# RUGER SILENT-SR®

## TOP-TIER SOUND REDUCTION

REDUCES SOUND PRESSURE LEVELS OF .22 LR, .22 WMR AND .17 HMR PISTOLS AND RIFLES BY UP TO 40 dB

The **Ruger® Silent-SR®** sound suppressor\* features best-in-class materials and advanced design, resulting in a lightweight, compact size and top-tier sound reduction. It was designed and built by Ruger utilizing the very latest in fluid dynamic simulation and computer numeric controlled (CNC) machining equipment. The Ruger® Silent-SR® is easy to disassemble and clean. Each piece snaps together to seal the baffles and keep the byproducts of combustion away from the tube and end caps. It is also strong and light, utilizing a titanium tube, aluminum rear cap, and stainless steel threaded mount, baffles and front cap. Ruger has selected the best material for each part to maximize strength and minimize weight without sacrificing durability.

Compact and Lightweight  
for Balance and Portability

Easy Disassembly for Cleaning

Compatible with a Host  
of Ruger® Firearms

\*Sound suppressors are not available in all states and locales due to laws restricting their ownership and use. Prior to purchasing, please check your state and local regulations to verify that you may legally possess a suppressor.

# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$48.95 each.

## Better Pockets for Pocket Carry (Not Smaller Guns)

Anyone who carries concealed knows that selecting a firearm and a holster is a balance between comfort, concealment, firepower and the ability to rapidly access the firearm. Many choose small "pocket pistols" for their daily carry, trading off firepower for something comfortable and easy to conceal and access. Besides the small capacity and small caliber of most pocket pistols, the other problem with pocket carry is that most pockets tend to be shallow, tight and thin.

The new Constant Companion cargo pants feature front pockets that are not just bigger, but also better. The front pistol pocket is over 14" deep and constructed from ballistic nylon. The front pocket is lint free, snag free, padded and contoured to maintain the upright orientation of your weapon. The casual style is specifically tailored to make your gun disappear while you move and sit far more comfortably than you could with a traditional holster. The best part is that the wide-opening pockets will swallow most mid- to full-sized double-stack auto pistols.

## We READ Our Mail!

I greatly appreciate your article on the California "shooting troop" sponsored by the Boy Scouts of America. I learned to shoot through BSA back when dinosaurs roamed the earth and still go to the range with my dearly beloved every weekend to whack away on Col. Mike's Salute targets. The training I received defined me as a kid and made me an adult. Kudos to Savage for helping this troop out, as well as all the adults who volunteer their time for all these kids. Would that these opportunities were available to more youngsters. Eagle '66 and father of an Eagle 2004.

Neal Ackerly - neal\_ackerly@q.com

I just read the article about the boy scouts in the April **Blue Press**, it sounds like you have some dedicated people involved in a good organization. Here in Angelina county Texas we have a 4H program with about 40 kids shooting once a week, we have a number of adults supervising including LEO. Our range provides a place dedicated to our youth at no charge, we are a member-only club. Thanks for what you are doing for the kids.

Gary Hubbell, president ARPC -  
ghubbell2004@yahoo.com

I received my order for the 550 priming parts in good order and almost immediately. I installed them and, WOW, I'm back in the saddle again. Flawless. Whoopee! And, Thanks again!

Sincerely,  
Timber Gun Sales, Neil Koshak - Park Falls, WI

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550C

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# A CHANGE F

## NELSON CUSTOM GUNS 1911

### Reviewed by Peter Caroline

In my experience, .22 caliber conversions come in two varieties: those that work great, and those that suck. Back in the 1970s, I traded several guns for a prewar Colt Service Ace. It was a treasure for collectors. If you actually wanted to shoot it, it was a source of endless frustration. Freshly cleaned, it functioned fairly well, with marginal

accuracy. After several magazine loads, it got gummed up, and had to be taken apart and cleaned thoroughly. Some years later, I acquired a post-war Colt .22 conversion unit in new condition. Accuracy was somewhat better, but the same requirement for frequent cleaning prevailed. More recently, I got an unused Colt .22 conversion along with a Colt Stainless Gold Cup .45 in a trade. As it turned out, the reason it was unused was that it was too tight to fit on the

Gold Cup...or any other 1911 in my collection. Reading the manual (always RTFM!), I discovered that it had to initially be fitted to the frame by a gunsmith. Maybe, someday.

At the 2006 SHOT Show, I purchased a 2005 30th Anniversary CZ-75 that was on sale. This is a lovely 9mm barbecue gun, with gun inlays and specially engraved birch grips. Like all CZ-75s, it's a great shooter, and I decided to take a chance and buy the CZ Kadet .22 adapter kit. To my delight, it works flawlessly, is not fussy about ammo and is quite accurate.

Already having too many .22 pistols and revolvers, I pretty much gave up on the idea of a

1911 conversion. I was sitting at the Dillon booth at the 2016 SHOT Show, however, when I was introduced to Larry Nelson and his son, Kevin. They have a shop in Mesa, Arizona, that specializes in competition-level 1911 .22LR conversions, designed by Bob Marvel. They showed me an example of their work, and it looked impressive indeed. Not just another lightweight slide/floating

chamber iteration of the Service Ace, this was a totally different design, closely approximating the 1911 weight and feel. In fact, it will even fit most leather and Kydex 1911 holsters. The unit has a last-round lock open, and can be dry-fired with no risk of damage. Could I get a sample to test? Well, not right away. Apparently, the conversion had been discovered by bullseye shooters, and the Nelsons were swamped with orders.

At the 2017 SHOT Show, I

once again got together with the Nelsons, and this time they handed me a hard case with a conversion unit, complete with threaded barrel and fully adjustable sights, two magazines, a takedown tool, a magazine loading tool and instructions. I have several 1911s, and the one I chose for the Nelson conversion is one with a very nice 3-lb. trigger. It's a 1991A1 Colt that, years ago, in a fit of optimism, I had set up with aftermarket everything (it doesn't make me shoot better – it makes me FEEL better). Installing the Nelson/Marvel conversion was effortless and took less than a minute. Obviously, you remove the original slide and barrel (the conversion fits both full-size and Com-

# OR THE BEST

## – .22 CALIBER CONVERSION

mander frames), and then slide the conversion unit onto the frame of the pistol. The conversion slide stop is in two pieces: an arm and a pin. You simply place the slide stop arm on the frame, and position the slide stop pin through the slide stop arm, pistol frame and barrel lug. Then you pull the slide back just enough to expose the hex end of the recoil rod and, using the provided takedown tool, spin the recoil rod until it stops, and give it an extra 1/4 to 1/2 turn to tighten it.

After putting all this goodness together, I of course had to try it out. Like right now! I called a good friend who'd had the patience to get a legal silencer, and we drove to our favorite spot in the desert. I brought along a mixed bag of .22 ammo...a 555-round box of Winchester 36-gr. 1280 fps hollowpoints, a 325-round box of Federal 36-gr. 1260 fps hollowpoints, CCI Blazer 40-gr., Federal Lightning High Velocity, and Eley Club. I screwed the silencer onto the threaded barrel, and loaded 10 rounds of Eley Club (might as well start with the fancy stuff) into one of the two plastic magazines. The provided loading tool is a substantial round metal knob with a pin that fits into a hole in the base of the magazine follower. Works like a charm. The sights are high enough to clear the silencer quite handily.

The first magazine load was a revelation. The silenced Eley Club was far quieter than a Daisy Red Ryder Carbine or my usual backyard standard, Aguila Colibri .22. The Federal, Winchester, CCI and some loose bargain Remington ammo all functioned flawlessly, but were slightly louder. My friend brought along several boxes of subsonic ammo, CCI Quiet-22 and Gemtech Silencer Subsonic, which were even quieter than the Eley Club, but had to be manually cycled. I've since mentioned this to Larry, and he sent me an 8-lb. recoil spring, which should address that issue quite adequately. The spring costs \$4.00...less than one 50-round box of Eley Club.

