RUGER[®] COMPACT HANDGUNS

Ruger offers lightweight, compact handguns for every personal protection need.

380 AUTO LCP II

The LCP[®] II features a short, crisp trigger pull with single-action feel, inner trigger safety, improved sights, a larger grip surface and an easy-to-rack slide with an improved slide stop mechanism with a last round hold-open.

9MM LUGER LC9S[®]

Chambered in 9mm Luger and sized just slightly larger than the LCP[®], the LC9S[®] is compact, powerful and features a short, light, crisp trigger pull for faster shooting and improved accuracy.

380 AUTO LC380[®]

The LC380[®] provides 7+1 rounds of effective .380 Auto personal protection. Slim and lightweight for easy concealment, the LC380[®] combines reduced recoil with modern safety features in an easy-to-rack design.

22 LR, 22 WMR, 38 SPL +P, 9MM LUGER, 327 FED MAG, 357 MAG[®] LCR

Now available in six calibers, there is a lightweight, reliable and easy-to-shoot LCR[®] for every need – from personal protection to low-cost practice at the range.

Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$50.95 each.

We READ Our Mail!

Great article by Dr. Brian Dillon in December's issue (.45 Colt). I led a pack string for 25 years into northern California's wilderness areas and hardly ever failed to see black bears. My Ruger Blackhawk 4-5/8-inch barrel in .45 Colt was always on my hip and I never felt undergund. The .45 Colt cartridge has been my "go to" round for over 40 years and I can't see myself changing my mind any time soon.

Edward Cannon, Ph.D. – Mendon, UT

Re: December's article on the Ruger SR1911 10mm. I would swear I recall an episode of Miami Vice where Sonny mentions that he's shooting .38 Super. Was I dreaming?

John W. Lacey – Brandenburg, KY

John, I doubt you were dreaming. In a world (the entertainment industry) where very few people know ANYTHING about guns (and even fewer seem to WANT to) it's entirely possible that whoever wrote the dialog for that particular episode (or any of them) didn't have a clue what the actor was supposed to be shooting.

Thank you for the tribute articles about Mike Dillon. I have really enjoyed reading them in *The Blue Press*. His interest in older aircraft is similar to mine. Also, I appreciate the articles written by Brian Dillon, Ph.D. and especially Peter Caroline.

Roger Givens – Campbell, CA

I am amazed. Nothing that I tried worked. I cleaned the [primer magazine] tube, checked for proper installation, changed blue plastic tips – all with no improvement. One third of the primers were going in sideways, upside down or no primers at all. I called you guys and the above [550 Primer Slide, small; Single Primer Magazine, small] was sent. I put it all in and started loading. It went 480 rounds perfectly and had ONE with no primer. Bad brass was the problem. Your "No B.S. Warranty" is wonderful and so is the help. Thanks much!

Robert Vance – Hanson, KY

Thanks for the letter, Robert. It's a reminder that stuff – even Dillon stuff – wears out and needs to be replaced from time to time. We're happy to keep you loading!

SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

RL 550C

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

THE BERETTA

The Beretta APX, left & right sides.

By J. B. Wood

For those who ask about selecting a new pistol, one of my suggestions is always to go to a gun shop, and see how it feels in the hand. I was reminded of this when I took the new Beretta APX out of its case. It felt exactly right in my hand. Three shallow finger-recesses on the front of the grip frame, and a backstrap with a perfect curve.

My hand is of average size. For larger ones, the APX kit also supplies a medium and large backstrap unit. The one in place was marked "S", and I'll leave it there. This is a full-sized pistol, not one of those little deep-concealment puppies. I would imagine that later there will be a compact version.

The locking system is classic falling-barrel, and the slide latch has release tabs on both sides. The magazine-release button is also reversible. Not on my test gun, but also available, is an ambidextrous manual safety. So, left-handers, you're covered. The slide has good, widely spaced retraction projections, front and rear. An internal striker-block safety is cleared only in the last fraction of the trigger pull.

Describing the trigger systems of today's striker-fired pistols is always tricky. Beretta calls the rollover sear the "cocking lever." Okay, as it rotates to the rear, it does move the cocked striker a very tiny bit rearward before release. Even so, the system is single action. The nice pull on my pistol averaged just a hair over five pounds, with minimal overtravel.

The silly "flipper" safety in the trigger works perfectly, and at least this one is not laterally unstable, like one I could name. After a while, you don't notice it. Another slight distraction: The front of the trigger guard is squared, with a small hook at the bottom.

This is for those who still use an obsolete type of two-hand hold, with a finger of the support hand around the front of the guard. On the APX, it's no real problem. Just take extra care when putting it back in the holster. Forward of the guard, on the underside, there's a standard rail for light or laser.

While we're in that area, I'll note a neat little design touch – on both sides, just above the front of the trigger guard, there's a little grooved pad, to

APX PISTOL

The controls: takedown lever, slide latch, and magazine release.

The Beretta APX, fieldstripped. Note the captured recoil-spring unit.

A nice kit. Alternate backstrap pieces, a spare magazine, and a classy Beretta magazine loader.

During takedown, you don't pull the trigger. Depressing this little button safely de-cocks the striker.

safely rest the trigger finger. Another safety-related thing is a small recessed button at right upper rear that will lower the striker during takedown.

In my 9mm test gun, the double-column magazine holds 17 rounds. The other numbers: Weight, 27.9 ounces; Length, 7.56 inches; Height, 5.60 inches; Width, 1.30 inches; and Barrel length, 4.25 inches. As noted earlier, it's a full-sized pistol. Fine for home, car or open carry. Not for ankle-holsters.

The steel sights are excellent, dovetail mounted, square-picture, three white dots. They required no adjustment on the test gun. If you need to move them on your new APX, use a sight-mover. Don't mess it up. On the rear sight, the notch is nicely wide, for easy eye pick-up of the front sight.

At the range, the APX worked perfectly with all loads, as expected. It's a Beretta. The ammo used included ordinary solids from Winchester, and the new Honey Badger serious load from Black Hills.

With all, the felt-recoil was mild. At 7 and 15 yards, standing, two-hand hold, my groups were 3.5 to 4.5 inches, at the center of the target.

There will also be a version of the APX in .40 S&W chambering. Other options include a slide with a loaded-chamber indicator on top, and a magazine-disconnect safety. Why anyone would want that last item, I can't imagine. The grip-frame of the APX is glass-reinforced polymer, and the steel parts, externally, have a matte Nitride finish.

Beretta's entry in the polymer-frame striker-fired pistol competition is outstanding. And, the suggested retail price is quite reasonable at \$575. Also, as noted at the start, it fits my hand perfectly. Try it in yours.

BL 550 Dillon's Basic Loader

\$287⁹⁵

O22-15399

Reloading Dies and Caliber
Conversions sold separately
(see the back of the order blank
in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount O22-22051
\$50.95

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.45 each, or \$24.45 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

O22-20302, \$26.95

AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

O22-20251, \$95.95

OPTIONAL MAGNUM RIFLE POWDER BAR

O22-21353, \$32.95

AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

O22-22120, \$33.95

BL 550 POWDER DIE

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

Powder Die: O22-16629, \$19.95

Oversize Die: O22-16626, \$20.95

Plastic Funnel: O22-16617, \$6.49

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (*Requires the use of an RL 450 powder die – see below.*)

O22-20029, \$23.95

RL 450 Powder Die:

O22-20308, \$22.95

RL 550C

STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for ONLY...

