# Dillon's RF 100 Automatic Primer Filler

***Eliminates the need for primer pick-up tubes!***

***Fills the primer tube while you reload!***

***Clear polycarbonate shield and protective housing***

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$50.95 each.

## We READ Our Mail!

I have had my RL 550 for 30 years and it still works and looks new, despite having loaded tens of thousands of rounds. I started loading a different caliber – .357 Magnum – and battled with a lot of little problems trying to get the press to run smooth. I traced the problem down to a competitor's resizing die that was sizing them too small, so the expander die took a lot of operating handle force to expand them to the right size for bullet seating. Another problem was the opening in the competitor's sizing die did not have enough chamfer to allow smooth feeding of the case into the die and jammed every couple of cases. I stopped loading out of frustration and ordered a Dillon sizing die, which fixed all the problems and the press runs smooth as glass once more. All my other calibers are set up with Dillon dies, but I strayed once and got lesser-quality dies that cost more money and wouldn't operate in a progressive press. Your dies are like your loading tools – they were made to work.

David E. Farmer – Cannonman743@hotmail.com

Just finished reading Duane Thomas' article, "The Case for the Straight Drop Holster," in the February *Blue Press*. This is a very well thought out analysis of the rationale behind the straight drop holster. Me? I just knew my shoulder didn't work with the "FBI cant" and I've used the straight drop for 30 years or more. It just proves, once again, that "one size fits all" means it doesn't fit most. Thanks for the great publication and great writers. I usually learn something with each issue.

Bob Rogers – 30 miles East of St. Louis

(Condolences for living in Illinois appreciated)

I'm the head coach of the New Jersey Junior Pistol Team and I just wanted to thank you for being instrumental in the successes that our kids have achieved in precision pistol. We've just learned that we broke another national record in junior precision pistol after coming off our massive wins at the national championships at Camp Perry in 2016 and 2017. Thank you for being a part of our program and providing the tools that these kids use to load their match ammunition.

Rich Bogath – rihardbogath@gmail.com

# 6 Which Dillon is Right for YOU?

Page 8

## SQUARE DEAL B

Our automatic-indexing progressive reloader designed to load moderate quantities of common handgun calibers from .32 S&W to .45 Colt. It comes to you from the factory set up to load one caliber.

Page 14

## RL 550C

The most versatile reloader available, capable of loading over 160 calibers. An automatic casefeeder is available for handgun calibers. Manual indexing and an optional magnum powder bar allow you to load magnum rifle calibers.

Page 20

## XL 650

Truly the state of the art, our XL 650 features automatic indexing, an optional automatic casefeeder and a separate station for an optional powder-level sensor. Available in all popular pistol and rifle calibers.

Page 30

## SUPER 1050

Our highest production rate reloader includes a swager to remove the crimp from military primer pockets, and is capable of reloading all the common handgun calibers and several popular rifle calibers.

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

## DON'T FORGET ONE OF THESE!

Universal Mounting Hardware Kit

**O37-14355 \$5.49**

### By Oleg Volk

When Michael Meier came to America from Switzerland, he brought his love of reliable, accurate rifles along. Applying his 15 years of experience in gun manufacturing and engineering to the new design, he came up with the M10X International Defense Rifle™. The heart of this rifle is a steel receiver that's embedded into an aluminum extrusion forming the forend as well. That extrusion, thin and light but very rigid, is hinged at the front to connect to the stamped steel lower. Despite the 1.5mm thickness of the lower, same as the Russian RPK light machine gun, the rifle is fairly light overall at 7 pounds. Much of the weight comes from the 0.6-inch-thick 16.5-inch barrel with muzzle threaded 5/8x24 (same as AR10) for sound suppressors or flash hiders. The rifle ships with a flash hider compensator, effective yet not concussive to the shooter. True to its name, the M+M Industries M10X is quite accurate, its nitrided barrel capable of 1 MOA groups with match ammunition. An adjustable gas regulator, a crisp 3.5-lb. trigger, and a MAGPUL Zhukov variable-length folding stock make it pleasant to shoot. Improving on both SIG 550 and AKM, it features an ambidextrous safety selector and charging handle swappable to either side. An 18"

monolithic Picatinny rail on top and M-LOK® slots all around the forend give ample room for every optic, light and laser possible.

The M+M M10X is chambered for common 7.62x39 and uses inexpensive and robust AK magazines. The mag latch is a part that M+M also sells to AK owners to improve the seating of magazines. It's designed to adjust to the magazines of inconsistent dimensions and hold them in precisely the same position for more reliable feeding. Intended from the start to be an accurate individual weapon, the M10X is built from the ground up to accept optics and to shoot accurately enough to make magnified sights worthwhile. Crisp and consistent, the trigger feels lighter than its actual 3.5 pounds of pull.

The M10X is a long-stroke design, but the piston is separate from the bolt carrier. They are held together by the charging handle extension. At the front, a FAL-style rotary gas regulator has three positions: standard (1), more gas (2, for a dirty gun) and no gas (for suppressed straight-pull operation with subsonics, for example). The piston with the recoil spring wrapped around it runs inside a removable gas tube with AK-style gas vents for a degree of additional self-regulation to account for the wide variation in powders

# Industries M10X

AR-like accuracy, AK simplicity, USA made

The M+M Industries M10X International Defense Rifle™ with a Primary Arms ([primaryarms.com](http://primaryarms.com)) 4X compact optic. The M10X features a MAGPUL Zhukov folding buttstock, pistol grip and magazine.

between various 7.62x39mm loads. In suppressed use, the vents dissipate the backpressure before it can affect the shot or foul the bolt.

Extensive ventilation of the forend and a separate gas tube insulating the return spring from the barrel beneath preserve the return spring from setting even on the hot-running rapid-fire test gun. M+M recommends spring replacement at 4,500 to 5,000 intervals only. Likewise, the nitrided barrel still shoots 2.5 MOA after 15,000 rounds of varied, often steel-jacketed 7.62x39 ammunition shot through it rapidly on the test rifle. A replacement barrel is only \$225 at the M+M Industries web store and can be screwed into the receiver at home.

The monolithic rail sits higher than the cheek-piece of the stock, so lower optic mounts are possible than with an AR15. With a low-mounted red dot, line of sight height over bore is 2/3" lower than on AR15, helpful in CQB. The extensive length of it permits mounting thermal or night vision optics in tandem. A snap-on cheek riser is available for using a taller optic with an integral base. The front of the rail swells into an integral handstop, and QD sling receptacles are formed in it on both sides. Two more such receptacles are in the back of the lower, and another two in the

Zhukov stock. The stock also has a lip for a conventional sling, and a front loop may be attached to the rail or into an M-LOK slot. Made of aluminum, the forend can heat up during rapid fire, so the typical hand positions should be insulated with M-LOK covers. Fortunately, the extensive ventilation means at least four 30-round magazines may be fired consecutively before the heat becomes an issue.

With match-grade ammunition, such as Hornady SST, CorBon DPX or Federal Fusion and a scope, this rifle is impressively accurate: 1 MOA is typical. With less-precise loads, such as PPU soft points and Winchester FMJ, 2 MOA is still achieved. Bulk ammunition, such as WOLF steel cased, still groups under 3 MOA, which is spectacular for those loads. Using return-to-zero mounts, such as made by Bobro Engineering, it's possible to run the rifle with an unmagnified red dot for speed, swap for a highly magnified scope for precision, and then go back to the red dot in seconds. An offset or angled red dot mounted as a backup to the magnified optic or a night vision scope is also possible. Recoil is light enough and goes mostly straight back, so 100-yard hits on steel can be easily observed through the optic.

\$50.95

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.45 each, or \$24.45 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM

#### Includes:

- Primer Housing /Shield
- Primer Slides, Large/Small
- Pickup Tubes, Large/Small
- Pickup Tube Tips, Large/Small
- Magazine Tubes, Large/Small
- Mag. Orifices, Large/Small
- Operating Rod
- Primer Track Bearing
- Housing Screws
- Ret. Spring Retaining Pin

**037-16627, \$89.95**

### PRIMER SYSTEM EARLY WARNING KIT

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**037-20302, \$26.95**

### AUTO POWDER SYSTEM

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**037-20251, \$95.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**037-21353, \$32.95**

### AUTO EJECT SYSTEM

Greatly increases your ammo production capabilities and adds a Cartridge Chute/Bracket and a Cartridge Bin to your reloader.

**037-22120, \$33.95**

### BL 550 POWDER DIE

Extra powder dies allow you to move your powder die measure from toolhead to toolhead without changing the "bellling" adjustment.

**Powder Die: 037-16629, \$19.95**

**Upsize Die: 037-16626, \$20.95**

**Plastic Funnel: 037-16617, \$6.49**

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (*Requires the use of an RL 450 powder die – see below.*)

**037-20029, \$23.95**

**RL 450 Powder Die:**

**037-20308, \$22.95**

# RL 550C

## STANDARD FEATURES:

- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

*All for ONLY...*  
**\$479<sup>95\*</sup>**

**037-14261**

Reloading dies sold separately.  
\*Prices vary on exotic-caliber machines.

**RL 550 DVD**  
**Instruction Manual**  
**037-19483 \$19.95**

Total Price as pictured here  
 with optional accessories: **\$792.60**

# RL 550C ACCESSORIES

**A. RL 550 CALIBER CONVERSION KITS**  
 Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

**O37-RL550 CONVERSION \$47.95** (Exotic calibers, \$57.95)

## B. AUTO POWDER MEASURE SYSTEMS

Additional powder measures stay on the toolhead. Never change powder measurements again!  
 RL 550 Powder Measure **O37-20782, \$84.95 ea.**  
 Magnum Rifle Powder Bar **O37-21353, \$32.95 each**  
 X-Small Powder Bar **O37-20780, \$32.95 each**

## C. DELUXE QUICK CHANGE ASSEMBLY

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:

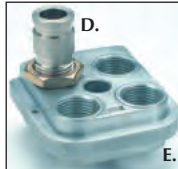

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **O37-22058, \$112.95**

Loading dies sold separately on Pages 34, 35 & 52.

