Dillon's RF 100 Automatic Primer Filler

Eliminates the need for primer pick-up tubes!

Fills the primer tube while you reload!

Clear polycarbonate shield and protective housing

Dillon's RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of \$47.95 each.

We READ Our Mail!

I want to recognize the outstanding customer support rendered to me recently by your support team, especially Eric. My RF100 Primer Filler began to jam primers into the feed ramp, causing primers to stop falling into the primer tube, or, worse yet, flip upside down, resulting in my Super 1050 loading a round with an upside-down primer. Most frustrating! Eric was able to diagnose the problem and proceeded to send me a complete RF100 update kit at no cost. The directions for modifying my electric primer filler were clear and easy to follow. After a follow-up telephone call with Eric – for a minor shim adjustment to the stabilizer plate – I'm back in business with a tool working better than it ever has. Thanks, Dillon, for products which lead the industry in accuracy, reliability and customer support.

Ralph Talbot – San Antonio, TX

I bought my first Dillon RL 550B some years ago. It has been a fantastic press and I cannot even imagine how many rounds I have loaded with it. I am a pistol shooter: 9mm, .45 ACP, .45 Colt, and .38 Special. The 550B has been a very reliable and fun press to use. Like others, I think I have as much fun reloading as I do shooting! So, since I shoot a LOT of 9mm, I thought I would take it to the next step. I called in and talked over my needs with several of your very helpful folks on a couple of different calls. After consideration, I ordered a Super 1050. I set it up and OMG, what an incredible machine! Set up was very easy. I thought loading on the 550B was fast, easy and fun. This machine is like a Ferrari. Loading is smooth and easy. In my case, this machine will stay set up for only 9mm. I will use my 550B for other calibers. Why didn't someone tell me about this before? I could have had this set up years ago! Keep up the great work!

Bill Bretgar – Marietta, GA

I recently purchased a Square Deal B (about 17 years ago) and I just sent it back because the mounting base snapped. I received it back totally refurbished and upgraded in about three weeks. Plus, due to your No B.S. Warranty, there was no charge. What kind of company do you run? I can't bitch and moan, and the service was just too good. Seriously, though, thanks for so many years of service. This is why I always tell people to pass on the other loaders and go for the best: BIG BLUE. You will not be disappointed.

Richard Magnani – Brockton, PA

Thanks Ralph, Bill and Richard, for your letters. We really do appreciate it when happy customers give us positive feedback.

Which Dillon is Right

Square Deal "B"

Dillon's Square Deal "B" was designed to produce large amounts of ammunition in the least possible time for just a little bit of money. At 300 to 400 rounds per hour, you can produce enough ammo for several pistol matches or practice sessions in just a few hours.

See Page 8

RL 550B

More RL 550s have been sold than any other progressive machine in the world, and for good reason: The RL 550B's versatility is almost unlimited. It will load over 160 different rifle and pistol calibers. Its quick-change tool-head allows the user to change calibers without having to readjust dies.

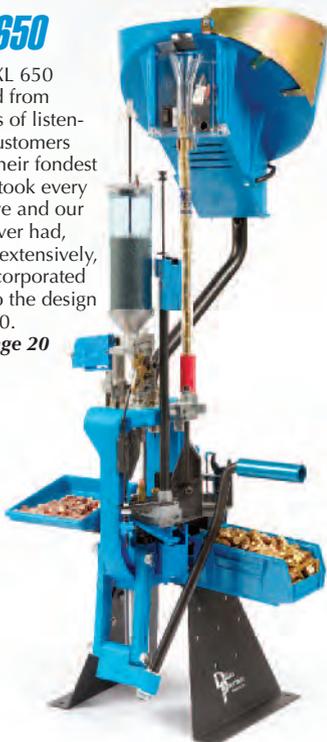

See Page 14

XL 650

Dillon's XL 650 resulted from several years of listening to our customers expressing their fondest wishes. We took every good idea we and our customers ever had, tested them extensively, and then incorporated them all into the design of the XL 650.

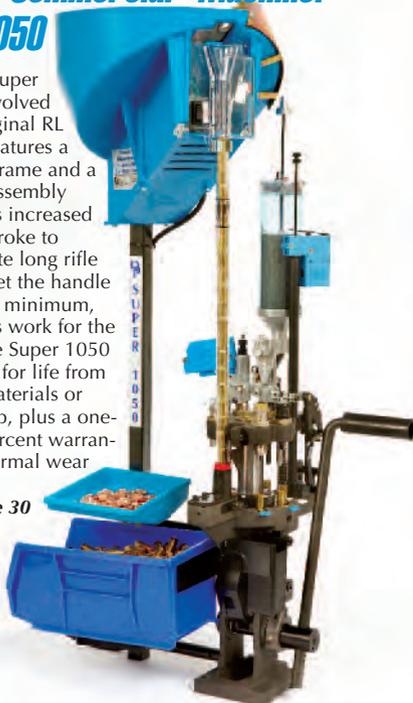

See Page 20

Dillon's "Commercial" Machine: Super 1050

Dillon's Super 1050 evolved from the original RL 1050, and features a lengthened frame and a new crank assembly that provides increased functional stroke to accommodate long rifle cartridges, yet the handle stroke is at a minimum, meaning less work for the operator. The Super 1050 is warranted for life from defects in materials or workmanship, plus a one-year, 100-percent warranty against normal wear and tear.

See Page 30

ht for YOU?

7

BL 550

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

See Page 13

RL 550B With Accessory Casefeeder

Adding an automatic casefeeder system to your RL 550B will easily increase your ammo production rate by 25 percent or MORE! The casefeeder streamlines the loading process by reducing hand movement, and the RL 550 Casefeeder uses time-tested, proven technology.

See Page 17

Dillon's "BFR" Big Fifty Reloader

You KNOW you want one! There's nothing quite as thrilling as touching off one of those .50 BMG cartridges and sending 750 grains of copper-jacketed lead downrange. WAY downrange! If the cost of loaded .50 BMG ammo has been putting you off, you no longer have an excuse.

Join the ranks of the LONG-range target shooters and roll your own .50 BMG (and other long-range, specialty cartridges) on Dillon's BFR.

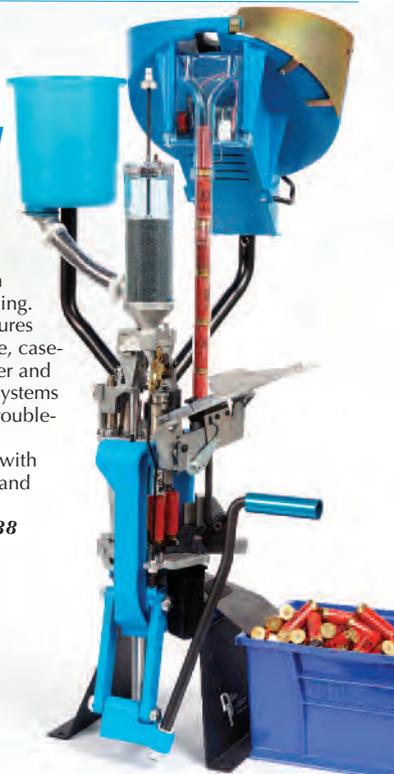

See Page 50

SL 900 Dillon's Shotshell Loader

Dillon's SL 900 is the new standard in shotshell reloading. The SL 900 features easily adjustable, case-activated powder and shot dispenser systems that eliminate troublesome bushing changes, along with spilled powder and shot.

A NEW BREED OF CAT: Ruger

Reviewed by Peter Caroline

Several weeks before the 2013 SHOT Show, I received a press release from Lipsey's, announcing a new Ruger handgun that would be exclusive to that Baton Rouge, LA, distributor. This new arrival was a Bearcat revolver, entitled the Shopkeeper, but it was unlike any previous Bearcat on the market. It was all stainless steel construction, including the ejector rod housing, and featured a 3" barrel and a handsome set of laminated wood birdshead grips. The fit and finish were excellent. I'll have to admit...it was just so damn cute, I had to have one to try out. So I contacted Jason Cloessner at Lipsey's, and he

told me they'd have one at the SHOT Show, so I could get a close-up look.

The Bearcat Shopkeeper was, as promised, at the Lipsey's booth, and was certainly drawing its share of attention. I had to wait my turn to get my hands on it. This is a very attractive little gun. The proportions and balance are just right. The 3" barrel and birdshead grip go together very well, and the gun seemed to fit my hand perfectly. The ejector rod button is an unusual crescent shape, which enables it to slip over the base pin head so the ejector has sufficient travel to punch an empty casing out. The sights are typical single-action-type sights, a 1/4"-high blade in

Bearcat Shopkeeper .22 LR ¹¹

the front, and a square notch in the rear. I was thinking, this could be a super little kit gun or snake gun, small enough to stuff in a vest pocket or fanny pack, but just large enough to be easy to aim. At home, I keep an old Colt Officers Model Match .22 around for packrats, but it's far too large and weighty for hiking around. The Bearcat would be perfect.

