# er XL 650 Package

**You've made the decision that loading your own ammunition is right for you. You're ready to pull the trigger, but uncertain of exactly what you need. Dillon has taken the work out of this. We have assembled a New-Reloader Package, featuring our most popular reloader, the XL650, with the most popular machine options, along with the accessories you'll need to begin reloading immediately. This package is available in 9mm, .223/5.56mm, or BOTH.**

## 9mm 650 Package Includes:

XL 650 in 9mm  
9mm Die Set  
Bench Wrench  
Small Pistol Casefeeder  
650 Strong Mount  
Bullet Tray Kit  
Roller Handle  
9mm Case Gage  
D-Terminator Digital Scale  
Primer Flip Tray  
4 Small Primer Pickup Tubes  
Digital Calipers  
*The Complete Reloading Manual for the 9mm Luger*  
**Total: \$1331.35**

## .223/5.56mm 650 Package Includes:

XL 650 in .223/5.56mm  
.223/5.56 Die Set  
Bench Wrench  
Small Rifle Casefeeder  
650 Strong Mount  
Bullet Tray Kit  
Roller Handle  
.223/5.56 Case Gage  
Dillon Case Lube  
D-Terminator Digital Scale  
Primer Flip Tray  
4 Small Primer Pickup Tubes  
Digital Calipers  
*The Complete Reloading Manual for the .223 Rem.*  
**Total: \$1363.30**

## Combo Package (.223/5.56 Conversion Pictured at Right) Includes the 9mm Package Above, Plus:

.223/5.56 Conversion Kit  
.223/5.56 Die Set  
XL 650 Quick Change  
.223 Case Gage  
Dillon Case Lube  
Small Rifle Casefeed Plate  
*The Complete Reloading Manual for the .223 Rem.*  
**Total w/9mm Pkg.: \$1704.50**

As a token of our appreciation for new reloaders who purchase one of these packages – while supplies last – we're going to include one of these **Tactical Tailor** Operator Caps and our Dillon Precision morale patch. The Tactical Tailor cap is an incredible value: a high-quality product that's made in...wait for it...the USA, by a company that prides itself on hiring veterans. The hat in the photo is MY hat, and I've lost track of how many times it's been washed – IN the washing machine! It STILL looks great! If you're the kind of person who not only wears hats, but also WEARS THEM OUT, you're going to love this hat.

**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

# We READ Our Mail!

To whomever it may concern: This is just a short note to thank you for the service I have received from Dillon. I'm not sure how old my 550 machines are, but I've been shooting cowboy action since 1998 and I've had them before that. I reload for myself and my two sons, so several thousand plus rounds have been reloaded. Thanks again for your excellent no-cost service and pleasant personnel.

Ted Linn – South Whitley, IN

Dillon, you've done it again! I just called your tech, Dave [Smiley], due to a primer-feed issue. Not only did he help me diagnose the problem, but he sent me the replacement parts free of charge! I've had my RL 550B since the mid 1980s and have had very few problems. But every time I have an issue, you are right there and never charge a thing. You stand behind your products like no other company. You're still the best after all these years and that's why I recommend only you to my friends. You even ship to "occupied territory." Thanks again for your magnificent service and for caring about your customers.

Rich [Note: Rich gave no last name or address, probably because he's in occupied territory.]

Many thanks for the timely manner in shipping our Grace USA Gun Care Tool Set! [See Page 53.] Upon opening the case, we could immediately see the quality of craftsmanship that Grace USA puts into their products. Having all components made in the USA is important to my husband and me, especially since we are strong supporters of the Second Amendment.

Shelly W. Gant – Danvers, IL

Okay, I don't know whose fault it is, but somebody at Dillon is responsible for sending me everything that I needed to fix my powder measure. In fact, they sent me a whole complete powder measure unit. And this isn't the first time! Every time I have called crying about some problem (usually my fault) with one of my Dillon reloaders, they have always explained or talked me through the problem and sent me the parts that I need. I personally think there is a conspiracy at Dillon by the whole company to keep everybody's machines running perfectly.

Bill Ruhland – Battle Lake, MN  
Guilty as charged, Bill!

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

## Nighthawk's Mongoose

### Expensive, but Fine Craftsmanship is not Cheap

By Doug Larson

If you admire German engineering, attention to detail and fine craftsmanship, you may be interested in Korth revolvers which, in conjunction with Nighthawk Custom ([nighthawkcustom.com](http://nighthawkcustom.com)), are being brought into the United States. Let's get this out of the way up front: These guns are expensive and are not for everyone. But for those who have the money or are willing to save until they do, these revolvers may just be the way to satisfy a desire for the best. And even for those who would never spend the thousands of dollars to buy one, these guns have some features of interest.

Korth of Ratzeburg, Germany has been making high quality firearms that are sold worldwide for decades even though many shooters have never heard of the company. Nighthawk Custom of Berryville, Arkansas, on the other hand, has been around for much less time and is primarily known for producing custom 1911s along with other quality custom firearms. The two companies have recently joined forces to offer Korth revolvers to US customers.

Korth puts it this way. "Korth will refuse to use any material or manufacturing method which will result in an inferior product. For the customer, this means selected materials, specially engineered designs, the highest standard of workmanship, a perfect finish, and stringent inspections and quality controls." All major parts are machined from drop forgings and then surfaced hardened to 60 Rockwell C. There are about 600 operations performed in the manufacture of a Korth revolver and only about 30 percent are done by machine.

The rest are done by hand. That makes for extremely tight tolerances and a high quality, although expensive, gun.

Nighthawk takes pride in producing guns that are not made on an assembly line, but instead are made by one gunsmith from start to finish. That instills pride of workmanship in each gun, so Nighthawk and Korth have similar manufacturing philosophies. It seems natural that the two should work together.

Although the revolvers are made in Germany, test fired there and shipped to Nighthawk fully ready for market, when received by Nighthawk, the guns are thoroughly inspected and test fired again as a double check on accuracy and quality. Nighthawk's gunsmiths could make Korth revolvers themselves, but combining the efforts of the two companies assures a top-quality product.

Nighthawk offers three models of Korth revolvers. The Sky Hawk chambered in 9mm Luger starts at \$1,699. It has a short, snubby 2-inch barrel. Then there is the .357 Magnum Mongoose which is reviewed here, available with barrel lengths of 3, 4, 5.25 and 6 inches, and with a retail price starting at \$3,499. Last is the Super Sport chambered in .357 Magnum with a 6-inch barrel. It's a competition gun with many special features including rails on the top and both sides of the barrel. The rear sight is fully adjustable for windage and elevation, but is also adjustable for the width of the rear notch. Additionally, the Super Sport has four preset elevation settings and comes with a 9mm Luger cylinder. You get a lot with this gun, but it's pricey, starting at \$4,799.

The Sky Hawk and the Super Sport have a lot in common with the Mongoose, which could be used for competition or self-defense. Probably the most interesting characteristic of the Mongoose is the trigger and how it can be adjusted. From the factory, it is set for about 3 pounds, and the test gun's trigger, according to a Lyman electronic gauge, broke at 3 pounds 5.2 ounces in single action. The break was clean and crisp and there was no overtravel or take-up. And the double-action pull was exceptionally nice, rivaling any custom trigger job. The pull weight was 8 pounds 14 ounces as measured using a spring gauge. There was barely discernible stacking, an extremely smooth pull and a sudden break.

Staging the test gun's double-action trigger before let off was nearly impossible because it was so smooth, but most shooters like the double action pull the way it comes from the factory anyway. However, for those who desire a staging point, the gun can be set up to provide one. Korth and Nighthawk offer a variety of what are called trigger wheels that can be changed to alter the trigger pull, and one wheel allows the introduction of a staging point so the shooter can pause the trigger just prior to let off for the purpose of refining the sight picture. Changing the wheel should be done only by a qualified gunsmith or armorer though, and of course, Nighthawk can take care of that.

The user can adjust the mainspring or hammer spring by removing the grip and turning a

screw. The trigger return spring can also be adjusted, but changing anything with this trigger seems totally unnecessary. The factory trigger pull is that good.

Another very interesting feature of the Mongoose is the optional extra 9mm Luger cylinder, which must be fitted to the gun and timed. If one is wanted, it is best ordered when the gun is new, before it is shipped, so that the revolver does not need to be returned to Nighthawk for fitting. As mentioned earlier, the Mongoose is chambered in .357 Magnum but, as most readers know, .38 Special cartridges can be fired in a .357 Magnum revolver. With the extra cylinder, three different cartridges can be fired, and the least expensive and lowest recoiling can be used for practice.

Changing cylinders takes less than five seconds. Just swing the cylinder to the open position, press the cylinder/crane release button located on the right side of the gun just above and in front of the trigger guard, slide the cylinder/crane assembly forward separating it from the gun, and slide the replacement cylinder in place. Taking the cylinder out also makes cleaning easy.

Nighthawk Korth revolvers are not for everyone, and even those who can afford one might not want to spend the \$4,449 for a gun like that tested. But if you are looking for high quality and willing to pay for it, the Mongoose, or one of its brothers, may satisfy your desire.

**Nighthawk Custom's Korth Mongoose .357 Magnum revolver can be fitted with an optional 9mm Luger cylinder (inset photo shows rimless ejector system) that is easily exchanged.**

## Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550s

### AUTO PRIME SYSTEM<sup>^</sup>

#### Includes:

Primer Housing /Shield  
Primer Slides, Large/Small  
Pickup Tubes, Large/Small  
Pickup Tube Tips, Large/Small  
Magazine Tubes, Large/Small  
Mag. Orifices, Large/Small  
Operating Rod  
Primer Track Bearing  
Housing Screws  
Ret. Spring Retaining Pin

**P17-16627, \$90.95**

### PRIMER SYSTEM EARLY WARNING<sup>^</sup>

Allows you to focus on loading  
instead of worrying about failing to  
seat a primer, and is an easy slip-on  
attachment to the auto prime system.

**P17-20302, \$27.95**

### AUTO POWDER SYSTEM<sup>^</sup>

Accurate to within 0.1 grain,  
our Automatic Powder Measure is  
world renowned for its charge-to-  
charge consistency.

**P17-20251, \$96.95**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**P17-21353, \$33.95**

### AUTO EJECT SYSTEM<sup>^</sup>

Greatly increases your  
ammo production capabilities  
and adds a Cartridge Chute/  
Bracket and a Cartridge Bin to  
your reloader.

**P17-22120, \$33.95**

### BL 550 POWDER DIE<sup>^</sup>

Extra powder dies for your BL 550  
make it easier to set up additional  
toolheads for loading different calibers.