Both with and without silencer, the Nelson 1911-.22 Caliber Conversion ran smoothly and exhibited competition-level accuracy. It's a top-quality piece of workmanship, and priced commensurately...from \$425-\$510, depending on your choice of sights, Weaver-style scope rail, threaded barrel, etc. Barrel weights are also available. Just one caveat: Once you've installed this conversion on your favorite .45, you may never want to convert it back!

Pictured with optional accessories:  
Strong Mount N72-22051 \$49.95

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**N72-16627, \$84.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**N72-20302, \$25.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**N72-20251, \$92.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**N72-21353, \$31.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**N72-22120, \$31.95**

### AT 500 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**Powder Die: N72-16629, \$19.95**

**Oversize Die: N72-16626, \$19.95**

**Plastic Funnel: N72-16617, \$5.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (*Requires the use of an RL 450 powder die – see below.*)

**N72-20029, \$23.95**

**RL 450 Powder Die:**

**N72-20308, \$21.95**

# RL 550C

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for ONLY...

**\$459<sup>95\*</sup>**

# RL 550C ACCESSORIES

## A. RL 550 CALIBER CONVERSION KITS

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**N72-RL550 CONVERSION \$46.95** (Exotic calibers, \$56.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure **N72-20782, \$81.95 ea.**  
Magnum Rifle Powder Bar **N72-21353, \$31.95 each**  
X-Small Powder Bar **N72-20780, \$31.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

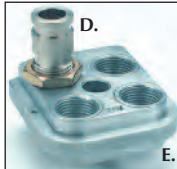

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **N72-22058, \$108.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**N72-20064, \$11.95 each**  
**Three or more, \$10.95 ea.**

**X-Large Powder Die, N72-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**N72-13909, \$24.95 each**  
**Three or more, \$22.95 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**N72-22055, \$21.95 each**  
**Three or more, \$19.95 ea.**

**G. 1" BENCH WRENCH**  
**N72-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

One-Inch Bench Wrench	<b>N72-10842</b>	<b>7.95</b>
Square-Deal-Only Wrench	<b>N72-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	<b>N72-22051</b>	<b>\$49.95</b>
XL 650-only	<b>N72-22052</b>	<b>46.95</b>
"SDB"	<b>N72-22223</b>	<b>65.95</b>

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>N72-22214</b>	<b>\$42.95</b>
1050 Tray Kit	<b>N72-22215</b>	<b>42.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>N72-97126</b>	<b>\$149.95</b>
----------------------	------------------	-----------------

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	<b>N72-16306</b>	<b>\$41.95</b>
--	------------------	----------------

**Dillon's Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	<b>N72-17950</b>	<b>\$46.95</b>
------------------------	------------------	----------------

**Quick-Change Cover** for use with powder measure.

	<b>N72-11143</b>	<b>\$14.95</b>
--	------------------	----------------

With **Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550!

## RL 450 Upgrade Components

# Dillon's Case Preparation Equipment

**CV-2001 N72-20493 \$189.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750 N72-19455 \$145.95**

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator N72-20675 \$75.95**

**CM-500 Case/Media Separator N72-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers: Case Cleaners are available in 220 volt!

**Euro CV-2001 N72-22047 \$214.95**  
**Euro CV-750 N72-19473 \$170.95**

**All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.**

## Rapid Polish

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle. **N72-13804 \$8.95**  
Case (20 pc.) **N72-20255 135.95**

## Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

*D.C.L. Dillon Case Lubricant*

8 oz. bottle **N72-13733 \$8.95**  
Case (20 pc.) **N72-20256 135.95**

<i>Half and Half</i>	10 bottles of polish / 10 of lube	
Case (20 pc.)	<b>N72-21375</b>	<b>\$135.95</b>

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **N72-13287 \$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **N72-13496 \$15.95**

## Super 1050/RL 1050 Short Trim Die Toolhead

**N72-62219**  
**\$224.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. *(NOTE: the Blue 1050 toolhead stand - Part Number N72-62200, \$49.95 - is not included.)*

# Dillon's New Rapid Trim 1500 Case Trimmer <sup>23</sup>

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **N72-62164** is **\$330.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **N72-13141**, are **\$19.95** each. Upper lock rings, **N72-13559**, are **\$4.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# Dillon's Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle

### Conceal-Carry Performance Series

## Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

## THE WILDERNESS TACTICAL PRODUCTS

### The Wilderness' Original Instructor

Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original. This belt is a favorite with law enforcement, military personnel, fire-

fighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

## Close & Ready Holster Caddy

Holster NOT Included

The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

N72-18046 \$29.95

## DeSantis Clip-Grip®

This replaces the grips on S&W J-Frame round butt revolvers. A hook on the right grip panel functions as stopping point for the revolver when tucked into your waistband.

N72-19371 \$29.99

# BLADE-TECH™

## “Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holster-making to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

## Klipt IWB Holster

The Klipt Appendix “Inside the Waist-band” holster is an ideal way to conceal and securely carry a small- or medium-frame auto or J-frame revolver. Your firearm locks securely into the holster with the signature Blade-Tech click.

# Range Bag

Dillon's Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 64). The Main Compartment is 12.5" long x 7" wide x 10" high, the End

Pockets are 8.5" tall x 6.5" wide x 2" deep and the Front Pocket is 9" tall x 6" wide x 2" deep.

Range Bag, Black	<b>N72-19366</b>	<b>\$89.95</b>
Pistol Pouch, Black	<b>N72-17027</b>	<b>10.95</b>

## 'Border Shift' Ammo Bag

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

<b>Black Ammo Bag</b>	<b>N72-13755</b>	<b>\$25.95</b>
-----------------------	------------------	----------------

**I.D. Card Holder**

**N72-14575 \$2.95**

## Dillon's Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*

<b>N72-18146</b>	<b>\$65.00</b>

# ANNOUNCING: Mr. Bulletfeeder® by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

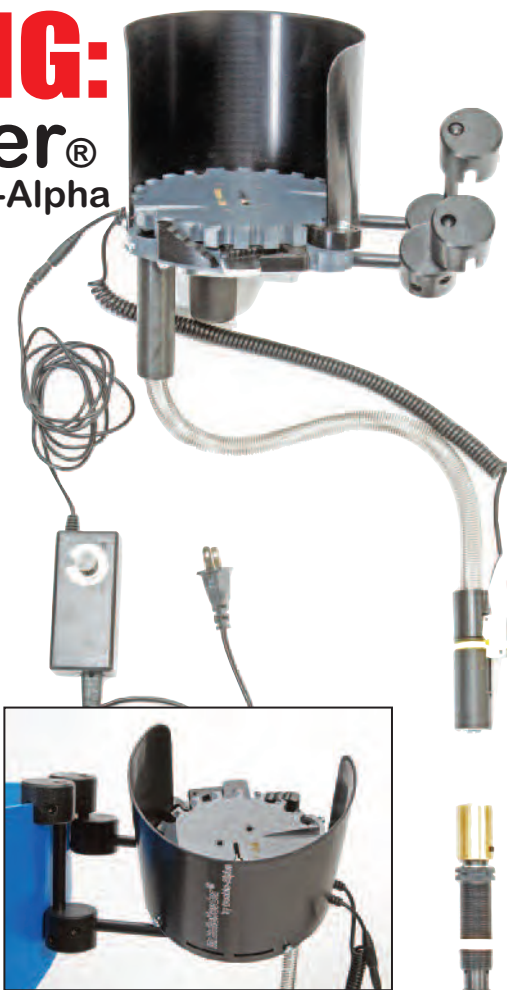

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the case-feeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

## Mr. Bulletfeeder (Comes Set Up in One Caliber)

9mm	N72-15145	\$469.95

## Mr. Bulletfeeder® Replacement Parts & Spares

Having separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

The Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collar to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

Use a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

# Dillon's Pistol Die Sets

## Size Die

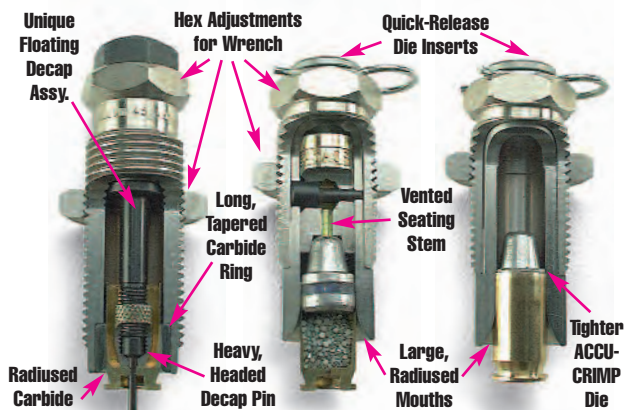

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

## Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

## Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

## Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	N72-10839	\$68.95
.308 Winchester	N72-15574	68.95
.30-06 Springfield	N72-10840	68.95

# SIG P320 COMPA

GLOCK relies on frame additions to help shooters better fit the gun to their hand while SIG has three frame sizes to choose from, small, medium (the default), and large.