About two weeks after I returned home from the SHOT Show, my sample Bearcat Shopkeeper was delivered to my door. It came in a sturdy gray plastic hard case that was obviously built for a larger revolver, and was accompanied by a massive Ruger-marked padlock, a Bearcat instruction manual with Shopkeeper-specific insert, and a fired specimen cartridge, which some states require for their own mysterious purposes. The gun itself measures 7-1/2" long, and weighs just about 23 ounces.

My first trial of the Shopkeeper was out in the desert, popping away at golf balls. I was using CCI Blazer ammo, mainly because I have a large quantity, and it seems to work very well with just about every .22 I've tried it in, rifle or pistol. From offhand, the gun seemed to shoot consistently low, which is usually the case with a single action with fixed sights. The trigger pull is very crisp...it

measures about four pounds, but feels like less. Fired case extraction can be a bit touchy at times. At its rearmost position, the ejector rod protrudes about 1/3" from the rear of the cylinder. A fired .22 LR case is a bit less than 2/3" long. As a result, you have to give the ejector rod button a fairly hard poke to the rear to expel the case from the chamber. Otherwise, you have to hook a fingernail over the case rim to pull it free.

When I did take the Shopkeeper to a real range, I set up a sandbag on the bench and put a target out at 15 yards. I was quite impressed with the results. Five-shot groups varied from 7/8" to 1-1/4", and for whatever reason, the gun didn't seem to be shooting quite as low as it did when I was firing it offhand. In any case, the gun seemed quite capable of minute-of-packrat accuracy.

The Ruger Bearcat Shopkeeper is one neat little revolver, and once you wrap your hand around it, you won't want to let it go. The MSRP is \$649 (probably less in the real world), but that's a realistic price for a carefully crafted stainless steel single-action with not one bit of plastic on it. If your local dealer doesn't have one in stock, he can order it from Lipsey's.

BL 550 Dillon's Basic Loader

\$259⁹⁵

K75-15399

Reloading Dies and Caliber Conversions sold separately (see the back of the order blank in the center of *The Blue Press*).

Pictured with optional accessories:
Strong Mount K75-22051 \$47.95

Dillon's RL 550B has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550B loader!

The interchangeable toolhead (*Page 15*) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don't even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are \$22.95 each, or \$20.95 each if you buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them.

A powder measure adapter (*bottom right photo*) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Spares, Accessories & Upgrades for AT 500s, BL 550s & RL 550Bs

AUTO PRIME SYSTEM

Includes:

Bullet Tray Kits

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the "feel" of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

Bullet Tray Kit **K75-22214 \$41.95**
RL 1050 Tray Kit **K75-22215 \$19.95**

Quick- Change Dust Cover

Quick-Change Cover for use with powder measure. **K75-11143 \$14.95**

Accessory Package Deal

Includes: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman *Reloading Handbook* (not pictured, see Page 82).

K75-21143 \$181.95

RL 550B (Electronic Scale)

K75-22117 \$250.95

Low Powder Sensor

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

K75-16306 \$41.95

Roller Handle

Dillon's accessory handle gives your reloader an entirely new "feel." A roller handle reduces operator fatigue during long reloading sessions and makes primer seating easier.

Alum. Roller **K75-17950 \$45.95**
Plastic Roller **K75-22183 \$40.95**

Belted Magnum Powder System

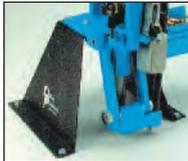

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Magnum Powder System

K75-97126 \$142.95

Strong Mounts

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong

Mounts increase the machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top.

All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

RL550/XL650 **K75-22051 \$48.95**

Dillon's Case Preparation Equipment

CV-2001
K75-20493
\$188.95

CV-750 K75-19455 \$144.95

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine!

The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench.

It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

CM-2000 Case/Media Separator K75-20675 \$73.95

CM-500 Case/Media Separator K75-21045 \$46.95

Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Attention European Customers:

Case Cleaners are available in 220 volt!

Euro CV-2001 K75-22047 \$213.95

Euro CV-750 K75-19473 \$169.95

All Dillon CV-2001 and CV-750 Vibratory Case Cleaners have a One-Year Warranty on the electric motor.

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded

ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **K75-13804** **\$8.95**
Case (20 pc.) **K75-20255** **135.95**

Dillon Case Lube

Rapid Lube 5000, Dillon's aerosol cartridge case lubricant, has been replaced by an "environmentally correct," non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge

cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

D.C.L. Dillon Case Lubricant

Dillon's Rapid Trim 1200B Case Trimmer

Makes short work out of trimming large quantities of rifle brass

Dillon's RT 1200B shown installed on an AT 500.

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1200B is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor **K75-22080** is **\$267.95**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately. (Please see chart below). Replacement carbide cutting blades, **K75-13141**, are **\$19.95** each. Upper lock rings, **K75-13559**, are **\$4.99** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes complete with large and small swage rods.

The Safepacker

THE WILDERNESS' SAFEPACKER™ HOLSTER is the ONLY mode of concealed carry that I have personally witnessed save a man's life. It's a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile "un-holster."

- "Government Model" Safepacker, RH **K75-11703 \$89.95**
"Government Model" Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4" K-Frame, 3" N-Frame, etc.
- "Commander" Safepacker, RH **K75-11702 89.95**

THE WILDERNESS TACTICAL PRODUCTS

The Wilderness' Original Instructor Belt is an incredibly strong belt with a specially designed "V" ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We're selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in

order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc. Note: The 1.75" belt works best with BDUs or jeans. The 1.5" belt features a scaled-down buckle.

BLADE-TECH™

“Revolution” Holster Series

Blade-Tech used its extensive knowledge of Kydex® holstermaking to bring you the Revolution line of holsters. Using a proprietary blend of polymers, Blade-Tech has engineered these holsters to offer lifetime performance in a wide range of conditions. The holsters won't become soft in extreme temperatures (over 300° F) and won't become fragile in low temperatures.

Dillon's Pistol Die Sets

Size Die

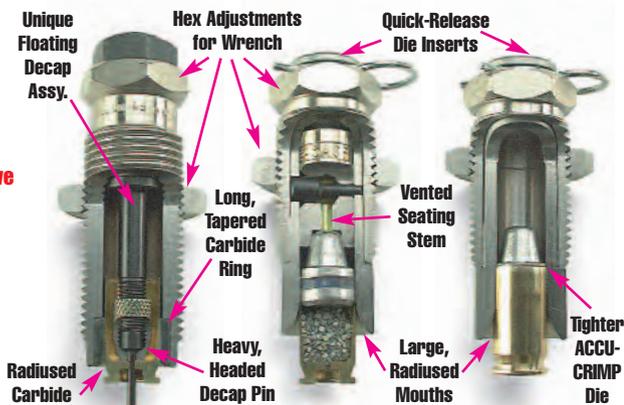

- Floating Decap Assembly Eliminates Primer "Draw Back"
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

Seat Die

- Reversible Seating Stem Makes it Easy to Change Bullet Styles

Crimp Die

- Quick Disassembly, Easy to Clean

Sizing/Depriming Die

Our sizing/depriming dies feature a unique "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the problem of primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die

Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We've always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

Crimp Die

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

NOTE: All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

---------------	-----------	--------

Dillon's Rifle Die Sets 35

Size Die

- Full-length, to minimum tolerance
- Carbide expander ball
- Features stuck case remover

Seat Die

- Designed to hold bullet straight throughout the seating process

Taper Crimp Die

- Centers case neck and body for a more uniform crimp

Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

Sizing/Depriming Die

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Extra Loading Data Labels, K75-10446, Package of 100, \$6.95

Try a few of Dillon's heavy-duty, lightweight plastic ammo boxes. If you're like us, you're tired of crumbling styrofoam and cardboard boxes held together with layers of tape. These boxes are perfect for range or field use. Designed to keep out dirt, dust and rain.