## D. POWDER DIES

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**O37-20064, \$12.95 each**  
**Three or more, \$11.95 ea.**

**X-Large Powder Die, O37-21253, \$19.95 each**

## E. TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**O37-13909, \$26.45 each**  
**Three or more, \$24.45 ea.**

## F. TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**O37-22055, \$22.95 each**  
**Three or more, \$20.95 ea.**

**G. 1" BENCH WRENCH**  
**O37-10842, \$7.95 each**  
**Two or more, \$7.10 ea.**

## H. RL 550 CASEFEEDER UPGRADE

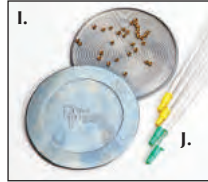

Available for most pistol cartridges – will not work with rifle cartridges.  
 Large Pistol O37-14450  
 Small Pistol O37-14451

**\$279.95 (110v US Model)**

Large Pistol O37-14453  
 Small Pistol O37-14454

**\$289.95 (220v Euro Model)**

**CASEFEEDER CALIBER CONVERSIONS (Page 17) \$25.95 each**

## I. PRIMER FLIP TRAY

**O37-13606, \$22.95 each**

## J. PRIMER PICKUP TUBES

  - 2 Magazine Orifices, Small
  - 1 550 Primer Cup Spring
  - 2 Retaining Clips
  - 2 Dispensing Tip, Large
  - 2 Dispensing Tip, Small
  - 1 Failsafe Bushing Rev. B
- O37-20048, \$19.95**

## L. MACHINE MAINTENANCE KIT

Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

**Maint. Kit & Spare Parts Kit O37-97016, \$33.95**

## M. LOW POWDER SENSOR

Provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.

**O37-16306, \$42.95**

## N. EQUIPMENT DUST COVERS

This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550 Cover, **O37-13795, \$23.95**

(O.) Master lock, **O37-13083, \$3.95**

Quick-Change Cover (for use with powder measure) **O37-11143, \$14.95**

## P. UNIVERSAL MOUNTING HARDWARE KIT

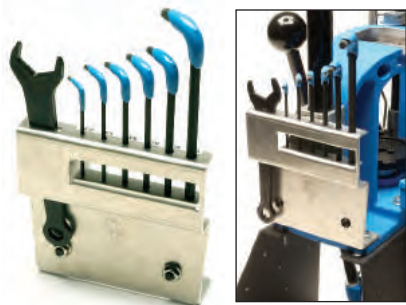

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

**O37-14355, \$5.49**

# 16 Dillon Reloading Accessories

**Dillon's Reloading Accessory Package Deals** include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook*.

SDB (Balance Beam Scale)	<b>O37-14482</b>	<b>\$192.95</b>
SDB (Electronic Scale)	<b>O37-14483</b>	<b>251.95</b>
RL 550 (Balance Beam Scale)	<b>O37-21143</b>	<b>191.95</b>
RL 550 (Electronic Scale)	<b>O37-22117</b>	<b>250.95</b>
XL 650 (Balance Beam Scale)	<b>O37-21430</b>	<b>207.95</b>
XL 650 (Electronic Scale)	<b>O37-22118</b>	<b>266.95</b>

**Dillon's Toolholders** are available for your RL 550, XL 650, SL 900, and Square Deal B, and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650 with Wrench Set	<b>O37-11555</b>	<b>\$30.95</b>
XL 650 w/o Wrench Set	<b>O37-11554</b>	<b>19.95</b>
RL 550 with Wrench Set	<b>O37-11541</b>	<b>29.95</b>
RL 550 w/o Wrench Set	<b>O37-11543</b>	<b>18.95</b>

One-Inch Bench Wrench	<b>O37-10842</b>	<b>7.95</b>
Square-Deal-Only Wrench	<b>O37-19970</b>	<b>8.95</b>

## Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	<b>O37-22051</b>	<b>\$50.95</b>
XL 650-only	<b>O37-22052</b>	<b>47.95</b>
"SDB"	<b>O37-22223</b>	<b>66.95</b>

## Dillon's "Belted Magnum" Powder System

features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>O37-97126</b>	<b>\$154.95</b>
----------------------	------------------	-----------------

## Dillon's Roller Handle

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	<b>O37-17950</b>	<b>\$47.95</b>
------------------------	------------------	----------------

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>O37-22214</b>	<b>\$44.95</b>
1050 Tray Kit	<b>O37-22215</b>	<b>44.95</b>

## Dillon's Low Powder Sensor

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

Low Powder Sensor	<b>O37-16306</b>	<b>\$42.95</b>
-------------------	------------------	----------------

Quick-Charge Cover for use with powder measure.	<b>O37-11143</b>	<b>\$14.95</b>
---	------------------	----------------

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550!

# Dillon's Case Preparation Equipment

**CV-2001 037-20493 \$189.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750 037-19455 \$145.95**

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator 037-20675 \$76.95**

**CM-500 Case/Media Separator 037-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers:

**Case Cleaners are available in 220 volt!**

**Euro CV-2001 037-22047 \$214.95**

**Euro CV-750 037-19473 \$170.95**

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners now have a **Five-Year Warranty** on the electric motor.

## Rapid Polish

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

### Rapid Polish 290

8 oz. bottle. **O37-13804 \$8.95**  
Case (20 pc.) **O37-20255 135.95**

## Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

### D.C.L. Dillon Case Lubricant

8 oz. bottle **O37-13733 \$11.95**  
Case (20 pc.) **O37-21375 168.00**

*Half and Half* 10 bottles of polish /10 of lube  
Case (20 pc.) **O37-21375 \$135.95**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.

15-pound bag **O37-13287 \$23.95**

Ground corn cob polishing media – the best there is for that final polish.

10-pound bag **O37-13496 \$15.95**

This month's cover model is Aubrie. The engraved first-generation SAA Colt chambered in .32 WCF is courtesy of Lynn Harpham, whose father – as a concerned citizen – took it away from a drunk who was celebrating his drunkenness by shooting into the air at a barn dance in Odessa, Nebraska in 1931. The barn-dance connection is particularly appropriate as this photo shoot took place at MacDonald's Ranch ([macdonaldsranch.com](http://macdonaldsranch.com)), 26540 N. Scottsdale Road, Scottsdale, AZ 85255. To see more photos of Aubrie and other **Blue Press** cover models, you can "follow" us on **Instagram@bluepress** on your smartphone, or go to [www.instagram.com/bluepress](http://www.instagram.com/bluepress) and click "follow."

# 20 XL 650

## STANDARD FEATURES:

- Automatic Indexing
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 500-800 Rds./Hr.
- Comes With One Caliber Conversion
- 5-Station Interchangeable Toolhead
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for ONLY...  
**\$589<sup>95\*</sup>**

**037-650**

Reloading dies sold separately.

\*Prices vary on exotic-caliber machines.

## Super 1050/RL 1050 Short Trim Die Toolhead

**O37-62219**  
**\$229.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. **(NOTE: the Blue 1050 toolhead stand – Part Number O37-62200, \$49.95 – is not included.)**

## The M+M Industries M10X Rifle *Continued from Page 11*

Unlike most folding stocks on AR15 rifles, the MAGPUL Zhukov allows firing the rifle when stowed. It is easy to fold with one hand and as easy to snap open, with neither action likely to happen by accident. Once folded, the stock gives access to the takedown button in the lower. Push the button forward to allow the upper to hinge open. With the stock open, the button may also be pushed with a tool through an opening in the lower. Unusually, the hammer goes forward when the upper is hinged open. To field strip, unscrew the retainer of the charging handle and withdraw it to the side from the bolt carrier. That also disengages the bolt carrier from the piston. The carrier and the rotary bolt come out of the back of the upper. During re-assembly, the charging handle may be inserted from either side, AKM style or FAL style.

For cleaning, the gas regulator rotates half-turn to disassembly position and comes out forward, and so does the gas tube, with a detent of its own. In suppressed use, most of the gas comes out of the regulator, and a little bit out of the ejection port, with almost none reaching the user. All parts are either stainless or nitrided, to resist the corrosive effects of surplus ammunition. The rifle is very tolerant of dirt, as the inside of the receiver is mostly open space. Maintenance is simple, with only 52 parts, counting every pin. An AKM has around 80 parts, an AR15 around 100. Field-stripped, the M10X comes apart into only eight

pieces, none of them easy to lose. Uniquely among semiauto rifles, the M10X has no major springs under tension during either fieldstripping or reassembly: the recoil spring is only compressed during the firing cycle. The user does have to be careful to have the bolt placed into the forward position when reinserting the bolt carrier group into the receiver so that it doesn't stick.

With the machined steel receiver protected within the upper, the entire gun can be restored from extensive damage if necessary. The long-standing goal of AR-like accuracy and AK simplicity has been achieved, along with great modularity for a bonus. Compared to the AR15, the SIG 550 and even the AKM, the M10X receiver is more open to the elements with two un-gasketed openings for the charging handle. Since the receiver space back of the fire control group is empty, quite a bit of dirt can enter without affecting functioning. For people who anticipate mud wrestling as part of the range routine, M+M plans to offer snap-on plastic gaskets to seal the receiver. At 7 pounds, the M+M M10X is lighter than the XCR-L, SCAR-L or Galil ACE. It's also less expensive than its direct competitors. A heavier 18.6" barreled variant is coming for Canadian shooters.