## By Cameron Benz

When one thinks of SIG Sauer handguns, things like the beautiful P210, the classic P220, or even the more modern P229 come to mind. Polymer isn't usually the first thing that comes to mind as SIG's Pro series was, well, sort of lackluster. I don't think anyone is going to look at any of the SIG Pro series and wonder why more people don't use them (well OK, maybe two people that I can think of). SIG however, learned from that, and started with a completely new concept and design. They call it the P320 and they did an amazing job of building an economical, tasteful, and versatile handgun. The problem however, is this combination places the SIG P320 squarely in the sights of one of the heaviest hitters in the industry, the GLOCK 19, but can it compete?

Unless you've been hiding under a rock for the last nearly two decades, you're probably aware of GLOCK's compact 9mm offering, the Model 19. Now in its fourth generation (some would argue the law enforcement M series to be the fifth generation), the 19 has seen an increase in popularity due to its rather compact size, 15+1 capacity, reliability, and relative affordability. In its fourth generation version it has even managed to find itself with a larger and reversible magazine release, to better accommodate lefties and interchangeable back straps to accommodate various hand sizes.

The SIG P320 is the proverbial new kid on the block. Released into wild in 2014, the SIG P320 has gained traction quickly in competition. The

P320 I use in the images of this article utilizes a compact medium frame that has had some work done by Boresight Solutions ([www.boresightsolutions.com](http://www.boresightsolutions.com)).

## Weights and Measurements\*

	GLOCK 19	SIG P320 Comp.
Width	1.18 in.	1.3 in.
Height	4.99 in.	5.3 in.
Length	7.36 in.	7.2 in.
Weight (empty)	23.46 oz.	25.7 oz.
Capacity	15+1	15+1
Barrel Length	4.01 in	3.9 in.
Sight Radius	6.02 in	5.79 in.

*\*Weights and measurements are as given by the manufacturers*

## Trigger

The trigger in the 19 has driven me nuts. While it would break at around six and a half pounds, it was anything but crisp. It seemed like the trigger tended to get heavier up to the wall and then before it would break as well. Contrasted with the P320's long smooth pull of also six and a half pounds, I have to call the trigger comparison in favor of the P320.

**Sig P320 Compact: 1    Glock 19: 0**

## Modularity

GLOCK's parts interchangeability and adjustable backstraps are about as close as they seem to be willing to get to modularity. Forget factory available conversion kits. SIG on the other hand has elevated it to a fine art in the P320. There are two "frames"

# CT vs GLOCK 19

A comparison of magazines, clockwise from top left, SIG factory P320 15 round, SIG factory P320 21 round, GLOCK factory 17 round with Taran Tactical Innovations +5 Extension, and GLOCK factory 15 round. The +5 is necessary due to GLOCK not offering a 140mm compliant competition magazine though MagPul does have an offering.

(really just the trigger pack" one is for 9mm, .40 S&W, and .357 SIG while the other is for .45 ACP. This means that if you start with a 9mm, .40, or .357, you can't swap to a .45 or vice versa. That said, you have frames available in full size, carry (full size grip with compact dust cover), compact, and sub compact. And all of those are available as small, medium, or large grips sizes to accommodate different hand sizes. It's a pretty ingenious plan if you ask me. Point goes to the SIG.

**SIG P320 Compact: 2    GLOCK 19: 0**

## Aftermarket Parts and Accessories

At present, while there is aftermarket support for the P320, particularly in the competition arena, it is nowhere close to the GLOCK 19, which is to be expected with a 20-plus year head start and significant popularity. That said, aftermarket base pads, barrels, and sights are readily available for both pistols. Though the GLOCK can probably be built from 100-percent aftermarket parts and the same cannot be said for the SIG. This point goes to the GLOCK.

**SIG P320 Compact: 2    GLOCK 19: 1**

## Factory Sights

Let's face it, whether it's factory 3-dot sights in tritium or their non-luminescent offering, the SIG factory sights are serviceable straight from the box. Whereas the GLOCK 19 generally comes with plastic "sights" that could be blown off the pistol by wayward mouse flatulence. There are exceptions to this, but they're not common. Sights should be serviceable out of the box, even if they aren't the end user's preference. This point goes to the SIG.

**SIG P320 Compact: 3    GLOCK 19: 1**

## Bore Height

GLOCK has always had low bore height going for their design. SIG, well, not so much. GLOCK's approach contributes to a more compact slide as well. When firing these two pistols side by side, the difference in bore height and the resulting leverage on my wrists was noticeable. While it's

possible it's just because I'm used to the GLOCK, I found this aspect of the SIG to be annoying. This point goes to the GLOCK. Your views on this may vary.

**Sig P320 Compact: 3    Glock 19: 2**

## Proven Durability

The GLOCK has, in some form or another, been around for decades. In that time, it has been one of the most popular guns on the market. While not long on looks, it enjoys a solid reputation for durability that is well earned. In the time I spent managing a firing range with a rental counter, I could count on one hand the number of failures we had with the various GLOCKS we had for rent. I won't say there haven't been teething issues with various models and generations, but overall GLOCK has always managed to sort things out. The P320, on the other hand, hasn't been around long enough to have the same reputation for reliability though it's looking very promising, particularly since the Army found it reliable and durable enough to adopt as the replacement for the M9 9mm Service Pistol in the form of the Modular Handgun System or MHS. That said, ultimately time will tell. Give this point to the GLOCK for the time being.

**Sig P320 Compact: 3    Glock 19: 3**

## Overall

By my estimation, this comparison is a tie. It will really come down to what someone's priorities are in a handgun when they decide between them. Both guns are solid performers and this is the closest match in competing pistols that I can recall seeing in years. I didn't bother looking at the price as the msrp is similar and will end up varying depending on where buyers purchase them. Will I be giving up my GLOCK 19? No, but then, I'm not going to kick the P320 out of the safe either. I do fully intend to keep experimenting with the P320. Who knows, maybe it'll end up in my carry and competition holsters yet – I'm tempted every time I pick one up.

# CLASSIC FIREARMS: The W

**By John Marshall**

In 1971, to celebrate the 100-year anniversary of the NRA, the National Rifle Association authorized the Winchester Repeating Firearms Company to manufacture two special rifles to commemorate the event. Both were based on the John Browning-designed Model 94 lever-action rifle. One was a “musket” that had a full-length stock in the old military style often seen on the early Winchester “Winder” high-wall single-shot rifles. To my mind, it was ungainly if not outright ugly. The other was an extremely graceful rifle that mimicked the long-out-of-print Winchester Model 64. This one was aesthetically pleasing. It had a 24-inch barrel, a short 2/3 length tubular magazine, and a pistol grip buttstock matched by a curved operating lever. Both these guns had a commemorative medallion imbedded in the butt stock.

I could not get that second rifle out of my mind, as the configuration seemed just right and more attractive than most Model 94s I had yet seen. So I bought one. I soon regretted it and sold it. For one thing, commemorative firearms are intended to be preserved unfired. Firing them almost always reduces their value. I would not fire it. Secondly, this post-1964 rifle utilized cheesy stampings, a cast receiver that had to be “blackened” as it did not take traditional bluing well, and wood-to-metal fit that was less than perfect. Its outline was nice, but on close inspection, it failed to live up to traditional (pre-1964) craftsmanship. What that rifle *did* do for me was instill a desire to own a *real* pre-1964 Model 64 in well-preserved condition.