Dillon AkroBins

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

\$79⁹⁵

"Wild Bunch" 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene "Evil Roy" Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the "Wild Bunch" category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol's grip frame

away from your body so you'll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn't in your way; above the belt line so the belt doesn't interfere with the draw; and at the max depth required by the sport – and no more – so you'll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

1911 Holster **K75-19947 \$139.95**
Mag Pouch **K75-19946 44.95**

**Three-Shell Aluminum Stripper accommodates 2-3/4" shells only.*

AP Custom USA Shotshell Carriers/Caddies, Mag ID Kits

AP Custom USA's Shotshell Caddies are 100-percent machined from solid billet aluminum. The **4x4 Shotshell Caddy** holds four 2-3/4" 12 Ga. shells in two adjacent slots. The 4x4 is designed for loading four shells at once, either strong- or weak-handed. The **3x3 Shotshell Caddy** holds three 2-3/4" 12 Ga. shells in two adjacent slots.

The **QL/4 Shotshell Carrier** is a four-round 12 Ga. "quad-load" system consisting of a single QL shell carrier mounted to an adjustable billet aluminum backer plate on a Blade-Tech Tek-Lok. The QL/4 backer plate allows the shooter to adjust the angle of the QL to his or her liking. The backer plate is also drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments. The **QL/8 Shotshell Carrier** is an eight-round 12 Ga. "quad-load" system consisting of two QL/4 shell carriers.

AP Custom USA's **Mag ID Kits** enable you to color code and number your P-Mags and pistol magazines.

TACCOM, LLC Tactical and Competition Accessories

TACCOM, LLC's Duaload Shotshell Holder is available in 2-, 4-, or 6-Shell versions and can be customized to carry your shotgun ammo in several configurations. The 2Up version can be either attached to a belt or MOLLE gear, and the 4Up and 6Up versions feature a **BLADETECH Tek-Lok™ Universal Belt Clip (included)** that can be attached at various angles. The Duaload allows you to grab two shotshells aligned in such a manner that it makes it easy to load two at a time into your shotgun.

2Up Belt/MOLLE	K75-19530	\$9.95
4Up w/Tek-Lok™	K75-19531	29.95
6Up w/Tek-Lok™	K75-19532	34.95

TACCOM, LLC's Quaload Shotshell Holder is a serious game changer! It's so radical that they are patenting the device. The Quaload holds the 2 columns of shells next to one another, you can't get any closer than having them touch. No other quad load device can do this! This allows for you to control how the shell come out of the holer and not have to worry about rim overlay...the rims are already overlapped in the correct position!

4Up Quaload Shotshell Holder	K75-19543	\$39.95
8Up Quaload Shotshell Holder	K75-19544	69.95

A close-up photograph of several brass bullet casing heads, showing the primer and the textured surface of the brass. A large, stylized red 'X' is overlaid on the image, with the words 'X-TREME' and 'BULLETS' positioned on either side of its arms.

CLASSIC FIREARMS: Colt Versus

By John Marshall

In the “Roaring Twenties” the standard police sidearm was a .38 Special revolver. These guns were also most often preferred for home protection by the citizenry at large. Although the newer semiautomatic pistols were finding favor, the revolvers made by two dominant manufacturers were very popular as personal self-defense arms. Those two competing companies were Colt and Smith & Wesson. While similar in appearance, each brand’s products had distinguishing features. The 1920s proved to be a turbulent decade, with prohibition in full force and organized crime becoming a real challenge for the police.

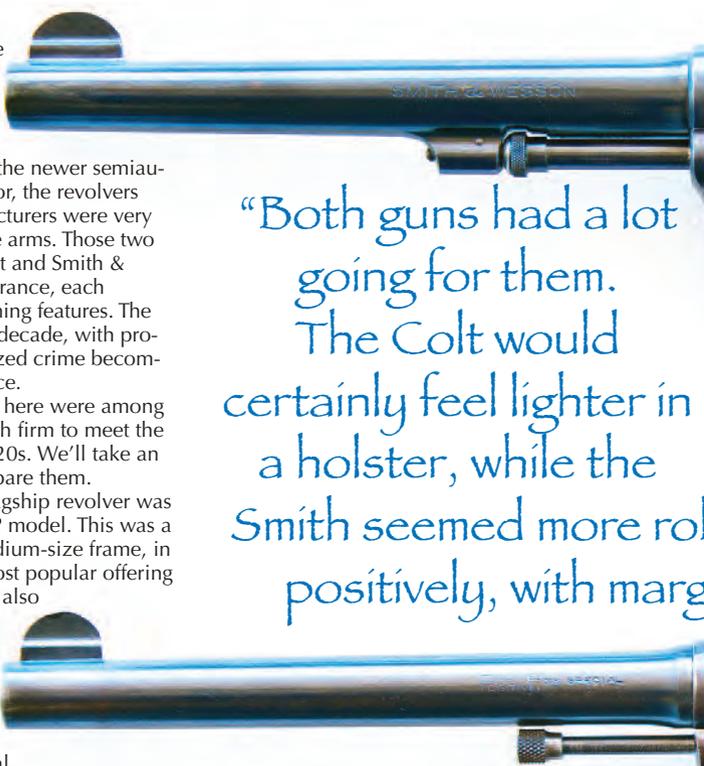

The two revolvers illustrated here were among the most common made by each firm to meet the law enforcement needs of the ‘20s. We’ll take an in-depth look at each and compare them.

With Smith & Wesson, its flagship revolver was the Military and Police, or M&P model. This was a six-shot revolver utilizing a medium-size frame, in various barrel lengths. Colt’s most popular offering was the Police Positive Special, also a six-shot revolver on a slightly beefed up smaller frame. Colt also offered a variety of barrel lengths at the time. For each brand, the hands-down favorite caliber for law enforcement was the .38 Special.

Representative specimens of each revolver are compared here. Both of them have six-inch barrels, and both are .38 Special firearms. Here are their comparative specifications.

The S&W M&P featured here was manufactured in 1923. It’s known now to collectors as the Model of 1905, fourth change. It weighs one pound and 15 ounces, and measures almost exactly 11 inches from muzzle to butt heel. The Colt Police Positive Special came from the factory in 1922. It’s from what collectors now call the first series. It’s a bit lighter than the Smith at one pound and eight ounces; its length is somewhat shorter at 10.5 inches. The grip and the frame of the Smith are somewhat beefier than on the Colt, and the barrel is a bit thicker in diameter. Both are equipped with checkered wooden grip panels. The Colt standard at the time was checkered rubber for the grips, but this one had the upgraded wood examples. Both guns have square, rather than rounded grip frames, a style much preferred by law officers of the day.

The cylinder release pushes forward on the Smith, while the Colt must be thumbed rearward. The Colt cylinder rotates clockwise when viewed from the rear. The hand, which pushes the cylinder around, is located on the left side and tends to force the cylinder into the frame. The Smith cylin-

“Both guns had a lot going for them. The Colt would certainly feel lighter in a holster, while the Smith seemed more robust positively, with marg

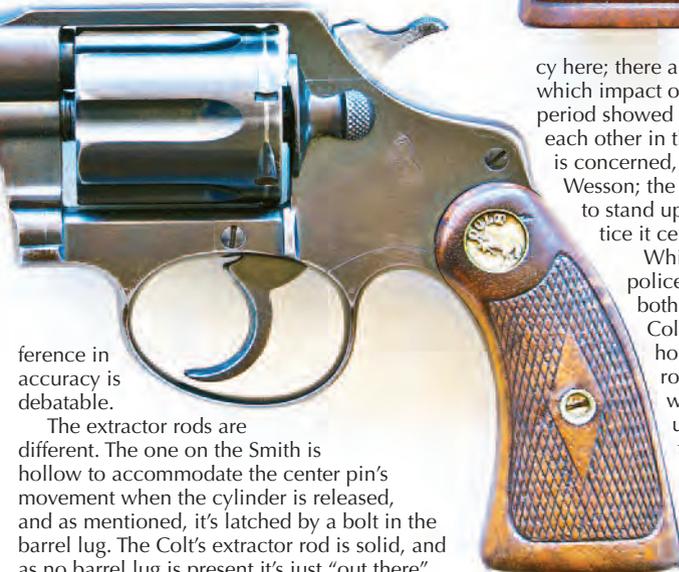

der rotates counterclockwise, and the action of the hand, located on the right side, tends to push the cylinder out of the frame. The Smith “K frame” action was introduced in its first form in 1896; the “D frame” Colt Police Positive action in 1907. Both actions in the 1920s provided internal safeties to prevent the hammer going all the way forward until the trigger was pulled completely to the rear. The S&W system was improved in the 1940s, while the Colt system continued on into the 1980s.

