New-Reloader **XL 750** Package

You've made the decision that loading your own ammunition is right for you.

You're ready to pull the trigger, but uncertain of exactly what you need.

Dillon has taken the work out of this. We have assembled a New-Reloader Package, featuring our new XL 750 reloading machine, with the most popular machine options, along with the accessories you'll need to begin reloading immediately.

This package is available in 9mm, .223/5.56mm, or BOTH.

9mm 750 Package:

XL 750 in 9mm
9mm Die Set
Bench Wrench
Small Pistol Casefeeder
XL 650/750 Strong Mount
Bullet Tray Kit
Roller Handle
9mm Case Gage
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers

The Complete Reloading Manual for the 9mm Luger

Total: \$1431.35

.223/5.56mm 750 Package:

XL 750 in .223/5.56mm
.223/5.56 Die Set
Bench Wrench
Small Rifle Casefeeder
XL 650/750 Strong Mount
Bullet Tray Kit
Roller Handle
.223/5.56 Case Gage
Dillon Case Lube
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers

The Complete Reloading Manual for the .223 Rem.

Total: \$1463.30

Combo Package (.223 Conversion Pictured at Right) Includes the 9mm Package Above, Plus:

.223/5.56 Conversion Kit
.223/5.56 Die Set
XL 750 Quick Change
.223 Case Gage
Dillon Case Lube
Small Rifle Casefeed Plate

The Complete Reloading Manual for the .223 Rem.

Total w/9mm Pkg.: \$1804.50

As a token of our appreciation for new reloaders who purchase one of these packages – while supplies last – we're going to include one of these **Tactical Tailor Operator Caps** and our Dillon Precision morale patch. The Tactical Tailor cap is an incredible value: a high-quality product that's made in...wait for it...the USA, by a company that prides itself on hiring veterans. The hat in the photo is MY hat, [Note: same hat, new patch.] and I've lost track of how many times it's been washed – IN the washing machine! It STILL looks great! If you're the kind of person who not only wears hats, but also WEARS THEM OUT, you're going to love this hat.

ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

We READ Our Mail!

Thanks so much for your article on the Winchester Models 60 and 67 ["Classic Firearms," Nov. 2019]. The first firearm I ever fired was my maternal grandfather's Model 60. I'm not sure how old I was, but I was so little he had to help me hold it but let me aim it and pull the trigger. He had bought it when he was in junior high school in the 30s for \$2, fixed its broken stock in shop class and burned his initials into the stock. My grandpa and I were extremely close, and when we lost him in 2015 and my brother, cousin and I were going through the guns, I couldn't care less what I got as long as I ended up with that model 60. It's undoubtedly the least monetarily valuable piece I have in my considerable collection, yet the only one that matters to me. If my house ever caught fire, that would be the one I'd save!

Sean M. Smith, CEO – Starfire Lumber Co.

I just wanted to drop you a quick note to say THANK YOU for your support of the 2019 Arizona State PCC Championship. This is a match that I look forward to shooting all year. It is very well run and your generous support makes for a great prize table.

Kurt Solomon, Team144 – fireman64000@gmail.com, Facebook @team144, Instagram @team.144

I received my November 2019 *Blue Press* and I always read the "We READ Our Mail" first for feedback on previous articles. Love the responses on the .45 vs. 9mm articles also (GO 45ACP). Reading further I almost choked when I read the entry by Thomas Cartwright about the cover picture of the October *Blue Press*. Come on Thomas, get a life. Her finger is ACROSS the entire trigger guard but you almost sound like a PC person from New York or California hounding on WHAT IF'S. Some people read books and articles just to find SOMETHING they can hound on. Democrats are notorious about it, and I have no use for them either. Time go get a life. Good articles throughout *The Blue Press*, I have several years of them stored up and have indexed articles in WORD so I can go back for references. Keep up the good work.

Steve – pixxharley47@hotmail.com

I carried a 1911 in the tunnels of Vietnam with the 173rd airborne brigade, so I don't think you need my opinion of the pistol which saved my butt a few times.

Dave Hahn – kmic@hotmail.com

I wanted to thank you for the OUTSTANDING CUSTOMER SERVICE and let you know how glad I am to own an XL 650 and an RL 550C press, great American products supported by amazing people. Thank you again, loyal customer,

Vince – vmayer45@yahoo.com

THE CHRISTMAS CLASSIC

DAISY RED RYDER 80TH ANNIVERSARY CARBINE

Reviewed by Peter Caroline

When I was seven years old, I was given a Daisy Golden Eagle BB gun. It was a beauty, with a polished brass “gold” finish overall, and a shiny black stock adorned with a patriotic eagle and American flag decal. My mother couldn’t remember who gave it to me, but stated, “It must have been some enemy of the family.” I was allowed to keep it because it was assumed that I did not yet have the arm strength needed to cock it. Quite true...but I discovered that if I sat on the barrel, I could easily pull back the cocking lever with both hands. BBs were readily available from other kids in the neighborhood. I felt no need to inform my parents of these details.

After several years of hard use...hitting the beach at Normandy, assaulting Mount Suribachi, and repelling hordes of bloodthirsty savages, etc., my Daisy Golden Eagle was showing many signs of hard use. One of my Canadian cousins, a year older than I, had received a Daisy Red Ryder Carbine for his bar mitzvah. Citing this event as precedent, I made a number of non-subtle requests to my parents and aunts and uncles. A year later, I underwent the ancient ceremony, and received...a Parker 61 fountain pen. It was a very fine fountain pen indeed, but not a Daisy Red Ryder Carbine.

Despite my deeply deprived childhood, I grew up... to a point...and have owned many interesting firearms and airguns over the years, but never a Daisy Red Ryder Carbine. Several weeks ago, however, I received a press release from Daisy Outdoor Products in Rogers, Arkansas, announcing the introduction of the Daisy 80th Anniversary Red Ryder Carbine BB gun. This commemorates a notable event in the history of childhood

armament. In 1940, the second term in the reign of Roosevelt II, Daisy introduced this saddle ring carbine, honoring a popular radio and comic strip cowboy hero. It met with instant success, and has been a steady seller ever since. In 1983, Red Ryder Carbine sales were boosted by the movie version of Jean Shepherd’s tale, “A Christmas Story,” chronicling young Ralphie’s quest for a Red Ryder Carbine despite many adult admonitions of “You’ll shoot your eye out!” Summoning up my inner Ralphie, I contacted Daisy and requested a sample of this commemorative edition.

When the carbine arrived, about a week later, it had the identifying features that I remembered from decades ago; the saddle ring with leather thong, the wood forearm with forearm band, and the wood stock with the Red Ryder brand. An 80th Anniversary medallion was inset into the left side of the stock, and an 80th Anniversary logo was impressed into the forearm. And there was more...there was a loading door with a sliding gate cut into the barrel, several inches behind the muzzle. This replaced the traditional method of unscrewing the barrel and pouring in the BBs. There is now a crossbolt trigger block safety right behind the trigger.

And the barrel is stamped with a generous assortment of warnings and instructions, even including one auf Deutsch (BRD 18 JAHRE & ALTER). The sights are quite good: an elevation-adjustable U-notch rear, and a ramped square front sight. The cocking procedure differs from the older models: you must hear seven audible clicks before the gun is fully cocked.

The voluminous instruction sheet is in English, French and Spanish, and offers all sorts of useful information and safety rules, and even has instructions on

**“SUMMONING
UP MY INNER
RALPHIE,
I CONTACTED
DAISY AND
REQUESTED A
SAMPLE OF THIS
COMMEMORATIVE
EDITION.”**

how to set up indoor and outdoor ranges. I even learned that it takes as much skill to shoot your Daisy BB gun on a 5-meter (16.4 ft.) range as it does to shoot a .22 on a 50-ft. range. In addition, a warning on the box admonished me: "Do not brandish or display this airgun in public – it may confuse people and may be a crime. Police and others may think this airgun is a firearm. Do not change the coloration and markings to make it look more like a firearm. That is dangerous and may be a crime." As my old pal Marcus Tullius Cicero once said, "O tempora! O mores!"

Setting aside any further social commentary, I proceeded to put together a mini-range for a shooting session. I placed a sandbag on our back patio table, and stapled an EZ2C target with a 1" 10-ring to a cardboard box, located exactly 5 meters distant. I poured a couple of 150-packs of Daisy Golden BBs

into the loading port (It will hold 650 BBs). Four of my shots were within the 10-ring, and one flyer a bit less than a quarter inch below it. Further tests produced similar results. The sights, as set at the factory, are right on. Trigger pull was consistent at 6-1/2 lbs., and quite smooth and manageable.

All things considered, this is a very special BB gun with a colorful history, and it's an excellent choice for starting a youngster on a lifetime passion. It weighs just 2-1/2 lbs, and measures 13-1/2" from butt to trigger face. Maximum muzzle velocity is 350 fps. It is also ideal for all-family indoor or outdoor practice, with minimal noise and cost. MSRP is \$39.95. My advice is, get two...one for you and one for the kid(s).

RL 550C[^]

STANDARD FEATURES:

- Made in the USA
- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for ONLY...
\$489^{95*}

P65-14261

Reloading dies sold separately.
*Prices vary on exotic-caliber machines.

RL 550C ACCESSORIES

RL 550 CALIBER CONVERSION KITS[^]

Contains: Shellplate, powder funnel and locator buttons. Available in all calibers; please specify caliber desired.

P65-RL550 CONVERSION \$49.95

(Exotic calibers, \$59.95[^])

AUTO POWDER MEASURE SYSTEMS[^]

Dillon Reloading Accessories

A Strong Mount increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with

all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

The Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

P65-16306 \$43.95

Our Toolholders are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

Case Preparation Equipment

Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator [^] P65-20675 \$78.95
 CM-500 Case/Media Separator [^] P65-21045 \$47.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works

great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Trim 1500 Case Trimmer[^]

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P65-62164** is **\$337.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P65-13141**, are **\$20.95** each. Upper lock rings, **P65-13559**, are **\$5.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package. **P65-13606, \$22.95 ea.**

Kayla Bodron @tactikayla

1. First gun you ever fired?

Kayla: A shotgun in my high school outdoor education class.

Missy: GLOCK, baby!

2. What's your favorite gun?

Kayla: That is such a broad question. I don't have a favorite gun. It just depends on the purpose and what type of fun you want to have. My competition pistol is a Smith & Wesson M&P 2.0 with a Leopold Delta Point Pro. For Carry Optics I love this gun, because it's simple and reliable. For a more specialty pistol I love the STI DVC Limited. As far as rifles go I absolutely love my Northtech Defense Rifle, which is just a fancy AR-15. But, if we're talking about a favorite rifle with the fun switch, then I'd have to go with the UZI.

Missy: My Taran Tactical G34 Combat Master.

3. Do you have any rituals before you shoot?

Kayla: Before I shoot competitions I dryfire the night before making sure to get lots of good draws in and also practice target transitions. The morning of a USPSA match I always run through each stage as many times as I possibly can before the match starts. Once the match starts and it's my turn to shoot the stage I will do two or three draws and run through the stage one last time in my head right before the buzzer goes off.