Fast-forward to the year 2013. Cruising a local gun show, I noticed a for-sale rifle standing upright in a rack. It looked familiar, so I asked to handle it. My dreams had come true. It was a beautiful early Winchester Model 64 in stunning original condition. The deep bluing was outstanding, and it came complete with a (probably) factory-equipped Redfield peep rear sight! The near-perfect walnut stock

had just a few very minor dings in the factory finish, belying the fact that this rifle was probably born in the 1930s. The wood-to-metal fit was absolutely on the money in every respect. The seller said he had obtained it from the estate of an old gentleman who claimed that he had bought it new, as his family recalled, around 1939. It was quite evident that it was seldom, if ever, used and carefully maintained. My negotiating skills went into high gear, and the result was that I walked away with that incredibly beautiful Winchester.

I immediately sent off a request to the Cody Firearms Museum in Cody, Wyoming. The people there maintain many of the original Winchester manufacturing records. All they could tell me was that they found a Model 94 receiver serial number that matched the one on my rifle, and it showed it was serial-stamped in 1936. It's worth noting that Model 94 and Model 64 receivers all came from the same bins, and further manufacturing determined the particular model number assigned. Usually, receivers were made into rifles within a year or so following the application of the serial number.

I have a Winchester sales catalog that dates from 1939, and it gives a revealing glimpse of the Model 64 as made in that era. To quote that catalog: “Meets high standards in quick and accurate handling and all-around efficiency, improved N.R.A. type walnut stock with steel butt plate and full pistol grip; walnut forearm, solid frame, with a choice of 24” or 20” barrel, except .219 Zipper has 26” only. Two-thirds magazine, holding five cartridges, making – with one in the chamber – a six-shot repeater...weight approximately 7 to 7-1/4 lbs., according to caliber and barrel length.” It showed that the available chamberings were .219 Zipper, 25-35, .30-30 or .32 Winchester Special. My rifle is chambered for the widely available .30-30, and has the 24” barrel. The catalog also lists a Model 64 “Deer Rifle” which was often called the “deluxe” model. It had special styling, checkering

# Winchester Model 64 Rifle

on the stock and forearm, and was equipped with a 1" sling using quick-detachable sling swivels. The pistol grip was finished with a blued steel cap. Double-set triggers could be had on special order. This rifle was offered in .30-30 or .32 Winchester Special calibers only.

Historically, the Model 64 stems from the Model 55, which was first offered around 1924 and finally discontinued in 1935. It had a Model 94 receiver, a 24" barrel, and a half magazine. About 21,000 were manufactured over its production life. In 1933, the Model 64 was introduced, slated to supersede the Model 55. It was configured as related in the 1939 catalog quote above. The 20" barrel option was first offered in 1934. The .219 Zipper "varmint" variation was introduced in 1937. That cartridge was simply the .30-30 with its neck reduced in caliber to .22. Some rare ones in this caliber were made with 20" inch barrels instead of the standard 26". A few very rare .32-40 and .38-55s were made through 1937 – beware of fakes!

Model 64 receivers were drilled and tapped for receiver peep sights, and the factory could provide these on the guns, usually of Lyman or Redfield make. It's entirely possible that the Redfield sight on my gun was factory installed. The standard barrel-mounted rear sight had a central sliding elevator and a fine-tune replaceable stamped thin blued-metal notch plate which was available in varying heights. The entire sight could be drifted right or left in its barrel notch for windage adjustment. The front sight was a hooded bead type on a ramp integral with the barrel, not laterally adjustable. The forearm was of the "semi-beavertail" type, not bulbous, but fairly slim, secured by a blued steel cap. It's been claimed that gun writer and famous shooter Col. Townsend Whelen had a hand in the design.

Winchester ceased production of the Model 64 in 1942, when it began production of military arms for WWII. Production began again in 1948 in .30-30 and .32 Winchester Special only. Some hard rubber buttplates were evidently made as substitutes for the standard steel variety. Production of the post-war rifles was terminated in late 1957. Total production numbers are not easily estimated due to the commonality of Model 94 and Model 64 receiver serial numbers, but probably over 66,000 were made.

Around 1972, perhaps prompted by its manufacture of the NRA commemorative rifle, Winchester attempted a revival of the Model 64, but utilizing the "blackened" post-1964 cast receivers. These rifles were equipped with quick-detachable sling swivels and M1907-style leather slings. All were in .30-30 caliber. These Model 64As were not well received, and production was stopped in 1973. In 2015, Winchester offered exactly 250 Model 64 reproductions, made by Miroku in Japan, exclusively for Cabela's sporting goods stores. These were equipped with tang safeties, were well made, and fairly expensive.

Original Model 64s made in the "quality" pre-war years are exceptionally graceful, easy handling, fast-operating and nearly perfect deer rifles. I would vote them as among the most handsome of all the Winchester lever-action rifles. I am glad to have found one in exceptional condition. If you come across one, snap it up before the knowledgeable guy or gal behind you has a chance to see it! These are classic firearms and well worth finding. **P**

# SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

N72-21894 \$44.95

## Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter

N72-17519 \$9.99

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

N72-19972 \$39.95

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms.

Made in the USA and comes with a lifetime warranty.

Berry's Mfg. Clear Ammo Can

N72-17518 \$9.99

## Dial Caliper

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

N72-13462 \$28.00

 LEGENDARY POWDERS®

# Youth Teams Show H

## Texas' gun culture drives the

By Robin Taylor, [www.taylorfreelance.com](http://www.taylorfreelance.com)  
Photos by Andre' Dall'au, Jim Coffey

**BOOM!**

The report jars your insides. Everyone knows a 105mm Howitzer is loud, but the wave of over-pressure stuns mind and body. As you recover, you see the breech slam closed and the Section Chief's sabre tip drops slowly.

**BOOM!**

The Texas A&M Corps of Cadets brings their field howitzer to ball games, ceremonial events, and once a year, to their own pistol shoot. The 2017 Scholastic Action Shooting Program (SASP) Southwest Regional has almost begun.

**BOOM!**

230 people cheer the last shot. Together with the gun, they're shouting, "play ball!" in a distinctly gun-friendly way.

Here in Texas, just outside of College Station, youth teams from all over the West have traveled far to find out who's the fastest. College students, cadets, high school, and middle school students alike shoot .22 pistols, 9mm service pistols, and just recently, .22 rifles in a fast-moving contest of speed and accuracy.

"This is the second-largest regional in the country," says Rick Leach, SASP's new director of development.

Rapid growth in Texas fueled by the Texas State Rifle Association Foundation (TSRAF) and the Texas A&M Corps of Cadets' prestige has made the SW Regional one of the most popular regional events in the country. Teams from states as far away as Washington (a four-hour flight!) came to duke it out with not only the A&M Corps of Cadets (defending Collegiate National Champions) but also the South Texas Juniors – the defending High School national champions. With 134 shooters on the line, the program's growing strength and influence really showed.

"Last year we had 117 athletes in Texas," says Leach. "So far this year, we're at 150, and it's early."

He's excited not just about the numbers, but about the demographic. At this year's regional, 30 percent of the shooters were female.

"It's the fastest-growing state in the nation right now," says Leach.

Angela Gerlich, Executive Director of the TSRA Foundation brought together public financing, private financing, and successful local coaching to drive Texas SASP forward.

Under Mrs. Gerlich's hand, discounted ammunition, steel target sets available for loan, expert coach trainers flown in from out of state, and above all the Texas Youth Action Shootout (TYAS) match series have all come about since August 2016.

To give you an idea of the panache shown by the Texas program, the night before the match,

**There are starting guns and then there are STARTING GUNS!**  
Nothing says "GO" quite like the sound of a 105mm howitzer.  
This one was provided by the Texas A&M Corps of Cadets.

Texas A&M welcomed students to the military college's Hall of Honor, showing off the history that propels the culture of A&M. A barbecue in the cadets' dining hall (with the cadets present in full Class A uniform) added more prestige. The TSRAF and match sponsor MagPul made everyone welcome, setting the bar for hospitality very, very high!