# Dillon's New Rapid Trim 1500 Case Trimmer

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **O37-62164** is **\$332.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **O37-13141**, are **\$20.95** each. Upper lock rings, **O37-13559**, are **\$5.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	O37-62124	\$20.95

# 26 Dillon's Concealed Carry Tote

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle

### Conceal-Carry Performance Series

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

## Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

- 1911 Holster **037-19947 \$139.95**

## 5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

## BLADETECH Ultimate Carry Belt by Nexbelt

The Blade-Tech Ultimate Carry Belt by Nexbelt is specifically designed for those who carry a firearm daily for personal defense. The PreciseFit ratchet system allows you to quickly tighten or loosen the belt in 1/4" increments up to 6" for the perfect fit – no matter how you carry. Rest assured, this will be the most comfortable and fastest adjusting belt you will ever own. The Ultimate

Carry Belt has a water-resistant backing that helps prevent moisture from penetrating the outer surface and allows for extra strength and durability. **One size – adjusts to fit all.**

Everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit.

Maint. Kit & 1050 Spare Parts Kit O37-97018, \$48.95

# 32 Range Bag

Dillon's Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 64). The Main Compartment is 12.5" long x 7" wide x 10" high, the End

Pockets are 8.5" tall x 6.5" wide x 2" deep and the Front Pocket is 9" tall x 6" wide x 2" deep.

Range Bag, Black	<b>037-19366</b>	<b>\$89.95</b>
Pistol Pouch, Black	<b>037-17027</b>	<b>10.95</b>

## 'Border Shift' Ammo Bag

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

**I.D. Card Holder**  
**037-14575 \$2.95**

**Black Ammo Bag** **037-13755** **\$25.95**

## Dillon's Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*

**037-18146 \$65.00**

# Mr. Bulletfeeder<sup>®</sup> by Double-Alpha

**M**r. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

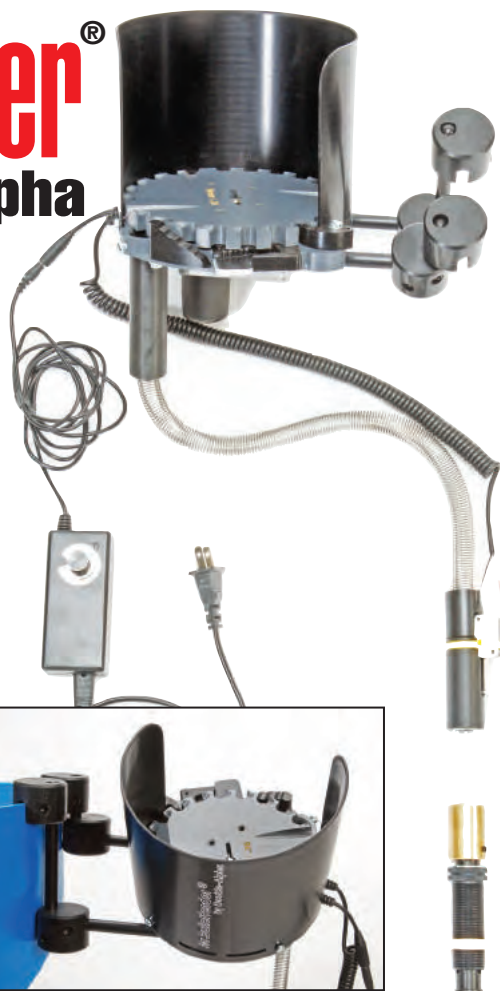

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

## Mr. Bulletfeeder<sup>®</sup> Replacement Parts & Spares

**H**aving separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

**T**he Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collator to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

**L**ose a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

# Dillon's Pistol Die Sets

## Size Die

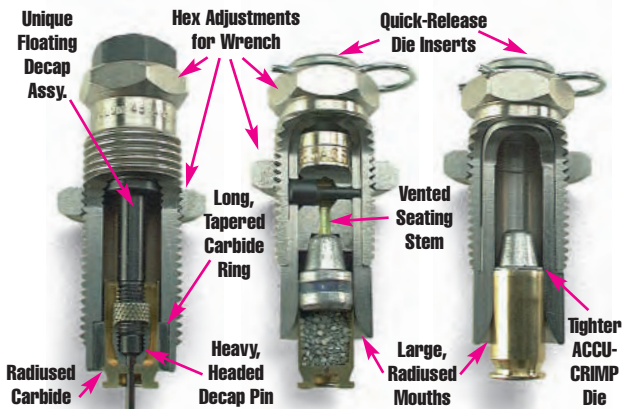

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

## Ruger Security-9™ 9mm Pistol

### Reviewed by Peter Caroline

I was reading Duane Thomas's review of the Wilson Combat EDC X9 9mm pistol (MSRP \$2,895) in the February 2018 *Blue Press*, and I was thinking, it would be very nice to have one of those. It would also be very nice to have a Bentley convertible. For those of us on a leaner budget, there are more realistic solutions, especially in the everyday carry department.

Ten years ago, Ruger introduced the LCP .380 ACP pistol. It was a good gun at the right price, and Ruger sold out their first year's projected production on the first day of the SHOT Show. I have one of those first-run pistols in my pocket as I'm writing this.

This year, Ruger may very well hit the jackpot again...this time with their new Security-9, a compact EDC pistol chambered for 9mm Luger. The MSRP is \$379, but I've already seen retail prices hovering around the \$300 mark.

The Security-9 is about the size of the ubiquitous GLOCK 19, but far better looking. It has a blued steel slide and a glass-filled nylon grip frame. The gun comes with two 15-round magazines and is hammer-fired, much like Ruger's LCP and LCP II. When the pistol is cocked, you can actually see the tip of the hammer through the slide's rear aperture. There are loaded-chamber view ports on both the top and side of the rear of the barrel. While the Security-9 has a bladed trig-

# 'O THE PEOPLE!

ger safety, it also has a fairly inconspicuous manual safety for those who tend to ignore Rule 3. Trigger pull is about 5-1/2 lbs., and smooth, with no need for aftermarket sears or other gadgetry.

The grip is quite comfortable with a non-aggressive textured finish, and the trigger guard is contoured at the rear to allow a higher hold. The front of the trigger guard is serrated, as some find this feature useful. The slide has both front and rear cocking serrations, and retracting the slide is not a challenge. Like many of today's handguns, the Security-9 does incorporate an unobtrusive rail to accommodate mounting a

light, laser sight or whatever you want to hang on the front. Sights are simple and highly visible. Both sights are dovetail-mounted and easily replaceable, if you find that necessary. The front sight is square, with a bright white dot. The rear sight is drift adjustable, with a white outline and a fairly wide opening...not optimal for target shooting, but quite appropriate for defensive

situations where you need to put out a number of shots in a hurry. In fact, I did notice that my groups actually tightened in rapid fire. I was shooting a mixed bag of ammunition...Aguila 124-gr. FMJ, Doubletap 80-gr. Barnes TAC-XP Lead-Free, HPR 115-gr. TMJ, Blazer Brass 115-gr. FMJ and some miscellaneous NATO-surplus FMJ. All fed, fired and ejected without a hang-up. The gun is a pleasure to shoot.

I'll readily admit, I am the product of a bygone age when handguns were an art form, made of blued steel with walnut grips. My first "plastic

gun" was an H&K VP70, and it was an aesthetic abomination. My first GLOCK was somewhat better. The Ruger Security-9, on the other hand, is actually quite presentable.

Now, here's more good news. On those occasions when you need to clean your gun, the Security-9 makes this task almost enjoyable. Disassembly is instinctive, and requires no specialized tools or manual dexterity. You pop out the magazine, make sure that the chamber is empty, and release the slide. Then you retract the slide about 1/16 of an inch and, using a small screwdriver or the head of a 9mm cartridge, remove the takedown pin.

Now you can remove the slide assembly from the grip frame, take out the recoil spring assembly and remove the barrel. Clean, lubricate and reassemble in reverse order.

There is much in our Founders' writings to suggest that every citizen be armed for individual and common defense and to preserve individual freedoms. More recently, Robert A. Heinlein wrote, "An armed society

is a polite society. Manners are good when one may have to back up his acts with his life." Retailing at about \$300, the new Ruger Security-9 makes fulfilling that goal far more affordable.

The Ruger Security-9 comes with two 15-round magazines with witness holes on both sides, an unloaded chamber indicator and the obligatory cable lock, plus a very comprehensive and well-illustrated instruction manual.

# THE LEFT WINGER'S GUN MYTHS: <sup>39</sup>

## Terrified of guns and beyond ignorant, they just make stuff up

By Alan Korwin

The left wing's arguments against wholesome gun ownership, in large part, aren't just lies, they're myths – complete fabrications invented out of fear, ignorance and internal terrors they cannot bear. So they create concoctions that to them seem reasonable. This is why they call them “common sense,” because to their twisted way of thinking, they are, and this is why they can't understand how the rest of us don't just go along. It's also why we have a hard time combatting them – we expect them to respond to rationale.

By now it's common knowledge that a good bit of this is medical, hoplophobia, and the solution is treatment and desensitization, not new legislation. There is political ideology at play of course, Marxism, desire for control, pure power politics, corrupt politicians who do not value The American Way. But a good part of it is what psychologists call projection. People burdened with rabid fears they cannot tolerate project these onto folks around them, in a world of fantasy, to alleviate their internal terror.

If you look at each of their proposals rationally, they fall apart. And as their myths are exposed, one by one, leftists abandon them and invent new ones, driven by screaming demons in their psyche, until the new projections are exposed as borderline psychoses and not pragmatic solutions. Then they're on to the next one, in a never-ending effort to quell the awful emotional distress that drives them. Fear of guns is a terrible thing.

In this series we're going to examine democrat-sponsored myths. Why democrats? Because if you hate guns, project your fear of them, can't handle the power of adulthood that firearm possession implies, that's where you go, and they welcome you. “You're like us, come into our big tent!” The rest of us go elsewhere, can barely stand the smell of fear covering in that place.

The set of delusions democrats have thrown in the way of actually making progress on firearm education, real gun safety, crime control (not so-called “gun control”) and advances in Second Amendment policy our exemplary nation could truly use is stunning. They are in the way.