Missy: Oh yes! I do the pee dance. For some reason I almost always have to pee before each stage at

Get 2

matches. Anyone who competes with me will tell you it's quite entertaining to watch.

4. How many rounds a year do you shoot on average?

Kayla: I would say about 12,000 rounds per year give or take.

Missy: Well let's see...my husband and I have a range at our house I make sure to shoot on at least once a week, we own a firearms training facility called Threat Dynamics that we do monthly employee shoots at and Member shooting Events with, and I do 3Gun competitions, so LOTS! I couldn't even make a good guess on that one.

5. Most useless thing you own?

Kayla: I'd have to say my dining room table. I think I used it once about eight years ago when I first moved into my house. I need to just convert that whole room to an office.

Missy: Two stinky goats.

6. What else do you do for fun?

Kayla: If I'm not shooting, I usually enjoy a good hike, through some of Georgia's National Parks.

Missy: Be a momma, work out, and cook! Some how I manage to stay in shape even though my husband will tell you I do a lot of accidental baking...that leads to lots of comfort eating.

7. Favorite place on Earth?

Kayla: I don't have a favorite place. I haven't been there yet. I'm hoping it will be Banff, Alberta, Canada; Hawaii; or Italy.

Missy: Hmmm couldn't pick one. My truck with my family, camping in the eastern Oregon desert jack rabbit hunting, and my back porch with a glass of Stoller wine.

8. Most annoying thing about you?

Kayla: I'm a homebody and very antisocial. I may come off as stuck-up but it's only because I'm shy. In social settings, I'm usually minding my own business. But once the uniform goes on I'm a different person.

Missy: I think out loud...constantly. I need a filter.

9. Craziest thing you've ever done?

Kayla: I'm probably the least crazy person on the

Kayla Bodron

Know

Missy Tuttle @_missy_lynn_

planet, but if I had to guess it would probably be parasailing.

Missy: Um, lots I'd say! Gotta live life on the edge, man! I suppose first thing that comes to mind is the spur-of-the-moment road trip I took to Vegas with friends. Maybe the time my neighbor and I decided to do a redneck demolition derby in our back yard, or the time I decided to fly to Arizona and go to Havasupai Falls with no reservations. Got VERY lucky to find a group who had missing people and let us join em'. Ended up being the best trip I've ever been on. Beautiful place! Glad I took that chance for sure.

10. Dream job?

Kayla: I've wanted to be a " profiler " or behavior analyst since I was about 12. I just think it would be super interesting to interview infamous serial killers to understand their brain and their thinking process.

Missy: Doing it currently and very blessed! I'm a stay-at-home mom raising independent, strong, patriotic farm babies! Being a competitive shooter was also my dream side job, so I'm very fortunate to be where I'm – at 27 – doing what I love! My goal moving forward is definitely to progress as a competitive shooter and become more recognized for that.

11. Who has inspired you the most?

Kayla: Not to sound conceited, but, myself. I've had such a long journey to get where I am today as far as my shooting. I went from failing firearms in the police academy in 2010 to being an instructor in 2019. I've told myself for years and years that if I keep doing what I'm doing and putting in the work that it would pay off eventually. Almost 10 years later I can say it has definitely paid off. If I've gotten this far, then nothing can stop me if my heart is in it.

Missy: My husband. He's a former chicken rancher, Veteran, entrepreneur of multiple businesses, and also a family man. He's a do-er that strives to know more, do more, and see more. I just love how possible he thinks anything is! It's rubbed off on me and is why I am who I am today.

12. Who would play you in a movie?

Kayla: Gal Gadot from "Wonder Woman."

Missy: Well I would say Gal Gadot for sure, I LOVE her! She's strong, smart, tall and beautiful! Why wouldn't I want her playing me? Ha Ha! But if you ask my IG followers, for some reason they'll tell you Jennifer Anniston. I don't see it, but I get that comment a lot on my posts.

13. If you could have a conversation with anyone from the past, who would it be?

Kayla: Jeffery Dahmer or Ted Bundy.

Missy: Honestly? Albert Einstein. Ha Ha! I watch a lot of conspiracy videos as well as videos on space, time travel, dimensions, and I would just love to discuss those topics with him. Just to hear him speak about anything I'm sure would be fascinating.

14. Who's in your regular crew?

Kayla: My husband Robert, sister-in-law Rachel, and all of my USPSA friends. The competition shooting community is unlike any other.

Missy: My kids. They're a wild bunch.

15. Words to live by?

Kayla: Don't ever give up on your dream. It may not come easy. You may get the door slammed in your face for years. But if you are persistent it will pay off. Maybe not tomorrow, next month, next year, maybe not even in five years. I can promise you, if you work hard at what you want and put in the work, IT WILL PAY OFF.

Missy: "If you're not living life on the edge, you're taking up too much space."

Missy Tuttle

5.11 Tactical®

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

This holster/mag pouch combination was designed for the Single Action Shooting Society's "Wild Bunch" category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no

more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

ODIN Ready Bag

ODIN Works introduces the new ODIN Ready Bag[®] (ORB)

featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease.

Whether you're going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

- Quick-release compression straps
- Four D-ring attachment points
- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: *Can remain in bag as a pocket or extend up through the zipper to fit longer barrels*
- Available in black or coyote brown
- Dimensions: 28" x 7" x 6"

"Plan B"[^]

Very-Bad-Day Planner Holster

Dillon's "Plan B" Very-Bad-Day Planner Holster[^] holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Holster

Comtech's STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

P65-19495 \$9.95

kershaw

Key chains just got even handier with the new Kershaw PT-2 key chain tool. It offers eight handy functions in a very compact space. The PT-2 (Pry Tool-2) comes in at less than an ounce as well and offers a bottle opener and cap lifter, a pry bar, two screwdriver tips, a wire scraper, and three sizes of hex drives.

Overall Length 3.25" Weight 0.8 oz.

An American Holiday

By **Kimmie Dillon**

For over 40 years, Dillon Precision has been proudly manufacturing products here in Scottsdale, Arizona. So it's safe to say that we have great pride in our work, our wonderful employees and our exemplary country.

Here at Dillon, we are patriotic. We love our country, which includes the fundamental values and principles of American democracy. Today it's easy to turn on just about any news channel and observe how American pride is lacking. But patriotism should not depend on perfection. Rather, it is a commitment to a dream that our country can be better and our Founding Fathers' vision of democracy is always worth striving for.

So this holiday season, we are boxing up our traditional red and green ornaments on our Christmas tree. No offense ever, Santa – you're the man and we love you! But, this year our Dillon Christmas tree is 100 percent patriotic. We

are displaying our American pride in a theme of red, white and blue ornaments and we think it looks awesome! As you can also see, our tree is also covered in American flags. Carol Dillon and I carefully attached each and every one. And look closely in this picture and you'll find something very special: flags representing each branch of our American military. Our Dillon Family is truly grateful for the service of the men and women in our military.

Who knows, maybe our patriotic Christmas tree will even start a trend. And we've just received word that the man at the North Pole gives it his approval. If you're in our neck of the woods, please stop by and see our tree for yourself. It's located inside of our Retail store at Dillon Precision where you'll always be greeted with a friendly smile.

The Dillon Family and employees wish you and your family a Merry Christmas and happy holiday season.

God Bless America!

Top 10 Dillon Holiday Gift Ideas

By Kimmie Dillon

We know the holiday season can be hectic. Schedules, commitments, and then there's that thing called SHOPPING! This year, we are creating this handy gift guide to make everyone on your list happy. (Shown above left to right.)

1. Variable-Speed Casefeeder – Our customers are raving about this new Electric Variable-Speed Casefeeder. You simply drop in a bunch of brass, turn it on and start loading. This magical machine automatically orients your brass mouth-side-up, fills the casefeed tube, shuts off when the tube is full, and re-starts when the tube gets low. Our new motor comes with a universal power adaptor and a 0-8 rpm speed regulator. The bowl has an adjustable window cuff and case deflector for larger cartridge capability. We offer updates for our loyal customers with prior-generation casefeeders. Price \$299.95 to \$310.95, depending on model

2. CED Ultimate Powder Trickler – Here's the ideal stocking stuffer: the CED Ultimate Pro Powder Trickler. This handy blue gadget will produce perfect results when trickling powder onto a scale pan and fine-tuning to the last tenth of a grain of powder. CED's trickler is adjustable, features a weighted base for stability, and has a rubber base cap that doubles as a reservoir cover. Price \$21.95

3. D-Terminator Digital Powder Scale – This D-Terminator Digital Powder Scale pairs nicely with the above Ultimate Powder Trickler. Our electronic scale is a high precision unit with the latest in load cell technology. Features include: 1500-grain capacity, anti-static wind shield, check weight and powder pan. The large display is back-lit and easy to read. The D-Terminator Scale operates on four AA batteries or an AC adapter and we include both. Price \$139.95

4. Grace USA Gun Care Tool Set – Here's an ideal gift for the shooter who has everything. The Grace USA Gun Care Tool Kit contains 17-pieces of quality Gun Care Screwdrivers, Solid Brass Pin Punches, and a special 8 ounce Brass Hammer. The screwdrivers are custom hollow ground to fit scope screws, plug screws, guard screws, and many others. In a world of mass production and mediocre quality, all Grace USA tools are manufactured from the best American materials to a high standard. This kit comes complete with a custom case that fits nicely in a range bag. Price \$99.95

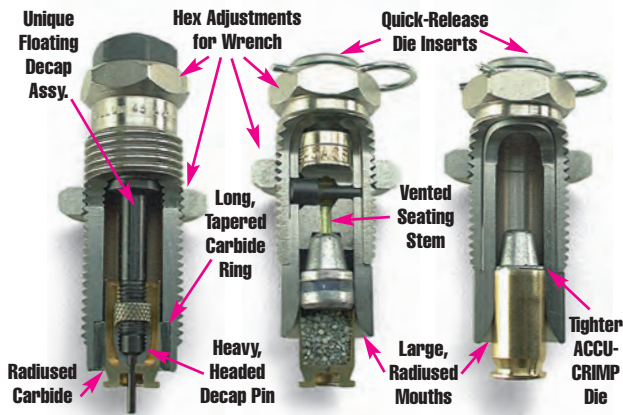

5. CED M2 Chronograph – The Millennium Chronograph is packed with incredible quality and holiday value. This chronograph has the largest LCD display in the industry, providing all relevant information at a single glance. Here are some of the many features:

Dillon Die Sets

Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Crimp Die (Pistol)

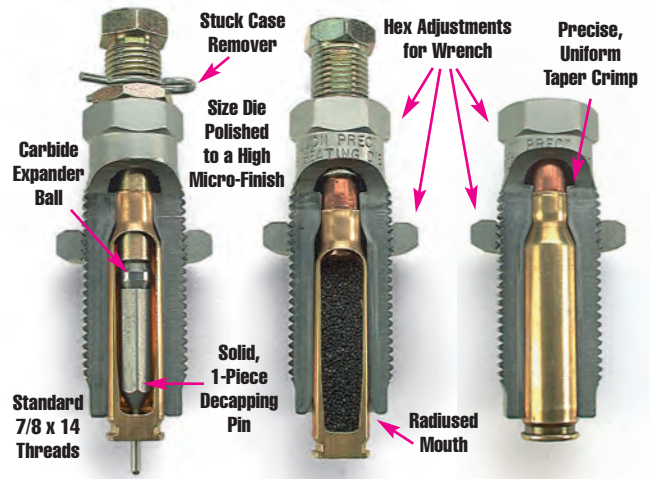

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

Dillon Carbide Pistol Dies (Three-Die Sets)

.32 S&W Long/.32 H&R Mag.	P65-14426	\$71.95
.380 ACP	P65-14401	71.95
9mm Parabellum	P65-14406	71.95
9x25 Dillon	P65-14601	152.95

Spare Decapping Pins

Package of 10	P65-21528	\$6.75
---------------	-----------	--------

Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Blue Press 35

How the Left Re-Defines “GUN-FREE ZONE” to Fit Their Agenda

“When the Gun-Grabbers can’t win the debate, they change the rules.”