Square-Deal-Only Wrench	O22-19970	8.95

Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	O22-22051	\$50.95
XL 650-only	O22-22052	47.95
"SDB"	O22-22223	66.95

Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	O22-97126	\$154.95
----------------------	------------------	-----------------

Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	O22-17950	\$47.95
------------------------	------------------	----------------

Dillon's Bullet Tray is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	O22-22214	\$44.95
1050 Tray Kit	O22-22215	44.95

Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Dillon's Case Preparation Equipment

CV-2001 O22-20493 \$189.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

CV-750 O22-19455 \$145.95

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

CM-2000 Case/Media Separator O22-20675 \$76.95

CM-500 Case/Media Separator O22-21045 \$47.95

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers: Case Cleaners are available in 220 volt!

Euro CV-2001 O22-22047 \$214.95
Euro CV-750 O22-19473 \$170.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners now have a Five-Year Warranty on the electric motor.

Rapid Polish

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **O22-13804** **\$8.95**
Case (20 pc.) **O22-20255** **135.95**

Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **O22-13733** **\$8.95**
Case (20 pc.) **O22-20256** **135.95**

Half and Half 10 bottles of polish /10 of lube
Case (20 pc.) **O22-21375** **\$135.95**

Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag **O22-13287** **\$23.95**

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag **O22-13496** **\$15.95**

Super 1050/RL 1050 Short Trim Die Toolhead

O22-62219
\$229.95

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. (NOTE: the Blue 1050 toolhead stand - Part Number O22-62200, \$49.95 - is not included.)

We're
Glad to
See

You're

SUPER VEL[®]
Ammunition

Dillon's New Rapid Trim 1500 Case Trimmer ²³

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **O22-62164** is **\$332.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **O22-13141**, are **\$20.95** each. Upper lock rings, **O22-13559**, are **\$5.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

by Mitch Rosen!

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products – we're happy to have our name on them.

Dillon's Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original. This belt is a favorite with law enforcement, military personnel, fire-

fighters, paramedics, etc. *Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.*

ANNOUNCING:

Mr. Bulletfeeder®

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

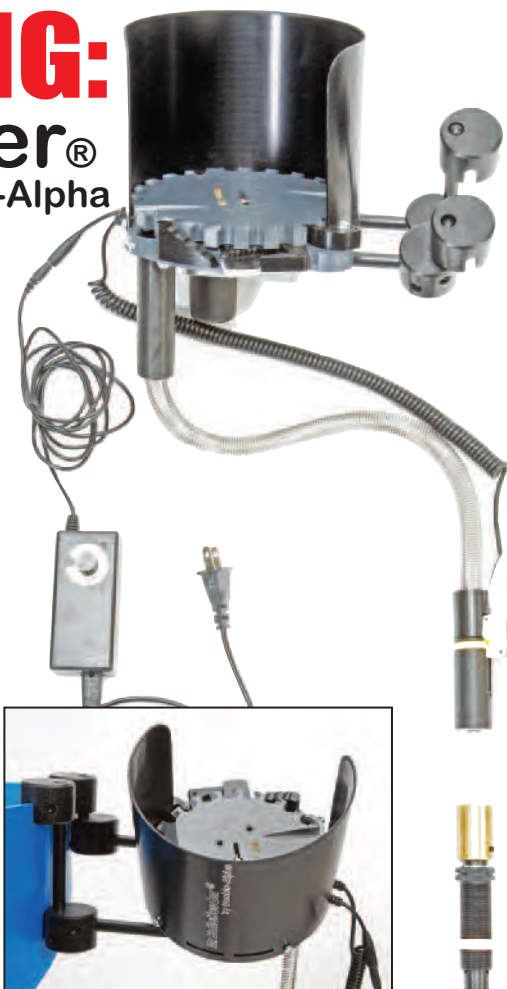

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the case-feeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

Mr. Bulletfeeder (Comes Set Up in One Caliber)

Mr. Bulletfeeder® Replacement Parts & Spares

Having separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

The Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collar to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

Use a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

Dillon's Pistol Die Sets

Size Die

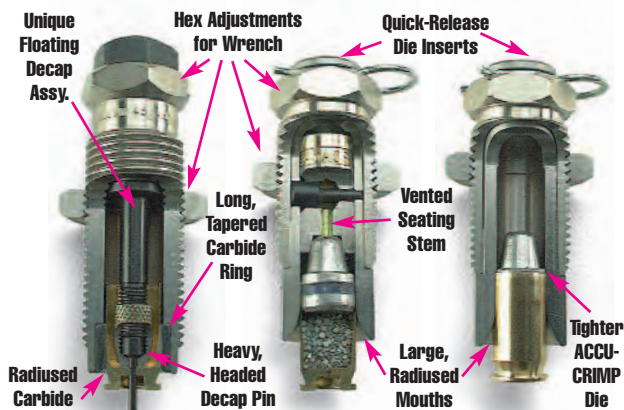

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

Dillon's Rifle Die Sets

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Rifle Dies (Three-Die Sets)

Why I Became

By **Connie Bowlby**

I was introduced to Action Shooting International (ASI) a little over a year ago through Wade's Eastside Gun Shop in Bellevue, Washington. I'd already joined Wade's as a member prior to that, in direct response to an experience I had. At 3:00 am, the Tuesday after Labor Day, 2016, I was asleep in bed, and my cat woke me up. Then I heard the gate latch into my backyard open. There's a path running along my house, and someone had just walked down it, through the gate and into my backyard.

I ran toward the back of the kitchen because that's where I normally leave my phone to charge at night – I'd forgotten it was actually in the bedroom with me. I rushed through the house, and I saw him through my laundry room window. He didn't see me because he was looking ahead, not to the side. I crouched and moved under the window. I could see him through the peephole, standing right on the other side of the kitchen door. It was so dark I could see he was wearing a hoodie, but really couldn't see anything else.

I ran back into my bedroom because I remembered that's where my phone was, I wanted to call 9-1-1. But the adrenaline had hit, I couldn't remember the text code to unlock the phone. When I'd moved into this house, a friend had given me a 12-gauge shotgun. It was in my bedroom closet, but I was uncomfortable keeping a round in the chamber, and I couldn't remember where the slide release was so I could unlock the action to pump a round into the chamber. Finally I was able to unlock the phone and I turned the outside floodlight on and off a few times as I called 9-1-1. This entire process probably took less than a minute; it took the police about five minutes to get there. Of course it seemed longer. Time slows down. By the time they arrived, he was gone.

That weekend I called Wade's and signed up for their All Women's Handgun Class. I'd been thinking about doing that already, but I figured this experience was the universe's way of saying to me, "It's time to stop screwing around." After that, I did a lot of shooting on the Sunday Ladies' Day at Wade's, got my concealed carry permit, shot a lot of different guns out of the range rental case until I found one I liked, and bought myself a GLOCK 17.

Two months after the first attempted burglary – I wasn't there the second time – but while I was out, several screens were removed from the windows and someone tried to get in again. Having had two burglary attempts in two months, this changed how I think about my safety and my life in general. The fear and adrenaline I experienced that night was very intense, and I realized that, until you're faced with a situation like this, you don't get any practice dealing with that sort of physical and mental state. I had no idea how difficult it would be to function and just dial 9-1-1.

Until this happened to me, I'd been against having a loaded firearm in my home. I looked at it as living in fear and I didn't want to do that. If I'm honest, I was also scared

of guns. I had my 12 gauge, and the magazine was loaded, but I had the action locked on an empty chamber. But after two burglary attempts in two months, I had to accept that there are people out there who do not play by the same rules. I decided it was better to be prepared and have a plan in place to protect myself. These days, I like my guns to be loaded, and not require manipulating any little levers or buttons before they're ready to fire.