### A PLAY ON WORDS

Before we begin let's look briefly at a revealing quirk of language, what poker players call a tell – the “but” statement – as in, “I support the Second Amendment, but...” You've noticed this, perhaps subconsciously, and know even by a person's inflection, you're about to hear someone deceive you. Here's how to dissect these with marksmanship accuracy.

Reverse the first half of the statement, change but to and, then read again. Got it? So when pundits, politicians or anyone says, “I support the Sec-

ond Amendment but we should have common-sense gun registration,” they're really saying, “I don't support the Second Amendment and we should have common-sense gun registration.” Works every time. Let's begin.

### THE GUN-REGISTRATION MYTH and THE 90%-SUPPORT MYTH

The left wing wants you to believe 90% of the public supports registering guns and 100-million American gun owners, to make us safe and stop crime. This doesn't even pass the sniff test. Nancy Pelosi sent mailers saying it's 92%.

C'mon, 92% of Americans don't support anything, especially anti-gun-rights issues! If a survey revealed that paperwork errors would put innocent people behind bars for five years, what sort of approval rating could it possibly get? It's a myth.

A gun listed incorrectly, even by one digit (ask FFLs who suffer this problem), is an unlisted gun – contraband! A listed gun you can't produce – represents a black-market sale! These are felonies on every bill proposed. Is that mentioned during the poll?

And the underlying problem is never polled – registration is the required first step for confiscation, already proven in California, New York and mass genocides throughout history. But we're only dealing here with myths.

How does writing my name, or your name, on a federal list help stop crime? It doesn't. It's a... myth – though subtly seductive if you don't look hard. It's incredibly expensive, this 100-million-name list, matched to 300 million guns. It misallocates scarce law-enforcement resources, and here's the kicker – it's illegal to list criminals. It violates the Fifth Amendment right against self-incrimination, since criminals can't have guns in the first place. Everyone tends to forget that. Besides, if you could find armed criminals to write them down, you could just arrest them right there – it's a crime for them to possess! Gun registration isn't common sense crime fighting, it's pure mythology. Ask Canada, which abandoned its liberal-demanded but zero-results program (after a billion-dollar loss). The police there hated it, and rightly so.

Americans relocate (on average) once every ten years. Do the math – that's 27,000 changes every day just to track people who change address every decade. You know how many clerks it takes to follow all these innocent people who haven't done anything wrong? Does accuracy matter? A wrong (false!) address is a crime (perjury!). A gun registry “supported” by 92% of the public isn't a myth, it's a farce.

*Alan Korwin's website GunLaws.com features plain-English books describing your gun laws, and more common sense like you just read. The author of 14 books, he invites you to write to him there, and stay safe.*

# CCW Tactical Shotshell Strippers<sup>41</sup>

**California Competition Works' Tandem Tactical Strippers** can be used to hold either shotshells or AR-15/M4/Mini 14 magazines, or a combination of both by installing or removing the aluminum spacers provided with each stripper. The Tandem Tactical Stripper holds a maximum of eight rounds of 12 Gauge (10 rounds of 20 Gauge) shotshells or two AR-15/M4/Mini 14 magazines. Each Tandem Tactical Stripper features a BLADETECH Tek-Lok™ Universal Belt Clip, four removable aluminum spacers, and the screws and Allen wrench required to install them.

Tandem Tactical Stripper **O37-00303 \$55.00**

**California Competition Works' Tactical Strippers** are available in three, four or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3" magnum\* shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with either a belt clip (A. & B.) or a UM84 attachment device (C. & D.) that will accommodate up to a 2-1/4" duty belt.

- A. Six-Shell Tactical Stripper **O37-18606 \$23.95**
- B. Four-Shell Tactical Stripper **O37-18605 22.95**
- C. Three-Shell Aluminum Stripper\* **O37-19475 34.95**
- D. Six-Shell Covered Tactical Stripper **O37-19225 33.95**

\*Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.

The new  
Super Vel.  
Hotter.  
Faster.  
Better.

The original Super Vel Cartridge Company forever changed "police ammunition" with a new style of bullet, the jacketed hollow point. Now, 40 years later, Super Vel is back!

Advertised velocity figures from Super Vel's website are as follows: 9mm 90 Gr. **1,473** fps (GLOCK 43) to **1,632** fps (GLOCK 17L); .38 Special 90 Gr. **1,318** fps (S&W Model 642) to **1,652** fps (S&W Model 27); and .45 ACP 185 Gr. **1,085** fps (S&W M&P) to **1,127** fps (Springfield 1911).

# CLASSIC FIREARMS: The Win

## By John Marshall

It's been called "the gun that won the West." There was even a major motion picture named after it. The Model 1873 made the name Winchester nearly synonymous with "lever action rifle" for over a century. Interestingly, this rifle must owe some of the credit for its development to a couple of men named Smith and Wesson, of whom you may have heard.

The earliest progenitor of the Model 1873 can be traced back to the year 1848, when one Walter Hunt, living in New York, patented what he called his "Volition Repeating Rifle." It had an under-barrel tubular magazine and a couple of levers, which operated the firearm. The lockup of the breech bolt was called "knee action," or "toggle action" in which two connected links can be extended or collapsed – the same concept also used in the Luger pistol. This principle also allows us human beings to stand or sit, depending on whether our legs are extended or bent.

The Hunt rifle fired "Rocket Balls," a type of caseless ammo in which the powder charge was contained in the hollow bullet. It was not really fully developed, but in 1849 Lewis Jennings bought the Hunt patents and produced a short-lived rifle that was made by Robbins & Lawrence, located in Windsor, Vermont.

Enter Horace Smith and Daniel Wesson (later to form their own famous firm). They purchased the Jennings patent from Robbins and Lawrence, also hiring a very smart man who was working at Robbins and Lawrence as their shop foreman. This was Benjamin Tyler Henry. This team formed the Volcanic Repeating Arms Company in 1855. The corporation's major stockholder and director was none other than Oliver Fisher Winchester, who was previously involved in clothing manufacture.

Smith devised a primer for the caseless cartridge, and then came up with a copper case to contain the primer compound in its rim and to hold the powder and bullet. This was the world's first metallic rimfire cartridge. The Volcanic rifle was unfortunately a flop. Smith and Wesson both left the company, which had moved to New Haven, Connecticut and become bankrupt. Oliver Winchester purchased the firm's assets from the other stockholders and formed the New Haven Arms Company in 1857. Benjamin Henry perfected Smith's cartridge and came up with what became the somewhat larger .44 Henry round. He also redesigned the rifle, retaining the knee/toggle action and the tubular magazine. The new lever-action Henry rifle was launched in 1860. It utilized a bronze frame and a 16-round tubular magazine. This rifle was used in substantial numbers by a number of Union Army units and a few Confederate troops in the American Civil War. It found fame as "that damned Yankee rifle you can load on Sunday and shoot all week." About 14,000 were manufactured. France and the Ottoman Empire also purchased many following the Civil War.

After the Civil War, Oliver Winchester renamed his company as the Winchester Repeating Arms Company, and produced an improved version of the Henry Rifle, the Winchester Model 1866. It used the same .44 Henry cartridge and had a loading gate on the side of the receiver. A weak point of the previous Henry rifle was its loading system, which required loading from the muzzle end of the magazine. It had a long slot in the magazine to control the spring-loaded follower when loading, and this could admit dirt and debris. The new system both dirt-sealed the magazine and allowed the attachment of a wooden forestock. Retaining a bronze frame, it was often called "the Yellow Boy." About 160,000 were made, and it was produced to

# Winchester Model 1873 Rifle

“The only movie ever named for a rifle, *Winchester '73*, debuted in 1950. This Western starred Jimmy Stewart and a One of One Thousand rifle.”

1898. It's noteworthy that for many years thereafter, Winchester marked the base of its .22 rimfire cases with an "H" to honor the contributions of Benjamin Henry.

Further improvements resulted in the famous Model 1873 Winchester. It had a much stronger steel frame and chambered the more powerful .44-40 (.44 WCF) centerfire cartridge, which could also be used in handguns. It featured removable side-plates, one on each side of the frame. These allowed access to the action for cleaning and/or parts replacement. The receiver was topped with a sliding dust cover for additional protection from the elements. The Model 1873 was enormously popular. It was to become a lasting icon that was used widely in the Western expansion and put

Winchester on the map as a firearms manufacturing powerhouse. It also began to be produced in .38-40 (1879) and .32-20 (1888). These cartridges became popular handgun rounds as well. Users could carry both a rifle and a revolver that used the same ammunition. From 1884 to 1904, approximately 20,000 '73s were sold chambered for .22 Long and Short. A very few were special-ordered in .22 extra long rimfire.

There were three basic variations. The standard rifle had a 24-inch barrel. Carbines were made with a 20-inch barrel as standard. There was also a "musket" (about five percent of total production) with a full-length military stock covering most of its 30-inch barrel. Most of these were shipped to

# SAVE YOUR BRASS!

**P**ick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

O37-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

O37-19972 \$39.95

## Pan Sifter & Ammo Can from Berry's Manufacturing

An injection molded pan sifter that fits on top of a bucket to separate your brass from cleaning media.

Berry's Mfg. Pan Sifter O37-17519 \$9.99

Modeled after the military .30 Caliber ammo can, this tough unit has a gasket in the lid to protect contents from moisture. It's approximately 11" long x 7" high x 4" wide at its largest dimensions and holds 550 .223 rounds or 1000 9mm.

Made in the USA and comes with a lifetime warranty.

Berry's Mfg. Clear Ammo Can O37-17518 \$9.99

## Dial Caliper

- .100 per revolution.
- Covered track for longer caliper life – keeps chips out!
- Made of hardened stainless steel.
- Satin chrome finish. No glare.
- Easily read to .001-inch on large, adjustable dial.
- Measuring faces hardened, ground and lapped.