By Dan Wos, Author, *Good Gun Bad Guy*

In yet another attempt to discredit lawful gun-ownership, radical anti-rights groups like Moms Demand Action, have re-defined “The Gun-Free Zone” because apparently, you had it wrong this whole time. First, lets look into the minds of the anti-gun crowd so we can understand their madness.

In an article by Meg Kelly – Video Editor for “The Fact Checker,” published in the *Washington Post*, Kelly made the following claim: “gun-free zone” is subject to interpretation. Kelly’s claim is based on the notion that because Moms Demand Action has fabricated their own definition of “Gun-Free Zone,” the term is now indiscernible. This is convenient for the anti-gun crowd because it muddies the waters and makes the measurement of “gun-free zone death” data nearly impossible.

Moms Demand Action’s “Gun-Free Zone” definition is as follows: “Areas where civilians are prohibited from carrying firearms and there is not a regular armed law enforcement presence.”

Well, this changes everything. At least in their minds and among those who aren’t paying attention. So, it looks like, based on the “new” definition, we are supposed to eliminate places

like Sandy Hook, Parkland and others when trying to measure the death and destruction that occurs in areas where people are prohibited from defending themselves with a firearm. According to the leftist gun-grabbers, there’s nothing to see here because as long as there was a security guard on duty or law-enforcement in the vicinity, it was not a Gun-Free Zone.

Do we all remember Scot Peterson, the Sheriff’s Deputy at Marjory Stoneman Douglas High School, who ran and hid while students were being massacred? Don’t forget, civilians were prohibited from having guns on campus, leaving the safety of the students in the hands of Peterson, but because he was armed, and according to the new left-wing definition of GFZ, Parkland shouldn’t be counted as a GFZ. Keep in mind; according the Anti-Gun Radicals, as long as a 500,000 square foot school has one armed security guard, even while prohibiting teachers, staff and lawful gun-owners from carrying a gun, it should not be considered a Gun-Free Zone.

The anti-gun mob doesn’t want the “Gun-Free Zone” being blamed for mass-killings because they support them. The creation of Gun-Free Zones is a political win for the left and another

“By changing the definition of ‘Gun-Free Zone,’ the anti-gun crowd is able to avoid responsibility for putting children in danger while continuing to portray themselves as virtuous.”

er roadblock for lawful gun-owners. This is why the political left cheer in the streets when Walmart declares its stores gun-free. Should the public become wise to the dangers of the GFZ, the Anti-Gun Radicals would have to admit that they share responsibility for the loss of innocent lives. Denying the dangers of GFZs has become impossible, so rather than admit they support these "Killing Zones," they attempt to change the definition so you can't measure the data. They desperately scrub the blood off their hands, while simultaneously using school killings to support gun-control legislation. Yes, they want it both ways.

Kelly even said in her 2018 article: "Without a commonly accepted and uniform definition of 'mass shooting' or agreement on what constitutes a 'Gun-Free Zone,' it's difficult to settle this debate."

Of course it is. That's the idea. The numbers show us that GFZs are deadly killing zones because the people are sitting ducks and the Bad Guys have zero opposition, but the gun-grabbers want desperately for that truth to be clouded in a dispute over the definition.

Regardless of the left's interpretation, the 1990 Gun-Free School Zones Law had a provision for schools to authorize designated people to carry a gun on campus. So let's be clear. Just because an armed security guard is on the premises, does not disqualify the area as a

GFZ. There should be no dispute about the definition of a Gun-Free Zone. A Gun-Free Zone is any area where citizens are prohibited from carrying a firearm.

Based on reported accounts in a study conducted by Gary Kleck and backed by CDC data, there are approximately 2.46 million defensive gun uses in America per year. In other words: "lives saved because of guns." These are specific cases where the presence of a gun stopped or deterred a threat.

The anti-gun left desperately clings to the claim that armed citizens do not stop mass-killings. How do they measure something that hasn't occurred? When the anti-gun crowd tries to claim armed citizens do not stop killers, they are trying to use a hypothetical argument as data. Unlike the Kleck study, the claim that "armed citizens do not stop mass-killings" is impossible to measure because the "killing" they are referring to never happened and the "armed citizen" they are referring to never existed. The entire scenario they are creating never occurred, therefore it is impossible to measure.

By changing the definition of "Gun-Free Zone," the anti-gun crowd is able to avoid responsibility for putting children in danger while continuing to portray themselves as virtuous.

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

RCBS Trim Pro 2 Manual Case Trimmer

The RCBS Trim Pro-2 manual case trimmer features a spring-loaded "universal" shell holder that will accommodate case head diameters from .250" to .625". Comes with pilot calibers: .22, .24, .25, .27, .28, .30, .35, .44 and .45.

RCBS Trim Pro-2™ Case Trimmer P65-43231 \$139.95

Lyman Products

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

Mr. Bulletfeeder[®]

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

BL 550[^]

Dillon's Basic Loader

\$289⁹⁵

P65-15399

Reloading Dies and Caliber Conversions sold separately
(See the back of the order blank in the center)

Pictured with optional accessories:
Strong Mount **P65-22051** \$52.45

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of

versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 15) makes it quick, easy and inexpensive to change calibers. The additional toolheads are \$26.95 each, or \$24.95 each if you

buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them. A powder measure adapter is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

AUTO PRIME SYSTEM[^] **P65-16627** **\$90.95**

PRIMER SYSTEM EARLY WARNING[^]

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. **P65-20302** **\$27.95**

AUTO POWDER SYSTEM[^]

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. **P65-20251** **\$96.95**

OPTIONAL MAGNUM RIFLE POWDER BAR **P65-21353** **\$33.95**

AUTO EJECT SYSTEM[^]

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. **P65-22120** **\$33.95**

BL 550 POWDER DIE[^]

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

Powder Die: **P65-16629** **\$20.95**

Oversize Die: **P65-16626** **20.95**

Plastic Funnel: **P65-16617** **6.95**

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.) **P65-20029** **\$24.95**

RL 450 Powder Die **P65-20308** **23.95**

John Marshall on Classic Firearms:

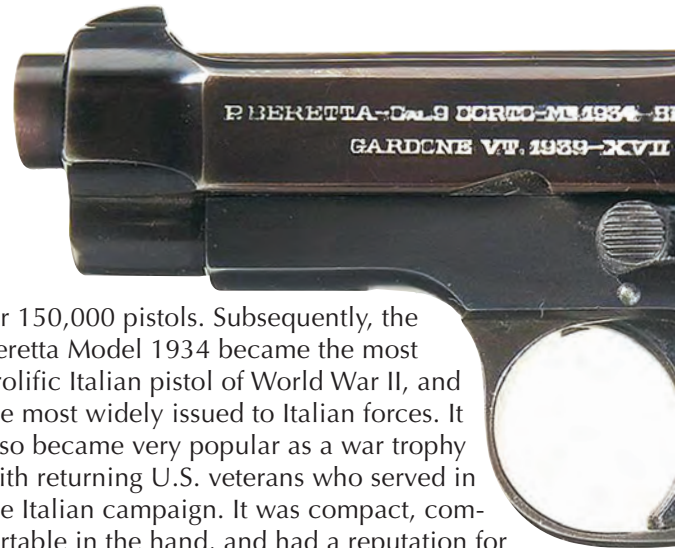

I've always been an admirer of Italian products – usually well made, pleasing to the eye, and very functional. With cars, it's Ferrari. With women, it's Gina Lollobrigida and Sophia Loren. Need I mention pizza topped with Italian sausage or pepperoni? With firearms, though, it has to be Beretta.

The Italian gun-making firm Armi Beretta SpA of Gardone Val Trompia, located in the Brescia region, has a history going back to 1526. That's when Bartolomeo Beretta founded the company, and at that time they made gun barrels exclusively. However, in 1915 Beretta responded to the needs of World War I and made a landmark pistol, the Model 1915. This gun was designed by their chief engineer Tullio Marengoni, and successive Beretta pistols were developed from it; these were the Models 1917, 1919, 1923 and 1931. The Model 1915 was chambered for the 9mm Glisenti. This cartridge was a very underpowered round, dimensionally identical to the 9mm Parabellum. Incidentally, never insert and fire the much more powerful 9mm Parabellum (Luger) ammo in guns designed for the anemic Glisenti round! The Models of 1917 and 1919 used the standard .32 ACP cartridge (7.65mm Browning). The classic Beretta slide, cutaway on top for lighter weight and free case ejection, made its debut appearance on the Model 1917. The Model 1923 was the first of this line to use an exposed hammer, and as a legitimate military handgun, returned to the nearly obsolete 9mm Glisenti cartridge (then still the official Italian military standard.) The Model 1931 switched back to the .32 ACP chambering, and some were in .380 caliber, a good move.

In the 1930s, more modern designs such as the Walther PP series convinced the Italians that their issue pistols were simply not up to the competition. Marengoni upgraded the Model 1931 into the Model 1932; it was essentially the '31 built from the ground up to use the 9mm corto, also known as the 9mm Short, or .380 ACP. This chambering conformed to that round being selected as the new standard pistol cartridge for the Italian armed forces. The Model 1932 was subsequently re-designated as the Model 1934. It varied from the '32 only in its grip panels and slide markings. By the way, modern-day hollow-point ammo seems to work reliably in most of these aging pistols, despite the fact that they were designed originally to feed full metal-jacketed bullets. As always, results may vary with individual pistols.