According to Mrs. Gerlich, the Texas 4H program has more than 10,000 students involved in the shooting sports. Most of that is shotgun, but handgun and rifle sports are coming on fast.

As far as SASP goes, "the part I'm most proud of is how we're recruiting using the A&M cadets and coaches to go out and work with our Texas youth that are interested in the SASP program. They are the most experienced group with the program in Texas and have really stepped up to help. These cadets are now able to continue their leadership training in a whole new way, and it's working," says Gerlich.

On match day everyone has their game face on. Within a few minutes of the last cannon report, the distinct "ping-ping-ping" of gunfire on steel targets fills the air.

# How It's Done in Texas

## 2017 SASP Southwest Regional

SASP courses closely resemble Steel Challenge – but no one uses a holster. Students start at low ready, then shoot five targets as fast as they can. Each shooter gets five runs on four sets of targets, discarding the slowest run. All told, the kids fire 100 rounds – plus any misses.

While the targets LOOK easy, the eye is deceived. It's one thing to stand there and pot away at an 18" x 24" rectangle at 25 yards. When time is no object, the shots are easy, but once you get a timer out, everything changes.

"Go Fast" features four 18" x 24" targets at just 7 yards, plus a 12" stop plate in the middle. Getting hits on the targets is easy – if you take your time. If you want to win, you've got to **move**. The fast guns shoot all five targets in under two seconds. The best ones shoot them in 1.5. That's 1/3 second each, including a low-ready start!

"Focus" pushes the accuracy side, with small steel circles stashed as far back as 18 yards.

Walking around the range, clusters of kids wearing uniforms from their local gun clubs and schools smile and goof around. The adults are all business, discussing rules and herding their charges when needed, but the kids enjoy themselves at every turn.

Four-person teams get organized by equipment and age group. High School teams with .22s compete against other High School teams with .22s in "Senior Rimfire," Middle School teams with 9mms compete in "Intermediate Centerfire." Teams that don't have enough of any one age group to make a team compete in "Open."

Thanks to the support of the MidwayUSA Foundation donors (Larry Potterfield in particular), successful teams can win cash prizes that go into a special endowment to support the team. Most teams have relatively small endowments, but some successful fundraisers have pushed their endowments north of \$250,000 – giving

them more than \$10,000 a year to help supply their athletes. State and private colleges have jumped in as well, offering scholarships to successful athletes and hiring coaches to lead college-level programs.

Yes folks, your kids can actually win a scholarship to shoot *steel* in college. The numbers are small, but you'll see college recruiting stations at the SASP National Championship.

The Corps of Cadets and South Texas came into the 2017 match as the favorites, expected to win the centerfire and rimfire contests. The Cadets won centerfire by forfeit, posting a strong 192-second combined time. (Anything faster than 200 seconds is nationally competitive, putting A&M in strong position for the College nationals in March.) In rimfire, the South Texas crew brought their top gun –

none other than Ethan Inocando – a name that **Blue Press** readers have seen before. Inocando did not disappoint, winning the rimfire match with a blistering time of 35.32 seconds. Only a handful of athletes can break the 40-second mark. However, one athlete does not make a winning 4-person team. Hot on his heels was "Team Gotta" captain

Jake Overstreet, shooting a 36.89 for his team from Custer, Washington. Overstreet and his red-shirted teammates controlled the top of the leaderboard, posting a 179 second combined time. That was good enough to beat second-place South Texas' score of 203. Team Gotta's JV crew stumbled when ladies' Middle School champion Naomi McKay's Buckmark exploded in her hand, but McKay's group won the JV contest anyway, shooting the second-fastest time in the match – a 186.

SASP has started changing the dynamic for shooting sports in this country, making practical pistol into a scholarship-level sport. If you'd like to know more about the program, look them up at [www.sssfonline.org](http://www.sssfonline.org).

Group photo of the shooting teams at the 2017 Scholastic Action Shooting Program (SASP) Southwest Regional.

.50 BMG Seat/Crimp Die

**N72-21895, \$139.95**

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner **N72-10252 \$24.95**

## Dillon's Bench Wrench Fits 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	N72-14067	\$13.5
5-Pack of Die Lock Rings	N72-10669	41.5
1" Dillon Bench Wrench	N72-10842	7.95

## Comtech's STINGER

**THE STINGER:** Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes unnoticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

N72-19495 \$9.95

## Arredondo Accessories' Multi-Gun Chamber Flags

Made of tough nylon with a melting point of 480 degrees. Kit includes one shotgun chamber flag and one for your AR-15.

N72-15485 \$11.95

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

\*Sand not included.

## GLOCK® Field Knife

**N72-15483**  
**\$29.95**

Become a master at using a Mil Dot reticle with this ballistic slide rule! Comes with a 24-page instruction manual.

**N72-14762 \$29.95**

## TARGET SPORTS® TACTICAL

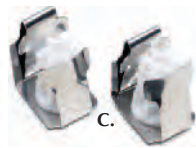

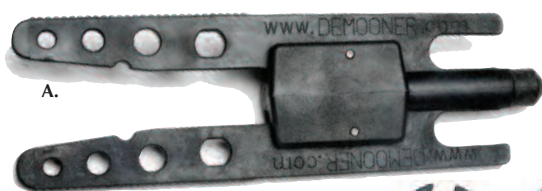

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

**N72-15384 \$24.95**

# MY FAVORITE MY FAVORITE

Duane Thomas' favorite knife is a heavily engraved, all-stainless steel Spyderco Police Model he's had for the past 20 years. Both scales were decorated by famous engraver John Muns. The author's name has been engraved in cursive script into a lozenge on one scale, placed there for that purpose.

## By Duane Thomas

Like just about everyone who's at all into knives, I own some really nice examples. While I love big fixed blades, most of my knives fall into the category of being what I call "clip-style folders," i.e. they're designed to affix to a pants pocket via a clip attached to one handle scale. Throughout the years I've carried quite a variety of knives, but the one I've always come back to, over and over again, has been my engraved Spyderco Police Model.

Within the serious gun nut community — I mean the people who are match shooters, the people who are highly trained handgun martial artists, the people who've been to double-digit training classes with multiple different instructors, having a folding knife clipped to your front pants pocket is kind of like a lodge pin. This is how you know the person is serious. Among serious shooters, whenever a new person comes into the group who doesn't yet have a clip-style folder, they get teased because they've "flunked the knife check." And in short order that person has a knife clipped to their front pants pocket, too. Peer pressure is a wonderful thing.

Not to say that clip-style folders aren't great tools simply on a practical level. The pocket clip, combined with some sort of one-hand opening feature, makes such a knife almost instantly accessible and usable, much more so than if it were in a flapped sheath. Also this gets around the necessity to wear a knife sheath on your belt, which just doesn't fit a lot of people's wardrobe or self-image,

or have the knife rattling around buried deep in a pocket. Such knives can also be closed and put away one-handed.

When I started out in this whole "clip-style folder" thing, like a lot of people I gravitated toward the Spyderco Endura and Delica. This was back during the timeframe when the Endura and Delica both featured a pocket clip that was a molded part of the plastic handle, and was notorious for breaking under even minimal use. Eventually, by the way, Spyderco would do away with the molded plastic pocket clip on the Endura/Delica, replace it with a steel clip, and materially improve those knives in the process. But back in the day, the common refrain among people carrying the Endura/Delica was, "I use it until the pocket clip breaks, and the entire knife only costs \$40, it's so cheap I'll just throw that one away and buy a new one." For myself, I prefer tools that last and don't break.

But I did try the plastic pocket clip Endura and Delica. As careful as I could be with those knives, I still wound up breaking the pocket clips. I hated that. So I was in the market for a "real knife," I was looking around, trying to figure out what Duane's perfect knife would be. Then one day I was at a Massad Ayoob class, someone needed a knife, Mas whipped out this beautiful, heavily engraved, stainless steel Spyderco Police Model, opened it with that distinctive downward snap that's used for older Spydercos with the tip-down carry method, and handed it to the student to use.