I honestly can't remember how I first heard about ASI. I'm sure it was someone at Wade's mentioning the matches there. I've mostly shot my

an ASI Shooter

GLOCK 17. For a long time, actually, I shot a Springfield XDS Compact. I've done some Steel Challenge. But it's been ASI mostly. I've gotten myself a GLOCK 34, because I want to start shooting USPSA. I'd say the GLOCK 17 is still my favorite, probably because it was my first handgun, so there's a sentimental attachment. I put some Talon grips on it; I really like how it feels in my hand. I haven't done that yet with the 34, but eventually I will.

Learning how guns work, and through a self-defense class, I learned more about crime and how to not be a victim. This turned my fear into action, and it became an ally to keep me safe. I live in an area where I have to be aware of my surroundings, but I have much less fear about living alone, and I know that I can protect myself.

ASI is great because it focuses on safe handling of firearms. Anyone can participate, so it's perfect for people just beginning to discover shooting, and those who want to practice and improve their skills for concealed carry. It's also a nice way to get a taste of the world of competition shooting. In just over a year of shooting ASI, I've greatly improved my accuracy and speed. I

hope to continue this and eventually compete at a higher level. I so enjoy the challenge and the competition. I've always been attracted to activities that force me to push myself. In the past I've competed in Hunter/Jumper horseback riding and Automotive Road Racing. In shooting, I really love seeing my times drop and my accuracy improve as a result of my practice drills at home and on the range.

I've met so many great people through ASI. Members are there because they truly enjoy shooting and helping others learn. From the very beginning, I felt welcome and comfortable enough to ask questions. It's really an incredible community. I hope sharing my experience will encourage others, especially women, to come out and try ASI. I am so grateful I found this community. I always look forward to the days I get to shoot.

For information about how to join ASI or start a club in your area, contact ASI at:

IMPORTANT WARRANTY UPDATE!

By Larry Drake

Dillon Precision is known for making the World's Finest Reloading Machines; anyone reading this very likely knows this already. We also make the very best, most durable, case cleaning and preparation equipment. Like our reloading machines, these items are not the lowest-priced items on the market but, just like our reloading machines, they are the best and are backed by service and support that no one else can touch.

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl's capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger, has more horsepower, is internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

If you don't need quite so much capacity, we've got the Dillon CV-750, which will hold 500 .45 ACP cases, or about 200 pieces of .30-06 brass. This is the ideal size for most shooters' needs and it has exactly the same motor as its big brother the CV-2001. So even if you get the smaller and less-expensive model, you get the same motor. It's too bad car sales don't work like that!

When we chose the motor that we use in our current-production vibratory cleaners, we ran them through a variety of tests. One of those tests was simply endurance. We loaded the case cleaner

with media and brass, just as one of our customers would, and we turned it on. Then we left it on...for two years. That's right, two years non-stop, under a full load with zero problems. We finally turned it off to check out the brass we had inside, and it was REALLY clean. It was also paper thin and unusable so we don't recommend you emulate our test with your own brass. Afterwards, the machine fired up and continued to work as normal. We still use it in the shop to clean our brass.

We did find a few vibratory cleaners on the market – some are even blue with a gray base – that only have a 90-day warranty. We're assuming there is a reason for this.... Then there is this brutally tough machine that we torture tested for two years and it had only a one-year warranty. Well, that didn't make any sense at all to us. So, after some discussion, we've decided to change that.

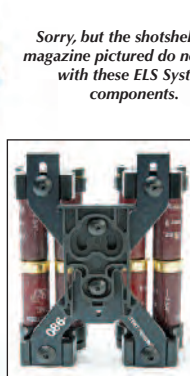

WE ARE NOW OFFERING A FIVE-YEAR WARRANTY ON BOTH OF OUR VIBRATORY CASE CLEANERS.

That's right; we are going from one year, which was already better than some of the competition, to a full five-year warranty from the date of purchase. We don't think you'll need the warranty, mind you, but if you do, we've got your back.

You can order both of our vibratory cleaners from our site or our catalog, *The Blue Press*. Please feel free to call us if you have any questions about these machines or any other product we offer. We would love to hear from you.

CLASSIC FIREARMS: The Ruger Old Mo

By John Marshall

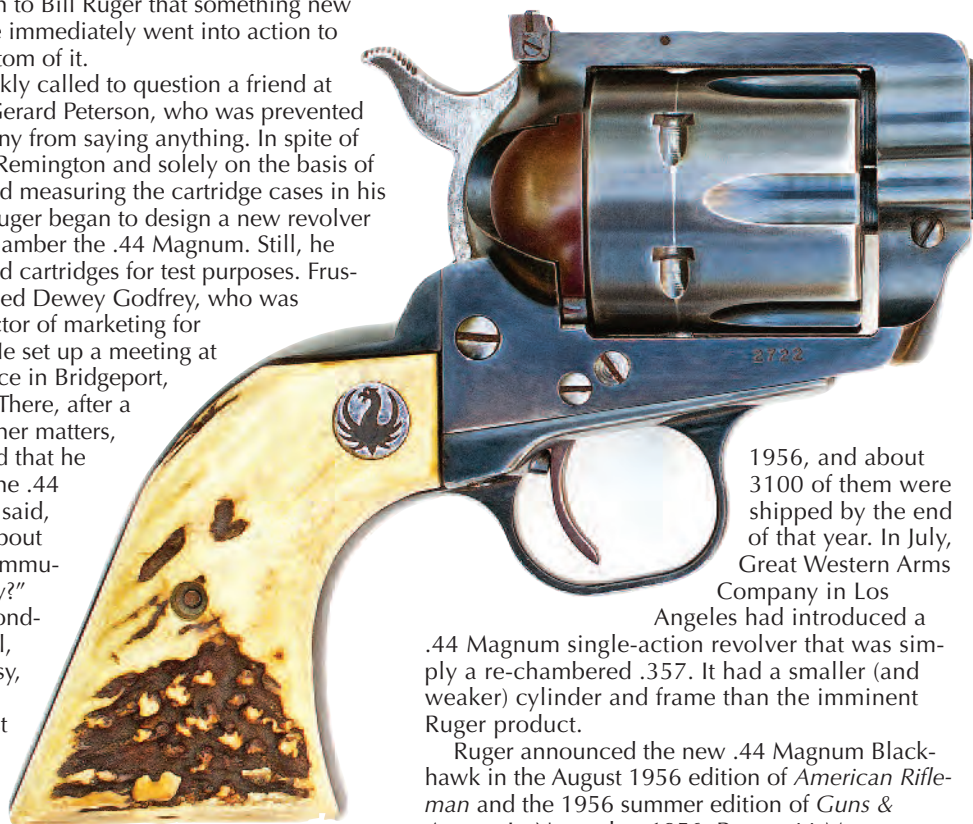

In the winter of 1955-56, Bill Ruger, president and co-founder of Sturm, Ruger & Company, was sitting at his factory desk when one of his employees came in and gave him five once-fired cartridge cases headstamped "REMINGTON UMC-.44 MAG." The man told his boss that he had found them in a dumpster at a metal scrap yard not far from the Smith & Wesson plant in Springfield, Connecticut. At that time, the cartridge and the coming S&W revolver that was to chamber it were closely guarded secrets between S&W and Remington UMC Cartridge Company. These cases were the first indication to Bill Ruger that something new was afoot. He immediately went into action to get to the bottom of it.

