, the M1 Garand

hailed by no less than General George S. Patton, Jr., "The greatest battle implement ever devised." I learned the nomenclature of its parts, how to take it apart and put it back together again under a blanket, and eventually, even got to shoot it at targets at various distances. During bivouac, despite my astigmatism and a nasty case of the prevalent Asian flu, I qualified as a Sharpshooter and earned the appropriate medal. The M1 was my constant companion. I cleaned it, drilled with it, carried it on long marches and learned the truth of the statement, "The M1 Garand rifle weighs 9.5 pounds, and after one mile, the decimal point falls out."

After being discharged from active duty, I was issued an M1 in Reserves. I thought about getting one of my own, but the going rate for a surplus

Garand was \$87.50, which was a princely sum for someone who was supporting a series of decrepit cars. Years later, under improved financial circumstances, I did pick up a very nice Winchester-made M1, which was equipped with a polished stock, a glass-bedded action and a number of National Match parts.

One M1 should be enough. But we all know better. At the 2015 SHOT Show, I happened to stop by the Kingston Armory booth, where they were displaying what looked to be an issue Garand in new condition. A closer look revealed it to be a .22! Unfortunately for my budget, I am fatally addicted to .22s. At the moment, this particular .22 was not in full production...a status that is not uncommon to many SHOT Show introductions. I left my card and a copy of my FFL and waited. After nearly two years had passed, I finally received a large package from Liberty, New York. My .22 LR Garand had arrived!

The Kingston Armory .22 Garand is, visually, a near duplicate of its .30 caliber inspiration. It is stocked in a very nice piece of genuine American walnut, and the front and rear sights, buttplate,

THE FRONT AND REAR SIGHTS, BUTTPLATE, SLING AND STACKING SWIVELS ARE IDENTICAL TO ISSUE PARTS.

ARMORY .22LR M1 GARAND ¹¹

sling and stacking swivels are identical to issue parts, although they are newly manufactured. Under a hinged cover in the buttplate are two cylindrical cavities for storing cleaning and lubricating accessories. The gas cylinder looks like the original, even though it is non-functional. Under this convincingly GI façade, however, is a very 10/22-like action, crafted from 4140 steel, complete with a 10-round rotary magazine, much like that of the familiar 10/22, but sturdier. The gun weighs 9.75 lbs. – actually a quarter pound more than the issue .30 caliber M1. There is, alas, no bayonet lug. So if you need to finish off a recalcitrant squirrel, you'll have to butt-stroke it.

Shooting the Kingston Armory M1 was a revelation. I set up my Knothole Design portable bench, with sandbag, at a convenient spot in the desert, and placed my target frame 25 yards away. I'd brought along a quantity of Remington Thunderbolt, Aguila SuperExtra and Eley Club ammo. As I mentioned, the sights are identical to original issue, with a rear peep sight adjustable for both windage and elevation. Front sight is a square post between two

flared protective ears. My shooting buddy is a Vietnam veteran who didn't have the advantage of being trained with a genuine walnut and steel battle implement. He was initially a bit put off by the weight of the M1, but quite impressed by its accuracy. Each of our 10-round groups could be covered by a nickel! As I knew from Basic, the

Garand sights are an invaluable aid to accurate shooting, and the 2-lb. trigger pull of this .22 version puts the frosting on the cake. Both function and accuracy appear to be unaffected by a varying diet of ammunition.

My friend asked why would one need a nine and three-quarter-pound .22LR rifle that retails at \$699, when a far lighter, less expensive .22 will serve the same purpose. I could ask him, why does he need a large vintage Jaguar touring convertible that he won't drive on a rainy day? The answer is, pure joy...a scarce and

desirable commodity in these dreary days of mass-produced dreck.

BL 550 Dillon's Basic Loader

\$274⁹⁵

N54-15399

Reloading Dies and Caliber
Conversions sold separately
(see the back of the order blank
in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount N54-22051 \$48.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

XL 650 (Electronic Scale)	N54-22118	266.95

Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

Square-Deal-Only Wrench	N54-19970	8.95

Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	N54-97126	\$149.95
----------------------	-----------	----------

Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	N54-16306	\$41.95
--	-----------	---------

Dillon's Roller Handle gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Dillon's Case Preparation Equipment

CV-2001 N54-20493 \$189.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

CV-750 N54-19455 \$145.95

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

CM-2000 Case/Media Separator N54-20675 \$75.95

CM-500 Case/Media Separator N54-21045 \$47.95

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers: Case Cleaners are available in 220 volt!

Euro CV-2001 N54-22047 \$214.95

Euro CV-750 N54-19473 \$170.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **N54-13804 \$8.95**
Case (20 pc.) **N54-20255 135.95**

Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **N54-13733 \$8.95**
Case (20 pc.) **N54-20256 135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **N54-21375 \$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **N54-13287 \$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **N54-13496 \$15.95**

Short Trim Die Toolhead**

N54-62219
\$224.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the Blue 1050 toolhead stand - Part Number N54-62200, \$49.95 - is not included.)

Dillon's New Rapid Trim 1500 Case Trimmer ²³

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **N54-62164** is **\$330.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **N54-13141**, are **\$19.95** each. Upper lock rings, **N54-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Dillon's Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original. This belt is a favorite with law enforcement, military personnel, fire-

fighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

Close & Ready Holster Caddy

Holster NOT Included

The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

N54-18046 \$29.95

DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

N54-19371 \$29.99

BLADE-TECH™

"Revolution" Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

Klipt IWB Holster

The Klipt Appendix "Inside the Waist-band" holster is an ideal way to conceal and securely carry a small- or medium-frame auto or J-frame revolver. Your firearm locks securely into the holster with the signature Blade-Tech click.