O37-13462 \$28.00

## The Winchester Model 1873 *Continued from Page 45*

South America. The rifle illustrated here was one of the most popular types, a 24-inch barreled rifle that can hold 15 rounds in its magazine. It's chambered in .38-40 (.38 WCF), has an octagonal barrel and was made early in the 20th Century. Around that time, it would have sold for less than 20 dollars. Winchester could take special orders for just about any combination of features. These included longer or shorter barrels, octagon barrels, pistol-grip stocks, checkering of many styles, color-case-hardened receivers, premium wood, different butt configurations and varying types of engraving. The longest factory barrel on a '73 was 37 inches. The stubby "Trapper" models most commonly used 15-inch barrels, but could be had with barrels as short as 12 inches.

Three variations of dust covers appear on Model 1873s. The first (serial numbers 1 to about 31000) has grooved (or mortised) guides on each side to retain the cover. The second model (serial numbers from about 31000 to 90000) has a central guide for the cover, fastened to the receiver with two screws. The third type (serial numbers higher than 90000) has a central guide rail integrally machined on the receiver. By the way, serial numbers over 525923 are considered "modern" and subject to BATF regulations including background checks when sold by federally licensed gun dealers.

Specially selected accurate rifles engraved *One of One Thousand* on the stock tang were produced starting in 1875. These had set triggers and special finishes. They sold for the then-substantial sum of \$100. The only movie ever named for a rifle, "Winchester '73," debuted in 1950. This western starred Jimmy Stewart and a *One of One Thousand* rifle. The promoters at Universal Studios launched a search and prizes for the discovery of any remaining rifles carrying the *One of One Thousand* designation. A second

premium grade of Model 1873 rifles used above-average-accuracy barrels. These were marked *One of One Hundred*. They sold for \$20 more than list price at the time. About 136 of the former and only eight of the latter were produced. As a side note, Oliver Winchester died in December 1880 at the age of 70.

The '73 became enormously popular throughout the American West. Notable users included Buffalo Bill Cody, the Texas Rangers, Frank James (brother of Jesse), and Chappo, son of Apache chief Geronimo. Evidence gathered at the site of the Battle of the Little Bighorn suggests that as many as eight of the Sioux or Cheyenne combatants used Model 1873s. A mystery developed in 2014 when a rust-encrusted Model 1873 was found leaning against a tree in Great Basin National Park, Nevada. No one knows who left it, when, or why its owner never returned for it.

In total, over 720,000 Models of 1873 were made, and it was inventoried at Winchester until 1923. These had exceptionally smooth actions. Present-day Cowboy Action shooters use modern replicas extensively for that reason. Olin Corporation, parent company of Winchester, has authorized official reproductions that are made by Miroku Corporation in Japan. These have 20-inch round barrels, and are chambered for .357 Magnum/.38 Special. They have incorporated several minor changes to satisfy lawyers and Cowboy Action users.

Factory authentication letters on original '73s can be obtained from the Cody Firearms Museum, 720 Sheridan Ave., Cody WY, 307-587-4771. Today, collectors salivate over any decent original Model 1873, and prices for even well-used standard examples have jumped into multiple thousands of dollars. One of the acknowledged all-time classic firearms, this rifle carved out a legend that survives to this day.

"The Model 1873 was enormously popular. It was to become a lasting icon that was used widely in the Western expansion and put Winchester on the map as a firearms manufacturing powerhouse."

# 48 Kel-Tec's RDB-S Bullpup

By Oleg Volk

Introduced in early 2017, the Kel-Tec RDB rifle is a conventional-looking 5.56mm bullpup, complete with the obligatory pistol grip. The RDB-C – Kel-Tec's hunting-oriented bullpup that's just shipping now – looks less conventional. Slick and streamlined, without a pistol grip, it looks like a prop from a 1970s sci-fi movie but handles remarkably well. It's also legal in several states where the regular RDB isn't. The upcoming RDB-S takes the unconventional aspect of the C model and runs with it. Expected in retail stores by Spring 2018, RDB-S – a lightweight variant of the RDB-C rifle with a variable-length stock.

All RDB variants operate with a long-stroke gas piston. The RDB bolt over-travels considerably past the magazine to reach the ejector, lengthening the cycle and minimizing felt recoil. The adjustable gas regulator allows even greater reduction of recoil through proper tuning. Fired casings fall out behind the magazine, making it safe for right- and left-handed shooters alike. By the time the bolt face reaches the back of the magazine, it's already moving fast for extra feeding reliability. The main disadvantage of the design is that checking of the chamber status is slower than on a conventional

rifle. The huge advantage is that empty casings don't end up in the faces of people next to the shooter, or bounce off a barricade or wall into the shooter's face or arms. The non-reciprocating charging handle may be swapped from side to

side. In the rearmost position, it can be locked up into an optic rail recess similar to the MP5. Speaking of which, an RDB-S with 16.1" barrel is the same size and weight as an MP5 PDW with a 6" barrel!

At first glance, the most prominent feature of RDB-S is the thin, stubby barrel that is actually no less than 16.1" long. Most of it is covered by the forend, so only a short portion protrudes. A very tall stamped-steel folding front sight and its base make the barrel look even shorter. Both the front and the peep-on-post rear sights co-witness with red dots or fold flat to make room for a scope. While the barrel is threaded for an extension under the front sight base, the

thread protector is nearly flush with the base and the entire construction looks unconventional. The barrel weighs a fraction over one pound. The entire rifle weighs only five pounds, less than the M1 Carbine or most submachine guns.

The overall length is around 24.5" with the stock collapsed for transport. Pulling on the stock

**KEL-TEC CNC INDUSTRIES INC.**  
**1505 Cox Road • Cocoa, FL 32926**  
**321-631-0068 • [keltecweapons.com](http://keltecweapons.com)**

clicks it open; pressing a latch on the underside of the buttpad releases it. Extended, it brings the overall length past the legally mandated 26 inches. Length of pull difference is about 2.5 inches, making for comfortable bladed position in open state and equally

comfortable isosceles in closed. The unconventional hold without a pistol grip places the hand right around the bore line, making point shooting more intuitive and preventing top-mounted optics from rolling the gun. For shooters with very small hands, I would recommend stick-on pads to thicken the grip, bringing the hand closer to the trigger. Fieldstripping takes very little time: three captured pins hold everything together. All three RDB models can

interchange furniture easily. For example, I added an S-model folding front sight to the 24" barrel of the C model, creating a classic marksman design with 20" of sight radius.

The bolt and the carrier are fairly lightweight compared to most long-stroke designs. The long duration of each feeding cycle reduces felt recoil despite the bantam weight of the rifle. Unlike an AR15, the RDB-C firing pin is sprung against accidental primer ignition. George Kellgren and Tobias

Obermeit managed to create an excellent 3-pound trigger that also delivers a very positive firing-pin impact on the primer.

Shooting this ultra-light rifle for groups, I got 1.5 MOA with 55-gr. Winchester Silvertips but 3-4

MOA with budget ball ammunition. Better results could be expected with heavier bullets, typical of 1:7 twist. Production barrels are expected to be better, but the heavier barrel of the C model is more suitable for bench-rested accuracy and sustained fire. In recognition of the stow-away role, RDB-S ships with a flush-fitting 10-round Magpul magazine. Practical hand-held accuracy is excellent due to neutral balance and support hand being near the muzzle.

**An RDB-S with 16.1" barrel is the same size and weight as an MP5 PDW with a 6" barrel.**

Five-pound weight with centered balance makes one-handed control or emergency firing of this weapon possible as either a rifle or a pistol. RDB-S is excellent for teens or smaller-statured shooters, easy to handle without punishing recoil. An RDB-S with a red dot and a full magazine weighs the same as an unloaded M4 carbine without an optic. A reliable, comfortable carbine that fits into a backpack, the RDB-S may be an ugly duckling to some, but it performs!

# 50 "Big Fifty Reloader"

## STANDARD FEATURES:

- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2" -12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for **ONLY...**  
**\$1119<sup>95</sup>**  
**037-50000**

**Now Available!**  
**.408 CheyTac Conversion**  
**037-50204 \$149.95**  
*(Dies NOT Included)*

Total price as pictured here with optional accessories: \$2789.75

.50 BMG Carbide Size Die	037-50075	\$969.95
.50 BMG Case Trimmer	037-50050	\$399.95
BFR Mounting Post (50.5" High)	037-50150	\$289.95
BFR Mounting Hardware Kit	037-50140	\$9.95

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**037-50050, \$399.95**

### B. 50 BMG CARBIDE SIZE DIE

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications.

**037-50075, \$969.95**

### C. 50 BMG POWDER MEASURE ADAPTER

For use with the RCBS .50 BMG powder measure.

**037-50125, \$77.95**

### D. 50 BMG PRIMER SEATING DIE

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**037-50200, \$149.95**

### E. 50 BMG PRIMER POCKET SWAGER

Makes it easy to remove the military crimp.

**037-50001, \$334.95**

### E.(1) PRIMING CONVERSION

Converts Swager to Priming System.

**037-50003, \$79.95**

### F. 50 BMG PRIMING SYSTEM

Allows off-the-machine primer seating.

**037-50002, \$334.95**

### F.(1) SWAGER CONVERSION

Converts Priming System to Swager.

**037-50004, \$79.95**

### EXTRA "BFR" TOOLHEADS

**037-19831, \$189.95**

### RCBS .50 BMG LOADING ACCESSORIES

.50 BMG Powder Measure **037-21896, \$114.95**

.50 BMG Seat/Crimp Die **037-21895, \$139.95**

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Day Planner **O37-10252 \$24.95**

## Dillon's Bench Wrench Fits 1" Die Lock Rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to

re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	O37-14067	\$1.60
5-Pack of Die Lock Rings	O37-10669	4.95
1" Dillon Bench Wrench	O37-10842	7.95
(Buy two or more 1" Bench Wrenches for \$7.10 each)		
Wrench/Lock Ring 5-Pack	O37-10668	9.95

# Grace USA Gun Care Tool Set

This custom designed 12" x 9" x 1-1/2" case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

Grace USA Gun Care Tool Set **O37-10680** **\$99.95**

## More Great Tools From Grace USA!

The **9-Piece Ball-End Allen Head Screwdriver Set** includes the following sizes: 1/16", 5/64", 3/32", 7/64", 1/8", 9/64", 5/32", 3/16", and 3.5 mm. Each is constructed of US 8650 Chromium-Vanadium steel alloy and is proudly Made in USA!