Ruger quickly called to question a friend at Remington, Gerard Peterson, who was prevented by his company from saying anything. In spite of this rebuff at Remington and solely on the basis of examining and measuring the cartridge cases in his possession, Ruger began to design a new revolver that would chamber the .44 Magnum. Still, he needed loaded cartridges for test purposes. Frustrated, he called Dewey Godfrey, who was then the director of marketing for Remington. He set up a meeting at Godfrey's office in Bridgeport, Connecticut. There, after a chat about other matters, Ruger allowed that he knew about the .44 Magnum. He said, "Well, how about some of the ammunition, Dewey?" Godfrey responded, "Now, Bill, just take it easy, 'cause when you leave, just take that paper bag with you and just walk on out." It turned out that the bag was full of loaded .44 Magnum ammo and Ruger was now ready to roll.

Ruger's first attempt was to re-chamber his production .357 Blackhawk single-action revolver for the new cartridge. Test firing it in the standard Potter machine rest was fruitless, as the recoil of the gun cracked the rest's aluminum carriage casting. Further accuracy tests were based, as Bill Ruger put it, "...on offhand shooting" until a new machine rest could be designed and built. Further testing proved that the .357 frame and cylinder were not

up to the pressure of the proof rounds subsequently provided by Remington. Accordingly, a new and more robust revolver was designed and built. That took more time, but it was the best way to proceed. The main changes were a larger reinforced frame and a cylinder that was .053" larger in diameter and 1/8" longer. The additional cylinder length would allow for longer bullets in reloading.

By the end of June in 1956, 1200 Ruger .44 Magnum frames were being built. Meanwhile, S&W had started shipping regular-production .44 Magnum double-action revolvers in February

1956, and about 3100 of them were shipped by the end of that year. In July, Great Western Arms Company in Los

Angeles had introduced a .44 Magnum single-action revolver that was simply a re-chambered .357. It had a smaller (and weaker) cylinder and frame than the imminent Ruger product.

Ruger announced the new .44 Magnum Blackhawk in the August 1956 edition of *American Rifleman* and the 1956 summer edition of *Guns & Ammo*. In November 1956, Ruger .44 Magnum Blackhawks began to be produced, and 790 were shipped by the end of the year. All had 6-1/2" barrels. The "flat top" cylinder frame was steel, and the grip frame was anodized aluminum. All of these were blued. The gun pictured was shipped in mid-1957, within the first full year of production. It was obtained from the estate of an Arizona rancher who bought it new and packed it often as a trail gun. It's equipped with genuine factory Sanbar stag horn grips that were then offered as an extra-cost option instead of the standard varnished walnut type. Ruger could provide special-order guns with

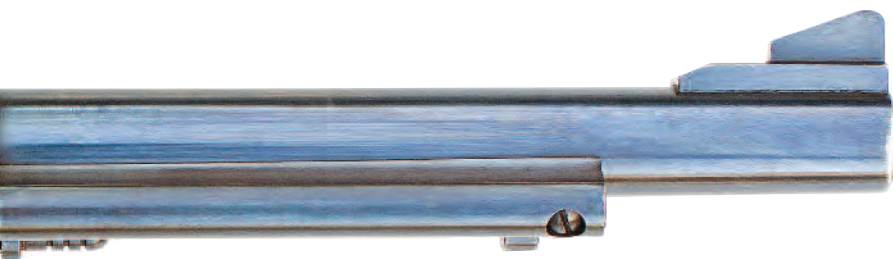

Model .44 Magnum Blackhawk Revolvers

either stag or ivory grips. These are considered quite rare and have become prized collector finds. About 200 of the first production guns had black hard rubber grips and earlier-style square ejector rod heads in order to expedite production. All of these "flat tops" had cylinders in which the chambers were recessed for the cartridge rims. The initial retail price for the basic guns was \$96.00, which made them the most economical .44 Magnum revolvers then on the market.

A second variation uniformly utilized varnished walnut grips and a round concave ejector rod

in mid-1957 to noted gun writer Elmer Keith, in Salmon, Idaho.

With the introduction of the heavier, refined, elegant and easier-on-the-hand Super Blackhawk .44 Magnum revolver in 1959, production of the original "flat top" .44 Magnum Blackhawk began to taper off. The price for the Blackhawk was then \$106.00, while the Super (in a fitted mahogany case) retailed for \$120.00, only \$14.00 more. Production of the older-style guns ceased in 1962, and the last 73 were sold in 1963. Serials from 1 to 14920 were produced

"The initial retail price for the basic guns was \$96.00, which made them the most economical .44 Magnum revolvers then on the market."

from 1956 through 1958 at the old "Red Barn" address on Station Street in Southport, Connecticut. All the later ones through 1962 were manufactured at the newer Lacey Place facility in the same city. An era had come to an end; gradually making the old flat tops collector items. A total of 28,806 were made over the years. The last serial number recorded was #29860. By comparison, the old

model Super Black-

thumbpiece. A third variation (from about serial #9000) had a collared cylinder base pin that protected against the pin rotating and coming out under recoil. The earlier gun pictured here has one of these, probably retrofitted by its owner at the time. Another variation introduced a straight slot on the ejector rod housing. In late 1958, a thicker, straighter trigger was used, after about serial number 11000. In 1958, one was shipped with a 15" barrel. Another of these, initially made for Bill Ruger, was later trimmed from 15" to 10" and shipped in 1959. In 1959, optional 7-1/2" and 10" barrels were made available. The slightly modified XR3-RED grip frame and oiled walnut grips were used in the second half of 1962 and into 1963. In the same time period, a few guns were shipped with Super Blackhawk non-fluted cylinders. Examples exist with both 6-1/2" and 7-1/2" barrels. About six factory-engraved guns are known to have been made for various notables. A special gun with a custom 4-3/4" barrel, serial #2331, was shipped

hawk production totaled 106,460 from 1959 to 1973, when the New Models were introduced.

Today, the old flat tops have become sought-after and very nostalgic guns. As a word of caution, all original Ruger "3 screws and 4 clicks" single action revolvers made prior to the introduction of the new models in 1973 operate identically to the old Model 1873 Colt single actions, where they must be placed at half-cock to load and unload. They should be considered as "five shooters" and carried with an empty chamber under the lowered hammer for safety. To load, the drill is "load one, skip one, load four, and lower the hammer." This places the empty chamber under the hammer. Ruger will, on request, upgrade the older revolvers to a newer mechanism that will allow carrying six rounds safely. They will also provide you with the original parts for collector purposes. If kept in original condition, loaded and carried in the manner described here, they are still quite serviceable and very rugged revolvers. They are definite classics.

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

O22-21894 \$44.95

Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

O22-19972 \$39.95

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mms.

Made in the USA and comes with a lifetime warranty.

A NEEDED REST

MTM® CASE-GARD™ HIGH-LOW SHOOTING TABLE

Reviewed by Peter Caroline

When you're sighting-in a rifle or shooting at a distant target, a good solid shooting bench is your best friend. But what do you do when you're out in the boonies, and such a convenience is nowhere to be found? Years ago, I was invited to my first prairie dog shooting experience in the neighborhood of Grand Junction, Colorado. My host's shooting platform was the hood of his old International Scout, with an Army blanket protecting what was left of the paint, and sandbags for a rifle support. It wasn't ideal, but it was a whole lot better than shooting from a prone position.