The first Italian contract for the production of 1,000 pistols came in 1935 for the Pubblica Sicurezza police force. However, the Model 1934 was not formally adopted as the official armed forces pistol until Octo-

ber 16, 1936. There was a delay following a request by the Italian army to use a Walther-type firing pin safety located on the slide. This was squelched when the additional cost of the change was estimated by Beretta and rejected. Just a few examples of guns with this type of safety were made experimentally. The first big contract for the Italian army came in June 1936

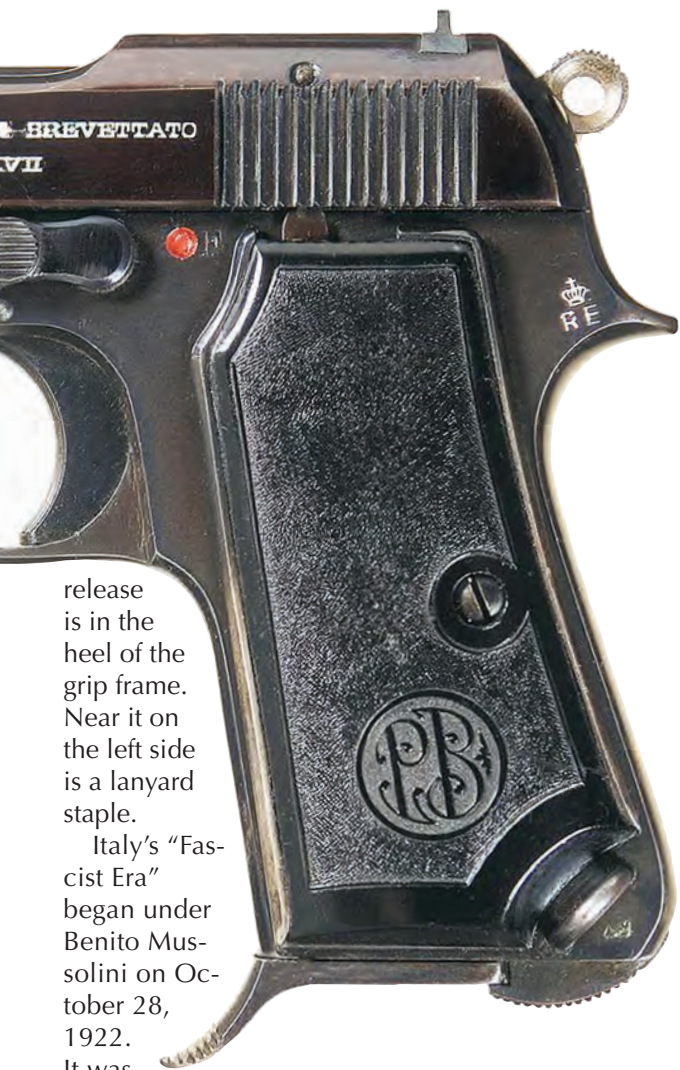

for 150,000 pistols. Subsequently, the Beretta Model 1934 became the most prolific Italian pistol of World War II, and the most widely issued to Italian forces. It also became very popular as a war trophy with returning U.S. veterans who served in the Italian campaign. It was compact, comfortable in the hand, and had a reputation for being extremely reliable. It was thin and small enough to be considered as a pocket pistol. Disregarding the double-action trend, it was a dependable single-action design, simple, easy to understand, use and manufacture. The Italian army liked it so much that they issued it until 1990!

The Model 1934 is a relatively simple blowback weapon. The guide rod for the recoil spring is located under the barrel. The stationary (yet removable) barrel has a length of 3.7 inches, and the pistol has an overall length of 6 inches. Empty, it weighs 23.3 ounces. The grips are made of steel-backed Bakelite plastic, which has a habit of becoming fragile with advancing age. Each grip is marked near its base with a circled "PB" for Pietro Beretta. The slide has a blade front sight, and a notch rear that is driftable for windage. The finish is either blued or phosphate (beginning in late 1944 or early 1945). Capacity of the open-sided magazine is 7, which with 1 in the chamber, makes it an 8-shooter. There is no magazine safety. The single-action trigger simply drops the hammer. The rowel hammer has a half-cock notch. The safety above the trigger on the left side rotates 180 degrees. Forward, it's set to fire. Rearward, it's safe, blocking the hammer, and covering the red dot which, if exposed, indicates the pistol is ready to fire. One of the gun's few faults is the awkwardness of the safety. The safety also doubles as a slide hold-

The WWII Italian Beretta Model 1934

open device. Another perceived fault is that on the last shot, the slide is held back only by the magazine's follower. When the magazine is removed, the slide will slam closed unless held by the manually engaged safety/slide stop. This makes fast reloading difficult. The magazine has a curved extension to help the pistol fit and be retained in the hand comfortably. The magazine

release is in the heel of the grip frame. Near it on the left side is a lanyard staple.

Italy's "Fascist Era" began under Benito Mussolini on October 28, 1922.

It was common practice to mark Italian pistols made after that date with Roman numerals, which reflected the year of that era. As an example, a pistol made in 1939 could have been stamped XVII or XVIII, depending on the time of year it was manufactured. In the case of the Model 1934, both the standard Arabic Julian date and the Roman numeral markings are usually evident. Other Beretta markings will vary in style. Serial numbers were on the right side of the slide and frame, and also on the barrel. In addition to the normal Beretta slide markings, the Italian word

Brevettato, meaning "patented," or sometimes abbreviated "Brevet" was added.

There will often be Italian service acceptance stamps on the left rear of the frame. They are: RE (Regio Esercito) for the army, RM (Regia Marina) for the navy, or RA (Regia Aeronautica) for the air force. PS (Pubblica Sicurezza) indicates pistols made for police forces. If an eagle and crown and crossed axe markings are found, the gun was issued to the Forestry Militia or Guards. Pistols made for Finland will be mostly marked SA (Suomen Armeija) for "Finnish army" or more rarely, "Sk.Y" for the Finnish Civil Guard. The Romanian army (then an Axis member) also used Model 1934s. The caliber marking on these will read as "9mm Scurt" (short).

The Model 1934 was twice manufactured with a blank slide. From July 25, 1943, when Mussolini was ripped from power, until September 8, 1943, when Italy signed its armistice, Beretta was unsure of the proper markings to use. Towards the end of the war, often only caliber and serial numbers were stamped, and those were on the frame rather than the slide.

Following Italy's signing an armistice with Allied forces, the northern Italy Beretta plant was still under German control. The Germans continued to make the Model 1934 for German usage. Over 53,000 pistols are estimated to have been made under German direction. In December 1943, they ceased manufacture of the Model 1934 and concentrated production efforts on the Model 1935, which was simply a '34 with a lighter slide, chambered for 7.65mm (.32 ACP). Some Model '35s were made by Armaguerra in Cremona. Many of the German-run pistols were marked "4UT," (an acceptance depot) usually on the right tang. The German designation for the Model 1934 was "P671(i)" but this was never marked on pistols. The Fascist-era Roman numeral dates were discontinued after July of 1943. Some pistols made under German supervision carried the German waffenamt stamping "WaA 162." Guns made in 1944 and 1945 suffered from some cosmetic and other minor issues, but these did not affect their performance.

Approximately 1.08 million Model 1934s were manufactured from 1934 to 1992, which was an amazingly long run. This Beretta is a very popular WWII collectible among both shooters and collectors. Its smaller size makes it a nice discreet carry piece, as well. It's well made, durable and easy to maintain. My only caveat would be to carefully inspect the bore of any that you are considering, as these guns come from the era of corrosive ammunition. They can still be found in good condition at gun shows and auctions for reasonable prices. They are definitely classic WWII firearms.

"Big Fifty" [^]

STANDARD FEATURES:

- Made in the USA
- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./Hr.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

REMEMBERING JANELLE

By Barrett Tillman

Photomontage Courtesy Gunsite Academy

Jane Ellen Marks Cooper died in her sleep on Sunday, July 28, attended by her family in Prescott, Arizona. She was ninety-nine, having outlived Jeff by thirteen years. (And if you don't know about Jeff Cooper, obviously you picked up this magazine by mistake.) They had grown up together in LA, attended Stanford, and married in February 1942 on the brink of Jeff's departure for World War II. Over the next seven years they raised three accomplished daughters: Christy, Parry, and Lindy.

Janelle's contribution to Jeff's career and the American Pistol Institute was essential, including the "J Ladder" competition matrix. But her warmth, strength, and quiet humor added so much more. People who could hardly stay in the same room with Jeff adored Janelle. A mutual friend attributed to her "The Sarah Lee" advertising motto. That was because "nobody doesn't like Sarah Lee." Or Janelle Cooper.

I won't even try to catalog the deluge of tributes to the lady I knew and loved. However, I'd like to share three memories that illustrate her personality.

February 1978, during my first Gunsite basic pistol class (API 250). I was driving back from dinner "in town" (i.e., Paulden) and got bogged down in what Jeff later aptly christened Tillman's Bog. My efforts to dislodge the Dodge pickup were notably unsuccessful until a couple of instructors came by. One of the rescuers (maybe Darrel the gunsmith) mentioned my predicament to Jeff and Janelle as I headed toward the campground.

Janelle summoned me, undoubtedly knowing in a motherly way that boys can get, um, dirty. Hooboy... my pants were caked in mud though I hosed off the footwear. She invited me to bring a change of clothes to the trailer (in the pre-Sconce era), and had me

shed my pants so she could put them in the washer & dryer.

Got 'em back the next morning. I thought...well, "Wow" wasn't adequate.

November 1980. I'd voted absentee in Oregon and was headed for Mesa, so Jeff and Janelle invited me to spend election eve with them. Jeff was edgy, to put it mildly, because "everybody knew" it was too close to call between incumbent Jimmy Carter and challenger Ronald Reagan. We were watching the latest returns about 8:30 when there appeared NBC's Judy Woodruff

reporting from the South Lawn, tears on her cheeks, saying it was Reagan in a landslide.

Jeff was beside himself – he'd worked up to the point that he (if not we) would stick it out til dawn. Janelle calmed him down and sent him off to bed with milk and cookies. Then she and I sat back to relish some more coverage. It was one of the most enjoyable evenings I ever spent, in delightful company.

August 2006. It isn't often that we know when it's the last time we'll see

someone, but Jeff's youngest daughter Lindy advised that sooner was better than later. I made the three-hour drive from Mesa to Gunsite, spent part of the afternoon discussing life matters with Jeff, then took an early departure. Janelle walked me outside where we sat down. I told her from personal experience that caregivers need rest, and should take time for themselves. Janelle held my hand and said, "Dear heart, I'm doing what I want to do."

My windshield was blurry for part of the drive to the road.

Jeff left the line about a month later, and Janelle was unfailingly gracious to the scores of Gunsite Ravens attending his memorial service. She remained a living testament to the finest of her generation – and it's unlikely that we'll see another.

Kahr Arms 25th Anniversary K9

By Mike Detty

Twenty-five years ago our choices for concealed carry handguns were pretty slim. Most dedicated carry guns were simply service size guns with abbreviated slides and frames. Back then I had one of the smallest 9mm production guns available and it was a Star Firestar; a steel-framed, single-action gun weighing over two-pounds loaded. But in 1994 things were about to change.

With the passage of the Brady Law and the Crime Bill, manufacturers began a race to see who could build the smallest gun for concealed carry. Capacity was less of an issue than the size of the gun and, with many states beginning to issue concealed carry permits, it was the CCW demand that was driving the market.

At the 1994 SHOT Show in Dallas I ran across a gun that would help shape the direction of the firearms industry. In the basement of the Dallas Convention Center was a single booth for Kahr Arms. Their table

held five or six prototypes of the K9 striker-fired, semi-auto pistol. I remember picking up one of the guns and trying the trigger. The double-action trigger was so smooth that I was convinced the gun used ball bearings somehow. I was also impressed with the ergonomics-it sits low in the hand and the graceful arch of the back-strap and the undercut trigger guard also facilitated a high hold grip to minimize muzzle flip. Turning the gun over in my hand I saw the stamping 9x19 and I was blown away-I thought I had been looking at a .380! This gun was smaller, lighter and much sleeker than the Star Firestar I had been carrying.