ANNOUNCING: Mr. Bulletfeeder® by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

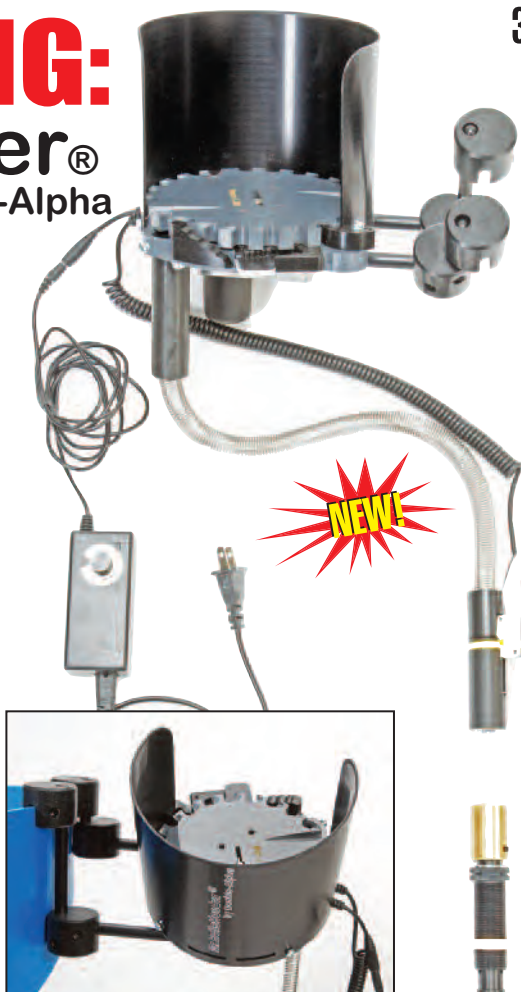

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the case-feeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

Dillon's Pistol Die Sets

Size Die

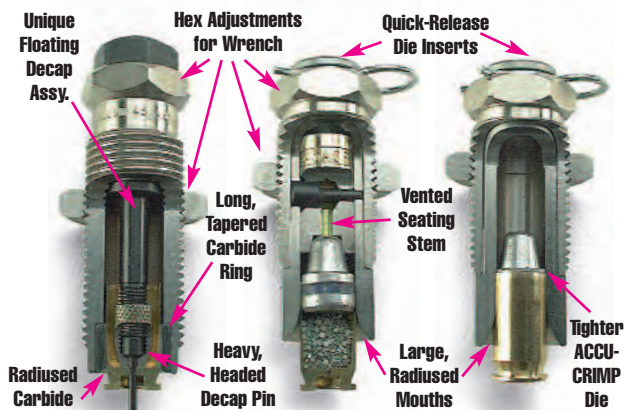

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

CLASSIC FIREARMS: The S&W N

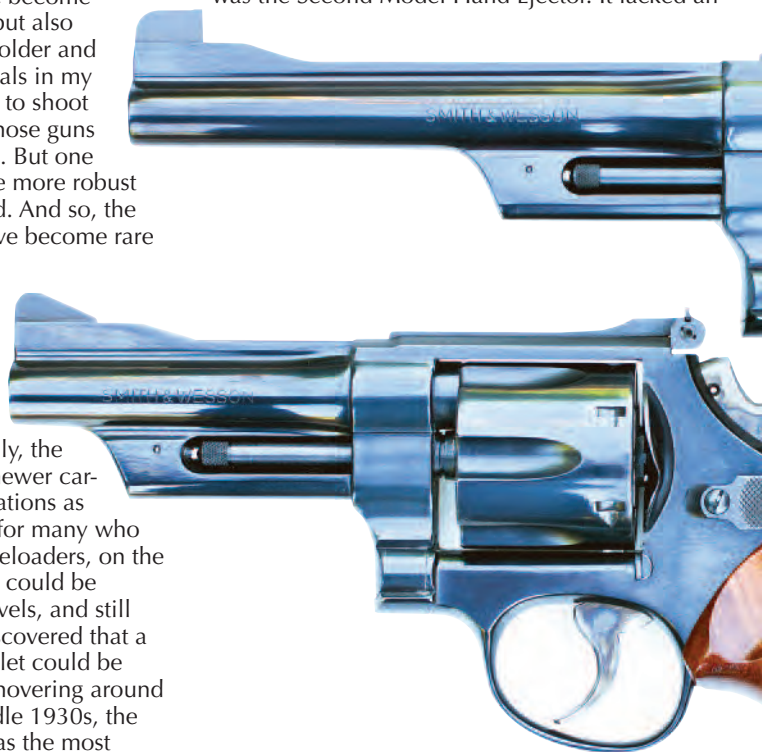

By John Marshal

For those who know me, it's no secret that I'm a great fan of the .44 Special cartridge, and for many of the revolvers that have chambered it over the years. The .44 Special is intrinsically accurate, easy to reload to virtually any power level, and with factory ammunition, way easier on the hand than its .44 Magnum offspring. It allows lighter handguns than are needed for the Magnum. Since 1955, .44 Magnum revolvers have become popular not only for their power, but also because they can also handle the older and milder .44 Special. For guys and gals in my age bracket, it's not unusual for us to shoot more Specials than Magnums in those guns to protect aging wrists and elbows. But one then has to put up with guns made more robust and heavier than are really needed. And so, the lighter guns for the .44 Special have become rare – and more sought after!

Some history is in order here. The .44 Smith & Wesson Special cartridge came into being in September 1907. It was simply a slightly elongated version of the older .44 Russian, designed to hold more powder. But inexplicably, the ammunition companies kept the newer cartridge loaded to the same specifications as the older one – a disappointment for many who saw the potential of the Special. Reloaders, on the other hand, found that the Special could be souped-up to impressive power levels, and still fired with relative safety. It was discovered that a 250-grain cast semi-wadcutter bullet could be propelled at maximum velocities hovering around 1,200 feet per second. In the middle 1930s, the new .357 Magnum was heralded as the most powerful handgun cartridge. Not true by quite a margin for reloaders, who showed that a specially loaded .44 Special could have not only higher energy, but an edge in accuracy as well. A group of .44 Special reloaders called themselves the “.44 associates” in the 1930s, swapping loading data and routinely referring to the vaunted .357 Magnum in derogatory terms!

When the .44 Magnum cartridge was introduced in 1955, it turned out that it had only a slightly lengthened .44 Special case. The purpose of that was not to allow greater powder capacity, but simply to keep .44 Magnums from being inserted into older .44 Special chambers. For most folks, the factory-loaded .44 Magnum has way more power and recoil than is needed, and the revolvers chambered for it are unnecessarily bulky and heavy. Like Goldilocks, they will often find that .44 Special guns are “just right.”