Stoeger IGA shotgun	O37-20514	\$14.95

## Comtech's STINGER

**T**HE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes unnoticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger today!

O37-19495 \$9.95

## Arredondo Accessories' Multi-Gun Chamber Flags

**M**ade of tough nylon with a melting point of 480 degrees. Kit includes one shotgun chamber flag and one for your AR-15.

O37-15485 \$11.95

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

ZFH1500 AR15 Flashlight Mount	<b>O37-12020</b>	<b>\$29.95</b>
ZSM Tactical Shotgun Mount	<b>O37-18050</b>	<b>39.95</b>

# THE BROWNELLS GLOCK 19 SLIDE

By Duane Thomas

Brownells ([brownells.com](http://brownells.com)) recently began offering for sale aftermarket slides for the GLOCKS 17 and 19. Since I happened to already own a Gen-3 GLOCK 19 with a broken slide rail, I figured this was my chance to resurrect that gun from the dead.

Brownells GLOCK slides are machined from billets of 17-4 stainless steel, then blackened using a salt bath nitride process. We may have a slide either set up for iron sights or for a Trijicon RMR mini-red dot. For slide-cocking grooves, we have two options. (1) Fore and aft grooves with the front grooves traveling up and around and across the slide top. People using the “come over the top of the slide in front and pinch” press check appreciate top grooves; since this technique places the web of the hand into the slide top, grasping grooves there can give a bit of extra purchase. (2) Slide-cocking grooves front and rear, but instead of the grooves coming over the slide top, there’s a G17L/24/34/35-style “window” cutout. There’s also the option of a totally blank slide, no slide-cocking grooves at all, for those folks wanting to apply their own custom slide grooves and whatnot. Put it all together, we have 10 different available slide configurations.

*G17, iron sights, front-rear-top serrations*

*G17, iron sights, front-rear serrations with window*

*G17, RMR cut, front-rear-top serrations*

*G17, RMR cut, front-rear serrations with window*

*G17, blank, no serrations, no window*

*G19, iron sights, front-rear-top serrations*

*G19, iron sights, front-rear serrations with window*

*G19, RMR cut, front-rear-top serrations*

*G19, RMR cut, front-rear serrations with window*

*G19, blank, no serrations, no window*

These slides are made only for Gen-3 (and by extension, Gen-1 and Gen-2) GLOCKS. Gen-4 and Gen-5 need not apply. Prices go from \$174.99 for blank slides, to \$199.99-\$209.99 for all other options, depending on features chosen.

I went for the iron sights version with no window. This slide is pretty Spartan looking, frankly. I have seen two reactions to this slide’s appearance. (1) “Wow, I didn’t know it was possible to make a GLOCK look even uglier than the GLOCK factory does.” (2) “I really like the way that slide looks.” I fall into the latter camp. I especially like the fact the edges of the slide are not rounded off, as on a stock GLOCK, but are instead trapezoidal. That “boxy” look really works well for a GLOCK, at least given my own aesthetic sense. This slide is slightly wider than on a stock GLOCK; it was necessary for me to loosen the adjustment screw on a Kydex holster previously set up for my GLOCK 19 in order to accept the Brownells slide/GLOCK 19 frame hybrid.

The slide-cocking grooves are a bit sharper-edged than the factory GLOCK treatment, but not uncomfortably so, even for a shooter like me using a straight-thumbs grip, and the fact that means the interior of my right thumb actually touches and rubs against the slide grooves while the gun is cycling.

I have to say, if a person thinks they’re just going buy one of these slides, throw a frame and a handful of miscellaneous factory GLOCK parts at it, and wind up with a gun that works the way it should, they are deluding themselves. Tolerances on factory GLOCK parts are notoriously variable.

For instance, the GLOCK extractor has a lug that fits into a corresponding hole in the slide. Of the three factory GLOCK LCI extractors I had on hand, two of them wouldn't fit in the slide; the third slipped easily into place and worked perfectly.

According to the fine folks at Brownells, some customers have complained about it being difficult to install the firing pin channel liner, that it was just a really tight fit. I had kind of the opposite experience. Of the two channel liners I had on hand, one of them was such a loose fit that, when I removed the firing pin, the channel liner would come out with it; the second was an easily installed but nice friction fit.

After putting the gun together using parts already on hand, I experienced that very distinctive GLOCK problem, when the gun is in battery, it looks like the slide is fully forward, but when you pull the trigger you get a very mushy trigger pull, and when the trigger breaks you can feel the slide snap the rest of

the way forward. This was easily traced to the lug on the firing pin binding in its channel. Fortunately, polishing and necessarily slightly thinning that lug is part of doing a trigger job on a GLOCK. Polishing all the relevant contact surfaces in the trigger mechanism, using a factory GLOCK "minus" connector, Gen-4 trigger bar (which was all I happened to have on hand), and a Wolff

slightly reduced firing pin spring gave me trigger pulls of four pounds even, and the gun started going fully into battery every time when hand cycling the action.

None of this – in my opinion – can be blamed on the Brownells slide, it's just the nature of factory GLOCK parts. That's part of the genius of the basic GLOCK design, it's a very "sloppy" gun. And I don't say that in a negative sense. It's a design on which it's not necessary, in many areas, to have parts built to exactly consistent tolerances in order to have a gun that works, and GLOCK has taken full advantage of that fact. Tolerances on factory GLOCK parts are all OVER the place.

Let me make this very clear: putting together a functional GLOCK with a Brownells slide is not a job for anyone who doesn't understand how the

GLOCK works. You need to know how to detail strip and reassemble the gun, you need to know how to troubleshoot and rectify any minor issues that might arise. If you know how to do all that, fine, you're golden. If not, hand the project over to someone who does.

The only non-factory parts on this gun, other than the slide, were the sights (Warren Tactical Series-Sevigny Competition), magazine release button (Tango Down/Vickers Tactical slightly extended), and a Pearce Grip frame plug.

I reposed to the range to accuracy and function check the Brownells slide GLOCK 19 with 10 different loads. These included from Black Hills both their 115-gr. JHP +P and 124-gr. JHP, from Hornady their 124-gr. and 147-gr. XTP, from Super Vel their 90-gr. and 115-gr. JHP +P, from Wilson Combat their 115-gr. TAC-XP +P, 124-gr. XTP +P and 147-gr. XTP Subsonic; finally there was my practice/match load consisting of the Rainier 151-gr.

RN over VihtaVuori N310 (the powder also acquired through Brownells, coincidentally). Accuracy was tested with 5-shot groups from the bench at 50 feet, the longest distance possible at the Shelton Rifle & Pistol Club, the indoor range where I do most of my shooting. Best accuracy came from the Wilson 115-gr. TAC-XP +P at 1.6".

After the bench work, it was into some

fairly high-speed shooting drills. Even taking into account it was 33 degrees Fahrenheit outside when I did this test, and not much more than that inside the range, and the very cold hands that caused, I was able to turn some decent speed with accuracy when pulling the trigger as fast as I could. The gun never skipped a beat the entire test. It fed, fired, extracted, ejected, fed the next round every time I pulled the trigger, and locked its slide to the rear when empty, with every sort of ammo used. You know, all the things autopistols should always do, and so many of them don't.

I have to say I was quite impressed with the Brownells GLOCK 19 slide. To be brutally frank, this hybrid Brownells slide/GLOCK 19 frame combo worked better than several factory GLOCK 19s that have passed through my hands over the years. **P**

**Best accuracy from the Brownells slide/Glock 19 frame hybrid was 1.6" at 50 feet with the Wilson 115-gr. TAC-XP +P.**

Extra Loading Data Labels, O37-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

## Dillon AkroBins

AkroBins are ideal for Reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

"SL 900" Bin	O37-17125	10.50	56.94	106.92

## Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# Swab-its – A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my 686 SSR when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

# 66 KEEP YOUR GUNS! (Clean)

## Lyman Pick & Brush Set

Lyman's Pick & Brush Set is an indispensable item for your cleaning supplies and range bag.

O37-40160 \$3.99

## MIL-COMM

Extreme Performance Lubricants

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe O37-15732 \$10.99  
1.5 Ounces O37-15731 14.50

Revolver BLAST is an all-synthetic lubricant/protectant specifically designed for revolvers.

4.2 Oz. Aerosol O37-66677 \$11.95

## J. Dewey Mfg. Co. Cleaning Patches

Packages of 1000

.17 cal. O37-11807 \$12.95

## E-Z Brite Wonder Cloth

On gun dealers shelves since 1976, this product is still a must for keeping stainless steel and nickel-finished revolvers looking like new. Demand the original lead and carbon wipe!

E-Z Brite Cloth O37-18613 \$7.99

## Barrel-Lite®

O37-10529

\$4.95

## M-PRO7

M-PRO7™ Gun Cleaner is odorless, non-toxic and biodegradable. "Safely cleans rifles, handguns, shotguns..., black powder, corrosive priming deposits and much more."

4 oz. O37-10139 \$11.95

8 oz. O37-10138 18.95

32 oz. O37-11298 40.95

M-PRO7™ Copper Remover works up to four times faster than ammonia-based cleaners and is odor free.

4 oz. O37-19370 \$11.95

## FrogLube

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products.