Justin Moon, Kahr Arms' CEO, was manning the booth and was very generous with his time explaining the intricacies of his new Kahr K9. He explained that he liked his GLOCK but didn't like the trigger. He also liked his Sig 220, especially its trigger, but didn't like how high the gun sat in his hand. His new breed of gun would be an amalgamation of features he preferred

along with several engineering innovations that were all his own. The original K9 pistol held 6 new patents.

To reduce the gun's height profile Moon designed and patented his offset recoil lug that allows the trigger mechanism to ride next to the barrel's locking lug rather than under it. This places the shooter's hand more in line with the gun's bore for less muzzle flip and better control. The other outstanding feature of the K9 is its Safe-Cam trigger. The patented cam is machined from tool steel and hardened and features twin lobes. When pressure is applied to the trigger one lobe draws the striker rearward while the other depresses the mechanical striker block designed to prevent inertia discharges if the gun is dropped. While the trigger pull is lengthy it is not unduly so and, for a gun without a manual safety designed for defense use, this seems to be a good choice. The gun has a consis-

tent pull from first shot to last and there is no stacking of the trigger before the shot breaks. It is this smooth, consistent pull that makes the Kahr pistols so easy to shoot accurately.

The K9s were immediately popular for all the aforementioned reasons. In fact, the only real criticism of the gun was its weight; about a pound and one half because of its steel frame. This inspired Moon to develop his polymer series of guns that shared his same mechanics. Kahr's P9 polymer-framed 9mm pistol is just about a half-pound lighter than the K9. If you look at today's compact, sub-compact and micro-compact 9mm pistols you'll be able to spot many Kahr-inspired design features.

To celebrate the 25th year anniversary of the K9's introduction, Kahr Arms is releasing a limited run of 500 K9 pistols. Each of the guns will be individually

The Kahr 25th Anniversary K9 retails for \$1649 and comes in a foam-lined carry case along with three magazines and a 1791 Gunleather belt-slide leather holster.

The Kahr 25th Anniversary K9 (left) compared to an original K9.

numbered and engraved with the 25th logo. Kahr polishes the trigger and barrel bright while the stainless-steel frame and slide are Cerakoted Sniper Grey and the slide has been given forward cocking serrations and dramatic slide-lightening cuts. The rubber Hogue grips have been replaced with machined aluminum panels made by the same company.

Kahr has also upgraded the sights and instead of the bar and dot sights my original K9 wears, the Anniversary K9 uses Tru-Glo tritium night sights. The rear sight has a tactical ledge for one-handed slide manipulation and it also has a deep "U" notch that keeps the front and rear sights from blurring together. Like the original K9s, Kahr still uses a stainless steel, polygonal rifled barrels. While this type of rifling is more expensive than cut rifling it has a number of important benefits. Polygonal rifling will not deform a projectile the way cut rifling will and it also makes a better seal around the bullet for increased velocities. Cleaning the polygonal barrels is also much easier and requires less "elbow grease" than traditional barrels.

I tested my Anniversary K9 for accuracy at 15-yards. All groups were fired from a seated rest and a Millett BenchMaster was used to rest the gun's dust cover on

while shooting. My test gun's trigger broke with 7 pounds of pressure yet felt lighter because it is so smooth. Despite the long pull I managed to print some pretty good groups with a variety of 9mm ammunition.

"If you're a person who looks at guns in historical terms the Kahr K9 has certainly earned its place in the evolution of concealed carry handguns."

I tested the gun with bullets ranging from 77-grains all the way to 147-grains, all with different bullet nose profiles and overall lengths and the K9 didn't choke once. The average of all my best groups was just .81" and that's exactly the kind of reliability and accuracy you want your CCW gun to have!

If you're a person who looks at guns in historical terms the Kahr K9 has certainly earned its place in the evolution of concealed-carry handguns. The Kahr Arms 25th Anniversary K9, with its collector appeal, shouldn't be relegated to the non-firing collection. It is a fine working gun and, like any loyal canine, protects its owner well! The Kahr 25th Anniversary K9 retails for \$1649 and comes

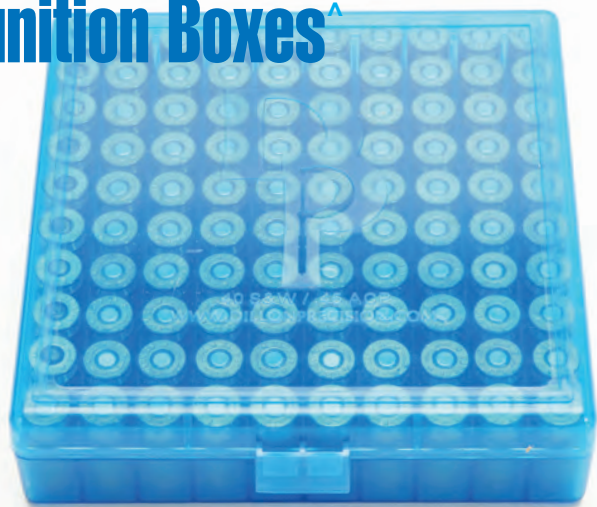

in a foam-lined carry case along with three magazines and a 1791 Gunleather belt slide, leather holster.

Dillon AkroBins

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Taylor Freelance Magazine Extensions

AR-15/Tavor 9mm SMG +10 **P65-12377 \$39.95**

This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many "stock" mag springs. *NOTE: Colt SMG mags come from many different manufacturers. Colt offered at least two major types – one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.*

TF/Wolff Spring for above **P65-12213 \$10.00**

Some Colt/Tavor/UZI magazines ship with strong springs capable of powering +10 extensions. Others don't. This spring eliminates the problem.

CZ Skorpion +10 **P65-12378 \$49.95**

- Extra length/strength spring included
- Thumbscrew-and-gasket retention system allows for quick, easy disassembly.

GLOCK +20 *Pictured* **P65-12148 \$69.99**

Transforms Glock 31-round magazines into 51+1 round mags.

Legal for PCC competition!

- Extra length/strength spring included.

SIG MPX +10 **P65-12376 \$29.95**

- Works with stock mag spring.
- Angled floor stands the magazine straight up on a table for easier loading.

SIG P320 +5 **P65-12375 \$39.95**

- Extra length/strength spring included.

California Competition Works Six-Magazine Pouch for PCC Magazines

California Competition Works' magazine storage pouch[^] for PCC magazines is the easy way to protect, store, organize and transport your PCC magazines. Easily holds six 30-round factory or after-market pistol-caliber carbine magazines.

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and

properly aligned with the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon's 1" Bench Wrench

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you're setting up a "naked" machine, there's plenty of room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead. We've addressed this in two ways. We offer 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our 1" wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. All our lock rings fit any standard 7/8" x 14 dies.

HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips.

The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P43-10208 \$19.99

Hornady Rechargeable Dehumidifier

Absorb humidity and prevent rust or mildew in gun safes or other enclosed areas. Moisture-control crystals change color when unit needs recharging. Recharge by plugging into 110V electrical outlet.

Product Features:

- Safeguards firearms and other valuables from mold and mildew.
- Eliminates humidity in enclosed spaces up to 333 cubic feet.
- Quick-connect bracket makes mounting unit easy in gun safes, closets or pantries.
- Removes humidity without electricity or batteries.
- Color-shifting moisture-control crystals signal when recharging is necessary.
- Simply plug in to dry out crystals and recharge unit for renewed effectiveness.
- Contains no harmful chemicals – child, pet and home safe.

P65-66702 \$19.99

These 532 gram DESI®PAK desiccants absorb moisture better than silica gel. It's an industrial grade material that exceeds the requirements of Mil Spec MIL-D-3464E. Now available in smaller packages for other applications (ammo cans, long-term storage containers, etc.).

Elite Tactical Systems Magazines & Loaders

Elite Tactical Systems' C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines. ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location. The result: **NO MORE BROKEN BOLTS!** The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.

HMB Bolt **P65-66680 \$99.00**

Young Manufacturing's **Upper Receiver Vise** holds any AR15 upper receiver regardless of the manufacturer. Since it supports the receiver from the inside, the outside dimensions are of no concern. Made from aircraft-grade 6061 T6 aluminum and anodized to MIL-A-8625 Type 3 Class 2.

YM Upper Receiver Vise **P65-66679 \$34.99**

This tool makes it simple to remove or install a new ejector and spring into the AR-15 bolt. Anyone who has tried to do this without a tool will be amazed at the reduction in the number of cuss words needed to perform the task. Comes with alignment and roll pin punch.

YM Bolt Assembly Tool **P65-66678 \$39.95**

Jerry Miculek AR-15 Compensator

Jerry Miculek's three-chamber AR-15 Compensator fits threaded-barrel rifles and may be "clocked" for left- or right-handed shooters. Used by many top 3-gun competitors.

Top 10 Dillon Holiday Gift Ideas *Continued From Page 33*

High/Low/Average Velocity, extreme spread, multiple skyscreen distance selection, velocities ranging from 50 fps to 5,000 fps, voice chip technology, PC interface and 9 Volt battery operation. Includes Skyscreen Sensors, Diffuser Screens, and a 2' foldable (tripod threaded) Mounting Bracket. Price \$199.00

6. C-More Railway Sight – C-More makes world-class sights that world champions rely on. All C-More sights feature a “Heads-Up Display” for an uncluttered, limitless field of view. This C-More Railway Sight quickly attaches to Weaver and Picatinny rail-style scope mounts enabling it to attach to virtually anything. The sight makes a great gift because it can easily detach and install on shotguns, rifles, pistols, revolvers, crossbows and paintball guns. This model comes with an 8 MOA dot module and uses a positive locking screw to secure windage and elevation settings. Price \$279.00

7. RT 1500 Trimmer – The RT 1500 Electric Case Trimmer is designed to handle the heaviest trimming jobs, including converting .223 Remington into .300 AAC Blackout. The RT 1500 makes short work out of trimming large quantities of brass. Use it just like a standard size die. The big benefit with this device is that while you are pushing the case into the die, a 1/4 horsepower electric motor is driving a carbide cutter and trimming the case to length! And here's the merriest part of all: our RT 1500 Trimmer works on any standard reloader, both single stage and progressive. Price \$337.95

8. Dillon HP1 Electronic Hearing Protector – Here's a gift that every shooter wants and needs: the Dillon HP1 Electronic Hearing Protector blocks out loud/harmful noise while amplifying weak sounds. During loud noises, our HP1 maintains a comfortable level of sound transmission. Our electronic headset features a protection rating of NRR 21, true stereophonic sound, and separate volume controls for each ear. This headset is also very comfortable to wear and folds for easy storage. We offer these in Dillon Blue or black with a one-year warranty. You'll protect someone's priceless hearing and look like a gift guru in the process! Price \$135.00

9. C-More RTS2R Micro Dot Sight w/Rail Mount – Here's one for the serious shooter on your list: The RTS2 C-More Sight is a proven competitor, winning the IPSC World Championship, USPSA National Championship and many more large competitions. The heads-up display provides an unobstructed sight picture where the red dot hovers over the intended point of impact on the target, and creates the fastest target acquisition in existence. The sight uses a removable

battery tray, eliminating the need to re-zero when replacing the CR2032 battery. A 10-position button switch provides precision intensity adjustment, previous intensity return and auto-off after 8 hours of inactivity. Features a compact design, 6 MOA dot and sight cover. Price \$419.00.