**Powder Die: P17-16629, \$20.95**

**Upsize Die: P17-16626, \$20.95**

**Plastic Funnel: P17-16617, \$6.95**

### POWDER MEASURE ADAPTER

If you load rifle cartridges  
with long-grain extruded  
powder, you can now use any  
manufacturer's powder measure  
with 7/8" x 14 threads on your  
RL 450, AT 500, BL 550 or RL  
550. (Requires the use of an RL  
450 powder die - see below.)

**P17-20029, \$24.95**

**RL 450 Powder Die:**

**P17-20308, \$23.95**

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form - Dillon's BL (Basic Loader) 550 - adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers - just like the RL 550 - it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$26.95 each, or \$24.95 each if you buy three or more - if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy - you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

# RL 550C<sup>^</sup>

## STANDARD FEATURES:

- Made in the USA
- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

All for **ONLY...**

Square-Deal-Only Wrench	<b>P17-19970</b>	<b>9.95</b>

## Dillon's Strong Mounts

increase your machine's "foot-print" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 650 owners with limited overhead clearance, the XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 650	<b>P17-22051</b>	<b>\$52.45</b>
XL 650-only	<b>P17-22052</b>	<b>49.45</b>
"SDB"	<b>P17-22223</b>	<b>68.45</b>

## Dillon's "Belted Magnum" Powder System<sup>^</sup>

System<sup>^</sup> features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System	<b>P17-97126</b>	<b>\$158.95</b>
----------------------	------------------	-----------------

## Dillon's Roller Handle<sup>^</sup>

gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

Aluminum Roller Handle	<b>P17-17950</b>	<b>\$48.95</b>
------------------------	------------------	----------------

**Dillon's Bullet Tray** is a simple, shallow aluminum bullet tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>P17-22214</b>	<b>\$45.95</b>
1050 Tray Kit	<b>P17-22215</b>	<b>45.95</b>

## Dillon's Low Powder Sensor<sup>^</sup>

provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

	<b>P17-16306</b>	<b>\$43.95</b>
--	------------------	----------------

Quick-Change Cover <sup>^</sup> for use with powder measure.	<b>P17-11143</b>	<b>\$14.95</b>
--	------------------	----------------

**With Dillon's RL 450 Upgrade** components, you can, either all at once or one assembly at a time, upgrade your RL 450 reloader to an RL 550!

## RL 450 Upgrade Components<sup>^</sup>

# Dillon's Case Preparation Equipment

**CV-2001<sup>^</sup> P17-20493 \$191.95**

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part.

Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**CV-750<sup>^</sup> P17-19455 \$146.95**

## Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To

**CM-2000 Case/Media Separator<sup>^</sup> P17-20675 \$78.95**

**CM-500 Case/Media Separator<sup>^</sup> P17-21045 \$47.95**

accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

## Attention European Customers: Case Cleaners are available in 220 volt!

**Euro CV-2001 P17-22047 \$216.95**

**Euro CV-750 P17-19473 \$171.95**

## Rapid Polish<sup>^</sup>

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

Rapid Polish 290

8 oz. bottle. **P17-13804 \$8.95**  
Case (20 pc.) **P17-20255 135.95**

## Case Lube<sup>^</sup>

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

8 oz. bottle **P17-13733 \$11.95**

# 22 Dillon's RF 100 Automatic Primer Filler

**Eliminates the need for primer pick-up tubes!**  
**Fills the primer tube while you reload!**  
**Clear polycarbonate shield and protective housing**

Dillon's RF 100 Automatic Primer Filler<sup>^</sup> eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$52.95 each.

## Super 1050/RL 1050 Short Trim Die Toolhead<sup>^</sup>

**P17-62219**  
**\$230.95**

For short rifle cartridges like the .300 Blackout, you must use a Short Trim Die Toolhead when using a Dillon Rapid Trim 1500 Case Trimmer during case preparation. Otherwise, the toolhead is too thick to facilitate the correct case length. This specialty toolhead enables you to correctly trim and prepare short rifle cases on your 1050. **(NOTE: the Blue 1050 toolhead stand – Part Number P17-62200, \$49.95 – is not included.)**

# Rapid Trim 1500 Case Trimmer<sup>^</sup> 23

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P17-62164** is **\$337.95**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P17-13141**, are **\$20.95** each. Upper lock rings, **P17-13559**, are **\$5.99** each.

# MILITARY BRASS?

## Eliminate the "Grunt Work" with Dillon's Super Swage 600<sup>^</sup>

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# Dillon's Concealed Carry Tote<sup>^</sup>

Dillon's NEW Concealed Carry Tote accommodates all the tools you need to survive the urban jungle. This low-profile carry case looks like an ordinary briefcase or laptop case, but it's designed for your pistol as well as your PC! It's made of rugged nylon fabric, with heavy-duty zippers on all compartments. The main compartment is 15" x 11.5" x 3" deep, with pouches in back and front. The hidden gun pocket is held closed with hook & loop fasteners for

quick access, has a 14.5" opening and is 10.5" deep. The two front pockets are 6.5" x 8" x 1.5" and feature inner pockets for flat items. There is also a zippered compartment on the back of the case sized to accommodate a ballistic armor plate.

## Mernickle

### Conceal-Carry Performance Series

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

## Mernickle's "Wild Bunch" 1911 Holster/Mag Pouch

This holster/mag pouch combination was designed specifically for the Single Action Shooting Society's "Wild Bunch" category of Cowboy Action Shooting, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame away from your body so you'll get a full combat grip, and the holster includes

the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

1911 Holster	<b>P17-19947</b>	<b>\$139.95</b>
Mag Pouch	<b>P17-19946</b>	<b>44.95</b>

# “Plan B”<sup>^</sup>

## Very-Bad-Day Planner Holster

Dillon’s “Plan B” Very-Bad-Day Planner Holster<sup>^</sup> holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won’t draw undue attention. It looks like a typical day planner, but inside there’s a holster that’s adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

“Plan B” Holster **P17-10252 \$24.95**

# 5.11 Tactical® ALWAYS BE READY

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

## BLADE-TECH™ Ultimate Carry Belt by Nexbelt

The Blade-Tech Ultimate Carry Belt by Nexbelt is specifically designed for those who carry a firearm daily for personal defense. The PreciseFit ratchet system allows you to quickly tighten or loosen the belt in 1/4" increments up to 6" for the perfect fit – no matter how you carry. Rest assured, this will be the most comfortable and fastest adjusting belt you will ever own. The Ultimate

Carry Belt has a water-resistant backing that helps prevent moisture from penetrating the outer surface and allows for extra strength and durability. **One size – adjusts to fit all.**

# Range Bag<sup>^</sup>

Dillon's Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 64). The Main Compartment is 12.5" long x 7" wide x 10" high, the End

Pockets are 8.5" tall x 6.5" wide x 2" deep and the Front Pocket is 9" tall x 6" wide x 2" deep.

Range Bag, Black	<b>P17-19366</b>	<b>\$89.95</b>
Pistol Pouch, Black <sup>^</sup>	<b>P17-17027</b>	<b>10.95</b>

## 'Border Shift' Ammo Bag<sup>^</sup>

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

**I.D. Card Holder**  
**P17-14575 \$2.95**

**Black Ammo Bag**

**P17-13755**

**\$25.95**

## Dillon's Shooting Mat<sup>^</sup>

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*

**P17-18146 \$65.00**

# Mr. Bulletfeeder<sup>®</sup>

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

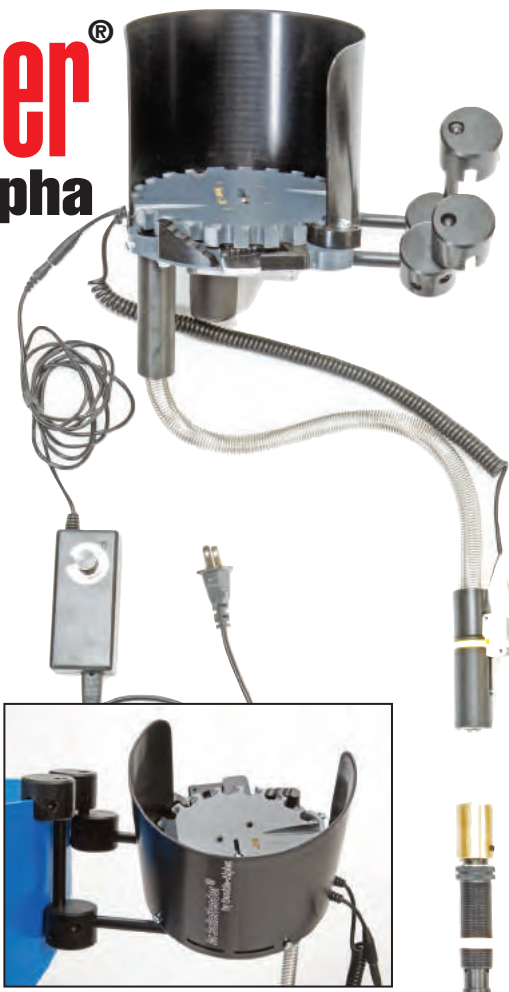

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

## Mr. Bulletfeeder<sup>®</sup> Replacement Parts & Spares

Having separate Bullet Dropper Dies allows you to quickly swap toolheads of the same caliber sizes without having to remove and readjust the bullet dropper die.

The Output Tube Assembly is what connects the Mr. Bulletfeeder by DAA's collator to the dropper. It feeds the bullets into the dropper, keeping them aligned and feeding smoothly. The Small Output Tube Assembly is required for the rifle calibers (both .223 and .308) as well as when loading very short, light 9mm bullets, such as many of the 90-grain bullets available. The Large Output Tube Assembly is required when loading 9mm (over 115-grain bullets), .40, or 45.

Loss a spacer? This four-pack of Nose Guide Spacers is identical to what comes with the Mr. Bulletfeeder. These are used to adjust the height of bullets, so they don't spill out or flip upside-down.

# Dillon's Pistol Die Sets

## Size Die

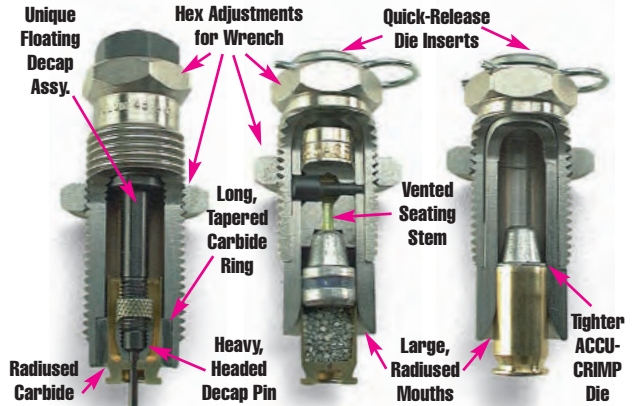

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

## Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

## Crimp Die

- Quick Disassembly, Easy to Clean

### Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

### Bullet Seating Die

Our quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

### Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the tool-head and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE: All Dillon Pistol Die sets include our sizer/decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)**

# Dillon's Rifle Die Sets

## Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

## Seat Die

- Designed to hold bullet straight throughout the seating process

## Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

### Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a head-space case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

### Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

### Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)<sup>^</sup>

# KelTec KS7, the Su

The large photo above shows the optional longer barrel and +3 magazine extension, while the inset photo emphasizes the compactness of the KS7's bullpup design.