The Smith has a three-point lockup for the cylinder. From rear to front, these are the center pin protruding into the rear surface of the frame’s cylinder window, the cylinder stop clicking into a slot in the circumference of the cylinder, and a locking bolt in the barrel lug fitting into a hole in the tip of the ejector rod. The Colt has no barrel lug, and thus has only a two-point lockup; a hefty projection on the cylinder release fitting into a hole in the middle of the ejector star, and the cylinder stop fitting into a cylinder slot. The Colt two-step hand continues to press against the cylinder ratchet at the moment of firing, however, making for a tight lockup at that moment. In contrast, the single-step Smith hand slides off the ratchet at that point, and a small bit of cylinder wobble will always be present at the point of firing. Whether or not this makes a practical dif-

s Smith & Wesson in the 1920s

robust and handled more marginally better sights.”

ference in accuracy is debatable.

The extractor rods are different. The one on the Smith is hollow to accommodate the center pin's movement when the cylinder is released, and as mentioned, it's latched by a bolt in the barrel lug. The Colt's extractor rod is solid, and as no barrel lug is present it's just "out there" unsecured by anything in front of the frame. The Smith's internal springs are a mixture dominated by coil springs, while the Colt uses mostly more complex leaf springs. The removable sideplate of the Colt is on the left side, while on the Smith & Wesson, it's on the right. Famed exhibition shooter Ed McGivern preferred the Smith action to that of the Colt for smoothness. The Colt system is trickier to work on, so the Smith internals are much preferred

by gunsmiths who are faced with working on both. In my subjective opinion, the double-action trigger pulls are about equal in poundage, with a slight edge to the Colt with a bit lighter pull. The Colt action can be "staged" easier than the Smith, pulling back with a double-action pull to the point where the cylinder locks, and then completing the pull to fire it. This technique is not, by the way, recommended by the experts, but bears mentioning. The single-action letoffs weighed 6-1/4 pounds for the Colt, and 5 pounds for the Smith.

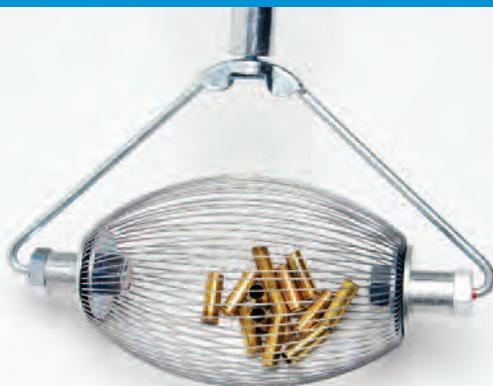

The sights on these guns are practically identical, with a groove in the top strap for the rear sight, and a half-moon style front sight. A slight edge in visibility goes to the Smith, as the rear sight groove is squared off rather than "U" shaped, and the front sight is slightly thicker.

Fit and finish on both guns is comparable, with a slight edge to the Smith for its lustrous bluing. The Smith's larger grip is more hand filling.

I won't address accuracy here; there are too many factors to consider which impact on this quality. Literature from the period showed both guns to be on a par with each other in this department. As far as handling is concerned, I much prefer the beefier Smith & Wesson; the Colt seems almost too diminutive to stand up to rough usage, although in practice it certainly did.

Which would I choose if I were a police chief in the 1920s? In retrospect, both guns had a lot going for them. The Colt would certainly feel lighter in a holster, while the Smith seemed more robust and handled more positively, with marginally better sights. My unit armors would probably prefer the Smith to work on. I'd sooner hit a thug over the head with a Smith than a Colt; a bent ejector rod could disable that revolver a bit easier. The U.S. Bureau of Investigation, forerunner to the FBI (which was not organized until 1934), used S&W M&Ps. In the final analysis, Colt pretty much gave up on the double-action revolver business by the 1990s, while Smith & Wesson continues to march on with an impressive array of revolver choices to this day. However, both of the guns reviewed here were more than suitable for that time in history, and each of them helped significantly to make the 20s roar!

SAVE YOUR BRASS!

Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K75-21894 \$44.95

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

Concealed Carry Tote⁴⁷

\$45⁰⁰

K75-18193

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!

This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged fabric, with heavy duty zippers on all three main compartments – one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.

Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5" x 11" paper note pads, etc. Measures 13.5" x 11.5" x 6.5" deep.

'Plan B' Day Planner

Dillon's "Plan B" Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

HALEY DUNN: THE

By Robin Taylor, www.taylorfreelance.com
 Photos by Lynne Green, www.GreenGirlPhotos.com

"We shouldn't have to say it like this, but Haley Dunn handles a shotgun like a guy," says veteran shotgunner Mark Weeks.

That's putting it mildly.

Dunn's near-flawless performances remind me of the old air defense artillery slogan "if it flies it dies."

"Normally there's a 10-target difference between the guys and the girls," Weeks continued, but when it comes to Haley Dunn, that's just not the case.

Weeks and Dunn shot on the USA Shooting National team together for roughly 10 years, becoming "alternate" athletes for the 2004 and 2008 Olympic games. Haley started in sporting clays as a pre-teen, then began a long love affair with skeet that wowed the world at age 15. She's in her 20s now, and Iowa's young lioness will soon join 60 professional shotgunners on NBC Sports. Together they're launching the brand-new Professional Sporting Clays Association (PSCA) – the first true "professional" league for shotgun sports.

Practical Wingshooter

For the other seven women that qualified for the pro tour, Dunn's appearance must be a little daunting. Dunn's an all-around competitor, honed by Olympic skeet coaches on one side, and a deep history in sporting clays on the other.

Sporting clays (like USPSA or IDPA) doesn't have a fixed course of fire. Targets come from every possible angle. Targets fly over from behind, bound straight up, cross at 70 miles per hour, even roll along the ground.

"Challenging" seems too soft a word. In trap and skeet, shooters break practically every target, so they count misses instead. In "sporting," shooters talk about how many targets they *broke*.

Haley got the sporting bug when her dad opened a sporting clays range when she was 10. Haley started shooting a 20-gauge Beretta Onyx, but "if I wanted to shoot I had to load my own ammo," she says, then laughs. "I ran our little MEC press A LOT."

Competitive shotgun asks you to stand side-by-side with the person who's trying to beat you and watch each other attempt each target. Sounds simple, but the psychology is different than typical rifle or pistol events where everyone shoots at once. Sporting clays in particular pairs you with a small group and you walk the course together. Put \$5,000 or a shot at an Olympic medal on the line at a shotgun shoot, and emotions get pretty tight. After years of that sort of pressure, Dunn's mental game is ironclad.

"She's very even-keeled," says Russ Arnold, ACUI's head administrator for international shotgun at colleges across the United States. "If

she's having a good run versus a bad run, it's hard to tell."

Between rounds Haley is "daddy's little girl from Iowa," according to Weeks. Arnold describes his former top star as "unassuming, very laid-back." She plays cards and socializes waiting for her round to start, then she'll wander off a few minutes before the round starts to "get her head right."

When she returns (says Weeks) Haley becomes *the ice queen*.

"She's fierce," he marveled.

That intensity flows from years at the top. It's something she switches on or off as needed. Haley won the first major she ever shot at just 14. She started shooting sporting clays events around the United States that same year.

"We didn't even know that shooting was an Olympic event at that point. All we knew was sporting clays," says Haley.

Start of a Legend

Haley's Olympic career began like a Hollywood movie. A chance meeting between her father and Olympic shotgun coach Lloyd Woodhouse at SHOT Show got Haley an invitation to the Olympic Training Center in Colorado Springs. She'd been invited to compete for a spot on the junior international skeet team. But...

"I didn't have a clue how to shoot International Skeet," says Haley.

Succeeding as a "walk-on" at a Junior Olympic qualifier...just doesn't happen. International Skeet is too specialized – but Woodhouse felt she had potential and asked her to come out a week early, promising to show her the ropes. If she showed promise, she might qualify for the team in a year or two. Dad drove her out to Colorado, dropped her off, and Woodhouse spent mornings training her.

Woodhouse hit the jackpot. She wasn't just "good" – she was spectacular. Having not shot International Skeet until a week before the camp, she shot 50 straight in practice, and placed second in the Junior Olympic qualifier. The family drove home and chatted about the possibilities. Then Coach Woodhouse called, asking if Haley would be interested in representing the United States in Cairo, Egypt.

Remember, Haley is just turning 15, having shot international skeet for the first time a month ago. I can just imagine Haley's father responding with "Wait, did you say, *Egypt?*"

She'd have to shoot some more qualifier events, but the chance was real.

Haley went on to win the Junior category in skeet in Cairo that year, and again in Suhl, Germany.

"That was 2001, and I've been doing it ever since."