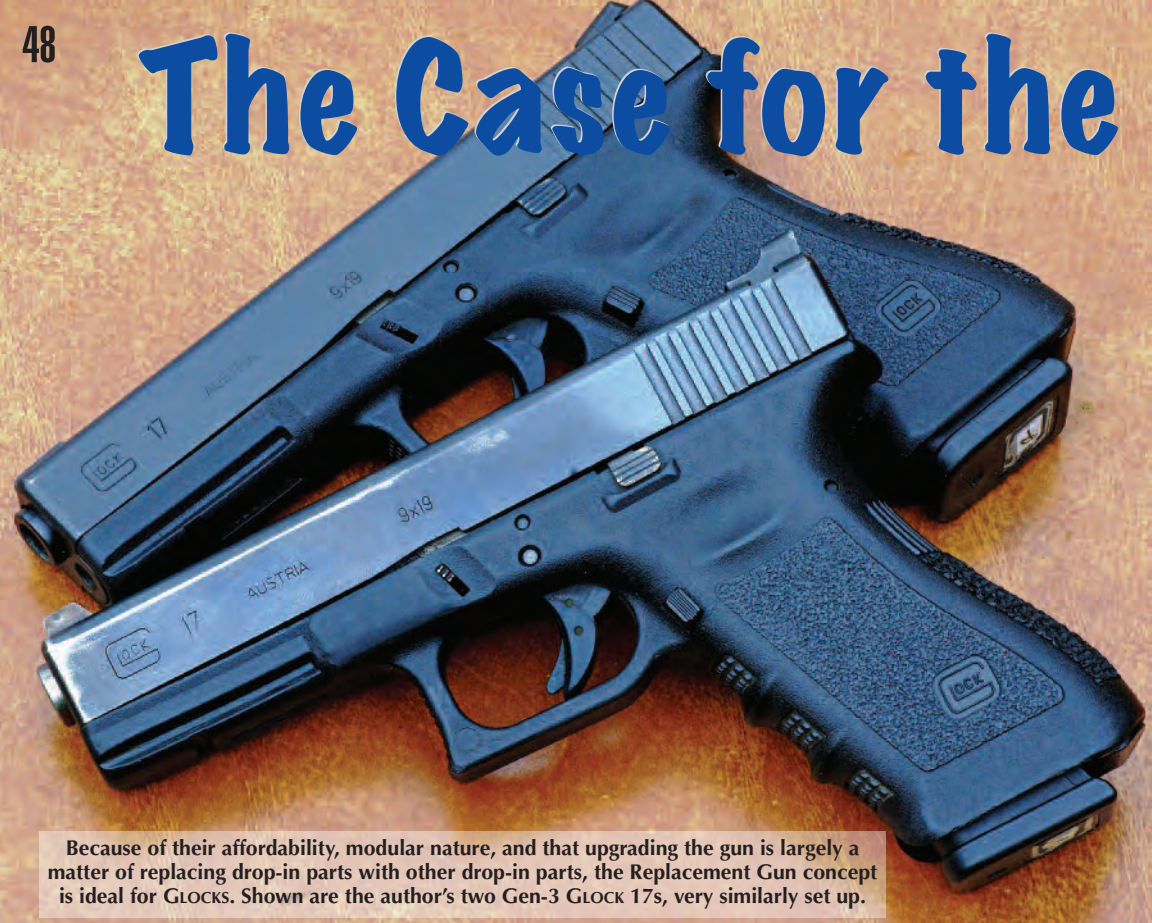

In more recent years, I've owned several shooting benches with varying degrees of portability. They were quite useful if I was fairly close to my truck, but less so if I had to lug them for any distance, along with rifle, ammo and other paraphernalia. My options seemed limited, but several weeks ago, I received word that MTM Case-Gard, who makes a variety of shooting-related products, was introducing what they call a High-Low Shooting Table. It looked like it might be useful, so I ordered one. The table component is a heavy-duty 17" x 33" polypropylene unit, shaped rather like a shortened ironing board, and thus designed to be equally useful for left- or right-handed shooters. This platform sits on a very sturdy metal tripod. The

legs have pointed footings that securely dig into the ground, very much like a surveyor's tripod. You can adjust the table from a low of 18" all the way up to 55", and the legs are individually adjustable by means of double locking systems for length, so sloping or uneven terrain is no problem. There's ample room for rifle or handgun rests or sandbags, and for a spotting scope and ammo and tools.

The MTM High-Low Shooting Table really came in handy last week. My usual shooting spot in the desert was unavailable, and I had several guns that I needed to review. I remembered another location where I'd shot many years ago, but vehicular access was limited. No problem. The Shooting Table weighs a few ounces less than 13 lbs., and even has an adjustable shoulder strap for easy transport. I put the table in place, adjusted it to a comfortable standing height and proceeded with my shooting. The table remained perfectly steady and maintained its position throughout the session. If more stability is needed, the tripod center bolt incorporates a hook for hanging weights. With the top and legs separated, the whole rig can fit comfortably in the trunk of a small car. MSRP is \$139.95, probably less in the real world. Helluva deal!

The Case for the

Because of their affordability, modular nature, and that upgrading the gun is largely a matter of replacing drop-in parts with other drop-in parts, the Replacement Gun concept is ideal for Glocks. Shown are the author's two Gen-3 GLOCK 17s, very similarly set up.

By Duane Thomas

After people new to shooting, and carrying a gun for self-defense, settle on exactly what their carry gun will be, inevitably there comes the time they ask themselves what should be their next gun purchase. Because this whole “gun” thing is addictive; of course they can’t have just one. At which point, they always want “something different.” Okay, I get that. To them, this is all fresh and exciting and full of infinite possibilities, of course they want to explore. But such people, when they ask me, “What gun should I buy next?” are always amazed when I tell them, “If you’ve settled on Gun X as your carry gun, what you really need now is a second example of Gun X.” I call this concept the Replacement Gun.

While it’s a nice ideal to be equally skilled with every weapon on the planet, the truth is that most gun carriers are more skilled with their carry gun than anything else. This is the gun they carry on their body, shoot, practice with, 99-plus-percent of the time. I call this the Main Gun. (A lot of the ideas I put forth in this article came from Greg Hamilton, head man at InSights Training Center, just wanted to give credit where it’s due.)

A lot of self-defense oriented handgunners don’t understand that if they ever have to use their carry gun for its intended purpose, defending their

life from violent attack, the police are going to take that gun away from them, at least for a while. There is nothing punitive in this, the gun is evidence in a shooting, and until the good guy or gal’s been cleared of wrongdoing, the police have GOT to have it.

In Washington State where I reside, years ago a man named Danny Morris shot and killed an armed robber and honest-to-God clinically diagnosed psychopath who was literally in the process of trying to shoot a police officer to death. I mean the bad guy was actually firing his gun at the cop when Danny stopped him. Afterwards, the cop told anyone who would listen, “As far as I’m concerned, Danny saved my life.” It would be difficult to imagine a more clear-cut example of a justified shooting. It was still two months before the grand jury could convene, rule this a good shooting, and Danny got his gun back. Until Danny could have his stainless Colt Delta Elite Gold Cup 10mm returned to him, he carried a 1911 .45. That gun worked the same, fit in the same holster, and its magazines fit in the same spare mag pouch, as what he was used to. And here we begin to see the utility of the Replacement Gun concept.

People raised in a violent, criminal subculture can have a very direct way of communicating their displeasure at people who’ve killed a friend

Replacement Gun

or family member. To them, you're not the heroic citizen who successfully defended yourself from criminal attack. No, to them, you're "the a-hole who killed my brother." There have been numerous instances of cops and ordinary citizens who've had to kill in self-defense being attacked by vengeful friends or family members of a dead criminal. So, if you've been attacked by someone intent on killing you, it is quite possible that in short order you're going to be attacked by another someone – or someones – intent on doing the same thing.

This would be a REALLY BAD TIME for you to be walking around unarmed. It would also be a really bad time for you to begin carrying a different type of gun, with a different operating system, different trigger pulls, different pointability, than the gun you are, in overwhelming probability, more skilled with, more grooved-in on, than any other firearm. It would also be a really bad time to have to go out and buy a new holster, magazine pouch, spare magazines or speedloaders, before you can start carrying a gun again.