## By Oleg Volk

The popularity of the original bottom-ejecting KSG shotgun stemmed from it holding a whopping 15 shells in its twin magazines while short enough for use in confined spaces. Later on, the over-the-top KSG25 raised the capacity to the eponymous 25 shells; with the overall length still being less than a typical non-bullpup 12 Gauge pump. Whether used for combat by Corrections Special Operations, for home defense, or for recreational shooting, the two KSG models reached considerable popularity. One niche remained unexplored, that of a smaller and lighter shotgun for ultra-fast handling.

Holding a pound and a quarter of ammunition, KSG isn't light, and KSG25 holds twice that, making rapid evolutions take a little more muscle than usual. Building upon eight years of production and field use experience with the KSG series, the new KS7 fills that niche handily, weighing in at spare 5.9 lbs. empty or about 6.6 lbs. fully loaded. Same 26.1" in length as the original KSG, the single-magazine KS7 is noticeably slimmer and some-

what simpler internally. It incorporated a number of improvements over the older models while retaining almost the same manual of arms. The main visual differences are the channel sight integrated into the carry handle, with a triangular fiber optic in the front, and the contoured pump handle. The channel sight provides rapid acquisition for wing shooting, and the tip of the fiber optic bead helps with precise slug placement. The flared front and rear ends of the pump attached to two action bars keep the support hand where it belongs, precluding accidental slipping into the path of the shot or back onto the slide release lever.

The manual of arms is similar to other pump shotguns. Ambidextrous slide release is in front of the centrally located trigger guard, and pushes down to unlock the slide. Loading is from the bottom, with a raceway aiding the centering of the shells in the magazine tube. The shell retainer is relatively thin and textured, so you can really feel it when loading. The well-fenced push-button safety goes right with thumb pressure for FIRE, left with index finger for SAFE.

# Subcompact Big Bore 37

KelTec's KS7 bullpup shotgun is available in Black, Flat Dark Earth and OD Green.

The channel sight integrated into the carry handle features a fiber optic front bead (photo at right).

Being long enough overall and sporting an 18.5" barrel, KS7 is not an NFA-regulated gun. It holds seven 2.75" shells in the magazine, or six 3" shells for those who like the extra stout thump on both ends. Should this prove insufficient, a longer barrel to match a +3 magazine extension will be available as options. Loading and ejection use the same opening, strengthening the receiver. Unlike KSG, KS7 cannot be loaded directly into the chamber – the shell must first go into the magazine because the lifter is in the way with the bolt retracted. Disassembly is quick and easy: two pushpins come out of the back and center of the receiver; they may be stored in the specially provided openings in the pistol grip. The pistol grip comes out, back end first, then the buttstock slides off, freeing the bolt. On the front, the slotted magazine cap unscrews for spring and follower removal. The barrel is held on with a spring-loaded detent, and comes off easily for cleaning. This gun works smoother if liberally lubricated around the rails and the bolt.

Shipped with a cylinder-bore barrel and possessed of a relatively short front sight separation by design, KS7 is very much a fighting shotgun. Lighter and slightly shorter than most variants of MP5 submachine guns, it packs a punch equivalent to longer and heavier riot guns of conventional design. Centrally balanced and ambidextrous, it can be easily controlled with one hand. It can even be fired one-handed in an emergency, with reloading by pushing the flared front of the slide handle against any available edge to eject, then pulling to reload – the process works better and quicker than you might expect. Thanks to the straight-line stock, recoil goes almost straight back, with little muzzle rise. M-LOK slots in the pump handle and, more usually, in the stationary channel sight allow installation of lights, lasers, and front sling eyelet or swivel. Between the handy, ergonomic design, compact dimensions and a distinctive look – available in Black, FDE and OD Green – KS7 is likely to re-define how modern pump shotguns look.

# Gun Laws We Need, Part III:

By Alan Korwin

"Any legislative, administrative or other proposal that would decrease, suspend, delay or eliminate due process, including but not limited to so-called "red flag" rules for an American citizen, is null and void. Any elected, appointed, employed or other person acting in an official capacity who proffers such a proposal shall be subject to an ethics board review and disciplinary action."

When one lone New York state legislator can propose an outrageous affront to the U.S. Constitution, and with it command national attention instead of rebuke because it's an anti-gun-rights idea, you know something is rotten in the state of America. His suggestion to give up social-media passwords for police searches before "applying" for firearms is beyond outrageous.

By suggesting we relinquish our Fourth Amendment rights against warrantless searches, in order to exercise our rights to arms, this New York tyrant – and that's the correct adjective – has demonstrated his lack of qualification to sit as a legislator. Proposing an act abhorrent to the Constitution is grounds, not just for censure, disgrace and dismissal, it is grounds for punishment.

**Marbury v. Madison, 5 U.S. 137, 1803**

"An act of the legislature repugnant to the Constitution is void."

**Norton v. Shelby County, 118 U.S. 425, 1886**

"An unconstitutional act is not law; it confers no rights; it imposes no duties; affords no protection; it creates no office; it is in legal contemplation as though it had never been passed."

Because legislators – unlike we the regular people – often don't face punishment for their actions that violate law, many, like this New York bigot, have reached a turning point. They feel at liberty to do anything. Their colleagues are understandably reluctant to act against one of their own, even across the aisle, even when the act is egregious, as his proposal is. A cynic would say this shows they're all corrupt.

We the people need a statute providing punishment for the serious crime of violating civil rights by act of law. It would apply specifically to legislators, but equally, because we are a just land, to judges and the full judiciary, police, attorneys, and basically everyone – without exception. Fortunately

ly we have such a law. We simply need to demand enforcement of its federal criminal charges and penalties (plus enactment at the state level for good measure). It's called 18 U.S.C. §242, "Deprivation of Rights Under Color of Law."

Proposing warrantless searches of your private papers and effects constitutes a violation of fundamental Fourth Amendment rights. This much is obvious *prima facie*, as lawyers say, on its face. It should be grounds for charges against this Brooklyn man. His intention to deny constitutional protection to the public evinces a willingness to subject citizens to absolute despotism, offending the public order. Subjecting people to

absolute despotism was, in Colonial times, literal grounds for revolt. In our more civilized times, it is grounds for other action. "They can't get away with this!" the rabble rightly insists. What to do?

Similarly, outlawing legal firearms and accessories, which has already been committed, *infringes* on the rights of those who own the arms and accessories. *Infringement* is banned by the Constitution. Requiring destruction or surrender of such property is *aggravated infringement*, a dangerous felony-level offense, which violates the Second and

Fourth Amendments, serious criminal acts. Signing such edicts, and attempts to enforce their terms are pure tyranny by definition. Pretending to "legally" enact such travesties is monstrous.

*Politicians do not have such powers*, they have never been delegated. In fact just the opposite is true. The electorate has *banned* politicians from doing those things – even if some misguided ones, driven along with sheeple by drumbeats of a corrupted "news" media, now clamor for said affronts.

America has a charter – the rule of law – and no one, in government or otherwise, can merely decide to take property without due process. That's got a name: Theft. Theft is punishable. If armed "authorities" should dare come to take your property, with the usurped pseudo authority of blatantly illegal dictates, are you required to obey? Where is that line drawn? When does natural law, or the Constitution, or simply what is right, empower you to protect yourself and your stuff? Americans do not want it to come to that – we must nip this in the bud.

**"We the people need a statute providing punishment for the serious crime of violating civil rights by act of law."**

# What About “Due Process”?

Democrats who have taken over the House of Representatives make no secret of their plan to introduce mountains of what they call “gun-control” laws. Unlike recently when they hid their insidious intentions, or simply lied about them, they now publicly trumpet their public-disarmament goals. Should republicans and the public simply gripe, as usual, and play defense? That may be tempting but it’s a completely wrong play.

Our divided Congress will strongly resist draconian bans. But with deal making, who knows – “the wall” and “impeachment” are powerful bargaining chips. Our defense should be offense – bold, righteous offense – with proposals that make gun banners nauseated. Show them up for the bigots they are, giving leftist journalists con-nip-tions to boot.

Politicians have gotten used to the notion they can threaten the Constitution, swear to dissolve our civil rights, come marching for our firearms –

and they won’t face resistance! What is the Second Amendment for if you don’t truly represent a balance of power to the people in power?

Who is supposed to stand up to armed politicians and their cohorts threatening to disarm you? At what point are we the Colonists, recognizing men and women in business suits as basically redcoats come to take our guns, wielding pen and paper with armed might behind the curtain?

Long before that moment arrives, we need laws to stop these people who violate the Constitution, renege on their oaths and undermine the freedoms our muzzles are supposed to protect. Enforce U.S.C. §18-242. Criminalize red-flag attempts.

*Alan Korwin, a national columnist, award-winning author of 14 books and veteran of more than 1,000 radio and TV interviews, has been writing as a journalism ombudsman since 2006. He can be reached at [GunLaws.com](http://GunLaws.com) where you can read more common sense like you just read.*

## The Original M1 Buddy®

**The Original M1 Buddy Service Rifle Cleaning Port** fits all models of M1 Garand and M1A rifles. Unlike other service rifle cleaning ports on the market today, the M1 Buddy allows you to use either the ratcheting GI Chamber Brush or GI Combo Tool while the cleaning port is in place! No need to worry about those fingers anymore! The Original M1 Buddy is covered by a lifetime warranty and will be replaced free of charge if it fails under normal use.

The Original M1 Buddy

P17-13447 \$12.95

## The Original Carbine Buddy Cleaning Port

enables you to clean your M1 Carbine chamber without worrying about pinching your fingers. The Original Carbine Buddy is covered by a lifetime warranty and will be replaced free of charge if it fails under normal use.

# CLASSIC FIREARMS: The S&W

By John Marshall

Chevys. Fords. Hot dogs. Apple pie. Smith & Wesson .38 Special revolvers. All have been around for quite some time, and are as familiar to us as the backs of our hands. Maybe you didn't realize it, but revolvers chambered for the .38 Special cartridge have been part of our United States heritage since the dawn of the 20th Century. Smith & Wesson first introduced its .38 Military "Hand Ejector" in 1899. This medium-sized "K-frame" handgun was chambered for two .38 caliber cartridges; the U.S. service round, also called the .38 Long Colt, and the then-new and slightly longer .38 Special. The .38 Special was first charged with black powder. Soon thereafter, it was routinely loaded with smokeless powder. In 1902, the .38 Military was slightly modified to include an extractor rod lug under the barrel. This arrangement has continued to the present day.