LIONESS RETURNS

The Gun

Where pistol shooters cycle through different firearms depending on what they need that day, shotgun shooters stick with one basic gun. Each is fitted to the shooter like a suit of clothes, and will stay with them for years. Haley's Beretta DT-11 shrugs off international travel while burning 2,000-plus shells per month. Fitted to her by Jim Greenwood at Greenwood Custom Stocks, it burns a steady diet of 24-gram No. 9s for skeet, and Bornaghi 1-ounce 7.5s for sporting clays (imported by Able Ammo).

Goin' Pro

Shooting as a pro isn't like playing professional ball. A select few can gather enough sponsorship to shoot and travel profitably, but practically everybody has a day job. "With ammo at \$90 a flat, and target fees running \$50 a round," says Haley, staying competitive takes money. She's been able to qualify for the Olympic development team consistently, and the team supplies 40 cases ("flats") of ammo to all the team members. Unfortunately, she actually needs about 100 cases to get through the year. (That's 25,000 shells.)

Dunn shot for the University of Missouri-Columbia ("Mizzou") on a partial shooting scholarship, then moved into the guesthouse at a private range in Texas in 2008. There she trained for the Olympics and taught shotgun lessons to get by. She hunts a little, plays golf rarely, and until recently has always driven a truck. Her one constant has been shotguns.

Haley spent six years in that guesthouse, training and meeting shooters from all over the world. She helped codify the Carlisle Triangle method in a book, which led to a series of training seminars. In 2011 she joined forces with her old Olympic

teammate Weeks and renowned coach Dan Carlisle to form the Gold Medal Shooting Academy – as their chief instructor. That put a huge drain on her time, and since Kim Rhode had the only available slot to the Olympics sewn up, she turned her attention to sporting clays.

I caught up with Haley just after she'd moved from Houston to Dallas to be closer to the GMSA office. On top of teaching and shooting as a pro herself, she's taken on the role of "athlete liaison" for the PSCA – which for now is almost totally Texas-based. (Texas is to Sporting Clays what Arizona is to practical

pistol – many of the best in the world live here, and the clubs are amazing.)

The PSCA will pay out \$100,000 in prize money at every event, bringing the dream of shooting professionally into focus. But, you've got to beat the halfway mark to get paid. If Haley finishes fourth (out of eight women) she'll take \$1,000. If she wins, she'll take \$5,000. The men face a similar cut-off: 26th pays \$1,000, but first pays \$15,000.

Prime Time for Shotgun

Clay target shooters everywhere are talking about PSCA, but another chance event may alter Haley's path. For

the last 12 years, the United States could send only one woman to represent them in International Skeet. The day before I wrote this, the U.S. Olympic team announced they would send TWO women for international skeet. Having played back up to Kim Rhode for at least 8 of those 12 years, Haley's the obvious favorite to shoot as the No. 2 at Rio de Janeiro in 2016. She'll be shooting "sporting" on national TV, then competing for that coveted Olympic berth.

Look for her and the PSCA on NBC starting July 27, at 10:30 p.m. Eastern.

RCBS EQUIPMENT

Dillon's New Bench Wrench Fits new 1" die lock rings

Trim Pro™ Case Trimmer Kit K75-15021 \$119.95

Includes: RCBS Trim Pro manual case trimmer, plus an assortment of shell holders and pilots for most popular calibers. Shell holders 2, 3, 4 and 10. Pilot calibers: 22, 24, 25, 27, 28, 30, 35, 44 and 45.

RCBS Scale Check Weights

Standard Set: 60.5 grains for powder charges.	K75-12297	\$34.95
Deluxe Set: 510.5 grains for bullets, cases and powder.	K75-12458	\$49.95

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a "naked" machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our new wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8" x 14 dies.

1" Dillon Die Lock Ring	K75-14067	\$1.35

Apex Tactical Specialties Armorer's Block

Apex Tactical Specialties' Armorer's Block is designed for S&W Semi Auto M&P Pistols in all calibers, sizes and configurations, including thumb-safety models and the M&P Shield; also for GLOCK® semiauto pistols in all sizes and calibers. The Armorer's Block supports a pistol for armory work and detail disassembly. Its pre-positioned bosses, slots and holes remove pressure from critical function surfaces while pins are driven in and out. High-density polymer construction prevents marring of the frame while driving pins in and out. Made in USA.

Armorer's Block

TACCOM, LLC Accessories for .22 LR AR-15 Conversions 55

TACCOM's **Enhanced Firing Pin** for Ciener/CMMG .22 Long Rifle AR-15 caliber conversions is a direct-replacement firing pin, made from 17-4 SS heat treated to a condition H900, to present a tough, hard firing pin that won't break or mushroom out after many firings. The tip has been designed to stick out of the hole only .030", so you will not damage your barrel by dry firing your weapon.

K75-19538 \$13.95

The **TACCOM Extreme Extractor** is a drop-in part for your Ciener/CMMG .22 Long Rifle insert that will give you consistent extraction, which is **KEY** for a reliable firearm. This will help with your live-round extraction, depending on how well the factory has cut the chamber, and the type of chamber cut.

K75-19539 \$10.95

Does your .22 Long Rifle insert move back and forth in your AR upper? The **TACCOM Pressure Plug** will apply a constant pressure on your insert, always keeping it in the most forward position when the rifle is in battery. You can install and remove the pressure plug in seconds with no tools.

1899: GRANDPA DILLON

By Brian Dervin Dillon Ph.D.

If the sun never set on the British Empire, then, as the Irish said, it also never set on its enemies. Several hundred Irish-Americans fought against the British in the Boer War of 1899-1902. Most enlisted after New Year's 1900, in the Transvaal, but my grandfather, W.T. Dillon, an early bird, joined an Orange Free State commando in September 1899. He was encouraged to take a poke at the English by his mentor, an old Irish rebel. Sergeant Fitzpatrick had

deserted the British Army at Khartoum, going over to side of the "fuzzy wuzzies." After many adventures he had made his way to America and joined the California Volunteer Heavy Artillery. The two friends had fought together in the Philippines for more than a year. When Private Dillon's enlistment in the all-Irish Company A of the First California Volunteer Infantry Regiment was up, he took ship for Capetown instead of heading back into civilian life in San Francisco. The battle-tested veteran went to South Africa not to get rich as a gold-seeker or diamond miner, but to "pull the Lion's tail," to fight against the British Empire, and strike a blow for Irish freedom.

Dillon and the Boers would be pitted against the most formidable army in the world, with the proudest tradition of military conquest. Most British commanders and politicians believed that their soldiers would simply march up, flags flying, confront the Boer rabble, and deliver a single volley, thereby terminating the conflict. Training was minimal in the Boer armies, and there was no professional officer corps. Many – if not most – units simply elected their officers. No Boers, not even their generals, apart from a single artillery detachment, even wore military uniforms. Arrogant

British officers were convinced that the Boers would "not stand and fight like gentlemen" but melt away, panicked by the smoke and noise of the very first British volley.

But in reality, by 1899, the vaunted British army was a hollow shell, composed of two kinds of sub-par troops: "garritroopers," or "tin soldiers" skilled only in spit-and-polish barracks duty, and young, inexperienced, slum-dwelling draftees, completely unfamiliar with military life. Neither

group had much, if any, expertise with firearms beyond parade-ground drilling with unloaded rifles. Most British soldiers had never seen, much less shot, a rifle before putting on their uniforms. And British regulars typically spent most of their time in ceremonial activities, polishing their buttons instead of practicing on the rifle range. Consequently, most were terrible shots, incapable of accurate fire. Incredibly, some officers still trained their men to fire by volleys without aiming at individual targets. With volley fire, closing both eyes while pulling the trigger was, if not encouraged, then at least tolerated. Few British soldiers could hit targets at 100 yards; fewer still had ever attempted shots beyond that distance.