4 Oz. Paste O37-15443 \$10.99  
4 Oz. Liquid O37-15444 17.59

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60+), Lite is a thinner viscosity for lower temperatures (F30+).  
Slide-Glide Standard O37-15571 \$7.95  
Slide-Glide Lite O37-15572 7.95

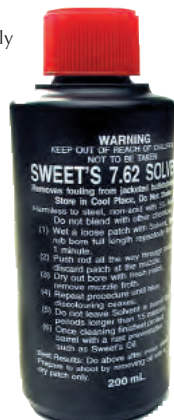

Microton UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

O37-75125 \$9.95

## Sweet's Australian

7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

O37-13128 \$12.95

**D**ewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. To use, 1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

O37-18599 \$14.95

# 70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

**E**lite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature spe-

cial grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

All ETS magazines are translucent and resistant to extreme impact, harsh chemicals, extreme heat and cold, and UV. They won't become brittle over time.

**Made in USA With a Lifetime Warranty!**

# Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 as pictured w/o riser **O37-11643 \$89.95**  
TRS-25 with riser **O37-31318 \$119.95**

## Scout Scope Mounts for AK, SKS Rifles

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle **O37-25374 \$79.99**  
Scout Scope Mount for SKS Rifle **O37-25373 78.99**

# BEWARE OLDER SHOOTERS

**“Beware an old man in a profession where men usually die young.”**

**By Barrett Tillman, Photos by Mike Smith**

There’s a popular internet meme that shows a graying warrior leaning on his sword with the legend: “Beware an old man in a profession where men usually die young.”

Thereby hangs a lesson.

It happens to most of us. “If you live long enough, you grow older.” For practical shooters, that means you begin to realize that you’re not as fast as before. The reasons are many and varied, from physical condition to vision to waning interest. For some of us it happens sooner rather than later; for a fortunate few it’s delayed into our sixties.

I began serious shooting at age 29, the year I first attended Gunsite and helped form Oregon IPSC. As a ranch kid I’d grown up hunting and shooting, but competition was new to me in 19-ought-78.

Time passed.

I peaked late as a competitor, but in cowboy action shooting I made the top 10 percent in overall national rankings at age 48 and led the national champion posse at 49. That was 20 years ago. Being honest with myself, I concede that I couldn’t repeat those performances today.

Today, as more shooters approach retirement age, more ballistic sports are taking notice. Not satisfied with Senior class, several years ago SASS established the Forty-Niner category, a tip of the Stetson to the movement's advancing age. Other disciplines such as USPSA also recognize senior shooters, varying from 50 to 60. High power and service rifle seniors begin at the double nickel.

### The Vision Thing

Usually the first evidence of advancing age is receding vision. But Arizona is wonderful. Where else can a marksman find an optometrist who's not only a pistol shooter but an NRA board member? In Prescott it's not unusual to wander past an office window and glimpse a client trying new glasses while focusing on the front sight of a 1911 or a single-action hawgaig. The downtown drivers also are accustomed to seeing a highpower rifleman hoisting an M-1A outside the office, checking the sight picture in bright sunlight.

Unfortunately, when it's time to drive home, you'll need your "regular" glasses. After all, in a surprise gunfight, you probably won't be wearing your competition lenses.

What to do?

Some companies offer products specifically for vision challenged shootists. AO express sights offer an option: a big white dot front bead and shallow V rear sight are one answer. They're very good for fast sight acquisition, day or night; not so good for precision.

Crimson Trace provides built-in lasers for a wide variety of revolvers and pistols. The laser sights are excellent in low light, and can be useful in some daylight conditions. Then there's fiber-optic sights such as TruGlo, that largely eliminate playing the optical trombone, waiting for your eyes to focus on a conventional front sight.

By the way: here's a bonus beyond your free subscription to *The Blue Press*. Recently, of a hot summer morning in Arizona Territory (en route to 115 degrees of Fahrenheit), I was running some pistol drills and found that I simply could not focus on my front sight. Or anything else: the world had turned hazy. Finally I took off my glasses and noted condensation on the clip-on sun shades. When I removed the clip-on, the world returned to bright, contrasty reality.

Lesson learned: be aware of the temperature, your amount of perspiration, and effects on spectacles for a given situation. I still got good hits in decent time at eight yards, shooting through the fog, but it's much better if you don't have to.

Incidentally, ever wonder how you'd perform under pressure without your glasses? You should find out. Since proper training begins with a specific goal for each session, consider devoting some range time to a worst-case scenario: you've been decked, your glasses knocked off, and there's no time to find them.

Practice without corrective lenses but with eye protection. How far out can you get a reasonably

fast hit? A decisive hit? How well can you make a precision shot at any distance?

Inquiring shootists need to know.

### Slowing Down

How much slower are you now versus 10 years ago? And how much does it matter?

For most of us, the difference between 40 and 50 may not be much. But the difference between 50 and 60 is apparent, and 60 to 70 is a major-major change.

Time is distance; distance is time. In the ballistic time-space continuum, where you felt comfortable previously may now represent your outer limits. That's eminently worth knowing. How you adjust your current ability is a matter between you and your attorney, but consider this: if you've spent years at Level Eight and now you're Level Six, you need to reprogram the computer between the Peltors to reflect the new reality. After all, other than shooting the wrong person, the only thing worse than shooting the right person too soon is shooting him too late.

An electronic timer is a good investment. It's totally objective, devoid of ego, and never-ever makes excuses. It'll tell you to one-hundredth of a second whether you can still draw from concealment and make two A-zone hits on a 10-yard silhouette in 1.44 seconds. Or not. As Jeff Cooper constantly reminded students, "It's not what you once did, it's what you can do now. On demand."

By far the most senior shooter I ever knew was still popping caps at 90. John had enjoyed three careers, including the Coast Guard and Herbert Hoover's security detail. (For products of outcome-based education, HH was the 31st president, 1929-1933.) When I asked why he'd started shootin' cowboy, John said, "Well, all my silhouette friends are dead!" He wasn't fast – he'd grown up as a bullseye shooter – but dang, he was accurate.

Consider this: If your El Presidentes are now 12 seconds with A-zone hits instead of 8 (and yes, Rob Leatham does 'em in 3!), you are still nobody for most crooks to fool with.

There are other considerations that come with age. During a range session, my training partner asked a question: is a shoulder holster or cross-draw preferable for arthritic shooters?

I'll call him "Mike." He retired his Bruce Nelson No. 1, the Sparks 55BN, and the Davis Liberty, because they forced him to lift the gun a little higher on the draw. He explained, "When I carry a five-inch gun, I prefer my old Rogers Hackathorn Special with its low-cut 'gamesman' front. If I am carrying a belt-high holster, like a Summer Special, I prefer a Commander-length pistol. Since I tore my rotator cuff, it's hard to lift the pistol high enough to clear leather.

"Lowering the top of the holster by an inch, and shortening the barrel by 3/4", may not seem like much, until you catch a half-inch of slide on the top of the holster a few times. I have flubbed

**80** enough draws to recognize the reality of my physical limitation.”

Then there’s Jim, a pistol (and rifle, and shotgun, and grenade) fighter from the RVN class of ’67. A decade ago, at age 58, he said, “I have to move my holster to in front of my hip to draw. I just can’t lift my .45 high enough when my arm is that far back anymore. Makes it a bit harder to hide. Maybe I should do like Elmer Keith, and just wear it in the open all the time!”

Lesson learned: attention to detail pays dividends for senior gunfighters at least as much as anyone else.

Also, realize that arthritis affects strength and agility. Time for a reality check: if you comfortably shot .357s or .45s for decades, your ability to grip the gun (and ergo recoil control) may have weakened. Otherwise, put your ego into cold storage and consider downsizing to a .38+P or a hot 9mm. If your condition continues degrading, well, ol’ shooter, the .380 on your belt beats the bejabbers out of the magnum in your safe. Ev’ry dang time.

Lately an interim solution has gained popularity: the 9mm 1911. Colt, Kimber, Springfield and others recognize the market, and their products are selling well. Aside from shooter familiarity with the 1911 system and J.M. Browning’s excellent single-action trigger, the 9mm option offers better recoil control, and bullet design is much improved for defensive loads.

### **Tweaking the Mental Trigger**

Hardware is one thing – mental preparation is another. Every defense-conscious shooter should have long since set his/her mental trigger: “In this situation I’ll let him/them go that far before I shoot.” No, of course we cannot anticipate every scenario, and it’s a percentage bet that if you do have to shoot, it’ll be under unexpected circumstances. But we can shave the odds more in our favor with some judicious games of What If, and conducting meaningful practice.

However, comma...

As we age, we change. Without putting too fine a point on it, we become less capable. Our reflexes degrade; our vision worsens; our agility suffers.

We even think differently. Something about brain chemistry: I wouldn’t presume to explain the physiology, but two of my doctors have cited relevant studies.

That means resetting our mental trigger. The time-distance continuum alluded to previously comes into play. Whereas 15 years ago we could move to cover in Situation A, now we’re slower, perhaps hobbled by arthritis, and do not have that option. Therefore, a manageable Situation A degenerates into a Situation B in which judgment looms even larger. There’s three of them with knives and a tire iron. They want my money. Do I:

*Give it to them and hope they’re satisfied?*

*Brandish and hope to scare them off?*

*Try moving to cover and hope they don’t catch me?*

*Challenge them and prepare to shoot if they break the 21-foot line?*

A wrong decision could put you in the jail, hospital, or morgue, in approximately that order.

And while we’re at it, let’s discuss the fabled seven-yard rule. It’s been with us for decades – a generally recognized distance from which a knife-armed opponent can cut you even if you’re alert. While it’s not codified in law, it has been cited by expert witnesses in court.

However, if you’re fast, accurate, and agile enough to defend yourself against an edged weapon at seven yards when you’re 45, does that apply at 60? You should try it several times to find out. If so, that’s great. If not, add one more program change to your mental computer.

Nobody said that getting older is easy.

One more thing. If you’re a senior citizen subjected to a physical assault, you’re going to get hurt. Sociopaths in their teens and twenties are stronger than you, and they usually hunt in packs. If you hesitate, you’re probably going to find yourself on the ground, surrounded by urban savages who enjoy the process of injuring and humiliating you.