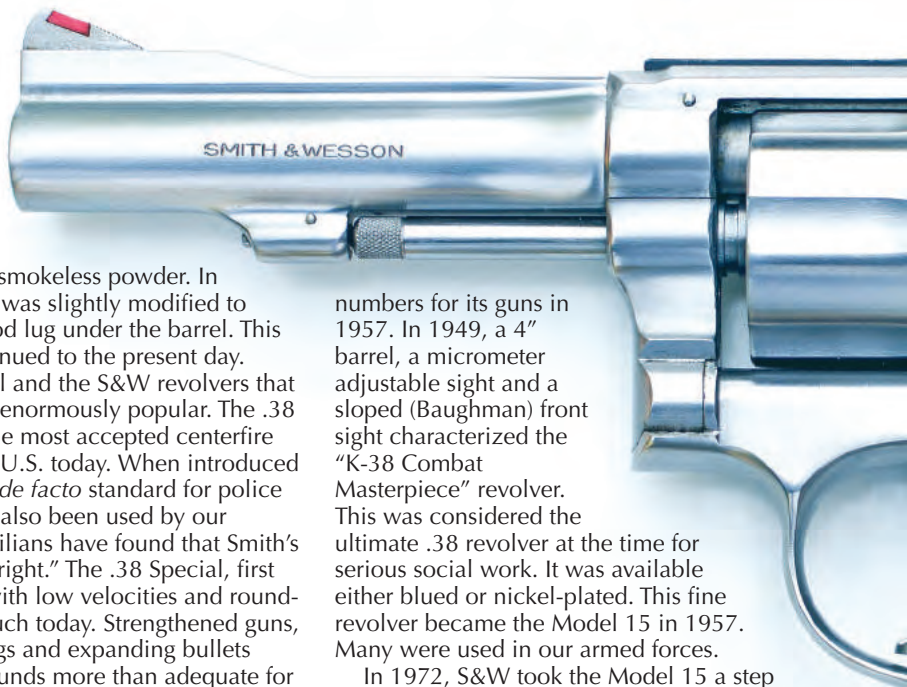

Both the .38 Special and the S&W revolvers that chambered it became enormously popular. The .38 Special has become the most accepted centerfire handgun round in the U.S. today. When introduced it quickly became the *de facto* standard for police forces nationwide. It's also been used by our military, and many civilians have found that Smith's K-frames handle "just right." The .38 Special, first lacking some punch with low velocities and round-nose bullets, is no slouch today. Strengthened guns, higher-velocity loadings and expanding bullets have made modern rounds more than adequate for self-defense. Double-action revolvers are perhaps the most reliable handguns made, and learning to use them is a piece of cake for almost everybody.

The .357 Magnum cartridge was introduced in 1935 by S&W in a heavy N-frame revolver. It could also chamber the shorter .38 Special. The gun became popular, but a steady demand for lighter .38 special guns continued. Many folks preferred them over the heavy-recoiling magnums; they were much more manageable and pleasant to shoot. Quick follow-up shots were much easier to execute, particularly in the medium-size K-frames.

The S&W K-frames have come a long way since they were first conceived so long ago. While the first ones could fire if dropped on their hammers, S&W soon developed a hammer block that allowed firing only when the trigger was deliberately pulled. The first method used could be less than reliable if rust or congealed gun oil

inhibited the block from moving into position. During World War II, a second method was developed – a positively activated sliding block that is virtually impossible to defeat in use. It's still standard for external-hammer-equipped Smith & Wesson revolvers today.

.38 Special revolvers are still quite widely used, and S&W has continued to refine and improve the breed. The fixed-sight "Military and Police" K-frame revolvers evolved into what is now known as the Model 10 following Smith's use of model

numbers for its guns in 1957. In 1949, a 4" barrel, a micrometer adjustable sight and a sloped (Baughman) front sight characterized the "K-38 Combat Masterpiece" revolver. This was considered the ultimate .38 revolver at the time for serious social work. It was available either blued or nickel-plated. This fine revolver became the Model 15 in 1957. Many were used in our armed forces.

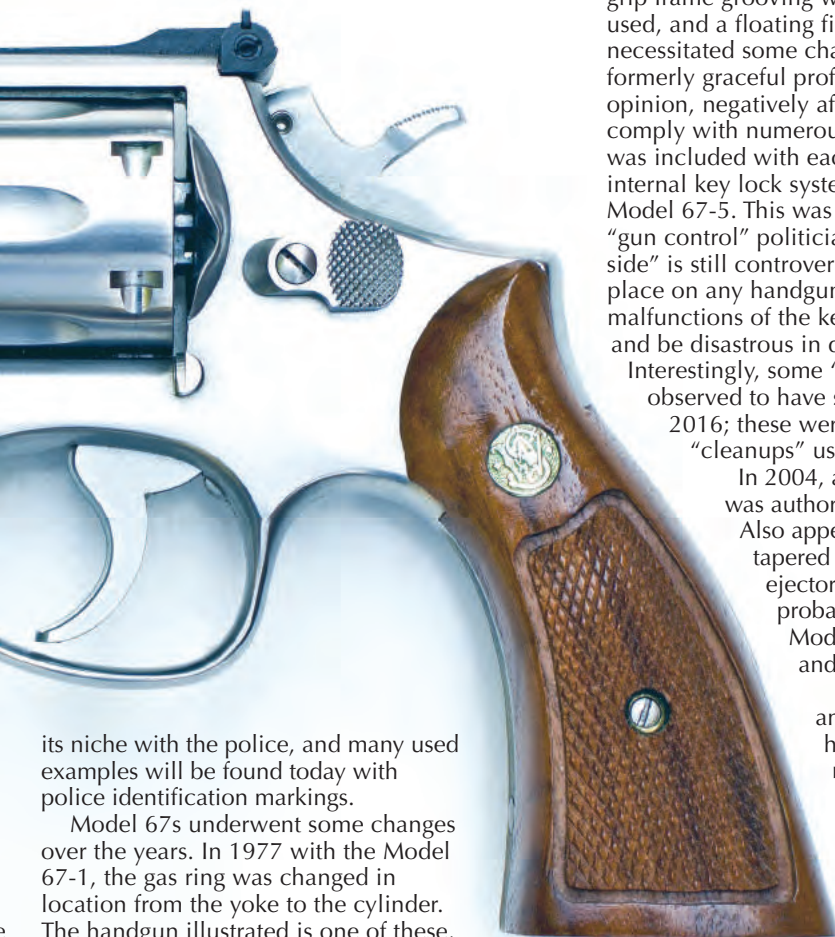

In 1972, S&W took the Model 15 a step further; making a new gun that was even more desirable for defense and severe usage. The Model 67 "K-38 Combat Masterpiece Stainless" was essentially the same gun as the Model 15, except that it was made with stainless steel rather than being blued or plated. It was a 6-shot handgun, and weighed 34 ounces empty. A 4" pinned barrel was standard, and the front sight soon after introduction was fitted with a red plastic insert for higher visibility. The first rear sights were also made from stainless steel, but these were soon changed to black to prevent sight glare. Both the rear sight leaf and the barrel rib were grooved. Unlike its .357 brother, the Model 66, the new 67s had no ejector rod shroud and the barrels were tapered to save weight. Walnut frame-fitting "magna" stocks were standard. The backstrap and forestrap had 10 grooves for better retention. An overtravel stop for the trigger was incorporated, but it can be easily

# Model 67 .38 Special Revolver

removed if desired. This gun will handle +P and +P+ heavy loadings as well as the old 38/44 increased-pressure rounds.

Many police departments from the 1940s through the mid-1980s still stuck with the .38 Special cartridge, and specified guns chambered for it as their standard issue. A good number of departments carrying .357 revolvers required their officers to use only .38 Special rounds in them, fearing over-penetration and liability for injury to nearby innocent bystanders. The Model 67 found

its niche with the police, and many used examples will be found today with police identification markings.

Model 67s underwent some changes over the years. In 1977 with the Model 67-1, the gas ring was changed in location from the yoke to the cylinder. The handgun illustrated is one of these, and left the factory in April 1978. It was obtained from the estate of an individual who bought it new but seldom fired it. The nostalgic pinned barrel was abandoned in 1982 to speed production. In 1988, the Model 67-2 appeared, featuring a new yoke retention system, a “floating” hand (the part that rotates the cylinder), a radius stud package that eliminated the pins in the hand, and a re-designed hammer nose

bushing. 1993 saw the Model 67-3, involving a change in the configuration of the extractor. The frame was also drilled and tapped under the slightly modified rear sight leaf for scope mounts. Additionally, rubber Hogue grips were used. In 1996, the square butt was dropped in favor of the round version. Then in 1997, the shape of the cylinder release thumbpiece was changed to a “tear-drop” configuration, and the trigger became a metal injection molded (MIM) part.

With the Model 67-4 in 1998, the frame was changed to eliminate the cylinder stop stud, the grip frame grooving was stopped, MIM parts were used, and a floating firing pin in the frame necessitated some changes to the internals. The formerly graceful profile of the frame was, in my opinion, negatively affected. In 2001, to help comply with numerous regulations, a fired case was included with each gun shipped. In 2002, an internal key lock system was introduced with the Model 67-5. This was a sop to certain overzealous “gun control” politicians. The “ugly hole in the side” is still controversial, and many feel it has no place on any handgun, since possible malfunctions of the key lock could tie up the gun and be disastrous in defense situations.

Interestingly, some “dash 5s” have been observed to have shipped as recently as late 2016; these were determined to be “cleanups” using in-stock older parts.

In 2004, a two-piece sleeved barrel was authorized for the Model 67-6. Also appearing were some heavy non-tapered conventional barrels with no ejector shroud. These were probably older parts cleanups. The Model 67-6 is still being made and continues to be popular.

Although semiautomatics and “plastic”-framed pistols have now become all the rage, the Model 67 is still in demand, particularly in the civilian sector. It has been continuously manufactured since 1972. Those who think the .38 Special cartridge is dead definitely have another think coming! It's

still well liked and available everywhere. The Model 67 represents perhaps the finest example of a medium-frame revolver in this caliber, and occupies a singular place among the classics. The first ones and the “dash 1” examples are the most sought after and the prices on these earlier revolvers continue to escalate.

# 46 SAFARILAND Equipment Locking System

## ELS Quick Attachment Accessory System

Sorry, but the shotshells and magazine pictured do not come with these ELS System components.

**4-Shotshell Holder with ELS Attaching Fork (You'll need a Receiver Plate.)**  
4 Shell Holder P17-15181 \$58.00

**8-Shotshell Holder with ELS Attaching Fork (You'll need a Receiver Plate.)**

The new  
Super Vel.  
Hotter.  
Faster.  
Better.