The answer to this is the Replacement Gun, a duplicate or near duplicate of the Main Gun. What you want to be able to do, in the aftermath of a self-defense shooting, is walk into your home, go to your gun safe, open it up, load your Replacement Gun, stick it in your empty holster, top off some magazines/speedloaders, stick them in your empty spare ammo carrier(s), and be armed identically to the way you were before the shooting.

In some cases, you don't even have to wait that long. Again in Washington State, John Solheim was a Pierce County Sheriff's deputy who stopped a speeding car on a lonely country highway; not realizing it was speeding because its driver was an armed robber who'd just pulled a job. As their cars came to a stop, the robber exited his vehicle and charged John's cruiser, in his hand one-each Colt Python. John saw the armed bad guy coming, started to exit his cruiser, simultaneously popping the seat belt and going for his duty gun, a Smith & Wesson 4" barreled Model 58, and got shot in the chest at point-blank range with a .357 Magnum.

Fortunately, John was wearing one of the very early Second Chance vests. This was back in the day when cops had to purchase their own vests, and he was actually the only Pierce County Sheriff's deputy at the time who wore one. After this gunfight, when other deputies realized John was still alive because of his vest, that changed. John's response to being shot one time in the chest with a .357 Magnum was to fire six shots and hit his

opponent five times with a .41 Magnum. Now that's one-upmanship!

Afterward, of course, John's Model 58, as well as all his speedloaders, empty and otherwise, were taken into evidence by responding investigators. There has been much written about the "castration effect" felt by cops who've had their guns taken away from them in the aftermath of a shooting. Even if they understand the reason for that, still it's experienced as a very punitive thing, to have these authority figures de-gun them right after they've used that gun to defend their life, the perceived though not intended message being, "You screwed up, we don't trust with a gun anymore."

John had an answer for that. When they told him, "We need to take you back to the station to give your statement," he said, "Okay, wait a minute," went to the back of his cruiser, opened up the trunk, pulled out one-each Smith & Wesson 4" barreled Model 29, loaded it up, stuck it in his empty holster, stuffed multiple speedloaders with .44 Magnum, inserted those into his empty speed-loader carriers, then said, "Now I'm ready."

There is a rumor going around that each Delta Force member, back when they used the 1911, had two 1911 .45s, and they could be set up, within reason of course, any way the soldier wanted them, the two guns just had to be identical. One gun they shot the hell out of in training and it took the vast majority of wear and tear, the other gun they shot just enough to make sure it worked, and that was the one they carried on missions. I asked former Delta Force troopie Larry Vickers about that, and his response was, "It is true that we had two 1911s per man in Delta but it was not mandatory that both guns 'had' to be identical. In fact, in many cases they were not. As long as the sights and trigger and controls are similar, the rest is no big deal."

The Main Gun and the Replacement Gun don't have to be absolutely identical. They don't even have to be in the same caliber, though in my opinion that's ideal. So, do you want your Main Gun to be a 9mm GLOCK 17 and your replacement gun to be a .40 S&W GLOCK 22? Have at it. Just make sure the Main Gun and the Replacement Gun have the same manual of operations, the same trigger pulls, fit your hand and point the same, fit in the same holster, that its magazines/speedloaders fit in the same carriers as your Main Gun's, and you will have in your arsenal a powerful tool for continued self-defense in the aftermath of a justified, life-saving shooting incident, while your Main Gun reposes in police lockup, awaiting its return to you.

"Big Fifty Reloader"

STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

RCBS Trim Pro-2™ Case Trimmer O22-43231 \$139.95

The RCBS Trim Pro-2 manual case trimmer now features a spring-loaded "universal" shell holder that will accommodate case head diameters from .250" to .625". Comes with pilot calibers: .22, .24, .25, .27, .28, .30, .35, .44 and .45.

Dillon's Bench Wrench Fits 1" die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

Elzetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

Pursuing Perfection — Ammo Incorporated

By **Seth R. Nadel**

We all can appreciate precision-made guns, holsters, and precision-made ammo. Ammo Inc. is applying every effort to make every round exactly like every other round. It's a tough market out there, as shelves are stuffed with ammo from every maker, in every bullet weight. Not the best time to start a new ammunition company...unless....

Ammo Inc. has set their sights high (pun intended), with five levels of quality control, and personal accountability for every round. At the start, every lot of every component is examined for uniformity.

Cases, for example, generally are a staple item – open the box and dump them into the machine. Not at Ammo Inc., where each lot is hydrostatically tested. It seems just an added operation and expense, until they had to reject one lot. When tested on their specialized equipment, the sample cases fractured – they could not stand up to the pressure. It's a good thing this happened during quality control testing, and not in your gun! Even the best component makers in the business can make a mistake, but it will not get into a box of Ammo Inc. rounds.

This is not the only ammunition maker I have visited, but it is the only one where I saw an employee using an ammo gauge on the rounds as they came from his machine! Not every round, but many of them got gauged before they even got into the catch bucket! After cleaning and polishing, every round gets gauged. That exemplifies the lengths these folks will go to in their pursuit of perfection. And if they change anything – case lot, powder lot, bullet, or primer, sample rounds are collected and test fired to insure this batch is exactly like the ones before.

Accountability is part of their plan too. Each lot starts out with a slip of paper documenting every component used. But every employee, including the boss, has a personal number stamp. If they do anything with the ammo, they have to put their stamp on the paper. Thus, from the lot number

they can pin down every person who had anything to do with those rounds.

And their inspectors are so picky, their culls look better than some companies ammo fresh from the box. Even the supervisors could not find some of the (few) blemishes the inspectors had culled. But no one could overrule the inspectors.

As a bonus, every box has the ballistics right on the label – pistol ammo with muzzle energy and velocity, as well as the 50-yard data. The .223 rifle boxes have the data at the muzzle and at 100 yards.

They have aligned themselves with Jesse James...no, not *that* Jesse James, but the motorcycle and firearms designer. Their joint focus is on quality, accuracy, and value – in that order. After all, low quality or inaccurate – ammo has no value for the shooter.

The Jesse James line includes the TML series of 12 calibers, and the Black Label in five pistol calibers and one rifle – (you guessed it) 223. The TML line comes in boxes edged with the old-timey printing like our folding money. Someone said it looked like our money, thus TML – The Money Line, to differentiate it from their other lines. The Black Label is built with proven JHP projectiles, loaded into blackened cases with blackened bullets – altogether an eye-catching combination, packed in black boxes.

The OPS (One Precise Shot) line uses a Hollow Point Frangible projectiles for maximum energy transfer, even after passing through the barriers in the FBI test protocol. It should eliminate “shoot throughs” on the street, which are rare, but do happen. They are lead free (and even comply with the law in California) and intended to stop the attacker right now!

Suppressors (*aka* “silencers”) are in the news, with the attempts to remove them from the onerous paperwork currently required to save shooter hearing. Ammo Inc. has you covered there as well, with their “stelTH” line. They started with a fresh sheet of paper (or computer screen), and

designed for both noise reduction and cleanliness with 100-percent functioning.

In fact they call it hyperclean – and they mean it. The once-fired brass from their TML ammo is almost as clean as factory fresh brass that has never been loaded. Even their loading machines are on wheels, so they can be moved out of the way for the regular wet-process floor cleaning – which includes their indoor ballistics test range. I have eaten in restaurants that weren't as clean as their workspace!

Their rifle line covers .223, .300 BLK, and .308, with multiple bullet weights – six different bullets in .223, four in .300 BLK, and three in .308.

I obtained samples of three different lines, in 9mm, .45 ACP, and two different styles of .223. Of course, when I went out to test fire them, as usual, Mother Nature took charge with 20-30 mph winds from right to left across the range.