Ever try drawing your pistol while lying on your back or stomach with somebody on top of you? Maybe somebody who discovers that you’re armed and wants to “examine” your weapon? (Hint: in some years, as many as 20 percent of slain cops are shot with their own guns.)

So...you need to rewind the mental tape to the point that the situation approaches the irretrievable. For seniors, that means giving themselves a bit more room – and time – to evaluate the situation, make a decision, and respond.

### **Awareness = Avoidance**

Learn and live by the Color Code. It works for everybody who cares enough to become aware of his environment. (Condition White is obliviousness; Yellow is general awareness; Orange is focused on a specific subject. Condition Red is the trigger decision – fight.)

The importance of awareness increases as we age, for all the reasons cited above. But in the information era, senior gunfighters can enhance their situational awareness by learning about threat levels in areas we may travel. If planning a trip, learn which jurisdictions honor your CCW; which areas are known for high crime and which types of threats (carjackings, armed robberies, drive-bys, etc.) I would gladly go miles and miles out of my way to avoid having to call my lawyer at an outrageous hour.

Sidebar: in 2017 the Second Amendment Foundation issued the first travel advisory in its 43-year history. Avoid California. The press release stated, “The Second Amendment’s protection of the right to keep and bear arms applies to state and local governments, but they seem rather oblivious to that fact in the halls of California’s Legislature.”

The same precaution applies to tactical distances. If you see or sense trouble coming down

the block, cross to the other side of the street. En route, assess the tactical geography for potential cover and concealment. Crossing also provides a reality check. If the potential troublemakers keep going, you were slightly paranoid, and no harm done. If they pursue you, then you're prescient. In either case, you're better off.

### Deception

There's a mantra that goes, "Age and craftiness will overcome youth and enthusiasm." A little deception might go a long way.

Imagine that you're cornered in a blind alley, back against the wall. The gang of urban predators is closing in. You might lean against the wall, but do not drop to the ground. Grasp your chest (left side preferred.) Inhale audibly, mouth open, eyes wide. "I...can't...breathe. My pills..." (Fumble in pocket for 9mm prescription.) "HELP! Ambulance! Police! Firemen!

Anybody!"

At the very least you can buy yourself a few seconds to think or to draw. Nobody's going to accuse you of over-emoting, but it could literally be the performance of a lifetime.

If you've never read Jeff Cooper's *Principles of Personal Defense*, please do so. The seventh principle is Surprise. One of the few advantages of geezerhood is that you get a boost in your Surprise factor. If you're 25

years old with Brad Pitt abs, the punks are likely to key on you and take you out first. But once your inverted triangle physique reverses, you look less threatening. Goblins don't expect a grayhead to foil their plans.

However, often goblins prey on the weak just because the vermin sense an easy mark. Remember "the knockout game"? It's been part of the urban landscape for decades but came to prominence several years ago because the media finally took notice. The object of the "game" is to render the unwitting "player" unconscious with one blow. You can check YouTube for numerous examples. Sometimes the assailants use tasers, but it's far more common to punch with a fist. One blow and lights out.

Inevitably the social engineers express concern that potential victims may respond with lethal force. But consider this: a three-year survey of the

FBI Uniform Crime Statistics (2013-2015) shows an annual toll of 600 to 700 fatalities inflicted by "unarmed" assailants. There appear no figures on how many other victims suffered permanent, debilitating injuries, but there must be several hundreds more – perhaps thousands.

So the do-gooders and the media blare and bleat: "He shot an unarmed kid!"

No he didn't. He (or she) shot an assailant bearing at least two lethal weapons.

One more thing. You're a senior citizen who's survived a violent attack. Juries in Free America likely will be sympathetic. The cops probably will be too, but don't trust them. I'm sorry: that's the reality. Don't trust them. Every one of my law-enforcement friends says the same thing. Every one of them. The responders may be good guys and gals, but even if they would like to

replace the ammo you just expended, their report starts the legal process. The DA may not share their perspective. So request an ambulance, then suck on the oxygen for all it's worth. Usually you don't have to talk to the authorities for as much as 72 hours. Do your talking to your velocilawyer.

After all, you're an old geezer and entitled to some respect.

### The Ultimate Option

I am reminded by my youngest brother (himself now 65) how a family friend solved the senior shooter quandary in his late fifties. A retired Air Force general often visited us, and in those bygone years, the erstwhile fighter ace found a technical compensation for ageing. He traveled with some constant companions: a .357 in his El Dorado's glove compartment and an M16 in his golf bag. His home-defense weapon was a belt-fed M16, apparently courtesy of General Curtis LeMay, though I never laid eyes on that rare jewel.

Hey, if you can't arrange for six M2 Brownings and a 1,200-hp engine in your mode of transportation, something with a selector might seem the next best equalizer for age compensation.

But whatever your vintage and whatever your hardware, you can learn from that internet meme: you can be the old timer in an environment where men tend to die young.

# 101 Classic Firearms by John Marshall <sup>83</sup>

John Marshall's book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, is a compilation of the author's popular articles appearing in *The Blue Press* since 2007. **101 Classic Firearms** is sure to be a prized addition to the library of any serious firearms enthusiast.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on some of the world's

**037-40133 \$29.95**

most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. John is also an endorsement member of the National Rifle Association.

## Elftmann Tactical SE Drop-In Trigger

The ELF-SE Drop-In Trigger for mil-spec AR-15s features an extremely short takeup; a clean, crisp break; and a very short, positive reset with a non-adjustable 3.5-lb. pull weight. The total physical weight of the entire trigger unit is 2.3 oz.

**037-10007 \$169.00**

## OPSol Mini-Clip™

Allows the use of 12 Ga. 1.75" Birdshot, Buckshot and Slug shells. Fits 12 Ga. Mossberg 500, 590, 590A1 and Maverick 88 models

The OPSol Mini-Clip™ was designed to give "well seasoned" and "recoil sensitive" shooters the capability of shooting the trusty Mossberg 12 Ga. platform without the usual recoil response. By using The OPSol Mini-Clip™ in conjunction with 1.75" shotgun shells, shooters stay in the game without all of the pain. The Mini-Clip enables owners of Mossberg 12 Ga. shotguns to use Aguila Minishells reliably for training, practice, recreational or home-defense applications.

**037-10471 \$14.99**

## New Designs From Kershaw Knives

**Kershaw Knives** and **Emerson Knives** have joined forces on a series of knives that combine the precision engineering of Kershaw with Emerson's uncompromising functional design.

The CQC-6K features a modified clip-point blade for versatile cutting ability. The blade has two finishes: a satin finish on the upper and a stonewashed finish on the grind. The handle's front scale of textured G-10 offers a secure grip and the handle's stainless steel back has a solid frame lock.

The CQC-6K is a manual opener using either the thumb disk or the patented Emerson "wave shaped feature." This opening feature enables the knife to be opened as it is removed from the pocket. The pocketclip is reversible for left- or right-handed carry.

Blade length: 3.25" Closed: 4.5" Open: 7.75"  
**037-31320 \$54.99**

Designed by Belarusian custom knifemaker Dmitry Sinkevich, the new **Kershaw Pub** looks like nothing you've ever seen.

Closed, you'd never know there was a handy blade inside – although you would definitely see the equally handy bottle opener. And if you were exceptionally sharp-eyed, you might notice the slotted screwdriver tip right next to the bottle opener.

To reveal the blade, just push down on what looks like the key ring attachment. You'll see the blade move out of the compact handle. Keep pushing and the blade will swing all the way out, ready for use. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip. The handle has an anodized aluminum front scale in bright blue and a steel back.

Blade length: 1.6" Closed: 3.1" Open: 4.5"  
**037-31323 \$24.95**

# 84 Wise Company's "Grab & Go" Emergency Food Kits

Wise Company's **18 Wise Favorites 72-Hour Kit** includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.

Wise Company's **60 Serving Gourmet Entrée Only "Grab and Go" Food Kit** includes two servings per day (entrées only) for one adult for one month or four adults for one week. **Product within this Bucket is:** Savory Stroganoff (8 servings), Chili Macaroni (8 servings), Pasta Alfredo (8 servings), Creamy Pasta and Vegetable Rotini (8 servings), Cheesy Lasagna (4 servings), Teriyaki and Rice (8 servings), Creamy Ala King and Rice (8 servings), and Creamy Tomato Basil Soup (8 servings).

Wise Company's **60 Serving Gourmet Freeze Dried Meat "Grab & Go" Food Kit** includes 60 servings of assorted gourmet-seasoned freeze dried meat and a 20-serving bonus of long-term emergency rice, for a total of 80 servings. **Product within this Bucket is:** Roasted Chicken (12 servings), Teriyaki Style Chicken (8 servings), Cheesy Beef (8 servings), Southwest Style Chicken (12 servings), Savory Roasted Ground Beef (12 servings), Stroganoff Style Beef (8 servings), and Long-Term Instant Rice (20 servings).

Wise Company's **120 Serving Breakfast Only "Grab & Go" Food Kit** includes 120 servings of breakfast assortment (no entrées). **Product within this Bucket is:** Apple Cinnamon Cereal (40 Servings), Crunchy Granola (40 Servings), and Brown Sugar and Maple Multi-Grain (40 Servings).

Wise Company's **120 Serving Freeze Dried Vegetable and Sauce "Grab & Go" Food Kit** includes 120 servings of vegetable and sauce assortment. **Product within this Bucket is:** Corn (24 servings), Peas (16 servings), Broccoli (24 servings), Green Beans (24 servings), Butter Sauce (8 servings), Cream Sauce (8 servings), Cheese Sauce (8 servings), and Mushroom Sauce (8 Servings).

Wise Company's **120 Serving Freeze Dried Fruit and Snack "Grab & Go" Food Kit** includes 120 servings of fruit and snack assortment. **Product within this Bucket is:** Bananas (16 servings), Strawberries (16 servings), Peaches (16 servings), Apples (16 servings), Caramel Sauce (16 servings), Yogurt (16 servings), and Pudding (16 Servings).

## Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.