The original Super Vel Cartridge Company forever changed "police ammunition" with a new style of bullet, the jacketed hollow point. Now, 40 years later, Super Vel is back!

Advertised velocity figures from Super Vel's website are as follows: .380 ACP 80 Gr. Solid Copper Hollow Point **1,100** fps (Walther PP); 9mm 90 Gr. JHP **1,473** fps (Glock 43) to **1,632** fps (Glock 17L); .38 Special 90 Gr. JHP **1,318** fps (S&W Model 642) to **1,652** fps (S&W Model 27); and .45 ACP 185 Gr. JHP **1,085** fps (S&W M&P) to **1,127** fps (Springfield 1911).

.380 ACP "Pocket Rocket" 80 Gr. S&W (20)	P17-10270	\$24.95
9mm +P 90 Gr. JHP (50)	P17-10023	39.95

.45 ACP +P 185 Gr. JHP (50)	P17-10031	53.95

## Lyman Precision Funnel Set

Lyman's Precision Funnel Set is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. No more powder clinging to surfaces, which can happen with lightweight plastic funnels. The solid construction and quality of Lyman's Precision Funnel Set will be apparent in its first use. This is no "one size fits all" funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

P17-11389 \$39.95

## Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The Lyman X-Block is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a "V" slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5" diameter provides a stable base with plenty of support.

P17-11390 \$15.95

# Personal Hearing Protection:

## A Belt-and-Suspenders Approach

*See Page 7*

**By John Bibby**

I shoot a lot. A large portion of my shooting is centerfire, specifically with 9mm handguns, 5.56 rifles and 12 gauge shotguns. Competing in 3-Gun competitions means I shoot a lot of those calibers. In a high volume month for me, I might put 500-700 rounds down range. In a slow month it might only be 30-50. In either case, choosing to not use hearing protection WOULD result in permanent hearing damage. Even choosing to use inferior hearing protection would result in significant cumulative hearing loss.

This is an important topic for me. I like my hearing and a freak medical weirdness cost me 40 percent of my right ear's ability to hear.

My hearing loss is not firearms or loud noise related. I had what I thought was swimmer's ear. That is a pretty common experience in Florida as we spend a lot of time in pools, lakes and the ocean. Usually, the treatment is to drip high percentage alcohol into the ear and the water is drawn out. Do this two or three times a day, for a few days and the problem goes away. My experience lasted for over a week, so I consulted a pro. Long story short, I was diagnosed with "wandering nerve sensitivity." With this issue, I lost entire ranges of sound.

The doctor assured me it was nothing I had done, even when I explained I had landed ear first while tubing behind a boat doing 25+ mph. He said there was zero indication of physical damage and all my symptoms lined up with the somewhat nebulous diagnosis. I have to assume the doctor is right. The loss of hearing was fairly instant and

other than the energetic tubing dismount, no other physical or loud sound happened any time near that incident.

Of the guns I shoot the most, my 18" barrel 5.56 is OMG loud. It has a very effective muzzle brake/suppressor mount that works well for reducing muzzle rise; but, it trades lack of muzzle rise for a giant increase in noise. The 12 Gauge and my competition pistol are pretty standard in their ability to turn money into noise. My other primary noise offender is my F-class rifle. The 30" barrel helps to get the noise away from my ear, but 50ish grains of powder is still quite loud.

For all of these centerfire activities, I use a double-layer system for protecting my hearing. The first layer is a set of foam earplugs, then muffs.

The earplugs I use are 3M Skull screws, the decibel rating is 32db. They are all I normally use for protection when shooting rimfire or suppressed. Having the foam plugs inside the ear does two things. First it reduces the overall impact of the sound entering the ear canal. Second, by physically filling the ear canal it also reduces the secondary vibrations that travel up the jawbone by acting as a dampening device. This is especially useful with rifles as the cheek weld is a direct transmitter of these secondary threats. Any fairly firm foam plug would work, but a higher "db" rating is better and the ones I use don't slowly work their way out as you shoot.

My second layer of protection is a set of active sound deadening earmuffs with ambient sound amplification technology. These muffs add another 21db of sound rating. It does add significant bene-

fit and greatly reduces secondary physical vibrations as well. They also have the ability to cut out all sound over 85 db a few microseconds after it hits. The best part is they can amplify sounds lower than 85 db on a rheostat.

Muffs of this style have a passive rating of between 18-24db. In the manner I use hearing protection, the passive rating is not as important. The primary passive sound reduction comes from the foam plugs. The muffs work more on concussion reduction in the passive role. In the active role, the muffs amplify desired sounds. This "belt and suspenders" combination makes it possible to easily hear range commands or other important information while target shooting or hunting while not risking hearing damage.

It should be noted that 32db plugs and 24db muffs do not add up to 56db of sound reduction. Being a logarithmic scale, it doesn't work that way. Each 3db is doubling of sound intensity, even if the ear does not perceive it that way. The combo I use likely gives a maximum of 41-44db of direct reduction; but it also helps in the other ways mentioned.

With the two used in conjunction, I never have a hearing or awareness issue. My biggest problem is keeping other people from stealing my active muffs when I shoot with newbies. I have partially solved this problem with a second pair of active muffs.

At roughly \$1 for the semi-disposable skull screws and with options below \$40 for a set of ac-

tive-suppression muffs, there is really no reason not to be hearing safe. Although choices exist starting at that price point, there are much better choices for a bit more money. The muffs that start at about \$100 are much quicker to clip the noise impulse and more complete in their active suppression technology. I choose to spend a bit more for the better option as I already know the "fun" of hearing loss. The Dillon HP1 muffs are a great choice in this regard. A set is permanently stationed on my 3-Gun belt.

In addition to having faster clipping of high-energy sound, the Dillon HP1 also have independent volume controls for each ear. This can be quite helpful for those (like me) who have different sensitivity in each ear. It should be noted most muffs change the frequency of the amplified sounds in a downward direction. With the Dillon HP1, the shift is distinctly upwards in the pitch range. This works out exceptionally well for a friend of mine. He is completely deaf in the part of the spectrum where many female speaking voices occur. When he wears these muffs, it moves their vocal range up about 50 Hz and fixes that dead zone for him.

Let's face facts; quality hearing protection costs a bit of money. It is completely worth it, lasts a long time and is usually still significantly less expensive than the \$200 tax stamp for the other type of hearing protection. Not to mention much more broadly useable.

*We're Glad to See*

*You're Back!!*

## BFR Accessories

### A. 50 BMG CASE TRIMMER ASSEMBLY<sup>^</sup>

Features an industry standard 1-1/2" -12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.

**P17-50050, \$419.95**

### B. 50 BMG CARBIDE SIZE DIE<sup>^</sup>

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2" -12 UNF thread, and is manufactured to low chamber tolerance specifications.

**P17-50075, \$984.95**

### C. 50 BMG POWDER MEASURE ADAPTER<sup>^</sup>

For use with the RCBS .50 BMG powder measure.

**P17-50125, \$87.95**

### EXTRA "BFR" TOOLHEADS

**P17-19831, \$207.95**

### D. 50 BMG PRIMER SEATING DIE<sup>^</sup>

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch.

**P17-50200, \$169.95**

### E. 50 BMG PRIMER POCKET SWAGER<sup>^</sup>

Makes it easy to remove the military crimp.

**P17-50001, \$354.95**

## Dillon's Bench Wrench Fits 1" Die Lock Rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to

re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	P17-14067	\$1.75

Stoeger IGA shotgun	P17-20514	14.95

# Comtech's STINGER

**THE STINGER:** Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

P17-19495 \$9.95

# Elzetta

## Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

# SHOOTING DRILL: “THE TEST”<sup>61</sup>

By Duane Thomas

There are quite a few classic shooting drills for self-defense-oriented pistoleros to pit themselves against to measure their skills. One of the most respected of these was developed by famous firearms instructor Ken Hackathorn, and is called “The Test.” Sometimes also called “The 10-10-10 Drill,” The Test consists of firing 10 shots, at 10 yards, into a B-8 replacement target center with a time limit of 10 seconds. Ten shots, ten yards, ten seconds: 10-10-10.

There are two commonly accepted ways of scoring your performance on-target: the Vickers standard and the Hackathorn standard. In the Vickers standard, named for Larry Vickers, you have one second added to your time for every shot outside the B-8 target center, and your total time cannot exceed 10 seconds. For instance, you can throw one shot outside the target center in the minus-1 zone and still pass if your raw time is nine seconds or less; you can still pass with two minus-1s if your raw time is eight seconds or less, and so forth.

The Hackathorn standard is that, within the 10-second time limit, you must score at least 90 points on-target, of 100 possible, to pass; 95 or above is considered exceptional. Which of the scoring methods, Vickers or Hackathorn, is “harder” can be a matter of some debate.

Start position for The Test is with the gun held in both hands at the Low Ready. If you want to make it harder, you can go from the draw. If you want to make it harder still, draw from concealment. Recently, I went out and shot The Test. My score: 100 points in 9.18 seconds, from the draw. Admittedly, that wasn't my first rep because this was the first time(s) I'd ever pitted myself against The Test. The very next night, I went out and posted a 99 in 8.49 seconds, first rep, cold. I had no B-8 replacement target centers on-hand, so I did it on the red-and-white American Target Co. S-1 bull's-eyes I regularly use for testing article sample guns. The size of the scoring rings is slightly different, but close enough for government work.

Ken Hackathorn commented, when I was discussing The Test with him for this article, “Larry Vickers asked me to provide a drill/test for him to use in the pistol combat marksmanship portion of the Operator Training Course. That's the six-month training program a solider must complete before he's assigned to a Sabre Squadron at Operational Detachment Delta, 1st Special Forces Group. To his credit, Larry made The Test famous. To be candid, I'd totally forgotten I came up with it for him, until some years later when he began using it as a measure of performance in his private-sector schools, once

he'd retired out of the Army. He really deserves the credit for making The Test what it's become today in the gun culture world of shooting drills.”

## SUMMARY

The Test is intended as a skills development and assessment drill, not a “Here's the standard, if you can't do it, you suck” drill. If you find, when first shooting The Test, you can't do it at 10 yards, move in to seven yards. Five yards. Three yards. Whatever it takes til you can

pass The Test, on demand. Then begin incrementally lengthening the distance. So, you find you can do it at a particular distance beginning from Low Ready? Do it from the draw. When you can do it from the draw, do it from a concealed draw; that's next on my Things To Do list.

The Test is an excellent trigger-control exercise. Ten yards is just far enough away from the target, and the accuracy standard just demanding enough, and the target just small enough, your technique needs to be fairly precise to put the bullets where they need to go. The Test can help build the ability to bring the gun up from the Low Ready and fire that first shot accurately. It can help build the ability to do the same thing from the draw. It can help build the ability to fire accurate follow-on shots. Overall, you really have to know out of which end of the gun the bullet comes to pass The Test.