The first Smith & Wesson revolver chambered for the .44 Special came out in 1907 as the New Century Triple Lock. Today it's a prime collector's item – hard to find and very expensive. Elmer Keith, legendary gun writer, worked up some heavy .44 Special loads for use in this handgun, but damaged it doing so. He later warned not to use his loads in the early guns that lacked proper cylinder heat-treating. The Triple Lock's successor was the Second Model Hand Ejector. It lacked an

ejector rod shroud and the third cylinder lock. It's also nearly extinct and practically unobtainable today. A 1926 model with an ejector rod shroud was made from that year up until World War II, and manufacture of it then resumed from 1946 to 1948. In 1950, the “1950 Target Model .44” was offered. It was considered the finest of all the .44 Special S&W revolvers up to that time. It had a newer short-cocking action, and sported a tapered 6.5” barrel with a target-style Patridge front sight to go with the great post-war micrometer rear sight. A few were made with 4” barrels that were equipped with ramped (Baughman) front sights. A few specially made 5” barreled guns have been noticed. All of these guns had ejector rod shrouds.

When S&W assigned model numbers to all of their handguns in 1957, these revolvers became the Model 24. There was a Model 21 with fixed

Model 24 .44 Special Revolvers

sights and shrouded ejector rod, previously known as the Model of 1950 .44 Military. These were offered from 1950 to 1966 with about 1,200 made.

Unfortunately, with the dominance of the Model 29 .44 Magnum and the need for large N-frames to produce the .357 Magnum Models 27 and 28, the Model 24 got short shrift in both demand and production. It was discontinued in 1966, to the dismay of those who prized it. In that

year, this fine revolver's final price was \$95. In 1982, collectors and shooters were paying in the range of \$600 to \$800 when they occasionally found one or more in excellent condition. Gunsmiths

were converting .357 Magnum Model 27s and Model 28s to .44 Specials to meet demand. A number of gunwriters, including Skeeter Skelton (whose writings I treasure), were pressuring S&W to re-introduce the Model 24. And then Smith & Wesson responded!

In 1983, S&W began to manufacture the "Model 24-3 1950 Target" revolvers. These were nearly identical to the original Model 24, but incorporated a non-pinned barrel, a 3-screw side-

plate and eliminated the screw in front of the trigger guard. In 1983 and 1984, 2,625 were manufactured with 4" barrels and 4,875 with 6.5" barrels. Front sights on each were the same as the originals. The introductory price was \$391. The revolvers pictured here show these two main variations. The top one with the 6.5" barrel was shipped in April 1984, and the lower one with the 4" barrel left the factory in March of the same year. Smith & Wesson also included original parts sheets for the Model 1950 Target in the boxes with each of these guns. Interestingly, some of the first guns made were crafted with available Model 29 frames and older Model 24 barrels. The first 100 of the new "dash 3" handguns made were factory engraved and had smooth walnut stocks. Twenty-five of these were nickel finished and engraved.

A 3"-barreled variation of the 24-3 was made for Lew Horton Distributors in 1984 and 1985. These had round butts, smooth "combat" stocks, red-ramp front sights and white outline rear sights. It's been reported that 5,000 of these were made, 1,000 of which were provided with black holsters. Some commemorative .44 Special revolvers were made as the "Through the line" variation of the "Twelve Revolvers" series. These were designated as the 24-4 models. In 2001, a 4-screw-frame Performance Center Heritage Series model became the Model 24-5. In 2006, 250 3"-barreled guns were made in blue and the same number in nickel for Lew Horton Distributors. These Model 24-6s had square butts with diamond-checked regular magna rosewood stocks.

A "Thunder Ranch" Model 21 with a 4" barrel also appeared in 2006. Stainless steel revolvers designated as the Model 624 were produced from 1985 to 1988 as the "Model of 1985 Target Stainless." Both 4" and 6.5"-barreled variations were made. Five thousand 3"-barreled stainless round-butt 624s were specially manufactured for Lew Horton Distributors.

Alas, no current .44 Specials are being made at Smith & Wesson. While many consider the .44 Special to be obsolete, a dedicated cadre of aficionados still hunger for and occasionally find long-sought-after revolvers that chamber this round. As before in the early 1980s, asking prices are continuing to rise for these quality revolvers, and are usually, if grudgingly, paid.

Today, all of the wonderful S&W .44 Specials continue to be in high demand with shooters and collectors. Pre-owned Model 24s, in particular, continue to be snapped up at gun shows and dealers whenever they come on the market. They have been proved to be a highly desirable combination of accuracy, comfortable weight and extensive range of power. Classics all.

DESIGNED WITH THE TOUGHEST STANDARDS IN MIND BUILT TO PERFORM IN THE HARSHTEST CONDITIONS

RUGER AMERICAN PISTOL™

Anything Else Would Be Un-American.™

Designed with the latest U.S. Military standards in mind, the **Ruger American Pistol**™ is built to perform in the harshest conditions. A true American innovation, this pistol was developed through a rigorous "Voice of the Customer" process—where numerous law enforcement and military trainers, firearms experts, distributors and retailers provided input, feedback and testing in the determination of the form, function and features of this firearm. The resultant new pistol is a revolutionary platform for Ruger, one that utilizes the combination of a recoil-reducing barrel cam (which is designed to better spread recoil energy over time) with a low mass slide, low center of gravity and a low bore axis to provide an unparalleled shooting experience.

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

N54-21894 \$44.95

Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

N54-17519 \$9.99

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

N54-19972 \$39.95

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms.

Made in the USA and comes with a lifetime warranty.

Berry's Mfg. Clear Ammo Can

N54-17518 \$9.99

Dial Caliper

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!

ROLLERFOLLOWER™

THE TACTIC

ABOVE: Tactical Reload 1-6 – The author demonstrates the progression of the tactical reload as he was taught by Ernest Langdon, starting with the magazine already in hand.

Obviously, if your magazine were still in its pouch, you would start from there. The technique is being demonstrated with empty magazines for safety reasons.