10. Dillon SS-600 Primer Pocket Swager – We thought about putting this popular item at the top of our list but decided to save it for last. If your gift recipient reuses military brass, you'll get the “Best Gift-Giver” title by wrapping up our Dillon Super Swage 600 Primer Pocket Swager. Until now, reusing military brass with the crimped primer pockets has been a tedious task. This Dillon solution is a remarkably simple device that bolts to your bench and swages the primer pockets with speed and ease. Your gift recipient will get perfect alignment every time and you won't have to spend a fortune. This handy device comes with large and small swage rods, .22 and .30 caliber back-up rods, and a .45 ACP adapter. Other calibers are available. Price \$109.95

| 1911 Smart Mat | P65-29040 | 14.99 |
| Handgun Smart Mat | P65-29042 | 14.99 |

The Master Bench Block™ is most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

P65-29033 \$29.99

This advanced kit includes every standard and roll pin punch needed to build or work on an AR15.

P65-29032 \$39.99

The Lug-Lok™ Upper Vise block utilizes the strength of barrel lugs to safely secure AR15 upper receivers while you work, rendering clamp-style blocks obsolete.

P65-29035 \$79.99

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

P65-29034 \$9.99

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

P65-29039 \$29.99

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm.

Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

P65-29036 \$9.99

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

P65-29037 \$9.99

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

P65-29038 \$12.99

Swab-its A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that "whisky-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	P65-15310	\$4.98
.243/6mm (6 ea.)	P65-15311	4.98

Gun-tips® Extended Reach Firearm Cleaning Swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

P65-12583 \$9.99

Bore-Whips™ .17 and .22 caliber (*pictured*) by Swab-its® are ideal for air rifles, rim-fires or any other .17 or .22 caliber firearm that's difficult to clean from the breach. The foam tips are reusable and the handle functions as an empty chamber indicator.

.17 Cal.	P65-12689	\$9.99
.22 Cal. (<i>Pictured</i>)	P65-12690	9.99

Star Chamber Cleaning Foam Swabs™ are for AR-15, M4 and similar MSRs. 3-pack

P65-10056 \$13.99

The **Swab-its® Handgun Cleaning Kit** for 9mm/.357 caliber handguns contains four Bore-Sticks™, a three-in-one tool that replaces the cleaning rod, jag, and patch; a nine-piece Multi-Surface Gun-Tips® package for internal and external cleaning requirements; and a 0.4 ounce bottle of **BREAKTHROUGH®** Battle Born HP Pro lubricant and protectant. As with all Swab-its products, the Bore-Sticks and Gun-Tips are made of reusable, lint-free foam that is washable with degreasing soap and water or mineral spirits.

P65-11907 \$19.95

NEW!

BALLISTOL

SINCE 1904

Multi-Purpose

**LUBRICATES • PENETRATES
CLEANS • PROTECTS • PRESERVES**

**FIREARMS • LEATHER • KNIVES • TOOLS
LOCKS • MARINE • WOOD • METAL • RUBBER**

The world's most useful & environmentally friendly lubricant!

Eco Friendly • Skin Safe • No Carcinogens

For more than 100 years, consumers have trusted Ballistol to lubricate, penetrate, clean, protect, and preserve their firearms, leather gear, wood, metal surfaces, and more. With an astonishingly wide range of applications, this environmentally friendly multi-purpose oil has become an essential tool for shooters, hunters, fishermen, and handymen all over the world.

1.5 oz. Aerosol Can	P65-30147	\$4.95
6 oz. Aerosol Can (<i>pictured</i>)	P65-30145	9.95
16 fl. oz. Non-aerosol Can	P65-30146	19.95

The **HYSKORE Degreaser** consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. The set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreaser (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.

Blue Press 65

Slip 2000 Products

725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P65-19237 \$21.99

Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P65-19234 \$21.99

Slip 2000's Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P65-11652 \$25.99

Slip 2000's AR Cleaning System contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P65-11676 \$19.99

Slip 2000 Extreme Weapons Lubricant (EWL)

was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P65-11644 \$18.99

Slip 2000 EWL30 has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P65-11645 \$18.99

Slip 2000 Copper Cutter

is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P65-11646 \$11.99

Each Slip 2000 Gun Wipe

packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P65-11674 \$14.99

MIL-COMM Extreme Performance Lubricants

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe
1.5 Ounces

P65-15732 \$10.99
P65-15731 14.50

Sweet's 7.62

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

P65-13128 \$12.95

Brian Enos' Far Superior Slide-Glide

is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard
Slide-Glide Lite

Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The **Lyman X-Block** is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

P65-11390 \$15.95

Blue Press 69

The 2019 Hand-Sized Pistol Championship

By Duane Thomas

Photos by Robin Taylor (taylorfreelance.com)

The Hand-Sized Pistol Championship has become one of my favorite, and most anticipated, matches of the year. It's run under the auspices, and rules, of Action Shooting International (asi-org.com), which is a sport, intended to provide a low-stress, low-intimidation-factor gateway into the "action" shooting sports for new shooters.

The Hand-Sized match is geared toward "the sorts of guns real people really carry." Okay, I'm a real person, and I really carry a GLOCK 17 most of the time, but I get where they're coming from. Therefore autopistols in this match are limited to barrels 3.5" or shorter; for revolvers it's 3" or shorter. You're allowed to start each stage with six rounds max in the gun and each spare ammunition loading device, though stages are intended to be 5-round-capacity friendly, should some hardy soul want to shoot it with a Smith J-frame .38 or equivalent. And I did see some people doing that, out at the match.

Match attendees are divided into either "Hand-Sized" or "ASI" divisions, the latter being for any gun that exceeds the Hand-Sized barrel length rule. If you want to shoot the Hand-Sized match with a non-Hand-Sized gun you can – last year I shot it with my carry gun at the time, a Wilson EDC X9 – your score just doesn't count for final match placement, only Hand-Sized guns do. For instance, last year I would have come in 5th had my EDC X9 been a legal Hand-Sized Pistol, but alas, its 4" barrel had that evil extra half-inch that makes ALL the difference in concealability.

I know I said ASI matches are supposed to be easy, low-intimidation factor affairs, but let's not kid ourselves, this is meant to be a championship. Therefore the stages were a bit more challenging than what you might find at the typical ASI match. Specifically, shortly

into the match I was joking, “They should be calling this the Head-Shot Pistol Championship instead of Hand-Sized.” There were a LOT of head shots required at this match. Of the eight match stages, only two, if memory serves, did not require multiple head shots, either through having everything below the head blacked-out “hard cover,” or with a strip of tape separating the head box and torso into two different targets to be engaged. If you couldn’t shoot accurately enough to make head shots, you were going to have a HARD time at this match.

I would like to report that I absolutely slaughtered this match; however that’s not true. On the other hand, the match didn’t slaughter me either. The first stage I shot (called, I kid you not, “John Wick”), the very first target array was two targets partially covered by a no-shoot in the middle. The rightmost target in particular had a lot of its surface covered by the no-shoot, and was also taped-up into two different “targets,” each of which required two shots per. Long story short, I missed one of the head shots. That’s a five second penalty, right there. In one sense, that’s saddening because you know, right off the bat, there’s no way you can win. In another sense, it’s very freeing because after that there’s no pressure, you can just shoot the match for fun, and see if you can build yourself back up to at least finish decently.

Of 81 match attendees, I finished eighth. I have laughed over the years at people who like saying, “You know, if I hadn’t done [fill-in-the-blank screw-up] I would have finished [fill in the blank placement].” My response has always been, “So, what you’re saying is, if you’d shot better you would have scored better? Yeah, that follows.” Not without a certain amount of self-amusement, I must report I could not help myself checking and discovering that, had I not dropped that

one head shot, I would have come in fifth instead of eighth. Hoist on my own petard!

Compared to a typical pistol match, there were a lot of women at this one. ASI has always attracted more women than other shooting sports, in my experience. One in six people at this match was a woman. Compared to the typical match, even the typical championship, that’s a huge ratio.

Last year I wanted to shoot the Hand-Sized Pistol Championship with a GLOCK 42 .380, but I was having ignition and feed reliability issues. Since then I’ve gotten that all sorted-out and did, in fact, shoot the match this year with my G42. It worked flawlessly. The one niggling issue, still, was that I do have a tendency, the way I grip the gun, to ride my thumb on top of the slide stop, preventing the action from locking open when empty. If I’m thinking about it, I can lift my right thumb while shooting, and the slide will lock back when it should. If I don’t, it doesn’t, and on a couple of stages that did bite me. I knew this was going to happen, going in. There’s a reason I carry the GLOCK 42 as my backup gun instead of my primary.

In all, this Hand-Sized Pistol Championship was another huge success. You can tell; you can feel the vibe of the match while you’re shooting it. Are people happy and chatting, or do they seem frustrated and angry? This match was very much a happy experience for the people shooting it. I’m already looking forward to next year. Now that I’ve got that whole “Shoot the Hand-Sized Pistol Championship with my backup gun” thing out of my system, I think I’m going to build-up a GLOCK 26 for the next one. That seems to be the gun to have at this match, the largest, most capable piece that’s still legal under Hand-Sized Pistol Championship rules.

Fake News?

The Media's Evil Narrative Is Worse

By Alan Korwin

When a wonderful little publication like this one, *The Blue Press*, can outperform the vaunted *New York Times*, you know "something is rotten in the state of the nation," to mangle Marcellus' famous quote in Shakespeare's "Hamlet."

You see, the *Times* with its overall approach has done more to destroy fundamental rights, and Dillon's has done more to protect them, than you can reasonably measure. The Gray Lady, as that publication likes to be known, literally promotes mass murderers, while *The Blue Press* does so much needed to stop those vile aberrations of modern society. We never used to have these vermin and their dirty work in our midst. How did the *Times* help put them there?

Not alone, that's for sure. With help from many of her (yes, "her") allies, she had a role in helping create this phenomenon. You see, mass media is on a bender to elevate evil and hide heroism. Every day, so-called "news" papers and other "news" media suppress stories about heroes who use products like the ones advertised in publications like this. Personal defense, healthy shooting sports and pursuing our American Way is not to be shown to the public. The same way they suppress stories naming victims of child abuse, or rape victims, it's just business as usual. They know how to withhold information.

The big ethics dilemma in a recent Society of Professional Journalists study was:

Should children who are thought to be the victims of sexual abuse ever be named in the media? What should be done about the continued use of names of kidnap victims who are

later found to be sexual assault victims?

Should use of their names be discontinued at that point?

You see, they debate what they should run and what they should hide. They've held this discussion over rape victims, showing the dead, naming minors, suicide contagion, national security like troop movements, invasion of privacy, personal financial data, it's a long list. But promoting serial killers? "We need better color pictures!" Self defense? "Not in this paper!"

They understand these issues. Despite millions of defensive gun uses annually, you only see criminals using guns, and the villains get promoted in name and image until they're cultural icons. *The Washington Post*, Associated Press, *New York Times*, TV networks and the rest hype and glorify spree murderers, encouraging more to explode.