I started with the 9mm 124 grain from the Jesse James Black Label line. It was too windy to chronograph, so I got right to shooting. From a 9mm 1911 and a S&W M&P, each gun fired kneeling two handed, I got 1.5-inch groups at 25 yards.

Next was the Jesse James .45 230-grain JHP from the TML line, with brass cases and bullets. The test guns were my regular Para-Ordinance 1911 and an old SIG 220, my bedside "comfort" gun. Under the same conditions and from the

same stance, I got 1.5-inch groups. *Hmm, this looks like a trend. I wonder what I would have shot without the wind?*

For the rifle, I used a M4gery, with a new replacement mid-weight barrel. This carbine has a GI trigger and 1-4x Bushnell AR scope, clearly not the finest precision tool. Under slightly lighter winds, I moved back to 100 yards and used a bench rest.

The Jesse James load is a 55-grain V-max bullet. It makes for a rather unusual look with the blackened brass case and blackened bullet with the red tip. These went into a 1" group.

The bulk .223 ammo is loaded into once-fired military brass, with mixed headstamps. It is sold in 1,000 round lots in plastic "ammo cans," 500 rounds to a food-grade resealable plastic bag. It's good packaging, as I have dumped rounds in the dirt out of non-resealable bags more than once. The ammo shot into 1.5-inch groups – great for practice ammo or for a practical carbine match or training course!

Across the different lines, Ammo Incorporated has blended the finest components into accurate, reliable ammo. And more is yet to come! It's time to try some in your guns!

SnapSafe® Pistol Racks

Store guns in your safe or display them anywhere with these handy gun racks made in four different widths. The rack helps maximize storage space while offering a secure and balanced rack designed for compact pistols, full-size handguns, revolvers and semiautos. Their PVC coating prevents scratches or marring. Store guns right side up or upside down, depending on your preference.

Two-gun Rack measures 4.5" x 7" x 5.75"

Four-gun Rack measures 9" x 7" x 5.75"

Six-gun Rack measures 13.5" x 7" x 5.75"

Eight-gun Rack measures 18" x 7" x 5.75"

Extra Loading Data Labels, O22-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Swab-its – A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the *Blue Press* copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

FrogLube

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

4 Oz. Paste **O22-15443** **\$10.99**
4 Oz. Liquid **O22-15444** **17.59**

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60+), Lite is a thinner viscosity for lower temperatures (F30+).
Slide-Glide Standard **O22-15571** **\$7.95**
Slide-Glide Lite **O22-15572** **7.95**

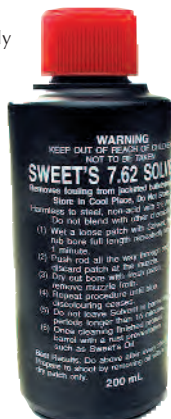

Microlon UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

O22-75125 **\$9.95**

Sweet's Australian 7.62 Solvent

easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

BLADE-TECH™ "SIGNATURE" OWB HOLSTERS 69

By Larry Drake

There was a time when the very best competition holsters were made of leather. Hand stitched, custom molded, with or without hand tooling, leather was king. It didn't take long before those stiff leather holsters were modified to give the shooter some slight advantage over the competition. Holsters were cut down, reinforced with steel liners, angled to fit the shooter's draw, any little thing might be

what helped propel you upwards in the rankings. The earliest matches were even called "Leather Slap Matches" because you had to "slap leather" to clear your pistol from the holster. Since those days there has been a lot of progress in creating holsters from materials that offer a lot of advantages over good old cowhide. Of those materials thermoplastics, often referred to as "Kydex," have definitely become the go to holster material for a lot of shooters.

The use of thermoplastics, Kydex in particular, got its start in 1965 when Rohm and Haas, a company from Philadelphia, Pennsylvania, invented KYDEX 100. Kydex 100 was listed as having a fire rating and mechanical properties that made it suitable for use in aircraft interiors. Kydex was so versatile in its original application that its use began to spread. It became such a popular material for holsters that virtually every thermoplastic/molded holster is referred to as "Kydex" though many of them are made of various other materials.

It's tough to differentiate one holster maker from another these days. It seems that everyone who wants to remain relevant is making some form of Kydex holster if not an entire line. There are few companies that truly stand out from the rest and among those companies Blade-Tech often

gets the spotlight. Blade-Tech does this by offering varying product lines to reach practically every market available, outstanding customer service, and innovative products that hold up to the abuse their customers dish out.

The Blade-Tech Signature Series is made of Blade-Tech's proprietary blend of Super Tough Polymers. More than just another "Kydex" knockoff this blend of materials is custom tailored for the firearms industry to provide just the right form, function, and price point that competition shooters demand. Externally these holsters have the same look and feel of Blade-Tech's popular Classic Series. The openings have a slight flare to accommodate easier re-holstering. Adjustable retention points allow shooters to set the perfect amount of tension for their own, individual, draw.

The Blade-Tech Signature Series features: flared entryway, adjustable retention, smooth interior for reduced drag, precision molded – made from Blade-Tech's own proprietary blend of super-tough polymers, two adjustable tension spacers allow for fine-tune fitting of your firearm, Blade-Tech's positive lock trigger guard design will administer an audible "click" when firearm is seated fully, and precision molds are designed with the help of 3D scanning technologies that

ensure that accuracy of each firearm fit.

With so many features and such high quality you can expect to pay a pretty high price, right? Usually you would be right but the Blade-Tech Signature Series holsters are available for just \$29.99 and double mag pouches are just \$26.99 at Dillon Precision. At those prices your new competition rig just got a LOT less expensive and you just freed up more money to spend on reloading components.

5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

Bushnell Trophy TRS-25

Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 as pictured w/o riser **O22-11643 \$89.95**
 TRS-25 with riser **O22-31318 \$119.95**

Scout Scope Mounts for AK, SKS Rifles

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **O22-25374 \$79.99**
 Scout Scope Mount for SKS Rifle **O22-25373 78.99**

TRIGGRCON 2017

Above: A completed Polymer 80 PF940C Compact Pistol Frame fully assembled. It offers compatibility with GLOCK® Gen3 19/23 components and features an extended beaver tail, double undercut trigger guard, and a thumb ledge for enhanced ergonomics that allow for a more effective grip and improved recoil mitigation. Perfect!

By Cameron Benz

As a gun enthusiast, you've likely heard of SHOT show. What was once a relatively small show has grown into the largest shooting-industry-related show there is. Not content to let Las Vegas get all the attention, Rainier Arms stepped up and created their own version for the Pacific Northwest – TrigrCon (trigrcon.com).

To give *Blue Press* readers some background, in 2015, Tactical Tailor (tacticaltailor.com) threw something of a small industry trade show (with beer – no live ammo) in the parking lot of their now-former Lakewood, Washington location and it was referred to as the Tactical Tailor Tac Town Throw Down. Attendees at the time included GEMTECH, Beyond Clothing, Radian Arms (during their AXTS days), and about a dozen other companies.

Tactical Tailor intended to do the same the following year. However, about the same time Rainier Arms (rainierarms.com) decided the Northwest needed its own industry show. Dubbed the Northwest Shooting Sports Expo, the show was scheduled for about the same time as Tactical Tai-

lor had intended to have theirs and Tactical Tailor instead decided to jump on with Rainier Arms. At the time, it was held at the Tacoma Convention Center in Tacoma, Washington. In its first year the show proved to be more successful than expected. Immediately planning began for the next year. This second year show was renamed to TrigrCon, and if what I saw was any indication, this show is going to continue to grow.