RIGHT: Tactical Reload A – The author shows his index finger indexed up the front of the magazine.

This is being demonstrated with an empty magazine as the handgun was close by.

Tactical Reload B – Here we see the author demonstrating the initial grip on the spare magazine as it was assumed upon withdrawing it from his magazine pouch.

Tactical Reload C – Here the author demonstrates indexing the magazine by placing the index finger over the nose of the bullet in a loaded magazine.

Tactical Reload D – The author demonstrates how the index finger shifts to the side of the magazine in preparation for the tactical reload.

By Cameron Benz

Ahhh...the tactical reload, love it or hate it, at some point, we need to fill our guns back up even if they aren't quite empty. It's a skill that can be seen as another tool in the proverbial toolbox, though some techniques are about as relevant as a Sony Betamax player in modern times unless you're competing. Recently I had the good fortune to attend a class instructed by USPSA Grandmaster Ernest Langdon of Langdon Tactical Technology. During the class, Ernest was kind enough to share a twist on the established tactical reload techniques that is the most relevant I have yet seen.

First, I'm going to step back a moment. Let's define a tactical reload. In essence, it is a reload performed by grabbing a spare magazine from your magazine pouch (you do carry at least one spare mag, right?), removing it from the pouch, moving it to a position where your support hand catches the released partially filled magazine, inserting the fresh magazine, and securing the partial magazine in a pocket or back in your magazine pouch. As you may know, this differs from a reload with retention in that the magazine is removed from the firearm before retrieving a spare magazine from wherever it is stowed.

Various methods of the tactical reload have been around for quite a while. Initially there was the version that had the shooter capturing the partially loaded magazine between the pinky and ring finger. While borderline ok with single-stack

mags like those used in the 1911 that the technique was developed around, let's be honest, how much dexterity do most of us really have in the last two fingers of our hand? This got to be even more questionable when utilizing a pistol that uses double-column magazines. "Awkward" and "clumsy" are two adjectives that come to mind.

A later variation required shifting the fresh mag to a cigar hold between the index and middle fingers, catching the partial mag between the thumb and index finger, then inserting the new mag in the pistol while it was still between the index and middle fingers. Maybe better than the first version but now we're inserting the fresh mag from a part of the hand that isn't usually accustomed to it which seems to me like an unnecessary complication of technique.

Yet another variation involved coming up to the gun, just like we would with the first version where we have the fresh magazine in our hand, and still catching the partial mag between our pinky and ring fingers, but we quickly move the partial to being held by the pinky and ring finger of the firing hand (which is still on the pistol by the way), inserting the new mag, then retrieving the partial and stowing it. So now, not only are we relying on the dexterity of the least dexterous digits, we're also weakening our firing grip should we face an interruption.

So far, the possibilities of screwing up and yard sale-ing both mags and, if we're having a

AL RELOAD

really bad day, possibly ammo should we happen to lose a baseplate, seem pretty high. I'll leave it to you to decide how many curses you'd use but suffice to say, it would probably be worth at least a half dozen for me.

In the real world, cases of reloading during a self-defense encounter are rare. In fact, cases are so rare as to be almost newsworthy. According to instructor Tom Givens, it has been more common to have defenders end an encounter with an empty magazine. Be that as it may, we all need to perform reloads whether it's in competition or just shooting on the range. I've heard of exactly one incident where a law enforcement officer utilized a tactical reload during a gunfight and that anecdote came to me via Ernest. Other than a match or two that I shot, the only times I've used it have been on the firing line in classes and in a shoot house running Simunitions. Our magazines were downloaded to 12 rounds as more than that would cause the Sim guns to malfunction. I had expended six rounds and, before moving into a hallway, had the sudden thought, *Hey, I know I've fired a few and I don't know how many more threats I'm dealing with, I think I'll top up the gun and set myself up for success here.* In essence, it isn't a commonly needed technique but if you need it, you'll probably be happy you know it.

This brings me to the tactical reload as I learned it from Ernest Langdon. First, we break the gun to the reload position (I keep mine up high, just

below my line of sight) and making sure our trigger finger is off the trigger and indexed up along the frame, as the left hand retrieves the magazine from the pouch. As we get close to the gun, the index finger of our reloading hand will bend down to act as a separator between the new magazine and the partial magazine. Once our support hand is in position, we will press the magazine release and catch the partial mag, between our index and middle fingers. After we have caught the partial mag and it has cleared the mag well, we will insert the fresh mag firmly (like we mean it, as I've been known to say). We will now stow the partial mag in a pocket, or whatever spot we've designated, and then move back to our two-handed firing grip and then to whatever is necessary, be that a ready position or to engage a suddenly appearing threat. The advantage of this technique is it is only a slight departure from a speed reload or empty/emergency reload as we're grabbing the more important fresh magazine and inserting it with the most dexterous part of the hand.

In the end, the need for this technique outside of competition and training is probably very slight. That said, a few repetitions to get it down so that you execute it correctly when you do decide to use it, can't hurt.

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

The RCBS Trim Pro-2 manual case trimmer now features a spring-loaded "universal" shell holder that will accommodate case head diameters from .250" to .625". Comes with pilot calibers: .22, .24, .25, .27, .28, .30, .35, .44 and .45.

Dillon's Bench Wrench

Fits 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

N54-19495 \$9.95

Arredondo Accessories' Multi-Gun Chamber Flags

Made of tough nylon with a melting point of 480 degrees. Kit includes one shotgun chamber flag and one for your AR-15.

N54-15485 \$11.95

Elzetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

N54-14762 \$29.95

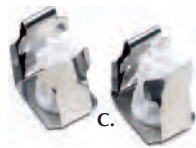

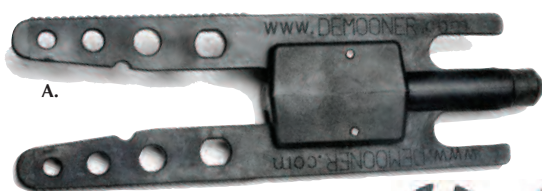

TARGET SPORTS® TACTICAL

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

N54-15384 \$24.95

Spyderco's 40th A

By Duane Thomas

Famous knife company Spyderco was started in 1976 by Sal Glessen, and headquartered in Golden, Colorado. In 2016, to celebrate the company's 40th anniversary, Spyderco produced a limited run of a special commemorative version of their popular Native 5 folder. A bit about that "40th anniversary" thing; you would expect such a knife to have been introduced at the beginning of 2016, however Spyderco was very frank with me that it took them a lot longer to get in blades for this project than they thought it would. It wasn't until around 3/4 of the way through 2016 that 40th Anniversary models started rolling off the assembly line, and this knife will be available until well into 2017.