How do we know? Easy. The misfits tell us. They want press, and to outdo each other. They tell us in their suicide notes, their online and printed rants, their phone chats, their Facebook tell-all bios. Police know it, psychiatrists and the medical community knows it, even the public knows it, because mass

media promotes it with all their hearts and soul.

What isn't so well known are all the crimes and murderers who are stopped cold by people who buy products in publications like *The Blue Press*. That's because, as the AP once told me to my face, they won't run stories about people who saved their lives with gunfire – because that might encourage copy cats! They show no concern – in fact the opposite – for copycats they create by putting murderers in full color on page one, for weeks on end. Adding fuel to the fire, those names and images run incessantly,

The AP once told me to my face, they won't run stories about people who saved their lives with gunfire — because that might encourage copy cats!

years later for emphasis, whenever another incident occurs. Tell me how that's "news." It's not. It's instigation. They instigate conflagration.

You see, promoting criminals serves a dark and nefarious purpose for twisted minds at journalism centers. It vilifies the Second Amendment and gun ownership, which those "journalists" want to do. It helps advance destructive political agendas for operatives seeking to disarm and destroy America – the socialists (now totally out of the closet), and communists (still in hiding but just barely) and assorted totalitarians who would ruin this great land. People of dishonorable intent who would replace an armed, enabled and proud people with a cowed public under the iron thumb of autocratic rulers with plenty of guns, which you would no longer keep or bear.

For centuries you've joyfully and righteously owned arms, creating the balance of power our Founders wanted, keeping us free. Now, motivated by a handful of prescription-psychotropic-drug-addled, suicidal, sociopathic monsters, some useful idiots and their handlers are coming for your guns, with law, fear and misinformation. By inspiring evil, mass media misguides our countrymen against your self-interest and their own.

Jews for the Preservation of Firearms Ownership (jpfo.org) has an official campaign to fight it, The Don't Inspire Evil Initiative:

"Refrain from gratuitous or repetitious portrayal of mass murderers' names and images."

The goal is to convince corporations and media players themselves to complain about insensitive incessant "coverage" of criminal perpetrators that does nothing but glorify the perps and motivate new ones.

No Notoriety (nonotoriety.com) is a left-leaning effort to do the same, because they don't want their schoolkids slaughtered either. From the No Notoriety website:

"In an effort to reduce future tragedies, we CHALLENGE THE MEDIA – calling for RESPONSIBLE MEDIA COVERAGE FOR THE SAKE OF PUBLIC SAFETY when reporting on individuals who commit or attempt acts of rampage mass violence thereby depriving violent like minded individuals the media celebrity and media spotlight they so crave."

But while *The Blue Press* outperforms the *New York Times*, with just slightly less than one-third the circulation (per issue), it's an uphill climb. All those talking heads talking trash against us – they're wrong. Guns are good. Guns save lives, guns stop crime, guns protect you. Guns...are fun! And guns are why America is still free. That, the true narrative, is suppressed.

Award-winning author Alan Korwin has written 14 books, 10 of them on gun law, and has advocated for gun rights for nearly three decades. See his work or reach him at GunLaws.com.

Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	P65-25374	\$79.99
Scout Scope Mount for SKS Rifle	P65-25373	78.99

LabRadar Saves the Day

By Robert Jordan

Almost 15 years ago I began reviewing firearms for different gun magazines. I needed a chronograph and I wanted the best they made: the Oehler 35P. I found a used one, bought it, and went to work. When I bought it, I was told that it wasn't a matter of IF I would shoot the chrono, but a matter of WHEN. I scoffed. I describe myself as borderline obsessive compulsive, but my wife says there is no borderline about it. I swore I would never shoot my chronograph.

Then in 2014, while testing a Kriss .45 with a HUGE mechanical offset between the barrel and the sights on a range with an uphill slope, I knew it was tight. I nailed my last screen base and it exploded into pieces. I exploded into an adolescent fit that would have made Lou Ferrigno green with envy. Thankfully Oehler sells replacement parts at reasonable rates.

Fast-forward five years. I recently found myself on the range testing a firearm using my trusty Oehler 35P. I was in a hurry and shooting a 9mm carbine on new range. I dropped the Oehler 35P stands as low as they would go and the shooting stand as high as it would go. And I nailed the last screen base again. I then called my family physician and told her the amount of Prozac she had me on was not nearly sufficient.

The Oehler was down, but I still needed accurate velocities for my review. I had a loaner Doppler Radar called a LabRadar with me that I had never used but is supposed to be simpler and more accurate. I set up the LabRadar, fired my pistol-caliber carbine and nothing registered. Then again. And again I was furious. I checked the directions. The directions said to put the unit 6 inches away from the muzzle. My idea of 6 inches was closer to 18 because I didn't want to blast the machine. I moved it closer and *voila*, it worked. It worked well. And it had a lot more information than any normal chronograph. It told me the velocity at the muzzle, at 10 yards, 20 yards, 30 yards, and so on down the line. I had no idea velocity dropped off so quick. Before long, I was less interested in my gun review and more interested in the LabRadar. Somebody up above was looking out for me.

After that, LabRadar became my "go-to" for velocities. Setup literally takes about 60 seconds. A regular chronograph takes me 15 minutes and a lot of walking back and forth from the gun to the screens. Also, if I shoot in a public range, I don't have to wait for a cease fire to go down range and make adjustments. The orange box sits right next to my gun on the shooting

LabRadar has become my “go-to” for velocities. Setup literally takes about 60 seconds. A regular chronograph takes me 15 minutes and a lot of walking back and forth from the gun to the screens. Also, if I shoot in a public range, I don’t have to wait for a cease fire to go down range and make adjustments. The orange box sits right next to my gun on the shooting bench.

bench, The LabRadar does have a learning curve, but once you use it for 15 minutes, it is really easy. You do have to pay attention to proper muzzle placement, but through trial and error, and reading the manual, I have gotten it to work well with every gun, including suppressed pistols and carbines. It is nowhere near as finicky as a chronograph. The manual shows pictures of proper setup based on the type of weapon. I make a new “session” for each new type of ammo and keep a list of which session goes with which ammo/gun. When I am done, I go home, pop out the SD card, and pull up each session on my laptop. But they also have a smart phone app and I can control and record everything on my phone.

Back home at my laptop, an Excel spreadsheet shows me the exact velocities at the distances that I picked. It shows the date, the time of each shot, number of shots, average velocity, the high, the low, the mean, the spread, the power factor (for you competitors) and it also shows kinetic (ft/lbs) of energy at each distance. Need to know if your 9mm subsonic hand-load still has enough oomph remaining to be effective at 60 yards? Its got that. You can set everything in metric or standard, and it all stays the same for each session, unless you change it. The only thing I typically

change while testing is the bullet weight, and that is quick and easy.

So I have determined that I like the set-up better, I like the information gathered better, but is it really more accurate than a traditional chronograph? I spoke with fellow Kansan Richard Mouser, the exclusive distributor for LabRadar at SHOT Show this year. He gave me the back story of LabRadar and how it was first introduced at SHOT Show 2014 when there were only two working prototypes. Since then, production has been worked out, but the basics are the same as 2014. Doppler radar is so accurate that it is used by chronograph companies to test their equipment. Doppler is the gold standard with +/-0.1% accuracy.

And just like that, I have a used chronograph for sale. The LabRadar even goes to the range with me when I am not testing guns for articles. It is that easy to use and has become that indispensable. Now if you will excuse me, I am off to the range to find out the difference in kinetic energy between my old .300 Win. Mag. and my new 6.5 Creedmoor as I decide which I will be taking elk hunting this year.

Blue Press 77

Smith & Wesson's Model 586:

By Clayton Walker

Gun owners are a cagey bunch. Ask them to pick their favorite gun, and most will hem and haw unless they're able to create their own litany of separate categories. Like, "Favorite American-made rifle of World War II that was chambered in .30-06." Force a gun person to pick just one favorite – hell, even five favorites, and you'll learn what a sentimental bunch we truly are.

Lest you think I'm an outlier, I had to approach the "favorite" question in a different way before I felt comfortable even approaching an answer. Eventually, I asked myself and others this: "If a hurricane came and blew away all of your guns, what's the first one you'd go out and replace?"

For me, that question had a very clear answer: my Smith & Wesson 586. It's a serious gun and a fun gun, neither too light nor too heavy, comforting and comfortable, and a gun that will put a smile on the face of the newcomer and the expert alike. It's stunning what this revolver does and does well.

First, the serious stuff for serious dudes. Very few pistoleros would feel under-gunned with a .357 Magnum. A frighteningly effective stopper by several metrics, there's a bewildering variety of ballistic options in the form of high-quality components and superb factory-

loaded JHP ammo. True, concerns of ammunition capacity resulted in police departments moving from revolvers to autoloading pistols, but the efficacy of the .357 was never in question. As a nightstand gun, let's say, the 586 gives you six decisive answers (at a minimum, assuming a reload isn't close at hand) to any threat that materializes.

The 586 also works wonders on a variety of critters. For those wanting a handgun capable of humanely taking whitetail deer, or for dispatching pests like feral hogs, the .357 Magnum cartridge has a pedigree of being a reliable performer with good shot placement and the right bullets. When the revolver is stoked with suitable .38 Special loads, it becomes a superb choice for hunting small game. Make no mistake: the 586 is definitely capable of putting meat on the table or ruining a predator's day if the shooter is willing and able.

For these more serious applications, the design of the 586 makes it a superlative choice. Thanks to its medium frame and full underlug (making it very reminiscent of Colt's legendary Python), the 586 is manageable with even screaming-hot .357 loads, as the extra weight out front does a remarkable job of taming recoil. That's a plus whether you're chasing faster shot-to-shot times or whether you simply want to save the wear and tear on your joints.

My Best Answer (so far) to the One-Gun Conundrum

From left to right, the bullets I had on hand: 105 Gr. TC, 125 Gr. RNFP, 125 Gr. JRN, 148 Gr. DEWC, 148 Gr. BBWC, and 158 Gr. SWCs in plated and coated varieties.

Now, while this gun is immensely comforting as a serious tool, it is also fun, fun, fun. Through multiple thousands of rounds, this gun has chewed the center out of bullseyes, turned tennis balls into fluff, and given hell to any steel plates unlucky enough to be 100 yards from the firing line. The L-frames are superbly good shooters, and what little I lose in handiness with my 6" barrel, I gain in practical accuracy. The gun hangs on target and the longer sight radius offers excellent precision even when I'm just a teensy bit imperfect with my alignment.

Feed it whatever, and it'll probably shoot great. But for the experienced target shooter and reloader, the 586 reaches a higher plane of being. According to the reloading manuals I have within reach, the bullets available for .38/.357 have a variation of an amazing 125 grains. From diminutive 75-grain wadcutters to big-for-caliber 200-grain lead flat point ammo, there's a lot to play with. Fast pistol powders like Bullseye and Red Dot play nice with wadcutters seated deep in a .38 Special case, and comparatively slower burners like Unique and H110 are great building blocks for high-performance magnum rounds.