I died of envy.

# THE KNIFE THE KNIFE

Shortly thereafter I was on the phone with Spyderco's personable and professional marketing director, Joyce Laituri. What a nice lady! I asked her for a few things for which I had article assignments, then Joyce said to me, "Is there anything else we might be able to send you that you'd like?" My reply, "Well, do you have anything in the way of an engraved Spyderco Police Model?" Joyce: "Yes, we do, actually. We used to have this program called The Police Officer of the Month. Every month we'd pick a police officer we felt was outstanding for some reason, and we'd send them an engraved Police Model. We've just discontinued that program but we still have three of those knives in stock. Would you like me to send you one of them? And this knife has a lozenge on the side where we can engrave your name in cursive script. Would you like us to do that?"

So that became my regular carry knife. It was heavily floral engraved by famous engraver John Muns. He actually signed his work. Under the pocket clip in block lettering we find "By J. MUNS." No, I'm not going to remove the pocket clip to photograph that for this article, just take my word, it's there. That big folding knife with its flat stainless steel scales gave Muns a great canvas to exercise his art and he did so very well. This is a PRETTY knife. Yes, it has my name engraved into a lozenge on one scale, which certainly adds to pride of ownership. But at heart, underneath all the foo-foo, it's still a tough as nails, eminently useful Spyderco Police Model.

I once had a cop friend of my acquaintance give me a hard time about carrying this big knife as a possible "throwdown" after a shooting. My reply was, "Well, considering it has 'Duane Thomas' engraved into it, unless I happen to shoot someone also named Duane Thomas, using this as a throwdown would be really, really stupid of me. Even at that, I could only hope no one in a position to send me to prison ever read any of my articles over the years featuring this knife."

Early Spydercos were designed to hold the knife inside the pocket tip-down. Back then it was a commonplace for me to hear people say, "The one thing I don't like about my Spyderco is I wish it held the knife tip-up." What people wanted to be

doing was reaching way down into the pocket with their thumb, drawing the knife and then rotating the blade out with their thumb on the hole opener. Joyce Laituri, who has been with Spyderco since the early days, said to me, "When we designed the pocket clip, it never occurred to us people would want to open the knife that way. We thought they were going to reach down, grab the knife by the hole opener, draw the knife then pop their wrist to flick the knife open. That's why we made the knives to be carried tip-down with the hole opener at the top so it was easy to get to when the knife was clipped to a pocket." These days a huge number of Spydercos feature pocket clips that can be moved for tip-up or tip-down, right or left hand carry. But since the "grab the

hole opener, pop your wrist" approach is my favorite way to open a knife anyway, the fact that's how my old Police Model is set up to work bothers me not at all.

The Muns-engraved Spyderco Police Model was only ever available with one blade style, the almost fully serrated SpyderEdge™. Frankly, if it had been available as a PlainEdge™ or half-and-half plain/serrated CombinationEdge™, I would have gone for either of those over the SpyderEdge™. But the last half an inch or so of blade does switch from serrated to a plain edge that works nicely to open UPS packages or anything else requiring fine cutting, and the tip overall is a strong diamond shape I find great at prying staples out of target sticks. The long Police Model handle gives me a lot of hand contact, a lot of leverage to twist the knife and extract dug-in staples. Yes, yes, I know we're never supposed to use our knives as pry bars, but the truth is, I do, and if I'm going to do that, I might as well be doing it with a knife as strong and tough as the Spyderco Police Model.

When you carry a knife like this, you do get some interesting reactions when you pull it out. A few I have experienced over the years occur to me right off the top of my head.

I needed a knife to cut something, a guy said to me, "I've got a knife," and reached for his own clip-style folder to hand me. I said, "Yeah, so do I," whipped out the engraved Police Model and

"Small rifle" cases fit .222, .223 to 7.62 x 39 length; 20 round "medium rifle" cases fit 7.62 x 39, .22-250 to .30-06 length; 50 round "medium rifle" cases fit .22-250, .308 to .30-30 length; and "large rifle" cases fit .30-06, 8 x 57 length to all belted cartridges.

Extra Loading Data Labels, N72-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# Swab-its – A Swab for Every Job! <sup>65</sup>

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

popped it open one-handed. He said to me, "Oh look at YOU."

Whenever there's a "knife check" and everyone pulls out their knife to show off, people always zero on the engraved Police Model. What can I say, I don't blame them.

The most frequent comment, "Wow, that's a really beautiful knife."

"I love it when I see someone carrying a really beautiful knife like that."

"I cringe every time I see you whip out that beautiful knife and use it pry staples out of target sticks. What if you bust the tip off it?" I will interject here, this person SERIOUSLY underestimated just how tough is the Spyderco Police Model. If I were going to "bust the tip off it" prying staples out of soft wooden target sticks, it probably would have happened some time in the past 20 years. This knife is a tank.

Guy opened the knife about an inch, saw that fully serrated SpyderEdge™, closed the knife, shuddered and said, "That was really horrifying." Apparently that fully serrated blade impresses some people as being particularly vicious looking.

Despite the fact the Police Model is, by clip-style folding knife standards, toward the large end of the scale (pun intended), the strength of those stainless steel scales means it can be – and is – notably thin. It's a comfortable knife to carry, even

given its size. Yes, because of its length and all-steel construction, it's heavier than knives that are smaller and/or made of lighter materials. But y'know, when it's clipped to my pants pocket I don't really notice that. If the Spyderco Police Model were a gun it would be a Colt Government Model. We've all heard the comment, "Yeah, the Government Model is big and heavy, but it's still a comfortable gun to carry, even inside the waistband, because of that trim, rounded slide, the overall gun is just so flat." To my mind, the equivalent to that in clip-style folders is the Spyderco Police Model.

So that's my favorite knife. Over the two decades since it came to be mine, I have carried this knife more than every other blade I own put together. It's big, it's beautiful, it's stunningly engraved black and stainless steel, it's got my name carved into it, it's tougher than hell, and it has never, ever let me down. It's picked up a few nicks and scratches over the years but I just look at those like character lines on an old friend's face. I don't really care if this knife is "collectible." The only place my engraved Spyderco Police Model is ever going to be collected is by being attached to my right front pants pocket. And, should you happen to meet me, that is, in overwhelming probability, where it's going to be.

RTS2R

Railway

Tactical Sight

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

## 5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

## Scout Scope Mounts for AK, SKS Rifles

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle

## Winchester Twist Leg Bi-Pod

Winchester's Twist Leg Bi-Pod is compact, lightweight, easily attaches to your rifle's sling swivel stud, and features twist lock legs for unshakable prone and bench shooting. Legs adjust from 7.5" to 11.75" height.

N72-19671 \$29.95

# A Brief History

Ichiro Nagata Photo

By Cameron Hopkins

*Blue Press* readers come from all walks of life, a wonderful cross-section of American culture. The one thing that unites us is a common love of shooting and, by extension, ammunition. It's safe to say you're a reloader (or at least contemplating reloading), which is to say you have an above-average knowledge of ammunition. You know all about primer pockets and case capacities and powder burning rates and don't need to be told what COAL stands for. You're very knowledgeable.

But even an expert can learn a thing or two, so at the risk of offending you with the obvious, please let me explain a commonly misunderstood aspect of ammunition – chamber pressure. First, however, here is a quick overview of the ammunition industry as it exists in America today.

Ammunition is an unregulated product in American commerce despite two major government agencies that, at first glance, would seem to be in an overwatch position. The Alcohol,

Tobacco and Firearms Bureau (ATF) licenses and taxes the manufacture of ammunition while the Department of Transportation (DOT) regulates its conveyance, but no agency concerns itself with ammunition itself. All “control” of the quality and technical specifications – including chamber pressure – are entirely left to each individual manufacturer to decide. *Laissez faire* capitalism at its finest.

Despite a total lack of governmental regulation, most ammunition manufacturers choose to comply with technical specifications and testing standards set by an industry organization called the Sporting Arms & Ammunition Manufacturers Institute (SAAMI). But it's important to note that SAAMI's “rules” are purely voluntary, even for SAAMI members.