If I had been choosing one of Spyderco's many available knives as the basis for their 40th Anniversary Model, I would have made it one of the larger units, maybe a Police Model. Thankfully, the folks in Golden, Colorado are much smarter than me. They chose one of their smaller folding, clip-style pocketknives, the Native 5. The Native has been a very successful knife for Spyderco since its introduction in 1997, witness the fact, as evidenced by the "5" in its current model designation, it's now into its fifth design generation. Main differences between the Native 5, which was introduced in 2012, and the first Natives is that the 5 features screw together construction (first introduced in the Native 4) and a CPM S35VN blade with a full flat grind.

In order to make the 40th Anniversary model special, while sticking to the very functional Native 5 design in its overall shape, both the blade and handle were given distinctive visual touches. The most obvious, immediately noticeable thing about the 40th Anniversary Model is that its blade is made of Damascus. This is actually a material called DS93X Martensitic Damascus Patterned Steel from a company named Damasteel in Sweden. "Martensitic"

steel is so-called because its characteristic microstructure was first observed by German microscopist Adolf Martens in 1890. Tempered martensitic steel has both high hardness and high toughness, and is commonly used for medical tools such as scalpels, razors and internal clamps.

In order to be considered "stainless," a steel alloy must contain at least 13 percent chromium by content. The Damascus steel used in the 40th Anniversary Model's blade is stainless, but just barely. DS93X is actually a composite of two alloys, RWL34 which has 14 percent chromium (this is the lighter-colored portions of the blade) and PMC27 which contains 13 percent chromium (the darker parts). The RWL34 portion of the material has had molybdenum added to give it greater corrosion resistance than standard martensitic stainless steels. DS93X is formed by welding together over 100 layers of RWL34 and PMC27. It's available in a variety of patterns. The one used by Spyderco for the 40th Anniversary Model is Damasteel's Thor pattern, named for the Norse god of thunder. All markings on the blade come from laser engraving.

The blade itself is very slightly less than 3" long (2.98" according to the Spyderco catalog); the actual cutting edge goes 2.48". Width is a slim .122". Blade shape is a drop point, with a slight belly to the cutting edge, which is, of course, Spyderco's unserrated PlainEdge treatment, since chopping into that beautiful Damascus pattern with a serrated SpyderEdge, or even a half-and-half ComboEdge would be a crime against nature. The top rear of the blade is heavily jimped (serrated); depending on how you grip the knife, you can either lay your thumb there, or, when making cuts that need to be finely controlled and guided, your index finger. And of course, Spyderco's trademark round hole, allowing easy one-handed opening, is present and accounted for.

Anniversary Model

The shape of the handle on every Native Model since the first is basically the same. The rearward bottom portion of the blade flows into the bottom front of the handle to give you a front choil (finger groove) for the index finger; the steel i.e. blade portion of the choil is deeply jimped for a positive grip; then behind that is a second choil for the middle finger. This double finger groove allows a very secure grip on the knife.

The blade when open is held into position with a Back Lock mechanism, which means a hook on a spring-loaded piece of steel snaps into a corresponding cutout in the top rear of the blade. In order to release the blade so the knife may be closed, press down on the rear of the lock (a cutout on top of the handle is provided to allow that), the hook will pivot up out of the blade and the knife may be closed. This is an extremely strong locking mechanism, and also allows for easy one-handed closing. I usually "unlock" the knife then close it by "wiping" the unsharpened back of the blade against my pants covered leg.

Handle scales are carbon fiber, CNC machined with a distinctive pattern that's both attractive and non-slip. The knife is held together with six stainless steel Torx screws; the knife may be taken apart for thorough cleaning should that ever prove nec-

essary. A stainless steel pocket clip is held in place with three removable and replaceable stainless steel screws; moving the pocket clip allows the knife to be carried in any one of four orientations, either blade tip pointing up or tip down, and for a left or right hand draw. The knife comes with the pocket clip set for a blade tip up, right-hand draw, and that's how I've left it. A hole that pierces the scales and the pocket clip allows use of a lanyard, should you so desire. Weight is a light 2.7 ounces.

The 40th Anniversary Model is being produced, even as this is written, in what Spyderco calls a Sprint Run, i.e. it will be a limited-production run. There will only ever be 1,200 40th Anniversary Models made. The first 300 were numbered, special collector's items. The knife you see in this article was one of the very first non-numbered 40th Anniversary Models.

With the 40th Anniversary Model, Spyderco has succeeded in producing a beautiful commemorative version of one of their workhorse knives. But in pursuit of that beauty, they didn't sacrifice the knife's functional qualities. Honestly, if it wouldn't be a sin to scratch up that stunning Damascus blade, I would have absolutely no problem carrying a Spyderco 40th Anniversary Model as a daily working knife.

Extra Loading Data Labels, N54-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x

3-7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.

"SL 900" Bin	N54-17125	10.50	56.94	106.92

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Swab-its – A Swab for Every Job! ⁶⁵

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth **N54-18613** **\$6.99**

Otis

Technology, Inc.
Breech-to-Muzzle
Cleaning
System

The **Otis Technology, Inc. Breech-to-Muzzle Cleaning System** cleans rifles .22 to .50 cal., shotguns .410 bore to 10 gauge and pistols .22 to .45 cal. The system includes three memory-flex rods, three forged brass tips, two obstruction removers, a T-handle, 0.5 ounce solvent, all-caliber patches, a shotgun brush adapter, two patch savers, five bore brushes, a bore reflector and a cleaning guide. Lifetime warranty!