Day one for some of us was media and industry range day. The organizers bussed participants to a relatively local range where various companies had tables set up at the firing line. There were various handgun and rifle options on hand for participants to fire. There were even full-auto offerings from FN, Aero Precision, Battle Arms Development, and Quarter Circle 10. Sadly, I missed the chance to mess with the .338 Lapua that was somewhere on site.

Day two was a show day open to industry and media. This gave industry-related folks the chance to see the products various companies had to offer as well as for media-related folks to shoot photography without fighting crowds.

GEMTECH's Integra proved to be one of the quietest suppressed 5.56mm ARs that the author has fired.

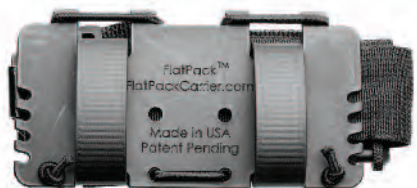

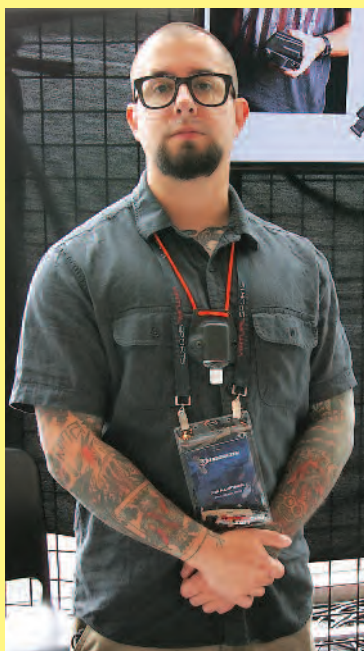

Radian's Raptor charging handles with their standard on the left, silencer compatible in the middle, and new economy version with polymer-coated "ears."

Aero Precision's new slim handguard should make people happy if they thought the old offerings were too large in diameter.

Jon Hauptman of PHLSTER Kydex Holsters and Medical Accessories was on hand to talk about his FlatPack tourniquet carrier (three views far right) as well as his various holster and sheath offerings.

RP Advanced Mobile Systems' Strike X was sight to behold. The author thinks it would benefit from the addition of some product offerings from Dillon Precision Products' sister company, Dillon Aero.

GEMTECH (gemtech.com) had their new Integra integrally suppressed AR uppers on hand for people to try out during range day as well as on display in their booth at the show. So far, at the shooter's ear, this is the quietest suppressed 5.56mm AR I've fired. Most 5.56mm suppressors still leave a bit of "bite" in the report of a 5.56mm when fired. The shorter the barrel, the worse it gets. This particular unit managed to take a lot of that remaining sting out.

Hudson's H9 (hudsonmfg.com) was a particularly fun handgun to get my hands on during range day. Offering a fairly low bore height, the Hudson was actually quite fun to shoot. It was comfortable in my hand and felt vaguely like a Browning Hi Power. I witnessed no hiccups of any kind while I was shooting it and watching others. The H9 should have started shipping by the time you read this.

In keeping with the pistol-caliber-carbine craze (PCC), Quarter Circle 10 (quatercircle10.com) was in attendance to show off their various lower receivers. They now have small- and large-frame GLOCK, Colt SMG, and HK MP5 compatible lower offerings. They were a lot of fun to shoot. Despite the lack of last-round-hold-open option on the MP5 magazine lower, there was just something neat about the look with the MP5 magazine, particularly when combined with a suppressed 9mm SBR configuration.

FN (fnherstal.com) was on hand during range day with just about anything full auto that you

could want to fire, with the notable exception of no belt-fed machine guns. It was all right, though. I found the Scar 7.62mm to be a handful on full auto. Clearly, I need more trigger time on machine guns. Be that as it may, I was also able to put a few rounds through the relatively new 509 handgun. The rounds went where I wanted them, though I do think the frame could use some stippling as the gun felt a little slippery in the hand.

Grey Ghost Precision (greyghostprecision.com) was showing their new GLOCK slide and barrel offerings that they partnered with Aero Precision (aeroprecision.com) to bring to market.

While not exactly gun related but kind of neat anyway, RP Advanced Mobile Systems (rpadvancedmobilesystems.com) had their new Strike-X side by side in the Grey Ghost Precision booth. The Strike-X starts life as a Can Am Maverick X3. RP then modifies the vehicle to make it more suitable for military use.

Polymer 80 (polymer80.com) had their 80-percent PF940C Compact Pistol Frame on display. I admit that I've always been skeptical of the whole 80-percent frame/receiver concept. What I failed to realize that these particular units already have a high cut front strap. That modification alone made me think seriously about putting one together. Overall, Polymer 80 has done a nice job on their GLOCK-component-compatible frames.

Kinetic Development Group (kineticdg.com) had their full array of items with their Optics Hub

Top: Hudson's H9 handgun seems to possess elements of both Glock and 1911.

Left: Quarter Circle 10 pistol-caliber carbines with their small frame Glock-magazine-compatible receiver on the left and MP5-magazine-compatible receiver on the right.

Above: Grey Ghost Precision's new slides are a nice alternative to having to cut up a factory Glock slide.

being the highlight. The Optics hub is a pretty slick mounting arrangement for your spotting scope. It's an aluminum housing that allows you to mount other items close to your spotting scope. By mounting your Kestrel and your laser range finder to it, you can eliminate a lot of messing around. The mounting slots are all M-LOK. They also had their very slick scope mounts and Picatinny rail sections on hand. Both the scope mount and the Picatinny sections are click on and push button release. Additionally, the scope mounts are "return to zero."

Last, but certainly not least, Your Buddy Stan (yourbuddystan.com) hosted Jon Hauptman of Phlster Kydex Holsters and Medical Accessories

(phlster.com) to help with showing off Phlster's holsters and tourniquet carriers. I've been watching Jon since the beginning and he just seems to keep gathering momentum. If you look around on YouTube, you can probably find videos of him demonstrating how to make a holster. I joked with him that he's probably single-handedly responsible for the large number of makers of Kydex-type holsters.

I wish I could cover everything I saw, but there just isn't room in these pages. The size of this show is guaranteed to be larger next year. Also – unlike SHOT – the general public can attend. So if you're in the area next year, be sure to check trig-grcon.com to register and attend!

New Designs From Kershaw Knives

Kershaw Knives and Emerson Knives have joined forces on a series of knives that combine the precision engineering of Kershaw with Emerson's uncompromising functional design.

The CQC-6K features a modified clip-point blade for versatile cutting ability. The blade has two finishes: a satin finish on the upper and a stonewashed finish on the grind. The handle's front scale of textured G-10 offers a secure grip and the handle's stainless steel back has a solid frame lock.

The CQC-6K is a manual opener using either the thumb disk or the patented Emerson "wave shaped feature." This opening feature enables the knife to be opened as it is removed from the pocket. The pocketclip is reversible for left- or right-handed carry.

Blade length: 3.25" Closed: 4.5" Open: 7.75"

O22-31320 \$54.99

Designed by Belarusian custom knifemaker Dmitry Sinkevich, the new Kershaw Pub looks like nothing you've ever seen.

Closed, you'd never know there was a handy blade inside – although you would definitely see the equally handy bottle opener. And if you were exceptionally sharp-eyed, you might notice the slotted screwdriver tip right next to the bottle opener.

To reveal the blade, just push down on what looks like the key ring attachment. You'll see the blade move out of the compact handle. Keep pushing and the blade will swing all the way out, ready for use. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip. The handle has an anodized aluminum front scale in bright blue and a steel back.

Blade length: 1.6" Closed: 3.1" Open: 4.5"