The Boers, despite their lack of shiny buttons, were outstanding rifle shots. And, they were on their own

ground. Most Boers were farmers or ranchers, had hunted large African game from childhood and killed the big predators that menaced their livestock. More importantly, the Boer tradition of marksmanship had been reinforced through constant fighting with neighboring African tribesmen for many generations. The Boers were masters of cover and concealment, learned from centuries of hunting and warfare on the veldt. Using both

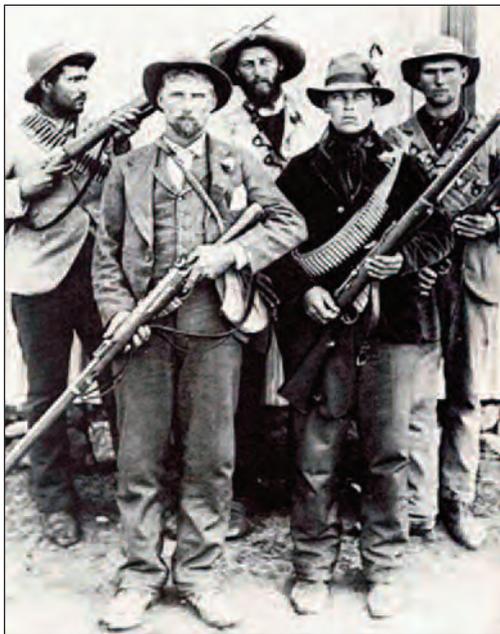

Figure 1: Members of a Boer commando during the initial phase of the Boer War, probably late 1899 or early 1900. The two young men in front are holding captured British rifles, either Lee Metford or Lee Enfield, while those in the rear have Model 1896 Mausers. Most Boer civilians were dead shots, with rifles and ammunition supplied them free by their government. The British soldiers they faced still employed unaimed volley fire. Following his first tour in the Philippines with the 1st California Volunteer Infantry, William T. Dillon joined an Orange Free State Boer commando in South Africa. In late 1899 and early 1900 Dillon fought with the Boers against the British as an Irish-American volunteer. National Army Museum, Great Britain, photo.

PULLS THE LION'S TAIL

while fighting against British garratroopers and inexperienced draftees would be nothing new for them. Concealed Boer riflemen would not be distracted by unaimed volleys over their heads, but instead would concentrate on the real business of war, hitting the poorly trained and incompetently led English troops with aimed fire.

Even town-dwelling Boers were crack shots, for most belonged to shooting clubs, and practiced regularly with modern Mauser rifles. Every Boer city and town sponsored shooting competitions, at first informally, then, beginning in 1897, on a regular, official basis. Ammunition was supplied free of charge by the Transvaal and Orange Free State governments. Competitions between the many different shooting clubs contributed to a very high level of long-range accuracy on the part of Boer marksmen during the War. Boer civilian rifle ranges had targets set out to 700 yards.

The Boer War of 1899 was the result of more than three centuries of antagonism. The Dutch East India Company founded a tiny colony at the southern tip of Africa in 1652. The settlers called themselves *Afrikaners*. Their language, *Afrikaans*, was a mixture of Dutch with English, French Huguenot, German and African-loan words. The British conquered the Cape Colony in 1795, and then put down a Dutch rebellion in 1815, the same year as Waterloo. Five years later 4,000 English settlers were sent to the Cape to overwhelm the troublesome Dutch by sheer numbers. From then onwards the Dutch South Africans considered themselves a separate people, "wandering pioneer farmers," *Trekboers* or more simply Boers, never more happy than when moving away from their English neighbors and repressive English authorities.

In the 1830s thousands of Boers left the Cape Colony a thousand miles behind, gaining, they thought, complete independence from English control. Their new country was separated into two allied territories: the Transvaal to the northeast, and the much smaller Orange River zone to the southwest. From the 1840s through the 1860s the Boers fought a series of wars against their Basuto neighbors to the east, and the Basuto sometimes enlisted the English as allies. The British created a second Colony, Natal, on South Africa's east coast in 1843, leaving the Boers landlocked. To the north of the Boers Matabeleland was conquered by Cecil Rhodes, becoming, not coincidentally, Rhodesia. By the late 19th Century the Boers were nearly surrounded by British colonies and possessions. The Transvaal Boers, resenting English interference, defeated a small British army at the Battle of Majuba, just over the boundary in Natal, on February 27, 1881. After Majuba, the British grudgingly

acknowledged the independence of the Transvaal Boers, but not that of what they now considered the Orange Free State.

Fourteen years later, Cecil Rhodes, now Prime Minister of the Cape Colony, invaded the Transvaal, sending in his own private army of 500 British South Africa Company "policemen" on December 29, 1895. He hoped to capture the rich Transvaal gold fields west of Johannesburg, but the Boers shot the invaders with impunity from concealed positions. By January 2, 1896 the British were completely surrounded by 6,000 irregulars, some of whom were still dressed in their New Year's celebration clothes. The British invaders surrendered after losing 65 killed and wounded, their 500 new British rifles now becoming Boer guns. The Boers suffered exactly one casualty. War fever now gripped all Boer communities. The two republics began buying as many of the most modern arms they could get, mostly from Germany, and stockpiling as much ammunition as they could in anticipation of the next, inevitable, conflict with the hated British. 37,000 brand-new Mauser bolt-action rifles arrived in the Transvaal and were distributed to every male Boer over the age of 16. Meanwhile the Orange Free State moved 1.5 million rounds of 7mm Mauser rifle ammunition, again purchased from the Germans, on the British-owned and operated railroad to its Capital at Bloemfontein.

Anti-British sentiment also inflamed Irishmen in South Africa, and around the world. On September 13, 1899, over a hundred Irish and Irish-American miners formed the first of two eventual Transvaal Irish Brigades. This was under the command of Colonel John Blake, an Irish-American gold miner. Blake was a former U.S. Army officer, a West Pointer and veteran of the Indian wars of the American Southwest. Blake's second-in-command was Major John MacBride, whose life would end in front of a British firing squad. Many of their Irish-American enlistees had recent combat experience in Cuba or the Philippines. No words were minced in the First Irish Brigade's Manifesto:

"England has been a vampire, and has drained Ireland's life-blood for centuries...Irishmen to the rescue!

God save Ireland!"

On September 22, 1899, the British Government ordered the mobilization of an entire army corps for South African service. This provocation triggered the Boer mobilization in response, and on October 9th, an ultimatum was delivered to the British. The Boer ultimatum expired on October 11, and their armies began to deploy the very next day. Since it would be some weeks or months before the main British Army could

arrive, the Boers knew that they were in a race against time. They had to strike before being outnumbered by the many thousands of British soldiers now in the pipeline, slowly moving towards South Africa. Almost every male Boer between the age of 16 and 60 joined a commando, even boys as young as 12. Hundreds of foreign volunteers also came to fight, from many European countries, and from America.

The biggest problem the Boers had with the influx of foreign volunteers was elevating their level of competence, then finding useful places for them. Virtually all European, and many American, volunteers claimed to have been high-ranking officers, and demanded equivalent rank within the Boer forces. The Boers recognized most such claims as fictitious, and refused to put foreigners in charge of Boer troops. Foreign volunteers with combat experience yet without delusions of grandeur,

like W.T. Dillon, were welcomed without reservation. If they could make themselves understood in Afrikaans, then they were enrolled in Boer commandos, if not, they were placed in units with their own countrymen, serving under their own officers. The unpaid volunteers were given rations, guns, ammunition, and horses. Only half of the Irish and Irish-American volunteers who fought with the Boers did so in all-Irish units, the other half, like Dillon, were absorbed into Boer

units as needed. In addition to the two Irish Brigades, and German, Dutch, Italian and other foreign units, were John A. Hassell's "American Scouts." Hassell, an American prospector, was brave and would be wounded twice. His youngest soldier was 13 years old.

Spanish-American War Veteran W.T. Dillon landed at Capetown in September 1899. Since actual fighting had not yet begun, restrictions on travel by foreigners through the Cape Colony to the Boer Republics were not yet in force. Dillon's journey towards his second war, consequently, was unimpeded. Many years later, he told his four sons how beautiful a city Capetown was, and how much the grassy, rolling, South African veldt resembled coastal California. German-speaking William T. Dillon could understand enough Afrikaans to get by, so he joined the Nordfontein

Commando of the Orange Free State led by Lukas Saas, Field Cornet.

All volunteers had to swear an oath. The oath did not compel any transference of national loyalty from the volunteer's home country, only a willingness to obey all orders issued by higher authority and to fight for the independence of the Boer republics. William T. Dillon took his oath on September 24, 1899, and his second war began on October 14, 1899, when his commando rode north to Mafeking. The Boers quickly surrounded the town, and then attacked Kimberley to the southwest. Both British towns were just over the Cape Colony border, and both were poorly defended. Colonel Robert Baden-Powell made an heroic stand inside besieged Mafeking for 217 days with 600 Rhodesian soldiers and became – perhaps – the only untarnished British hero of the entire war. Irregular cavalryman W.T. Dillon

helped make Baden-Powell that hero.

Most Boers were consummate horsemen. Their forces were highly mobile, the commandos fighting either as cavalry or dismounted as infantry, depending upon the circumstances. All traveled light. The mounted Boer carried half the weight of the equivalent British cavalryman, who was loaded down with useless junk. The Boers knew where the water holes were, had the support of the local population, and lived off the land by

hunting. The British army, conversely, could only plod ponderously forward, dragging an immense logistical tail behind it.