N54-18174 **\$39.95**

M-PRO7

M-PRO7™ Gun Cleaner is odorless, non-toxic and biodegradable. "Safely cleans rifles, handguns, shotguns..., black powder, corrosive priming deposits and much more."

4 oz. **N54-10139** **\$11.95**

8 oz. **N54-10138** **18.95**

32 oz. **N54-11298** **40.95**

M-PRO7™ Copper Remover works up to four times faster than ammonia-based cleaners and is odor free.

4 oz. **N54-19370** **\$11.95**

FrogLube

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

4 Oz. Paste **N54-15443** **\$10.99**

4 Oz. Liquid **N54-15444** **17.59**

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	N54-15571	\$7.95
Slide-Glide Lite	N54-15572	7.95

Microlon UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

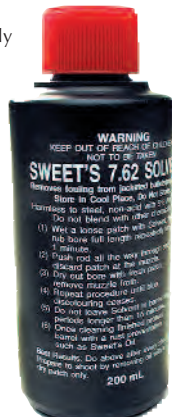

N54-75125 **\$9.95**

Sweet's Australian

7.62 Solvent

easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

Scout Scope Mounts for AK, SKS Rifles

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Grandpa Dillon's Pocket Cannon

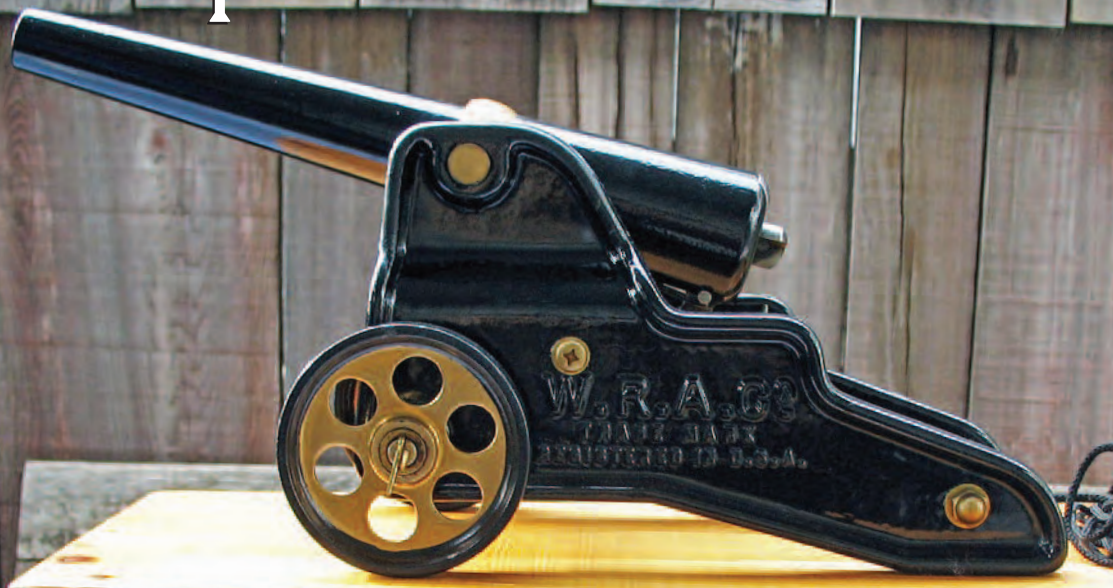

Figure 1: The Dillon family saluting cannon, a Model 1898 Winchester 10 gauge originally bought by the San Francisco Yacht Club for their Sausalito, California, clubhouse. The miniature cannon was used to start and finish yacht races on San Francisco Bay for many years, then given to William T. Dillon, a Coast Artillery officer and hometown war hero. The cannon was then used by the Dillon family from the late 1920s into the early '40s to commemorate Christmas, New Years, the 4th of July, Armistice Day, and, of course, St. Patrick's Day. Restored by David Erin Dillon. *Dillon collection.*

By Brian Dervin Dillon and David Erin Dillon

The Dillon family "pocket cannon" has been kicking around since 1928, first in grandpa's house, then in grandma's basement collecting dust and rust, then in the house we grew up in (where it was used as a doorstop), and now, finally, after detailed restoration, in a place of honor in the junior author's domicile. Like most of our Dillon family guns, its price was right: free.

It was the San Francisco Yacht Club's signal cannon, used to start yacht races on San Francisco Bay beginning in 1903. Contestants would wait for the "boom" when race officials pulled the lanyard, the audible signal to "up anchor," then race each other around Angel Island, or Alcatraz, or around buoys set at measured distances, and then back to the start point. The winner was welcomed home with another 10 gauge blank shot, loaded with 8 drams of black powder, signaling the end of the race.

Despite its "model year" of 1898, Winchester's "breech-loading cannon" was not offered to the public until 1903. It was advertised as a:

"cannon [with]...12-inch, tapered, rolled steel barrel, cylinder bored, mounted on a shapely cast iron carriage....The barrel and breech closure are proved and tested to withstand a much greater pressure than

can be developed by any charge of black powder that can be loaded in a 10 gauge shell....The length of the cannon overall is 17 inches, its height 7-1/4 inches, and its width 7 inches."

The little cannon was a steady seller within its niche market, and 10,000 had been made by 1915. In 1930, just as the depression hit, wiping out demand, a fancy version was offered, chrome plated, and with rubber-tired wheels. This second version is now exceedingly rare. The Model 1898 Winchester "Breech Loading Cannon, 10 Gauge" was still being advertised in the 1940 *Shooter's Bible*, at the bargain price of \$19.98. The fancy, chrome-plated version was listed at \$38.80, and 100 10-gauge blank shells went for \$4.78. Winchester sales records indicate that the final Model 1898 cannon was made in 1958, closing out the run after approximately 19,000 had been produced. Our example has no serial numbers, but others we know of do. Besides the original examples made by Winchester, close copies were also produced under license by the Bellmoore-Johnson Tool Company of Connecticut. Because early versions now bring hundreds of dollars from collectors, reproductions, the polite word for *fakes*, probably made in Pakistan, began to appear around 1974.