Duane's website is  
[Self-Defense-Handguns.com](http://Self-Defense-Handguns.com).

Using Hackathorn scoring, Thomas posted this target with 100 points in 9.18 seconds.

# AIMING TO PLEASE

## THE RUGER PRECISION™ RIMFIRE RIFLE

### Reviewed by Peter Caroline

Do I need another .22 rifle? Probably not...I already have at least two dozen .22 rifles of all descriptions. My current inventory includes bolt actions, slide actions, lever actions, semiautos, a falling block and a Martini action. But here's the problem: I recently bit the figurative bullet, and acquired a .22 suppressor. I have two pistols, a converted Colt 1991A1 and a Ruger SR22, that have barrels threaded for a silencer, but no rifle so equipped. So, no problem...I'll just have a gunsmith thread the barrel of one of my existing rifles. Well, there is a problem, or several. Some barrels have too small a diameter to support the required 1/2"-28 thread pattern. Some have front sights or magazine tubes too close to the muzzle. Several have collector value and shouldn't be altered. The easiest solution was to acquire a rifle that was already set up to handle a suppressor. Preferably, it shouldn't be a semiauto...I plan to use standard velocity or suppressor-specific ammo, which might not be optimal for reliably functioning a semiauto action. Acquiring a rifle as an accessory for another accessory, a suppressor, might seem a bit irrational, but that's not unusual for this household.

Choosing the right rifle actually turned out to be quite easy. Ruger has acquired a reputation for introducing new products seemingly on a weekly basis. One of their most recent offerings is something called the Ruger Precision Rimfire rifle. It is a bolt-action .22 LR repeater, designed as a rimfire understudy for their successful centerfire Precision Rifle. It had the requisite 18" threaded barrel and, at a suggested retail of \$529, it was irresistible.

The Precision Rimfire has all the bells and whistles. You can easily adjust the length of pull and comb height to suit your needs; you can change from a rimfire 1-1/2" bolt throw to a short-action centerfire 3" bolt throw, which is quite helpful if you're preparing for centerfire competition; ditto the oversized bolt handle, which copies that of the centerfire Precision Rifle. There is a 5" Picatinny scope base for your choice of optics. The slim 15" free-floating aluminum handguard incorporates Magpul® M-LOK® slots on all four sides, so you can affix your choice of gadgets *du jour*. The pistol grip is your basic AR type, and can be replaced with any of the variety of AR grips on the market. The safety selector is also of the AR pattern and can be moved to the opposite side for those of sinistral persuasion. The Ruger Marksman trigger can be adjusted from 2-1/4 to 5 lbs., and the supplied adjusting wrench has its own hidden buttstock compartment. One neat feature is the magazine; the Precision Rimfire rifle uses 10/22 rotary magazines of any capacity. It comes with a 15-round magazine, which is perfect for bench clearance if you're using a rest or a short bipod. In addition, the buttstock incorporates a flat Picatinny bag rider, so you can attach a rear monopod if desired. Weight is 6.8 lbs., which is just about perfect for target or field purposes.

I have a 3-10X Konus scope with QD mounts that I've used on a number of centerfire rifles. It wasn't attached to anything at the moment, so I put it on the Precision Rimfire, and did my initial zeroing locally (Hiram Percy Maxim is the patron saint of suburban marksmen). I had also fitted a short bipod and, of course, my KDM Hugin .22

suppressor. Range day was a bit windy...enough so that the wooden target frame blew over once. I set up my targets at 25 yards. The ammo I brought along included Eley Standard Velocity 40 gr. (1090 fps), CCI Standard Velocity 40 gr. (1070 fps) and CCI Suppressor Subsonic HP (970 fps). The results were surprisingly uniform among the three varieties of ammo...3/8"-1/2" 5-shot clusters. I'll definitely have to try again on a day with less wind. The trigger is a dream at 2.5 lbs., with just a tiny bit of take-up and smooth as can be. And of course it's vewwy, vewwy quiet.

Unaccustomed as I am to saying something nice about any long gun that isn't blued steel and

walnut, I must admit that this is one hell of a nice rifle for target practice or small varmint control. And it acquires more aesthetic appeal the more I shoot it. I do plan to replace the factory pistol grip with a Magpul unit that provides safe storage for batteries and/or the muzzle thread protector. The Ruger Precision Rimfire will probably retail somewhere in the \$400-\$435 range. I suspect that Ruger will sell a lot of them.

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL650 cartridge bins are 6-3/4" long x 3-

7/16" wide x 2-13/16" deep.

- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.

# Swab-its – A Swab for Every Job! <sup>65</sup>

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (*thinking fast*), “I’m trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!” The **Bore-tips Swabs** REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

# 66 New Products from Slip 2000

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks!

**NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P17-19237 \$19.95

Slip 2000 Carbon Killer provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

**NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P17-19234 \$19.95

Slip 2000's Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P17-11652 \$22.95

Slip 2000's AR Cleaning System contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P17-11676 \$18.95

## Slip 2000 Extreme Weapons Lubricant (EWL)

was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P17-11644 \$16.95

## Slip 2000 EWL30

has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P17-11645 \$19.95

## Slip 2000 Copper Cutter

is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing!

**NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P17-11646 \$10.95

## Each Slip 2000 Gun Wipe

packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube.

Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P17-11674 \$11.95

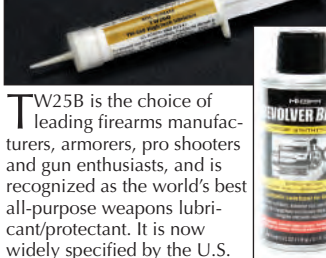

## Lyman Pick & Brush Set

Lyman's Pick & Brush Set is an indispensable item for your cleaning supplies and range bag.

P17-40160 \$3.99

## MIL-COMM Extreme Performance Lubricants

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe P17-15732 \$10.99  
1.5 Ounces P17-15731 14.50

Revolver BLAST with TW25B is an all-synthetic lubricant/protectant specifically designed for revolvers.

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it.

Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).  
 Slide-Glide Standard **P17-15571 \$7.95**  
 Slide-Glide Lite **P17-15572 7.95**

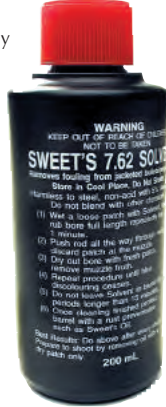

**Microlon UltraBlue** protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

**P17-75125 \$9.95**

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

**P17-13128 \$12.95**

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# 70 ELITE TACTICAL SYSTEMS MAGS & LOADERS

**E**lite Tactical Systems' C.A.M. Rifle Magazine Loader loads AR15, AK47, AK74, FN SCAR-16/17, AR10, G36, Steyr AUG, MP5, CZ Scorpion EVO, Colt SMG, UZI and more in 5.56x45/.223, 7.62x51/.308, 7.62x39, .300BLK, 5.45x39, 9mm and more.

The ETS C.A.M. Pistol Magazine Loader loads most 9mm or .40 caliber pistol magazines – including single stacks. It doesn't force rounds through the feed lips, so it won't damage magazines.

Both ETS C.A.M. magazine loaders will lift up to 10 rounds of ammo directly from an ammo tray!

ETS 30-round AR magazines have a built-in coupler that allows multiple magazines to be connected in seconds with no tools. Clip-on dust covers keep dirt and debris out during storage.

ETS magazines for GLOCK® pistols are compatible with aftermarket floorplates for GLOCK magazines, feature

special grip ribs on the floorplate to aid in extraction and are easy to disassemble for cleaning and maintenance.

# 72 KNS Precision, Inc. AR ACCESSORIES

KNS Precision, Inc. AR-15 Bolt Catch Retainer Pin.

P17-33390 \$9.00

**P**erma-Pin Firing Pin Retainer for M-16 and AR-15 replaces the standard cotter pin found in the bolt carrier to retain the firing pin (as in original Stoner rifles). Made of tool steel. No modification to gun required.

P17-19927 \$9.00

Gen 2 Mod 2 Non-Rotating Trigger/Hammer Pins .154 Diameter.  
P17-33391 \$33.00

Gen ST Non-Rotating Trigger/Hammer Pins .154 Diameter.  
P17-33392 \$38.00

## KNS Precision, Inc. AK ADJUSTABLE GAS PISTON SYSTEM

- Reduce recoil and improve accuracy
- Tune any AK for optimum suppressed use
- Shoot a wider range of ammunition types

- Reduce operating noise and "port pop"
- Decrease cyclic rate for automatic fire
- US-manufactured part for 922r compliance

P17-33405  
\$149.00

### M-14 Bolt Roller Greaser

So THAT'S how you grease that little S.O.B. (Slick-Operating Bolt, that is.)  
M-14/M1A Bolt Roller Greaser

P17-18531 \$6.75

### Adjustable M1/M1A Gas Systems

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

## TAYLOR FREELANCE MAGAZINE EXTENSIONS

**Taylor Freelance Magazine Extensions**  
AR-15/Tavor 9mm SMG +10 P17-12377 \$39.95

This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many "stock" mag springs. *NOTE: Colt SMG mags come from many different manufacturers. Colt offered at least two major types – one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.*  
CZ Skorpion +10 P17-12378 \$49.95

- Extra length/strength spring included
- Thumbscrew-and-gasket retention system allows for quick, easy disassembly.

**NEW!** GLOCK +20 Pictured P17-12148 \$69.99  
Transforms Glock 31-round magazines into 51+1 round mags. **Legal for PCC competition!**

- Extra length/strength spring included.
- SIG MPX +10 P17-12376 \$29.95
- Works with stock mag spring.
  - Angled floor stands the magazine straight up on a table for easier loading.
- SIG P320 +5 P17-12375 \$39.95
- Extra length/strength spring included.

# MAGPUL® UNFAIR ADVANTAGE™ 73

## Enhanced Self-Leveling AR-15/M16 Mag Follower

MAGPUL 1911 Grip Panels feature reinforced polymer construction and a unique diamond-shaped cross section to prevent twisting in the hand. They also have an aggressive mag-release cut out and are compatible with ambidextrous safeties.

# 74 "The Perfect Small Parts Cleaning Accessory"

P17-10209 \$15.95

The HYSKORE Degreezer consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. As anyone who has cleaned a gun is aware, cleaning small parts is a major challenge. Given the available technology and fixtures, the standard procedure is to use some kind of cup or similar vessel, pour in a quantity of cleaning solvent, and then pick up the parts one by one and brush them clean. The Degreezer changes all of that. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. As a bonus, the set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline. The Degreezer will quickly become an indispensable fixture on your workbench.

## HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rest will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rest also means that two or more rests can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P17-10208 \$19.99

### Pachmayr Pac-Mag Gun Storage Magnet

Holds handguns, rifles or shotguns!