Personally, I think a lot of my love for the 586 is because it's a gun that turns novices into enthusiasts and intermediates into experts. Most brand new, never-been-shooting-before guys and gals are gobs-macked by how well they can shoot into 7-yard "A-zones" with .38s delivered via single action. The reloader will quickly find a variety of low-recoil loads that make this task even easier and less stressful for an absolute novice. With the buck and snort of shooting at a minimum, and before bad habits have a chance to develop; it's stunning to see how well beginners can pick this activity up if given even a modicum of competent instruction. It's also a great feeling to watch them get good hits with what to them looks and feels like a "real gun."

I also credit the 586's slick double action to seriously improving my shooting. While the L-frame's

The owner of a .357 Magnum revolver will find a stupefying variety of components and factory-loaded ammo to play with.

DA trigger is perfectly fine from the factory, the smoothing provided by thousands of pulls and a good set of springs from Wolff Gunsprings or Wilson Combat will make it downright buttery. It's great fun to kick things into "expert mode" and force yourself to really focus on the slow and steady pull of the trigger until you get a surprise break. Shooting double action quickly teaches you that if you mash to get your shot off, you will miss.

Seasoned shootists will probably point out that most of these benefits could be attributed to many .357 Magnum revolvers, not just the 586. But to speak to the Smith's largest competitors: Rugers tend to be perfectly serviceable and accurate, but I think they're a bit less refined. And, while do I own vintage Colts (yes, even the Python), I'm increasingly wary of shooting them with ass-kicking loads, given that each successive year reduces the number of spare parts and knowledgeable gunsmiths available who know how to work on the designs.

Even among Smiths, the 586 remains my favorite, as the N-frames (i.e., the Model 27) are too big for my hands, and the Model 19 was built only to digest a limited amount of .357 Magnum rounds. As with all S&W revolvers, the supply of factory replacement and after-market parts for the L-frame (including grip options) is virtually unlimited.

Are there limitations? Sure. My 6" 586 would probably not be a good choice for an officer who needs to carry it on his or her belt all day long, a hunter deep in Grizzly territory, or the go-to gun to train one's youngest and smallest family member if stoked with 180-grain bullets over magnum-level powder charges.

That said, if you can abide the weight of the revolver and only six rounds in the chamber to work with before a reload, I can think of no handgun that checks so many boxes in the fun and functional categories. It's true that there's no one "best gun," but in my book the 586 gets pretty damn close. If you don't have one, the purchase warrants serious thought.

101 Classic Firearms

John Marshall's book *101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development*, is a compilation of the author's popular articles appearing in *The Blue Press* since 2007. *101 Classic Firearms* is sure to be a prized addition to the library of any serious firearms enthusiast. Published by Dillon Precision, and printed and bound in the USA, *101 Classic Firearms* is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on some of the world's most important firearms. *About the Author:* John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. John is also an endowment member of the National Rifle Association.

Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

Econo-IFAK (at right in photo) **P65-43379 \$15.00**
 Micro Kit #2 (at left in photo) **P65-43378 30.00**

kershaw

TRUST YOURSELF. TRUST YOUR TOOLS. BE READY FOR EVERYTHING.

From clearing brush to making kindling, the Camp 10 is the ideal outdoor and survival tool. Cut, slash, hack, split, scrape – just about any task you ask of it, the Camp 10 can handle. The full-tang Camp 10 is made of carbon tool steel for toughness and wear resistance. A basic black powdercoat protects the steel and makes maintenance easier. You'll like the secure, contoured grip of the Camp 10, too. The handle has a built-in hand guard and is drilled in both front and rear so you can attach a lanyard either place – or both – for carrying versatility.

Blade length: 10" Overall Length 16" Weight, with Sheath 1 lb. 8 oz.
P65-55012 \$80.99

Military knives have a lot of history and a lot of fans. Yet they tend to be bulky for everyday carrying and use. Kershaw and custom knifemaker Les George offer a solution by taking inspiration from a U.S. World War II knife design and turning it into the XCOM folder.

Blade length: 3.6" Closed: 4.4" Open: 8"
P65-55009 \$49.99

The Kershaw Faultline is the one you add to your truck box, toss in your go-bag, or slip into the pocket of your tactical pants. Everything about it says, "practical, reliable, and sturdy." Made of quality 8Cr13MoV stainless steel.

Blade length: 3" Closed: 4" Open: 7"
P65-55011 \$46.99

Designed by Dmitry Sinkevich, the Atmos features Sinkevich's characteristic clean and practical design – but enhanced with extra detailing. In addition to the chamfered carbon-fiber, it also has a custom oversized pivot, a backspacer with wide lanyard attachment, and a reversible, deep-carry pocketclip.

Blade length: 3" Closed: 4" Open: 6.9"
P65-55010 \$57.99

The Kershaw Method opens quickly, easily, and manually with Kershaw's KVT ball-bearing system and a built-in flipper. The handle is black – of course. The G10 handle features an unusual machined pattern reminiscent of an architectural truss.

Blade length: 3" Closed: 4.25" Open: 7.25"
P65-66700 \$39.99

Designed by RJ Martin, the Volt II has the same versatile blade and handle style as the original Volt, but with a hardworking 8Cr13MoV stainless steel blade and textured, black glass-filled nylon scales.

Blade length: 3.25" Closed: 3.9" Open: 7.1"
P65-66699 \$49.95

Kershaw Volt II opens one-handed and with an authoritative "twack" thanks to Kershaw's SpeedSafe® assisted opening system. A simple pull back on the flipper and the Volt II opens smoothly and easily.

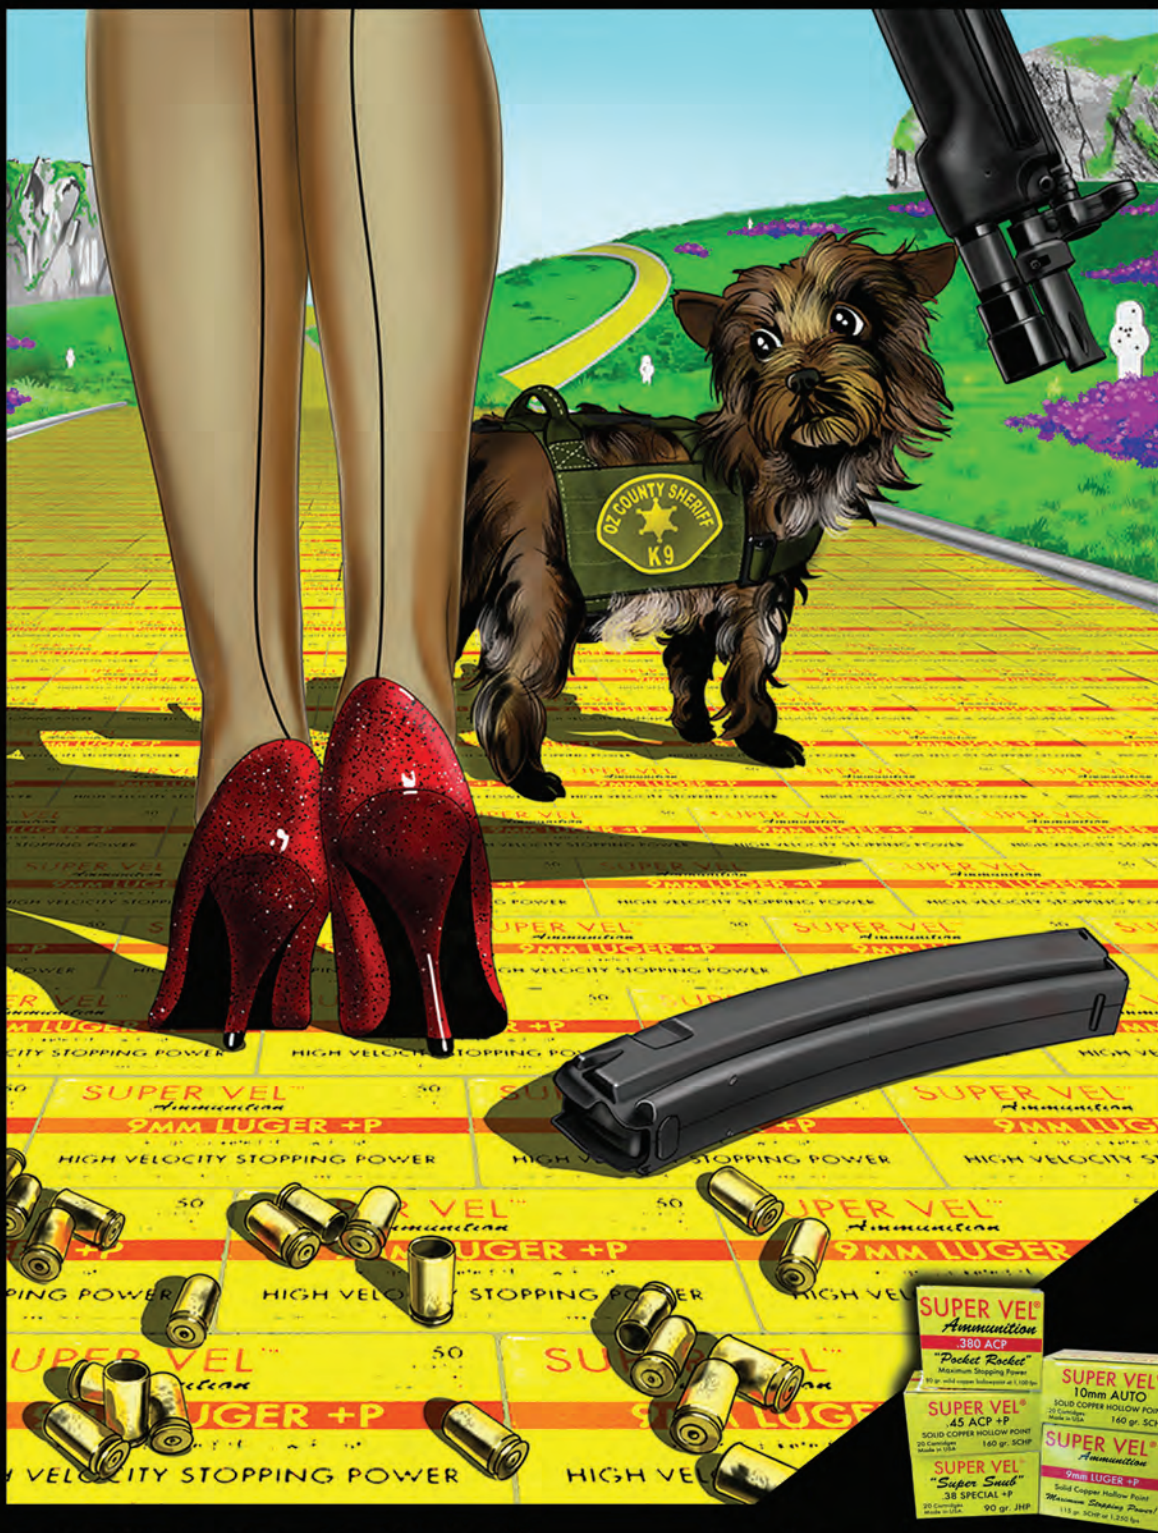

Blade length: 3.25" Closed: 3.9" Open: 7.1"
P65-66698 \$55.95