The San Francisco Yacht Club, begun in 1869, was the first such organization on the Pacific Coast, and the second Yacht Club to be founded in America. In 1878 it moved across the Golden Gate to Sausalito, but members could not agree on the new location for its clubhouse, so a schism resulted. The "old" San Francisco Yacht Club, primarily with a younger membership, built its opulent clubhouse (Figure 2) on Water Street

(renamed Bridgeway, after construction on the Golden Gate Bridge began half a century later) while the older, wealthier, members formed a new organization, the Pacific Yacht Club, and built their clubhouse in

Whaler's Cove, in "Old Town" Sausalito (Figure 3). The two clubs were at loggerheads for the next 20+ years, the "S.F." variant being inclusive, and constantly expanding, while the "Pacific" variant was exclusive, its membership crepuscular and dwindling. The San Francisco Yacht Club became a social center hosting dances, concerts, and many other public functions; the Pacific Yacht Club home only to an ever-smaller group of grumpy old patricians. The SFYC building burned on March 21, 1897, but was rebuilt, even larger, at the same prominent, central, location. The Pacific Yacht Club failed in 1899, and its building was taken over by the Spreckels family. The San Francisco Yacht Club continued as the jewel of downtown Sausalito until the Golden Gate Bridge opened, and dead-end Water Street

became "Bridgeway," now crammed with honking, bumper-to-bumper, commuters. So in 1937 the club moved across the Bay to Belvedere.

Nine years earlier, even though our granddad was neither yachtsman nor millionaire, he was presented with the SFYC's miniature cannon upon his retirement from 30 years of Army service.

Grandpa Dillon was the obvious choice as recipient of the little cannon upon both of their retirements. The small-town war hero, he was locally famous as *Mr. Artillery* from his peacetime service at Fort Baker just around the point from the clubhouse, but also for his wartime service in the Philippines, South Africa, China, on the Mexican Border and most recently in France during World War I. But the gift was also a means of saying "thank you" to Mabel Dillon, our grandmother, who had played her violin at dances and concerts at the old SFYC clubhouse from the 1890s until Dillon babies began arriving in 1911. The building, where she performed more than a century ago,

Figure 2: The San Francisco Yacht Club's magnificent clubhouse on Water Street (later re-named "Bridgeway," with the coming of the Golden Gate Bridge in 1937) in Sausalito, California. The original building burned in 1897; this is the second clubhouse built at the same location. From 1903 until the club moved across the Bay to Belvedere, on yacht race days what is now the Dillon family signal cannon was fired from the upper story porch. Dances and concerts were also held in the ballroom on the ground floor, where our grandmother provided musical accompaniment on her violin.

Commercial postcard in the public domain.

and where our own later schoolmates George Duke and Stanley Jackson also played in the 1960s, still stands, as today's Ondine Restaurant.

Rich yachtsmen on both American coasts mounted Model 1898 cannons on the bows of their vessels, and fired salutes from them while entering harbor, passing each other out on the briny, but most often to officially open the cocktail hour after sails were furled and the anchor was

Figure 3: Old Town Sausalito, California, in 1903. Whaler's Cove and the Pacific Yacht Club, the two-story building with dock at center right. This small valley was nicknamed "hurricane gulch" after the periodic winds howling off San Francisco Bay. The Pacific Yacht Club was the millionaire "old Fogey's" splinter off the original San Francisco Yacht Club. Its exclusive membership dwindled as its yachtsmen succumbed to old age, and the club finally failed in 1899.

and where our own later schoolmates George Duke and Stanley Jackson also played in the 1960s, still stands, as today's Ondine Restaurant. Rich yachtsmen on both American coasts mounted Model 1898 cannons on the bows of their vessels, and fired salutes from them while entering harbor, passing each other out on the briny, but most often to officially open the cocktail hour after sails were furled and the anchor was

Figure 4: From 1928 until 1943 the Dillon family fired their signal cannon every 4th of July and New Year's Eve in Sausalito, on birthdays and whenever the mood struck. It was put away when the four Dillon boys went off to World War II, forgotten for 50 years, then resurrected and restored in the 1990s. Winchester still sells 10-gauge black powder blank shells for its old Model 1898 miniature cannon, although you may not find them on the shelves of most gun stores. Playful cannon owners sometimes reload them with white flour, confetti, and even streamers, taking care to use the correct wads so as to prevent ignition of such elements.

down. Some even bought multiple cannons so that “broadsides” could be fired. Their silver-spoon nautical offspring were delighted to be given “cannon duty.” Unfortunately, more than a few of these boat-borne examples ended up with Davy Jones after the “First Mate” (mom) heard them go off once too often, or became nervous about potential deafness or eye injuries from incautious use by their pampered progeny.

Backwoods folklore also relates that some of these cannon were used to scare off trespassers when their lanyards were linked to garage or barn doors, even to the top strands of barbed-wire fences surrounding private lands posted *No Hunting* that were, nevertheless, being invaded by poachers. A few were subsequently stolen once intruders, if not scared away by the noise, realized that there was no human being present to back up the auditory threat. Booby traps of any kind are, of course, illegal, as are set guns, and have been for more than a century. Doubtless some of these cannons used as “set guns” were confiscated by police after complaints were received from people “innocently and accidentally” trespassing.

Our Model 1898 cannon, from 1928 onwards, was set out on the steps of the Dillon family house in Sausalito, and touched off for any number of celebratory occasions. No longer would Dillon kids have to run up and down Johnson Street firing 12-gauge shotguns in the air so as to commemorate St. Patrick's Day. Now they simply pulled a lanyard to bequeath the family benediction, a

much louder 10-gauge blast, upon the neighborhood. The two oldest of the four wild Irish Dillon boys, Uncle Bill (1911-1989) and Uncle Jack (1915-2001) also used to take the old cannon out for a little surreptitious market hunting. Long ago, and far away, and not in this jurisdiction, on a favorite lagoon in Southern Marin County, they would load it with a No. 6 duck shot cartridge, conceal it in the tules, put out a few decoys, and then *Frisbee* pieces of stale bread out towards open patches of water. When the mallards descended into their line of sight, the lanyard was pulled. This earlier generation of Dillon brothers would then row the family duck boat out and collect their bounty. The ducks were sold to the local Chinese grocery, not too far from the San Francisco Yacht Club clubhouse where, after plucking and cleaning, they were hung up in the window to tempt passersby. Later generations of kids in Marin County would flip burgers or run paper routes for pocket money – not so the Depression-era Dillon boys: they shot ducks with a cannon. By 1943, however, with Grandpa Dillon gone to his reward, and all four of his Army brat sons now in service to their Uncle Samuel, Grandma Dillon put the little artillery piece in storage, and it was half-forgotten.