Dillon served during the time of greatest Boer success against the inept British forces, and used his Mauser when the opportunity presented itself. South Africa was, at the time, the only place in the world where an Irish-American could not only fight for Irish independence, but also kill Englishmen into the bargain with the approval and assistance of the local government. By December 1899, after three major Boer victories in a single week, the war was going entirely their way. The Boer forces then stood at about 26,000 men, including foreign volunteers. The earliest phase of the Boer War, from October to December 1899, saw the highly mobile Boer mounted units literally running rings around the British

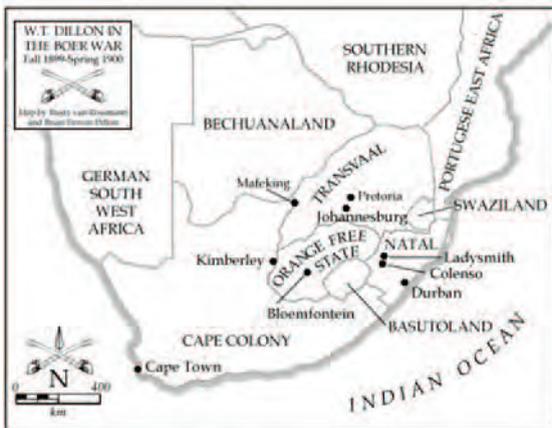

Figure 2: South Africa at the outbreak of the Boer War. The two Boer republics, the Orange Free State and the Transvaal, were surrounded on almost all sides by British colonies or possessions. William T. Dillon landed at Capetown and made his way to the Orange Free State, where he enlisted in a Boer Commando in September 1899. After fighting with the Boers for half a year, he left via Portuguese East Africa to rejoin the U.S. Army as a regular artilleryman. Map by Rusty Van Rossmann and Brian Dervin Dillon.

forces, invading the neighboring British colonies, occupying or besieging British outposts and towns, and scoring victory after victory. The early Boer successes, and their underdog status, earned them nearly universal American support. They had proven the Imperial British lion to be, in reality, just an ineffectual pussycat.

Because most Boer marksmen had spent years honing their shooting skills at long range, during the Boer war they considered shots of up to 500 yards as almost routine. The Boers picked off exposed British infantrymen and artillerymen with rifle fire, rendering their cannon useless. At the battle of Colenso on December 15, 1899, they captured no fewer than 10 British cannon. British field artillery was also rendered impotent by simply picking off, at long range, the horses pulling the guns, despite the average Boer's greater reservations over killing draft animals than the enemy soldiers. Boer marksmen did not usually target British officers over enlisted men, because, in the words of one historian, "their courage was matched only by their stupidity." Leaving the officers alive let them continue making tactical errors favoring the Boers. A Boer marksman made the most famous shot of the entire war, and one of the most incredible long-distance open-sight rifle shots of all time, during the siege of Ladysmith. From the prone position, his bolt-action Mauser supported on a rock, with a single bullet he dropped a British soldier, the middle one of three standing side-by-side, at what was later measured as 1,400 yards.

During the second phase of the war, from December 1899 to September 1900, the British counterattacked in vastly superior numbers. They recaptured most of their lost territory and invaded the two Boer Republics, occupying all the larger Boer towns and cities. The third, final, and longest phase, from September 1900 until May 1902, was when the war sputtered along as skirmishes between the "bitterenders," the few remaining Boer guerillas, and British cavalry while British garrisons held all the population centers. After New Years 1900, so many British troops poured into the Cape Colony and Natal that the Boers were outnumbered three or four to one. A few months later both Boer republics ceased to exist, and Boer men, women and children were herded into concentration camps, where thousands died of starvation.

Up to a quarter of the entire British army in South Africa was composed of Irish regiments, not counting the Irish enlistees in nominally English units. Many Irish conscripts were unhappy to be on what they considered the "wrong side." Some deserted, going over to the Boers. The Orange Free State forces reached their greatest size, approximately 12,000 soldiers, around the first of November 1899. But three months after the new British offensive began, by March of 1900, this body of soldiers had dwindled through death, desertion or dissatisfaction to around 8,000 men. William T. Dillon now saw the writing on the wall. After

fighting with the Boers for half a year, he left South Africa via Portuguese East Africa, the Boers sole remaining "window on the world." Dillon left to return to an earlier fight, back to Manila to re-enlist in the American Army. Already an infantry and now a cavalry veteran, this time he would try the Field Artillery.

In 1902, when the smoke had finally cleared, the three years of fighting was estimated to have caused over 52,000 British casualties. More than 20,000 were dead, a third killed in action, the remainder dead of disease. On the Boer side, more than 4,000 soldiers were K.I.A., while another 7,300+ died in British prisoner of war camps. The most appalling figure to emerge from the war concerned civilians: more than 26,000 Boer women and children died of disease or of outright starvation within the British concentration camps. Although Black Africans did not fight on either side, an estimated 17,000+ died as a direct result of the war, killed while serving as non-combatant laborers, starving to death inside besieged towns, or executed out of hand by both sides as suspected spies or for aiding and abetting the enemy.

If the Boer War of 1899-1902 has been forgotten by most Americans, we still remember a few men made famous by that conflict. Sir Arthur Conan Doyle, creator of Sherlock Holmes, was so appalled by the average British soldier's miserable Boer War marksmanship that he later helped found the *British Federation of Rifle Clubs*, in effect, the English equivalent of the American *National Rifle Association*. Winston Churchill, the half-American war correspondent and escaped prisoner of the Boers, became a household name. The complete lack of field skills and preparation evinced by the average, slum-bred British soldier inspired Colonel Robert Baden-Powell to begin the international Boy Scout movement, today more popular in the United States than its English birthplace. Mohandas K. Gandhi became the hero of Indian Independence from Great Britain almost a half-century after his service as a Boer War stretcher bearer.

The Boer War was a crushing defeat for the Boers and their Irish volunteer allies. Some Irish deserters from the British Army who had fought with the Boers managed to escape to America. Others, when caught, either in South Africa or back home in Ireland, were summarily executed. Many captured Irish-Americans were sent to British prison camps as far away as Ceylon. A few Irish Boer War veterans continued their war against England, eventually fighting in the 1916 Dublin Easter Rebellion. Major John MacBride, second-in-command of the Transvaal Irish Brigade, was one of the fifteen Irish patriots executed by the British in May 1916, after their surrender. Finally, a few Irish-American volunteers like my grandfather, W.T. Dillon, went back into the U.S. Army after fighting with the Boers. They were venerated as heroes for the rest of their lives by their fellow Irishmen, both in and out of uniform.

KEEP YOUR GUNS!

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar steel stock and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Stainless	K75-18600	\$49.99

ElZetta

Tactical Flashlight Mounts

Every Elzetta ZFH1500 Flashlight Mount for AR15 rifles and ZSM Tactical Shotgun Flashlight Mount comes with sizing adapters, giving the mount the ability to accommodate flashlights from 0.7 to 1.05 inches (18 to 27 mm) in diameter. This includes flashlights from popular manufacturers such as InForce®, Streamlight®, Pelican®, Laser Devices®, SureFire® and of course, the Elzetta® ZFL-M60. (Sizing Adapters are not required when using an Elzetta ZFL-M60 or other 1-inch lights.) The Elzetta ZSM is made from the same advanced glass-filled polymer that has proven itself in the popular Elzetta ZFH1500.

The NEW Elzetta ZRX Tactical Flashlight Mount is made for flashlights with standard one-inch bodies and will accommodate a range from 0.94 to 1.04 inches (23.8 to 26.4 mm). This includes many popular tactical flashlights including the Elzetta ZFL-M60. The Elzetta ZRX clamping rings are made from Mil-Spec Type III Hard Anodized aluminum, the body is a glass-reinforced polymer and the hardware is steel. The ZRX weighs 1.1oz (32g).

*Sand not included.

The Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snapper-release buckles. Dimensions: 66" x 27.75"

K75-18146 \$65.00

This three-piece shooting bag set is an incredible value for the money! The bags are made of durable, water-resistant 600 denier polyester and provide a steady and solid shooting system for long guns and handguns. I filled the ones in the photo with walnut tumbling media and found them to be easy to fill and much lighter to carry than when filled with sand.

Comp-Tac's Trojan Horse Long Gun Case

The Trojan Horse Long Gun Case is the first of its kind: a safe, comfortable, simple and unobtrusive way to carry your long guns with you. No longer do you need to worry about a casual observer spotting you with a "Gun" case as you transport your long guns to and from your car. Instead all they will see is a person with a sports bag. It measures 36" Long, 4"-15" Wide, 4" Deep and features rigid side panels that provide concealment with no printing; an adjustable, padded shoulder strap with side-release buckle on either end; a heavy duty zipper with tactical speed pull attachment for quick deployment; inside divider with Molle straps; and two inside zippered pockets. Will hold up to 20" long barrel with collapsible stock.