Overmolded non-marring rubber protects your gun!

P17-10098 \$19.99

### OPSol Mini-Clip™

Allows the use of 12 Ga. 1.75" Birdshot, Buckshot and Slug shells. Fits 12 Ga. Mossberg 500, 590, 590A1 and Maverick 88 models

The OPSol Mini-Clip™ was designed to give "well seasoned" and "recoil sensitive" shooters the capability of shooting the trusty Mossberg 12 Ga. platform without the usual recoil response. By using The OPSol Mini-Clip™ in conjunction with 1.75" shotgun shells, shooters stay in the game without all of the pain. The Mini-Clip enables owners of Mossberg 12 Ga. shotguns to use Aguila Minishells reliably for training, practice, recreational or home-defense applications.

P17-10471 \$14.99

The Pachmayr Pac-Mag™ Holds up to 30 pounds and the three-magnet design gives the Pac-Mag more strength than any other gun magnet on the market. Secure almost any gun – pistol, rifle or shotgun – practically anywhere!

# JP ENTERPRISES

## TACTICAL PERFORMANCE GEAR

**JP Enterprises .308  
High Pressure Enhanced Bolt**  
P17-11301 \$199.95

these rifles. Unfortunately, these issues will persist until the manufacturers of ammunition realize that an AR platform requires a unique pressure curve to allow for both accuracy and reliability.

Manufactured to the exacting standards of JP Enterprises' standard bolt offerings, the High Pressure Enhanced Bolt™ design represents a giant leap forward in alleviating the problems traceable to over-pressured loads – namely primer flow, ejector smear, extraction issues, and ignition reliability. In combating these problems, this new bolt design opens up a much broader range of ammunition compatibility and load density in the AR .308/7.62 and other variants such as 6.5mm or 6mm calibers in this platform.

Among its other enhancements, the .308HP bolt features an improved ejector pin hole and modified ejector to mitigate case head extrusion and frequent brass shavings. The JP Enhanced Extractor eliminates virtually all extractor-related failures while the JP Enhanced Gas Rings provide a more reliable, lower friction gas seal with longer lifespan.

While ultimately every end user needs to be aware of the ammunition limitations of their large-frame AR, the JP .308HP bolt offers multiple advancements to vastly increase the ammunition and operational abilities of the platform.

For anyone using .308/7.62 AR-type rifles, it's common knowledge that many factory rounds exhibit excessive primer flow and/or ejector smear. At its core, this is a result of ammo development being done by manufacturers only for manual platforms without testing in semiauto platforms. Some rifle manuals even record the maximum recommended load data beyond the functional range of

**J. Dewey Mfg. Co.**  
**AR-Link Cleaning Pin**^

Dewey's AR-Link Cleaning Pin utilizes the rear take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits AR-15s and AR-10s with take-down pins up to .316" in diameter. **P17-18599 \$14.95**

**Emergency AR(epair) Kit**  
*Crucial Parts for Your AR-15*

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring. **P17-19460 \$19.95**

**Tac Latch**

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/AR-10 charging handle. It works especially well for "flat-top" rifles equipped with low-mounted optics. **P17-10379 \$18.95**

**Jerry Miculek AR-15 Compensator**

Jerry Miculek's three-chamber AR-15 Compensator fits threaded-barrel rifles and may be "clocked" for left- or right-handed shooters. Used by many top three-gun competitors. **P17-11328 \$49.95**

Your basic, generic, strap-on-with-Velcro™ AR-15 brass catcher. **P17-15478 \$14.95**

# Bushnell TRS-25<sup>^</sup>

## Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot. TRS-25 (Includes riser, not pictured.) **P17-31318 \$119.95**

## Scout Scope Mounts for AK, SKS Rifles

*Sorry, the optic pictured here is NOT included with the Scout Scope Mount.*

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

# Jade Struck

By **Kimie Dillon**

Watch out world, Jade Struck is here! This charismatic bundle of energy is gracing this month's *Blue Press* cover and we couldn't be more thrilled. At Taran Butler's range, she shows us how mental focus and sheer drive play a key role in her shooting success and in teaching others.

**KD** – When did you get started shooting?

**JS** – I began shooting with my father when I was eight years old. We had a .22LR rifle we would shoot cans and bottles with on the ranch. We also grew up riding horses, roping cattle and hunting. I still ride and hunt to this day.

**KD** – How did you meet Taran Butler? How did he become your mentor?

**JS** – I met Taran through my dad, who has known Taran and his family for over 30 years. I first met Taran at a local rifle match my father and I went to watch. Seeing Taran shoot blew my mind and when he offered me a job assembling base pads at Taran Tactical Innovations (TTI), I couldn't say no! When he offered to mentor me in shooting, I dedicated everything I had to trying to be the best I could be. I'm still on that journey and am forever grateful for the opportunity to be a part of TTI, to be Taran's protégé, and his friend.

**KD** – What are some of your shooting accomplishments?

**JS** – I'm fortunate enough to have taken home the following Championship titles: Shoot for the Gold 3-Gun Championship Overall High Lady; Superstition Mountain Mystery 3-Gun High Lady in Stealth Division; Area 4 Championship High Lady in PCC (2017); Area 2 Championship back to back High Lady in PCC and Overall High Lady this year; SWPL Cups for PCC and Limited 10; and I'm the first female to win two divisional championship cups (PCC and Limited 10) at The Southwest Pistol League (SWPL).

**KD** – What do you think is the most important element in training: physical or mental? Or both equally? What's your approach when it comes to training in general?

**JS** – I believe there's a balance of the elements while training, more often than not I will find that

*Continued on Page 81*

From Left: John Wick star Keanu Reeves, Taran Butler, Jade Struck, John Wick director Chad Stahelski and Ladies Multigun Champion Maggie Reese.

# Taran Butler

## John Wick's Gun Coach

By Kimmie Dillon

This fall our *Blue Press* team made the trek to Simi Valley, California to meet up with the one and only Taran Butler. Taran is the owner of Taran Tactical Innovations. He is also the first ever USPSA Multigun National Tactical Champion and is considered one of the most versatile shooters in the world. Taran is the first and only USPSA Multi-gun Triple Crown National Champion by winning the Limited, Tactical and Open Divisions and has won the Superstition Mountain Mystery 3-Gun Championship for 11 years in row! I could go on and on about his impressive list of shooting accomplishments. But with all of his match wins, industry innovations and Hollywood connections, I discovered for myself that Taran is the real deal. He is down to earth and truly one of the greatest people in our industry.

**KD** – When did you first get into shooting?

**TB** – I grew up on a ranch and our family loved

to watch John Wayne movies and all the Dirty Harry movies. One day, my brother wanted to get a gun and our mother bought us a Colt Python revolver to shoot on our property. From then on we ended up buying .45 Colt Single Action Army revolvers, custom 1911s in .45 ACP, and that was the beginning.

**KD** – What sparked your interest then to start shooting in competitions?

**TB** – My brother John and I read magazines like *Guns and Ammo* and *American Handgunner*, and enjoyed articles by Ross Seyfried and Mickey Fowler. They were two of the top competition shooters at the time. I went to the gun show in Costa Mesa and saw videos of Rob Leatham and Jerry Barnhart shooting at The Nationals. I bought the VHS and still have it. My brother was following the IPSC shooting sports back in the 80s and ended up taking me to the Steel Challenge. I got to meet Ross Seyfried and Brian Enos; I was only 13

**80** years old, but I knew that someday this is what I wanted to do. We also watched the police championship competition sequence in “Magnum Force” and that got us really excited. Also a particular episode of Miami Vice where Sonny Crockett goes and practices like crazy, training like a madman to prepare for a shootout with his Bren Ten high-capacity 10mm.

I found out Micheal Mann hired the two-time Southwest Pistol League champion Jim Zubiena. Zubiena took Micheal to competitions and went on to intensely train Don Johnson. In episode one there’s a famous scene where Jim draws from concealment and performs an unbelievably fast Mozambique on a guy. This scene is blowing up again recently on social media because it’s so awesome. All of this got me excited to get into competition shooting, never knowing it would lead to me working with Micheal Mann 20 years later on “Miami Vice,” starring Colin Farrell and Jamie Foxx. I ended up working with Mann again on the film “Public Enemies” with Johnny Depp, Christian Bale and Stephen Lang.

**KD** – For someone who is new to competition shooting, what advice can you give?

**TB** – First, start out with the proper equipment. You don’t have to go crazy on price. A GLOCK, for the price, is the best start for a handgun. Go on YouTube and watch videos of the best Grandmaster shooters of USPSA and 3-Gun Champions. Work on your draw and reload, and dry fire a lot. Practice quality over quantity.

**KD** – Do you have tips for 3-Gun competitors wanting to up their game?

**TB** – Study what the top shooters are using, what companies they are using, and what they recommend. Don’t just worry about how you’re shooting. Also, work on smooth transitions from one gun to the next. Be safe and fast when setting them down and picking them up. Make sure they don’t fall off the table or out of the barrel; safety must come first always. Know your point of aim with all three guns at various ranges. You’d be surprised at how many shooters show up at competitions with their guns not zeroed very well.

**KD** – Do you have favorite training drills that you can share with our *Blue Press* readers?

**TB** – Shooting plate racks from various distances will always help in all competition. Switching from all out hosing to taking tight long shots on small plates and then back again. Work on your weaknesses. Most people love to just practice what they’re good at. People who constantly practice shredding the medium- to close-range targets, shooting as fast as they can neglect the smaller targets like the pepper poppers and smaller plates, and suffer on match day.

The number one thing is learn from mistakes. Find out what you’re doing wrong and work on it. Push harder and faster when you’re not shooting. Just because there’s a gun in your hand, doesn’t mean you just kinda jog along slow. I’ve seen full-

on athletes who can run a 100-yard dash in eight seconds, but then put a gun in their hand and suddenly they’re lumbering along like a human sack lunch. It is important to be conscious of your speed when you’re not shooting and covering ground.

**KD** – If a competitive shooter is struggling with a specific element, do you have any mental training tips that you can offer?

**TB** – At every match you will see people in your division kicking ass. Don’t let anyone else’s great run force you to push yourself too fast and make mistakes. Don’t let anything get in your head. Do the best you can. If you have a bad run, don’t throw the match out the window. Always finish the match. Always finish the match as best as you possibly can; no competitor has a perfect match. Even the best on the planet – who seem unstoppable – still whine about tiny mistakes they make during matches.

**KD** – What qualities make for the best (non-celebrity) students? In other words, what do you look for in an ideal student? Do you set expectations for them, goals, etc?

**TB** – They must possess serious desire for what we’re doing. If they come to just have fun and plink around, this style of training is not for them. Usually ones who go fast first are the best once I hammer home the importance of accuracy. Then they learn how to harness that horsepower.