A half-century later, Grandpa's old signal cannon went to younger brother Dave Dillon while older brother Brian was otherwise occupied far away in Central America. It was in pieces, with various fasteners missing, including the very problematic, large, thin, nuts locking the wheel axle to

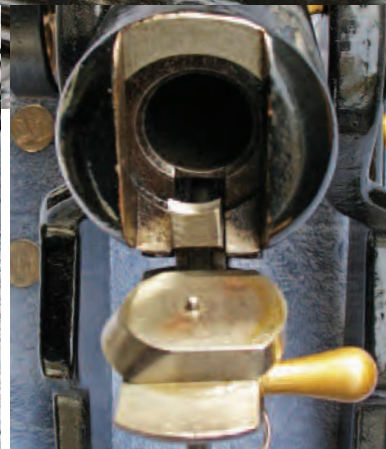

the frame. Dave learned of a group of Winchester Model 1898 Cannon aficionados and restorers through whom replacement parts could still be ordered, and who also had brand-new replicas of the original shipping boxes the old signal guns came in. Unfortunately the old gun, exposed to salt air for almost an entire century, had lost all of its original finish and was covered with a skein of surface rust. So full restoration and repainting was indicated. After much prep work, high-temp engine enamel was applied, in a two-tone color scheme. Now the old cannon, at least in our humble opinion, looks better than new.

A Winchester cannon club used to exist online, but now has disappeared. It offered restoration tips, help with spare parts and provided legal advice to owners where local law enforcement was unclear as to the status of such guns. Signaling devices (flare guns, miniature cannons, etc.) are perfectly legal to own, especially in maritime contexts, yet possession of anything that could be considered a "sawed-off shotgun" invites class-1 felony questions, at least by rookie LEOs. Therefore, it behooves all Model 1898 Winchester Cannon owners to remind any and all law enforcement officers and nervous neighbors that what they have are legal signaling devices, not illegal bank-robber guns. But where and when you can

fire them is a different matter. Dave Dillon's initial interview with local police as to the legality of firing his newly restored cannon in the nearest public park resulted in lots of head-scratching, and an "I'll have to get back to you," answer, which, of course, never came. Faced with the likelihood that touching off even one round on the nearest baseball diamond might send all local pink-poodle owners running for 911 on their speed-dialers, and the imminent arrival of the SWAT Team, brother Dave only fires the resurrected miniature artillery piece on gun ranges, after formally securing permission to do so.

And on every range where it makes an appearance, the old San Francisco Yacht Club signal cannon invariably is the big hit of the day. All other shooters safe their guns, and form a semi-circle behind the third-generation Dillon to yank the lanyard on the old Model '98. The black powder blank emits a very loud, very deep, BOOM, and produces a satisfying white cloud of smoke, sometimes in doughnut form, typically shot through with bright red live embers. It is no less spectacular at night than in the daytime. So Grandpa Dillon's old pocket cannon still makes its presence known on New Years, the 4th of July, and St. Patrick's Day, 110+ years after it first began to sing its one-note song out over San Francisco Bay.

101 Classic Firearms by John Marshall 83

Dillon Precision announces the release of John Marshall's new book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, a compilation of the author's popular articles appearing in *The Blue Press* since 2007. **101 Classic Firearms** is sure to be a welcome and prized addition to the library of any serious firearms aficionado.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hard-cover with 224 pages packed

full of insights and history on some of the world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. He is also an endowment member of the National Rifle Association.

Price: N54-40133 \$29.95, Autographed N54-97130 \$34.95

Competition Reloading with Brian Enos guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting.

Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

Making Ammo: A Beginner's Guide to Handloading by Kyle Lynch – Ammo shortage? Not anymore! Learn a new hobby that will save you money and ensure that you always have enough of the right ammunition for your shooting needs. This guide offers you an opportunity for first hand information from an experienced reloader as he takes you through the reloading process. Examples explain what works and what doesn't. If you are new to reloading or want to understand the fundamentals more fully, this guide provides simple step-by-step instructions.

N54-43270 \$23.95

Legally Armed: A Concealed Carry Gun Law Guide – Learn the basics of concealed carry and the laws associated with this astronomically growing group of self-reliant Americans. If you depend on a handgun for the protection of yourself or your family, arm yourself with knowledge, too. What's inside? What to consider before carrying a firearm • Protecting oneself: discharging a firearm in self-defense • What to do when interacting with Law Enforcement • Gun handling, practice and storage • State-by-state quick reference guide to carry laws where you live and travel.

N54-43269 \$14.95

Armed & Smart: A Beginner's Guide to Concealed Carry – If you are new to concealed carry and need a great resource for information, this is the book for you. This book covers all the basics a beginner needs to know.

Before you make the decision to exercise your Second Amendment right to bear arms through concealed carry, you should consider factors like what type of gun is best for carry, when to carry a firearm, how to carry concealed, and why you should carry a concealed firearm.

We carefully cover handgun safety and the proper steps for using and caring for your firearm. Other topics include cartridge selection, accessories available, practice techniques, and range etiquette.

N54-43232 \$16.95

Armed & Smarter: Advanced Concealed Carry Weapons & Training – Once you have mastered the basics for carrying your concealed firearm, you need a book to build on that foundation and hone your skills to those of an intermediate-level handgunner. After obtaining your concealed carry permit and securing a firm grasp of the responsibilities attendant to carrying a concealed firearm, it's time to focus on becoming an excellent marksman.

In *Armed & Smarter*, our authors prepare you, the shooter and gun owner, to handle and use your handgun responsibly. By the end of this book, you will understand the importance of strong habits and perfect practice.