SAAMI was originally formed in 1926 at the request of the U.S. government for three purposes: to create industry standards for quality, interchangeability, reliability and safety; to establish technical specifications for firearms and ammuni-

# y of Pressure

tion; and to promote safe shooting practices. SAAMI is composed of members; members are companies or corporations. Even though SAAMI is a "private club," their technical data is published and disseminated to the public. Members of SAAMI generally comply with these voluminous technical specs, including chamber dimensions and chamber pressure, but compliance is voluntary. Non-members, obviously, have no obligation to obey anything SAAMI stipulates.

With that as background, let's take a look at chamber pressure and see why it went sideways in the first place, which will explain how we got to where we are today with special designations of +P and +P+ for ammunition that exceeds SAAMI's "standard" for the caliber.

It all started in 1873 with the introduction of the Winchester '73 lever-action rifle chambered for the .44-40. This was a blackpowder cartridge of low chamber pressure. Then in 1892 John Browning gave us the Model 92 lever action, a very strong design based on Browning's own 1886 model. As a happy coincidence, the year of 1892 also saw the introduction of smokeless powder, allowing for much higher velocities... and pressures.

Browning's robust 1892 was more than up to the task of handling "hot" .44-40 loads with the new smokeless propellant, but the older '73 rifles were most definitely not. Accordingly, it was decided to load two versions, a standard .44-40 for the older rifles and a souped-up .44-40 High Velocity for the new guns. Imagine the confusion! "Would you like regular .44-40 or High Velocity?"

The problem of older guns versus newer guns surfaced again in 1930 with the introduction of Smith & Wesson's Heavy Duty and Outdoorsman models, both based on S&W's .44 Special Second Model Hand Ejector (later called the N-frame), a hell-for-stout revolver. The new revolvers came chambered for .38 Special, a blackpowder cartridge dating to 1898 with extremely low chamber pressure. Again, the new gun could handle much more pressure than the anemic .38 Special produced, so the Western Cartridge Company agreed to produce a "High Velocity" version of the .38 Special.

However, everyone remembered the confusion between the "regular" .44-40 and the "high velocity" .44-40, so Western used a brand-new name for its "high velocity" .38 Special. The brass was headstamped .38-44. (The round was also produced as the .38 High Speed or .38 HS.) Any resulting confusion was addressed five years later with the introduction of the .357 Magnum (1935) which solved the problem of shooting "hot" ammo in older guns by making it impossible to chamber the new magnum in older guns due to case length.

Even though SAAMI had opened its doors in 1926, there was not enough industry cooperation at that time to prevent accidents when new cartridges came on the scene that could be fired in older guns. The new .38 Super could be chambered in older pistols made for the .38 Auto, a far-lower-pressure round. This led to catastrophic failures. Despite a few blown guns, we managed to survive this magnificent era of

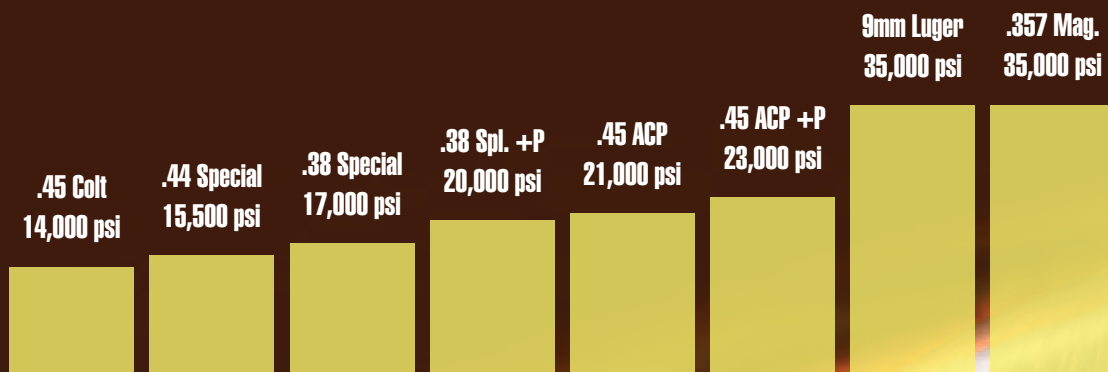

*Continued on Next Page*

## Before SAAMI

**In** 1913, the War Department wished to supply rifles to Britain and requested that American firearms and ammunition manufacturers get together to establish uniform specifications and technical standards. An organization called the Society of American Manufacturers of Small Arms and Ammunition (SAMSAA) was formed. The Secretary of War, on behalf of the U.S. government, endorsed the society and validated that its specifications were the new Bible for small arms.

The society continued after World War I ended, but by the early '20s, it had become inactive. In 1925, Congress recognized that the transition from blackpowder to smokeless was causing safety issues and requested the firearms industry to reform a new organization to again try and establish universal standards and technical specifications. The Sporting Arms & Ammunition Manufacturers Institute (SAAMI) was then formed. SAAMI was incorporated into the National Shooting Sports Foundation (NSSF) in the 1980s.

# SAAMI Pressure Specifications★

cartridge development; things clicked along uneventfully until an upstart ammunition company came along with a new style of bullet, the jacketed hollow point.

In 1963, Lee Jurras started the Super Vel Cartridge Company and introduced his flagship load, a .38 Special that ran much hotter and faster than the sedate 158-gr. roundnose lead (RNL) projectiles that virtually all policemen carried on duty. Using his new technology of a copper jacket around a lead core with a pronounced cavity in the nose, Lee introduced the first jacketed hollow point (JHP). The idea was to increase stopping power and minimize over-penetration by driving a comparatively lightweight bullet fast enough for the hollow cavity to fill with tissue, forcing it to expand. Known as a “mushroom” for the distinctive shape of recovered bullets dug out of felonious corpses, the new JHP bullet took the police market by storm.

At the time, there was no such thing as +P. Lee simply loaded hot. He also loaded light-for-caliber bullets such as a 110 gr. for .357 Magnum and .38 Special instead of the industry-standard 158 grs. By driving these “lightweight” bullets at high velocity (1,600+ fps in .357 Magnum) his Super Vel ammunition produced dramatic one-shot stops and greatly reduced pass-throughs ricocheting all over the neighborhood.

Super Vel was not a member of the SAAMI club, so there was no formal recognition for what Lee had accomplished. Quite the contrary, there was seething resentment from club members who were left with nothing to counter Lee’s new JHP projectiles. Super Vel might have

trumped them with Lee’s new hollow point, but the Big Boys had an ace up their sleeve – cut off Super Vel’s brass supply. Super Vel had been buying its brass cases from Remington and Winchester.

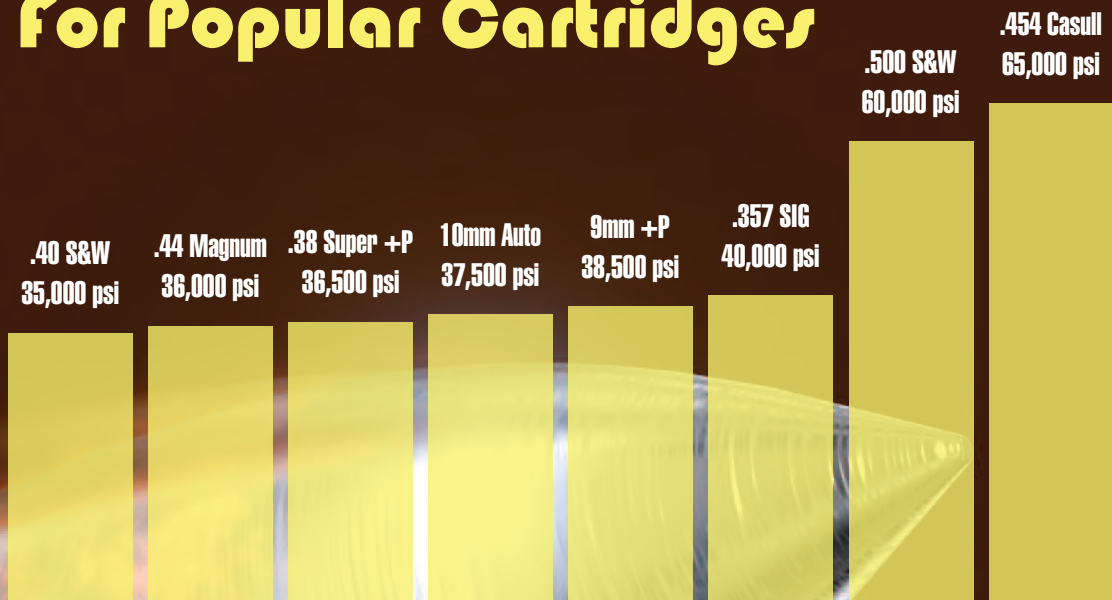

Black-balled on brass, Jurras was forced to go to Norma in Europe to buy headstamped brass. The higher cost of importing cases was one of several factors leading to Super Vel’s eventual collapse in the mid-’70s.