**KD** – What about for your celebrity students?

**TB** – I never planned on this part of my career, but it has become extremely exciting, fun, and interesting working with people I’ve been watching on movies and TV all my life. Many actors enjoy expanding and implementing their martial arts training into their work with firearms. They all want to do the best they can for the film. After Hollywood saw the viral video of Keanu Reeves training on my range, no one had previously seen an A-List actor shoot with that level of speed and precision. I believe it was a “Blair Witch” moment, and that’s just not going to happen again. The popularity of it went viral. “TMZ,” “Access Hollywood,” “Good Morning America,” etc. interviewed Keanu Reeves about his training for “John Wick 2.” It was all the buzz.

After the “Keanu Shredding with Taran Butler” video came out on YouTube, many other movie stars and film productions reached out to me to help them up their game for the big screen.

Keanu has recently worked harder than anyone to outperform himself in “John Wick 3: Parabellum.” Keanu’s dedication is why he is so good. It is his internal desire to be the best that sets him apart. Credit also goes to the Director of the John Wick movies, Chad Stahelski. His vision with Stunt Coordinator J.J. Perry to train the actors to the best of their abilities prevented them from using shaky camera work and choppy editing.

**KD** – You must get quite a sense of satisfaction watching a finished movie after training an actor to shoot at your ranch, right?

**TB** – Absolutely. One of the best moments in my life was sitting in the theater watching “John Wick: Chapter 2” with the team at Taran Tactical and all of my local friends, seeing the countless hours of hard work pay off. Our team faces crazy crunch times and have still been able to turn out equipment at record speed to the John Wick crew in LA and New York, including: switching out guns and gear last minute, completely starting over from the ground up, and making any necessary tweaks during filming with Gary Tuers of Xtreme Props.

We custom-built four guns for John Wick to use: the GLOCK 34 Combat Master, the GLOCK 26 Combat Carry, a TTI Benelli M4, and a TTI TR-1 Ultralight AR-15. At the time, the work is rough, hard, and stressful as hell, but in the end it’s definitely worth it.

**KD** – You developed new guns for “John Wick 3.” What makes these firearms unique?

**TB** – Chad Stahelski wanted to go to the next level for “John Wick 3.” I suggested that we build a custom STI 2011. We decided to use the more powerful 9mm major from ASYM Precision

Ammunition. We also developed a custom GLOCK 19 Combat Master for Halle Berry’s character. “John Wick 3” will also feature a TTI Ultimate Benelli 3G M2, and both a carbine and pistol version of the TTI SIG Sauer MPX, with a Trijicon MRO/Streamlight TLR-8 on the MPX carbine, and a Leupold Delta-Point/Crimson Trace 206 Laser combo on the MPX pistol.

**KD** – Do you have a criteria for selecting which firearms you customize? Is this new GLOCK available through Taran Tactical?

**TB** – John Wick’s STI 2011 Combat Master is exclusively available through Taran Tactical Innovations, including four additional new custom TTI guns featured in the film.

Finally, we want to mention that Taran’s training has had such a positive effect on the overall gun handling in Hollywood. In the past, you could just about count on contrived and inaccurate gun scenes in many movies. Thanks, Taran, for being a passionate crusader in our industry. And our **Blue Press** team thanks you for your hospitality while visiting your ranch.

# Jade Struck

*Continued from Page 78*

mental toughness and training is more important than physical training; however, I work on both always. I train every day in different ways; I go to the gym at least once a day where I push myself physically to be agile, strong, explosive and conditioned while also pushing myself mentally by doing what my body says I can’t, building a strong, calloused mind. I nurture my body by supplementing, drinking tons of water, eating healthy, and resting when I need to.

Listening to my body is the most important thing when training physically. When I’m on the range – which is almost every day – I take what I’ve worked on in the gym and integrate it behind the gun. I work on my weaknesses like hard shots/far shots and effective use of movement. I believe there is no training for a major match quite like a match itself; therefore, I shoot local matches as often as possible, working on my mental game the whole time to prepare for majors. I believe it’s the most effective way to train.

**KD** – What is the best part of working with celebrities? Who have you trained?

**JS** – The best part of getting to work with celebrities and people in the entertainment industry is just getting to know them and seeing how at the end of the day we’re all the same, we are all people. We all have dreams and aspirations, helping them achieve their dreams is the most fulfilling part of teaching for me personally. Keanu Reeves, Mark-Paul Gosselaar, Jon Bernthal, Shemar Moore, Joel Kinnaman, Lydia Hearst, Jenna Elfman, Garret Dillahunt, Michelle Rodriguez and Chris Pine are among some of the talented actors we have had

the pleasure to work with. I’m beyond grateful for the opportunity that Taran has provided me with being a part of TTI.

**KD** – Walk us through the steps of what you do to prepare an actor to handle and shoot a firearm for a scene? I assume some have experience while you get others that are new to shooting.

**JS** – When working with anyone, celebrity or not, our goal is to make them a shooter. We cover all the bases, first things first, safety. Once they are familiar with the equipment we are using and how to properly handle it, we work on grip/stance, draws, reloads, movement, everything. Our goal is to give a final product that is complete, so when the actor is asked to do a specific task, like reloading behind cover or transitioning to a secondary weapon, for example, they can do so confidently. Even more so, we teach them as many variations as possible to doing things like reloading, transitioning, and gun handling in general so if they are asked to do it differently, they will know how to adapt and execute the scene to the best of their ability.

**KD** – What are your personal goals for the future?

**JS** – I just want to be better than I was yesterday, mentally and physically. I have aspirations of being a working actor, stuntwoman, competitive shooter, creator and artist. I want to do it all, and I will. One day at a time.

Pretty amazing, right? We had a fabulous day with you, Jade. You and I became fast friends. Thanks for sharing your talents with all of us at Dillon Precision.

# 101 Classic Firearms 83

John Marshall's book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, is a compilation of the author's popular articles appearing in **The Blue Press** since 2007. **101 Classic Firearms** is sure to be a prized addition to the library of any serious firearms enthusiast.

Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on some of the

**P17-40133 \$29.95**

world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in **The Blue Press**, **Gun Digest**, **Guns & Ammo's Handguns**, and **American Gunsmith**. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. John is also an endorsement member of the National Rifle Association.

**Kershaw Knives** and **Emerson Knives** have joined forces on a series of knives that combine the precision engineering of Kershaw with Emerson's uncompromising functional design. The CQC-6K features a modified clip-point blade for versatile cutting ability. The blade has two finishes: a satin finish on the upper and a stonewashed finish on the grind. The handle's front scale of textured G-10 offers a secure grip and the handle's stainless steel back has a solid frame lock. The CQC-6K is a manual opener using either the thumb disk or the patented Emerson "wave shaped feature." This opening feature enables the knife to be opened as it is removed from the pocket. The pocketclip is reversible for left- or right-handed carry.

Blade length: 3.25" Closed: 4.5" Open: 7.75"

**P17-31320 \$54.99**

Designed by Belarusian custom knifemaker Dmitry Sinkevich, the new **Kershaw Pub** looks like nothing you've ever seen. Closed, you'd never know there was a handy blade inside – although you would definitely see the equally handy bottle opener. And if you were exceptionally sharp-eyed, you might notice the slotted screwdriver tip right next to the bottle opener. To reveal the blade, just push down on what looks like the key ring attachment. You'll see the blade move out of the compact handle. Keep pushing and the blade will swing all the way out, ready for use. The blade is a modified sheepfoot with a straight edge and clipped rather than rounded tip. The handle has an anodized aluminum front scale in bright blue and a steel back.

Blade length: 1.6" Closed: 3.1" Open: 4.5"

**P17-31323 \$24.95**

## The Larry™ Pocket Work Light

The Larry™ 8 LED Pocket Work Light is the essential handyman light. 8 powerful LEDs provide 60 lumens of bright white light. The rotating magnetic clip gives you convenient hands-free lighting. The reinforced plastic body design is shock-proof and water-resistant, making the Larry™ basically indestructible. Uses 3 AAA batteries.

**P17-15432 \$9.99**

**Poppy™** – A combination 300 Lumen C•O•B lantern and 120 Lumen LED spot light. Poppy is the ideal light for indoor or outdoor use when versatility and powerful lighting are critical. Poppy easily changes from spot light to lantern with just a slide of its top, revealing a full 360° C•O•B lantern. The handle is designed to easily adjust to serve both light modes. *Note: Assorted colors, no color selection. Uses 3 AA batteries.*

**P17-00116 \$16.99**

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# 84 Wise Company's "Grab & Go" Emergency Food Kits

Wise Company's **18 Wise Favorites 72-Hour Kit** includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.

Wise Company's **60 Serving Gourmet Entrée Only "Grab and Go" Food Kit** includes two servings per day (entrées only) for one adult for one month or four adults for one week. **Product within this Bucket is:** Savory Stroganoff (8 servings), Chili Macaroni (8 servings), Pasta Alfredo (8 servings), Creamy Pasta and Vegetable Rotini (8 servings), Cheesy Lasagna (4 servings), Teriyaki and Rice (8 servings), Creamy Ala King and Rice (8 servings), and Creamy Tomato Basil Soup (8 servings).

Wise Company's **60 Serving Gourmet Freeze Dried Meat "Grab & Go" Food Kit** includes 60 servings of assorted gourmet-seasoned freeze dried meat and a 20-serving bonus of long-term emergency rice, for a total of 80 servings. **Product within this Bucket is:** Roasted Chicken (12 servings), Teriyaki Style Chicken (8 servings), Cheesy Beef (8 servings), Southwest Style Chicken (12 servings), Savory Roasted Ground Beef (12 servings), Stroganoff Style Beef (8 servings), and Long-Term Instant Rice (20 servings).

Wise Company's **120 Serving Breakfast Only "Grab & Go" Food Kit** includes 120 servings of breakfast assortment (no entrées). **Product within this Bucket is:** Apple Cinnamon Cereal (40 Servings), Crunchy Granola (40 Servings), and Brown Sugar and Maple Multi-Grain (40 Servings).

Wise Company's **120 Serving Freeze Dried Vegetable and Sauce "Grab & Go" Food Kit** includes 120 servings of vegetable and sauce assortment. **Product within this Bucket is:** Corn (24 servings), Peas (16 servings), Broccoli (24 servings), Green Beans (24 servings), Butter Sauce (8 servings), Cream Sauce (8 servings), Cheese Sauce (8 servings), and Mushroom Sauce (8 Servings).

Wise Company's **120 Serving Freeze Dried Fruit and Snack "Grab & Go" Food Kit** includes 120 servings of fruit and snack assortment. **Product within this Bucket is:** Bananas (16 servings), Strawberries (16 servings), Peaches (16 servings), Apples (16 servings), Caramel Sauce (16 servings), Yogurt (16 servings), and Pudding (16 Servings).

## Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.