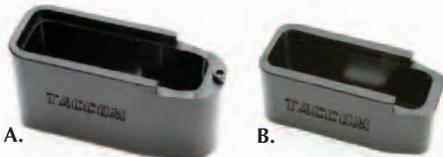

Standard Trojan Horse Long Gun Case	K75-19388	\$75.00

Millett Designated Marksman Tactical Scope

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The "Dot in a Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to

500 yards.

Compact design,

30mm tube and

bright illumination of the reticle are just a

few of the many features of the DMS-1. Bright

red illumination of the reticle adds to the quick-

ness of the sighting system in day and low-light condi-

tions. At one power it works well as a reflex sight and at

longer ranges the four-X magnification gives increased ac-

curacy.

K75-19458 \$249.95

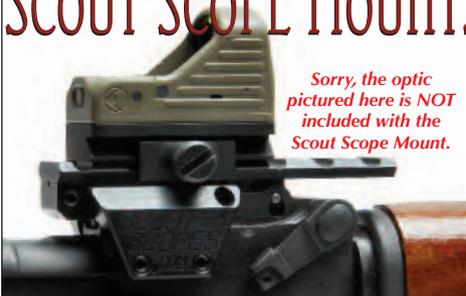

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

SCOUT SCOPE MOUNTS FOR AK, SKS RIFLES

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	K75-25374	\$79.99

Tactical Sports 45°-Offset Auxillary Optics Mount

A twist of the wrist is – quite literally – all it takes to switch from your long-range optic to a CQB red-dot sight with Tactical Sports' 45-degree Offset Auxillary Optics Mount! Fits most Picatinny rails. (Pictured with Bushnell's TRS-25, which is NOT included!)
45° Offset Optic Mount K75-14472 \$14.99

TACCOM, LLC 90° C-More Mount

You won't believe how much this will decrease your times from initial sight picture and target transition. You'll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE (Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1" to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you'll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

The Kimber

With its blackened aluminum alloy slide and silver frame, the Kimber Rimfire Super is a handsome pistol.

The Kimber Rimfire Super would make an excellent understudy gun for economical rimfire practice with the 1911-pattern control layout.

The ejector is a long, hooked piece of metal pinned to the rear of the barrel.

Above: The frontstrap and underside of the trigger guard are checkered 30 lines per inch.

Right: The mainspring housing is 20 lpi.

Trigger is of the "long" variety – skeletonized, aluminum and fitted with an overtravel stop that was excellently adjusted straight from Kimber.

By Duane Thomas

Kimber's Rimfire Super is a Government Model sized, 1911-pattern auto chambered for .22 Long Rifle. Both its frame and slide are made of 7075-T7 aluminum; therefore it weighs 23 ounces unloaded. Those used to hefting an all-steel Government Model will be shocked at how light the Rimfire Super is in the hand.

The slide, in addition to cocking grooves front and rear, has been flat-topped, serrated along most of its length, and fluted to either side of the serrations. This slide configuration means the Rimfire Super will not fit into a tightly molded holster for a standard 1911.

Moving inside the gun, we note the absence of some things we're used to seeing on 1911s, like top barrel lugs and a swinging link. This is a blow-back; therefore no need for lugs and link since the barrel doesn't tilt downward during cycling. We also don't see a frame mounted ejector; rather the ejector is a long piece of metal pinned to the rear of the barrel, with an inward facing "hook" situated so it's in the path of a casing as it's pulled out of the chamber by the extractor.

The barrel has a 1:16 right-hand twist, and is actually produced by Kimber, not a subcontractor.

The thumb safeties are ambidextrous, the front sight tall and slightly undercut, the rear sight adjustable and patterned on the famed Bo-Mar Combat Sight. The lugged, high-rise beavertail grip safety would not reliably disengage with the straight-thumbs grip I use. Were this my gun, a bit of grip safety sensitization would be in order.

The underside of trigger guard is checkered 30 lines per inch; the tab of the slide stop is also checkered 30 lpi, according to my calibrated eyeball; the mainspring housing goes 20 lpi. The external slide stop does not automatically hold back the slide after firing the last shot. The slide stop may however be manually operated to lock the action open, as when sitting the gun down on a bench after a string of fire.

The trigger is of the long variety, skeletonized and aluminum. Trigger pulls, according to my NRA weight set, broke at 3-3/4 pounds, with approximately 1/8-inch takeup and very, very little in the way of creep and overtravel.

Magazines are molded polymer 10 rounders. Some folks, discussing Kimber .22 1911s with me, have commented, "I just wish they hadn't cheaped out with the plastic magazine." Those people reveal their ignorance. The most common esti-

Rimfire Super

The barrel crown is deeply recessed to protect from accuracy destroying damage.

The slide has been flat topped, serrated longitudinally, and fluted on both sides of the serrations.

The tab of the extended thumb safety, even when combined with a high-rise beavertail grip safety, does not expose the underlying hole in the frame, a rarity among factory and even most custom 1911s.

Safety levers are ambidextrous, and actually produced by Kimber, not an outside vendor.

Best accuracy at 50 feet was .60" with four rounds going into one hole, with inexpensive Remington High Velocity.

The Kimber Rimfire Super posted sub-inch groups at 50 feet with a variety of ammunition.

mate, among those in the know, for what something like the precision injection mold for the Kimber .22 magazine costs was, "About \$60,000." It would have been much less expensive for Kimber to simply have their magazines made of sheet metal by an outside vendor. They spent the extra money, making the magazines themselves, because it gave them more control over tolerances, and a better final product.

The Kimber Rimfire Super is set up to work only with High Velocity ammo, Standard Velocity won't reliably cycle the action. I tested this gun with eight different .22 loads. Those marketed as "High Velocity" included the Dynamit Nobel 40-gr. Copper Plated HP, Eley 40-gr. LRN, Federal "Classic" 40-gr. Copper Plated RN, Federal Lightning 40-gr. LRN, and Remington 40-gr. LRN. Hyper Velocity loads on hand included the Federal "Classic" 31-gr. Copper Plated HP, Remington Viper 36-gr. JTC, and CCI 40-gr. Mini Mag HP.

Accuracy was tested with 5-shot groups from the bench at 50 feet, the maximum distance possible at the indoor range on which I do most of my shooting. Best accuracy saw four rounds go into one hole, a fifth opening things up to .60" with,

amazingly enough, plain ol' Remington High Velocity outshooting even the refined, and pricey, Dynamit Nobel and Eley. In second place was Remington Viper Hyper Velocity at .74"; Dynamit Nobel came in at .86"; Federal Classic High Velocity at .90"; the Eley a disappointing (comparatively) 1.05".

Federal Lightning High Velocity and Federal Classic Hyper Velocity proved too lightly loaded to cycle the action. Group sizes suffered accordingly, going as high as 3-1/2". Obviously a load so light it cycles inconsistently, or not at all, requiring hand cycling to complete, leads to a gun that goes into battery very inconsistently, thus horrible accuracy. As with all .22 autos, it's worth choosing your ammo for best accuracy and functionality with this gun.

With ammunition that actually worked the action, however, I was very impressed with the Kimber Rimfire Super. It suggests itself for anyone who wants an understudy gun for their 1911, that may be fired by ammunition much less expensive than their main centerfire weapon, or anyone who just appreciates a very well-designed and produced, beautiful handgun.

Close & Ready Bedside Holster Caddy

Holster NOT Included

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

K75-18046 **\$29.95**

Attain Peak Accuracy With Hornady's L-N-L O.A.L. Gauge, Bullet Comparator

Overall Length Gauge

The initial distance a bullet must travel when fired (from the cartridge case mouth until it engages the rifling) is absolutely critical to achieving peak accuracy. A free run of .010 to .060 is commonly employed for accurate target, varmint and hunting loads. Consequently, knowing and being able to alter the dimensions, as needed, is vitally important to precision shooters and handloaders.

The **M2 Chronograph** comes with sensors, screens and one two-foot mounting bracket. A nylon carrying case and tripod are available options. The **CED7000 Shot Timer** is a breakthrough in technology. No other timer to date offers this combination of advanced features, compact size and light weight. This is the "next generation" Shot Timer here today! Comes with a rechargeable battery with low-battery LCD indicator and a universal charger.

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.)	K75-19220	\$29.95
Advanced Trauma Kit (A.T.K.)	K75-19322	69.95