Meanwhile, Winchester came out with a hollowpoint of its own, a 158-gr. pure lead semi-wadcutter with a hollow point (SWC-HP) loaded in .38 Special. This load was made to fill a special order from a law enforcement agency, which wanted something with the same power as that hot, new Super Vel. The problem, however, was the agency’s requirement demanded more performance from the wobbly-kneed .38 Special than the 19th-century cartridge was capable of safely delivering. Note the word “safely.” The pressure ceiling for the .38 Special is a maximum of 17,000 psi (compared to 35,000 psi for the .357 Magnum). It was impossible to achieve the ballistics this agency wanted with a 158-gr. SWC-HP out of a .38 Special, and still comply with SAAMI’s pressure ceiling.

Accordingly, at Winchester’s behest, SAAMI created a new designation called +P (in 1972) to indicate an increased pressure level for an otherwise standard cartridge. This hot, new .38 Special +P load was approved only for sale to law enforcement agencies at the time. It came to be called the FBI load, the Chicago load, the NYPD load, depending on where whatever major

# for Popular Cartridges

\*Maximum Average Pressure (MAP) as determined by a transducer on a solid test barrel.

agency adopted it. The official nomenclature was simply .38 Special +P.

SAAMI allowed the pressure to go as high as 20,000 psi with a peak of 21,500 psi, an increase of 20 percent. The rationale for allowing two identical cartridges to be of different pressures was that old .38 Super. The .38 Super, they reasoned, was essentially a +P version of the .38 Auto, so at the same time that the .38 Special +P was recognized, SAAMI also re-designated the .38 Super as +P. As a result, SAAMI no longer recognized the "plain" .38 Super, only .38 Super +P.

In 1974, two years after the first sale of .38 Special +P to police, Winchester submitted the same data to SAAMI for approval for commercial sale. The genie was out of the bottle, now everyone could buy Winchester's "police ammo." At that time, Super Vel had already been selling "police ammo" commercially for nearly a decade.

In 1990, Remington requested a similar power boost for the 9mm Luger and .45 ACP. Accordingly, SAAMI set the 9mm Luger +P at a maximum of 38,500 psi, up from a standard 9mm Luger's 35,000 psi, which itself is astonishingly high for a cartridge chambered in the toggle-action P-08 pistol, not exactly a bank-vault action. The 9x19mm is a high-pressure cartridge as it was, so a +P additive did little to boost horsepower, only nine percent over the peppy original.

The .45 ACP +P was established at 23,000 psi, a modest increase from the standard .45 ACP pressure of 21,000 psi. At this time, the SAAMI Executive Committee determined that enough is enough. Too many +P designations

would cause confusion in the marketplace, leading to potentially unsafe gun-cartridge combinations. The committee placed a moratorium on any additional +P cartridges, a limitation that remains in place to this day.

Meanwhile, police agencies still wanted hot ammo. Illinois State Police, the first state agency to adopt a semiautomatic pistol (S&W M-39), was upgrading and wanted a hotter load than 9mm +P. About the same time, the U.S. Treasury Dept. also requested a 9mm with more zip than mere +P. Winchester developed a firecracker of a load that came to be called the "Treasury load," and designated it as +P+.

Winchester coined the +P+ nomenclature to get around SAAMI's +P pressure limitation. Their corporate lawyers did not want to expose the company to liability claims for loading ammo that might be dangerous in older pistols, so in keeping with SAAMI's admonition to only shoot ammunition that exactly matches the gun's caliber, they created 9mm Luger +P+ because there are no guns marked exactly like that, for the simple reason that +P+ doesn't officially exist. To this day, there is no recognition for +P+. It is purely an invention of ammunition companies to accommodate law enforcement contracts for hot ammo, offering some modicum of liability protection in case the ammo ever fell into civilian hands and some yahoo tried to shoot it in an old top-break revolver.

I close with a great trivia question you can use the next time you're at the range: Name the only +P rifle cartridge SAAMI ever approved. It's the .257 Roberts +P, so designated in 1981.

# 101 Classic Firearms by John Marshall 83

Dillon Precision announces the release of John Marshall's new book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, a compilation of the author's popular articles appearing in *The Blue Press* since 2007. **101 Classic Firearms** is sure to be a welcome and prized addition to the library of any serious firearms aficionado.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hard-cover with 224 pages packed

full of insights and history on some of the world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. He is also an endowment member of the National Rifle Association.

**Price: N72-40133 \$29.95, Autographed N72-97130 \$34.95**

**Competition Reloading with Brian Enos** guides you through a complete step-by-step reloading process for IPSC, Steel Challenge and NRA Bianchi Cup style shooting.

Using a Dillon Precision XL 650 reloader with CP brass and CP bullets, Enos demonstrates proper reloading techniques for the most popular loads used by the top shooters. Enos is, of course, a champion himself, winner of the Masters Competition, the NRA Bianchi Cup and a top contender in the USPSA for many years. Run time: 80 minutes.

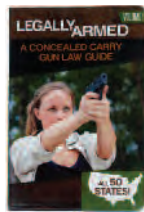

**N72-14341 \$19.95**

**Making Ammo: A Beginner's Guide to Handloading** by Kyle Lynch – Ammo shortage? Not anymore! Learn a new hobby that will save you money and ensure that you always have enough of the right ammunition for your shooting needs. This guide offers you an opportunity for first hand information from an experienced reloader as he takes you through the reloading process. Examples explain what works and what doesn't. If you are new to reloading or want to understand the fundamentals more fully, this guide provides simple step-by-step instructions.

**N72-43270 \$23.95**

**Legally Armed: A Concealed Carry Gun Law Guide** – Learn the basics of concealed carry and the laws associated with this astronomically growing group of self-reliant Americans. If you depend on a handgun for the protection of yourself or your family, arm yourself with knowledge, too. What's inside? What to consider before carrying a firearm • Protecting oneself: discharging a firearm in self-defense • What to do when interacting with Law Enforcement • Gun handling, practice and storage • State-by-state quick reference guide to carry laws where you live and travel.

**N72-43269 \$14.95**

**Armed & Smart: A Beginner's Guide to Concealed Carry** – If you are new to concealed carry and need a great resource for information, this is the book for you. This book covers all the basics a beginner needs to know.

Before you make the decision to exercise your Second Amendment right to bear arms through concealed carry, you should consider factors like what type of gun is best for carry, when to carry a firearm, how to carry concealed, and why you should carry a concealed firearm.

We carefully cover handgun safety and the proper steps for using and caring for your firearm. Other topics include cartridge selection, accessories available, practice techniques, and range etiquette.

**N72-43232 \$16.95**

**Armed & Smarter: Advanced Concealed Carry Weapons & Training** – Once you have mastered the basics for carrying your concealed firearm, you need a book to build on that foundation and hone your skills to those of an intermediate-level handgunner. After obtaining your concealed carry permit and securing a firm grasp of the responsibilities attendant to carrying a concealed firearm, it's time to focus on becoming an excellent marksman.

In *Armed & Smarter*, our authors prepare you, the shooter and gun owner, to handle and use your handgun responsibly. By the end of this book, you will understand the importance of strong habits and perfect practice.
